Animals, Fish, &c.—These are much the same as in the other colonies, and comprise the kangaroo, the opossum, wombat, bandicoot, and other marsupial animals (including a marsupial mouse), and the native dog or dingo, and native cat. The dingo still attacks the flocks of the farmers, though efforts are made to exterminate it, the Government paying rewards for its destruction, and strychnine is largely used on many stations. Birds of the parrot and cockatoo tribe, sea birds, and the swallow species are numerous, but there are very few native song birds. Emus, black swans, wild turkeys (a specimen of bustard), ibis, gnow, eagle hawks (being very destructive to lambs and poultry, the Government pays 2s for every one destroyed), and other large birds are met with far inland, while pelicans and numerous varieties of cranes are common on all the rivers. There are several kinds of snakes, many of them poisonous. The waters that wash the West Australian coast abound in fish, such as schnapper, whiting, flathead, bream, garfish, taytor, trevally, flounders the jew-fish (peculiar to the colony), &c.; whales, sharks, seals, turtle, dugongs, and alligators are also found. Insect life is as prolific as in the other colonies, mosquitoes, flies, green gnats, ants, and many others swarm in different localities. It is stated that some kinds of animal life in this colony are peculiar, presenting curious and anomalous forms, which seem to be remnants of an ancient world.

Population.—By the census returns taken on the 5th of April, 1891, the population, exclusive of aborigines, numbered 49,782—29,807 males, 19,975 females. The census showed that there were 917 Chinese in the Colony—male 912, female 5. At the previous census of 1881 the population was 29,708—17,062 males, 12,646 females.

The estimated population on the 1st of January, 1900, was, males 112,290, females 58,742, or a total of 171,032. During the year 1899 the number of births was 5,174, consisting of 2,636 males and 2,538 females; and the number of deaths 2,324; 1,513 males and 811 females. Chinese numbered 1819: 1,812 males, 7 females. At August, 1900, the estimated population was 179,937: males 117,183, females, 62,754.

Arrivals and Departures.—During the year 1899, 20,278 (13,142 males, 7,136 females) persons arrived by sea in the colony; the departures during the same period were 20,225 (14,029 males, 6,196 females).

Births, Deaths, and Marriages.—During 1899 there were 5,174 births registered: 2,636 males, 2,538 females; deaths, 2,324: males 1,513, females 811. There were 1,671 marriages, of which 538 were celebrated by the Church of England, 370 by Church of Rome, 333 Wesleyan, 75 Congregational, 150 Presbyterian, 25 Baptist, 9 Salvation Army, 1 Hebrew, 18 Church of Christ, 1 Seventh Day Adventists, 1 Mohammedan, and 150 District Registrars. Of the ten years (1890-99) the highest rate of mortality was in 1895 (17·78), the lowest 1890, 12·06. Mean death-rate for these ten years was 15·76 per 1,000. The mortality under one year during 1899 was 724; under five years, 205; 5 years and over, 1,395; the percentage of total births per 1,000 of mean population was 30·64, and the percentage of total deaths, 13·76; total marriages, 9.89. Excess of births over deaths, 2,850. For the half-year ended June 30, 1900, marriages numbered 897; births, 2,753; deaths, 1,142.

Religion.—The various religious denominations according to latest statistics are thus represented in round numbers, full particulars not being available: Church of England, 94,000; Roman Catholics, 24,000; Wesleyan Methodists, 4,500; Baptists, 250; Church of Christ, 400: Salvation Army, 800; Hebrews, 675; Mohammedans, 450; Congregationalists, 600; and Presbyterians, 5,000. The colony contains more than 600 places of worship (including buildings where services are held); the Church of England has 209 (including the cathedral at Perth), and 36 parsonage houses. The Roman Catholics have a cathedral in Perth, and 126 chapels, &c., in various districts of the colony (including several private houses used as chapels). The Wesleyans have 140 churches and places of worship, the Congregationalists 40, Presbyterians 21, Baptists 12, Church of Christ 7, Salvation Army 26, Seventh Day Adventists 5, Hebrews 6, and Mohammedans 12. The whole colony constitutes a Church of England diocese, governed by the See of Perth, in which city is the Bishop's residence. The present holder of the See is the Right Rev. Charles Owen Leaver Riley, D.D. The governing body of the Church of England in Western Australia is the Synod, established in 1872, consisting of the Bishop (who is the president, and has the power of vetoing any Bill), all licensed clergymen, and lay communicant representatives elected by the congregations; no act being valid unless it carries the consent of the three orders. The Synod must meet at least once a year, and a dissolution and fresh election of lay members must take place every three years. The appointment of clergymen to vacant cures is made under regulations laid down by the Synod. The election of Synodsmen usually takes place at Easter, and the Synod assembles in October. The colony also contains two Roman Catholic bishoprics, the diocese of Perth and the diocese of Geraldton, established in 1898; and the denomination has a number of handsome churches in the leading towns, and missions, especially one for the aboriginals at New Norcia and one at Subiaco for orphan children, both of which are admirably conducted, and in all respects flourishing. In 1898 the Rev. Father W. B. Kelly was appointed Roman Catholic Bishop of Geraldton. The Sisters of Mercy have been established in the colony since 1846. The other nuns are: Sisters of St. Joseph; of Loreto; of St. John of God; and Presentation Sisters. The nuns of St. John of God have for their chief end the care of the sick; hospitals conducted by them are carried on at Subiaco and Kalgoorlie. The Jews have increased in the colony, and have formed "congregations" in Perth, Coolgardie and Fremantle.

The general Revenue of the colony contributed in 1896 the sum of £1,771 10s. 1d. for the maintenance of ministers of religion, which was apportioned to each denomination according to the numbers at the last census, the proportion received by each having been as follows:—Church of England £1,002 2s. 3d., Church of Rome £504 5s. 11d., Wesleyans £184 6s. 9d., and Presbyterians £80 15s. 2d. In 1897 the commutation of the Ecclesiastical Grant amounted to £17,715. The grants hitherto made to the churches were abolished by the Ecclesiastical Grant Abolition Act, 1895, but sums in commutation were paid.

Sunday Schools.—There are more than 250 Sunday-schools in the colony.

Education —The educational system is framed under the "Elementary Education Act of 1871," and "Amendment Acts, 1893 and 1899." By the former Act, schools are divided into Elementary and Assisted, but by the abolition of Assisted Schools Act of 1895 State aid was withdrawn from the latter after December 31, 1895. The elementary schools are under the control and supervision of the Minister of Education and the Local District Boards, who act generally as boards of advice. Members of these Boards are elected for three years. Any person is qualified to vote at these elections who has a household of £10 annual value, or is the parent or guardian of any child attending a State school. The first election of District Boards of Education under the Amendment Act of 1893 was held in December, 1895. In the Elementary schools five hours a day are devoted to secular instruction. Half an hour, under the provisions of a conscience clause, may be devoted to general religious instruction and moral lessons; but no catechism or religious formulary of any kind may be used. Under the Amendment Act of 1893 ministers of religion, subject to certain regulations, are permitted to instruct the children of their denominations for half an hour during school hours.

The Government Schools are of six classes:—State, Half-time, Provisional, House-to-house (or schools in sparsely populated districts), Special and Evening schools.

During 1899 there were 207 Government Schools in operation. At the beginning of 1900 there were 205 schools, divided as follows: State schools, 125; half-time schools, 14; special schools, 6; provisional, 56; schools in sparsely populated districts, 4. The number of scholars on the roll was: 8,620 boys and 7,433 girls; total, 16,053 The teachers, including serving mistresses, numbered 473. Average attendance, 12,465; comparison of attendance to enrolment, 79 per cent.; cost per head of enrolment, £3 11s. 9d.; per head of average attendance, £4 12s. 5d. Total expenditure of year ended December 31, 1899, £62,028; in 1898, £57,358.

During 1894 payment by results in Government schools was abolished; the amount expended in Elementary education increased, teachers' salaries augmented, and the provisions for enforcing compulsory attendance improved.

During 1895 schools were classified according to attendance; teachers were appointed and classified with fixed rates of salary, and an improved standard of instruction adopted. In 1898 a further improvement took place. To cope with the increasing size of the schools in the more populous parts a new scheme of classification on the same basis was devised, and the curriculum was considerably altered so as to bring education more into line with the newer methods and systems adopted in older countries.

In 1899 the manual training side of the department's work has been developed Clay, modelling and a drawing curriculum on the most modern and approved lines have been introduced. Cookery classes have also been established.

During 1898 separate infant schools were established.

Compulsory school attendance is enforced, and is controlled by the department.

Two visits are paid each school by the Inspectors of Schools, one for examination, and one for inspection, the latter being without notice. The salaries of the teachers are fixed by the regulations, and are dependent on the classification of the school, and the certificates they hold. The Roman Catholics have admirable educational establishments throughout the colony. Several private seminaries for young ladies have also been established.

Technical Education.—In 1897 preliminary evening classes were established at the Central Schools in Perth and Fremantle as a first step towards Technical Education. The progress made during 1899 and 1900 was very satisfactory.

Western Australia has no University. A "High" school was established in Perth, in 1876, by an Act of the local Legislature. The instruction in the High school is exclusively secular, and the head-master must be a graduate of a recognized University, not being a minister of religion. Three scholarships, each of the value of £50 per annum, tenable for three years, are open for competition annually to boys and girls attending the primary schools of the colony. Bursaries of the value of £10 each are also offered for competition. Five senior exhibitions of the value of £25 each and five junior of £15 each may also be competed for by both sexes.

The Inspector-General of Schools considers the educational work of the year very encouraging, especially in respect to the new curriculum.

A New Act.—One of the most important events of the year was the passing of the Education Act, giving free education to all children of compulsory age and systematizing the work of compulsion. Very important provisions dealing with private schools have also been passed, which will enable the Government to assure itself that children not immediately under its control are not falling behind the standard of education required for the welfare of the State. Age and not attainment is now the reason for exemption, and an every-day attendance may be insisted upon.

The College of the Christian Brothers, Perth, is one of the finest establishments of the kind in any of the colonies; the Brothers also have a college at Albany and another at Fremantle. In all these places the Brothers conduct elementary schools in addition to the work of higher education. Nuns of various Orders teach primary and secondary schools in chief centres of population.

Mineral Resources.—The number of districts in which "mineral leases" are held shows that the development of the mineral wealth of the colony as a whole is not being confined to that of its gold deposits. There were in 1899 268 leases covering an area of 27,377 acres; of these, coal occupied 22,213 acres, and tin, 2,528 acres. On this important subject the very concise but full report furnished by Mr. H. P. Woodward, F.R.G.S., F.G.S., F.I. Inst., gives the best information. Until within recent years it was generally considered that Western Australia was almost destitute of mineral wealth, but this has, fortunately, proved to be incorrect, for now it is found that belts of rich mineral country extend from one end of the colony to the other. The first discoveries were made in the Victoria District as far back as 1842, from Geraldine on the Lower Murchison River, south by Northampton, nearly to Geraldton in Champion Bay. These consisted of rich lodes of lead and copper, which were very successfully worked for many years, but owing to the great fall in the value of those metals, and the very small percentage of silver contained in the lead, these mines had to stop work, though there is still a hope that the industry of lead-mining may be revived The lead occurs in the form of carbonates and sulphides of great richness, and the lodes, which are often of great size, contain so little gangue mixed with the ore that it is very easily dressed. The copper ores are also very rich, occurring in depth as sulphides, but near the surface large masses of carbonates and ferruginous oxides, with a certain amount of native copper are met with. These lodes ought decidedly to be worked again, now the price of copper has risen and labour-saving appliances have been brought to such a stage of perfection.

Tempted by the reward offered by the Government of £10,000 for the first 10,000 tons of lead smelted in the colony, also by the ready market for "pig" lead, which exists in China *viâ* Singapore, smelting works were erected, but failed either through bad management or imperfect furnaces and machinery. This reward has long since lapsed.

Graphite has been found at the head of the Donnelly River, about thirty miles S.E. from Busselton, and it is anticipated that the large size of the deposit, the cheapness with which it could be worked, and its short distance from good roads will render it of great value. A deposit has also been worked at Kendenup, but the district is too far from the market.

Galena.—Several small but rich lodes of galena have been found in the Darling Range to the south of Perth, but, like those at Northampton, containing very little silver. To the south-east of Roebourne there are some very rich lodes of galena, but these also are too small to pay for working. In the Kimberley district galena associated with gold occurs, but only in small quantities. The gold is in a free state, and in the rich specimens is plainly visible to the naked eye.

Copper.—Since 1845, when the first ore was shipped from these mines, there have been exported from the colony upwards of 12,600 tons of copper, and 33,600 tons of lead ore. Finds of copper have been made south of the Irwin River, which have only been slightly worked, as the expense of cartage was too great; "but now that copper is better in price, it is to be hoped that mines will be started in them, especially as they are close to the line of railway from Perth to Geraldton." To the east of Roebourne there is one of the largest and richest copper lodes in the colony, and it is now being worked successfully by a large company—the Whim Creek Copper Mining Company; and, to the south of that town, there are also several copper lodes that were worked some years ago. In one of these the copper occurs as a brown ore; it is a mixture of carbonate and oxide of copper with oxide of iron, and gold is often visible in it. The Northampton mining field, where lead is also found, has also been re-established, but little work was done in 1899–1900. The Phillips River mining district was proclaimed in 1899. Copper also occurs in the Wongan Hills, the Darling Range, the Glenelg Range, Yandanooka, Mount Margaret, and in several other places. Total export for the year 1899, 1991 tons, value £41,452. Total quantity raised to January 1, 1900, 9,982 tons, value, £91,208. During the first half of 1900, 2,366 tons were raised.

Coal.—In 1846 the brothers Gregory found coal on the north branch of the Irwin River. This was afterwards reported on by Dr. von Sommer, who says that there were two seams, one 6 ft., the other 8 ft., but the discovery was not further investigated till forty years afterwards. When it was inquired into by two private colonists, Messrs. Raymond Eliot and G. Bell, a mistake was made as to the exact locality of the Gregory's find, and they discovered coal a considerable distance from what is indicated on the map as "the coal seam." The persons mentioned found coal in the bed of the river, and traced it up to its source, where they discovered a seam 4 ft. thick, which on working into the cliff opened out to 6 ft. Under the heading of Coal, Mr. Woodward has written:—"There are some seams of inferior coal on the Irwin River, and though the seams are from three to six feet in thickness, and coal is of true carboniferous age, yet none have at present proved to have a marketable value. This coal would be very useful for many purposes in a populous country, but here, where wood is so abundant and always close at hand, there is no demand for any, except a first-class steam coal. The Midland Railway Company have put down several bores for coal, but their labours have not as yet resulted in the discovery of any seams of commercial value. The carboniferous formation certainly extends for 300 miles to the north of the Irwin, and probably all the way to Kimberley, so that there is a very large district yet untested in which superior coal seams may be found.

Some brown coals of poor quality have been found near Albany; also some good coal at Flybrook, to the westward of Augusta, in Flinders Bay, near Cape Leeuwin; this coal is anticipated to turn out of great value to the colony in the future.

The Collie coalfield, situated in the southern part of the colony, near Bunbury, having been proved by the Government, by means of bore holes put down by hand-boring plants and a diamond drill, to cover a large area, and to contain coal seams of considerable thickness and quality, was, during 1896, proclaimed a mineral district under the Mineral Lands Act, an area of 115 square miles being enclosed in the district. Mineral leases, each of 320 acres, were then surveyed and thrown open for application by the public. The Collie Coalfields Proprietary Co. was the first public company formed to work coal measures of the basin of the Collie river mining district, and holds 16 leases containing about 4,730 acres, and the property is connected by rail with the railway system of the colony. The present workings are confined to two seams overlying the seam worked by the Government mine—("the Westralian Wallsend Colliery")—which, at a depth of 45 feet below the present workings, has been proved to be 13 feet in thickness. The new township of Colliefields is growing rapidly.

Twelve samples from the Collie-field were assayed in London with the following average results :—Water, 11·60 ; gas, 32·10 ; sulphur, 0·90 ; fixed carbon, 51·20 ; ash, 4·35. The coal has a very high heating power ; it forms no clinkers or slag, gives off little smoke, and the percentage of ash is small. The output of coal is about 1,500 tons weekly, and is increasing. Total coal raised to January 1, 1900, 57,844 tons, value £27,712 ; for the year ending December 31, 1899, 54,336 tons, value £25,751 ; during the first half of 1900, 50,899 tons were raised.

Iron. — Mr. Woodward says that Western Australia is essentially an iron country. There are immense lodes of magnetite and hematite iron awaiting development. So large is the quantity of iron that it is almost impossible to work with any degree of accuracy with a magnetic compass. Areas have been applied for for supplying smelting works, which have been erected. In the Weld Range, at the head of the Roderick river, is the celebrated Wilgie Myah, said to be probably one of the richest iron lodes in the world. The deposit consists almost entirely of hematite, which, at the surface and in the cavities, assumes the botryoidal form which has given rise to the idea that it is a lava flood. It is thought that the natives have worked this field for centuries. Total raised during year 1899, 12,852 tons, value, £8,939 ; this is the first year of any record of the production of this mineral.

Tin.—At the end of 1888 stream tin was found on the Blackwood river, near Bridgetown, by Mr. Stinton, which led to the discovery of very rich deposits, extending over an area of about a hundred square miles, and since the price of tin has so much advanced, active prospecting is going on in this locality, and a large number of claims and leases have been pegged out, and the field (known as The Greenbushes Tinfield) has proved to be very rich and extensive. The total export for the year 1899 was 308 tons, valued £23,163. Stream tin has also been found on the goldfields at Roebourne, but has not as yet been worked. Tin is also found at Pilbarra (near Marble Bar) and the Nullagine. Total quantity raised to January 1, 1900, 2,000 tons, value £95,797 ; during the first half of 1900, 254 tons were raised, value £17,596.

Other Minerals.—Antimony has been found in the Roebourne district ; zinc in the Geraldton district ; and in 1897 a lode was found to the south of Perth ; mica at Bindoon, Northampton, Darling Ranges, Pilbarra, and Coolgardie ; kaolin in the Darling ranges ; asbestos at Tambourah (Pilbarra goldfield), and manganese in various parts of the colony. During 1898 the Government offered a bonus to any party who would export fifty tons or over of asbestos, but it is now discontinued. Leases for diamond mining have been taken up in the Nullagine district.

Gold.—The auriferous area of Western Australia extends from the sixteenth to the thirty-third parallel of S. lat., or upwards of 1,200 miles from north to south, with a known breadth of at least 100 miles ; in fact, there are no less than 324,000 square miles to the 18 proclaimed goldfields, while there are thousands of square miles of unexplored country to the eastward which, there is every reason to believe, will reward the efforts of the prospector with the discovery of auriferous belts probably equal in extent and richness to the fields already proclaimed. Mr. R. Austin claims to have discovered the auriferous regions of the colony in 1856–8. In the year 1860 a general conviction became settled that West Australia was auriferous, and the Government employed Mr. Hargreaves (the discoverer of gold in New South Wales) to visit the colony and report. His opinion was that gold in payable quantities would never be found in the SW. corner of the colony. Payable gold has, however, been found in this locality. In 1868 gold was discovered at Peterwangy, at the head of the Irwin river, but it unfortunately never proved to be in payable quantities. This was unfortunate, as it attracted a large number of diggers, who went away disgusted, giving the colony a bad name. It was next found by Mr. Hassell, at Kendenup, near Albany, but owing to the difficulty of extracting the gold, owing to the presence of arsenical pyrites, it has never been thoroughly tested. In July, 1869, the Government offered a reward of £5,000 for the discovery of a workable goldfield within 300 miles from any declared port of the colony. In 1882 the late Mr. Hardman visited the Kimberley District, and in his report in 1885 mapped in where gold was likely to be found, and his indications were in every case proved to be correct ; but the alluvial workings were very shallow, and soon worked out, and the district was overrushed. Hall's Creek is the official centre of the Kimberley Goldfield, which has a proclaimed area of 46,866 square miles. It is connected with Perth by telegraph, and a fairly good road, of about 250 miles, runs from the field to the port of Wyndham. In March, 1887, Mr. Glass found gold about ninety miles E. of Newcastle (in the Eastern District), which induced the settlers of the district, with the aid of the Government, to send out a prospecting party under the leadership of Mr. Colreavy, who worked all over the country from Newcastle to the Yilgarn Hills, about 200 miles East of Perth, without success. This party was followed by Mr. Anstey, who found a very rich patch in the Yilgarn Hills. Later on Mr. Colreavy went out again on his own account, and found two or three gold-bearing reefs ten miles South of Anstey's find. The country was quickly rushed, and Mr. Riseley found further south another rich patch of reefs, which he called the Southern Cross, and Mr. Parker who went still further south was rewarded by another rich discovery. With reference to this field Mr. Woodward says :—At the end of 1887 gold was found by Mr. Anstey on the Yilgarn Hills, about 200 miles East of Perth, which led to that region being largely prospected, and to the discovery of a belt of country, extending for about 80 miles in a southerly direction, rich in gold-bearing quartz reefs. Several companies are now at work in the different divisions of this field ; the following may be mentioned :—"Golden Valley" in the north, "Southern Cross" next, and "Parker's Find" to the south. To these must be added the district known as Mount Jackson, about 70 miles NNW. of Southern Cross, and which has a promising future. Between these points other gold-bearing reefs have since been discovered, and the field from North to South, may now be said to embrace a distance of about 100 miles. The great difficulty to successful working has hitherto been the scarcity of water, but the Government have established a Water Supply Department, which is successfully grappling with the water question. The rocks on this line of country are more or less indurated slates and schists, with here and there dykes of granite and other intrusive rocks. The reefs are, as a rule, large, and extend to a great length on the surface, but they are not well defined, and seldom have walls on both sides, one side generally splitting up into a large number of leaders, most of which are rich in gold. The stone itself is solid and of a quartzite nature ; it contains a little carbonate of iron, both iron and copper pyrites, manganese and chlorite, but not in sufficient quantities to interfere with the extraction of the gold. The stone, as a rule, is very rich, often containing as much as six ounces of gold to the ton, and the trial crushings that have been made prove that there is, at any rate in one or two claims, a great mass of stone carrying about two ounces to the ton. Gold is also found in this field in a great dye-like mass of a greenish colour—probably a decomposed serpentine. Some rich deposits of alluvial gold have also been found, but, owing to the scarcity of water, little of the ground has as yet been tested. There cannot be the slightest doubt that this field presents one of the finest surface indications yet met in Australia. Gold has also been found in a small reef in the Wongan Hills, but not in sufficient quantity to pay. In 1888 some very rich reefs were found about 100 miles Eastward of Roebourne Bay, and many of them were opened up. The stone is a milky quartz with occasionally a bluish tinge, containing a large quantity of antimony associated with the gold. The reefs run east and west and are the only known metalliferous lodes in the Colony running in this direction. The rocks are slates, often calcareous, with hard ridges of banded quartzite and large dyke masses of amygdaloid standing up out of the plain. There are also some very rich deposits of alluvial gold, extending over 300 miles of country, and following the coast to the east and west. Until recently most of the finds have been in shallow ground, but now richer deposits of gold are being found in the deeper alluvial deposits, and these are often associated with cementing deposits, similar to those occurring in the other colonies. The very rich reef discovered at Mallina near Roebourne was floated into a company in Sydney, known as the "Alfred Argle Gold Mining Company." Judging from the large quantities of gold already obtained in this district, it must be a very rich gold-bearing tract of country, and when the alluvial gold ceases to be the all-absorbing attraction, the reefs will receive much greater attention. Gold has also been found at Mulga Mulga, to the north of Austin's Lake, but is not being worked at present, owing to the want of money for that purpose. It also occurs on the Greenough, and in 1890 new discoveries were opened up on the Ashburton. In July, 1891, gold was discovered on the Murchison, eastward of Geraldton, and during the year the field produced a very large amount of the metal, and was duly proclaimed in September of that year. All along the face of the Darling Range there are large reefs full of pyrites, most of which carry more or less gold, and some are very rich.

In 1892 rich auriferous quartz reefs were discovered near Coolgardie by a man named Bayley, about 100 miles due east of Southern Cross.

Gold was soon after discovered at Hannan's (now called Kalgoorlie), on the "Thirty Mile," situated some 30 miles east-north-east of Coolgardie ; and also at Dundas, about 120 miles north of Esperance Bay, the former being the most important gold-producing centre of the colony, and the latter progressing favourably and rapidly increasing its output.

Further rich deposits were discovered in 1895 in the neighbourhood of Lake Darlôt, eastward of the source of the Murchison river, which neighbourhood has now been declared a goldfield.

Donnybrook district was discovered in the latter part of 1898 by Bourke and Hunter.

On the 20th January, 1898, the Government offered a reward of £500 to the first person discovering alluvial gold at a depth below 30 feet from the surface on any land situated not less than six miles from any known deep alluvial workings.

The late assistant Government Geologist, Mr. S. Göczel, issued a very valuable report on the Interior Gold Region of West

Australia, and he declares that this region is of such large extent, and the rich gold deposits so numerous that the further prosperous development of the gold-mining industry may be considered as assured.

The famous "Monarch" nugget weighing 463 ozs. 16 dwt. was found at Lake Way at the end of December, 1897, by Percy Martin.

Goldfields Returns for 1899.—The total amount of gold entered for export during 1899 amounted to 1,434,570 ozs., value £5,451,368; during 1898, 1,050,183 ozs., value £3,990,698. From Murchison, 68,842 ozs.; East Murchison, 37,811 ozs.; Peak Hill, 15,721 ozs.; Yalgoo, 5,689 ozs.; Pilbarra, 19,996 ozs.; West Pilbarra, 1,955 ozs.; Coolgardie, 113,558 ozs.; North Coolgardie, 60,909 ozs.; North-East Coolgardie, 64,470 ozs.; East Coolgardie, 890,566 ozs.; Yilgarn, 7,734 ozs.; Dundas, 44,691 ozs.; Kimberley, 814 ozs.; Mount Margaret, 64,905 ozs.; Broad Arrow, 36,020 ozs.; Ashburton, 239 ozs. Gascoyne (formerly with Ashburton) 333 ozs.; Donnybrook, 309 ozs. Total yield of alluvial and dollied gold during 1896, 26,327 ozs.; 1897, 22,220 ozs.; 1898, 81,461 ozs.; 1899, 6,155 ozs.; auriferous quartz, 257,699 ozs.; 1897, 1,169,504 ozs.; 1898, 960,249 ozs.; 1899, 1,539,211 ozs.; for the first three quarters of 1900 the gold produced amounted to 939,225 ozs. Average yield of gold per ton of ore milled: 1896, 1 oz. 11 dwts.; 1897, 1 oz. 8 dwts. 4 grs.; 1898, 1 oz. 5 dwts. 5 grs.; 1899, 1·31 ozs. There were 2,625 leases in force in January, 1900, these leases covering 36,336 acres. Average number of miners employed above ground, 7,525; below, 8,555; estimated value of machinery, £1,962,222.

During the first half of 1900 returns show 1,971,692 ozs. gold entered for export. The average sterling value of the gold is £3 17s. 1½d. per oz. of gold, the average fineness ·9077.

The return of gold (the produce of the colony) entered for export for the year 1899 was 1,434,570·48 ozs., valued at £5,451,367 16s. 6d; 1898 was 1,050,183 ozs. 11 dwts. 23 grs., valued at £3,999,697 13s. 5d. Since the year 1886 the figures are 4,127,374 ozs., valued at £15,684,022; official valuation is £3 16s. per oz.

Dividends paid in 1899, £2,035,670; for eight months ended August 31, 1900, £1,107,434.

Goldfields.—The following is a list of the goldfields, and their area, also the address of the wardens' offices:—*Northern Goldfields*—Kimberley, 46,866 square miles, Hall's Creek; Ashburton, 6,992 square miles, Mount Mortimer; Gascoyne, 5,061 square miles, Bangemall; Pilbarra, 34,880 square miles, Marble Bar; West Pilbarra, 9,480 square miles, Roeburne; *Central Goldfields*:—Peak Hill, 12,194 square miles, Peak Hill; East Murchison, 28,242 square miles, Lawlers; Murchison, 20,513 square miles, Cue; Yalgoo, 18,921 square miles, Yalgoo; *Eastern Goldfields*:—North Coolgardie, 30,609 square miles, Menzies; Mount Margaret, 42,154 square miles, Mount Malcolm; Broad Arrow, 590 square miles, Broad Arrow; North-east Coolgardie, 21,542 square miles, Kanowna; East Coolgardie, 632 square miles, Kalgoorlie; Coolgardie, 11,974 square miles, Coolgardie; Dundas, 17,848 square miles, Norseman; Yilgarn, 15,593 square miles, Southern Cross; Donnybrook, 102 square miles. Total area, 324,218 square miles. The average number of men employed above ground was 7,525, underground 8,555. Total leases in force, 2,609; area 36,118 acres; number of stamps, 3,338; other mills, 83; leading vats, 368; filter presses, 55; abstract of smelting shows 48,277 tons, 268,097 ozs.; concentrates, 5,161 tons, 11,185 ozs.; tailings, 306,673 tons, 149,918 ozs.; slimes, 72,309 tons, 24,482 ozs. Total estimated value of mining machinery, £1,962,222.

The Kimberley goldfield is situated in the north-eastern corner of the Colony, and the principal diggings and mines are near the eastern boundary. It was discovered in 1882, by the late Mr. E. T. Hardman. Official centre, Hall's Creek. Steamers run between Freemantle and Wyndham every month, and there is a good road from Wyndham to the field. The five main mining centres are the Panton, Hall's Creek, the Brockman, Ruby Creek, and Mount Dockrell. Proclaimed May, 1886. The field offers little inducement to capital.

The Pilbarra fields (Pilbarra and West Pilbarra) are a little south and west from Kimberley, and contain the mining centres Coongan, Marble Bar, Nullagine, Talga Talga, Croydon, Western Shaw, and Tambourah. West Pilbarra has Whim Creek, Balla Balla, Egina, Pilbarra, and The Nicol. These are situated in what is known as "The Nor'-West," and in a most promising mineral area. Pilbarra goldfield is divided into the Marble Bar and Nullagine districts. Whim Creek is the most important centre of the West Pilbarra, and about 4 miles from it are the Balla Balla and Mons. Cupri Copper Mines. There are some rich copper deposits in the district. They are connected with the Port of Cossack, 12 miles from Roeburne. Proclaimed July, 1889, altered September, 1895.

The Ashburton field is on the Ashburton river, and is connected with the Port of Onslow by road, about 130 miles. Proclaimed December, 1890. There are seven main centres on the field, but little developing work has been done.

The Gascoyne Goldfield is connected with the Port of Carnarvon by road; it is also connected with the Murchison fields *viâ* Peak Hill, and with the Ashburton field by road. There is good water supply and there are several stores on the field, but little was done during 1899-1900. Proclaimed June, 1897.

The Central fields (embracing Peak Hill, East Murchison, Murchison, and Yalgoo) are near the western centre of the Colony. The Murchison goldfield is subdivided into four districts, namely, Cue, Nannine, Day Dawn, and Mount Magnet. The official centre is Cue, which has practically absorbed Day Dawn, where are situated the celebrated "specking" grounds, in which men found specimens and nuggets by turning over the stones with a forked stick. The official centres of Peak Hill and Yalgoo are respectively at the townships of the same name, and that of East Murchison at Lawlers. All these are very rich fields, and other centres are the Horse Shoe, Mount Maitland, Mount Fraser, Lawlers, Donegal Hill, Ogilvie's, Lake Darlôt, and Mount Sir Samuel, which is connected by rail with Perth, a distance of 306 miles. The terminus of the Government railway is at present at Cue; the line from Port of Geraldton, which is also connected by rail with Perth, a distance of 306 miles, tapping the country round Yalgoo, Mount Magnet, and Day Dawn. The East Murchison field is connected to Cue and Mount Magnet by well-watered coach road, a distance of about 210 and 180 miles respectively. Peak Hill is connected with Cue by coach road *viâ* Abbott's and Nannine, a distance of 180 miles. Well-watered roads are a feature of the Murchison field. Yalgoo is connected by rail with Mullewa, and the town has become an important and busy centre, and good roads have been opened up connecting all the principal mining centres with Yalgoo

The Yilgarn field was discovered in 1887, and adjoins Coolgardie, and was proclaimed November, 1888. It contains the famous centres of Southern Cross (connected by rail, 1,163 feet above sea-level, with the capital) and Parker's Range. It has a good future before it, especially as the great drawback, want of water, is being remedied by the Government.

The Coolgardie field lies to the east of Yilgarn. It was discovered in 1892, and every year since has made great stridse in development. The town of Coolgardie, the emporium of the eastern goldfields, has made enormous strides, and is connected by rail with the capital. This field has been divided into North-east Coolgardie, East Coolgardie, and North Coolgardie, and contains the famous "Wealth of Nations," Londonderry, and Coonallon, also Kalgoorlie, the official centre of the East Coolgardie field, which contains the famous "Great Boulder" set of mines, and is the richest gold-mining centre; it was connected by rail with Coolgardie in 1896, which has since been extended to Kalgoorlie, also to Kanowna in the NE. Coolgardie Goldfield and Menzies in the North Coolgardie Goldfields. From the several railway centres roads branch out to all the various mining centres. During 1899 the marvellously rich mines of East Coolgardie were responsible for nearly 73 per cent. of the total increase in the gold production of the year. It is estimated there were 35,000 persons on the field in 1900.

The Mount Margaret field is a most promising one, and ranks sixth on the list as a gold producer. The railway to Leonora will greatly help the field, which has laboured under the disadvantage of the heavy cost of carriage and the lack of abundance of mining timber. A new centre, Mertondale, sprang up during 1900.

The Dundas field is situated about 100 miles north of Esperance Bay, which is the foot of the field, the gold output of which is rapidly increasing. The Norseman is the most important centre on the field, and up to the beginning of 1900 no less than £59,510 had been spent in erecting 10 public batteries and procuring water.

Donnybrook goldfield is situated on the Bunbury-Bridestown Railway, 26 miles SE. of Bunbury and 131 miles south of Perth. There is good wood and water on the field, and a railway station within three miles of the claims.

Telegraph Stations at Hall's Creek on the Kimberley; Marble Bar, Bamboo Creek, Nullagine, Port Hedland, Warrawoona, Tambourah, Condon, on the Pilbarra; Roeburne, Balla Balla, Cossack, Whim Creek, on the West Pilbarra; Peak Hill, Peak Hill; Abbott's, Tuckanwarra, Nannine, Cue, Day Dawn, Cuddingwarra, Lake Austin, Star of the East, Mount Magnet, Lennonville, on the Murchison; Lawlers on the E. Murchison; Yalgoo, Murgoo (telephone), Melville and Gullewa on the Yalgoo; Mount Malcolm Murrin, Diorite King, Mount Leonora, Mount Morgan and Laverton on the Mount Margaret; Menzies, Niagara, Penndinnie and Goongarrie on the N. Coolgardie; Kanowna, Bulong, Kurnalpi, on the NE. Coolgardie; Broad Arrow, Paddington, Bardoc and Black Flag, on the Broad Arrow: Kalgoorlie, Boulder, on the E. Coolgardie; Coolgardie, Kunanalling, Widgiemooltha, Boorabbin, Bulla Bulling, Bonnie Vale, Burbanks, and Londonderry on the Coolgardie; Southern Cross on the Yilgarn; Norseman and Balladonia on the Dundas; Donnybrook on Donnybrook. Also Colliefields, Northampton; Greenbushes and Albany on mining districts.

Agriculture and Live Stock.—In his annual report for 1899 the Collector of Customs forecasts the breadstuff requirements for the year 1901 as follows:—With reference to the probability of the local production of wheat overtaking the home requirements, it appears that, if we assume (1) that the mean population for 1901 will be at least 180,000; (2) that the wheat requirements for food will be about 7½ bushels per head; (3) that the wheat required for seed in 1901 will be 245,000 bushels; and (4) that the average yield for the season 1900-1901 will be 11½ bushels per acre, the total requirements for 1901 will be about 1,600,000 bushels, and to produce this quantity in the colony will require about 140,000 acres of wheat for grain. As the corresponding acreage during the past season was about 84,000 acres, it appears that an additional area of about 60,000 will have to be reaped for grain in the coming season if our farmers are to supply the whole requirements for 1901. Most of the European grains, fruits and vegetables can be cultivated and brought to a high state of perfection. The soil in parts is sandy, but even this when irrigated can be cultivated and made very productive. There is a large extent of light friable soil suitable for all kinds of crops. The climate as regards agriculture is favourable, and bad seasons are rare. Sheep, horses, and cattle thrive well throughout the colony, more

especially in the northern parts, where the pasturage is extensive, varied and nourishing.

The estimated acreage of land under crop in 1899 was 186,396 acres. The crops in 1899-1900 were :—Wheat, 84,516 acres; oats, 3,940 acres; barley, 3,885 acres; maize, 133 acres; other cereals, 920 acres; hay, 78,880 acres; orchards and vineyards, 7,706 acres; potatoes, 2,837 acres; onions, 136 acres; other root crops, 156; total under crop, 186,396 acres, an increase of 14,619 acres. Average per acre—wheat, 11·68 bushels; oats, 18·67 bushels; barley, 14·57 bushels; potatoes, 2·95 tons; hay, 0·89 tons; maize, 17·02 bushels; onions, 2·57 tons.

The quality of the wine in many cases is exceedingly good, and there can be no doubt that Western Australia has a great future before it as a wine-growing country. A great variety of fruits are grown in the colony, and in some districts in considerable quantities. The total area under fruit trees at the beginning of 1900 was 4,445 acres. This comprised the following species of fruit: oranges, lemons, apples, pears, quinces, apricots, peaches, plums, nectarines, cherries, figs, almonds, loquats, mulberries, olives, &c. There are thousands of acres of land which would be suitable for fruit-growing, but it requires capital to develop this industry. At present the supply of fruit is barely sufficient for the wants of the inhabitants, and until very much more land is brought under cultivation by imported labour and capital there will be no fruits exported. The vine grows well anywhere between Blackwood and Geraldton. Omitting unsuitable portions, there are at a low estimate 5,000 square miles suitable for the growth of the vine. There is a large extent of gravelly loamy soil east of the Darling Range, very suitable for the peach tree, &c. The olive grows luxuriantly in the south-west portion of the colony, but is not cultivated to any extent. Some samples of oil manufactured at the Roman Catholic Orphanage, Subiaco, were exhibited at the Indian and Colonial Exhibition in London in 1886, and obtained very favourable mention.

Live Stock.—When the northern parts of the colony and their suitability for pastoral purposes had become better known, sheep and cattle farming increased largely, and Western Australia is now taking a prominent place as a producer of wool and live stock. The number of live stock in the colony at the beginning of 1900 was as follows:—Horses, 65,817; horned cattle, 296,267; sheep, 2,273,246; pigs, 55,950.

The proximity of the colony to India, Singapore, and Batavia affords a ready means of supplying the markets of those countries with horses, and formerly the home trade was an important feature of the Western Australia exports, but the recent development of the gold-fields has increased the local demand to such an extent that hardly any horses are now exported.

The sheep country lies SW. of the Kimberley, and extends over the watered districts following the contour of the coast-line to the South-Eastern Territory.

Tobacco.—The raw leaf is manufactured in the colony.

Lands.—Return of town and suburban lands alienated during 1899, was by sale, 1,179 acres, value £34,899; by gift, 369 acres, and rural lands, 28,190 acres, value £14,095. Total acres alienated at end of 1899, 3,413,729 acres; in process of alienation 3,065,420 acres (held under various forms of conditional purchase, free farms, &c.). Total land held as free homestead farms in agricultural areas, 218,628 acres.

The acreage of land held in January, 1900, for pastoral purposes under regulation of 1887 comprised 88,770,345 acres; Timber licenses and timber concessions in existence at the end of 1899 gave the right to cut timber over an area of 1,474,383 acres. Miscellaneous leases in existence at the beginning of 1900 amounted to 105,217 acres.

During 1899 15,263 applications were dealt with; total revenue, £130,658 10s. 10d.

(For further information *see* "Divisions" and "Land Regulations")

Pearl Fishery.—There are two main districts, Sharks' Bay, and northward from the North West Cape, and the shell is found along the North West coast up to as far as Cambridge Gulf. The exports for the past eleven years were—In 1888, 592¼ tons, valued at £56,263 15s., at the rate of £95 per ton. 554 tons of the smaller and inferior Sharks' Bay shell were exported, valued at £3,047, or at the rate of £5 10s. per ton; the total value of the shell exported being £59,310 15s., the value of the pearls being calculated at £25,000. In 1889 744½ tons of shell were exported, valued at £74,450, or £100 per ton, with pearls to the amount of £30,000. It is probable that the stated value of pearls exported exceeded this amount. The export value of pearl-shell (it is impossible to get correct figures of the pearls exported) in 1891, £100,527; in 1892, £79,259; in 1893, £59,204; in 1894 £37,805; in 1895, £27,298; and in 1896, £30,213; 1897, £40,253; 1898, £78,784; 1899, £90,667 (this is the largest amount since 1891). Export of pearls roughly estimated at £20,000. The value of shells in the colony averages from £6 10s. to £10 per cwt., or even higher. These shells, the home of the *Meleagrina margaritifera*, weigh on an average about 2lbs. per pair, and measure from six to ten inches in diameter. It is to the intrinsic commercial value of the shells, rather than the pearls they contain, that the north-west fisheries owe their importance; although, occasionally, pearls of considerable value are obtained—one supposed to be worth upwards of £1,500 was found in 1875; in 1878, one was found weighing forty grains at Sharks' Bay; and another one weighing 234 grains, obtained at Nicol Bay, realized £715. Another valuable pearl was found in 1890, valued at £2,000. The second species of mother-of-pearl and pearl-producing shell indigenous to Western Australian waters is *Mellagrina radiata*, small in size, and varying in value from £15 to £60 per ton. Extensive beds of large and valuable shell are found off the 90-mile beach, between latitudes 18° and 20°, and a numerous fleet is now engaged in this valuable, and in a good season highly lucrative, industry. A great number of boats formerly pearling in the Torres Straits off the Queensland coast have sought the West Australian fishery, bringing round very valuable plants with them, and a number of Malays, Japanese, and Thursday Islanders. It is anticipated that the vicinity of the Abrolhos Islands, 30 miles west of Geraldton, will prove eligible for the artificial culture of the large Nor'-West pearl shell. Formerly diving for pearl shell was carried on near the coast by means of aboriginal labour, but the inshore pearl shell fisheries became exhausted in course of time, and now some of the boats carry on pearling by means of the diving apparatus from three up to ten miles off the shore. Pearlers have to pay a licence fee of £1 a boat, and the usual duties on all imported goods.

A fine pearl, perfect in lustre, round, and weighing 65 grains, was found in 1896. The pearling industry improved very considerably in 1899-1900.

Oyster Culture.—At Shark's Bay and Dirk Hartog Island, on the north-west coast, there are immense beds of marketable rock oysters (*O. Glomerata*). Mr. W. E. Learoyd, Hon. Inspector of Fisheries of New South Wales, declares that hundreds of miles of the foreshore are nothing but natural oyster-beds, without a single marine enemy. He strongly recommends Legislative protection. The Western Australian Government is taking steps to re-establish the oyster beds of Oyster Harbour, near Albany, and to inaugurate the profitable cultivation of the bivalve in the neighbourhood of Fremantle, &c.

Roads.—The main roads of the colony are under the charge of eighty-five District Roads Boards, who are authorised to levy a general rate within the limits of their districts not to exceed 1s. in the £ in any one year. For the year ending June 30, 1900, Parliament voted £40.000 for the making and keeping up of roads and bridges.

Railways.—The railways of the colony are in the hands of the Government, with the exception of the Jarrahdale Timber Company's lines, and those worked by concession, viz.: the Torbay, Midland, Darling Range, and Jarrahdale lines.

The Northern Railway comprises a line from Geraldton to Northampton (34 miles), opened for traffic in 1879. Geraldton to Walkaway (an important wheat district), junction with Midland Railway, 19 miles; Mullewa Junction to Cue, 253¾ miles; total, 306 miles.

The Eastern Railway, extending from the Port of Fremantle to the city of Perth, and thence to Guildford, was opened for general traffic on March 1, 1881. It is now open to Beverley, which is the South Eastern terminus of the line and is also the North Eastern terminus of the Great Southern Railway. The stations are Fremantle, Fremantle East ½ mile, Fremantle North 1¼ mile, Cottesloe, Claremont 6 miles, Karrakatta 7 miles, Subiaco 9¾ miles, Leederville 10 miles, Perth West 11½ miles, Perth Central 12 miles, Perth East 12¾ miles, Bayswater 16 miles, Guildford 20 miles Greenmount 24 miles, Smith's Mill 29 miles, Sawyer's Valley 35 miles, Chidlow's Well 40¾ miles, Clackline 61½ miles, Spencer's Brook 70 miles, Northam 77 miles, York 88 miles, and Beverley 108 miles. A branch from the Eastern line at Spencer's Brook (60 miles from Perth) has been constructed to Kalgoorlie (opened September 8, 1896), 314 miles; to Menzies (opened February, 1899); to Kanowna (opened in May, 1898); and another branch from Clackline to Newcastle 14 miles, and a branch from York to Greenhills, 15 miles. These are important agricultural centres in the Eastern Districts, *en route* for the Yilgarn or Eastern goldfields, to and from North Eastern Railway. Total 512 miles.

The phenomenal increase in the trade of the Port of Fremantle necessitated the duplication of the line of rails from Fremantle as far as the Midland Junction.

The South Western Railway.—From Perth to Bunbury, 115 miles; from Picton Junction (111 miles from Perth) to Vasse, 38; Boyanup (122 miles from Perth) to Bridgetown, 52 miles; and Brunswick to Colliefields, 26 miles (opened July, 1898); total, 234 miles.

The Private Lines are as follow:—

Midland Railway.—The Midland Railway of Western Australia starts from the Midland Junction, 10 miles from Perth, on the Eastern Railway, and runs northwards, *via* Gingin, to Walkaway, a distance of 277 miles, where it joins the Government line running to Geraldton. This railway has been constructed under a concession of the land grant system, the company receiving 12,000 acres for every mile of railway.

Denmark Railway.—Messrs. Miller's Karri and Jarrah Forests, Limited, have, under a special concession, constructed a line of railway on the land grant system from a point 10 miles from Albany on Great Southern line to Torbay, a distance of 12 miles, and further continued the railway on to Denmark Mills, a distance of 28 miles from Torbay Junction; in addition there are 16 miles of railway extending out into the bush over which the logs are brought to the mills.

Yarloop Railway.—At Yarloop Millar's Karri and Jarrah Forests, Limited, have constructed 23 miles of private railway line of standard gauge, 3 ft. 6 in., and fully equipped with locomotives and rolling stock. This line leaves the South Western Railway at Yarloop, a place 89 miles south from Perth, and then runs easterly over the Darling Ranges.

Upper Darling Range Railway.—This line is the property of the Canning Jarrah Timber Company (Western Australia), Limited, starting from the Midland Junction, at which point it joins the Government railway. It runs to the Canning Timber Station, a distance of 20 miles, thence to Kangaroo Gully Mill and other points in the Company's jarrah forest; total length

of line 38 miles. The line is laid with 46½ lb. rails, 3 ft. 6 in. gauge, and is furnished with the requisite rolling stock. A passenger train service is run twice a week, viz. :—Wednesdays and Saturdays, on which days the mails are carried. Since the Company acquired the line, the developments have been considerable ; there are several brick-yards, a stone quarry, and gravel pits, in addition to a number of orchards, along the route.

The Jarrahdale Railway.—This railway was constructed by the Jarrahdale Timber Company under a special timber concession agreement. It consists of a line from Rockingham to the Company's head station, a distance of over 20 miles, continuing from Jarrahdale inland in different directions to the various mills. A total of 57 miles of line are now laid down.

Quindalup Railway.—Under H. J. Yelverton's special timber concession at Quindalup, 8½ miles of line have been constructed, connecting the mills with the port (10 miles west of Busselton), and this line has been extended from the mill into the forest for 5½ miles.

The M. C. Davies Company, Limited.—Under special timber concession this Company has constructed lines from Hamelin Harbour to the mills at Karridale and Boyanup, with branches into the forest, a total distance of over 35 miles. The gauge is 3 ft. 6 in.

Ferguson River Line.—This line belongs to the Canning Jarrah Timber Company (Western Australia), Limited. It starts from Dardanup on the South Western Railway and runs to Ferguson River Valley, to Wellington Timber Station, a distance of 15 miles.

The Jarrah Wood and Saw Mills Company, Limited, has a line 14½ miles from Wonnerup on the South Western Railway to Maryville.

Cossack-Roebourne Tramway.—Cossack and Roebourne are joined by a tramway, 8 miles in length, belonging to and worked by the Government. This line is built to the 2 ft. gauge, and is worked by horse-power.

Total miles Government lines, 1,355 miles ; total private lines, 529 miles ; total Government tramway, 8 miles ; total miles railways and tramways open for public traffic, 1,892 miles.

All the railways of the colony are worked by locomotives, single lines, 3 feet 6 inches gauge, with the exception of the eight miles of the Roebourne Tramway, which is 2 feet gauge, and is worked by horse power.

The leading features of the working railways of the colony for 1898–1899 (the figures for 1897–1898 being shown in parentheses) are : — Capital cost of average miles worked (£5,047,261), £5,047,261 ; for 1900, £6,427,370 ; gross revenue (£1,019.677), £1,004,620 ; for 1900, £1,259,512 ; working expenditure (£786,318), £712,329 ; for 1900, £861,470 ; percentage of working expenses to revenue (77·11), 70·91 ; for 1900, 68·40 ; percentage of net earnings to cost of construction (4·62), 4·55 ; passengers carried (5,669,444), 5,872,200 ; for 1900, 6,225,068 ; goods carried (1,203,911), 1,148,252 ; for 1900, 1,384,040 ; train mileage (3,613,874), 3,257,871 ; for 1900, 4,216,161 Total mileage open for traffic (992), 1,355 ; for 1900, 1,355. Profit on working traffic (£169,652), £292,291.

Electric Telegraphs.—Telegraph communication exists in the colony between 155 stations. The number of miles of telegraph poles open at January 1, 1900, within the colony was 5,941½, and miles of telegraph wire 8,749. Number of stations opened during the year 9, closed 1.

The net revenue for the year 1899 from the telegraph service is returned at £78,937. The total number of messages sent during 1899 was 1,136,513, valued at £136,406.

The Eastern Extension Telegraph Company have laid a submarine cable from Banjoewangie to the Northern Coast, connecting with the West Australian lines at Roebuck Bay, and this was opened for use in May 1889. There is communication with South Australia *viâ* Albany and Eucla, also *viâ* Coolgardie and Eucla, and by this means with all the Australian colonies, Eastern Archipelago, Asia, Europe and America. A cable has been laid from Albany, King George's Sound, to Breaksea Island, for the purpose of signalling passing steamers. The first telegraph line constructed in the colony was between Perth and Fremantle, a distance of 12 miles. The telegraph line connecting Derby with the West Australian system was completed in January, 1888, and on October 5 the telegraph was completed from Derby to Hall's Creek, Kimberley Goldfields, and later on to Wyndham. Telegraph communication has been established to the various centres of the goldfields, such as Coolgardie, Cue, Bamboo Creek, and a second line to the South Australia border was completed on October 6, 1896. It will thus be seen that the colony has done wonders in the matter of telegraph construction, and that its remotest settlements are connected by the electric line.

The charge for messages between any two stations in the colony is a uniform rate of 1s. for the first ten words, and 1d. for each additional word, with the exception of between Perth and Fremantle, North Fremantle and Beaconsfield, where messages are sent at the rate of 6d. for ten words, with 1d. for every additional word. Local messages handed in at any telegraph station where messengers are employed are delivered within a radius of one mile at the rate of 6d. for 10 words, and 1d. for every additional word. Press messages are charged 6d. for the first ten words, every additional word, up to 1s. 6d., ½d. ; over 34 words and up to 100 words, 1s. 6d. ; every additional 50 or part, 6d. No charge is made for the date, address, or signature to any message. Messages are delivered free of charge within 1 mile of office. The intercolonial rates are : South Australia ten words 2s., and 2d. for every additional word ; 16 to 100 words, 3s. ; every additional 50, 1s. 6d. ; to stations on the Port Darwin Line there are increased charges ; Victoria ten words 3s., and 3d. per additional word ; Queensland ten words 4s., and 4d. per additional word ; New South Wales ten words 3s., and 3d. per additional word ; Tasmania ten words 4s., and 4d. per additional word, name and address not to exceed ten words—over charged extra ; New Zealand ten words 5s. 6d., and 7d. per additional word, names and addresses being charged for. On Sundays this charge is doubled. To London or any other part of Europe, 4s. 9d. per word.

Telephones.—The Telephone Exchange System was opened in Perth on November 22, 1887, and in Fremantle on January 1, 1888 ; North Fremantle, June 17, 1895 ; Geraldton, September 4, 1895 ; Albany, November 18, 1895 ; Guildford, December 11, 1896 ; Coolgardie, May 25, 1897 ; Kalgoorlie, August 1, 1897 ; Boulder, December 1, 1897.

The number of miles of telephone wire in 1899 was 3,109 (in the telephone branch only, 2,869 miles), with 2,115 subscribers, 2,676 telephones and 308 extension instruments. The subscription rates from Perth or Fremantle centres are :—For any radial distance not exceeding one half-mile, Business, £7 ; domestic and medical, £5 ; for every quarter mile over or part, £1. For Albany and Geraldton centres the subscription is :—Business, £10 for first ½-mile ; domestic, £7, and £1 each additional ¼ mile. For Coolgardie, Kalgoorlie and Boulder centres, £10 ; commercial and domestic £7. Subscribers on Perth, Fremantle, North Fremantle, and Guildford centre can communicate with one another on paying a Trunk line rental of 5s. per mile per annum—*i.e.*, Perth to Fremantle, £3 ; Perth to Guildford, £2 5s.

Post Office.—At the beginning of 1900 there were 241 post and telegraph offices in the colony, including receiving offices. The number of employés in the Post and Telegraph Department was 1,235, the cost of conveyance of Inland mails being £40,018 2s. 11d. per annum. Total number of miles Inland Mail Service, 2,792,554 ; cost per mile, 3¼d. There passed through the post-offices of the colony 12,343,323 letters and 343,999 post-cards, 6,287,018 newspapers and 2,984,200 packets ; registered letters were 286,231. The total revenue of the Post and Telegraph departments for year ended December 31, 1899, was £205,962, as compared with £202,722 in 1898. The total expenditure in 1899 was £230,700 ; in 1898, £267,168.

Rates of postage are—town letters, under half an ounce, 1d. ; exceeding half an ounce, 2d. ; and 2d. for every ounce, or part thereof, beyond. Inland letters, 2d. for half an ounce, 4d. for one ounce, and 2d. for each ounce, or part of ½-ounce, beyond. Letters for all the Australian colonies are now rated at 2d. for each half-ounce, or part of half-ounce ; post cards, within limits of delivery of Post Office, ½d. beyond, 1d. ; and reply cards, 2d. Letters to the United Kingdom or Continent of Europe are charged 2½d the half-ounce, and 2½d. for each additional half-ounce. Newspapers are sent free to all parts of the colony if posted within a week after publication, and for delivery beyond the boundaries of the town at which they are published ; to the Australian Colonies, half-penny for every ten ounces or part thereof, and ½d. each additional two ounces or fractional part of ; to places outside the Australian Colonies, 1d. for four ounces. Book rates in the colony are—four ounces or under, 1d. ; and 1d. for every four ounces beyond, up to 4lbs. To the Australian Colonies the charges are—four ounces, 1d. ; and for every additional four ounces or portion of, 1d. up to 4lbs. To the United Kingdom the rate is—not exceeding two ounces, 1d. four ounces, 2d. ; and 1d. for every additional two ounces. For the Australian Colonies packets are 1d. for two ounces, and 1d. every two ounces beyond up to 4lbs. Parcels not exceeding 11b. 8d. ; each additional lb., 6d., and to the United Kingdom wholly by sea, 1s. for 11b. or under, and 6d. per additional lb. The registration fee is 3d. in addition to ordinary postage on all letters, books or parcels

Postal Notes.—Total postal notes issued in 1899, 47,247, valued at £12,691, the poundage amounting to £370.

Money-orders are issued between the leading places in the colony ; sums of £2 and under, 3d. ; not exceeding £5, 6d. ; not exceeding £7, 9d. ; £10 and under, 1s. ; on towns in the other colonies, sums of £2, 9d. ; £5, 1s. 6d. ; £7, 2s. 3d; £10, 3s. ; on towns in the United Kingdom, Cape of Good Hope, and India, £2 and under, 1s. ; £5 and under, 2s. ; £7 and under, 3s. ; £10 and under, 4s. On Germany, sums not exceeding £2, 2s. ; not exceeding £5, 4s. ; not exceeding £7, 6s. ; not exceeding £10, 8s. Telegraphic money-orders are now issued and paid between the principal centres of the colony.

During 1899 there were issued 65,985 inland orders, valued at £243,133 ; in 1898, 67,439, value £253,996 ; orders paid in 1899, 66,099, value £241,924 ; in 1898, 67,404, value £253,558. Foreign money-orders issued in 1899 numbered 107,552, valued at £413,679 ; in1898 numbered 163,948, valued at £634,392. Foreign money-orders paid in 1899 numbered 20,339, valued at £70,315 ; in 1898 numbered 13,380 valued at £77,039.

Parcels Post.—During 1899 7,808 parcels, with a declared value of £4,934, were despatched, and 23,987, valued at £36,429, were received.

Direct exchange with Germany and France has been arranged.

Imperial Penny Postage.—The Postmaster-General, the Hon. R. A. Sholl, in his annual report, says : "Reviewing the whole question on its merits, and omitting all sentimental considerations, I am strongly of opinion that, from a purely business standpoint, these colonies, as individual States, are at present unable to afford the loss of revenue which the adoption of the penny rate would entail, implying, as it does, a reduction for both inland and foreign letters ; it is also doubtful whether the proposed rate would not involve a reduction in the price of international post-cards. The United Kingdom, on the other hand, can well afford the slight loss which its postal

revenue may at first suffer, especially as the movement of correspondence between Australasia and that country is greatly in favour of the latter. On reference to our local records, I find that we despatch to London an average, in round numbers, of 30,000 letters *per mensem*, while we receive from there somewhere about 42,000 during a like period, and no doubt the ratio is about the same in the case of the other colonies."

Western Australia entered the Universal Postal Union on October 1, 1891.

King George Sound has been the first and last Australian port of call for ocean-going mail steamers, but under the new contracts Fremantle, instead of Albany, is the port of call.

A travelling post office runs between Perth and Albany, and between Albany and Kalgoorlie.

Public Library was founded in 1887 in connection with the Jubilee of Her Majesty the Queen, and was opened to the public in January, 1889. On June 30, 1900, there were 38,728 volumes on the shelves, and the total attendance for the year ending that date was 82,414, including 4,207 ladies. The yearly grant from Parliament is £3,000, which covers all expenses. The library is open to the public every week-day from 10 A.M. till 10 P.M., and on Sunday afternoons from 2 to 5.30. The plans for a comprehensive block of buildings, to include the Public Library, Museum, and National Gallery of the colony, have been prepared, and the first portion of the block in which the library is temporarily located has been completed at a cost of £22,000.

Revenue and Expenditure.—Principal items of revenue for years ending 30th June, 1900 and 1899 (in parentheses): —Customs, £904 802 (£867,520); harbour dues, £17,512 (£15,321); Crown lands, £142,719 (£142,719); mining, £106,589 (£73,521); railways, £1,018,300 (£1,018,300); telegrams, £80,704 (£74,433); postage and commission on money-orders, £105,433 (£102,865); telephone, £21,971 (£19,871); fines, forfeitures, and fees of court, £19,466 (£22,953); stamps, £36,866 (£34,982); licenses, £26,983 (£26,582); water receipts, £11,739 (£11,999); total, £2,875,396 (£2,478,811); net increase, £396,584. Principal items of expenditure—railways, public works and public buildings, £1,104,325 (£1,075,024); lands, &c., £59,576 (£79,520); mining, £91,015 (£68,157); Customs, £28,764 (£29,734); post and telegraph, £239,309, (£237,262); police, £109,921 (£103,055); defences, £31,484 (£16,962); charitable institutions, £23,371 (£22,054); harbour and light, £16,927 (£15,497). Total £2,615,675 (£2,539,358); net increase, £276,317.

Western Australian Agricultural Bank.—This bank was established in May, 1895. The total amount of approved loans on June 30th, 1900, was £110,395, of which the sum of £85,280 has been paid to borrowers in progress payments (leaving a balance of £25,114 15s. yet to be paid at that date), for which the following work has been done:—Clearing 47,630 acres, value £124,925; cultivating 36,108 acres, value £30,610; ringbarking 53,837 acres, value £6,105; fencing, 24,091; claims, value £7,947; draining, £426; wells and reservoirs, £3,293; buildings, £9,226; total improvements effected, £182,532. Amount of loans approved, £25,115, for which the following work is in progress:—Clearing 12 428 acres, value £26,342; cultivating 13,695 acres, value £9,058; ringbarking 9,858 acres, value £1,127; fencing 3,935 chains, value £1,429; draining, £275; wells, dams, and reservoirs, £2,381; buildings, £3,495; total value of improvements, £44,107. The grand total of loans and work done and to be done is given as follows:—Loans, £110,395; clearing 60,058 acres; cultivating 49,803 acres; ringbarking 63,695 acres; fencing 28,026 chains; draining, £701; water supply, £5,674; buildings, £12,721—total value £226,639. The money is paid proportionately as the improvements are effected. Rate of interest 5 per cent. Under the Agricultural Bank Amendment Act, 1896, money is advanced to effect the following improvements: Clearing, cultivating, ringbarking, fencing, draining wells of fresh water, reservoirs, buildings, &c. The manager may advance up to three-fourths the value of the proposed improvements. No losses have been made since initiation of system. The total expenditure of the bank for 1899–1900 was £3,759; the receipts totalled £4,162.

The manager of the bank says that the bank has accomplished more in the way of settling people on the soil than the most sanguine anticipated. In five and a half years 1,039 loans have been dealt with, and of that number a large percentage of the applicants could not have made substantial progress without the aid of the bank, as the initial work of starting is great.

Public Debt.—On the 30th June, 1899, the public debt (including the amount of the accrued sinking fund, £377,161) was £11,804,178. Originated by an Act assented to of August 15th, 1872. The conditions under which the loans were obtained have varied considerably, the two most important variations being the issue of inscribed stock in place of debentures, and the gradual reduction of the rate of interest involved. There are at present no fewer than six different rates of interest paid in respect of the various loans—viz., 6, 5, 4½, 4, 3½, 3¼ and 3 per cent.

The estimated average gross debt per head of the population on June 30, 1900, was £66 4s. 10d.; June 30, 1899, £62 5s. 1d., the net indebtedness being £64 2s. 6d.

Taxation.—Until recently Western Australia had only three forms of taxation in force, namely, those represented by Customs duties, license fees, and stamp duties; probate and excise duties have, however, been added to the list.

Imports and Exports.—The value of the imports into the colony during the year ending 31st December, 1899, was £4,473,532; for 1898, £5,241,965; the duty collected being—1898, £914,672; 1899, £845,558. Australian produce imported amounted to £2,312,357. The exports during 1899 were valued at: to the United Kingdom, £3,774,247; Australian Colonies, £2,937,574; to other British Possessions, £191,554; to foreign countries, £82,267; total value, £6,985,642. The value of imports per head of mean of population in 1899 was £26 9s. 9d.; the exports £41 7s. 3d. Gold was the chief item of export in 1899 to the value of £5,451,368; in 1898 value was £3,990,698; wool exported valued at £423,296; in 1898, £287,731. Timber was exported in 1899 to the value of £553,198; in 1898, £326,195; sandal-wood, 1899, £29,719; in 1898, £31,812; pearl-shell and pearls, 1899, £110,667; in 1898, £99,009; skins and hides, 1899, £82,981; in 1898, £60,226; guano in 1897, £3,250; in 1898, £9,386; tin ores in 1899, £23,163; in 1898, £3,275. Excess of imports over exports £189,366.

The export trade for 1899 was in a most flourishing condition. The heading of gold, of course, accounts for a large proportion of this increase; but setting this on one side, other staple exports of the colony have increased in a like manner—notably, timber, wool, pearl-shell, skins, hides, and ores (copper and tin) —giving the future export trade a most encouraging outlook. The year also marks the first shipment (£50,000) of Western Australian minted gold coin.

The Collector of Customs, in his annual report for 1899, says:—"Reviewing the principal lines of agricultural, dairy, and domestic produce, it is very encouraging to note, on the whole, another large decrease in the total value of £209,543, notably in flour, grain, hay, and chaff, cheese and milk (preserved), showing that our farmers are slowly but surely reaping the reward of their industry. On the other hand," continues Mr. Mason, "it is a matter of regret to notice that bacon, hams, &c., potatoes, onions, butter and eggs, still show an increase in importation. On referring to the latter items, *i.e.*, potatoes, onions, butter and eggs, it will be observed on perusing the return appended that, although the import values thereof disclose a decrease on the previous year's working, yet the quantities of importations show a considerable increase, viz., 750 tons, 323,508 lbs., and 171,595 doz. respectively, the decrease on values being attributable to the fact that during the past year the prices of these commodities have much depreciated in the markets of the Eastern colonies, whence our supplies are drawn. The above is certainly an object-lesson, and points to the fact that there exists an admirable opening for the further establishment of dairy and poultry farms; and I would here remark that the farmers and agriculturists are now afforded splendid facilities for getting their produce to market, by means of an admirable system of railways running through the south-western portion of the colony to the capital and the goldfields."

Value of imports for first half of 1900, £2,804,014; value of exports for first half of 1900, £2,614,648.

Harbour Works.—The most important work is that of the Fremantle Harbour, designed and being carried out (commenced in 1892) under the direction of the Engineer-in-Chief for the colony (Mr. C. Y. O'Connor, M.I.C.E.). The scheme aims at forming a safe and commodious harbour within the mouth of the Swan river. The principal features are the throwing out of two ocean moles from the north and south heads of the river estuary to protect the entrance; the formation of a channel through the Rock Bar, which crosses the whole width of the estuary; the dredging of an inner basin; the reclamation of about 85 acres of quay and warehouse space on both sides of the river; the levelling down of Arthur's Head to form additional quay space and a sea esplanade. It is also proposed to construct a graving dock and slip. The works are estimated to cost about £800,000, and to be completed in the year 1901. The works are being vigorously proceeded with, about 900 men being employed altogether; and when completed it will be one of the finest harbours in the southern hemisphere. The crowning proof of the success of the harbour scheme was given when the *Friedrich der Grosse*, drawing 23 feet of water, was berthed alongside the South Quay in 1898. The two moles, built on the "Pierres Perdues" system, were completed in 1897.

Considerable improvements have been effected in the Albany, Geraldton, and Bunbury Harbours. The last-named was commenced on April 27, 1897, and the breakwater now measures over 3,200 feet.

Mr. O'Connor writes concerning the harbour works:—"The advantages already gained by these works are very important and numerous, including, amongst other things, the use of the harbour by steamers of higher class and larger tonnage than could be induced to come to the roadstead previously; and there is also a very large pecuniary advantage in many ways, amongst others in the saving of cost of lighterage, which was necessary before the present harbour was constructed. The cost of lighterage thus involved in 1896, deduced from Custom returns, is estimated to have been about £68,400, and, on the same basis, the lighterage during last year (1899) would have come to at least £87,000; and this alone is much more than double the interest which the Government have to pay on the cost of the works up to date (about £750,000), and is even more than double the interest which will have to be paid on the present estimated cost of the works (about £1,000,000), the works as actually being carried out being more extensive than originally estimated for."

Shipping.—Summarised return of vessels trading with Western Australia during 1898 and 1899:—1898, inward, 633, 1,199,894 tons; outward, 631, 1,189,732 tons. 1899, inward, 685, 1,333,052 tons; outward, 668, 1,305,596 tons; total, 1,353, 2,638,648 tons. The increase in the inward and outward tonnage for 1899 is 249,022. Of vessels registered in the colony there remained on the register at the end of the year: 135 sailing vessels, net tonnage, 6,653; 30 steam, net tonnage, 5,442.

Intercommunication.—The Adelaide Steamship Company, Ltd., run large cargo and passenger steamers between Queensland, New South Wales, Victorian and South Australian ports, and all ports in Western Australia; notably Albany, Esperance Bay, Fremantle, Geraldton, Carnarvon, Onslow, Cossack, Broome, Derby and Wyndham. The Company owns a large and extensive fleet, including such steamers as *Mintaro, Willgama, Kadina, Allinga, Marloo, Innimincka, Wollowra*, &c., and is an excellent line in all respects, and has done much to develop the trade of the colony, and has held the Royal Mail Coastal contract for a number of years. The Company's steam services nearly circumnavigate the continent of Australia, more so than any other individual Company engaged in Australian trade. Passengers can travel from Wyndham (north-west) down W. A. coast to Fremantle, South Australia, Victoria, N. S. Wales, and Queensland (for northern coast), a distance of 6,100 miles. The Australasian United Steam Navigation Company, Limited, with a large fleet, have a weekly service from Sydney to Geraldton, calling at Melbourne, Adelaide, Albany, and Fremantle, connecting at Sydney with other steamers of the fleet trading to all Queensland ports, New Guinea, Fiji and New Caledonia; two new steamers have been built for the Western Australian trade. The Melbourne Steamship Company, Limited, has monthly communication between Melbourne and Geraldton, *viâ* intermediate ports. Huddart, Parker, and Company, Limited, of Sydney, are also running steamers to Western Australian ports. McIlwraith, McEacharn & Company and Howard Smith & Co., also trade between the Eastern colonies and Geraldton *viâ* Fremantle. Instead of the English and colonial mails being conveyed between Perth and Albany by steamer, they are now carried by train. Coaches in connection with the mail service run between the principal towns of the colony, and the railway system connects the chief southern towns with the principal goldfield centres; altogether the means of communication have very much improved. The Western Australian Shipping Association, Limited, in conjunction with Bethell, Gwyn & Company; Trinder, Anderson & Company, & Anderson, Anderson & Company, & Birt, Potter & Hughes load at London, Liverpool, Glasgow, and Hamburg for all West Australian ports. These associations have their regular communication by steam with all West Australian ports twice a month. The Western Australian Shipping Association also load on their own account; vessels every two months from New York to Fremantle direct. The combined service of the West Australian Steam Navigation Company and the Ocean Steamship Company connect with and transfer their West Australian passengers and cargo at Singapore into the s.s. *Saladin, Australind, Karakatta*, and *Sultan*, which have recently been designed and constructed for this service, and contain all the latest improvements for the comfort of passengers. These steamers maintain a fortnightly service between Singapore and Western Australian ports, and the wool and pearl shells from the northern ports of Western Australia are transhipped at Singapore for London. These companies have a small steamer, the *Beagle*, connecting the large boats with Cossack and Condon. Passengers are booked through and transhipped into the P. and O. line. The P. and O. and Orient Companies' mail steamers, both homeward and outward bound, call at Albany alternate weeks, and the Messageries Maritimes Company every four weeks. The North German Lloyd Steamship Company, trading between Bremen and Sydney, also call every four weeks at Fremantle; this company is using steamers of 12,500 tons register on this service, which are richly appointed, and enjoy a large share of the passenger traffic to the West.

Manufactories, Mills, &c.—The manufactories in the colony at the beginning of 1899 totalled 595. The chief are as follow:—6 agricultural implements, 7 soap factories, 19 flour mills, 67 saw-mills, 4 tanneries, 27 breweries, 35 foundries, 41 coach, waggons, and blacksmiths, 13 furniture, bedding manufactories, 53 aerated water manufactories, 3 tobacco factories, 5 confectionery, 15 boot, 32 brick, 2 fish preserving, 3 boat-building, 32 printing, 13 quarries, 18 water condensing, 51 bread, 46 tailoring, dressmaking, &c., 7 electric light, 3 gas. Persons employed, 9,895: males 9,253, females 642. Approximate value of land and buildings, £1,445,925; plant and machinery, £1.254,935; articles produced, £2,463,907.

Lighthouses.—On Moore Point (28° 47′ S. lat., 114° 35′ E. long.) a revolving white light (second order Dioptric), attaining its greatest brilliancy every 40 seconds, and from a lower light in same building are exhibited two fixed red rays, visible about 16 miles. Geraldton (ChampionBay); leading lights—two fixed white lights, 300 yards apart, visible eight miles. On Rottnest Island (32° S. lat., 115° 31′ E. long.) a white revolving light, first order Dioptric, showing single flash every 20 seconds, visible at 23 miles; at Arthur's Head (32° 03′ S. lat., 115° 45′ E. long.) a fixed white Dioptric light of the third order, visible 14 miles; at Bunbury (33° 19′ S. lat., 115° 39′ E. long.) a fixed bright light, visible at 12 miles (there are also two red leading lights at end of jetty); at Breaksea Island (35° 04′ S. lat., 118° 04′ E. long.) a fixed white third order Dioptric light, visible at 25 miles. This lighthouse is connected with the mainland by a submarine cable. At King George's Sound, on Point King (35° 02′ S. lat., 117° 55′ E. long.), a fixed white Dioptric light of the fifth order, visible at 12 miles. Dongara or Port Irwin (29° 17′ S. lat., 114° 56′ E. long.) a fixed white light, visible 5 miles. At Geographie Bay (33° 38′ S. lat., 115° 21′ E. long.) a fixed white light visible 11 miles. At Busselton a fixed white light at the end of the jetty, visible 6 miles. On Jarman Island, (20° 39′ S. lat., 117° 13′ E. long), Cossack, a lighthouse with a fixed white light of the third order Dioptric, visible 15 miles. At west side Babbage Island, (24° 52′ S. lat., 113° 38′ E. long.), entrance Gascoyne river, fixed occulting white light, visible 12 miles; at end of Babbage Island Jetty red, fixed light, seen 4 miles. The Government have erected a light of the first order Hyper Radial and an ocean signal station with third order Dioptric light on Cape Leeuwin (34° 22′ S. lat., 115° 09′ E. long.). There are also fixed white lights at Albany, Vasse, Wyndham, Derby, and Carnarvon jetties; green fixed light at Geraldton north jetty, and red fixed light at Geraldton south jetty; red fixed lights at Dongara and Fremantle jetties, and four Channel beacon lights at entrance to Princess Royal Harbour (35° 02′ S. lat., 117° 55′ E. long.).

Volunteers and Military Defences.—The volunteer forces of the colony consist of two batteries of Field Artillery, one at Perth, the other at Fremantle, one battery Garrison Artillery, Albany; and 7 companies Mounted Infantry, and 19 companies of Infantry Volunteers. The military posts are at Perth, Fremantle, Guildford, Geraldton, Albany, York and Bunbury, Kalgoorlie, Coolgardie, Boulder, Kanowna, Menzies, Northam, Newcastle, Cannington, Pinjarrah, and Karridale. At each of these places there is one company of volunteers, with the exception of Perth and Fremantle, where there are two companies. The men are armed with Martini-Metford rifles. Albany is fortified by two batteries of 6-inch B.L. guns, mounted *en barbette*, and aided by a secondary armament. The garrison consists of one company permanent Artillery and a small party of Sub-Marine Miners.

Police Force.—The police force of the colony is under Commissioner Capt. Fred. A Hare. The force is as follows:—1 commissioner, 1 chief inspector, 7 inspectors (including officer in charge of the criminal investigation branch), 8 sub-inspectors, 25 sergeants, 26 corporals, 159 first and 181 second-class constables, 24 probation constables, 70 native trackers, 1 coxswain and 20 water police constables, 3 river police, and 14 detectives; total strength, 469 (exclusive of native trackers). There are 100 stations throughout the colony. The cost of police per head of population during the year amounted to 12s. 4d.

West Australian Museum and Art Gallery is situated near the Perth Railway station, and was formally opened on September 9, 1891, by Governor Sir W. C. F. Robinson as the Geological Museum. It then contained the collections made by the Rev. C. G. Nicolay, by the then Government Geologist and his predecessors. In 1892 the collections contained in the Swan River Museum, founded in 1860 by Captain J. S. Roe, the Surveyor-General, were purchased by the Government, and the word *Geological* was omitted from the title. In 1895 the control of the museum was transferred from the Minister of Mines to a committee, and the annual grant increased from £200 to £4,000 per annum. In July of that year the Zoological and Art Galleries were opened by His Excellency the Chief Justice, Sir A. C. Onslow. On the 19th June, 1899, another gallery was opened by the Governor, Colonel Sir Gerard Smith.

The Natural History collections contain specimens of nearly all the mammals and birds of the colony, as well as many reptiles and fish, in addition to numerous foreign specimens. The birds alone number over one thousand.

The Palæontological collections were lately enriched by the purchase of the Tennant collection, containing over 3,000 fossils. The Mineral and Rock collections include a most remarkable series of gold-bearing rocks. The Art collections include works by Sir Thomas Lawrence, Bonnington, Lord Leighton, Sir E. Burne-Jones, Clausen, La Thangue, Peacock, S. Melton Fisher, A. Parsons, J. Ford Patterson, McCubbin, &c.

The Museum is open daily (Mondays excepted) and on Sunday afternoons. The attendance of visitors during the past year was 45,983.

Charitable Institutions.—There were 25 hospitals; one lunatic asylum at Fremantle, containing 244 inmates on January 1, 1900; two poor-houses (and one auxiliary home) with 337 inmates; two native institutions with 276 inmates; 2 Protestant orphanages, 116 inmates; and 3 Roman Catholic orphanages, 195 inmates; two Government industrial schools with 50 inmates; reformatory with 13 inmates; and children's home with 12 inmates. They are supported by public funds and private subscriptions. The total number of those who received Government relief during the year 1899 was 1,359.

Friendly Societies, Building Societies, &c.—The Friendly Societies of Western Australia are the Manchester Unity Independent Order of Oddfellows; Independent Order of Oddfellows; Grand United Order of Oddfellows; Independent Order of Rechabites; Ancient Order of Foresters; Hibernian Australasian Catholic Benefit Society; Order of the Sons of Temperance; United Ancient Order of Druids; Protestant Alliance Friendly Society of Australasia; Irish National Foresters Benefit Society. Australian Natives Association; Grand United Order of Free Gardeners; Kalgoorlie Caledonian Society; Friendly Societies Association of Kalgoorlie; United Friendly Societies of Boulder; Boulder United Friendly Societies Medical Institute and Dispensary. They have a total of 68 branches, which are situated in the chief towns of the colony, and the number of members on 1st January, 1899, was 4,543 (including 173 honorary members). Aggregate total income for the year, £15,557; expenditure, £12,976. The total capital was £55,409.

There are ten Building Societies established in the colony, namely:—Perth Benefit B. I. and L. Society, Permanent; Fremantle Benefit B. and I. Society; Northam Mutual Benefit B. I. and L., Permanent; Albany Benefit B. I. and L.; Geraldton Benefit B. I. and L., Permanent; Bunbury Benefit, B. I. and L., Permanent; Western Starr-Bowkett; Swan District Benefit B. I. and L., Permanent; West Australian Building Society,

Permanent; and Perth Co-operative Starr-Bowkett Society, No. 1.

Working Men's Associations and Mechanics' Institutes are to be found in almost every settled district.

Assurance.—There are seven life assurance companies and a number of fire companies carrying on business in the colony. There is only one Act dealing specially with life assurance, namely: "The Life Assurance Companies' Act, 1889."

Savings Bank.—The Post Office Savings Bank was established under 27 Vic., No. 5, which was amended by 57 Vic., No. 3. Deposits from 1s. and up to £150 exclusive of withdrawals annually, the limit being £600 inclusive of interest. Interest is allowed at the rate of 3 per cent. per annum on all accounts over £1 and up to £300. On June 30, 1900, the Post Office Savings Banks (*i.e.*, head office and branches) numbered 67, with 126,881 deposits, amount £1,142,099; average deposit, £14 0s. 0d.; accounts opened and re-opened, 18,406; closed, 14,131; remaining open, 33,646. The balance due to depositors on June 30, 1900, was £1,299,144 8s. 0d.; and interest £33,086 6s. 6d.; this amount is computed at 3 per cent., the reduction having taken effect from July 1, 1896. The withdrawals during 1899-1900 were 56,637, amounting to £962,371 2s. 8d., the average amount of each withdrawal being £16 19s. 10d.

Banking.—There are six banking institutions in the colony: the Western Australian, the National Bank of Australasia, Limited, the Union Bank of Australia Limited, Bank of New South Wales, the Commercial Bank of Australia and the Bank of Australasia, with branches at Fremantle, Geraldton, Albany, Coolgardie, Cue, Southern Cross, Kalgoorlie and Menzies, and many other towns in the colony. The bank average returns for the quarter ended June 30, 1900, were as follows:—Liabilities: Notes in circulation, £362,141; bills ditto, £33,432; balance due to other banks, £41,816; deposits not bearing interest, £2,908,892; bearing interest, £1,499,322; total deposits, £4,408,214; total average liabilities, £4,845,603. Assets: Coin, £2,363,211; bullion, £231,674; Government securities, £69,152; landed property, £198,564; notes and bills, £66,187; balances due from other banks, £206,341; all other debts due to the banks, £2,670,144. Total, £5,805,273. Capital paid up, £10,377,518. Dividend paid ranged from 6 per cent. in Union Bank to 17½ per cent. in Western Australian.

Coins, Weights and Measures, &c – Coins, similar to United Kingdom; accounts kept in British sterling; weights and measures, British Imperial.

The Mint—The foundation-stone of the Perth branch of the Royal Mint was laid by Sir John Forrest on September 23, 1896. The building has been erected in Hay Street, on a block of land adjoining Hay Hill and Murray Streets. An Order in Council from Great Britain established the Mint on October 13th, 1897. The buildings were finished in November, 1898, and uninterrupted progress has been made with the erection and adjustment of the machinery and plant. So far as mechanical appliances are concerned, the Mint is now in a position to deal with an annual coinage of £3,000,000. His Excellency the Governor, Sir G. Smith, formally opened the Mint on the 20th June, 1899, and on the 21st it was opened for the receipt from the public of deposits of gold for coinage. It may be noted that West Australia is the third colony which has established a branch of the Royal Mint, the others being New South Wales and Victoria The first shipment of Western Australian minted gold (£50,000) was made in 1899.

Public Holidays.—The following are the public holidays observed throughout the colony:—New Year's Day; Australian Anniversary (January 26th); Good Friday; Easter Monday; Queen's Birthday; Foundation of the Colony (June 1st); Coronation Day; Proclamation Day (October 21st); Prince of Wales' Birthday; Christmas Day and Boxing Day. It has been enacted that all these, excepting New Year's Day, Good Friday, Easter Monday, May Day and Boxing Day, whenever they fall on another day than Monday are to be observed on the Monday next following.

Administration of Justice.—The judicial system comprises a Supreme Court (exercising a civil and criminal jurisdiction), presided over by a Chief Justice, assisted by two Puisne Judges, who sit together to hear appeals from all inferior courts; and Courts of Quarter and Petty Sessions. The Courts of Quarter Sessions are held at Albany, Broome, Bunbury, Cue, Coolgardie, Esperance, Geraldton, Hall's Creek, Roebourne, Derby, and Wyndham. The Government Resident or Resident Magistrate is Chairman of the court. Appeals can be made from the Full Court to the Privy Council in cases involving property beyond the value of £500. Judges of the Supreme Court go on circuit. Police courts are held in all the districts, and there are Small Debts Courts sitting monthly, except at Perth, where the court is held every alternate Thursday, and Fremantle every second and last Monday. Cases arising out of the mining regulations are heard and adjudged by the Wardens of the Goldfields.

Governmental.—The administration of the colony is under a Governor appointed by the Crown. The Governor during a brief absence from the colony can appoint his deputy. The proclamation of Responsible Government, by His Excellency Sir W. C. F. Robinson, took place in Perth, amid great public rejoicing, on October 21, 1890. By the Amended Constitution Act, which came into force with the passing of the Act on December 16, 1899, the colony was divided into ten electoral provinces, each returning three members to the Legislative Council, and fifty electorates, each represented by a single member in the Legislative Assembly. The fifty electorates are as follow:—Albany, Beverley, Boulder, Mount Burgess, Claremont, Cockburn Sound, Bunbury, Coolgardie, Cue, Dundas, Fremantle, East Fremantle, North Fremantle, South Fremantle, Gascoyne, Geraldton, Greenough, Guildford, Hannans, Irwin, Kalgoorlie, Kanowna, East Kimberley, West Kimberley, Mount Magnet, Mount Margaret, Menzies, Moore, Murchison, North Murchison, Murray, Nelson, Northam, Perth, East Perth, North Perth, South Perth, West Perth, Pilbarra, Plantagenet, Roebourne, South-West Mining, Subiaco, Sussex, Swan, Toodyay, Wellington, Williams, Yilgarn, York. The qualification for an elector of the Legislative Assembly is that he be 21 years of age, a natural born or naturalised subject of Her Majesty, and have resided in the colony 12 months. In order to be registered as an elector for a certain district he must either have a household or leasehold estate of £10 annual value, or £50 freehold, or be a resident in such district at the time of registration, or hold a Crown land's lease of £5 annual value, or have his name on Municipal or Road Board District list. A member (elected for four years) must have resided 12 months in the colony; be 21 years of age; a natural born subject, or naturalised for five years, and a resident in the colony for two years. The tenure of seat in the Legislative Council is six years; at the expiration of two years from the date of election, and every two years thereafter, the senior member for the time being for each province retires. The qualification for a member is that he be a free man of thirty years, a resident in the colony for at least two years, a natural born subject, or naturalised for five years, and a resident in the colony during that period. The qualification for an elector of the Council is that he be 21 years of age; a natural born or naturalised subject of Her Majesty; resident 12 months in the colony, either have possessed a freehold estate of £100, or be a householder of a dwelling valued at £25 yearly, or holder of a lease of £25 annual value, or holder of a leasehold of £10 annual value; or have his name on a Municipal or Road Board District list.

Federation.—The Referendum vote of the people on July 31, 1900, decided that the colony should join the federation of the Australian colonies, the voting being: *Yes*, 44,800; *No*, 19,691; or a majority in favour of federation of 25,109.

Census.—The day proclaimed for taking a Census of the colony is March 31, 1901.

GOVERNMENT OF WESTERN AUSTRALIA.

Administrator and Commander-in-Chief, Sir Alexander Campbell Onslow.

EXECUTIVE COUNCIL.

President, His Excellency the Administrator.
The Right Hon. Sir John Forrest, P.C., K.C.M.G., M.L.A., Premier and Colonial Treasurer.
Hon. B. C. Wood, M.L.A., Commissioner of Railways and Director of Public Works.
Hon. G. Throssell, M.L.A., Commissioner of Crown Lands.
Hon. H. B. Lefroy, M.L.A., Minister of Mines.
Hon. R. W. Pennefather, M.L.A., Attorney-General.
Hon. G. Randell, M.L.C. Colonial Secretary.

LEGISLATIVE COUNCIL.

* (*Twenty-Four Members.*) Electors on roll, April, 1900, 11,951.
President and Chairman of Committees, Hon. Sir Geo. Shenton, Kt.

MEMBER.	PROVINCE.

* Under the "Constitution Acts Amendment Act, 1899," it is provided that the Legislative Assembly shall consist of 50 members.

OFFICIAL DEPARTMENTS.

COLONIAL TREASURER'S DEPARTMENT.

Colonial Treasurer (Premier), Rt. Hon. Sir John Forrest, P.C., K.C.M.G. M.L.A. £1,200.
Under Treasurer, L. S. Eliot. £650.
Accountant, S. J. Randell. £425.

Premier's Department.

Under Secretary, F. D. North. £200 (in addition to salary as Secretary to Executive Council).

Agent-General's Department.

Agent-General, Hon. Sir E. H. Wittenoon, Kt. £1,500.
Secretary, R. C. Hare. £650.

Customs Department.

Collector, Clayton T. Mason. £700.
Chief Clerk, N. E. Knight. £400.
Chief Landing Surveyor, D. J. C. Goodsir. £500.
Landing Surveyor, M. Samson. £380.
Sub-Collector and Landing Surveyor, Albany, E. S. P. Troode. £350.
Sub-Collector, Perth, A. T. Sherwood. £350.

Harbour Master and Pilot Departments.

Chief Harbour Master, Fremantle, Commander C. R. T. Russell, R.N. £550.
Assistant Harbour Master and Pilot, C. J. Irvine. £350.
Rottnest Pilot, J. G. Abrahamson. £275.
Harbour Master, Albany, S. G. T. Butcher. £400.
Pilot, Albany, S. G. Butcher. £300.

Government Storekeeper.

Storekeeper, C. R. Pether. £500.
Chief Clerk, T. Flynn. £330.
Accountant, C. W. E. Letch. £260.

Police Department.

Commissioner, Capt. Fred. A. Hare. £750.
Chief Inspector, W. C. Lawrence.
Inspectors, E. G. Back, E. O. Drewry, C. N. C. Newland, T. C. Holmes, C. H. Ord, J. Farley (Crim. Invest. Branch). £325 each.
Chief Clerk, T. Kelly. £325.
Acting-Inspectors, John Hogan and D. O'Connell; Sub-Inspectors, M. H. Brophy, T. J. Orme, W. C. Sellenger, Robert Counsell; and Acting Sub-Inspectors, C. Woods and L. Condon; Drill Instructor, W. A. Murchin.

Defences.

Commandant, Lieut.-Col. G. H. Chippendall. £600 and allowances.
Chief Staff Officer, Major J. A. Campbell (late Cameron Highlanders). £350 and allowances.
Officer Commanding Permanent Force, Albany: Major H. G. Moor, R.A.; Lieutenant, J. H. Hurst.

Aborigines.

Chief Protector, H. C. Prinsep, J.P. £550.

RAILWAYS AND PUBLIC WORKS DEPARTMENTS.

Railways and Tramways.

Commissioner of Railways, and Director of Public Works, Hon. B. C. Wood, M.L.A. £1,000.
Under Secretary for Railways, A. F. Thompson. £550.
General Manager, J. Davies. £1,250.
Chief Traffic Manager, John T. Short. £800.
Railway Accountant, T. Patterson. £550.
Engineer in charge of Existing Lines, W. W. Dartnall. £800.

Works and Buildings.

Under Secretary of Works, M. E. Jull. £600.
Engineer-in-Chief, C. Y. O'Connor. £1,500.

COMMISSIONER OF CROWN LANDS DEPARTMENT.

Commissioner of Crown Lands, Hon. George Throssell, M.L.A. £1,000.
Under Secretary for Lands, R. C. Clifton. £600.
Surveyor-General, H. F. Johnston. £550.

Stock Inspector's Department.

Chief Inspector, J. M. Craig. £350, and allowances £200.

Western Australian Agricultural Bank.

Manager, William Paterson. £500.

DEPARTMENT OF AGRICULTURE.

Secretary, L. Lindley-Cowen. £425.
Viticultural Expert, A. J. Despeissis. £450.

DEPARTMENT OF MINISTER OF MINES.

Minister of Mines, Hon. Henry Bruce Lefroy, M.L.A. £1,000.

Mining Department.

Under-Secretary for Mines, H. S. King. £550.
Chief Clerk, L. L. Crockett. £375.
Statist, J. Wallace.

Geological Department.

Government Geologist, A. Gibb Maitland. £600.
Mineralogist and Assayer, E. S. Simpson. £350.

Goldfields Wardens.

Ashburton, A. Phelps (acting.)
Kimberley, D. W. Green (acting).
East Coolgardie, J. M. Finnerty, £650.
Gascoyne, J. Young (acting).
Yilgarn, V. Black, £250.
Pilbarra, A. Ostlund, £500.
Murchison and Yalgoo, A. S. Hicks, £600.
Peak Hill, C. U. Bagot, £500.
East Murchison, A. G. Clifton, £550.
Coolgardie, E. P. Dowley, £750.
Mount Margaret, A. E. Burt, £500.
North Coolgardie, W. L. Owen, £600.
Dundas, P. L. Gibbons, £550.
Broad Arrow, L. R. Davis, £600.
North-East Coolgardie P. Troy, £600.
West Pilbarra, A. Madden (acting).
Donnybrook, W. A. G. Walter, £450.
Phillip River, F. W. Spence.

Inspectors of Mines.

Coolgardie and Yilgarn, George Lightly.
Central Goldfields, W. F. Greenard and J. Crabb.
North Coolgardie, Jas. Hudson.
Kanowna, Geo. Jenkyn.
East Coolgardie, T. H. Lander and T. Smith.
Dundas, W. M. Deeble.

Registrars, Mining Districts.

Collie, R. Gee.
Greenbushes, W. A. G. Walter.
Northampton and Yandanooka, G. Varley.

ATTORNEY-GENERAL'S DEPARTMENT.

TOWNS IN WESTERN AUSTRALIA.

ALBANY, 35° 02′ S. lat. 117° 54′ E. long., King George's Sound, is situated on rising ground on the North shore of Princess Royal Harbour, between Mount Clarence on the east and Mount Melville on the west, about 254 miles by road, and 352 miles by railway from Perth, with which city it communicates also by means of a road, made originally for the conveyance of mails and for passenger traffic. The Great Southern Railway, the first sod of which was turned by Sir F. N. Broome on the 20th October, 1886, connects Albany with Perth, and the mails are conveyed by this line. Albany is the principal town of the Plantagenet county, and for years was the port of call of the Peninsular and Oriental Company's and the Orient Company's steamers carrying the Australian mails, and also of the Messageries Maritimes and the Liverpool White Star Line. But the first named and the German boats now call at Fremantle. The steamers anchor within Princess Royal Harbour, which is completely land locked. Passengers are conveyed by steam launches, which come off to the vessel. Hotels: Freemasons', White Hart, Esplanade, Royal George, Premier, Albany, York, and Weld Arms. The harbour is one of the finest on the Australian coast, and is well protected from winds. A jetty of some length, facing the town, affords excellent facilities for the loading and discharging of the largest size coasting steamers. The depth of water at this jetty is about 22 feet. The West Australian Land Company, who built the railway, but who were bought out by the Government in 1897, also erected a splendid jetty, and other important improvements have been made in the town. The town is well laid out, and there are magnificent views from the hills. A drive called the Marine Drive was completed in 1898. It circles the hills and gives grand views of the harbour, King George's Sound, Oyster Harbour, and of the surrounding country. The drive makes a complete circle, and is 5½ miles round.

Albany is the health resort of the colony, and is largely resorted to by people from the goldfields, and indeed all parts of the colony. Its climate is, perhaps, the finest in Australia, the summer heat rarely exceeding the seventies, while even in the great heat waves it has never reached 100. Hot winds are never experienced. During recent summers Albany has had visitors from Sydney, Melbourne and Adelaide. The Town Council are directing their attention to increasing the attractions to holiday-makers. A water supply scheme by gravitation from Mounts Melville and Clarence is being devised to provide the town with a pure supply.

Many of the buildings are imposing. The places of worship comprise Episcopal (St. John's), Wesleyan, Presbyterian, and Roman Catholic churches, with a Roman Catholic convent, school, and chapel, and Salvation Army. Albany is a post town, with savings bank and money-order office, and is connected with Perth by a line of telegraph. It has one Government school (boys and infants, and girls); also two assisted schools (boys and girls); a mechanics' institute, Masonic, M.U.I.O.O.F. and S.O.O.F. lodges; Albany Club, a Building Society, and branches of the National, Union, and West Australian Banks. The district has several breweries, coach factories, and confectioneries, a gasworks, printing offices, and a tannery. There is a Government Resident and also a Municipal Council (proclaimed Feb., 1871), with a mayor presiding. King George's Sound, of which Albany is now the township, was first occupied in 1826, in consequence of some apprehension that the magnificent harbour might fall into the hands of some of the maritime powers. An order was sent from the Imperial Government to the then Governor of New South Wales, to see to its occupation, and a party was sent from Sydney, which landed on Christmas Day, 1826. It was under the command of Major Lockyer, of H. M. 39th Regiment, and consisted of a detachment of that regiment and a party of prisoners from Botany Bay, about seventy-five in all. It was simply a party of occupation, and was subsequently withdrawn. No immigrants were imported nor lands sold, nor was any attempt made to colonize the locality until it became, in after years, connected with the Swan River Settlement. In 1831 King George's Sound was given up as a penal settlement, and included within the jurisdiction of Western Australia. The lighthouse erected at the extremity of Point King, at the entrance of Princess Royal Harbour, shows a fixed white dioptric light of the fifth order, visible at 12 miles. It is proposed to have an Imperial naval coal depôt here, with the proper defences, and also to establish a Federal Quarantine station. The entrance of King George's Sound lies between Bald Head and Herald Point, at 5 miles N. by E. from it, and is divided into three channels by Breaksea and Michaelmas Islands

The fortification of King George's Sound and Princess Royal Harbour attracted considerable attention on the part of the English military authorities, and on the recommendations of a special committee appointed to report defence works were completed. There are two forts, mounted with 6-inch guns. The Federal garrison consists of about 50 men, under the charge of an Imperial officer of the rank of captain. The forts are immediately above Point King. A torpedo corps is connected with the garrison. A submarine cable connects Breaksea Island (which is the first land made after passing Cape Leeuwin) with the mainland. A lighthouse on the island exhibits a fixed white dioptric light, which is visible from a distance of 24 miles. The Sound is about 5 miles wide north and south, and five miles broad, with average depths of 10 to 5 fathoms sand: on the south side of the Sound there is a deep channel 2 miles long north and south, and 1 mile broad, having 11 to 20 fathoms, with 7 to 10 fathoms close around. The entrance to Princess Royal Harbour is about a quarter of a mile wide, and lies between Possession and King's Points. The harbour is about 4½ miles long, NW. and SE., and about 3 miles wide. It has been dredged at the Mail Steamers Anchorage Sound to a uniform depth of 34 feet at low water. Population about 3,250. Press: *Albany Advertiser*, Tuesday, Thursday and Saturday, 1d.

ARRINO, or Irwin River (29° 28′ S. lat., 115° 36′ E. long.), co. Upper Irwin, a post and telegraph station, 182 miles NW. from Perth. Railway station on Midland Railway. Copper mining, agricultural and pastoral district. Township lighted with oil, water from Government wells. Formation: Limestone and schistoze rocks. Agates are found. Population of district about 100.

ARTHUR RIVER (33° 31′ S. lat., 116° 53′ E. long.), a postal, money-order office and telegraph station, 120 miles (131 postal) from Perth on the Albany road, in the Williams district. It has also an Episcopal church. Communication is by the Great Southern Railway. Wagin railway station is 18 miles distant. Coach weekly, 10s. Inn: Spratt's.

ASHBURTON (21° 43′ S. lat., 114° 57′ E. long.), (*See* Onslow). An important pastoral district and gold-field, lying between the Carnarvon and Roebourne districts, 725 miles NNW. of Perth, on Ashburton River. Has post, telegraph, money-order office, hotel, school, court-house and police-station. Population of district about 200.

AUSTIN (27° 38′ S. lat., 117° 51′ E. long.), is on an island in Lake Austin, about 16 miles SW. of Cue, and 540 miles NE. of Perth. It has a post-office, telephone, telegraph and railway station. Is a mining district, in which are situated the Golconda Gold Mine (owned by an English Company), the island Eureka, and the island Lake Austin, and several smaller gold mines, turning out about 1,000 ozs. per month. Austin is on the line of rail from Geraldton to Cue. Has two hotels. Formation, ironstone, diorite dykes and quartz reefs. Population of about 140.

AUSTRALIND (33° 15′ S. lat., 115° 39′ E. long.), a post town, near the sea-coast, in the district of Wellington, 107 miles distant from Perth S., pleasantly situated on the Leschenault estuary, 7 miles from the port of Bunbury. It was the scene of the operations of the West Australian Company, projected in London, for the purpose of taking up land in the colony. A commissioner and crowd of emigrants left England and selected Australind as the site of their future home. They made a large town on a map, and built a few houses on land, but in a short time the settlement signally failed. Congregational chapel (with fortnightly services); Roman Catholic services held in the school. Mail twice a week. Population about 40.

BALBARRUP (34° 12′ S. lat., 116° 12′ E. long.) on Willgarrup river, a small pastoral town site in the Nelson electoral district, with a post and telegraph station, 196 (192 postal) miles S. of Perth, which is reached by coach to Bridgetown (20½ miles), thence rail. Has school, in which Anglican services are held. Agricultural and pastoral district. Population of district 200.

BALINGUP, post town in the Nelson district, 162 miles from Perth, rail to Donnybrook tri-weekly, thence coach 18 miles. Pastoral district.

BALLA BALLA is the nearest port to several of the goldfield centres in the Pilbarra district, and is convenient for sheep-owners loading for market. It is 36 miles from Cossack, and promises to become one of the most prominent coastal ports in the north-west of Australia. Perth reached by weekly

coach to Roeburn, 55 miles, thence rail. About 1,000 bales of wool are annually exported, and several thousand sheep are shipped annually. It is also the port for several copper mines in the district—the Balla Balla copper mine is 16 miles from the port. These copper mines are proving very rich.

BAMBOO CREEK (21° S. lat., 120° 5′ E. long.), is a rapidly rising reefing centre, on the Pilbarra gold-field, NW. division, about 100 miles from Condon, and 40 miles NE. from Marble Bar. Has post and telegraph offices, two hotels, store, police-station, water from public wells. It is reached from Perth by steamer to Cossack, train to Roebourne, thence coach. District is chiefly a mining one, there being three crushing plants constantly at work. The "Bulletin" & "Pilbarra" Co.'s properties are the principal mines. The township is built in a straggling fashion, and has a population of about 70 whites and 600 Asiatics.

BANNISTER (32° 46′ S. lat., 116° 30′ E. long.), a post and telegraph office, 67 miles SE. of Perth, which is reached by coach to Pingelly, 40 miles thence rail. on the Albany road, near Hotham river, in the Williams district. The communication is *viâ* Pingelly, on the Great Southern Railway. The place is named after Captain Bannister, who made the first overland journey to Albany in 1831. Agricultural and pastoral district.

BARDOC (30° 20′ S. lat., 121° 17′ E. long.). A postal and mining township, with telegraph station, about 9 miles N. of Broad Arrow, in the Broad Arrow Goldfield, NE. Coolgardie electional division. About 400 miles from Perth, which is reached by rail *viâ* Kalgoodie. Has four hotels, State school, Roman Catholic church, police station, miners' institute, hospital. Principal mines: Bank of England, Golden Bardoc, Vetter's Find, Excelsior, Zorastrian, and Nerrin Nerrin. Water supplied from large cement tank of 2¼ million gallons capacity, and by condensers. Population, town 170; district 200.

BAYSWATER.—On the Swan river, is a post, telegraph and railway station, 4 miles from Perth. Has two hotels, public school, Wesleyan, Baptist, Anglican churches, and Salvation Army. Industries: brickmaking, foundry, smelting-works, market gardening and horticulture. It is a picturesque and salubrious district, containing many sulphur and other springs and should be a fashionable health resort when its advantages become more widely known. Population of district, 1,000.

BEACONSFIELD.—A suburb of FREMANTLE.

BERKSHIRE VALLEY (30° 53′ S. lat., 116° 14′ E. long.), Melbourne district, post and telegraph station, 114 miles old road route from Perth, on the Bibenow Brook, and the centre of an excellent agricultural district. Communication is by coach to Moora railway station, 11 miles distant, thence train 86 miles. Has a post office and telegraph station. Formation: granite, ironstone and gravel. Clinch's homestead cattle and sheep station is here. Water from wells. Agricultural and pastoral. Population about 30.

BEVERLEY (32° 07′ S. lat., 116° 57′ E. long.), a small agricultural township, with post, telegraph, money-order and savings bank offices, on the River Avon (Beverley electorate), about 85 miles E. of Perth (110 rail miles), and 22 miles S. of York, and the centre of a fertile agricultural district. Proclaimed a municipality in March, 1892. The Eastern Railway and the Great Southern Railway connect here. Passengers from the Eastern colonies *en route* to Coolgardie or Perth *viâ* Albany pass through here. The district is well suited for orchards, and should eventually become a prominent fruit-growing centre. Cereals and fodder do well; grazing on a small scale is carried on. On the 20th Oct., 1886, Lady Broome at Beverley turned the first sod of the Northern section of the Great Southern Railway, connecting Albany with Beverley. Sir F. N. Broome simultaneously at Albany turned the first sod of the Southern section of the same line. Its buildings comprise a parsonage-house and three Anglican churches, Roman Catholic and Wesleyan church, railway station, agency of the W.A. Bank, four hotels, police station, court house, municipal council chambers, post-office, telegraph office, Government Land Agency, a Government school (average attendance 70), and one at North Beverley, with 40 scholars, and some cottages. There is a mechanics' institute, I.O.G.T., A.N.A., sports clubs, farmers' association, &c. Farming, grazing and viticulture are carried on in the district, and it bids fair to become an important agricultural centre. Population, about 250; of the district, 2,000.

BLACK FLAG (30° 33′ S. lat., 121° 13′ E. long.). A mining township, with post, money-order, telegraph and savings bank offices, 25 miles west from Kanowna, in the Bardoc division of the NE. Coolgardie Goldfield. Reached by rail to Broad Arrow, thence coach tri-weekly. Exceptionally healthy climate. Has three hotels, police station, branch West Australia Bank, miners' institute. Mining district; one mine at work, others developing. Copper has been discovered within 3 miles of the township. Floating population of township 100, and district about 200.

BOOGARDIE. Postal receiving station, four miles from Mount Magnet railway station, to which conveyance, thence train to Perth. Has two hotels and an institute. Water from Government wells. Mining district with a population of about 80.

BOORABBIN. Post, telegraph and railway station, 296 miles from Perth. Has hotel, refreshment rooms, two water tanks and permanent soak. Population about 46.

BOULDER (30° 47′ S. lat., 121° 30′ E. long.). Postal township on the Boulder fields, connected with Kalgoorlie by train, rapidly becoming an important business centre. There are several good hotels and stores, and a school. The mines and mills in the district employ about 4,000 persons. Newspaper: *Evening Star.*

BOYADINE (31° 48′ S. lat., 117° 0′ E. long.), a post office station, 88 miles eastward of Perth, and about 28 miles from York, in the district of Beverley. Has Anglican church. Agricultural district. Population about 100.

BOYANUP (33° 28′ S. lat. 115° 43′ E. long.), post town and railway station, 122 miles SW. from Perth. Has hotel, school, church, agricultural hall and saw-mills. Agricultural, timber and viticultural industries. Ironstone and clay formation. Population of town and district about 200.

BREMER BAY (34° 28 S. lat., 119° 30′ E. long.), a post and telegraph station, on Nicolay River, 107 miles E. of Albany, on the South Australian line. Fortnightly steamer to Albany, thence train to Perth, 440 miles distant. Pastoral district. Formation: Limestone, granite, sand. Population about 30.

BRIDGETOWN (33° 57′ S. lat., 116° 8′ E. long.), a small post town, co. Nelson, with money-order and telegraph office, savings bank and railway station, on the Blackwood river, situated about 172 miles S. from Perth, and about 60 miles SE. from Bunbury. It is surrounded by a fertile pastoral country, and bids fair to become a place of importance. The Greenbushes Tinfield is situated at about 9 miles from here. It contains four hotels, court-house, a mechanics' institute, Roman Catholic, Anglican, and Wesleyan churches, glee club, Druids' lodge, debating society, agricultural society, progress association, one school, timber mill, cordial factory, and shops and stores. Lighted with kerosene; water from wells. Good fruit-growing land. District is noted for splendid orchards. Communication with Perth is *viâ* Bunbury, where the mail steamer can be taken. Population, about 600.

BROAD ARROW (KURAWA) (30° 27′ S. lat., 121° 19′ E. long.), or BROAD ARROW, is a municipality postal and mining town, with money-order, telegraph, and savings-bank offices, about 24 miles NNW. of Kalgoorlie. It is reached by train from Perth *via* Kalgoorlie, and is about 400 miles E. by N. of Perth. Has police-station, seven hotels, branches W. A. Bank and Bank of Australasia, Government school, Masonic lodge, Wesleyan, Anglican, and Roman Catholic churches, mechanics' institute, warden's inspector of mines, and registrar's offices, two breweries, a cordial factory, and one club—Kurawa and Miners', literary societies, tennis courts, &c. The principal mines adjoining the town are:—Golden Arrow, Hill End, Reison's Reward, Mount Lyall, and Tasmanian; within a radius of eight miles there are about twenty others. Water supplied from condensers and the Arrow Lake, also a 10,000,000 gal. dam. Lighted with kerosene. Formation: Gneiss outcrop in places, porphyry diorite covered in places by slate and thermal ironstone. Population of town and district about 3,000. Newspaper: *Standard.*

BROOME (17° 57′ 33″ S. lat., 122° 14′ 33″ E. long.), a town on the North-Western point of Roebuck Bay, Broome district. Kimberley division, 1,256 nautical miles from Fremantle; named after Governor Broome. There are post and money-order offices, residency, two hotels, Roman Catholic Aboriginal Mission, hospital, local court, mechanics' institute, soda-water factory, cable, police and telegraph station, and custom house. Water by reticulation from 15,000 gallon tank, elevated 50 feet, and filled by windmill from large well. Average rainfall about 18 inches. The Eastern Extension Telegraph Company has a station here, connecting the cable from Banjoewangie with the West Australian land lines. It is the head-quarters of the pearling fleet, which carries about 800 men. Many vessels lie up here during the north-west monsoon, from December to March, working their luggers at neap tides on the pearl banks in and about Roebuck Bay. A jetty and tramway have been erected, costing about £20,000, and other shipping facilities are being provided. Stock-yards and race for shipping cattle have also been erected. There is communication about once a fortnight with Fremantle, four steamers running through to Singapore and Fremantle, and a Government subsidized steamer runs to Wyndham, Derby, and Fremantle. Population, about 400. At BEAGLE BAY, about 70 miles north, is situated the Mission station of the Monks of La Trappe, founded in 1890, for the benefit of the Aborigines of the West Kimberley district.

BROOMEHILL. (33° 49′ S. lat., 117° 37′ E. long.), is in the Plantagenet district. Has post office, also office for registration of births, death and marriages, money-order office, telegraph station, railway station, 236 miles from Perth. Imperial hotel. Public hall, Government school, mechanics' institute with reading-room and circulating library, police station. Broomehill is a thriving township on the Great Southern Railway, 104 miles from Albany, and is on the shortest track to the Coolgardie goldfields. There are insurance agencies, several stores and shops, and an agricultural and horticultural society. The district is agricultural and pastoral, and has a population of about 400.

BRUNSWICK (33° 15′ S. lat., 115° 50′ E. long.), a small settlement, with post and telegraph office, on the Brunswick river, in the Wellington district, 100 miles S. from Perth. Has hotel, farmers' association, public school and an agricultural hall. Anglican, Wesleyan and Congregational services held. It is a station on the South Western Railway. The district is agricultural and pastoral. Formation: ironstone, granite, and quartz. Population, about 70.

BULONG (I. O. U.) (30° 45′ S. lat., 121° 47′ E. long.), is a municipal town in the NE. Coolgardie Roads Board district. It is 15 miles SSE. of Kanowna, 19 miles E. of Kalgoorlie, with which connected by daily mail coach, and 400 miles from Perth, which is reached by coach to Kalgoorlie, and thence train. A coach runs weekly to Kurnalpi. It has six hotels, branch West Australian Bank, Government school, Anglican, Wesleyan, and Roman Catholic churches, hospital, Wardens court, police station, post, money-order, savings bank and telegraph offices

miners' institute, A.N.A. society, and two aerated water factories. The town has made wonderful progress during the past year, owing to the development of the mines, the leading ones being Queen Margaret, Queen Margaret South, White Horse, and Margaret Central. Good building stone is obtained within a mile of the town. Lake Yindarlgooda is about 2½ miles distant. Streets lighted with kerosene. Water obtained from condensers and Goldfields Water Supply Co. The Government tank has a capacity of 3,000,000 gallons. Ballygundi is about 6 miles W. of Bulong. Population of district about 1,500.

BULLA BULLING (31° 1′ S. lat., 120° 54′ E. long.). Post town, telegraph and railway station, 332 miles from Perth, and 18 from Coolgardie. Has hotel. Mining district on the Coolgardie field. Industries: stone-quarrying, mining and sandal-wood cutting. Population 15, district 200.

BUNBURY (33° 18′ S. lat., 115° 38′ E. long.), a post town, with telegraph, money-order, and Government savings bank office, is the principal port of the southern districts, and is picturesquely situated on the west side of the entrance to Leschenault inlet, in which debouch the Preston and Collie rivers, with several smaller streams. Proclaimed municipality, Feb., 1871. The harbour, known as Koombanah Bay, is a tolerably safe one being sheltered from all but the north-westerly winds. A coral reef protects the entrance to the bar, and a breakwater on it, commenced in April, 1897, is being constructed by the Government, under the control of the Public Works Department. These harbour improvements will be of great value to the port. Bunbury, named after Lieut. H. W. Bunbury (1836), is distant, by road, about 112 miles from Perth, with which there is railway communication (opened in 1893); by sea from Fremantle it is distant 90 miles, and by road 100 miles. Chief Hotels—Wellington, Rose, Prince of Wales, Pier and Gordon's. It is the capital of the district of Wellington, and a port for the shipment of timber, tin, sandalwood, horses, and produce, and is under municipal government. Coal has been discovered on the Collie River, 30 miles away, and is being worked; a railway connects. Bunbury contains Episcopal, Roman Catholic, Wesleyan and Congregational places of worship two schools (boys', and girls' and infants), and an assisted school; aggregate average attendance, 167; branches of the West Australian and Union Banks, Government hospital, Masonic, Foresters, Druids, I.O.G.T. & W.C.T.U. societies, a mechanics' institute, a gaol, and a steam flour mill. A court of general sessions is held here, and it is also a place of sitting for the Supreme Court Judge. A Chamber of Commerce has also been formed. A wooden lighthouse, showing a fixed bright light, visible from 12 miles, was erected in 1870. Bunbury is connected by telegraph wire with Perth and Fremantle. It is the outlet to a considerable tract of productive country, and possesses a jetty nearly a quarter of a mile in length, which affords facilities for the loading and discharge of vessels. It suffered much from the severe floods caused by the storm which visited the place last year. A railway runs from here as far as Donnybrook, and it is now extended to Bridgetown. The line, to be of any great use in serving the timber and mining industry, must be considerably extended. The coasting mail steamers call at this port. Population, about 3,000; district, 5,000. Newspapers: *Southern Times*, Tuesdays, Thursdays and Saturdays, *Bunbury Herald*, Tuesdays, Thursdays and Saturdays.

BURBANKS. Post and telegraph station, reached by rail to Coolgardie, thence coach. Has three hotels, State school, Anglican and Wesleyan churches, mechanics' institute, and branch A.N.A. Water from Londonderry dam, six miles distant. Mining district with a population of about 1,000.

BUSSELTON, or VASSE (33° 38′ S. lat., 115° 22′ E. long.), is a small seaport town and the capital of the agricultural district of Sussex, it lies 30 miles further S. than Bunbury, and is consequently about 170 miles from Perth. It takes the name of Vasse from a Dutch sailor, belonging to Baudin and Freycinet's expedition, who was drowned off the mouth of the river in 1801. The other name is derived from Mr. J. G. Bussell, who in 1831 explored the district. The river runs through the town and loses itself in an estuary. Busselton is connected by rail with Perth and Fremantle, *viâ* Boyanup Junction. Busselton is a post town, telegraph, and money-order and railway station, with a Government Savings Bank, is under municipal government, proclaimed February, 1871. There is an agency of the Western Australian Bank here. The principal hotel is the Esplanade. The places of worship are Anglican, Wesleyan, and Roman Catholic. There is one Government school, Orange and Druid lodges, the Weld Institute, a Working Men's Association, local court, Mechanics' Institute, hospital and a gaol. Timber industry and butter factory. Town lighted with kerosene. There is a lighthouse here, with a fixed light visible at 15 miles. Mails are conveyed by rail daily, twice on Mondays and Fridays to capital and intermediate stations. Margaret Caves in the vicinity. Agricultural and pastoral district. Population, town 450, and district about 1,000.

CANNING postal and railway township, about 9 miles S. of Perth, on the Canning river. Has two hotels, Anglican and Congregational Churches, Agricultural Hall, brick-yards and several stores. Agricultural and pastoral district.

CANNINGTON (30° 0′ S. lat., 115° 52′ E. long.), a small postal township, and railway station, about 7 miles south from Perth on the Canning. Has two hotels, Episcopal church and Congregational churches, agricultural institute, and a Government school, average attendance, 40. Brickyards, orchards, &c. Is lighted with kerosene. District is agricultural and pastoral. Population township, 200; district, 500.

CARLAMINDA Small mining centre, seven miles north of Yalgoo. Hotel.

CARNAMAH (29° 39′ S. lat., 115° 56′ E. long.), a telegraph, railway and pastoral station, in the electoral and police district of Irwin, on the Great North road between Perth and Geraldton, 179 miles N. of Perth.

CARNARVON (24° 52′ S. lat., 113° 39′ E. long.), a municipality at the mouth of the Gascoyne river, on the north-west coast, 489 nautical miles from Fremantle It promises to become an important settlement, and is the shipping port of the various sheep stations established in the district. It was proclaimed a municipality on May 19, 1891. Steam and sailing vessels call regularly, and good fresh water is obtainable. There are two good jetties. It contains two hotels (Port and Carnarvon), a post and telegraph office, money-order office and savings bank, school, residency, Anglican church, library, custom house, court house, gaol, hospital and four stores. Water from tanks. Chiefly pastoral district. Population, about 300.

CAROLING, 104 miles eastward from Perth, and a postal receiving station, for a scattered population of graziers.

CHIDLOWS (Co. Swan) (31° 52′ S. lat., 116° 16′ E. long.), a small postal and telegraph township with railway station, in the Guildford district, 29 miles E. by rail from Perth. Has one hotel, Government school, in which religious services are held monthly, water from Government and private wells. Saw-milling industry, in which most of the population are engaged. Lighted with kerosene. Agricultural district. Formation: ironstone and quartz ranges. Population of town and district about 200.

CHITTERING, (32° S. lat. 115 E. long.), 47 miles NE. from Perth. It is reached by rail to Muchea railway station, thence conveyance. Has two State schools, Anglican church, agricultural hall. Water from wells. Good shooting in district, which is an agricultural one. Formation: granite and mica. Population, 400.

CLAREMONT. A small postal township with money-order office, rail, savings bank and telegraph station, in the Swan River district, about 6 miles from Perth, with which it is connected by rail. Numerous market gardens in the district. Has one hotel, Anglican, Wesleyan, Baptist and Congregational churches, police station, Oddfellows' and Sons of Temperance societies, Government and private schools, municipal chambers, Claremont Hall, several fruit gardens, aerated water springs. Sandy formation. Lighted with electricity. Population of town and district about 2,000.

COLLIEFIELDS (33° 21′ S. lat, 116° 8′ E. long.). Post township on the Collie Coalfields. Has police station and lock-up, Government school, warden's office, Wesleyan, Anglican and Roman Catholic churches, and hospital. It is connected by rail with Perth, fares 20s. 5d. and 12s. 8d., return 25s 2d. and 15s. 8d The area of mineral leases in force in 1899: 22,213 acres.

CONDON (20° S. lat., 119° 19′ E. long.) (or SHELLBOROUGH), a township upon the NW. coast on Condon creek, 150 miles ENE. from Cossack in the De Grey District. It is the principal port for Marble Bar in the Pilbarra gold-fields. Has post and telegraph office. Reached from Fremantle by steamer to Port Hedland, thence boat, or by steamer to Roebourne, thence coach. Has two hotels, wheel-wright and blacksmith's shop. Water from Government wells. Pastoral district. Pearling industry. Population about 20.

COOKERNUP (32° 59′ S lat., 115° 54′ E. long), Wellington district, Brunswick Roads Board. A post township (issuing postal notes), with telegraph and railway station, 80 miles south of Perth, and 91 feet above sea level It has a State school and agricultural hall, in which church services are held, and Jarrah timber mills. Water from wells. Good farming district, with a population of about 150.

COOLGARDIE (30° 57′ S. lat., 121° 10′ E. long.), is a municipal town (proclaimed July, 1894), with post, money-order offices, savings bank, and telegraph station, 118 miles east of Southern Cross (with which a railway route connects), 357 miles from Perth. The seat of an Anglican Archdeacon, Ven. Barton Parkes. There are thirteen hotels; six banks: Australasia, National, Union, Commercial, N.S.W., and West Australian; Anglican, Presbyterian, Wesleyan, Roman Catholic, Mohammedan, and Salvation Army places of worship, State, R.C. and private schools, local court, wardens court, Chamber of Mines, mechanics' institute with a library of 2,600 volumes, mine managers' institute, Freemason, Oddfellows', Orange, A.N.A., I.O.G.T., and Druid lodges. Theatres — Tivoli, and Cremorne. Clubs—Coolgardie, Commercial, athletic, football and cricket and Stock Exchanges, saw mills, brick and tile mills, and breweries. Labour organizations: Amalgamated Workers' Association of W.A., Carpenters' and Joiners' Society, Plumbers and Tinsmiths, Butchers' and Half-holiday. Hospitals: Government, children's and convalescent home. There is a well-equipped fire brigade. Water is obtained from condensers, dams, soaks, and Government bores. It is lighted by electricity. Roman Catholic and Anglican cathedrals being built and bishops shortly to be appointed. It was discovered in 1891 by a Victorian miner named Bayley. There are two routes to the field, one from Esperance Bay and the other by the new railway to Coolgardie (310 miles from Fremantle, and 528 miles from Albany). The railway from Southern Cross to Coolgardie was opened in August, 1895, and completed in March, 1896; it has been extended to Kalgoorlie, Kanowna and Menzies. A line to connect Norseman with Coolgardie is also proposed; this will eventually be extended to Esperance, which is regarded as the natural port of the goldfields. Coolgardie is now

a great centre, and is considered a permanent goldfield; the lodes are wide and well defined; the stone carries a considerable amount of iron, with great variety of other minerals, embracing almost every species known to science; inferior kinds of precious stones are common. Lignite, copper, graphite, and silver lately discovered. The gold is very evenly distributed. Within a radius of 8 miles are the celebrated "Bayley's Reward" and "Londonderry," "Burbank" group, New Victoria Consols, Garfield and Australasian mines. Deep alluvial was struck by a prospector named Porter within a mile and a half of the town in April 1898, and in July of that year at 20 feet excellent prospects were obtained in Old Police Reserve, less than a quarter of a mile from the Post Office. In March, 1899, the first International Exhibition in the Colony was opened at Coolgardie. Small outlying settlements named Toorak and Montana are used for residential purposes. Population of municipality, 10,000; of the gold-field district, about 30,000. Newspapers: *Coolgardie Miner* and *Herald* (morning dailies), and *Pioneer* (weekly).

COOROW is a roadside postal receiving and railway station, on the river Coorow. Distance from Perth, 162 miles. Water from wells. Pastoral district. Formation: granite.

COSSACK (20° 40′ S. lat., 117° 08′ E. long.), also known by the names of Tientsin and Port Walcott, the principal port of the north district, lies on the banks of a tidal creek some 8 miles from Roebourne, 926 nautical miles from Fremantle. It is a municipality and was proclaimed on Nov. 30, 1887. There are the White Horse, and the Governor Weld hotels, post and money-order office and savings bank, custom house, branch Union Bank, Roman Catholic church, one store, and Government school. Church of England services are held occasionally in the school-room. The overland telegraph line from Northampton passes through here. A great drawback is the scarcity of fresh water. A light-house is erected on Jarman Island, and it was first lighted on May 16, 1888. The light is a fixed white of the third order dioptric, visible at 15 miles. A tramway 3½ miles in length connects Cossack with Roeburne, and is very largely used, being one of the most profitable public works in the colony. Cossack was formerly the main rendezvous of the vessels engaged in the pearl fisheries. New jetty works, a bonded store and warehouse have been erected. The development of the Northern gold-fields has made Cossack the train-shipping port for cargoes. Population, white and coloured, about 300.

COTTESLOE (32° S. lat., 118 E. long.), a suburb of Perth, in North Fremantle electorate, 8 miles west. Has post-office money-order office telegraph station savings' bank, and railway station, hotel, public and private schools, Anglican, Wesleyan, Presbyterian, and Congregational churches, Masonic (Tarbolton) lodge, and convalescent home. Industries: Lime burning and quarrying. Population of town and district about 5,000.

CRANBROOK (34° 16′ S. lat., 117° 32′ E long.) (Plantagenet district), post office and railway station. The centre of a farming and grazing district. 273 miles from Perth and 68 from Albany. Has hotel, school, and store. Population about 50.

CUDDINGWARRA (27° S. lat. 118 E. long.) Post and telegraph township, in the Murchison Central district, about 604 miles NE. from Perth. Rail to Cue, coach thence tri-weekly. Water from wells. Has two hotels, miners' institute, Amalgamated Workers' Association, and stores. Cement and ironstone formation. Population about 50.

CUE (27° 25′ S. lat., 117° 52′ E. long.), is the central town, and a municipality (proclaimed May, 1894,) on the Murchison goldfield, is 262 miles E. by N. of Geraldton, and 540 miles NE. from Perth, reached by train. It has wardens and resident magistrates' offices, post, money-order, savings bank and telegraph offices, hospital, Western Australia, Union, West Australian and Australasia banks, nine hotels, two breweries, Government school, R.C., Anglican and Wesleyan churches, and Salvation Army, Masonic, Oddfellows (M.U.),and A.N.A. lodges, Miners' Institute, and numerous business places. It has a small debt court and survey department. It is a fast rising town; lighted with electricity; water from government well; pastoral, agricultural, but chiefly mining pursuits. Granite formation. Newspapers: *Murchison Times* and *Advocate*. Population of town, 540; and district approximately, 2,000.

DANDARRAGAN. Postal township, 40 miles NW. of Gingin, in Moore district, with telegraph station and school. Coach runs to Moora, 30 miles. Fine agricultural and pastoral district with several large cattle stations.

DANGIN (32° 1′ S. lat., 117° 20′ E. long.), a postal receiving station, about 30 miles eastward of York and 93 from Perth, in the Beverley district. There are several large stock stations in this district. Formation: granite and ironstone.

DARDANUP (33° 10′ S. lat., 116° 0′ E. long.) is a farming settlement, in the Wellington district, composed almost exclusively of Irish families, about 12 miles E. of Bunbury, and 124 miles S. of Perth. It contains post, money order and telegraph offices, railway station, a Roman Catholic chapel, one hotel, mechanics' institute, a public school, and a brick field. The district is agricultural and pastoral. Railway from Bunbury to Donnybrook runs through. Brickmaking industry. Population about 60.

DAY DAWN (27° 27′ S. lat., 117° 50′ E. long.), a mining municipality, proclaimed January, 1895, with post, money-order, telegraph, and savings bank offices, on the Murchison goldfield, about 3½ miles SW. of Cue. Steamer to Geraldton, thence rail. Has branches of Western Australian and Union Banks, four hotels, State school, Anglican and Wesleyan churches, mechanics' institute, warden's court, mining registrar, Oddfellows' lodge (M.U.), and numerous stores. Excellent bricks are made here. Formation: diorite schist. Population about 300.

DAYLERKING. Postal township in the William river district, 97 miles S.E. from Perth. Rail to Narrowgin, thence coach weekly to William Bridge, thence conveyance. Has a State school and Anglican church. Agricultural district.

DENMARK. A well-laid out village on the Denmark river. It is connected by telephone and railway with Albany (38 miles), and has Government school, post, money-order and telegraph office, public hall, Anglican church, Salvation Army barracks, fine hospital, and other buildings. Saw-milling and fishing industries. Population, 700.

DERBY (17° 18′ S. lat., 123° 40′ E. long.), named after an ex-Secretary of State for the Colonies, is the chief town of the West Kimberley district, on the north-west coast, and at the mouth of the Fitzroy river in King Sound, 1,456 miles from Fremantle. Owing to its position relatively with the plains of the Fitzroy river valley, Derby is favourably situated for development; it has a fine natural harbour, with which it is connected by 2½ miles of tramway. Immense tracts of fine country have been taken up, and pastoral settlement is increasing. Amur Pool, discovered by Captain Henry O'Grady, and named by him after his vessel, is a safe harbour, similar to Hobson's Bay. It is about 4 miles above the anchorage under Mary Isles, and though confined, has good holding ground of stiff mud. The berth at the jetty for large vessels is perfectly safe also. Spring tides rise 36 feet, neaps 20 feet. There are fortnightly steamers to Fremantle and Singapore. A Government Resident, Medical Officer and staff, are located in the district, and there is a jetty (with cattle yard and race alongside), a tramway and other landing accommodation erected at a heavy cost to the colony. There are two hotels: Port and Derby; residency, Court, gaol, hospital, post, telegraph, and money-order office, savings bank, courthouse, &c. Annual three-day races are held, and there is a good bicycle club, cricket and lawn tennis ground. The first steamer to call at this port was the *Albany*, Captain Anthon, who anchored there on the 6th October, 1883, and reported the anchorage to be all that he desired. The land is specially suitable for tropical cultivation, and the Fitzroy river is navigable for many miles. It is connected with Perth (1,420 miles) and its adjacent gold-field by telegraph. Dr. Gibney (R.C. Bishop) has established a mission for the civilization of the natives, under the charge of two Trappist priests, at Beagle Bay, about 100 miles from Derby. About 22,000 sheep, 2,500 cattle and 1,300 bales of wool are exported annually, and about 70 steamers call during the year. Population, about 80. In district, about 250.

DIORITE KING. Postal township with telegraph office, about 30 miles N.WW. from Mount Malcolm. The centre of a mining district. Population about 60.

DONGARA (29° 77′ S. lat., 114° 54′ E. long.), a post town, with telegraph station, money-order office, savings bank, and railway station on the Midland Railway line, 263 miles N. from Perth, with one mixed Government school (average attendance 44), two hotels (Dongara and Irwin), Wesleyan, Roman Catholic, and Anglican churches, local court, police station, I.O.G.T. lodge, W.C.T.U., cricket and racing clubs, brass band, a literary institute, steam roller flour mills, agricultural society (with hall), and a branch of the Western Australian Bank. It is a port (Port Denison 2½ miles distant) for steamers (the jetty is 600 feet long, with a depth of water 14 feet, enabling vessels up to 1,500 tons to get alongside), 160 nautical miles from Fremantle, and lies in the large agricultural district of the Irwin. There is shown by way of a lighthouse a small fixed white light, which is visible at about 7 miles distance. It is connected with the Murchison goldfields by railway, and is admirably adapted as a marine health resort. The climate is excellent, and fruit and vegetables are grown freely. Fish abundant. Formation: limestone and sandstone. Coal is believed to exist, and bores are to be put down. District is agricultural and pastoral. Population, about 300.

DONNYBROOK (33° 30′ S. lat., 115° 48′ E. long.) (on Preston river), a post town, with money-order office, telegraph and railway station, in the Wellington district, 138 miles S. from Perth. Has two hotels, police station, agricultural hall, school, Congregational and Anglican churches, stores, and is a farming district, timber mills. Preston is half-a-mile away. Population, town and district, about 400.

DRAKE'S BROOK (32° 52′ S. lat., 115° 55′ E. long.), Murray district, a postal township, mail bag, 18 miles S. of Pinjarrah, 72 miles SW. from Perth, with a road board. Has railway station, hotel, Government school (in which religious services are held), saw-mills, stores, agricultural society. Government nursery and experimental farm. Large mill trade is done, McDowell's and McDevitt's being in work. Good agricultural land, which is being rapidly taken up. In the Harvey agricultural area. Population about 600.

DUNDAS (32° 23′ S. lat., 121° 47′ E. long.), 350 miles E. from Perth, a proclaimed township on the Dundas gold-field. There is a mail service twice a week. Cost of living ranges from 25s. to 35s. per week. The area of the field, which was proclaimed in August, 1893, and enlarged April 6, 1896, is about 19,000 square miles. Lighted with kerosene, water from condensers and dam, two stores, an hotel. Population about 100.

ESPERANCE (33° 51′ 34″ S. lat., 121° 55′ 23″ E. long.), a municipality (declared Sept. 25, 1895), with post, money-order, savings bank and telegraph offices, in Dundas electoral district. Has a large and safe natural harbour. It is 225 miles NE. from Albany and 527 postal miles from Perth SE., on the

West and South Australian line. Coach from here to Norseman, 120 miles, thence to Coolgardie bi-weekly. Steamer weekly to Albany. Esperance Road Board meets here. Many places of interest in the neighbourhood, particularly limestone caves, of considerable extent at Frenchman's Peak. There is good fishing and shooting in district. Being on the high road between the Eastern colonies and the Eastern gold-fields it will probably develop into an important seaport. Many improvements have been made in the town. Has Customs office, municipal chambers, Anglican and Wesleyan places of worship, branches Commercial Bank and W.A. Bank, Resident Magistrate, local court, town hall, fire brigade station, four hotels, several large business premises, small theatre, Masonic and A.N.A. societies, sport club, Government hospital, magazine, Government school, a Government jetty, with 18 feet depth of water, and a new town jetty, 600 ft. long with 22 feet water. Streets lighted with kerosene. Pastoral and agricultural district. It is a popular summer resort. Industry: cordial factory and brewery. Population about 450.

EUCLA (31° 43′ 27″ S. lat., 128° 52′ 44″ E. long.), a postal township and telegraph station, on the border. It is the terminus of the West Australian telegraph line and the connecting point with the South Australian telegraph system, 26 telegraph officials being employed. A substantial building has been erected here for the accommodation of the telegraph officials of the two colonies. There is a quarterly mail from Albany by schooner, subsidised by the West Australian Government. A jetty has been erected at a cost of £2,000. Distance from Albany, 750 miles NE. Coach to Fowler's Bay monthly; fare £4 10s. Land in the vicinity is of a salt and cotton bush character, well grassed, the country being of limestone formation, with a fair depth of red friable soil. The town is about half a mile from the sea-shore. Population, about 60. Newspaper: *Eucla Recorder*, published by telegraph officials monthly.

EYRE (32° 15′ S. lat., 126° 17′ E. long.), a telegraph station, in the county and electoral district of Plantagenet; police district of Esperance; in the Australian Bight. Distant from Perth 862 miles E., 590 miles from Albany. Communication with the capital is by mail steamer four times a year and occasional visits from small coasting craft. It is merely a maintenance station on the intercolonial telegraph line. Sandalwood and pastoral industries. Formation: quarternary limestone.

FALKIRK is a railway siding between Perth and Guildford, at which is a large foundry for the manufacture of "seamless" pipes which are being used in the Coolgardie water scheme. In the neighbourhood, picturesquely situated on the left bank of the Swan river, is the racecourse of the W.A. Turf Club, the leading racing club in the colony.

FIELD'S FIND. An important mining centre on the Yalgoo goldfield, about 20 miles SSE. from Yalgoo. Has two hotels, stores, post-office, &c., extensive pumping works at Vatten. Population about 150.

FITZROY RIVER.—Post and telegraph township in the West Kimberley division. Steamer to Derby, thence conveyance. Numerous cattle stations in the vicinity. Has hotel and police-station.

FREMANTLE (32° 03′ S. lat., 115° 45′ E. long.), named after Captain Fremantle, of H.M.S. *Challenger* (1829), is a corporate town, and chief port of colony, with a mayor and 12 councillors (proclaimed February, 1871; North Fremantle was declared a separate municipality on Sept. 11, 1895), and is situated at the mouth of the Swan river, 12 miles from Perth SW., with which there is railway communication, and river steamers for carrying cargo; there is also telegraph and telephone communication between the two towns. The town is lighted with gas. The principal buildings are the convict establishment; the Oddfellows' hall, the Town-hall, with a clock-tower erected at a cost of £12,000, the money being raised by loan; commissariat buildings; a Freemasons' hall; new markets opened in June, 1898; post, money-order and telegraph office; Government house; barracks, a literary institute; a lighthouse, with a fixed white light, of the third order Dioptric, visible at 16 miles, for the guidance of shipping entering Gage's Roads; and a lunatic asylum. There is also an Episcopal church, which, next to the Perth Cathedral, is the handsomest ecclesiastical edifice in the colony, and was erected at a cost of £7,500—consecrated in July, 1882; Roman Catholic, Wesleyan, Presbyterian, and Congregational (the Johnston Memorial) churches, and a Government-assisted Catholic school, which is conducted by the Sisters of St. Joseph, who have a convent in the town. There are several other handsome buildings the most noteworthy being the new court-house in Henderson Street, opened June 1899, Presbyterian Church, and the new Wesleyan Church; Pearse's buildings in High Street recently erected (finest in the colony); smelting works established at Owen's Anchorage; W. Sandover's warehouses, Dixon Bros.' tobacco warehouse and factory, and the Federal hotel, besides aerated water manufactories, boatbuilders, a boot factory, a candle factory, confectionery, 2 steam flour mills, a foundry, furniture factory, steam saw mills, soap factory, tinware factory, a tannery and gas works. There is an excellent school for boys, and the Fremantle school. The Bank of Western Australia, N.S.W., Australasia, Commercial, Union Bank, and the National Bank, have branches in the town. The Oval is a recreation ground with pavilion, erected at a cost of £3,500, also a splendid bicycle track of Trinidad asphalt.

The harbour accommodation has been decried, but vessels provided with good ground-tackle can ride out any gale coming from a northerly direction. An opinion was sought and received from Sir John Coode with regard to harbour improvements, and was approved by the Legislature, and a vote for some preliminary works, in the shape of shore approaches, placed upon the estimates. Out of a loan of £525,000 a sum of £100,000 was set apart for the harbour works in accordance with Sir John Coode's scheme, but this was reappropriated for telegraph and other works at Kimberley. The jetty has been considerably lengthened and improved. Added to this, Mr. C. Y. O'Connor, engineer-in-chief to the Government, has put in hand a scheme of harbour works, viz., erecting two large moles, one from Rous Head, on the north side of the river, and the other from Arthur Head, on the south side of the river, to 40 feet depth of water blasting away the rock at the bar of the river, and widening and deepening the channel within the bar, so as to give entrance and room to the bulk of the present shipping. In 1897 the wharf on the south bank was opened for traffic, and the north mole and south mole were completed. There were about 900 at work during 1900. The large vessel, S.S. *Sultan*, entered the harbour in May, 1897, then steaming into an estuary that had been for innumerable ages blocked by solid rock. The gales occasionally effect much damage to the shipping; but as the barometer is an infallible guide during the winter months, when they prevail, vessels have, as a rule, ample time to make for an excellent harbour of refuge which is provided at Garden Island, about 12 miles distant. Fremantle has been made the port of call for the ocean mail steamers.

Rottnest Island, 14 miles W. of Fremantle, is the marine residence of the Governor, which is located on the east side of the island, on the shore of Thomson's Bay. A native penal establishment and farm are established on Rottnest Island, where also are the Government salt works, which are remunerative. A juvenile reformatory has been established here.

The Swan river is spanned by a fine wooden bridge, 954 feet long and 46½ feet wide, built entirely by convict labour, during the reign of Governor Hampton — also by a viaduct timber bridge of the Eastern Railway. Fremantle is the principal port of the colony, and is the western terminus of the Eastern Railway. The station is well placed for access from the port and business portion of the town. There are frequent trains daily to Perth, besides through communication to York and Albany. There are three really first-class hotels at Fremantle—the Federal (a splendid building, conducted on the Continental style), the Club, the Cleopatra, and several others, Freemasons, Oddfellows', Rechabites', I.O.G.T., Foresters', and Hibernian lodges. There are also many boarding and private lodging-houses, and the town offers every convenience to the visitor. Good reticulated water supply. Beaconsfield, Plympton, and Richmond are growing suburbs. Population of town and suburbs about 16,000. Newspapers: *Daily News*, *The Umpire* (chiefly sporting).

FRESHWATER CAMP. *See* SHARK'S BAY.

GERALDINE (27° 51′ S. lat., 114° 38′ E. long.), in the Victoria district, 331 miles N. from Perth: is the site of an old lead-mine, the Geraldine, on the Murchison river, in Northampton Road Board district. An excellent copper-mine was once vigorously worked here, but closed owing to the fall in the copper market. It is 331 miles north from Perth, reached by conveyance to Northampton, thence rail to Geraldton, thence rail or water. Water from wells. Good shooting. Mining and agricultural district. Copper and lead mines at work. Population about 100.

GERALDTON (28° 46′ S. lat., 114° 36′ E. long.), the chief port of the north, and the capital of the Victoria district, lies on the western coast of the colony, in Champion Bay, about 290 miles NW. from Perth. The principal exports from this district are wool, copper, and lead. The mines are highly productive, but the low price of lead prevents much work at present. Gold has been found at various times in small quantities, and it was expected that sooner or later this district would prove richly auriferous. The discoveries of gold-bearing reefs to the eastward of Geraldton, very favourably reported on by the Government Geologist, strengthens this belief and the recent rich and extensive gold discoveries on the Murchison river will materially increase the prosperity of the district. The climate is rather hot, and mild ophthalmia is often prevalent. Geraldton is a post town, telegraph, savings bank, and money-order station, and has a mechanics, institute, military hall, Anglican, Presbyterian, Wesleyan, and Roman Catholic churches, large public-school, erected at a cost of £1,859 (with average attendance of 92), also two assisted schools with average attendance of 105, a club, a court-house, a gaol, and a masonic hall. There are three steam flour mills, a brewery and a printing office. It is under municipal government (proclaimed Feb., 1871), divided into three wards and within the boundaries of the town site there are about 10 miles of macadamized roads and footpaths. Court of Quarter Sessions is held here, and sittings of the Supreme Court are also held. The town has several well-appointed hotels, the Club Hotel being one of the largest and best managed in the Colony. There are branches of Western Australian, Union, and National Banks. The buildings of the three banks are very handsome structures. A new hospital, at a cost of £4,000, has been erected. New public buildings to provide free accommodation for the Lands and Mines' Department, registrar of births and deaths, treasury, police, customs and shipping, police and session courts have been erected. The harbour is a safe and roomy one. A lighthouse is erected on Point Moore, 1½ miles SW. of the pier, with a revolving white light of the second order dioptric, visible at about 18 miles. There is also a lower light showing two red rays. This port has benefited immensely by the quick transit obtained for its produce by the

establishment of a coasting steamer, which calls weekly. Mails also go by packhorse once a week. Geraldton is the centre of a railway system now in course of extension, and is connected with Perth by rail, fares £2 10s. 11d. and £1 17s. 4d.; return, £3 10s. 6d. and £2 16s.; in communication with Northampton (35 miles) by rail, and also with Greenough and Walkaway (19 miles). The harbour of Champion Bay is large and easy of entrance day or night, and there is a substantial jetty. Population, about 2,000; district, 6,000. Newspapers: *Express* (Friday), and *Advertiser* (Monday, Wednesday, Friday).

GINGIN (31° 13′ S. lat., 115° 54′ E. long.), a picturesque municipal post town (proclaimed Feb., 1893) on Gingin Brook, with telegraph, savings bank, railway station, and money-order office, 54 miles N. of Perth, on the Midland Railway, in the Moore district. Coaches run to junction of Moore River and Gingin Brook, 25 miles N.W. Has an Episcopal and Wesleyan churches, police-station, Good Templars' lodge, and a Government school, with average attendance of 75, one hotel, and agricultural hall. District is rich agricultural and pastoral. Industries: brick-making and lime-burning, market-gardening and fruit-growing, the oranges, lemons and limes being of a superior quality. Good shooting. Formation: sand, gravel, and clay. Population about 160; with district, 500.

GINGIN BROOK is a farming and pastoral district, about 25 miles N. of Gingin, in Moore district. Has two half-time schools and a public hall.

GLENCOE. *See* TALGA TALGA.

GOLDEN VALLEY. *See* KNUTSFORD.

GOOMALLYN (31° S. lat. 117° E. long. An agricultural district and road board, in the county of Toodyay; reached by rail to Northam, road thence. Has an agricultural hall, and a population of about 600.

GOONGARRIE (30° S. lat., 121° 30′ E. long.), a mining township, district North Coolgardie, 56 miles N. of Kalgoorlie, and 429 miles ENE. of Perth, with which it is connected by rail. A coach runs to Mount Higgins. It is 1,500 feet above the sea. Has post, money-order, telegraph, and savings bank offices, one hotel, two stores, miners' institute and library; lighted with kerosene, condensed water supplied at 3d. per gallon. Mining and brick-making industries. Formation: Palæozoic greenstone, diorite and diabase schists, with gneiss granite. Goongarrie lakes are interesting. Population about 150.

GRASS VALLEY (31° 19″ S. lat., 116° 45″ E. long.), a post, telegraph and railway station, in Avon co. It has hotel, State school, and Agricultural Hall. The district is an agricultural one, and the earth formation granite, ironstone and gravel. Population about 40.

GREENBUSHES TINFIELD (33° 45′ S. lat. 116° 10′ E. long.) has an area of about 50 square miles, and it is situated on the highest part of the range, on the north-east side of the Blackwood river, 190 miles SS.E. of Perth. There are six hotels, branch W.A. Bank, a warden's office, money-order, post and telegraph and savings bank offices, railway station, Anglican church, Freemason and Druid lodges, Salvation Army barracks, public school, miners' hall (in which religious services are held), and twenty stores. The nearest port is Bunbury, from which a railway runs 26 miles to Donnybrook, thence a good but hilly road. Mining district, tin mining and timber industries. Output of tin for 1900 about 1,100 tons. There are local smelting works with crushing plant capable of treating 40 tons per week. The field is making great progress. Population of town and district, 2,000. Newspaper: *Greenbushes Advocate.*

GREENOUGH (28° 56′ S. lat., 114° 42′ E. long.), telephone and telegraph, savings bank, and money-order station and post town, in the Victoria district, 251 miles (273 postal) from Perth N., is the centre of a magnificent agricultural and corn-growing country. Communication with Perth is by rail to Walkaway, from thence by steamer. The principal hotel is the Greenough. It has a mechanics' institute, Wesleyan, Episcopal, and Roman Catholic churches, and one steam roller flour-mill. There are in the township and vicinity four schools, and convent school. The railway connecting this fine agricultural district with the seaport of Geraldton is of great service. Population, town and district, about 1,120.

GUILDFORD (31° 53′ S. lat., 116° 1′ E. long.), a pretty little municipal township (proclaimed Feb., 1871), in the Swan district on the Swan river, situated at the confluence of the rivers Helena and Swan, which are both spanned by good bridges, 9 miles NE. of Perth, with which it has daily mail and passenger communication, these two towns being connected by duplicate, rail, telephone, and telegraph. There is a post, telegraph, and telephone station, Government savings bank, and money-order office, two railway stations (twenty trains daily), hospital, mechanics' institute, brick factories, Masonic, Druids' and Oddfellows' lodges (M.U.), a court-house, an Episcopal church (St. Matthew's), Roman Catholic church, Wesleyan church, and Salvation Army; two Government, two private, and one assisted schools (boys' and girls'); aggregate average attendance 200; four hotels, Stirling Arms, Rose and Crown, Lockridge and Guildford. Workshops and headquarters of the Midland Railway, about two miles distant. Lighted with kerosene. Several vineyards are in the neighbourhood. Good supply of water from wells. The railway to Guildford was opened on March 1, 1881. Great progress is being made. Population, about 1,400; district, about 4,000.

GULLEWA, (28° 34′ S. lat., 116° 31′ E. long), 40 miles SW. of Yalgoo, and 20 miles S. of Wurarga railway station. The Yalgoo goldfield is a township and mining centre, with post (issuing postal notes) and telegraph offices, two hotels, school, and two stores. Formation: diorite and granite. Population, about 120.

HALL'S CREEK (18° 15′ S. lat., 127° 46′ E. long.), a post township with telegraph and money-order office, on the Kimberley goldfield. It is about 315 miles E. of Derby, and 220 miles S. of Wyndham. Monthly mail *viâ* Wyndham and Derby, 240 miles from Wyndham, 400 from Derby. Chief resources are gold mining and cattle breeding on the Behn and Ord rivers. Both alluvial and reef gold is being got in payable quantities. Has residency, hotels, miners' institute, hospital, court house, warden's office, gaol, and police court and station. Population of township and district, about 100.

HAMELIN (34° 15′ S. lat., 115° 5′ E. long.), South-west division, Sussex district. The harbour of the Karridale District, and is connected to the Karridale timber mills by a railway. Intercolonial and Coasting steamers put in at this harbour, in which deep sea jetties are built, and heavy moorings laid, whence there is an extensive export of Jarrah and Karri timber. Coach from Karridale to Vasse, 50 miles, thence rail to Perth. Coastal steamers call. In vicinity are Dugalop and Boranup caves, containing magnificent stalactites. Formation: sandstone and granite on coast, ironstone and quartz in ranges. There is a freshwater lake. A Government school is here, with an average attendance of 16. Population, 70; of district, 1,300.

HARVEY (33° S. lat., 116° E. long.), a post, telegraph, and railway station in the Wellington district, 86 miles south from Perth. Has hotel, school, small lecture hall, an agricultural alliance. Scattered agricultural district. Formation: alluvial soil, with clay sub-soil. Water from river and wells. Population, 90.

HAYES FIND (30° 23′ S. lat., 121° 31′ E. long.) (Mulgarrie), mining township, 20 miles N. from Kanowna. Has two hotels, miners' institute, 20-head battery. Population, 150.

HELENA VALE (31° 9′ S. lat., 117° 5′ E. long.), a municipality (declared November 6, 1895) (co. Swan), about 2 miles from Guildford and 12 from Perth, the junction for several important lines of railway, and the headquarters of the Midland Railway Company, and the starting-point of the Darling Range or Zigzag railway. The council consists of mayor and nine councillors; rate 1s. 2d. in the £, health, 2d.; annual ratable value of property, £15,645, capital value, £190,000. It has post-office, money-order office, telegraph station, savings bank and railway station, Government locomotive sheds, electrical engineers', Government stores, ways and works, and interlocking engineers' departments. Anglican, Wesleyan and Congregational places of worship, public hall (seating 500), three hotels, Government school, with 300 children. Town lighted with oil; water from wells. Industries: stone quarries, brickfields, Midland Railway Company's workshops, Coolgardie Pipe Works (Hoskin & Co., of Sydney, turning out about 100 enormous pipes per day for the gigantic goldfields water supply scheme), and fruit-growing. Social: mechanics' institute, Masonic, G.U.O.O.F., I.O.O.F. lodges and a debating society. The W.A. Government has reserved and cleared about 300 acres of land at a cost of about £20,000 on which to erect Government locomotive workshops, which are estimated to cost £200,000. Formation: clay marl with ironstone beneath. The natural characteristics of the district are attractive and suitable for pleasure-seekers, wild flowers being abundant; there is also a natural fernery, and the surrounding hills are picturesque. The climate is excellent, and the community a healthy one. Population about 1,600.

HOPE'S HILL (31° 11′ S. lat., 119° 16′ E. long.), a mine district on the Yilgarn goldfields, about four miles from Southern Cross, 239 miles E. of Perth. It is reached by train to Southern Cross, hired vehicle thence. Employés number about 30.

IRWIN, a postal township about 220 miles NE. of Perth. Has a State school. Agricultural and pastoral district, with a population of about 300.

ISRAELITE BAY (33° 35′ S. lat., 123° 55′ E. long.), (shire Plantagenet), a post and telegraph station on the West and South Australian line, 400 miles NE. from Albany; reached by steamer and train. Has Guild of Brass Founders. In the neighbourhood are large bald sandhills. Pastoral district. Formation: limestone and granite. Population about 30.

JACKSON (30° S. lat., 119° E. long.) (Currajibbin) postal township and mining centre, 75 miles from Southern Cross, 344 miles ENE. from Perth, which is reached by coach to Southern Cross, thence rail. Mount Jackson Proprietary is the principal mine. Has hotel and miners' institute. Population about 70.

JARRAHDALE *See* ROCKINGHAM.

JAYES (33° 35′ S. lat., 115° 30′ E. long.), a small pastoral station, with weekly mail passing, about 180 miles S. of Perth, and 22 miles from Bridgetown, in the Nelson district. There is good shooting. Population of district, about 600.

KALGOORLIE (30° 45′ S. lat., 121° 30′ E. long.) (Hannan's), a thriving municipality, with post, money-order, and savings bank offices and telegraph station, branches of the Bank of Australasia, West Australia, Union, N. S. Wales, National and Commercial banks, 24 miles ENE. of Coolgardie, with which, and Perth, it is connected by rail (opened Sept. 8, 1896). It is the junction of four railway lines from Perth, Menzies, Kanowna, and Boulder. It is the headquarters of the East Coolgardie goldfield, and was discovered by a miner named Hannan in June, 1893. Good water was struck in Sept. 1896. It is a very rich field, and supports about 25,000 miners. The celebrated Great Boulder, Lake View, Ivanhoe, Kalgurli, Boulder Main reef, Oroya, Chaffers, True Blue, Block 45, Brookman's Boulder, Perseverance, Australia, Hainault, North Boulder, Bank of England, Mount Charlotte, Royal Mint, Iron King, Brown Hill, and Hannan's Reward Mines are in the vicinity. Water supply schemes are being carried out. Kalgoorlie has twenty

hotels, three breweries, five hospitals (Government, private and St. John's), Stock Exchange, Masonic, Druids', H.A.C.B.S. Irish National Foresters, A.O.F., I.O.G.T., I.O.R. and A.N.A. lodges, warden's office, miners' institute, Chamber of Mines, Mine Managers' Institue, Roads Board, Masonic Hall, two clubs, warden's court, and a local court. Government school, Roman Catholic, and several private schools; Anglican, Roman Catholic, Presbyterian, Wesleyan, Baptist, Salvation Army, and Church of Christ places of worship. A magnificent Government building with high tower has been built to comprise post, telegraph, telephone, and warden's offices. Electric light. Population of town about 18,000, district within five mile radius, 35,000. Newspapers: *Kalgoorlie Miner* (daily 1d.), *Western Argus* (weekly), *Sun* (Friday).

KANOWNA (30° 37′ S. lat., 121° 37′ E. long.), or WHITE FEATHER, is a mining town about 12 miles NE. of Kalgoorlie, and 392 miles from Perth, in N.E. Coolgardie district. Has post, money-order, telegraph, and savings bank offices, and railway station, eight hotels, W.A. and Union Banks, Government school, Roman Catholic, Anglican, and Wesleyan churches, Government hospital, police station, warden's court, miners' institute, literary and debating societies, masonic, Miners Sick and Accident Association, I.O.O. Foresters, and A.O.O. Druids, and A.N.A. societies. Lighted with electricity. It is reached by train from Perth. Water supply is from clay-pans, condensers, &c. Abundant timber surrounds the town, and a series of salt lakes are within five miles. Considerable mining is carried on, the chief mines being White Feather, Reward Claim, Robinson Gold Mines Company, White Feather Main Reef, Golden Valley, Last Chance, Fitzroy, Sily Australis, Golden Crown, and Golden Cement. Deep alluvial digging is also carried on with satisfactory results. General Gordon group of mines is 12 miles north from Kanowna. Formation: Palæozoic, greenstone, schistose, dioritic and diabassic rocks. Population within a radius of 5 miles, about 12,500.

KARRIDALE (34° 12′ S. lat., 115° 5′ E. long.), Sussex district, has a post and telegraph, money-order, parcels, and meteorological station. River Blackwood runs through the estate, and a bridge across connects it with the road to Bridgetown. This is the headquarters of the Karri and Jarrah (the M. C. Davies Karri and Jarrah Co., Ltd.), and the centre of the railway which runs into the bush, to Boranup, Hamelin Harbour, Flinders' Bay and Jarrahdene in all about 22 miles. There are three Government schools in the district, with an average attendance of 120, a library and reading room, public agricultural hall, turf and cricket clubs, police quarters, also a customs officer. Anglican church—services held every Sunday. Roman Catholic services in Agricultural hall. Karridale is situated about 196 miles SW. from Perth, which is reached by coach, thrice weekly, from Busselton, 54 miles, thence rail; it also has a thrice weekly mail service. Prohibitionist district. The climate is one of the finest in the colony, and the surrounding country is picturesque; there are also some beautiful caves in the vicinity, and the place, which has excellent roads, is well worth a visit from tourists, as the roads under the Local Roads Board are very good. Cape Leeuwin is 15 miles SW. of Karridale, good road and picturesque drive. Timber milling industry. Agricultural and pastoral district. Some of the finest forests in W.A. are in the district; the famous "King Karri," 300 feet high (270 feet to the first branch) is found here. The output of timber is about 8,000,000 superficial feet per annum. Hamelin Harbour is 3 miles from Karridale, and is connected by rail and telephone. Formation: ironstone and limestone. Population, 400 men on station, and district, about 1,000.

KATANNING (33° 38′ S. lat., 117° 35′ E. long.). A township in the Williams district, with post and money-order office, savings bank office, telegraph and railway station, having daily communication with Albany and Beverley by the Great Southern Railway, and is 236¼ miles from Perth. It has three Government schools, Anglican, Roman Catholic and Baptist churches, local court, police station, hotel, hospital, flour-mill, agricultural hall, Government agency for sale of Crown lands, mechanics' institute, farmers' association, Oddfellows' lodge, public hall, sport clubs, flour-mill, and aerated water factory (lighted with electricity). Farming and fruit industry. It is 1,022 feet above sea level. Formation: ironstone. Population of about 250.

KELLERBERRIN, 154 miles E. of Perth, is a post-town, with telegraph and railway station; fares, £1 1s. 11d. and 13s. 7d. Has State school and eucalyptus factory. Agricultural and pastoral pursuits. Geological formation: volcanic. Population, 50.

KELMSCOTT (32° 2′ S. lat., 116° 2′ E. long.), co. Canning, a post town and railway station on the Canning river, 16 miles S. of Perth. Has hotel, public school, Anglican and Congregational churches, police-station, and Agricultural Association. Brick, firewood and timber industry. Formation: ironstone and granite. Population, 200.

KIMBERLEY GOLDFIELD (18° 15′ S. lat., 127° 46′ E. long.) This goldfield lies 304 miles inland of Derby, and 212 miles from Wyndham. Its discovery was claimed by Mr. Carr-Boyd, who in 1882 with a party of seven, O'Donnell being leader, traversed this remote part of Western Australia; but before this two well-known prospectors, named Saunders and Johns, had carefully prospected the locality, and reported on its auriferous indications; and besides this its probable auriferous character was also pointed out by the late Mr. E. T. Hardman, who visited it in 1882. This gentleman, then Government Geologist, reported on the district, and also issued a map indicating the places in which gold was most likely to be discovered. Its boundaries, as officially defined, are: on the north the 16th parallel of south latitude; on the south, the southern boundary of the Kimberley district (latitude 19° 30′ South); on the west, the 126th meridian of east longitude, and on the east, the eastern boundary of the Colony (longitude 129° E). It was proclaimed in May, 1886, and its area is about 47,000 square miles. The Rugby Queen mine is foremost in Kimberley with a reef averaging 6 feet wide, yielding 15 dwts. to the ton. The following are the diggings now at work on the Kimberley field:—The Panton, Hall's Creek, The Brockman, Ruby Creek, The Mary River, and Mount Dockrell. The batteries erected are, generally speaking, placed at some distance from the mines with a view to secure water at a shallow depth. The Warden's reports are still favourable. The field was connected to the telegraph system of the colony in October, 1889. The official centre is at Hall's Creek, which flows into the Elvire a little below the township, which in its turn discharges into the Ord River. The road is now fairly good between Wyndham (the nearest port, and from which steamer to Fremantle) and the field, for a distance of 250 miles. Over 100,000 cattle in the district. Has post and money-order office and telegraph station. Has one hotel, police station, Government Residency, Warden's office and Miners' Institute. Population of township and district, 50.

KNUTSFORD (30° 54′ S. lat., 119° 1′ E. long.) (or Golden Valley). A townsite on the Yilgarn goldfield, 275 miles E. of Perth, reached by conveyance to Southern Cross (35 miles north), thence train. Population about 20.

KOJONUP (35° 50′ S. lat., 117° 10′ E. long.), a post, money-order, and telegraph station on the Albany road, in Williams district, 134 miles (161 postal) S. from Perth. It is an agricultural township. Hotels: Royal and Old England. Government school, with average attendance of 16, local court, agricultural hall, and police-station. It can be reached by the Great Southern Railway. Population, about 200.

KOOGAN. A railway siding in Moore district, 40 miles N. of Gingin, on Midland Railway. Large cattle and sheep stations in district.

KURNALPI (30° S. lat., 122′ E. long.) is a post town, with money-order and telegraph office, about 45 miles E. of Kanowna. Has two hotels, warden's office, miners' institute, debating club, and a police-station. Is the chief township of the Kurnalpi division of the N.E. Coolgardie goldfield. Tri-weekly mail coach to Bulong. It is about 450 miles ENE. from Perth, which is reached by coach to Kalgoorlie, thence train. Sandalwood industry. Water condensed from Lake Lapage. Formation: quartz and diorite. District population about 150.

LAVERTON (28° 40′ S. lat., 122° 23′ E. long.), on North Coolgardie Goldfields, district of Mt. Margaret, about 593 miles from Perth. Has post and money-order office, Government savings-bank, and telegraph station. It is reached by rail to Menzies, thence coach, 130 miles. Coaches also run to Malcolm and to Menzies. Has three hotels, branch W.A. Bank, Wesleyan church, mining registration office, brewery and bottling works. Mining district. Population of township, 200; district, 800. Newspaper: *Laverton Mercury.*

LAWLERS (28° 7′ S. lat., 120° 28 E. long.), post township on Lawler Creek in East Murchison goldfields, NE. of Perth. Money-order office, telegraph station and savings bank. Reached by rail to Menzies or Mount Magnet, thence coach. Has four hotels, branch Union Bank, warden's court, police court and police station, miners' institute, brewery and cordial factory. Mining district. Formation: diorite. Population about 750.

LEEDERVILLE (co. Swan), a municipal town, 1½ miles NE. of, and suburban to, Perth. Has post, money-order, and savings-bank offices, telegraph and railway stations, also police station; also two hotels, four schools, Anglican, Presbyterian, Wesleyan, Congregational churches and Salvation Army, mechanics' institute, Masonic, Protestant Alliance, Oddfellows', A.N.A., Rechabite and Orange societies. Leederville has a mayor and nine councillors, electoral registrar, and registrar of births, deaths, and marriages. Population of town and district, 3,000.

LEONORA (28° 54′ S. lat., 121° 20′ E. long.)—A town-site in the Mount Malcolm district of the Mount Margaret goldfields; is the centre of a number of important mines. There is a post and telegraph office, and money-order office, branches W.A. and National Banks, mechanics' institute, private hospital, State school at Sons of Gwalia, 2 miles distant, lock-up and police quarters. Health Board, and two hotels. Coach daily to Mount Malcolm, 12 miles. Population about 200.

LOCKEVILLE (33° 07′ S. lat., 115° 53′ E. long.), a small post town, about 12 miles from Bunbury, and 139 miles from Perth. The W.A. Timber Company's station is here, and its employés are its principal inhabitants. Divine worship is occasionally held in the schoolroom. Bi-weekly mail *viâ* Bunbury.

LONDONDERRY (31° 5′ S. lat., 121° 8′ E. long), post and telegraph township, about 8¾ miles from Coolgardie, which is reached by coach. Has hotel. A mining district of about 50 inhabitants. Formation: principally diorite.

LUDLOW (33° 35′ S. lat., 115° 30′ E. long.), postal township in the Sussex district, on the river Ludlow, and on the main road from Bunbury to Busselton, 134 miles from Perth, with which it is connected by rail, and 22 miles from Bunbury. It has a post office (mail six times a week from and to Perth). R.C. services are held in a schoolroom. The land in the neighbourhood is not of much value. Timber—chiefly jarrah, tuart, and peppermint—is plentiful. Agricultural district. Population about 73.

MAINLAND (27° 33′ S. lat., 117° 54′ E. long), on Lake Austin in Murchison district, is a receiving post-office for a mining district about 539 miles NE. from Perth, which is

reached by conveyance to Lake Austin, thence rail. Has one hotel and a population of about 70.

MALCOLM. *See* MOUNT MALCOLM.

MALLINA (20° 52′ S. lat , 118° 3′ E. long), a postal township in the Roebourne magisterial district; is the place where reef-gold was first discovered on Pilbarra goldfield. It was deserted for two or three years past, but has again been occupied. Water from wells. It is 75 miles from Roebourne, and has a population of about 10.

MANDURAH (32° 31′ S. lat., 115° 45′ E. long.), close to the sea-coast, on the Murray estuary, is a post town, with telegraph office, 54 miles from Perth, S., on the southern road. There is a bridge across the Murray river. Steamer to Freemantle and coach to Pinjarrah. There is an Anglican church, hotel, telegraph office, Government school (average attendance 21), police station, and large fruit and fish-preserving companies. This is one of the finest fruit-growing districts in the colony, peaches, apricots, and pears growing in almost wild profusion. Population about 160.

MARBLE BAR (21° 11′ S. lat., 119° 42′ E. long.), is the chief town of the Pilbarra goldfields, on the Coongan river. Takes its name from a bar of variegated flinty quartz which crosses the Coongan river, 2½ miles from the town. Has weekly mail service, telegraph station, and money-order office, two hotels, water supply and registrar's offices, hospital, local court, miners' institute, police-station, warden and resident magistrates' courts. Water from wells. Miners' wages are 90s. to 100s. a week, labourers £3 10s., and mechanics 17s. a day; cost of living proportionately high. A proposed line of railway will help materially to open up the fields. It is reached from Fremantle by steamer to Cossack, steamer to Condon (£2), then coach to the Bar (£3). Excellent pastoral lands. Formation: metamorphic schists and granatoid. Population, about 200; district about 1,000 Bamboo Creek, Nullagine, Western Shaw, North Shaw, Condon, and Port Hedland are in the district. Newspaper, *Pilbarra Goldfields News.*

MARRADONG, postal and telegraph township in the Williams district, 96 miles S. from Perth. Rail to Pinjarrah, 42 miles, thence horse. Has Anglican church, hotel, and school. Agricultural district. Population, 200; district 300.

MAUD'S LANDING (23° 6′ 47″ S. lat., 113° 47′ E. long), about 650 miles NW. of Perth Nearest post-office, Winning Pool, 50 miles distant. Sheep farming district.

MELVILLE (27° 50′ S. lat., 116° 47′ E. long), postal and telegraph township on Murchison field, 450 miles NE. from Perth. Rail to Yalgoo, thence bi-weekly coach. Mails arrive Monday, Wednesday and Saturday: depart same days. Has two hotels. Lighted with kerosene. Water from wells. Mining district. Population about 100.

MENZIES (29° 41′ S. lat., 121° 2′ E. long.) (on the North Coolgardie goldfield), is a municipality proclaimed February, 1895, with post, money-order, and savings bank offices, railway and telegraph station. It is about 466 miles NE. from Perth *via* Coolgardie. It is reached by train *via* Kalgoorlie, opened in March, 1898, by his Excellency the Governor. Has 13 hotels and wine saloons, three banks—Australasia, West Australian, and Union—Town Hall, Masonic Hall, warden's court, mining and electoral registrar, inspector of mines' office, public school, Stock Exchange, Roman Catholic, Anglican, and Wesleyan churches and Salvation Army, hospital, public works offices, brewery, local court, mechanics' institute, Menzies club, masonic, Oddfellows, Druids and A.N.A. lodges, insurance companies, and N. Coolgardie Workers' Association. Water from wells in Picton Valley. Menzies Waterworks Company has erected a large condenser, supplying water at 7s. 6d. per 100 gallons at their stand. It is a mining district, volcanic, quartz and diorite formation. Population about 2,500; district about 5,000. Newspapers: *Menzies Miner* (weekly), *North Coolgardie Herald* (daily).

MIDLAND JUNCTION. *See* HELENA VALE.

MINGENEW (29° S. lat., 115° 30′ E. long.), is a post town, money-order, telegraph and railway station, about 227 miles N. of Perth, 80 miles from Geraldton; fares, 13s. 4d. and 9s. 7d.; fares from Perth, 1st return, 54s. 5d.; 2nd return, 42s. Coach leaves Mingenew every Wednesday with passengers and mails for Rothesay and Field's Find, 146 miles, fare, £2 10s. It is a pastoral and agricultural settlement. Depôt for Rothesay and Pingalling trade. Has two hotels, police station, agricultural hall (in which religious services are held) with library, several stores, and state school. Sand and ironstone formation. Population, about 150.

MOORA (30° 31′ S. lat., 116° 0′ E. long), postal township, with telegraph and railway station, 59 miles N. of Gingin, on Midland railway in Moore district. Has hotel, police-station, and two stores.

MORNINGTON MILLS (District WELLINGTON) is a timber station with post and telegraph offices, and State school, on Wokalup river, six miles from Wokalup railway station. About 400 men are employed on the station, which has two large saw-mills and turns out an average of 40,000 super feet of jarrah daily, besides a large amount of sawn sleepers and beams for export, mostly to South America and Africa.

MOUNT BARKER (34° 36′ S. lat., 117° 39′ E. long), a postal centre, with telegraph and railway station, and money-order office, in the Plantagenet district, on the Albany road, 224 miles SE. from Perth. Has two hotels, one Government school, hall, Anglican, Wesleyan and Salvation Army services held. Agricultural fruit growing and pastoral district. About 4 miles from Mount Barker is the Porongerup range, covered with a splendid Karri forest. Population about 320.

MOUNT MAGNET (28° 3′ S. lat., 117° 49′ E. long), a mining municipality (proclaimed June, 1896) on Murchison goldfield. It is about 195 miles from Geraldton (its seaport), with which it is connected by rail, and 450 NE. from Perth. Has post, money-order and savings bank offices and telegraph station, seven hotels, West Australian Bank, State school, Wesleyan, Roman Catholic, and Anglican churches, court-house, police-station, miners' institute, registrar's and warden's offices, hospital, surgeon, chemists, various stores, and local clubs. Formation: ironstone schist and quartzite. Newspaper: *Mount Magnet Miner.* Population of township about 400. Boogardie and Lennonville are in the vicinity.

MOUNT MALCOLM (28° 56½′ S. lat., 121° 30½′ E. long.) is the principal town in the Mount Margaret goldfield, 140 miles NNE. of Coolgardie, and 64 miles from Menzies, from which coach. Coach runs to Lawlers *viâ* Leonora, Mertondale and Laverton, Menzies *viâ* Niagara. Warden's headquarters. Has post, money-order, savings bank, and telegraph offices, five hotels, brewery, Western Australian and National Banks, survey office, lock-up, police quarters, hospital, Anglican and Wesleyan Methodist churches, State school, Warden's court (monthly). Health Board, Masonic lodge, and mechanics' institute. Good water from wells. Population, about 450; district about 2,000. Newspaper: *Malcolm Chronicle.*

MOUNT MARGARET (28° 50′ S. lat., 122° 12′ E. long). Mining township, prettily situated on shores of Lake Carey, 160 miles NNE. of Coolgardie Reached by rail from Perth to Menzies, thence coach. Freshwater well 1½ miles from town. Mining and pastoral district. The chief mining centre is Mount Morgan, which *see.*

MOUNT MORGAN (28° 49′ S. lat., 122° 11′ E. long.), a mining township about 550 miles from Perth, which is reached by coach to Menzies, thence train. It has a post-office, money-order office, telegraph station, Government Savings Bank, four hotels, branch National Bank of Australia, Wesleyan and Anglican churches, and Working Men's Club. The streets are to be lighted by electricity; water is obtained from wells, the supply for the mines being pumped from a lake six miles distant. It is purely a mining district, with a population of about 800. Newspaper: *Mount Morgan Mail.*

MOUNT STIRLING (31° 52′ S. lat., 117° 5′ E. long.), a postal receiving station. This district is occupied by several extensive graziers. 107 miles East of Perth.

MULLEWA (28° 33′ S. lat., 115° 31′ E. long), a small municipality (proclaimed April 3, 1895), with postal, telegraph, and money-order facilities, about 57 miles to the NE. of Geraldton, with which it is connected by rail, 234 postal miles from Perth. The depôt for the Murchison pastoral and mining district. Good arable land in the vicinity. Has local court and police-station, hop beer and cordial factories, three hotels, surgeon, wheelwright, and several stores. Population, 70.

MURCHISON GOLDFIELD (27° S. lat , 118° E. long.) proper covers an area of about 21,600 square miles. A railway connects Perth and Cue, the capital of the field, which is situated about 540 miles from Perth. The railway also passes through Mount Magnet. Austin and Day Dawn are important mining centres on the Murchison goldfield. A telegraph line is opened up to Peak Hill. The population of the whole field is about 4,000, 2,000 of whom are directly employed in mining. Warden's and local courts are established at Cue, Mount Magnet, and Nannine; there is also a court of quarter sessions established at Cue. The crushing power on the field is large, consisting of twenty two batteries; a large amount of alluvial gold has also been obtained. The Murchison Goldfield is making steady progress, and promises to be a permanent gold-producing field. Large tracts of country are also leased for pastoral purposes. (See also CUE.)

MURRIN MURRIN. A mining district about 555 miles from Perth, which is reached by coach to Menzies, thence rail. It has a post-office and telegraph station, and one hotel. Water from wells. Gold and copper mining district, with a population of about 250.

NANNINE (26° 53′ S. lat., 118° 19′ E. long.), a mining municipality in the Murchison goldfields, about 50 miles N.E. from Cue, to which coach, rail thence to Perth. There are four hotels, warden's court, post, telegraph, savings' bank, and money-order office (with tri-weekly mail), registrar's office, West Australian Bank, Government school, hospital, Roman Catholic church, Miners' Institute. Has promising reefs in the vicinity. Mining and pastoral. Formation: diorite schist. Population: town, about 115, and district, about 500.

NARROGIN (Williams district), a post town, with money-order office, telegraph station, and railway station on the Great Southern line, 162 miles S. from Perth, on creek of name. It is 178 miles from Albany, and is 1,114 feet above sea-level. Has hotel, Government school, three stores, &c. Baptist and Anglican services are held in Agricultural hall. Agricultural and pastoral district. Has a tannery for opossum rugs. Granite formation. Population, town 100; district 400.

NEWCASTLE (31° 34′ S. lat., 116° 27′ E. long.) is a rising inland municipal (proclaimed Sept., 1877; shire Toodyay) town with post, telegraph, savings bank and money-order offices 54 (64 rail) miles NE. from Perth, with which it is connected by a good road. The Eastern Railway connects it by a branch line with Perth. Hotels: Newcastle, Victoria and Freemasons'. It is situated on the river Avon, which is here spanned by two good bridges. It is one of the best agricultural districts in the Colony, and some thriving farms are to be found here. It contains three places of worship, Wesleyan, Anglican, and Roman Catholic, Government school and a convent school, with an average attendance at both of 100. A gaol, hospital, court-house a mechanics' institute, and Municipal chambers, branch of the WesternAustralian Bank, wineries, flour mill, saw

mill, coach factory; Masonic, Oddfellows' and I.O.G.T. lodges, Fruit-growers' Association, race club, agricultural society. Population of district, about 700.

NEW NORCIA (30° 58′ S. lat., 116° 17′ E. long.), post town, with money-order office and telegraph station on the Victoria plains in the Toodyay district, E. branch Moore river. It is a Benedictine Spanish Roman Catholic Mission Station, and village of Aborigines, who are civilized and live in cottages built for them by the Brothers; the establishment, founded by the famous Benedictine monk, Father (now Bishop) Salvado, is under his care. There are five Fathers and forty-seven lay Brothers of the Benedictine Community. The natives are employed in agricultural pursuits, and are also taught useful trades. Really excellent wine is made here. The settlement is 82 miles N. from Perth, which is reached by coach 15 miles to Mogumber railway station, thence rail, and has a bi-weekly mail to Perth. Court house, church, two chapels in Mission stations, Aborigines musical and brass band, social hall, and medical doctor. It was visited by Governor Broome, who expressed himself as "filled with admiration at the good work of the mission among the Aborigines collected on the station, and at the industry and success displayed on the extensive farms." There are two native schools, one for boys and one for girls, and one church dedicated to the Holy Trinity. 13,000 acres have been permanently reserved for the purposes of the Mission (rent being paid to the Government), 15 miles from Mogumber railway station. Population 300.

NIAGARA (29° 28′ S. lat., 121° 24′ E. long), post, telegraph, savings bank, and money-order station, in N. Coolgardie district, 494 miles E. from Perth. Rail to Menzies, thence daily coach, 34 miles. Has branch W. A. Bank, several hotels, miners' institute, Warden's circuit and local court monthly, private hospital, aerated water and cordial factory, and numerous stores. Lighted with kerosene. A reservoir holding 40,000,000 gallons has been constructed three miles S. of the township. Population, 400.

NOONGAL (27° 50′ S. lat., 116° 47′ E. long), township, with post and telegraph offices, 15 miles N. of Yalgoo. Two hotels and several stores. Population, 70.

NORSEMAN (32° 5′ S. lat., 121° 75′ E. long.), a thriving municipality, and the principal town on the Dundas goldfield and on Lake Cowan. Has postal, money-order, savings bank, and telegraphic facilities, branches West Australian and Union Banks, a hospital, five hotels, brewery, cordial factory, Warden's court, mines office, police-station and quarters, Anglican, Roman Catholic and Methodist places of worship, sports club, Government school, Masonic and Foresters' lodges, Royal hall, mechanics' institute, Early Closing Association and numerous stores. Cost of living ranges from £1 15s. to £3 a week. Water supply from private conservation and condensers, 16s. 8d. per 100 gals. A good road has been cleared from Esperance to Norseman, 126 miles; and from Coolgardie, 111 miles. Population of municipality 700 and district about 1,000. Formation: diorite, quartz reefs; 70 miles of reefs containing payable gold. Principal mines:—Cumberland, Kirkpatrick, Norseman Gold Mines (Limited), No. 1 North Norseman, Hinemon, Princess Royal North and Princess Royal South, and Midas Maurons Reward, Mount Benson, Break o' Day, Lady Mary, and Desirable. Newspaper: *Norseman Times*, bi-weekly.

NORTHAM (31° 40′ S. lat., 116° 40′ E. long.), a municipal post town (proclaimed October, 1879), with money-order office, telegraph and telephone offices and savings bank, 57 miles NE. of Perth, on the Avon and Mortlock rivers, which are crossed by good bridges. A line of railway connects this town with the main line of the Eastern Railway, at Spencer's Brook, and it is the starting point of the railway which is constructed to the Yilgarn goldfields. It is in telegraphic communication with the metropolis, 57 miles NE. Five hotels, temperance and private. It has Town Hall, seating 600, and costing £3,500, Government workshops, a court-house, Anglican, Roman Catholic, Presbyterian, and Wesleyan churches, Railway institute, a mechanics' institute, Freemasons', Foresters', A.N.A., Orange, Oddfellows', I.O.G.T., Free Gardeners', Rechabite, and Druids' lodges, insurance agents, a Government Savings Bank, branches of the National Bank and Western Australian Bank, hospital, roller flour mills, brass and iron foundries, pottery, bone mill, bacon factory, coach factory, a Bushman's Club, in connection with the Hope of Northam Lodge, I.O.G.T., No. 8. One Government school (boys' and girls') the aggregate average attendance being 321, School of Sisters of St. Joseph, and two private schools. There are several rising townships in and around Northam, among which may be noted Irishtown, Jennapullen, Wongamine, Grass Valley, Seabrook, and Goomalling; to the last-named the railway has been constructed, and several thousand acres of new land have been placed under crop. Mining operations have also received considerable impetus, especially at Seabrook (which *see*), five miles from Northam. Population, about 2,000, district about 4,000. Newspaper: *Northam Advertiser* (published every Wednesday and Saturday).

NORTHAMPTON (28° 22′ S. lat., 114° 37′ E. long.), 296 miles (329 postal) N. of Perth, is the post town of the northern mining district of the colony, and has a money-order office, railway station, and savings bank, and is in telegraphic communication with the rest of the Colony. It is in the electorate of Murchison and the Northern Railway connects it with that place; distance 34 miles, and a commodious station. It also possesses goods sheds and other appliances of a station yard. Nearly all the lead and copper mines in the colony are near here. The copper is of good quality, and the lead contains very little silver. Hotels: Miners' Arms, Railway and Hampton Arms. There is a police-station and a court-house. Episcopal and Catholic places of worship, and workmen's hall. There are two schools, one Government and one Roman Catholic, and mechanics' institute. Tin and other valuable ores are found in the district. Here is a valuable copper-mine, which was neglected for some years. When first opened the mine was very rich in black oxide that needed little labour to get it to the surface, but the lode was not of a settled character. The mine was discovered in the year 1863, and worked with profitable results by the then proprietor, Dr. Horrocks. The town is the centre of one of the most promising mineral districts in the colony. Population about 200.

NULLAGINE (21° 53′ S. lat., 120° 53′ E. long) is a post town with money-order office and telegraph station, 86 miles from Marble Bar, in the Pilbarra district, and is an important quartz reefing centre, reached by steamer from Perth to Port Hedland, thence coach. Diamonds have been found in the district, and an area of 320 acres has been taken up for prospecting purposes. This was granted as a reward claim by the Government. Besides this a large number of diamond leases have been taken up, at present worked by the Lady Forrest Diamond Co., who have found several diamonds on their holdings. Numerous diamonds have been found by alluvial diggers. There are two hotels, stores, Warden's and local court. Population about 250.

ONSLOW (21° 48′ S. lat., 114° 57′ E. long.), situated at the mouth of the Ashburton River, 754 nautical miles from Fremantle. It is the port of a rich and extensive pastoral district and the Ashburton goldfield. Gold has been discovered on the Upper Ashburton River. Pastoral district, numerous stations being in the vicinity. A stock jetty has been built about 4 miles distant, and is connected by tram. It has postal, telegraph, and money-order offices, two hotels, hospital, school, residency, bond store, and police court. Mining and pastoral district. Population, town and district, about 300.

PADDINGTON (30° 29′ S. lat., 121° 20′ E. long), a postal and mining township, three miles south of Broad Arrow, and about 395 from Perth. Has a railway station, post and money-order office, telegraph station, savings bank, mechanics' institute, police station, school, in which Anglican and Wesleyan services are held, six hotels, and Roman Catholic church. Mining district. Water is supplied from condensers and from the Arrow Lake. Population of district about 1,300.

PEAK HILL (25° 38′, S. lat.), 120 miles from Nannine, 724 from Perth. A very rich mining centre, over 150,000 ounces of gold have been obtained. Has post-office and telegraph station, five hotels, mechanics' institute and library. Mining and pastoral district. Formation: Mica, schist and quartz, &c. Population of district, about 500.

PARKER'S RANGE (31° 39′ S. lat., 119° 35′ E long.), a mining centre on the Yilgarn goldfield, 38 miles S. of Southern Cross, 235 miles E. of Perth, reached by hired vehicle to Southern Cross, thence train. Has one hotel. Population about 40.

PERTH (31° 57′ 24″ S. lat., 115° 52′ 42″ E. long.), an episcopal city, and capital of West Australia. It was founded on August 12, 1829, constituted a municipality in September, 1856, and created a city by an Act of Council in September, 1880, the Chairman of the Municipal Council in consequence assuming the title of Mayor, and the Committee becoming Councillors. The first election for Mayor took place on Nov. 16, 1880, Mr. George Shenton, member of Council for Toodyay, being the first gentleman appointed to the mayoralty. Perth is situate on the direct line of the Eastern Railway, which passes through the heart of the city. The first stone of the railway station was laid by Lady Robinson on May 10, 1880. It is well adapted for its purpose, is an ornament to the city, and is very centrally situated, being within five minutes' walk of the town hall, public offices, banks, and other business premises. Principal hotels: Esplanade, Ozone, the Royal, Governor Broome, Criterion, Freemasons', the United Service, City, and the Shamrock. A palatial structure known as the De Baun's Palace Hotel has been erected at the corner of St. George Terrace and William Street. The town is pleasantly and picturesquely situated on the north bank of the Swan River, about 12 miles above Fremantle, with which there is regular communication by railway, river, and land, a well macadamized road built by convict labour connecting the two towns. Approached from Fremantle, the city presents a striking appearance—a splendid lake-like reach, known as Perth Water, about 1½ miles in length by 1 mile broad, washing the base of the slope on which it is built. The city is, on the whole, well laid-out; the streets are regular, and of sufficient width. An electric tram connects the suburbs. The principal building is the Town Hall—an imposing-looking structure—standing on a slight eminence in the very centre of the town. This hall was built entirely by convict labour. Adjoining the Town Hall is the Chamber devoted to the deliberations of the Legislative Assembly, with offices pertaining thereto, an assembly room, and offices, the Town Hall itself being capable of holding 2,000 persons. The public markets and the new City police-court were opened in 1896. Of cathedrals there are two, one Protestant (St. George's) and one Catholic (the Immaculate Conception). The Protestant cathedral, erected at a cost of £17,000, was opened in August, 1888, and was consecrated in November of the same year by Dr. Barry, Primate of Australia. It is a handsome building, of the pointed Gothic order, and will seat about 2,000 people. A Presbyterian church was opened in August, 1882. The Wesleyan church is an elegant structure; there is also a Congregational chapel (Trinity) and Presbyterian church, and post-office. The memorial stone of the new Trinity Congregational church was laid in March, 1893. There is also a Mohammedan place of worship, and the new Hebrew Synagogue in Brisbane Street was consecrated in 1897. The foun-

dation-stone of a new Masonic hall was laid by the Governor in September, 1896. The foundation-stone of the Perth Mint was also laid on the 23rd of the same month by Sir John Forrest, on a block of land between Hay and Goderich Streets, with a frontage to Hill Street; it was opened for the coinage of gold on June 20, 1899, and is an imposing structure of massive strength and architectural beauty. The plans were prepared by Mr. G. T. Poole; the building stone is Cottesloe freestone with Rottnest stone dressings. On September 29, 1896, Sir John Forrest laid the foundation-stone of the Perth Observatory, at Mount Eliza, the stone being a block of granite from Boorabbin. In June, 1898, the memorial stone of the Mechanics' Institute, Hay-street, was laid by Sir John Forrest. Other buildings are Perth Hospital, the Victoria Public Library—an institution commemorative of Her Majesty's Jubilee; Bank of Australasia, National, Union, West Australian, New South Wales, and Commercial Banks; Australian Mutual Provident Society, National Mutual Life Association, and Colonial Mutual Life Assurance Society have fine buildings, a mechanics' institute, one wing of which is used as a museum; the Governor's residence (to which a palatial ballroom has been added), the Bishop's "palace," the "Weld Club," the "Exchange Club," and "Stock Exchange Club." Chamber of Mines, Building Society, Government and Roman Catholic schools, and Girls' Orphanage, Roman Catholic (average attendances at all 939). The High School occupies a handsome and commodious building, formerly used as a hospital in connection with the Pensioners' Barracks. Two scholarships at the High School, at £50 each, for three years, open to boys attending Government schools, have been founded by Sir Frederick Broome on the vote of the Legislative Council; the Alexander Scots College was opened in 1897. In 1898 Queen's Hall, capable of seating 1,500 persons, was erected by the trustees of Wesley Church. There are some fine private residences and stores, and a handsome and extensive new Government offices in Barrack Street. The pensioners' barracks, at the west end of the town, built on a hill, is also a prominent building. A convenient music hall, the "St. George's," situate in Hay Street, has also been built. Most of the houses are built of stone and brick. Very good bricks are made in Perth, Guildford, and Fremantle. The site of Perth possesses much natural beauty, and advantage has been taken of the physical formation of the ground in the alignment of the streets and in their width to preserve an attractive character. Perth Park, which consists of some thousands of acres, is being cleared and laid out, and will be a beautiful site when finished. The Perth Park Road, which was opened by Sir John Forrest in August, 1897, from west to east, comprises a distance of nearly 2 miles, and is planted with Cape lilac and mulberry trees, which not only afford a grateful shade, but add much to the beauty of the city. The metropolis is in telegraphic and railway communication with all the principal districts of the colony. The city is lighted with electricity. The property of the Perth Water Supply Company was purchased by the Government in 1896 for £220,000. A scheme for the sewerage and drainage of Perth, to cost £320,816, has been approved of by the Engineer-in-Chief, and in the meantime a scheme of surface drainage is being carried out. Proposed improvements in the water supply of the city are being considered also. The growing suburbs of Perth are Leederville, Subiaco, Claremont, Cottesloe, Victoria Park, South Perth and Peppermint Grove. The area of the City of Perth is about 2,480 acres, while the adjacent Park Reserve contains 1,017 acres; the total area of city and suburbs is 16,034 acres. The population at the census of April 5th, 1891, was males, 4,239; females, 4,208. Total, 8,447. Taking, however, the population of Perth magisterial district, which includes the suburbs and small outlying hamlets, the total now reaches 39,600, consisting of 25,100 males, and 14,500 females. During 1898–99 over 500 buildings were erected, and there are about 6,000 within the city limits. Newspapers—the *Perth Inquirer* (weekly), the *West Australian* (daily), the *Western Mail* (weekly), the *Daily News* (evening), the *West Australian Record* (weekly), *Morning Herald* (daily), and the *Government Gazette* (weekly), *Church News* (monthly), *War Cry*, *Sunday Times*, *Sunday Chronicle*, and *Freemason's Magazine* (weekly).

PILBARRA, postal and telegraph township in West Pilbarra goldfields, which cover an area of about 10,500 square miles, and was proclaimed September 19th, 1895. Here the first alluvial gold of the field was discovered. It is 110 miles from Roebourne, with which it is connected by a good road. It is reached by steamer to Cossack, thence tram to Roebourne, thence coach. Has one hotel and a police station. Has a battery of 5 stamps. There are a number of claims on the fields; Queen Victoria and Princess May were the only ones working at end of year. Formation: granite, slate, oppaline, and quartizite. Population, about 50. Newspaper—*Pilbarra News*.

PINGELLY (30° S. lat., 180° E. long.), co. Grantham, Mourambine district, a postal township with money-order office, savings' bank, telephone and telegraph station, about 30 miles S. of Beverley, and 130 rail miles SE. of Perth, 110 miles by road. A station on the Great Southern Railway. Some of the richest agricultural land in the colony is in this district. Has hotel, Anglican church, one Government school, Agricultural Society (with hall), Ladies' Guild; good shooting, kangaroo, tamar, opossum, parrots, &c., being plentiful, and several stores. Good supply of water; 17 inches rainfall in the year. Formation: ironstone. Population, 80; district about 300.

PINJARRAH (32° 37′ S. lat., 115° 35′ E. long.), the chief town of the Murray agricultural district, 56 miles S. of Perth, is beautifully situated on the river Murray, which is spanned by a bridge. In the early days of the colony a battle was fought here between the natives and the King's forces. It has good fruit-growing prospects, and when transport is cheapened and facilitated it will enable this industry to quickly develop. Hotels: Premier and Exchange. It has a post, telegraph, Government Savings Bank, money-order office and railway station. It contains an Episcopal church, mechanics' institute, Government school (average attendance 60), I.O.R. societies, jam factory, two hotels, police station, and court-house. The district is becoming a summer resort for the residents of Perth, and there is good fishing and shooting. The whole Murray district has two fish preserving factories. Pinjarrah is the seat of Sir John Forrest's Homestead Scheme. Splendid timber is obtainable. Water from tanks and wells. Agricultural and pastoral. Population 200; district 1,200.

PLYMPTON. A suburb of Fremantle.

PORT AUGUSTA (26° 0′ S. lat., 114° 0′ E. long.) is situated 200 miles SW. of Perth, 3 miles from Cape Leeuwin, at the mouth of the Blackwood river, in the Sussex district. It was first settled in 1830. Communication is by conveyance from Busselton, 60 miles distant, or by steamer to Fremantle from Hamelin. A timber company has its headquarters at Karridale. A lighthouse has been erected at Leeuwin. There are large forests of jarrah and other woods to work upon, with the advantage of a good harbour. Population, about 50.

PORT DENISON *See* DONGARRA.

PORT HEDLAND (20° 10′ S. lat., 118° 20′ E. long.), a new postal township, with money-order office and telegraph station, and the only natural port in the North-west for the Pilbarra goldfields, 986 nautical miles from Fremantle. Marble Bar is 116 miles SE. from the Port, and a railway has been surveyed. It is the port for Marble Bar, Nullagine, Bamboo Creek, Warrawoona, and other towns on the Pilbarra goldfields, and also for a large and well-known pastoral district—the Nor West. Stock from all parts of the Nor' West is shipped from Port Hedland, where, since the jetty, race, and cattle yards have been completed; there is every facility for shipping. The harbour has been well beaconed, and may now be entered by the largest steamers afloat. There are several lines of coaches, including the mail coach, running between Port Hedland and the inland towns, viz., Condon, Marble Bar, Nullagine, Warrawoona and Barntoo Creek on the Pilbarra fields. Wells are met with at short intervals on the route to the fields, and sometimes also surface water in most of the creeks. These wells are all fitted up in convenient manner, and have troughing for horses, &c. Tin and gold have long been suspected in some localities within a day or two's journey of the port, but up to the present nothing has been discovered to establish those minerals. Population of district about 150.

PRESTON RIVER. *See* DONNYBROOK.

QUINDALUP (33° 38′ S. lat., 115° 10′ E. long.), district Sussex, 159 miles S. from Perth and 16 miles from Busselton, is the centre of operations of the timber industry, one station alone (Yelverton's) giving employment to over 100 men. It contains a post and telegraph office and one Government school, one at Upper Quindalup with an average attendance of 22 scholars; Church of England services held in schoolroom. Coach to Vasse, 14 miles thence rail; 20 miles south on the Margaret River are magnificent caves. Population of district, about 200

ROCKINGHAM (32° 18′ S. lat., 116° 4′ E. long.), a small post town (Fremantle district), with telegraph office, railway station on the southern road, 33 miles S. from Perth, 17 from Fremantle on Mangles Bay, which supplies jarrah timber in large quantities. A railway constructed at considerable cost from the port to Jarrahdale affords facilities for the shipment of the timber. It is of 3 ft. 6 in. gauge, and laid with steel rails. Jarrahdale, Jarrah Forests and Railway Company have their station, mills, &c., here. There are fine large mills in operation, cutting about 100 loads of timber per day, giving employment to about 400 men, 100 horses, 9 bullock teams and 3 locomotive engines. From £4,000 to £5,000 is paid by the company in wages every month, the workmen earning from 6s. to 16s. per day, according to the nature of the work upon which they are employed, and their own skill. The demand for timber exceeds the supply. The Timber Company have a railway from Rockingham to Jarrahdale inland, 56 miles. Communication is by coasting vessel and weekly overland mail; fare, 7s. 6d. Five Government schools (with average attendance of 200), and two schools at Jarrahdale, with average attendance of 69. There are Wesleyan and Anglican churches, two hotels, local court and police station. Public services are held in schoolroom. Population of district, about 1,000.

ROEBOURNE (20° 46′ S. lat., 117° 8′ E. long.) is situated 8 miles from the Nor'-west coast, on the banks of the Harding river, and is distant 920 miles north from Perth in a direct line. It is the chief town in north-west Australia, and is connected with the seaport of Cossack Bay by a twice-daily service horse tram. It has a post-office, money-order office, savings bank, Government Residency and offices, hospital, gaol, four hotels, namely, the Victoria, Jubilee, Roebourne and Leap Year Inn, a mechanics' institute with library and reading room, Government school (with average attendance of 30), Masonic lodge, and a branch of the Union Bank. A Court of Quarter Sessions is held here, with the Government Resident as chairman. In cases of trials for capital offences sittings of the Supreme Court are held under a special commission. It was proclaimed a municipality on November 30, 1887. Roebourne is the repeating station for the telegraphic service between Wyndham and Perth. There is a regular steam communication between Cossack and Fremantle, and also a 14-day steam service with Singapore, by which a large quantity of wool produced in the district is exported to the

London markets, also the pearl shell obtained from the famous fisheries along the coast, in which Cossack and Broome (in Roebuck Bay), share conjointly the reputation of being the main centres from which operations are directed. Two of the largest nuggets unearthed in the Colony were found here, weighing 334 and 398 ounces respectively, the former being found on the Shaw River, in 1890, and the latter, on Pilbarra Proper, in 1893. Payable reefs were first worked at Mallina, 60 miles from Roebourne, where a powerful Glasgow syndicate are now carrying on operations on a more extensive scale than has hitherto been attempted here, and several other gold mining leases are being developed in the same locality by smaller companies. In April, 1891, rich reefs were discovered at Marble Bar, 90 miles from the port of Condon and 300 miles from Roebourne. A few weeks later still richer reefs were found at Bamboo Creek, 40 miles farther on: and to-day both places are flourishing reefing fields. In February of 1894 a good find in the reefing line was made on the Shaw River, where a number of leases have since been taken up and are now being worked to profitable account. In 1894 another line of reefs was discovered a few miles north-east of Marble Bar, and the Reward Claim, known as McPhee's, has turned out a phenomenally rich mine. The most sensational alluvial discovery was at the Just-in-time, about 60 miles to the south-south-east of Marble Bar, from which 10,000 ozs. of gold were taken in 1892. Valuable discoveries have recently been made at Towranna, near Mallina goldfield and 75 miles from Roebourne and Pilbarra proper. The goldfield centres are connected with Roebourne by a weekly mail service. Precious stones and diamonds have been found at the Nullagine. Copper has been worked for the past two years at Whim Creek, from which the ore is carted to the port and shipped to London for treatment. There is a vast area of stream tin in the district. Lead mines have been opened and worked, but abandoned, owing to want of capital and the high price of labour. The lead is said to be rich in silver. The sheep stations here are worked almost entirely by native labour. The district is magnificent grass and spinnifex country, with a very hot though not unhealthy climate. Roebourne was first founded by the transfer of the Government settlement from Camden Harbour, the latter place having to be abandoned through the determined hostility of the natives. Population, about 300. Newspaper: *Northern Public Opinion.*

ROTHESAY (29° 17′ S. lat., 116° 54′ E. long.), a township and mining centre, south of Yalgoo, distant about 80 miles. Has a fortnightly mail service with Yalgoo. Coach also runs to Mingenew. Has two hotels, police-station, and Mechanics' Institute. Mining district. Population, 100.

ROTTNEST (31° 59′ 45″ S. lat., 115° 33′ 21″ E. long) is a island lying about 14 miles north-west of Fremantle, with post-office and heliograph station. It is about 7½ miles in length, by 2½ miles in breadth. The marine residence of the Governor is here, also a native prisoners' establishment and farm, and a juvenile reformatory. The prisoners are principally employed in farming, gardening and the manufacture of salt from the lagoons on the east side. There is a Government school, in which Anglican services are held, and a Reformatory school in connection with the Juvenile Reformatory, an institute and library, and pilot's quarters. Barley, wheat, rye and oats are grown. A lighthouse is erected on a hill; from it is shown a revolving white light, visible at 21 miles. There is a chain of salt lakes in the centre of the island with some picturesque scenery, but visitors cannot land on the island without a permit. Communication with the mainland is by heliograph. Population of island about 100.

SEABROOK (32° 22′ S. lat., 117° 1′ E. long.). A railway station, 5 miles from Northam, 71 miles from Perth, on Coolgardie railway. Chief industry, ore reduction, cyanide works; 60 head of stamps belonging to the Northam Milling and Mining Co. of W.A., said to be one of the largest and most complete plant in W.A. Water from wells. Surrounding land all taken up by cultivation. Population, about 150.

SERPENTINE (32° 27′ S. lat., 115° 53′ E. long.), a postal and railway station, in a farming locality on river of the same name, 34 miles S. of Perth Station on the S.W. railway; fares, 5s. 8d. and 3s. 7d. In Murray district. Has hotel, Government school. Fruit-growing industry. On the river are the Serpentine Falls, to which excursions are run from Perth in the spring. A small gold-mine has been opened in the locality. Agricultural district. Population about 150.

SHARKS' BAY (25° 15′ S. lat., 113° 30′ E. long.), a post town, with inland money-order office and telegraph station, 414 nautical miles NW. from Fremantle, reached by steamer, on the immense bay of the same name. It is a fishing station for pearls. The public buildings comprise police station, office inspector pearl fisheries, telegraph station, and school-house. It has two hotels, State school and several stores. Pearling and sandalwood cutting is carried on. Population, white and coloured, about 150.

SIR SAMUEL (27° 37′ S. lat., 120° 33′ E. long.), a township, 32 miles north of Lawlers, in the E Murchison goldfield. Has two hotels, and several stores. Population, about 300.

SMITH'S MILL (co. Swan) is a post township on the Helena River, 17 miles E. of Perth. Has telephone and railway station, one hotel, one school, and Mechanics' Institute, in which Anglican services are held. Industries: brickyards, lime-making, fruit-tree nurseries, gravel and stone quarries. Water from wells. Agricultural district. Population, about 300.

SOUTHERN CROSS (31° 14′ S. lat., 119° 19′ E. long.), a municipality (proclaimed January, 1892), about 35 miles south of Golden Valley, 237 miles E. from Perth, on the Yilgarn goldfield of which it is the head centre of the Government. The goldfield comprises Southern Cross, Golden Valley, Mount Jackson, Parker's Range, Hope's Hill, and Blackborne's. Four quartz batteries are at work. Has post-office, savings bank and money-order office, railway and telegraph station. Coach runs to Mount Jackson. The Warden, who also acts as the Resident Magistrate, has his office here; he is also the resident medical officer. There are municipal chambers, police-station, barracks, and stables, Government hospital, four hotels, West Australian and Commercial Banks, Miners' and Mechanics' Institutes, Oddfellows', Orange, Druids', A.N.A. and Freemasons' lodges, public school, Anglican, Wesleyan, Roman Catholic churches and Salvation Army; aerated water factory. Water from tank condensers. Kerosene street lamps. Income of municipality £1,800 per annum. Population, about 1,500. Geological formation: Gneiss—gold lodes. Newspaper: *Southern Cross Miner.*

SUBIACO (32° S. lat., 117° E. long.), a postal suburb, with telegraph and railway station, about 2 miles west of Perth, has a Government school (with average attendance of 300), also a Roman Catholic convent and schools, Roman Catholic, Wesleyan, Anglican, Baptist and Presbyterian churches, barracks, public hall, hotel, numerous restaurants, boot and wire mattress factory, saw-mills, Rechabite, I.O.G.T., Orange, social club, A.N.A. and Foresters' lodges. Water from wells. Population of town and district, about 3,400.

TALGA TALGA (or GLENCOE), a reefing centre, 18 miles from Marble Bar, and about 75 miles from Condon, on East Pilbarra goldfield, reached by steamer from Fremantle to Cossack, schooner to Condon, thence coach. Has a post and telegraph station, hotel and store. There is one battery at work. The mines, of which McPhee's Reward and the Star of the North are the leading, are only in the course of development. Water from Government well. Population, about 20.

TOORAK. A suburb of Coolgardie.

TOR BAY is in the Plantagenet district. A large export trade in timber was carried on here, but most of the population has moved on to Denmark.

TWENTY-ONE MILE, post, telegraph, and money-order township, 375 miles E. from Perth, in the Coolgardie district. Rail to Coolgardie, thence daily coach. Has two hotels, State school, mechanics' institute. Water from dam. Formation, auriferous. Population of town and district, about 250.

ULARRING is a post-office in the mining district of North Coolgardie, and has one hotel and a lending library. About 20 people in the township.

UPPER SWAN, a post town and railway station 19 miles from Perth, with two Government schools, Middle Swan, and Swan Bridge West; Anglican church and Protestant Boys' Orphanage Farm (84 inmates), 19 miles from Perth. Agricultural and dairying.

VASSE. *See* BUSSELTON.

VICTORIA PLAINS (30° 45′ S. lat., 116° 30′ E. long.), a post district, in Toodyay Magisterial district, with money-order, savings bank, and telegraph office, about 82 miles N. from Perth, reached from New Norcia (15 miles South), thence train. The district is said to be the best pastoral one in the colony. The Roman Catholics have a settlement here, a missionary establishment (New Norcia—which see) for the instruction of the aborigines. Hotel: Victoria Plains. Government school, with average attendance of 13. Anglican church, court-house, police-station.

WAGIN (33° 18′ S. lat., 117° 20′ E. long.), a township on the Great Southern Railway, 148 miles from Albany, Williams River district, 204 miles SE. of Perth. Has post, telegraph, savings bank, and money-order office, railway station, two hotels; Roman Catholic, Anglican, Baptist and Salvation Army places of worship, police-station, agricultural hall, and Mechanics' Institute, Government school and local court. Water from Government well, reservoir holds 10,000,000 gallons of water. Agricultural and pastoral district. Industries: Brick-making, lime-burning, fruit-growing. Population about 600.

WALERING postal township (issuing postal notes), with telegraph office, about 140 miles north from Perth, which is reached by coach to Moora, thence rail. Water from wells and tanks. Agricultural and pastoral district, with about 50 inhabitants.

WALKAWAY. A post town, and railway station 287 miles N. by rail from Perth. Has one hotel, State school and one store. Agricultural district. Population, about 50.

WANDERING is a postal township with telegraph station, in the Williams district, 214 rail miles SE. from Perth. Reached by rail to Pingelly, thence 30 miles. Has two hotels, school, agricultural society and hall, flour mill and stores. Agricultural district. Wool, wheat, oats, hides, flour, and sandalwood, are the chief articles of trade.

WANERENOOKA. *See* NORTHAMPTON.

WANNEROO (31° 43′ S. lat., 115° 45′ E. long.), 12 miles N. of Perth, on the Canning River, a post town, with a Government school. Roman Catholic services are held here.

WARRAWOONA (20° 30′ S. lat, 119° 35′ E. long.), post and telegraph station in Pilbarra goldfield. Reached by rail to Geraldton, coach thence. Coaches run to Marble Bar and Nullagine. It is about 1,228 miles NW. from Perth. Has one hotel. Water from Government well. Mining and pastoral district, with population of about 300.

WEST COLLIE, on the Collie River, district Wellington, is a railway siding, about 120 miles SSE. of Perth. Brick works (W. A. Colliery and Fireclay Co.), coal-mining and agricultural district. Population, about 25.

WIDGEMOOLTHA is a mining township, on the Coolgardie goldfields, about 403 miles east of Perth. Has post-office and telegraph station. It is reached by rail to Coolgardie, thence camels or coach; coaches also run to Norseman. Has two hotels, and Government battery. Water from Government

tank, with a capacity of 3,000,000 gallons. Mining district; granite, quartz, and lode formation. Population, 100.

WILLIAMS RIVER (or WILLIAMSBURGH) (32° 57′ S. lat., 116° 28′ E. long.), a postal centre, money-order, Government savings bank, and telegraph station, 100 miles SE. from Perth, in the Williams district. Communication is *viâ* Narrogin (20 miles North-East), on the Great Southern Railway. Inn: Cornwall's. Government school has an average attendance of 16. Anglican church, court house, hospital, police station, flour mill and mechanics' institute. Water from private tanks and Government wells. Pastoral district. Population about 500.

WOODARRA (27° 56° S. lat., 121° 18′ E. long.) (LAKE DARLOT) is 65 miles east of Lawlers. Has two hotels, several stores, and crushing plant in district. Population, 100.

WYNDHAM (15° 27′ S. lat., 128° 5′ E. long.), a town site on the Cambridge Gulf (45 miles from the mouth), with a good harbour (in East Kimberley district), 1,960 miles from Perth. Some parts of the harbour have been buoyed. There is a good jetty accommodation. During 1886 a Government Resident (now Resident Magistrate) and police camp were established here. It is the nearest port to the Kimberley Goldfield. The distance to the Kimberley Goldfield is 212 miles, but although considerably shorter than the route *viâ* Derby, the latter is said to be the easier and better travelling. Still the road from Wyndham is now fairly good, and is well watered. It is passable for pack horses during all seasons, and it is also suitable for wheel traffic from April to December. There is one hotel and one store, hospital, and a local court, post and telegraph offices, gaol, mechanics' institute, bonded store, goods receiving shed, police station and a complete set of cattle yards and run, for shipment of large stock, by means of which 400 head of fat bullocks have been shipped within six hours in this town, and a steamer (subsidized by the Western Australian Government), calls two-monthly from Port Darwin, as well as a two-monthly steamer from Western Australia ports. Township lighted with kerosene. Water from wells. Coal is believed to be in the district. This town is the NE. terminus of the West Australian system *viâ* Hall's Creek, the township of the Kimberley goldfields. Formation: carboniferous rocks, quartzite and sandstone, capped with flat-topped hills, with shale beds. Cattle and horse raising. Population, about 100.

YALGOO (28° 23′ S. lat., 116° 43′ E. long.) is a postal township with money-order, savings bank, telegraph and railway station, on the Yalgoo goldfield, proclaimed January 23, 1895, and covering an area of about 18,820 square miles. A coach runs to Mount Gould, Field's Find, and Rothesay. Yalgoo is about 130 miles from Geraldton, on the Mount Magnet Road, and 434 rail miles from Perth. Gold was first discovered in the early part of 1890 at the Nancarrong Hills. There is a daily mail. It has five hotels, State school, warden's court, police-station, M.U.I.O.O.F. lodge, Miners' Institute. Lighted with kerosene. Good supply of water. Mining and pastoral district. Formation: Amphibolites or dioritic schist. Population, about 200; district 1,000. Other localities on the field are Carlaminda, Field's Find, Gullewa, Noongal, and Rothesay.

YARLOOP (district Wellington), post, money-order, telegraph, and railway station, about 78 miles SW. from Perth. Has hotel and school. Water from wells. Famous timber district, Miller Bros.' well-known mill being here. Population of district, about 1,000.

YATHEROO (30° 30′ S. lat., 115° 30′ E. long.) is a large cattle station, in the Melbourne district, 90 miles from Perth; rail to Moora, thence 22 miles. Agricultural and pastoral district. Population of town and district, 200.

YERILLA (29° 29′ S. lat., 121° 35′ E. long.), a mining district, about 58 miles ENE. of Menzies. Had a large population, several hotels, public offices and business places, but in 1900 the Government offices, mining plant, and businesses were removed to other districts.

YILGARN GOLDFIELD. *See* SOUTHERN CROSS.

YORK (31° 53′ S. lat., 116° 47′ E. long.), a municipal town (proclaimed March, 1871), with post, telegraph, Government savings bank, and money-order office, 77½ miles (by rail) E. of Perth, with which city it has rail and telegraph communication. Rail accommodation to Greenhills. Principal hotels: Imperial, York, and Castle. There are also two temperance hotels. It is prettily located at the foot of Mount Bakewell, on both sides of the Avon river, which is spanned by two good bridges. There are two Episcopal churches (Trinity and St. John's), a handsome Roman Catholic church, convent and school, and a Wesleyan church, and Salvation Army. Freemasons', Oddfellows' and Druids' lodges, several sports clubs and an agricultural society. There are also a Mechanics' Institute, hospital, a court-house, three Government schools (boys', girls' and infants'), average attendance 150, and an assisted school with average attendance of 52, rifle corps, public library, ham and bacon factory, tannery, roller flour mill, brick-making and fruit industries. Branches of the Union Bank of Australasia and the Western Australian Bank and two Insurance Companies are here. Town lighted with kerosene. The principal supply of sandalwood comes from this district. Fresh water, in common with the whole of the Eastern district, is not plentiful. Population of town and district, about 3,000. Newspaper: *Eastern Districts Chronicle* (weekly).

YOUNDEGIN (31° 45′ S. lat., 117° 19′ E. long.), a postal receiving station and police-station (York electorate), 95 miles E. of Perth and 35 from York. Extensive agricultural operations are carried on around this district.

PUBLISHED WITH THE AUSTRALIAN HANDBOOK. 1901.

THE STATE (LATE THE COLONY) OF QUEENSLAND.

QUEENSLAND, which comprises the north-eastern portion of the continent of Australia, was formerly known under the name of the Moreton Bay district, the name of Moreton having been conferred on it in honour of his patron, the Earl of Moreton (the President of the Royal Society), by Captain Cook, who discovered it in May, 1770, although it is believed to have been visited by both Portuguese and Dutch in the beginning of the seventeenth century. Captain Cook reached on May 16 what he called Moreton's Bay, which he describes as a "wide open bay, in the bottom of which the land is so low that I could but just see it from the topmast head." Standing along the coast, he named all the principal points and headlands and bays, narrowly escaping shipwreck through striking on a coral reef. On June 17 he beached his vessel in the harbour, to which the name of Endeavour Bay was given. After repairing the vessel he continued his voyage on August 13, till Cape York was reached. In 10° 30′ S. lat., at Possession Island, when about taking his departure, he once more hoisted English colours, and took possession in the name of King George III. of the whole Eastern coast. Captain Cook's observations were, however, almost entirely limited to the coast, and accordingly very little information is afforded by his narrative, of the capabilities or features of the country.

Lieutenant Flinders, later on, in July, 1799, was despatched by Governor Hunter, who was desirous of gaining some information respecting the coast to the northward of Port Jackson, particularly of two large openings marked by Captain Cook. The sloop *Norfolk*, 24 tons, manned with volunteers from the two king's ships then in harbour, sailed from Sydney Cove on July 8. Flinders was accompanied by Bong-ree, a native of the north side of Broken Bay, who had been noted for his good disposition, and open and manly conduct. After passing the Solitary Isles, "which Mr. Flinders thought, with equal propriety, might be termed the 'Miserable,' from their sterile and uninviting appearance," anchor was cast in Shoal Bay; on the 15th, Cape Byron was made; having hauled off the land to avoid the reef lying off Point Danger, on the following morning a course was steered westwards for a large space; breakers were seen off the south point of the opening, which Mr. Flinders was satisfied was Moreton Bay. Passing between these breakers and Point Lookout he found ground in 20 fathoms. As he drew nearer, there appeared to be a very large extent of water within the opening. The country to the seaward was wretchedly sandy. The vessel was hauled in round Cape Moreton to go into Glasshouse Bay, and in the evening was anchored on the west side of the bay, about two miles from a low sandy shore. Here communication was had with the natives, who were at first friendly, but ultimately had to be fired upon, the spot from this cause being called Point Skirmish (the southernmost point of Bribie Island). From here the *Norfolk* was taken up the opening (between Bribie Island and the Mainland), supposed to be a river, which, from the quantity of pumice stone on the bank, was called the Pumice Stone River. Flinders walked to the top of one of the "round mounts," about nine miles distant from a branch of the river that pointed towards the Glasshouse Peaks, from the summit of which "the view of the bay and the neighbouring country was very extensive. The uppermost part of the Bay appeared at S. 24° E., and most probably communicated with a line of water which was visible at S. 12° E., where there were several distinct columns of smoke. This last bearing, which Mr. Flinders apprehended to be near the head of the river, he was not permitted to enter with the sloop, from the intricacy of the channel and the shortness of the time which remained for his excursion." The natives on the river shore were very friendly, dancing and singing to attract attention and to express their goodwill, and were considered superior to any that had been seen in the neighbourhood of Port Jackson. In all, Flinders passed fifteen days in Glasshouse Bay, and describes it "as so full of shoals that he could not attempt to point out any passage that would lead a ship into it without danger." After leaving Moreton Bay Mr. Flinders' next place of destination was Hervey's Bay, which he reached in two days, and where he remained till August 7, during which time he had sailed round the interior of it, but without being able to enter any opening that might have led him to a river. The limited time at Mr. Flinders' disposal, and the small vessel which he commanded, were both inimical to anything like a thorough investigation, and he returned from his voyage of exploration with no very favourable report of the new country he had been commissioned to explore. He expresses himself as disappointed in not being able to penetrate into the interior by either of the openings examined in his expedition, and states that it was *an ascertained fact* that no river of importance intersected the east coast between 24° and 29° of S. lat. In this he erred, as subsequently Clarence River, in Shoal Bay, and the Brisbane River, in Glasshouse or Moreton Bay, were discovered in the bays in which he had himself anchored. The *Norfolk* was the same craft in which Flinders and Bass, at the end of 1798, had sailed round the island of Tasmania.

A second journey was undertaken in 1801 by Flinders, his flagship being the *Investigator*, formerly the sloop *Xenophon*—a smaller vessel, the *Lady Nelson*, serving as a tender. His first voyage was undertaken from Sydney as the starting-point; the second was under the direct auspices of the Admiralty authorities, and Spithead was his point of departure, Sydney serving as a sort of depôt and victualling station. He left Spithead on July 18, 1801, was off Cape Leeuwin on December 7, and anchored in Sydney Cove on May 9, 1802; leaving it on his voyage of discovery on July 22nd of the same year, he sailed all round the coast line of Queensland to the shores of the Carpentarian Gulf, and after a lengthened journey, fraught with many perils, reached Sydney again on June 10, 1803. In a despatch to Governor King, dated June 10, 1803, he was enabled to state that the navigation of Torres Strait was "both practicable and easily made." An interesting relic in connection with this voyage is now in the Brisbane Museum, consisting of the shell of a mangrove tree, on which Flinders cut the name of his ship, a portion of the original inscription is clearly to be seen. This tree, till December, 1888, was standing on Sweer's Island, and has for many years past been known as the Investigator tree. In 1817, by order of the home authorities, Lieutenant Philip P. King in the *Mermaid* examined and charted the eastern shores of Queensland, and considerably added to the gradually accumulating stock of knowledge of North-Eastern Australia.

In 1823, in consequence of a recommendation of Mr. Commissioner Bigge that a new penal settlement should be formed to the northward of Port Jackson, either at Port Bowen, Port Curtis, or Moreton Bay; Lieutenant Oxley, then Surveyor-General of New South Wales, was directed by Sir Thomas Brisbane to proceed to Port Bowen. He left Sydney on October 23, accompanied by Lieutenant Stirling and Mr. Uniacke, in the *Mermaid*, the vessel employed by Lieutenant King. His journey was for the purposes of exploration, as well as for ascertaining the fitness or otherwise of the new land for a convict settlement. After examining the coast line north of Cape Moreton, the expedition returned to Moreton Bay, and on December 2 the river Brisbane was discovered which received its name from the ruling Governor of New South Wales. It is said that the existence of the river had been known some time before to certain runaway convicts, Thomas Pamphlet and Finnegan, who had been shipwrecked on the coast. They were found by Oxley living with the natives, and he was by the former told of, and guided to, the Brisbane river. Mr. Oxley explored the Brisbane for fifty miles, and also explored and named the Bremer, a tributary of the Brisbane. The suitability of the country as a fresh penal depot was soon apparent, and in September, 1824, the brig *Amity*, having on board Lieutenant Oxley, Lieutenant Miller, a detachment of the 40th regiment and thirty prisoners, left Sydney and anchored off Redcliffe Point (so named by Flinders from the redness of its cliffs, afterwards called by the natives Humpybong), where a settlement was formed; but, the position not being found suitable, it was afterwards transferred to near the present site of Brisbane. In 1825 the settlement of the colony may be considered to have taken place, when the first batch of convicts, of the most desperate and incorrigible character, was landed at Eagle Farm, near Brisbane, in the belief that there was but little chance of their returning to the head station in New South Wales. From this unpromising beginning, rapid progress in any direction could not be expected. The convicts were principally employed in clearing the land, building, and in making roads and improving the communication inland.

In September, 1825, the Brisbane River was ascended, examined and described by Major Lockyer, of the 57th Regiment. Major Lockyer, in his narrative, gives it as his opinion that "Moreton Bay is well calculated to become a place of trade when once settled."

Captain Miller, of the 40th Regiment, was the first commandant; after him were successively Captain Bishop (1824 to 1825); Captain Logan (1825 to 1830), who was murdered by the blacks (some believe the convicts were implicated) in the neighbourhood of what is now Ipswich, on Nov. 16, 1830; Captain Clunie (1830 to 1835); Captain Fyans (1835 to 1837); Major Cotton (1837 to 1839); Lieutenant Gravatt (May, 1839 to July, 1839); Lieutenant Gorman (1839 to 1840). Partly from the turbulent character of the convicts over whom they ruled, and in part from the almost unlimited power entrusted to the officers in charge, this period of the history of the settlement is not of the most satisfactory character, and will not bear dwelling upon. In 1842 this era came to a close, and thenceforward the colony marched rapidly on its career of progress. After the departure of Lieutenant Gorman, Dr. Simpson, the Acting Police Magistrate, had the control of affairs. He was succeeded on Nov. 14, 1842, by Captain J. C. Wickham, R.N., who was made Government Resident in 1853, and held that position until the separation from New South Wales, in 1859. The Rev. John Vincent was appointed chaplain of the Moreton Bay settlement on September 18, 1828; his residence was the building lately used as the Colonial Secretary's office. In 1828 the prisoners' barracks (late Supreme Court) and the military barracks (afterwards known as the Treasury buildings) were erected; the Observatory, or Windmill, as it was first called, on Wickham Terrace, was built in the following year. In March, 1836, the settlement was visited by James Backhouse, who described "Brisbane Town" as consisting of "the Houses of the Commandant and other offices, the barracks for the miltary and those for the male prisoners, a treadmill, stores, &c." On May 4, 1842, the district was proclaimed open to free settlement, and on Dec. 7 of the same year the first sale of land took place at Sydney. The first land sale in Brisbane was held on August 9, 1843. In August, 1837, the first steamer, the *James Watt*, anchored in Moreton Bay. In 1839 the first direct steamer from England, the *Sophia Jane*, ploughed the waters of Queensland. In the same year the convict settlement was broken up. On January 27,

1842, the first steamship, the *Shamrock*, belonging to the Hunter River Steam Navigation Co., afterwards known as the A. S. N. Company, arrived. It is reported that the Moreton Bay trade was not then remunerative to the Company, and in a few months the steamer was withdrawn. The interior was first explored by Mr. Oxley and Sir T. L. Mitchell, Surveyors-General of New South Wales. In 1827 Allan Cunningham made known the extensive district now called the Darling Downs. This and other districts have also been reported upon by Kennedy, Leichhardt, Gregory, Dalrymple, Landsborough, and others, the squatters in many cases being the pioneers of discovery and settlement. In 1840 the first coaster, a small schooner named the *John*, began to trade between Brisbane and Sydney. In 1842 Governor Gipps visited Moreton Bay. In 1843 the first coal seam was opened at Redbank. In the same year the settlers had the opportunity of taking part in the first general election in New South Wales, Moreton Bay being included in an electoral district, which comprised the Upper Hunter and Port Macquarie. But as the nearest polling place to Brisbane was at Raymond Terrace, it is not surprising that the privilege was not very largely availed of. It was not until 1851 that Moreton Bay had its own representative in the New South Wales Parliament; two years later an additional member was accorded; ultimately, in 1855, being extended to nine members, representing eight electorates. On June 20, 1846, the *Moreton Bay Courier*, now known as the *Brisbane Courier*, was established. In 1846 it was computed that the population of the district was 2,257. Of this number 829 resided in Brisbane, and 103 in Ipswich, the remainder being the total population of the colony outside these towns. About this time the port of Moreton Bay was defined, the Custom House established, a partial survey of the bay was undertaken by Captain Wickham at the expense of the "Moreton Bay District Association," and the first river steamer, the *Experiment*, began to ply between Brisbane and Ipswich. An attempt was also made to found a new colony, to be called "North Australia," of which Port Curtis was to be the capital, but the effort was a failure, and the settlement in a short time was abandoned. The first immigrant ship, the *Artemisia*, arrived in December, 1848; the *Fortitude* anchored in Moreton Bay on January 20, 1849.

In December, 1859, in deference to the repeated petition of the leading settlers, the Moreton Bay district, which had hitherto been an appanage of New South Wales, was erected into an independent colony, under the name of Queensland, this name having been given to it in honour of the august Lady who has so long presided over the interests of the vast British Empire. To the late Rev. Dr. Lang the success of the Separation Movement is principally due, and for his able and successful efforts he received the thanks of the Legislative Assembly. Dr. Lang fixed the 30th parallel as the southern boundary of the colony, but his recommendation in this matter was not followed. The proclamation of the new colony appeared in the *London Gazette* of June 3, 1859. From the date of separation the colony advanced by rapid strides, and soon began to take a place among the Australian group. The first Governor who took office was Sir George Ferguson Bowen, on December 10, 1859, having arrived in H.M.S. *Cordelia*. The first Parliament assembled on May 29, 1860, the first Colonial Secretary being Mr. (now Sir) R. G. Wyndham Herbert, K.C.B., till recently one of the Permanent Under Secretaries of State in the Colonial Office. The first Legislative Chambers were the old convict barracks, in Queen Street, afterwards known as the Supreme Court buildings, the site of which is now occupied by business premises. Mr. Justice Ratcliffe Pring was the first Attorney-General. Mr. Eliott was the first Speaker, and Mr. A. Macalister, C.M.G., the first Chairman of Committees.

In 1858 gold was first discovered about thirty miles from Rockhampton. In 1859 (Oct. 12) Circuit Courts were proclaimed at Ipswich, Drayton, and Maryborough.

In 1851 the population increased to 8,575. In 1856 it was estimated at 17,082. In December, 1861, it had increased to 34,367; in the following year to 45,077, and in 1864 the census returns gave 74,036 persons. In 1860 the returns of stock were 23,504 horses, 432,890 horned cattle, 3,166,802 sheep, 7,147 pigs. In 1864 the exports had increased to £1,247,054, of which wool formed the chief item. In 1866 the shadows of adversity fell upon the young colony, and a season of disaster was experienced that is not even yet forgotten. The failure of the local bank, the depression in the pastoral interests, and bankruptcies in all quarters, mark this as the black-letter year in the Colony's history. In 1869 the population was enumerated at 109,897. In the same year the revenue from all sources was estimated at £772,851, and the expenditure at £784,356. On the 31st of December, 1873, the population had increased to 146,690, and the revenue for the year was £1,120,034 13s. 8d., the expenditure being £956,335.

Sir George Bowen was succeeded in the governorship, in August, 1868, by Major (afterwards Colonel) Blackall, who died on January 2, 1871. The system of immigration at the expense of the colony now began to exert an influence on its fortunes, and the influx of large bodies of immigrants has done much to develop the resources of the country. The Marquis of Normanby succeeded Colonel Blackall in August, 1871; he was transferred to New Zealand in 1874; he was followed by the late Mr. (afterwards Sir) W. W. Cairns, who was appointed Governor in August, 1874, and was sworn in on January 23, 1875. He did not stay out his full term of office, being transferred to South Australia in the early part of 1877. His successor was Sir Arthur Kennedy, formerly Governor of Hong Kong, who was sworn in on April 10, 1877, and retired from office on May 2, 1883, dying on the voyage home, near Aden, on the 3rd of June following. In the intervals between the departures and arrivals of Governors, the government was ably administered by the late Colonel Sir Maurice Charles O'Connell. During the absence of Sir Arthur Kennedy in England (in 1880) his *locum tenens* was the late Sir J. P. Bell, by whom the duties appertaining to the Governorship were performed to the satisfaction of the colonists. After the retirement of Sir Arthur Kennedy, the late Sir Arthur Palmer became Acting Governor till the arrival of Sir Anthony Musgrave, in November, 1883. He did not survive his term of office, dying after a few hours' illness on October 9th, 1888. He was followed by Sir Henry Wylie Norman, who was sworn in on May 1, 1889, and remained Governor of Queensland till November, 1895, when he was succeeded by Lord Lamington, Sir S. W Griffith, C.J., being Lieutenant-Governor during any absence from the seat of government of Lord Lamington.

During the last few years a movement has been made by Northern residents to procure the separation of Northern and Southern Queensland and the erection of the former into a distinct and independent colony. It is proposed that the dividing line shall be a line running west from Cape Palmerston on the east coast in South latitude 21° 30′ to the eastern boundary of South Australia, separating the waters flowing north in the Burdekin, and Gulf of Carpentaria from the waters flowing south. This portion of the Colony has an area of about 249,000 square miles and a population of upwards of 50,000. The grounds upon which separation is asked for are—the great distance from the seat of Government and consequent defective administration of Government; inadequate representation; unjust appropriation of the public revenue and loans to the North, while the North has had to pay its full quota of interest on the loans, and an absolute diversity of interests between the inhabitants of tropical and temperate Queensland on the subject of coloured labour. Considerable correspondence and some parleying has taken place between the Northern representatives, the Government of Queensland, and the Imperial authorities. Of late, measures have been introduced into the Queensland Parliament, dealing to some extent with the grievances complained of. The proposed name of the new colony is North Queensland, and this title is now coming into general use by the residents.

The inhabitants of the mid-central portion of Queensland are also agitating for separation, principally, it is understood, on the grounds of inadequate representation and want of proper share of the public expenditure.

In June, 1894, Lord Ripon, the Secretary of State for the Colonies, expressed the opinion that, in view of the present commercial and financial position of Queensland, the moment did not appear favourable for considering any scheme of territorial partition.

The Constitution Bill introduced into Parliament during the Session of 1892, but not passed, had for its object the partition of the Colony into two provinces. The dividing line between North and South Queensland would be the 21° of south latitude, which is a few miles north of Mackay.

The Southern Division would comprise Brisbane and all places south to the border and north to 21°, which would take in Mackay, Rockhampton, etc.

The Northern Province would comprise the whole of the present Colony N. of 31° S. lat., and would include Bowen, Townsville, Charters Towers, the Gulf country and Cape York Peninsula.

Each Province would have local legislations and Provincial Governors and the usual States' rights, but would be governed as a whole from the Metropolis (Brisbane) as heretofore.

Boundaries.—The boundaries of Queensland are—on the north, the Gulf of Carpentaria and Torres Strait; on the east, the Pacific Ocean; on the south, the colony of New South Wales—the division being an imaginary line from Point Danger on the east, running westward along the Macpherson and Dividing Ranges and the Dumaresq river to the Macintyre river, thence by the 29th parallel of S. latitude to the 141st meridian of E. longitude; on the west, the 141st meridian of longitude from the 29th to the 26th parallel, and thence the 138th meridian north to the Gulf of Carpentaria. The northernmost point is Cape York, and the most southern (on the coast) is Point Danger.

The southern boundary of the colony has been fixed and marked on the ground in an efficient manner, but the western boundary is not so clearly defined, there being a strip of border land about five or six miles broad, which both colonies (South Australia and Queensland) claim. So far as can be ascertained at present, the boundary line lies about five miles to the east of the position assigned to it on the Map of Queensland. This discrepancy has arisen from the adoption of the longitude of the principal headlands on the coast from the Admiralty survey. During 1885 the boundary line between the colony and South Australia was defined from the 141st meridian on the 26th parallel of S. latitude to the 138th meridian, and northward to 21° 30′, near to Mount Herbert.

By letters patent, dated October 10, 1878, for the rectification of the maritime boundary of the Colony, it is decreed that "all islands included within a line drawn from Sandy Cape northward to the south-eastern limit of Great Barrier Reefs, thence following the line of the Great Barrier Reefs to their north-eastern extremity, near 9½° S. lat., thence in a north-westerly direction, embracing East, Anchor, and Bramble Cays, thence from Bramble Cay in a line W. by S. (south, seventy-nine degrees west, true), embracing Warrior Reef, Saibai, and Tuan Islands, thence diverging in a north-westerly direction, so as to embrace the group known as the Talbot Islands, thence to and embracing the Deliverance Islands, and onwards in a W. by S. direction (true to 138° E. long.), should be annexed to and form part of the colony of Queensland." The law authorizing this annexation came into operation on August 1, 1879.

Dimensions.—The Colony includes an area of 668,497

square miles (668,224 square miles as re-calculated by the Surveyor-General), of which 2,240 square miles are comprised in islands : equivalent to nearly four times the area of France, and nearly twelve times the area of England and Wales.

Geographical Features.—*Bays and Gulfs.*—Among the bays and gulfs that indent the eastern coast line of Queensland are Moreton Bay, Laguna Bay, Wide Bay, Hervey Bay, Port Curtis, Keppel Bay, Port Bowen, Shoalwater Bay, Broadsound, Repulse Bay, Edgecumbe Bay, Port Denison, Abbott Bay, Upstart Bay, Bowling Green Bay, Cleveland Bay, Halifax Bay, Rockingham Bay, Mourilyan Harbour, Trinity Bay, Bathurst Bay, Princess Charlotte Bay, Lloyd Bay, Weymouth Bay, Temple Bay, Shelburne Bay, Hannibal Bay and Newcastle Bay ; on the western side are Bynoe, Morning and Disaster Inlets, and the Gulf of Carpentaria. At the mouth of the Batavia and Ducie Rivers is a very fine harbour, called Port Musgrave. It is reported to be, excepting Port Curtis, the finest natural harbour on the Queensland coast.

Harbours.—The colony possesses numerous harbours, of which Moreton Bay is the principal. It is formed by Bribie, Moreton, and Stradbroke Islands and the main land. Anchorage may be found in almost any part of this bay, under shelter of the numerous shoals. It is about 40 miles long, from north to south, by 17 miles wide, and receives the waters of six navigable rivers, viz., the Nerang, the Pimpama, the Logan, the Brisbane, the Pine, and the Caboolture. Most of these rivers have, however, a bar entrance. Besides Moreton Bay there are Hervey Bay, Keppel Bay, Port Curtis, Port Bowen, Port Denison, Rockingham Bay, Port Albany (near Cape York), Thursday Island, and several other smaller harbours on the eastern seaboard. The principal harbour at the head of the Gulf of Carpentaria is at Investigator Roads.

Straits.—The South passage between Moreton and Stradbroke Islands, the North passage between Moreton Island and Bribie Island, Whitsunday Passage between Whitsunday Island and the mainland, Capricorn Channel, Endeavour Strait, at the extreme north between Prince of Wales Island and the mainland, Torres Strait, between Cape York and New Guinea, and Rockingham Channel.

Capes.—The principal headlands on the Queensland coast are Point Danger, Point Look-out, Amity Point, Cape Moreton, Point Skirmish on Bribie Island, Sandy Cape, Double Island Point, Capes Capricorn, Manifold, Townsend, Palmerston, Upstart, Bowling Green, Cleveland, Grafton, Tribulation, Bedford, Flattery, Melville, Sidmouth, Direction, Grenville, Orford Ness, York, Duyfhen, and Bold Point; the two last-named project into the Gulf of Carpentaria.

Rivers.—The principal rivers are the Burnett (with its tributaries, the Auburn, Boyne, and Barambah); the Pioneer, the Fitzroy (formed by the junction of the Mackenzie and Dawson rivers, with their subsidiary creeks), and the Burdekin, flowing into the Pacific ; the Flinders (one of the longest in the colony but with a small mouth), the Albert, Gregory, Leichhardt, Nicholson, Mitchell, Gilbert, Norman, Staaten, Coen, Batavia, Ducie, and the Richardson, emptying themselves into the Gulf of Carpentaria ; the Kennedy, having as affluents the Laura, Normanby, Coleman, and King, flowing into Princess Charlotte Bay ; the Herbert, and the Diamentina or Mueller river, flowing inland. The Victoria, or Barcoo, river flows towards Cooper's Creek, the Condamine or Balonne towards the Darling, the Mary empties itself into Hervey's Bay, the Calliope flows into Port Curtis, the Brisbane, which receives the water of the Bremer and other streams, rises in the Burnett Range, and falls into Moreton Bay ; other Rivers debouching into this bay are the Albert, an affluent of the Logan, Nerang, Pimpama, Logan, Pine, and Caboolture. The Warrego rises in Buckland's Table Lands, and flows SW., eventually falling into the Darling. There are numerous streams of lesser magnitude in various parts of the colony, many of those in the west being lost in the interior of the continent.

Islands.—The waters of northern Queensland are studded with hundreds of islands, many of great beauty and, it is believed, fertility. The natural breakwater of the Great Barrier Reef smoothes the sea, and makes sea-travelling here a pleasure. The largest of the islands belonging to the colony are Stradbroke (about 33 miles long by 6 miles broad), Moreton (20 miles in extreme length by an extreme breadth of 5 miles), Bribie, Fraser or Great Sandy Island, Curtis, Whitsunday, Palm, Hinchinbrook and Lizard, on the eastern side ; Prince of Wales, Banks, Mulgrave, Wednesday, Thursday and Horn Islands off the northern coast ; and Wellesley Islands (Mornington, Bentinck and Sweers) in the Gulf of Carpentaria.

Mountains.—A range of mountains, known generally as the Coast Range, extends from York Peninsula in the north to within a few miles of the capital, running nearly parallel with the seaboard at an average distance of 50 miles from it. It comprises the Cook, Kirchner, Razorback, Wyatt, Pioneer, Connor, Dawes, Glasshouse and other Ranges. The highest peak is Mount Dalrymple, 4,200 feet. The Bellenden Ker Range is in the north to the south of Cairns ; its highest points tower up 5,400 feet. The Main Range runs inland of the Coast Range. The Dividing Range extends from the head of the Dumaresq river to the sea coast at Point Danger, forming the dividing line between the colonies of New South Wales and Queensland ; the western portion is known as Macpherson's Range. There are numerous other lines of hills of less altitude. The heights of some of the tallest mountains are :—Bellenden-Ker Range, Wooroonooran, 5,400 feet ; Chooreechillum, 5,200 feet ; and Mount Sophia, 4,200 feet. Mount Dalrymple, 4,200 feet. Mount Harold, 4,150 feet ; and Mount Massie, 4,100 feet. Macpherson Range : Mount Lindesay, 4,064 feet. Mount Elliot, 4,060 feet. The average height of the mountain ranges of Queensland has been estimated at about 2,000 feet.

Divisions. — Queensland is divided into twelve large districts, viz., Moreton (comprising East and West Moreton), Darling Downs, Burnett, Port Curtis, Maranoa, Leichhardt, Kennedy, Mitchell, Warrego, Gregory, Burke, and Cook.

The Moreton district occupies the extreme south-eastern corner of the Colony. It is bounded on the south by the colony of New South Wales, and stretches inland to the Dividing Range. In it are included the city of Brisbane—the metropolis of the colony and the seat of government- and also the town of Ipswich. The rivers watering it are the Brisbane, Bremer, Logan, and their branches, which have their sources in the mountain ranges. The Southern and Western Railway bisects the district. Coal is found and worked in several places along the banks of the Bremer ; gold exists in the Enoggera ranges, a few miles from Brisbane. Sugar-cane has been successfully cultivated in the southern portion : in West Moreton a very large area is under cultivation, principally for maize ; vegetables and fruit, too, are largely grown. Its area is 8,832 square miles, or 5,652,480 acres. Formation : Recent volcanic and carboniferous.

The old district of East Moreton is now divided into the two electorates of Nundah and Moreton, the southern boundary being Kedron Brook, while the south Pine river separates Moreton from Nundah. Taylor's Range and Moreton Bay being the western and eastern boundaries respectively. It comprises a large area of land well suited for farming, dairying, market gardening and fruit culture.

The Darling Downs district includes an extensive tract of downs on the summit of the Dividing Range, to the west of the Moreton district. It was discovered in 1827 by Allan Cunningham, the botanist, and named by him after Sir Ralph Darling, the then Governor. It is one of the richest pastoral districts in the Colony, and also comprises a large extent of fine agricultural land, much of which has recently been repurchased by the Government and disposed of to small farmers. Wheat, maize, barley, oats, arrowroot, potatoes, and all kinds of English vegetables and fruits are cultivated with success. Good coal is also reported to exist over several parts of the Downs. The principal towns are Toowoomba, Drayton, Warwick, Dalby, Stanthorpe, Condamine, Leyburn, and Goondiwindi. The rivers flowing through it are the Condamine, Severn, Weir, and Moonie. The Western Railway traverses the northern portion of the district, and the Southern line the extreme eastern portion. It has an area of 6,067 square miles, or 3,882,880 acres in the settled districts and 18,995 square miles or 12,156,800 acres in the unsettled districts. Formation : The northern, eastern, and southern portions carboniferous, the remainder principally eolian sandstone.

The Burnett and Wide Bay district lies between the Moreton and Port Curtis districts, the Pacific Ocean bounding the whole of the eastern portion ; it is principally occupied for pastoral purposes. (In this division is also included Fraser's Island.. The soil and climate are more suitable to the growth of tropical productions, such as sugar, cotton, arrowroot, ginger, &c. ; sugar is largely grown on the river banks. Maryborough, situated on the river Mary, and Bundaberg on the Burnett, are the ports. Gympie, Mount Perry, Gayndah, Nanango and Eidsvold are other townships. The Gympie gold mines have yielded large quantities of the precious metal, and are likely to be worked to advantage for many years to come. Valuable discoveries have been made of other ores, also of coal, which is now worked at Burrum. The Kolan, Burnett, Burrum, Mary, and very many subsidiary streams water the district, which in its western and south-western portions is of a mountainous nature. The North Coast Line of Railway from the metropolis to Gympie, Maryborough and Bundaberg traverses the central portion of the district. Lines from Bundaberg (seaport) to Mount Perry (copperfield) to the rich sugar lands of the Isis, and the coal deposits at Burrum are now open. Area 8,243 square miles, or 5,275,520 acres. Fraser's island has an area of 520 square miles, or 332,800 acres. Formation : Principally carboniferous.

Port Curtis district (named by Flinders after Admiral Sir Roger Curtis) lies to the northward of the Burnett district, from which it is separated by the Dawes' Range, and stretches westward into the interior, and northward to Cape Palmerston, the sea being its eastern boundary. Its area is 14,103 square miles, or 9,025,920 acres. The rivers Dawson, Fitzroy, Boyne, and Calliope, with their numerous tributaries, water this tract of country, and it is intersected by the Central Railway. Important gold-fields have been discovered on the Calliope river, the Boyne, the Fitzroy, Mount Morgan, and other places. There are also copper mines and quarries of marble. The chief towns are Rockhampton, situated on the Fitzroy river, Mount Morgan, Gladstone, St. Lawrence, and Yaamba. The Connors, Broadsound and Boomer ranges of mountains separate Port Curtis from the Leichhardt district on the north-east. The highest Peaks in the Connors' Range are 3,000 feet above the sea level. Formation : Cambrian and silurian, with some recent volcanic rocks, the western border being granite, syenite and diorite.

The Leichhardt is a large tract of pastoral country, possessing in favourable seasons, a good supply of water and grass, lying to the SW., W. and NW. of the Port Curtis district, and having a breadth of five degrees of latitude. The principal townships are Banana, Emerald, Nebo, Clermont, Copperfield, Cometville, Springsure and Taroom. The Central Railway traverses this district. The chief rivers are the Dawson, Comet, Nogoa, and the Isaac, all of which are tributaries of the Fitzroy. The breadth of country watered by these rivers is about 350 miles. It is a fine pastoral district, and much of it well adapted for agriculture. It has also immense mineral wealth, and much copper and gold have been produced with a limited mining population. It has

also marble and coal measures, but these have not been worked. Dr. Leichhardt, in his famous journey of exploration in 1844, from Brisbane to Port Essington, traversed a portion of it, going from south to north. The watershed commences from the range dividing the Condamine from the Dawson, and terminates at the range dividing the Isaac from the Suttor. The area is 48,323 square miles or 30,926,720 acres. Formation : principally carboniferous, with some eolian sandstone.

The MARANOA district is a purely pastoral district to the westward of the Darling Downs, and south of the Leichhardt district, extending to the 29° of latitude, the southern boundary of the colony. It is principally table-land and downs. Roma, Surat, Mitchell, and St. George are the leading towns. The Maranoa, Culgoa, Balonne, and Moonie rivers traverse this district, besides several creeks. The Western Railway runs through the district from its East to its West boundaries. Within the last few years considerable areas of ground around Roma have been placed under wheat, the cultivation of which promises to be a great success The district seems also to be well suited for fruit-growing, its grapes being the finest produced in the Colony. The area is 38,892 square miles, or 24,890,880 acres. Formation : the eastern portion of eolian sandstone, the western of cretaceous slates.

The WARREGO district is situated to the westward of the Maranoa district, and south of the Mitchell district, its southern boundary being the colony of New South Wales. The Paroo, Bulloo, Ward, and Warrego rivers flow through it. It is almost entirely of a pastoral character. Charleville, Cunnamulla, Eulo, and Thargomindah are the townships. The Western railway intersects the district as far as Cunnamulla, which is 604 miles west of the metropolis. Boring for artesian water has been carried on in this and the surrounding districts with marked success, the carrying capacity of runs not only being greatly increased thereby, but adapting the district in time for settlement. One of the earliest and deepest bores was put down at Charleville, where, at a depth of 1,571 feet, the splendid yield of three million gallons per diem was obtained. There are many other bores in the district, giving even a greater supply than the Charleville one. The area is 59,341 square miles, or 37,972,240 acres. Formation : almost entirely a vast bed of cretaceous slates, the Grey and Cheviot ranges to the westward being of Cambrian and silurian rocks.

The KENNEDY district, of which the chief ports are Bowen and Townsville, comprises North and South Kennedy, and is situated to the north of the Leichhardt district, occupying the middle coastal portion of the colony. Other towns are Mackay, Cardwell, Charters Towers, Millchester, and Ravenswood. It is named after Mr. Kennedy, the explorer, who was killed by the Aborigines on York Peninsula. Leichhardt first traversed this district in 1844, on his way from Moreton Bay to Port Essington. In 1856 Mr. A. C. Gregory passed through it, and in 1859 Mr. G. E. Dalrymple explored a considerable portion of it. It is a well-watered district, the river Burdekin and its tributaries running through it, and is adapted to the growth of sugar, maize, and cotton, as well as to the pasturage of sheep and cattle. The Mackay district is specially noted as being one of the largest sugar-producing districts in the colony, the cane being principally grown on rich alluvial flats, on the south side of the Pioneer river. The Charters Towers goldfield, too, is of note, being one of the richest auriferous districts in Queensland. The area of the Kennedy district is 11,289 square miles, or 7,224,960 acres in the Settled Districts and 51,932 square miles, or 33,236,480 acres in the Unsettled Districts. Formation : The portions environing Bowling Green Bay are tertiary ; in the neighbourhood of Bowen the carboniferous prevails : farther south are recent volcanic rocks, with a considerable area of eolian sandstone. To the westward, recent volcanic rocks cover a wide superficies, while an immense strip of cambrian and silurian rocks almost intersects the district.

BURKE district is on the north-west of the Mitchell district, west of the Kennedy, and south and South-west of the Cook district ; it extends to and encircles the southern portion of the Gulf of Carpentaria ; numerous rivers, among which are the Norman, Flinders, Bynoe, Albert, Cloncurry, Leichhardt, and Nicholson, all emptying themselves into the Gulf, water the district. The telegraph passes through to the principal town, Normanton. Such portions as are utilized are in the hands of squatters for grazing purposes. Gold and copper mining has been carried on at the Cloncurry field ; the copper deposits in this locality are very rich, and although the industry has been for some years suspended, there are evident signs of a revival ; at Croydon one of the most remunerative gold-fields in Queensland has been found. Its area is 8,192 square miles, or 5,242,880 acres in the Settled Districts and 6,656 square miles or 4,259,840 acres in the Unsettled Districts. Formation : principally cretaceous, an immense island of cambrian and silurian rocks occurring in the Cloncurry district, while the Great Dividing Range is of recent volcanic origin.

The following notes on the Burke district were furnished by the late Mr. William Landsborough, who explored and rode over the greater part of it during the years 1861 to 1870 :—

"The seaboard of the Gulf of Carpentaria is a plain, watered by numerous rivers. This plain extends, with hardly a break anywhere, to the watershed dividing the northern from the southern country, which to the southward is nearly 400 miles distant from the Gulf shore. The range has a considerable elevation, but the ascent is so gradual that the traveller may reach the plains of the Diamentina, which are on the southern slope, without noticing the line of watershed Nowhere can indigenous pasturage be found to excel that of this vast plain. The trees and grass are similar to those of a great deal of the Australian sparsely wooded country. In the driest seasons the O'Shaughnessy, Gregory, and Leichhardt are running streams. The rivers have their sources in springs, a few miles from the watershed of the northern and southern country. On the banks of these rivers are beautiful weeping tea and other trees. In the Leichhardt and its branches are deep waterholes. In the Gregory, which has by far the greatest volume of running water, the banks are so low that the river could be easily turned aside on to the plains for the purpose of irrigation. The Gregory flows through 100 miles of plain country, in which there are many branches, by means of which the stream could be spread over a great extent of country ; the two largest of these branches flow—one into the Nicholson, the other into the Albert. The O'Shaughnessy is so rich in lime that every twig that happens to be dipped for any time in it becomes petrified. The ranges of the Burke district have not been much tested for minerals, but they are known to have gold, and a considerable quantity has been procured by the miners of the Cloncurry. Large blocks of virgin copper have been found on the banks of the Leichhardt, and competent geologists affirm that the copper mines of the Cloncurry are among the richest in the world."

A survey for a railway from Hughenden to Normanton (*vid* Croydon), with a branch to Cloncurry, has been made, and the plans for some portion approved. The line is now made and opened to Croydon from Normanton. As the ground is so uniformly level, a surface formation throughout, with Phillips' iron sleepers has been adopted.

The Gulf coast between Kimberley and the Albert consists of very low-lying land (principally fringed by mangroves from 10 to 30 feet high), which extend several miles inland, gradually giving place to open plains one to three feet above high-water mark, with patches of coarse herbage growing upon them, and intersected in all directions by belts of mangrove on small salt-water creeks, the soil being sea-mud completely pulverised. "Salt-pan" is the local definition of this class of country.

The MITCHELL district lies to the westward of the South Kennedy district, and is nearly central. It is watered by the Barcoo and Thompson rivers, and numerous branches ; it is entirely pastoral, and of comparatively recent occupation. Tambo, Aramac, Longreach, Barcaldine, Blackall, Muttaburra, and Isisford are the principal centres of population. The Central Line penetrates it as far as Longreach, 67 miles beyond Barcaldine. The area is 37,219 square miles, or 23,820,160 acres. Formation : Principally immense beds of cretaceous slates about the centre, there being a tract of eolian sandstone, which is also found to the southward of Mount Grey.

The GREGORY district comprises North Gregory and South Gregory. It is purely pastoral, and less known than any of the other districts. Opals, are found all over the district, and of late trade in them has been somewhat extensive. The chief opal centre is Opalton, between Longreach and Winton. Gems are recovered in considerable quantities on the lands adjoining Cooper's Creek in the extreme West of the Colony. This extensive district lies between the Mitchell, Burke, and Warrego districts, and the South Australian boundary. The Diamentina, Herbert, Wilson, and Mulligan rivers, and Sylvester, Eyre, King's, Farrar's, Cooper's, and other creeks traverse it. Cooper's Creek will ever have a tragic interest, from the fact that the first crossers of the continent, Burke and Wills, perished in the vicinity. The Grey and Cheviot ranges form its south-eastern boundaries ; other ranges in the south of the district are the Coleman, Canaway, and Macgregor. Formation : to the south-westward, abutting on the South Australian frontier, eolian sandstone ; the remainder principally cretaceous slates, with here and there patches of eolian sandstone.

The settlement of the Burke, Mitchell, and Gregory districts was principally due to the explorations of Mr. Landsborough. Prior to 1862 the upper and the best portions of the Thompson were unknown, and the same may be said of the Gregory, the Herbert, and the Flinders, which were traced by him, and, in consequence of his glowing reports of the country watered by these rivers, were soon stocked.

COOK district is at the extreme north of the colony, and covers an area of 32,025 square miles, or 20,496,000 acres. This is exclusive of North Cook, which has an area of 3,200 square miles. It is an immense wedge or conical shaped tract of land ; the Pacific Ocean bounding it on the east, and the Gulf of Carpentaria on the west. The Mitchell, Lynd, Hodgkinson, Normanby, Palmer, Laura, Coen, Batavia, Pascoe, Jardine, Endeavour, Kennedy, Gilbert, and other rivers water some portions of it. Somerset, Cairns, Maytown, Herberton, Watsonville, Thornborough, Port Douglas, and Cooktown are the townships, the last-named being the most northern town in the Australian continent, and Somerset the most northern port. The opening up of the Palmer river diggings caused this district to become much better known, attracting a large immigration of the mining population from all the colonies. The discovery by Mulligan and Warner of a rich reefing district, now called the Hodgkinson diggings, having as centres Kingsborough, Northcote, and Thornborough, has also led to a considerable settlement of population. The PALMER RIVER gold-fields lie about the central part of the district, in about 16° 30′ S. lat. The Palmer river is a running, winding stream of varying depth, depending much on the season of the year. It is supposed by some to be either the head waters of the Mitchell, or an important tributary. The HODGKINSON gold-field lies to the south of the Palmer, at a distance of about 60 miles from the sea-coast. Its ports are Cairns and Port Douglas. The principal town is Thornborough. The Wild River, or Herberton tin field, lies about 85 miles SW. of Port Douglas. It is believed to be one of the richest tin mining localities in the world. The wealth of the district consists of gold ; tin in considerable quantity, and silver ; and there

are also coal measures at Cape Bedford, and around Cooktown. The famous Chillagoe district, so rich in silver and copper, is located in the vicinity of the Walsh. Very large areas have been taken up, particularly by the Chillagoe proprietary, which has received Parliamentary sanction to construct a railway to the Chillagoe fields connecting with the State system at Mareeba. There is, too, some of the very best land on the rivers Mitchell, Macleod, Walsh, Hodgkinson, Kennedy, Laura, and Normanby, and superior sugar-growing country has been found on the banks of some of the rivers flowing into the Gulf of Carpentaria. Large quantities of cedar are yearly cut and exported from the scrubs of the Daintree and Mossman Rivers. Large areas of land have been taken up for the cultivation of the sugar cane. Rice is also being cultivated. The principal ranges are the Kirchner, Mitchell, and the Thompson. A railway now starts from Cooktown westward to Laura, 67 miles; the Cairns line is now completed and open to Mareeba (47 miles). The telegraph wire also traverses it.

Geology.—The Geological character is varied; on the Western Coast line there is a fringe of tertiary alluvial; the central portion is almost entirely eolian sandstone. Towards the Eastern coast are alternate strips of Cambrian and silurian rocks, and granite, syenite, and diorite. To the southward of Princess Charlotte Bay, the tertiary alluvial is found. To the south-east are recent volcanic rocks, eolian sandstone, and patches of silurian, granite, and syenite.

Mr. Jack, late Government geologist, who has explored considerable portions of the district, partly with reference to the existence of coal, and to report on its geology, considers that the geological structure of the Cape York peninsula is exceedingly simple. The backbone or dividing ridge, which lies close to the eastern seaboard, consists almost entirely of granite derived from the metamorphism of slates and greywackes (the equivalents of the auriferous rocks of the Palmer River). This granitic backbone rises into lofty mountains in the McIlwraith, Macrossan, Janet, and Carron ranges. The ranges are generally flanked by little altered rocks. This high ground has formed the shore of the vast sheet of water in which the "Desert Sandstone" was deposited.

It is estimated that one-sixth of the entire area of the colony is granite; the coast ranges from Broad Sound to the apex of the York Peninsula being of this formation. The cainozoic formation, consisting of conglomerates and desert sandstone, occupies about one-fourth of the area, comprising the central portion extending from the N. S. Wales border northward to the Western shores of the Gulf of Carpentaria. In the neighbourhood of Brisbane, metamorphic rocks are found. Primary rocks prevail over an immense area, the carboniferous formation extending from Brisbane in various breadths to the Port Denison district, being continued with interruptions to the 21st parallel. The Devonian formation embraces an area roundly estimated at about 40,000 square miles. Volcanic rocks are estimated to cover about 30,000 square miles. The greater part of the Western division of the colony, about one-third of the entire area, is occupied by vast cretaceous beds. According to Mr. Daintree, "all the great plains westward of the main coast range consist of subaerially decomposed oolitic and cretaceous shales, limestones, and sandstones." The Great Barrier Reef, which stretches for a distance of 1,200 miles from Port Denison to Torres Strait, is one of the remarkable features of the Queensland formation. It doubtless, at a remote period of time, formed the coast line of the continent at this part. This huge natural breakwater is of coral formation.

Municipalities.—On December 31, 1899, thirty municipalities and six shires were in existence, with an estimated area of $429\frac{3}{10}$ square miles, 203,907 population, 42,009 dwellings, and $1,441\frac{1}{2}$ miles of roads and streets. The estimated value of ratable property in these municipalities and shires was £14,514,246, the amount of rates received being £138,470 17s. 9d. The total receipts in 1899 were £261,459 7s. 8d.; the total expenditure was £267,347 10s. 3d. The Endowments from the Government funds in 1899 were £22,862 11s. 5d. There are upwards of 250 small towns or townships.

Divisional Boards.—During the Session of 1879 an Act was passed to provide for Local Government outside the boundaries of municipalities. This Act, which is known by its short title of the "Divisional Boards Act of 1879," enables the inhabitants of districts not included in municipalities, to attend to their own local requirements, as regards highways and other public works. The colony has been portioned out into divisions, each governed by a board of not more than nine nor less than three members, who are elected by the ratepayers. The rates raised locally are subsidized from the Government funds. On January 1, 1900, there were 118 Divisional Boards in operation. During 1899 the Endowment from Government was £42,250 16s. 3d.; loans, grants, rates and other sources of income bringing up the revenue to £219,671 2s. 9d. The expenditure on public works was £150,321 9s. 11d. Payments in redemption of loans from Government, with the interest, salaries, office and other expenses made up a total expenditure of £215,319 13s. 8d. The capital value of ratable property was £27,681,447, and the total amount of assessment payable £124,864 14s. 11d.

Financial Districts.—A Bill was introduced into the Queensland Parliament on the 1st of November, 1888, to make provision for the division of the Colony into Financial Districts, and the dealing with Revenue and Expenditure within the Districts.

The following are the boundaries of the several Districts as given in the Bill, together with the area and population of each, according to the Census returns of 1891.

1. *Southern District* commences at Point Danger, and is bounded on the South by the Southern boundary of the Colony; on the West by the Western boundary of the Colony to a point due West of the confluence of the Thompson and Barcoo Rivers; on the North by a line from that point to the confluence of these Rivers, thence by the Cheviot, Warrego, Great Dividing, Carnarvon, and Bigge's Ranges to the Dawson River; thence by that river Southward to its junction with Cracow Creek; thence by southern watershed of Ross and Cracow Creeks and the ranges forming the northern and western watersheds of Rawbelle River and tributaries, and by Dawes Range to mouth of the Kolan River; thence by a line to Sandy Cape, and thence by the eastern boundary of the Colony to Point Danger.

This comprises the old Districts of East and West Moreton, Darling Downs, Maranoa, Warrego, South Gregory, Wide Bay, and Burnett.

Its area is $209,278\frac{2}{5}$ square miles, and population by census of 1891, 268,784—144,495 males, 124,289 females. In 1897-8 estimated population was 331,253. Local revenue, £1,762,956, expenditure, £1,623,149.

2. *Central District*, the southern boundary, commences at the mouth of the Kolan River, and is the same as the north boundary of the Southern District; thence on the west by the west boundary of the Colony; northwards to the twenty-first parallel of latitude; thence on the north by that parallel to the Selwyn Range; thence by that range, Kirby's Range and continuation ranges easterly again to the twenty-first parallel, by which it continues to the Great Dividing Range, and along that to the southern watershed of the Cape River; thence to the confluence of Belyando and Suttor Rivers; thence by the Suttor to its head in Leichhardt Range, by which and the watershed of Funnel Creek and tributaries it continues to Cape Palmerston; thence by east boundary of the Colony to Sandy Cape and west to the Kolan.

This comprises the old Districts of Port Curtis, Leichhardt, South Kennedy, Mitchell, and North Gregory.

Its area is $208,980\frac{2}{3}$ square miles, and the population by census of 1891, 46,857—28,423 males, 18,434 females. In 1897-8 estimated population was 57,610. Local Revenue, £660,248. Expenditure, £451,482.

3. *Northern District* is bounded on the south by the northern boundary of the Central District; thence on the west by the continuation northwards of the western boundary of the Colony and thence by the northern and eastern boundaries of the Colony to a point east of Cape Palmerston.

This comprises the old Districts of Cook, Burke, and North Kennedy.

The area is $250,237\frac{4}{5}$ square miles, and population by census of 1891, 78,077—55,414 males, 30,180 females. In 1897-8, estimated population was 95,837. Local Revenue, £704,293. Expenditure, 637,073.

The Bill did not pass, but the Divisions are now generally, as well as in some respects officially, recognised.

Climate.—The climate resembles in some respects that of Madeira, and there is an absence of the hot winds from which the other Australian colonies frequently suffer; but with the exception of the large tablelands, which enjoy a more temperate climate, the weather is very warm. The temperature is more *constant* than in many other regions within the same isothermal lines. This equalization is due partly to the sea breeze tempering the heat of summer, and partly to the copious rains which fall during the hottest months of the year. During a large proportion of the year, the weather is fine, the sky cloudless, the atmosphere dry, elastic, and exhilarating. The summer months, December, January, and February, are hot, and towards the end of February, when the rainy season begins to set in, the weather is oppressive. The winter season, when dry (as it generally is), is very agreeable. The mornings and evenings are cool. During the day the air is warm and balmy, the sky brilliantly blue, and the atmosphere singularly transparent. Practically the divisions of the year, so far as heat and cold are concerned, are the opposite of the seasons in Great Britain. The colony is free from endemic diseases, and epidemics are of rare occurrence. The diseases incidental to childhood are usually very mild in their character and short in their duration. The climate is described as everywhere favourable to the European constitution; and in the incipient stage of consumption it usually affords great relief, especially if the patients are sent directly to the Darling Downs, say around Dalby, where an altitude of over 1,100 feet above mean sea level is found. At this place the Government have erected a sanatorium for consumptives, and good results are confidently expected. For some types of consumptives prolongation of life is probable—as medical men will readily understand when it is stated that in many districts west from the Main Range in Southern Queensland the mean amount of moisture during the day for many months ranges from between 10 per cent. and 20 per cent., and the temperature, although trying on occasions by day time, is during the night highly beneficial and conducive to recuperation by sleep. The rate of mortality will compare favourably with other parts of the world; the death rate for the colony for 1899 being 12·07 per 1,000, the average for the past five years being 11·89. At the time of the census taking, only 3·90 persons were returned as suffering from sickness or accident. This is at the rate of 9·91 in every 1,000 persons. Although the latitude of the southern boundary of the colony is not higher than 29° S., the mean temperature is low, as compared with many places more distant from the equator. In the more northern parts, especially on the low lands, the heat of the tropical sun is too great to be comfortable to English constitutions, especially in the case of newly-arrived immigrants. The

mean reading of the barometer at Brisbane is about 30·02″; and the mean shade temperature during the past twelve years was 67·0°. In Brisbane during 1899 the mean shade temperature was 68·3°. The mean reading of barometer (corrected and reduced to 32° Fah. and mean sea-level) during 1899 was 30·056. The total rainfall for the year 1899 was 38·85 inches on 141 days. The prevailing winds were southerly. The mean rainfall during the last forty years has been about 51·01 inches.

In connection with the weather reports a chief weather bureau is in operation in Brisbane under the direction of Mr. Clement Wragge, the Government Meteorologist. There are now upwards of 17 first order observatories, 45 second order, and 69 third order—in all there are 225 standard rain gauges—in North Queensland, and 422 in South Queensland, and others are being added. Daily forecasts are published of the weather of the Colony, and also for Australasia, and as a rule these are found to be very reliable, being verified to the extent of 80 to 85 per cent.

It may be said that there are two well-defined seasons of growth in the colony, each with its spring, summer, autumn, and winter, and each maturing its own class of crop. The cereals and British vegetables are sown, come to maturity, and are harvested between the end of August and the 1st of March. Native pastures, foliage plants and indigenous vegetation generally start into spring growth about the end of August, mature during January or February, and languish or become dormant during the winter months. These double seasons are particularly well defined in the elevated districts of Queensland.

Character of Land and Products.—The country as regards the coastal districts is fairly watered, being intersected by numerous streams and rivers. Several of the rivers are broad, and navigable for many miles inland. The banks are very fertile having long stretches of scrub-bearing lands, that, when cleared and cultivated, grow the sugar-cane and other crops in abundance. The soil and climate are suited for the production of a large variety of articles of general commercial value, such as wheat, barley, oats, maize (Indian corn), tobacco, coffee, rice, potatoes, arrowroot, sugar, and cotton. All kinds of semi-tropical and English fruits and vegetables are abundantly grown. Among the former may be mentioned the banana, pineapple, peach, loquat, guava, mango, passion fruit, fig, melon, Cape gooseberry, orange, citron, lemon, mulberry, sweet potato, and yam. The land lying westward of the coast range consists principally of elevated plateaux of plain land, sparsely timbered, but well grassed.

The Pacific, or east coast portion, occupying nearly the whole of the eastern seaboard of the colony, has a great variety of soil and climate. Between sea and range there is some good agricultural land; westward of the range is elevated tableland, principally wide plains, well grassed and fairly watered. The first settlement of the colony was in the neighbourhood of Moreton Bay, and the course of settlement rapidly extended itself thence. This portion of the colony offers advantages for agriculture and pastoral pursuits, and also for mining. In the district are raised European as well as tropical products.

Of late years the character of the country inland has been wonderfully changed through deep borings having revealed almost unlimited supplies of subterranean waters. Hundreds of bores have been sunk by the Water Supply Department and private enterprise, and with few exceptions have resulted in the finding of water. In fact, there is every reason to believe that the whole of the Western district will in time to come have a fair supply of water derived from underground streams or reservoirs. In 1898 it was estimated that there were 711 bores of all classes in the interior, aggregating 835,858 feet, equal to 158·31 miles. The total flow of water is now estimated at about 268 millions of gallons per day.

Federation.—From the inception of the Federal movement Queensland may be said to have played a leading part. Indeed, the framework of the present Commonwealth Bill is largely the work of Queensland statesmen. For one reason or other, however, though she has been represented at most of the Conventions, the attempts to carry an Enabling Bill have been frustrated until 1899. To a large extent this has been due to a combination of the Protectionist party with a section of those who have been endeavouring for years to achieve Separation. A special Session of Parliament was held in the earlier part of 1899, when an Enabling Bill based on a more liberal franchise than obtains in regard to Parliamentary elections was accepted, and on September 2nd this Bill, with the Commonwealth Bill attached, was submitted to the people. The complete returns were made known on the 2nd October, and these gave a majority in favour of the acceptance of the Commonwealth Bill of 7,492:—For, 38,488; against, 30,996; informal, 348. An address to the Queen was accordingly submitted to the Legislature and adopted. During 1900 the Hon. J. R. Dickson, C.M.G., paid a visit to England as Queensland representative in the Federal Delegation, to see the Imperial Act passed through the British Parliament, and a Bill providing for the Federal Elections was passed through the Queensland Legislature on October 31st, 1900.

The Indigenous Vegetation.—Useful plants are in great variety, valuable timbers abound, furnishing woods suitable for all purposes to which that material is applied. Grasses and other fodders are numerous in kind and rich in nutritive properties. The indigenous fruits are not few, and compare favourably with similar products of other countries. The flowers of many of the trees, shrubs, and other plants are most attractive, and worthy of culture on this account, while the foliage of others possesses the usual grandeur of tropical growth. A brief sketch of the Flora, however, is here given under separate headings:—

Timbers.—The Myrtacious genus Eucalyptus, of which 60 species are found in this colony, furnish the greater part of what is designated "Hard-woods," the kinds being variously termed "Box," "Gum," "Ironbark," "Bloodwood," "Tallow-wood," "Stringy-bark," &c. These are mostly trees of large size. Other large trees of the order which furnish hard, durable timber are:—The broad-leaved "Tea-tree" (*Melaleuca leucadendron*) and others, "Swamp Mahogany" (*Tristania suaveolens*), "Brisbane Box" (*T. conferta*), "Turpentine" (*Syncarpia laurifolia*), "Peebeen" (*S. Hillii*), "Penda" (*Xanthostemon oppositifolius*). The above are those most generally cut at saw-mills. Other orders, however, furnish equally serviceable, large-sized timber, particularly the following:—"Sour Plum" (*Owenia venosa*), "Red Cedar" (*Cedrela Toona*), "Crow's Ash" (*Flindersia australis*), "Burdekin Plum" (*Pleiogynium Solandri*), "Bean Tree" (*Castanospermum australe*), "Johnstone River Teak" (*Afzelia australis*), "Ringy Rosewood" (*Acacia glaucescens*), "Black Walnut" (*Cryptocaria Palmerstoni*), "Hill's Teak" (*Dissiliaria baloghioides*). Some of the trees which furnish wood suitable for carving or engraving purposes:—"Native Pomegranate" (*Capparis nobilis*) and *C. Mitchelli*, *Pittosporum rhombifolium*, *Bursaria incana*, "Native Orange" (*Citrus australis*), "Sour Plum" (*Owenia acidula*, *Ximenia americana*, *Denhamia pittosporoides*), "Ivory Wood" (*Siphonodon australe*, *Heterodendron oleæfolium*, and *H. diverrifolium*), *Guettarda putaminosa*, *Sideroxylon Pohlmanianum*, Maba, several species of *Daphandra repandula*, and others. Many of the Myrtaceous trees also furnish useful wood for the coach-builder and wheelwright—viz., "Red Bottle-Brush" (*Callistemon lanceolatus*), "Tallow-wood" (*Eucalyptus microcorys*), "Woolly Butt" (*E. botryoides*), "Spotted Gum" (*E. maculata*), "Brisbane Box," and *Tristania conferta*. Several of the Flindersias are also used for these purposes. Some of the trees which produce wood suitable for tool-handles are:—*Flindersia Oxleyana* and *F. Schottiana*, *Elæodendron australe*, several *Cupanias* and *Ratonias*, *Barklya springifolia*, *Terminalia Muelleri*, *Tristania laurina*, and *T. exiliflora*, "Rough Stringy-bark" (*Eucalyptus Baileyana*, *Mallotus poluadenus*). Some of the trees of large size which furnish most of the soft-wood used in buildings, or which might be used for that purpose, are:—*Calophyllum tomentosum*, "Stave Wood" (*Tarrietia*), several varieties; "Maiden's Blush" (*Echinocarous australis*, *E. Woollsii*), "Brisbane Quondong" (*Elæocarpus grandis*, *E. Kirtonii*), a large tree of Mount Mistake, "Johnstone River Almond" (*E. Bancroftii*), "White Cedar" (*Melia composita*), several species of *Dysoxylon* and *Flindersia*, "White or Milk-wood" (*Alstonia scholaris*), "Beech" (*Gmelina Leichhardtii*), *Cinnamomum Oliveri* in the South, and *C. Tamala* in the North, "Cudgerie" (*Hernandia bivalvis*), "Dundathu Pine" (*Agathis robusta*), "Hoop Pine" (*Araucaria Cunninghamii*), "Bunya Pine" (*A. Bidwillii*), "She Pine" (*Podocarpus elata*), "Black Pine" (*P. pedunculata*), "Cyprus Pine" (*Callitris robusta*). Some of the trees which furnish woods particularly suited for cabinet work:—*Wormia alata*, *Calophyllum inophyllum*, and *C. tomentosum*, *Erythroxylon australe* and *E. ellipticum*, *Medicosma Cunninghamii*, "Satin Wood" (*Zanthoxylum brachyacanthum*, *Geijera Muelleri*, "Kedgy-Kedgy" (*Dysoxylon Muelleri*), "Red Cedar" (*Cedrela Toona*), "Yellow Wood" (*Flindersia Oxleyana*), and many other species growing both within and without the tropics, *Villaresia Moorei*, "Tulip-wood" (*Harpulia pendula*), "Burdekin Plum" (*Pleiogynium Solandri*), *Daviesia arborea*, *Bauhinia Hookeri*, "Weeping Myoll" (*Acacia pendula*), *A. stenophylla*, *A. glaucescens*, and many others), "Acacia Cedar" (*Albizzia Toona*), "Dead Finish" (*A. basaltica*), *Terminalia oblongata*, and several other species; *Macropteranthes Fitzalani*, "Tom Russell's Mahogany" (*Lysicarpus ternifoleus*). *Homelium vitiense*, "Musk-wood" (*Marlea vitiensis*), "Leichhardt-tree" or "Canary-wood" (*Sarcocephalus cordatus Plectronia*), several species, *Eremophila*, several species, *Daphnandra micrantha*. The following genera of Proteaceæ, many of which are large trees, furnish extremely handsome cabinet woods, besides being valuable, in some cases, as staves for casks:—*Macadamia*, *Helicia*, *Orites*, *Grevillea*, *Carnarvonia*, *Buckinghamia*, *Darlingia*, *Musgravea*, *Cardwellia*, *Stenocarpus*, *Embothrium*, and *Banksia*, "Broad-leaved Cherry" (*Exocarpus latifolia*), *Bridelia exaltata*, "Scrub Bloodwood" (*Baloghia lucida*), "Cockspur Thorn" (*Cudrania javanensis*), "Thready-barked Oak" (*Casuarina inophloia*), "Stringy-barked Pine" (*Callitris Parlatorei*), and the common "Cypress Pine" (*C. robusta*), "She Pine" (*Podocarpus elata*), "Black Pine" (*P. pedunculata*), "Dundathu Pine" (*Agathis robusta*), and the Northern species *A. Palmerstoni*, "Hoop Pine" (*Auracaria Cunninghamii*), "Bunya Pine" (*A. Bidwillii*). Besides the wood value of the trees and shrubs, a large number furnish tanning barks, exude useful gums, &c. The resin exuded by others is often a useful commodity, both medicinally and technically, while the milky sap of some might be manufactured into rubber. The tannin barks are mostly from the various kinds of Acacias, but so far as experiments have been made the Queensland species, of which there are about 120, are not so rich in tannin as species belonging to the more southern parts of Australia. Three "spice barks" are in use for flavouring in the Northern parts: the bark of *Dapnandra aromatica*, a Monimiaceous tree, and of the Lauraceous trees *Cinnamomum Tamala*, and in the southern parts of the colony the bark of *Cinnamomum Oliveri*; all three are known locally as "sassafras." Many indigenous plants are used in domestic medicines, and some of the following genera by a few medical men:—*Eucalyptus*, *Cinnamomum*, *Sideroxylon*, *Alstonia*, *Duboisia*, and *Piper*.

Fodders.—With regard to plants of this character no country is better furnished; the grasses are numerous in species, and the greater part of them highly nutritious, besides which there are many herbs and a large number of salt bushes and other shrubs, which form excellent auxiliaries to the food supply for

stock. It is, however, to the grasses that the excellence of the pastures is mainly due; therefore a few of the most valuable may be referred to. On the extensive plains where the best species abound may be seen a large number of the genus Panicum, of which the following are looked upon by pastoralists with the greatest favour:—"Vandyke grass," a form of *P. flavidum*; "Cockatoo grass" (*P. semialatum*), the vernacular name given on account of a species of cockatoo in some parts of North Queensland feeding upon its roots. "Barley grass" (*P. decompositum* and *P. distachyum*); "Blue grass" (*Andropogon sericeus, A. pertusus, A. refractus*, and *A. crianthoides*); "Russell River grass" (*Paspalum galmarra*), a North Queensland species nearly allied to the South American species *P. paniculatum, P. minutiflorum*, and *P. brevifolium*; *Agropyrum scabrum*; "Tall Oat grass" (*Anthistiria avenacea*), "Landsborough grass" (*Anthistiria membranacea, Danthonia racemosa, D. pilosa, D. pallida*, and *D. semiannularis*); *Sporobolus Benthania*, an excellent species found near the Diamantina and Georgina rivers, and *S. actinocladus; Stipa aristiglumis, Leptochloa chinensis, Microlæna stipoides*; "Early Spring grass" (*Eriochloa punctata*), with the following "Love grasses": *Eragrostis Brownii, E. chætophylla, E. pilosa*, and *E. tenella*. The "Mitchell grasses" (*Astrebla pectinata*, and its varieties *Triticoide*), the "Wheat" (*Elymoides*, the "weeping," and *Curvifolia*, the "curly") are those most usually extolled for extraordinary vitality, but some stockholders consider that the "Sugar grass," or "Brown Top" (*Pollinia fulva*), surpasses them in its quickness of bursting into leaf with the first showers of rain after being dormant for months.

Fruits.—It is not an uncommon thing to find persons speaking and writing of the Australian continent as one wanting in useful indigenous fruits and other food plants. Such persons, it may be safely said, know little or nothing of Queensland, for here food plants abound, and without noticing the large number of the fruits which at one time constituted the food of the aborigines, there are a good number which are used by the white population in the manufacture of jam, wine, and even eating in the raw state. Of course, none will compare with fruits which have been in cultivation for ages past; but some, by selection and careful cultivation, might, after a time, form valuable adjuncts to the present fruit supply. A few of the more conspicuous may here be mentioned in alphabetical order, according to their systematic names, viz.:—*Antidesma Bunius, A. Dallachyanum, A. erostre, A. Ghasembilla*, and *A. parvifolium*, called cherries or currants, according to the size of the fruit they bear. The jelly made from the fruit of some species is in no wise inferior to that made from the European Red Currant (*Atalantia glauca*); the Kumquot or lime of Southern Downs country makes a peculiarly nice flavoured preserve. Of the allied genus Citrus two species are met with in the south—*C. australis*, which has a round fruit one or two inches in diameter; the other, *C. australasica*, with long, finger-like fruits, three or more inches long and about one inch in diameter; of this there is a red variety. The third, *C. inodora*, is only met with in the tropics; the fruit of this is somewhat of an oblong form, often two and a half inches long by one and a quarter in diameter. All these fruits are juicy, and of an agreeable sharp acid flavour. "Davidson's Plum" (*Davidsonia pruriens*) is a fruit with a sharply acid rich plum-coloured juice, sometimes attaining the size of a goose egg. Of the genus Eugenia over thirty are indigenous, and fully one-third produce more or less useful fruits. One Fig, *Ficus gracilipes*, produces a useful fruit for jam and jelly making. Two Garcinias are recorded as indigenous, but of one only, *G. Mestoni*, is the fruit known. This fruit is of a depressed globular form, sometimes three inches in diameter, very juicy, and of a pleasant flavour. *Leptomeria acida*, one of the very early fruits used by Australian colonists, is met with in some localities. The "Finger Berry," or "Native Loquot" (*Rhodomyetus macrocarpa*), makes a good jam, but is in bad repute for using in a raw state, perhaps owing to a peculiar fungus at times found to infest the berries. The Queensland Raspberry is the widely spread *Rubus rosæfolius*, the fruit of which is rather insipid, but largely used. The representatives of the genus Vitis, or Grape, all belong to the sub-genus Cissus; several of them, although somewhat acrid, are useful for jam and jelly making; probably the best for the purpose is one met with near the Walsh River, *V. Gardineri*; this is said to bear bunches from one to two pounds in weight, the berries being large and of pleasant flavour. A large number of nut-like fruit are used by the aborigines for food, but the only one used by the white population is the fruit of *Mocadamia ternifolia*, the "Queensland Nut," the shell of which is too hard to allow of its being brought into general use.

Essential Oils.—The foliage of many plants yield by distillation useful essential oils, particularly Eucalypts, Backhousias and other Myrtaceous plants, as well as some belonging to Rutaceæ and Labiatæ, especially the genus Mentha.

Ornamental Plants.—Having briefly glanced at the economic character of the flora, a few of the many plants worthy of cultivation on account of their beauty may be mentioned under headings, according to their habits or the situation in which they grow in the wild state:—Aquatics: Limnanthemum crenatum (white), Monochoria cyanea (blue), Nelumbium speciosum (pink), Nymphœa gigantea (blue), N. Lotus (white), Utricularia flexuosa (yellow). Semi-Aquatic: Blanfordia flammea (flame-coloured), Burmannia disticha (blue), Drosera binata (white), Pbaius grandifolius (bronze), P. grandifolius var. Bernaysii (yellow), Stylidium debile (pink). Climbers: Asparagus racemosus (white), Capparis sarmentosa (white), Clematis glycinoides (white), Eustrephus latifolius (bluish), Faradaya splendida (white), Galeola foliata (brownish), Hardenbergia monophylla and H. retusa (blue), Hoya australis (white), H. Nicholsoniæ (yellow), Pentatropis atropurpurea (dark purple), Pothos Loureiri (fruit red), Rhaphidophora australasica and R. Lovellæ (showy foliage), Tecoma jasminoides (white, with dark centre), T. Hillii (purplish), T. australis, particularly the variety *linearis* from Herberton. For Large Tubs, Pots, &c.: Brassaia actinophylla (Umbrella tree), Carnarvonia araliæfolia. All the several kinds of Macrozamia and Cycas, Doryanthes Palmeri, and D. Guilfoylei, Davidsonia pruriens, Diplanthera tetraphylla, Grevillea pinnatifida, Hicksbeachia pinnatifolia, Musgravea stenostachya, Penax Murrayi, Stenocarpus sinuatus, Weinmannia Biagiana, Wormia alata. All the palms are suitable for this work, and some are very beautiful. Epiphytes: Cymbidium albuciflorum and others, Dendrobium Adæ, D. bigibbum, of which there are many varieties, D. æmulum, D. Tofftii, D. tetragonum, and others, Dischidia nummularia, Hydnophytums, Myrmecodias, and others. For Hanging Pots or Baskets; Dentella repens, Geophila reniformis, Nepenthes (Pitcher Plants), seven kinds, viz.: N. albo-lineata, N. Alicæ, N. Bernaysii, N. Jardinei, N. Kennedyi, N. Moorei, and N. Rowanæ, Viola hederaceæ. Herbaceous Perennials (including Bulbs, Tubers, and Annuals): Artanema fimbriatum, Brachycome Stuartii and B. multifida, Brunonia australis, Calanthe veratrifolia, many Caladenias and Crinums. Calostemma lutea, Calutis scapigera, Curcuma australasica, Dipodium punctatum, and the yellow variety Hamiltonianum, several Diuris, Eurycles amboinensis and E Cunninghamii, Goodenia grandiflora, Hibiscus rhodopetalus, Ruellia primulacea, Sowerbœa juncea, Spiranthes australis, Spathoglottis Paulinæ, Tapeinocheilos pungens, Trichinium semilanatum. Shrubs of Large Size: Acacia linifolia, A. pendula, A. podalyriæfolia, A. spectabilis, Banksia collina, Capparis nummularia, Cyanocarpus Nortoniana, Drimys dipetala, Eremophila polyclada, Graptophyllum Earlii. Grevillea Banksii, Hibiscus splendens, Lagerstrœmia Archeriana, Macadamia Youngiana, Morinda citrifolia, Olearia Nernstii, Crites fragrans, Randia chartacea, Tabernæmontana orientalis, Turræa pubescens. Rock Plants: Isotoma axillaris, Pelargonium australis, Bæa hygroscopica, Dendrobium linguiforme, D. Kingianum, D. undulatum, Sarcochilus Ceciliæ, S. Hartmanni. Shrubs of Small Size: Boronia pinnata, Eremophila maculata, Eupomatia Bennettii, Gastrolobium grandiflorum, Gompholobium latifolium and G. virgatum, Gossypium Stuartii, Grevillea leiophylla, Harpullia frutescens, Lomatia silaifoliaa Myrtus tenuifolia, Olearia hygrophila, Pavonia hastata, Petrophila Shirleyæ, Phaleria Blumei, Prostanthera nivea, Pultenæa, several Rhododendron Lochæ, Sophora Fraseri, Tetranthera thymifolia, and Zieria obcordata. Trailing or Prostrate Plants: Goodenia hederacea, Rhynchosia minima, Scævola suaveolens, Tribulus cistoides, Vigna vexillaris. Convolvulus erubescens. Trees of Large Size: Some of the most ornamental are: Alstonia scholaris, Aleurites moluccana, Agathis robusta, Araucaria Bidwilli (Bunya Pine), A. Cunninghamii (Hoop Pine), Castanospermum australe, Cedrela Toona, Elæocarpus Bancrofti, Eucalyptus Raveretiana, Erythrina indica, Ficus Watkinsiana, Flindersia Schottiana, Gmelina Leichhardtii, Nephelium Lauterերianum, Sarcocephalus cordatus, Syncarpia Hillii, Tarrietia actinophylla, and Weinmannia lachnocarpa. Trees of Medium Size: Barklya syringifolia, Bauhinia Hookeri, Casuarina torulosa, Callitris Parlatorei, Capparis Mitchelli, Cupania pseudorhus, Erythrina vespertilio Ficus gracilipes, Grevillea robusta, Harpullia pendula, Hymenosporum flavum-Owenia acidula, Pagetia monostylis, Pithecolobium grandi, florum, Pittosporum rhombifolium, P. undulatum, Pleiogynium Solandri, Randia Fitzalani, Gardenia ovularis, Rhodosphaera rhodanthema, Ricinocarpus pinifolius, Sterculia trichosiphon, and Xanthostemon chrysantha. Under Shrubs: Bauera rubioides, Epacris obtusifolia, Frankenia pauciflora, Orthosiphon stamineus, Pimelea hæmatostachya, Solanum esuriale, Stackhousia monogyna, Teucrium racemosum, Westringia erimicola. Parasites: All the showy plants of this group are belonging to Loranthaceæ. Many species of Loranthus have bright-coloured flowers. Ferns: One-half of the kinds met with in Australia are found in Queensland, conjointly with one or other of the other colonies, one-fourth in Queensland, but not in the adjoining colonies, leaving only one-fourth of the whole as belonging to the other colonies without Queensland. It may also be remarked that the indigenous ferns equal in number those of New Zealand, and three times the number of those of Great Britain. Variegated foliage occurs in some of the indigenous plants so as to make them worthy of the horticulturist's attention, especially the following:—Hibiscus tiliaceus, Torchorus Cunninghamii, Acronychia lævis, Rubus rosiefolius, Tabernæmontana orientalis, Trema aspera, Cudrania javanensis, Geitonoplesium cymosum, Cordyline terminalis, Bacularia monostachya, Archontophœnix Cunninghamii, and several of the grasses.

Animals.—The mammalia of Queensland are similar to those of the other colonies, comprising several varieties of the kangaroo and opossum, the bandicoot, wombat, native bear, native cat, dingo, flying fox, flying squirrel, porcupine, the platypus, and other animals peculiar to Australia. Among the birds are the emu, plains bustard, scrub turkey, several kinds of eagle and hawk, parrot, parroquet and cockatoo, black swan, duck, heron, crane, pelican, pigeon (several species), quail, the great kingfisher, wattle bird, crow, regent, bower bird and lyre bird. Fossil remains discovered in the Darling Downs go to prove that in a distant age the Moa (*Dinornis*) existed in this part of the Continent. Snakes are plentiful, over sixty kinds, of which five are poisonous, have been enumerated; and there are many varieties of lizards. In some of the northern rivers alligators (or rather crocodiles) are numerous. Among the denizens of the sea are the whale, seal, dugong, shark, turtle (four kinds found in

Moreton Bay—keelback, sometimes of immense size and weight—loggerhead, tortoise and green turtle), groper, porpoise, sawfish and swordfish. In the rivers and bays are schnapper, jewfish, sole, bream, mullet, and other fish, besides oysters, crabs, and other crustaceans. For oysters Queensland has long been famous. Moreton Bay and Sandy Strait are the great nurseries and breeding grounds for oysters on the eastern seaboard of the Australian Continent. In Moreton Bay there are about 260 banks extending over 5,000 acres. The bêche-de-mer (trepang or sea-slug) abounds in Torres Strait. Mr. W. Saville-Kent reports that the total number of known species of fish that can be accurately described as pertaining to Queensland, falls but a few short of 900, embracing two-thirds of the entire marine and fresh water fauna of the Australian continent. Of these 900, over 300 species may be classified as of more or less value for human food. The insect world, as in other parts of Australia, makes up in number and variety any deficiencies in the larger animals; there are numerous kinds of ants, the so-called white ant being most destructive to wooden buildings, mosquitoes, spiders, moths and butterflies of large size and beautiful colours, locusts, grass-hoppers, and flies innumerable.

Population.—According to the full returns of the census taken on April 5, 1891, the population, exclusive of aborigines, was 393,718 persons—223,779 males, and 169,939 females, being a number in excess of the census taken on May 1, 1886, of 70,865 persons—33,435 males and 37,430 females. Among the population were 8,574 Chinese, of whom only 47 were females, 9,428 Polynesians, of whom 826 were females, and 1,864 other alien races, of whom 116 were females.

There were in all 80,653 dwellings, of which 2,224 were uninhabited. Of these dwellings, 439 were stone, 2,273 brick, 62,433 wood, 3,337 metal, and 6,938 were tents. Among the other dwellings are 247 ships, 289 drays, and 2,473 unspecified. The number of inhabited dwellings to the square mile was 0·12, and the average number of persons to each inhabited dwelling, 5·04.

The occupations of the people are thus generally stated:—

Engaged in government, defence, law, and protection	3,610
Ministering to religion, charity, health, education, art, and science	6,866
Engaged in supply of board and lodging, and rendering personal service	20,386
Engaged in business in connection with the Exchange, valuation insurance, loan, lease or custody of money, houses, land, or property rights	31,271
Industrial class, embracing all persons not otherwise classed, connected with the manufacture, construction, modification, or alteration of materials, so as to render them more available for the use of man	47,184
Agricultural class, embracing all persons mainly engaged in the cultivation or acquisition of food products, and in obtaining other raw material from natural sources	67,992
Indefinite class, comprising all persons who derive incomes from services rendered, but the direction of which services cannot be exactly determined	2,393
Dependent class, that is all persons dependent upon relatives or private charity, or who are supported at the expense of the State (among these are included 60,818 engaged in domestic duties, and 142,661 scholars and students	214,016

The birth-places of the people, so far as could be ascertained, were:—

Born in the Colony	176,971
Born in the other Australian colonies	28,336
Born in Great Britain	143,245
Born in Europe	22,085
Born in America	1,419
Born in India, China, and Japan	9,580
Born in other parts of Asia	137
Born in Africa	226
Born in Polynesia	9,338
Born in Malay Peninsula and Archipelago	1,171
Born in other countries	5
Born at sea	832
Birthplace unspecified	373

The conjugal condition of the people is thus stated:—Unmarried, 161,096 males, 105,605 females; married, 57,887 males, 57,596 females; widowers, 4,502; widows, 6,695; unspecified, 294 males, 43 females.

Early in 1901 it was intended that the census should again be taken.

The estimated population on Dec. 31, 1899, was 512,604—287,512 males, 225,092 females.

The following are the particulars of the coloured alien population as recorded for 1899:—Chinese, 971 males, 8 females (979); Pacific Islanders, 1,489 males, 48 females (1,537); Japanese, 155 males, 7 females (162); Javanese, 5 males, 2 females (7); and other Asiatic races, 288 males, 21 females (309). Totals, 2,908 males, 86 females; grand total, 2,994; 2,196 left the colony during the same period. The total coloured aliens in the colony is 25,164.

During the year 1899 there were registered, 13,899 births—7,128 males, 6,771 females; 6,144 deaths—3,943 males, 2,201 females; and 3,449 marriages.

Religion.—There is no State Church in Queensland. The voluntary system has prevailed since 1860, in which year an Act was passed abolishing State aid to religion. Those ministers who, at the time this Act was passed, were receiving stipends annually from the public treasury, continue to receive them so long as they officiate in the colony. (By the deaths of the recipients this has now become inoperative.) The only connection between Church and State is in the annual registration of ministers of religion to enable them to legally celebrate marriages. The voluntary system has hitherto worked to a certain extent satisfactorily; the members of the various denominations, as a rule, subscribing sufficiently to the funds for providing salaries for the ministers and church accommodation. In the towns, ample means exist for public worship for all denominations, but in the country districts there is much spiritual destitution, with which, owing to the wide area over which the sparse population is spread, it is found difficult to cope. Nearly all the leading religious denominations are represented in the colony.

According to the census of 1891, the religions of the people are thus stated:—Church of England, 142,555; Roman Catholic, 92,765; Presbyterian, 45,639; Wesleyan, 20,917; Congregational and Independent, 8,571; Baptist, 10,256; Primitive Methodist, 8,639; Methodist, 740; United Methodist Free Church, 572; Lutherans, 23,383; other Protestants, 2,956; Salvation Army, 4,021; other Christian sects, 3,242; Hebrew, 809; other religions, 1,379.

Sunday Schools.—There is a Sunday School attached to nearly every place of worship in the colony. No official returns are available.

Education.—The system of education in Queensland has, since January, 1876, when the Education Act came into operation, been placed under a special department, called the Department of Public Instruction, which is under the control of the Minister for Education. Education is free and secular. Under certain conditions religious instruction may be given to the children *out of school hours* by ministers or others (of this provision very little use is made). The Primary Schools are of two kinds—State schools, maintained wholly at the public expense, and Provisional schools, which up to the end of 1899 were only partially maintained by the public funds, but are now on the same footing as State schools in regard to subsidy. Provisional schools are subdivided into regular, part time, and special (the latter being for evening or special times). Non-vested schools are not now connected with the Department. The subjects taught in the State schools are reading, writing, arithmetic, algebra, Euclid, science, literature, English grammar, geography, history, elementary mechanics, object lessons, drill, gymnastics, and vocal music; and in the case of girls, sewing and needlework. The conditions for the establishment of a State school in any district are—The selection of a suitable site at a sufficient distance from any existing school; the permanent daily average attendance of not less than 30 children of school age, and the payment of a sum to the Minister amounting to four-fifths of the cost of erecting and furnishing the building. Local school boards and committees assist in the supervision and management of the schools. The teaching staff is comprised in three classes—classified, unclassified, and pupil teachers. For higher education the State also assists the formation and maintenance of establishments of a more advanced character than the primary schools. Upon the inhabitants of any district raising by subscription a sum of £1,000 for the purpose of establishing a grammar school in that district, the Government supplements it by double the amount for the erection of the necessary buildings; and if the sum of £250 per annum be guaranteed for three years as school fees, by responsible parties, the Government gives £500 per annum for the salaries of masters and current expenses. Brisbane, Ipswich, Toowoomba, Maryborough, Rockhampton and Townsville have availed themselves of this grant. In November, 1899, there were three successful competitors, out of ten candidates for Exhibitions to Universities. These exhibitions are of the annual value of £100, and are tenable for three years. They are open to all students under nineteen years of age who have resided two years in the colony. Scholarships, entitling the holders to three years' instruction in any one of the Grammar Schools, are annually competed for by children attending the primary schools. The necessary qualifications for candidates are—attendance at a State school for eighteen months and daily regular attendance for the six months previous to competing, and age below fourteen. By more recent regulations the number of State school scholarships is limited to 36, three-fourths being open to boys and one-fourth to girls. There are also eight State school bursaries, six open to boys and two to girls, entitling the holders to free education the same as scholarship, together with an allowance not exceeding £30 per annum; and four State Bursaries to the Queensland Agricultural College,

entitling the holders to three years free board and instruction as resident students at any agricultural college endowed by the State. In December, 1899, 248 candidates (162 boys and 86 girls) presented themselves for examination for grammar school scholarships, of whom 27 boys and 9 girls were successful in passing. Six boys and two girls were awarded bursaries. Girls' grammar schools have been established in Brisbane, Maryborough, Ipswich and Rockhampton.

A movement is on foot for the establishment of a University in Queensland, as "the needful and crowning work of the educational system," Parliament having during the 1898 Session passed a vote to cover the preliminary cost.

On January 1st, 1900, there were in all 888 primary schools in operation (being an increase of 45 schools, comprising 399 State or vested schools, 430 Provisional schools, and 4 special schools (reformatory and aboriginal schools). The number of teachers employed was 2,012—934 males and 1,078 females; of these 563 were pupil-teachers. The number of children on the roll during the year was 103,544. The average daily attendance was 63,133—33,231 boys, and 29,902 girls. State aid was withdrawn from the non-vested schools from Jan. 1, 1881. Nearly the whole of these schools are Roman Catholic, and are continued on, independently of the Department. The total expenditure on primary education during the year was £248,899; the average cost in the State schools of the education of each child, on the basis of annual enrolment, was £2 3s. 6d., being a decrease of 7d. per head on the cost of 1898; based upon the daily average attendance, it was £3 11s. 5¾d. per head. According to the census of 1891, the educational status of the people was as follows:—274,813 persons could read and write; 14,535 persons could read only; 102,136 persons could neither read nor write. In this latter class are included children under 3 years of age (37,236), also 17,857 Chinese, Polynesian, and other alien races.

The private schools on January 1, 1900, numbered 166—16 boys, 18 girls, and 132 mixed; 572 teachers—81 male, 491 female; an aggregate attendance of 5,547 boys and 7,740 girls, and an average attendance of 4,713 boys and 6,676 girls.

There are now ten grammar schools, viz., two at Brisbane (boys and girls), two at Ipswich (boys and girls), two at Maryborough (boys and girls), two at Rockhampton (boys and girls), and one each at Toowoomba and Townsville (for boys only). During 1899 these institutions had 879 pupils, and there were 74 teachers. The total receipts for the year 1899 were £25,469 18s. 1d., the expenditure on them was £25,225 0s. 1d. To the end of 1899 these institutions had been subsidised from the State funds to the extent of £196,131 9s. 9d. (some portion of which being loaned is in course of repayment). The average annual cost of each pupil, based upon the fees paid by parents, endowments, subsidies, &c., is about as follows:—Brisbane (boys), £20, Brisbane (girls), £25 15s. 4d.; Ipswich, £20 1s. 4d.; Maryborough, £29 15s.; Rockhampton, £37 15s.; Toowoomba, £41 16s.

During 1899 the aid granted by Government to the existing grammar schools was £1,000 each; £10,000 in all.

Mechanics' Institutes.—There are 115 institutions, comprising schools of art, free libraries, mechanics' institutes, and miners' institutes, having an aggregate of 9,892 subscribers, at rates averaging about 15s. per annum, and 144,041 books in the libraries. During 1899 these institutions received Government aid to the extent of £2,744 15s. 2d. The total amount received from the State funds prior to this was £86,611 12s. 1d. The total receipts during 1899 were £15,782 9s. 6d., and the expenditure £15,767 19s 2d.

In connection with the Schools of Arts, Technical Colleges have been established in several of the leading towns. The subjects taught are freehand and mechanical drawing, chemistry, mathematics (which includes practical mensuration), Latin, French, German, shorthand, typewriting. painting, carpentery, elementary arithmetic, writing. laundrying and cooking. During the year 1899 the classes were attended by 3,817 students. A school of mines has (dating from 1900) been established at Charters Towers.

Agriculture and Stock.—The agricultural returns for the year ending December 31, 1899, were:—Total extent of land under cultivation, 455,645 acres; land in fallow, 34,899 acres; total extent of land under crop, 420,746 acres. Wheat for grain, 52,527 acres, produce 614,414 bushels; oats for grain, 714 acres, produce 10,712 bushels; barley, 7,474 acres, produce 118,443 bushels; maize, 110,489 acres, produce 1,965,598 bushels; rye, 198 acres, produce 2,391 bushels; rice, 319 acres, produce 9,275 bushels; potatoes, 10,766 acres, produce 22,675 tons; potatoes, sweet, 3,919 acres, produce 19,899 tons; pumpkins, 10,167 acres, produce 38,040 tons; sugar-cane, 110,657 acres, produce 123,289 tons; arrowroot, 431 acres, produce 4,669 tons; tobacco, 745 acres, produce 6,551 cwt.; coffee, 495 acres, produce 104,981 lbs.; hay, all kinds, 58,939 acres, produce 103,409 tons; green fodder, 35,514 acres; vines, 2,003 acres, produce 3,230,627 lbs.; bananas, 5,802 acres, produce 36,301,735 dozen; pineapples, 994 acres, produce 401,692 dozen; oranges, 2,324 acres, produce 1,420,839 dozen; gardens and orchards 3,761 acres.

Compared with the returns for the previous year there are the following differences:—

INCREASES.—Land under cultivation, 46,358 acres; land under crop, 57,492 acres; wheat, 6,308 acres; oats, 443 acres; barley, 4,530 acres; maize, 7,654 acres; potatoes, English, 2,805 acres; potatoes, sweet, 223 acres; pumpkins, 2,563 acres; tobacco, 128 acres; coffee, 63 acres; hay, all kinds, 23,676 acres; green fodder, 8,534 acres; bananas, 538 acres; oranges, 52 acres; other crops, 893 acres; gardens and orchards, 260 acres.

DECREASES.—Land in fallow, 11,134 acres; rye, 101 acres; rice, 544 acres; sugar-cane, 355 acres; arrowroot, 24 acres; pineapples, 136 acres.

Of the produce the principal increases were:—Wheat, 7,402 bushels; oats, 6,665 bushels; barley, 83,578 bushels; potatoes, English, 6,262 tons; pumpkins, 14,670 tons; tobacco, 3,275 cwt.; coffee, 48,429 lbs.; hay, all kinds, 33,174 tons.

The decreases were:—Maize, 286,883 bushels; rye, 1,488 bushels; rice, 28,858 bushels; potatoes, sweet, 170 tons; sugar, 40,445 tons; arrowroot, 1,447 tons; grapes, 885,591 lbs.; bananas, 10,245,355 dozen; pineapples, 61,060 dozen; oranges, 106,030 dozen.

The average yield per acre was:—Wheat, 11·70 bushels; oats, 15·00 bushels; barley, malting, 16·64 bushels; barley, other, 12·59 bushels; maize, 17·79 bushels; rye, 12·08 bushels; rice, 29·08 bushels; potatoes, English, 2·11 tons; potatoes, sweet, 5·08 tons; sugar, 1·55 tons; arrowroot, 10·83 tons of tubers; tobacco, 8·79 cwt.; coffee, 212 lbs.; pumpkins, 3·74 tons.

LIVE STOCK.—The return of live stock for the year ending December 31, 1899, was:—Horses, including foals, 479,127; cattle, including calves, 5,053,836; sheep, including lambs, 15,226,479; pigs 139,118. These figures show the following variation on the previous year:—Horses, decrease, 1,342; cattle, decrease, 517,456; sheep, decrease, 2,326,129; pigs, increase, 12,037.

In 1897 the land held under lease by the squatters for sheep and cattle-rearing purposes comprised, in the Settled and Unsettled Districts, 2,377 runs, of the area of 362,321¼ square miles; the rent of which aggregated £302,457 6s. 6d. Of this total there were in the Settled Districts 11 runs, with an area of 927⅝ square miles, for which the rent paid was £1,206 4s. 2d.

Sugar Industry.—During the year ended June 30, 1899, the 12 sugar districts produced a total of 164,241 tons of sugar, an increase of 66,325 tons over the previous year's manufacture. There were 105,896 acres of land under cane, and 80 mills were in operation. For the year ending June 30, 1900, the figures were:—Sugar produced, 124,870 tons; extent of land under cane, 104,222 acres; sugar-mills, 70.

Tobacco.—For the year ended June 30, 1899, 13 tobacco factories were in operation, viz., nine in Brisbane, one in Ipswich, one in Mackay, one in Townsville, and one in Texas. The quantity of tobacco manufactured was 560,146 lbs.; cigars, 2,766 lbs.; cigarettes, 18,881 lbs.; and snuff, 120 lbs. The number of registered growers of tobacco was 204; 816 acres were under tobacco, and produced 682,978 lbs. of cured tobacco leaf. The figures for the year ended June 30, 1900, were:—Fourteen tobacco factories, 637,717 lbs. of tobacco, 2,282 lbs. of cigars, 25,146 lbs. of cigarettes, and 239 lbs. of snuff manufactured; 191 registered growers, 618 acres under tobacco, and 382,169 lbs. of cured leaf produced.

Mineral Resources.—The first important discovery of gold was made at Canoona, about 35 miles from Rockhampton in July, 1858. At the end of 1853, Mr. Stutchbury, the Government Geologist of N. S. Wales, is reported to have found gold near Port Curtis; this is said to be the first authenticated discovery of gold in the colony, the next is reported to have been in August, 1856, on Canning Downs. Late in 1857 or early in 1858, gold was found by a miner who accompanied Captain O'Connell when making a tour of his district. In the year 1867 the Government offered rewards, varying from £200 to £1,000, for the discovery of new and payable goldfields in Queensland. This led to the discovery, early in the year, of several goldfields; and in September, of Gympie, a locality about 120 miles from Brisbane, where a nugget weighing 100 lbs., valued at £4,000, was found near the surface. The gold-bearing quartz at Gympie is very rich, and numerous claims are still very profitably worked, and new deposits have been found in lower levels where a few years ago it was thought impossible that gold would be found. There are at the present time upwards of twenty-five gold-fields in the colony, comprising the Palmer, Etheridge, Charters Towers and Cape River, Ravenswood, Cloncurry, Coen, Starcke and Cocoa Creek, Mareeba, Hodgkinson, Normanby (Bowen), Mulgrave, Russell Extended, Grass Tree (Mackay) and Croydon (the last named was discovered by Messrs. Brown and Aldridge in October, 1885), Clermont (Peak Downs), Rockhampton, Gladstone fields, Gympie, Kilkivan, Glastonbury, Pikedale, Talgai, Nanango, Eidsvold, Paradise and Jordan Creek (alluvial), on the Johnston River, discovered early in 1898, and from which upwards of 2,100 ounces alluvial have since been obtained. At Horn Island, one of the Prince of Wales's group lying to the SE. of Thursday Island, gold both in alluvial and quartz has been found, but principally in the reefs in a finely divided state. A large battery has lately (1900) been erected there. Surfacing and alluvial digging is decreasing, while more attention is being given to quartz-reefing.

The mining statistics for 1899 were as follows:—Number of miners, European, 9,048—7,144 quartz, 1,904 alluvial, Chinese, 710: total, 9,758. Total yield of gold, 966,394 ozs. (including 21,794 ozs. alluvial), estimated value at £3 10s. per oz. These figures show an increase of 46,346 ozs. on those of the previous year, principally from Charters Towers, Gympie, Mount Morgan and Clermont. The yield of gold to the ton of quartz ranged from 6 dwts. 16 grs. on the Mackay field to 2 ozs. 3 dwts. 6grs. on the Cooktown (Starcke) field. The total quantity of quartz crushed was 1,403,928 tons (including mill residues), the gross yield being 925,100 ozs. The prices charged for crushing varied from 7s. 6d. per ton on the Gympie field to 25s. on the Etheridge and Gladstone fields. The gold from the Rockhampton, Clermont, Mareeba, Cloncurry, and Starcke fields assayed the highest price of £4 per oz., the lowest price being from Croydon, which was worth only £2 11s. 6½d per oz.

The returns of the principal machinery employed on the goldfields during 1899 were as follows: 666 steam engines of 12,025 h.p., employed in winding, pumping, and crushing; 143 crushing mills (active), 55 mills "hung up"; 26 buddles; 45

whims ; 129 whips and pulleys; 31 sluices, toms, and sluice boxes ; 295 winding machines ; 2,051 heads of stamps ; 1,135 Berdan's, Wheeler's and Denny's pans ; 15 arrastras ; 23 settling tanks; 237 rock drills; 532 concentrators ; 190 furnaces ; 27 Huntingdon mills ; 65 chlorination vats ; 88 cyanide vats ; 61 stone breakers ; 15 refining furnaces. The approximate value of all mining plant on the goldfields is estimated at £1,591,963. The miners' rights issued in 1899 numbered 11,864 ; business licenses, 184. The total number of all gold-mining leases and applications in force on the Queensland goldfields on December 31, 1899, was 668 ; the total area of leases was 10,324a. 3r. 20p., the average area of each lease being 15a. 1r. 33p.

At the end of 1899 there were registered 262 mining companies, with 19,653,695 shares, the nominal capital being £8,356,895, and the subscribed capital, £6,783,174. Of these companies 125 are at Gympie, 55 at Charters Towers, and 40 at Croydon.

The estimated gross produce of gold in the colony from 1867 to December 31, 1899, has been 13,873,860 ozs., valued at £48,082,082.

Copper, tin, and coal are the other chief mineral products of Queensland, so far as at present known. Copper is found in various parts, but the richest mines are at Chillagoe, where there has during the last two years been much activity and a large influx of capital, Clermont, Mount Perry, and Cloncurry. Copper mining has been practically suspended, but is now being revived. Antimony is found at Tiaro, Neardie, the Palmer, the Etheridge, and Hodgkinson district. The total quantity of tin raised was 1,308 tons, of the value of £77,302, the produce principally of the Herberton, Stanthorpe, and Cooktown districts. There were raised 494,009 tons of coal, value about £175,715, the produce of the Ipswich, Wide Bay, and Clermont pits. Silver and lead are found in the Stanthorpe, Herberton, Ravenswood, and Bowen districts; the quantity of silver raised during 1899 was 145,325 ozs., valued at £15,671. Bismuth is found at Ravenswood and Gayndah ; Sapphires, diamonds, agates and rubies have been found in the creeks running into the Gilbert river, and also in the Withersfield district. Manganese occurs at Gladstone. Opals have been found in various parts, the largest quantities being at Warrnambool Downs, in the Thargomindah district, and at Opalton in the Gregory district ; in 1899 opals to the value of £9,000 were raised. Plumbago has been found in large quantities at Mount Bopple, near Tiaro. Iron has also been found in various parts. At Mount Wheeler asbestos has been found.

The MINERAL OUTPUT for 1899 :—

Gold	...946,894 ozs. =	£2,838,119	...increase in 1899	26,840 ozs.
Silver	...145,321 ozs. =	15,671	...increase in 1899	41,304 ozs.
Tin	... 1,308 tons =	77,302	...increase in 1889	283 tons
Copper	... 161½ tons =	9,489	...increase in 1889	99½ tons
Lead	... 56 tons =	730	...decrease in 1899	192 tons
Coal	.494,009 tons =	175,715	...increase in 1899	86,075 tons
Opal	... — =	9,000	.. increase in value in 1899,	£355
Wolfram	... 259 tons =	10,060	. increase in 1899	181 tons
Manganese.	735 tons =	2,831	...increase in 1899	668 tons
Bismuth	... 2 tons =	494	...decrease in 1899	6 tons
Antimony..	40 tons =	200	...increase in 1899	40 tons

The total value of all minerals won during 1899 was £3,139,620, being an increase over the preceding year of £176,876.

Since 1872 tin has been found in very large quantities ; it was first discovered at Stanthorpe, afterwards at several places on the New South Wales border, and extensive deposits have also been laid bare on the Herberton, Chillagoe, Palmer and other northern gold-fields. Coal is extensively diffused throughout the Southern and Central portions of the colony, and is now taking its place among the leading products. It is found on the banks of the Brisbane and Bremer rivers, and in other parts of the West Moreton district, on the Darling Downs; at Burrum, near Maryborough—of which Mr. Tenison Woods reported that there is not a more promising coal-field in Australia, the deposits being of the same series as the Newcastle coal ; at Bowen, at Cooktown, and throughout a considerable extent of the basins of the Dawson, Mackenzie, and Nogoa rivers ; indeed, the extent of the coal beds is unknown ; according to Mr. Jack the western plains may turn out to be one vast coal-field. Some of the coal has been found to favourably compare with the New South Wales mineral, and the hard oil coals of the Darling Downs are described as being capable of producing a large percentage of illuminating oil and paraffin. As yet comparatively surface coal only has been got out, but the deposits at greater depths are believed to be a true coal of much better quality. It is estimated that the coal-beds underlie a surface of nearly 24,000 square miles.

The number of miners employed in other than gold-mining during 1899 was : Silver and lead 373, tin 913, coal 1,142, copper 1,154, bismuth 246, opal 211, general 42, total 4,081.

The gross quantity and value of the ore and mineral raised was 496,570 tons (including silver), value £301,501.

The stone quarried and raised during 1899 was :—Bluestone, 79,856 tons, valued at £10,577, from twelve quarries; freestone, 9,608 tons, value £4,297, from twenty quarries—twelve at Gatton, one at Maryborough, three at Warwick and four at Rockhampton ; felstone porphyry, 72,871 tons, value £7,593, from six quarries in the Brisbane district.

The quantity and value of minerals raised from 1860 to December 31, 1899, has been : Copper ore, 60,501½ tons, value £2,032,425 ; silver ore, value £714,089 ; antimony ore, 3,064 tons, value £35,458 ; coal, 5,658,919 tons, value £2,458,407 ; tin ore, 87,559 tons, value £4,526,102 ; opals, value, £116,945; gems, value £8,937 ; bismuth, 538 tons, value £58,863 ; wolfram, value £14,107; manganese, value £6,991 ; lead, 2,121 tons, value £21,511.

In the extreme north considerable attention is paid to the Pearl Fishery. A large number of schooners are engaged in the trade ; the work is carried on principally by the employment of the aborigines as divers (South Sea Islanders, Malays, and a few Lascars and Chinese assisting), and partly by improved diving dresses and apparatus. During 1899 there were licensed 319 pearling boats, and the estimated number of men employed was 1,984 ; 12,000 tons of pearl shell was obtained, valued at £130,105 ; 14 tons 2 cwt. 1 qr. of *bêche-de-mer*, valued at £1,295 ; and 3,816 lbs. valued at £2,038. The localities of the pearl fisheries are Wai Weer, Albany Island, Jervis Island, Somerset, Goode Island, Endeavour Strait, Friday Island, Prince of Wales Island, Possession Island, and Thursday Island. The *bêche-de-mer* fishery is carried on at the Barrier Reef, Murray Island, and Darnley Island. The Dugong fishery has for years been carried on ; the oil extracted is said to have medicinal virtues, not far below those of cod liver oil. The collection of the *bêche-de-mer*, a kind of sea-slug used in Chinese cookery, employs a large number of hands, and is a profitable source of revenue.

The fisheries in the Moreton district give employment to about 110 men with 68 boats, the catches averaging considerably over 100 bushels per week, but the demand or sale is said to seldom come up to the fish caught and marketed. Oysters are systematically cultivated, and the export for the year ending Dec. 31, 1899, principally from the Moreton Bay banks, was 11,596 packages, valued at £13,406.

Electric Telegraphs.—Every town in the settled districts has a telegraph office, and there is communication with the whole of the Australian colonies and New Zealand. A line connects Brisbane with Karumba, on the Gulf of Carpentaria, 1,425 miles distant, also with Somerset in the extreme North, and by cable thence with Thursday Island (upwards of 1,550 miles).

There is now telegraphic communication between Queensland and New Caledonia. This cable forms the first section of the cable across the Pacific Ocean to Vancouver.

On June 30, 1900, there were 468 stations, made up as follows : Telegraph, 179 ; railway telegraph stations, 214 ; telephone stations, 75. Several new lines are under construction, and numerous extensions of the system are advocated. On January 1, 1900, there were 18,969½ miles of line, and 18,969½ miles of wire. During the year 1900, 1,334,909 messages were transmitted. The total cash received for telegrams during 1899 was £89,481, an increase of £6,536. The quadruplex system is now operated with Sydney, and also between Brisbane and Bowen, a distance of 850 miles, and the duplex between Bowen and Townsville, and between Brisbane and Rockhampton.

The telephone is coming extensively into use, and in Brisbane and suburbs there are upwards of 1,190 offices, places of business, and private residences connected with the Exchange. Maryborough has 70 subscribers, Bundaberg 71, Rockhampton, 138, Townsville 141, Charters Towers 227, Toowoomba 123, Mackay 46, Cairns 46, Ipswich 44, and Mount Morgan 27 (the three latter being exchanges opened in 1900). The following lines are under consideration : Warwick exchange, Warwick trunk line, Longreach exchange, Gympie exchange, Brisbane to Gympie trunk line, Gympie to Maryborough trunk line, and Maryborough to Bundaberg trunk lines. These numbers are continually being added to. A trunk telephone line has been constructed between Brisbane, Ipswich, and Toowoomba. In Brisbane all telephone and telegraph wires have been placed underground. Public telephone offices have been opened in Brisbane, South Brisbane, Bulimba, Ithaca, Petrie Terrace, Woolloongabba, Toowong, Albion and Fortitude Valley. The charge for using the instrument is 3d. for every five minutes. The total calls for the year are returned as 3,817,200, and the revenue from telephones was £12,574, as against £8,895 in 1899. There are 3,107¾ miles of telephone wire laid.

The telegraphic charges to any station in the colony (exclusive of all stations within a six mile radius of the General Post-Office) are 1s. for first ten words, exclusive of name and address, and 1d. each additional word. This rate also applies to the New South Wales border stations. The suburban stations within six miles of the General Post-Office, ten words 6d., each additional word, 1d. Telegrams marked "urgent" are charged double rates. The intercolonial charges are : to New South Wales, ten words, 1s., each additional word 2d. ; to Victoria, ten words, 3s., and 3d. per word beyond ; to South Australia the same, excepting to stations on the overland line. To Western Australia, ten words, 4s., each additional word 4d. To Tasmania, ten words, 4s., every additional word 4d., only ten words allowed free for address and signature. To New Zealand messages of ten words, in which address and signature are included, are charged 4s. 6d., with 6d. for each additional word. To London the charge per word is 5s. 1d. ; name and address of sender and receiver form part of the message, and have to be paid for. If the addresses of sender and receiver are registered, messages can be more cheaply sent at word rates.

Postal.—On January 1, 1900, there were 425 post-offices, 814 receiving-offices, and 131 money-order offices. During the year there passed through the post 18,531,048 letters, 8,913,455 newspapers, 4,879,877 packets, and 233,009 parcels, being an increase on the figures of 1899 of 1,061,078, of letters ; an increase in newspapers of 169,359 ; an increase in packets of 802,502 ; and an increase in parcels of 25,624. The total revenue of the Post Office Department for 1899 was £298,801. The expenditure of the Post and Telegraph Department was £347,713.

The rate of postage on town letters is 1d. for every half-ounce ; on inland letters it is 2d. per half-ounce. The postage to any of the Australian colonies is 2d. per half ounce. For any place beyond the Australasian colonies 2½d. for each half-ounce. Postcards, inland and intercolonial, single, 1d. ; reply, 2d. Since

June 1, 1884, the differential rates charged on correspondence to the United Kingdom have been done away with, and also the necessity for marking by any particular route (except as regards the Californian, French, and German services). The uniform rate for letters now by any route is 2½d. per half-ounce.

Book-rates, Inland and Intercolonial : four ounces 1d., and 1d. extra for every additional four ounces. To all places except the above, for each two ounces or fraction thereof, 1d. Printed papers (except books and newspapers) to any place within or beyond Queensland, for each two ounces or part thereof, 1d.

Commercial papers (comprising partly- or wholly-written documents not partaking of the nature of a letter), inland and intercolonial, two ounces or part, 1d. ; to other places, two ounces 3d., four ounces 3½d., six ounces 4d., eight ounces 4½d., ten ounces 5d., each additional two ounces up to five pounds 1d.

Newspapers printed and published in Queensland, not exceeding 10 ounces, one half-penny for each paper ; this rate applies to town, inland, and to other Australian colonies. The charge to Great Britain is one penny for each paper not exceeding 4 oz. Intercolonial papers one halfpenny for every 2 ozs. ; foreign, one penny for 4 ozs. ; halfpenny for every additional 2 oz .

Money-orders can be obtained on all the leading towns in the colony. Commission charged for any sum not exceeding £5, sixpence ; over £5 but not exceeding £10, one shilling. To the neighbouring colonies the commission is 6d. for any sum under £2, 1s. for sums of £5 and under, 1s. 6d. for sums of £7 and under, 2s. for sums of £10 and under. To all other places, 6d. for every £1 or fraction thereof. To most of the European cities, to Egypt, India, Japan, United States and many foreign cities, and to several of the British colonies, money-orders can also be sent at the foregoing rates, subject in some cases to a small deduction on payment.

On January 1, 1900, there were 131 money-order offices, being an increase of eleven on the previous year. During 1899 the number of transactions was 235,013 (increase 7·80), the amount of same being £888,812 (increase 6·31).

Postal notes are issued of the following values and fees :—1s. to 1s. 6d., ½d. ; 2s. to 4s. 6d., 1d. ; 5s. to 7s. 6d., 2d. ; 10s. to 20s., 3d.

The business in postal notes for 1900 showed an increase of 9·28 per cent. in the number of transactions, and an increase in the amount of 9·9 per cent. as compared with 1899.

The postal service to the United Kingdom is performed by the steamers of the P. and O. and Orient lines ; the mails being carried overland by rail between Adelaide and Brisbane. There are now (1900) eight mails outward and the same number inward in each month to and from Great Britain.

A revision of the mail coastal services has resulted in the establishment of a 12-knot service between Gladstone and Townsville, and connecting therewith for a service between Townsville and Cairns, *via* the ports *en route*, Port Douglas and Cooktown being provided for by the steamers leaving Brisbane every Saturday. This service has afforded great and general satisfaction, the mails now leave Brisbane by railway on Friday night, and, after being transferred to the steamer at Gladstone, arrive at Townsville generally in advance of the contract time, which is 4 A.M. on the following Monday, or thirty-six hours earlier than under the previous contract. As the mails reach Townsville in time for the early morning train on Monday, instead of as formerly, for that of Wednesday, the mails for the important district served from Townsville have been expedited by forty-eight hours. The establishment of a Travelling Post Office on the Northern Railway Line affords further facilities for prompt despatch, as well as for the collection and distribution of correspondence in the district through which the line runs. The mails for Cairns and the intervening ports have also been accelerated by about thirty-six hours, as they now arrive at Cairns on Tuesday evening instead of on Thursday morning, and are immediately despatched by rail to Mareeba, and thence by coach twice, instead of once a week as previously, to Georgetown and Croydon, thus providing a better and more frequent service right torough to Normanton by the overland route. The coach services from Hughenden to Cloncurry and from Winton to Cloncurry have also been increased in frequency from once to twice a week.

The parcel post came into force in Queensland on January 14, 1893, and its operations are very favourably reported on. During the year 1900 there were received and despatched 268,915 parcels, the revenue amounting to £27,446 14s. 5d.

From October 1, 1891, Queensland, in common with the rest of the Australian colonies (with one vote for all), entered the Postal Union.

Railways.—The railways in Queensland consist of thirteen distinct systems comprised in two divisions, the SOUTHERN AND CENTRAL DIVISION, which includes the Southern and Western, the Wide Bay and Central Lines, 2,114 miles ; and the NORTHERN and CARPENTARIA DIVISION which includes the Mackay, Bowen, Northern, Cairns, Cooktown and Normanton - Croydon lines, 687 miles. They are as follows : — The SOUTHERN AND WESTERN RAILWAY, being the line from Brisbane westward and southward to the New South Wales border (Wallangarra), the South Coast line, and the North Coast line ; the MARYBOROUGH RAILWAY, being the line from Maryborough to Gympie and South Bundaberg and branches ; the BUNDABERG RAILWAY, being the line from Bundaberg to Mount Perry and Gladstone ; the CENTRAL RAILWAY, being the line from Rockhampton westwards to Longreach, formerly known as the Northern Railway, with the branches to Clermont and Springsure ; the NORTH ROCKHAMPTON line to Emu Park, with branch line to Broadmount ; the NORTHERN RAILWAY, being the line from Townsville to Hughenden and Winton, including the Ravenswood branch ; the MACKAY RAILWAY, being the line from Mackay to Mirani, with branch to Eton ; the BOWEN RAILWAY open to Wangaratta, 48 miles ; the COOKTOWN RAILWAY, the line from Cooktown towards the Palmer, 67 miles ; the CAIRNS RAILWAY, open to Mareeba, 47 (the extension beyond this towards Chillagoe is a private line) miles ; the NORMANTON RAILWAY from Normanton to Croydon. The dates of openings of these lines were : The Southern and Western Line (July 31, 1865), the Central Railway (September 17, 1867), the Northern Line (December 20, 1880), the Maryborough and Gympie line (August 6, 1881), the Bundaberg line (July 19, 1881), the Mackay Railway (August 10, 1885), the Cooktown Railway (November 30, 1885), the Cairns Railway (October 8, 1887), the Normanton Railway (May 7, 1889), and the Bowen Railway (June 2, 1890.)

The SOUTHERN AND WESTERN RAILWAY consists of a line from BRISBANE to CUNNAMULLA, westwards, 604 miles, and to Wallangarra, southwards, 233 miles. The stations are—Central, Roma Street, Milton, Auchenflower, Toowong, Taringa, Indooroopilly, Chelmer, Graceville, Sherwood, Corinda, Oxley, Darra, Wolston, Goodna, Redbank, River View, Dinmore, Bundamba, Booval, East Ipswich, IPSWICH, Karrabin, Walloon Thagoona, Rosewood, Lanefield, Calvert, Grandchester, Laidley, Forest Hill, Gatton, Grantham, Helidon, Murphy's Creek, Spring Bluff, Harlaxton, Toowoomba, Cranley, Wetalla, Gowrie Junction, (the Southern Line branches off at this point); Gowrie, Oakey, Jondaryan, Bowenville, Blaxland, Dalby, Macalister, Warra, Brigalord, Boonarga, Chinchilla, Columboola, Miles, Drillham, Dulacca, Jackson, Channing, Yeulba, Wallumbilla, Blythdale, Roma, Bungeworgorai, Hodgson, Brinsop, Muckadilla, Amby, Mitchell, Womallila, Mungallala, Dulbydilla, Morven, Angellala, Charleville, Wallal, Mangalore, Dillalah, Murweh, Wyandra, Claverton, Offham, Coongoola, and Cunnamulla. The fares are at the rate of about 2½d. per mile first class and 1½d. per mile second class. The stations of the Southern Line, after leaving the Gowrie Junction are—Charlton, Wellcamp, Westbrook, Wyreema, Cambooya, Greenmount, Nobby, King's Creek, Clifton, Elphinstone, Talgai, Hendon, Deuchar, Toolburra, Rosehill, Millhill, WARWICK, Silverwood, Cherry Gully, Maryland, Dalveen, Thulimbah, Stanthorpe, Beverley, Glen Aplin, Ballandean, Bald Mountain, Wallangarra.

A branch line from Hendon to Allora, 3¼ miles, was opened in June, 1897.

The Sandgate Line has a length of 13 miles, and the following stations :—Brunswick Street, Bowen Hills, Mayne, Albion, Wooloowin, Eagle Junction, Nundah, Northgate, Nudgee, Cabbage Tree, Deagon, Sandgate, and Sandgate Central. At the Junction is a branch line to Pinkenba, with stations at Clayfield, Hendra, Ascot (Racecourse), Whinstanes, Eagle Farm, Meeandah, and Pinkenba.

The Highfields Branch, extending from Toowoomba to Crow's Nest, 34 miles, with stations at Cranley, Wetalla, Pengarry junction, Birnam, Cawdor, Shirley, Woolmer, Meringandan, Klienton, Cabarlah, Geham, Mount Pleasant, Taylor, Hampton, Pechey.

The Killarney Branch, from Warwick to Killarney, 28 miles, with stations at Killarney junction, Hermitage, Swan Creek, Summerhill, Mount Sturt, Yangan, Neereeadah, Danderoo, and Tannymorel.

The Brisbane Valley Branch extends from Ipswich to Esk, a length of 43 miles, from the Junction, with stations at Brassall, Pine Mountain, Borallon, Wason, Fairneyview, Fernvale, Vernor, Lowood, Clarendon, Bellevue, and Mount Hallon.

The North Coast Line to Gympie, 106 miles from Brisbane, and thence to Maryborough, Bundaberg, and Gladstone, starts from Nundah on the Sandgate Line, and has stations at Virginia, Geebung, Zillmere, Bald Hills, Strathpine, Lawnton, North Pine, Magazine Siding, Narangba, Burpengarry, Morayfield, Caboolture, Beerburrum, Glass Mountains, Beerwah, Landsborough, Mooloolah, Eudlo, Palmwoods, Woombye, Nambour, Yandina, Northarm, Eumundi, Cooroy, Pomona, Cooran, Traveston, Woondum, Keefton, Monkland, Nashville, and Gympie. The line from Gympie to Maryborough, 61 miles, with stations at Tamaree, Harvey's Siding, Curra, Kadina, Gunalda, Kilkivan Junction, Kanyan, Paterson's Siding, Gootchie, Gundiah, Netherby, Kooringa, Tiaro, Blackmount, Owanyilla, Antigua, Mungar Junction, Graham's Creek, Yengarie, Oakhurst, Croydon Junction, Maryborough. The Pialba Branch from Maryborough to Pialba, 25 miles, with stations at Colton, Mikenbah, Urraween, Kawungan, and Pialba. The Isis Branch, 48 miles, with stations at Isis Junction, Abingdon, Horton, Doolbi, Childers, Huxley, Hapsburg, Lynwood, and Cordalba. The Maryborough to Bundaberg Line, 54 miles, with stations at Croydon Junction, Aldershot, Colton, Torbanlea, Burrum, Howard, Isis Junction, Goodwood, Elliott, Clayton, Thabeban, and Bundaberg. The BUNDABERG RAILWAY, from Bundaberg to Mount Perry, 66 miles, with stations at North Bundaberg, Oakwood, Sharon, Gibson's Siding, Bingera, Goondoon, Kolan, Maroondan, GinGin, Watawa, Dalysford, Moolboolaman, Gillen's Siding, Boolboonda, Wonbah, Wolca, Drummer's Creek.

Bundaberg to Gladstone Line, 111 miles, with stations at North Bundaberg, Gooburrum, Meadowvale, Moorland, Avondale, Yandaran, Mullet Creek, Rosedale, Murray's Creek, Lowmede, Colosseum, Miriam Vale, Iveragh, Rodds Bay, and Annandale and Skyrings Siding.

The Gayndah Branch, 46 miles from the junction, with stations at Mungar Junction, Yerra Thinoomba, Hunter's Hut, Aramara, Broowena, Boompa, Lakeside, Biggenden, and Woowoonga.

A line to Kilkivan, branching off from the junction, with stations at Dickabram, Miva, Brooyar, Boowoogum, Woolooga, Oakview, and Kilkivan.

The Fassifern Branch extends from Ipswich to Dugandan, 36

miles, with stations or platforms at Little Ipswich, Churchill, Hampstead, Purga, Goolman, Hillside, Rockton, Peak Crossing, Flinders, Churchbank, Harrisville, Wilson's Plains, Radford, Munbilla, Anthony, Blantyre, Roadvale, Teviotville, Hoya, Boonah, and Dugandan.

A branch line to Pittsworth, 29 miles from Gowrie Junction, with stations at Wyreema, Umbiram, Southbrook, Greenhills, and Broxburn.

The South Coast Line, extending from South Brisbane (Melbourne Street) to Beenleigh, 24 miles, and Southport, 50 miles, with stations at Vulture Street, Gloucester Street, Park Road, Boggo Road Junction, Fairfield, Yeronga, Yeerongpilly, Moorooka Rocklea, Salisbury, Cooper's Plains, Sunnybank, Runcorn, Kuraby, Kingston, Loganlea, Bethania Junction, Holmview, Beenleigh, Stapylton, Ormeau, Pimpama, Coomera, Oxenford, Helensvale, Ernest Junction, Southport, with branch to Logan Village, and Beaudesert, with stations at Waterford, Buccan, Logan Village, Jimboomba, Cedar Grove, Woodhill, Veresdale, Glencagle, and Beaudesert

There is also a branch line to Nerang, with a station at Molendinar.

The Cleveland line 23 miles, with stations at South Brisbane, Vulture Street, Gloucester Street, Park Road, Logan Road, Coorparoo, Morningside, Mooraree, Hemmant, Lindum, Wynnum, Wynnum South, Manly, Birkdale, Wellington Point, Ormiston and West Cleveland.

The CENTRAL RAILWAY starts from ROCKHAMPTON, with a terminus at present at Longreach, 427 miles, with stations at Yeppen, Gracemere, Langley, Malchi, Kabra (for Mount Morgan), Neerkoll, Stanwell, Warren, Woodend, Bushley, Wycarbah, Spring Creek, Westwood, Goganjo, Herbert's creek, Boolburra, Duaringa, Wallaroo, Tryphinia, Dingo, Stanley, Walton, Bluff, Blackwater, Tolmies, Comet, Yamala, Weemah, Emerald, Selma, Taroborah, Glendarriwill, Anakie, Borilla, Withersfield, Willows, Woodbine, Bogantungan, Drummond, Pine Hill, Beaufort, Alpha, Beta, Jericho, Spring Vale, Alice, Lochnagar, Geera, Barcaldine, Westbourne, Saltern, Brixton, Dartmouth, Ilfracombe and Cleeve.

There is a branch line, branching off at Kabra, to Mount Morgan, the stations being (from Kabra), Boongary, Moonmera, Moonggan, and Baree.

A line has also been constructed to Broadmount, which branches off from the Emu Park Line at Nankeen Junction. Broadmount is made to connect with the Brisbane to Gladstone Line by a steamer, built by the Government to carry mails and passengers, thus providing a through system between Brisbane and the Central Railway. It is, however, contemplated to connect Gladstone with Rockhampton, 65 miles, which will thus place Brisbane in direct communication with Longreach *viâ* Rockhampton.

There is a branch line from North Rockhampton to Emu Park, 29 miles, with stations at Lakes Creek, Williamstown, Nankin Junction, Coolcorra, New Zealand Gully, Tungamull, Coowonga, Coorooman, Tanby, and Phillip Street.

The Clermont Line extends from Emerald to Clermont, 62 miles, with stations at Emerald Downs, Gordon Downs, Capella, Retro, Retro Creek, and Langton.

The Springsure line extends to Springsure, 41 miles, with stations at Emerald, Fernlees, and Minerva.

The NORTHERN RAILWAY, starting from Townsville, to Winton, 368 miles. The stations are South Townsville, Oonoonba, Cluden, Stewart's Creek, Roseneath, Brookhill, Stanley, Antil Plains, Toonpan, Barringha, Woodstock, Manton, Calcium, Philps Siding, Plant Hill, Reid River, Cardington, Haughton Valley, Ravenswood Junction, Sala's Siding, Fanning, Exley, Burdekin (70 miles 40 chains), Sellheim, Plum Tree (79½ miles), Charters Towers, Sandy Creek, Featherby, Southern Cross, Powlathanga, Balfe's Creek, Lamond, Thalanga, Homestead, Mundic Creek, Cape River, Pentland, Warrigal, Torrens Creek, Warreah, Prairie, Jardine Valley, Hughenden, Watters, Alba Siding, Stamford, Whiteford, Corfield, Olio and Oondoroo.

The line to Ravenswood branches off at Ravenswood Junction (24 miles in length), with stations at Grass Hut, Kirk River, and Mount Wright.

The MACKAY RAILWAY, extending to Mirani and Eton, with stations or platforms at Racecourse Crossing, Lagoons, Te Kowai, Alexandra, Palms, Walkerston, Pleystowe, Newbury Junction, Marian, Bolden, and Otterburn. From Newbury Junction the line goes to Eton, 9 miles, with stations at Vince, Victoria, and Drapers.

The BOWEN RAILWAY, extending to Wangaratta 48 miles, with stations at Don, Euri, Wilmington, and Guthalungra.

The COOKTOWN RAILWAY, extending to Laura (67 miles) with stations at Asmus, Marton, Jansen, Flaggy, Wilton, Coolah Alderbury, Normanby, Battle Camp, Welcome, Sandown, and Deighton.

The CAIRNS to HERBERTON RAILWAY, extending to Mareeba, 47 miles, with stations at Edge Hill, Stratford, Freshwater, Redlynch, Springs, Barron Falls, Kuranda, Myola, Oaklands, Koah, Biboohra. A private line is now being constructed by the Chillagoe Proprietary to connect the newly opened mineral fields at Chillagoe with the Cairns Line, junctioning at Mareeba. Fifty-five miles of track were opened in October, 1900, and rails were laid some distance further.

The NORMANTON CROYDON RAILWAY is now open to Croydon, a distance of 95 miles, with stations at Clarina, Glenore, Haydon, Blackbull, Creen Creek, Golden Gate.

Three lines constructed under the provisions of "The Railways Guarantee Act of 1895," viz., Colton to Pialba, Hendon to Allora, and Mayne to Enoggera, have been opened for traffic.

All the Queensland railways are on the narrow-gauge principle, the rails being only 3ft. 6in. apart.

The Railway returns for the year ending June 30, 1900, were :— Length of railway opened, 2,801¼ miles ; total cost of lines opened, £19,320,302 ; and £482,337 on unopened lines ; gross earnings, £1,464,399 ; gross working expenses, £948,691 ; train miles run, exclusive of ballasting, 6,426,054 miles; cost per train mile, 2s. 11½d. ; earnings per train mile, 4s. 6¾d. ; percentage of net earnings on capital, 2·67 ; percentage of working expenses to revenue, 64·78 ; earnings per head of population, £2 17s. 2d. ; tons of goods carried, 1,688,635 ; number of passengers carried (exclusive of season-tickets), 4,395,841.

The Railway lines to June 30, 1900, averaged £6,897 (including rolling stock) per mile in cost of construction. The line from Roma Street to Central Station (½ mile) cost £103,786, being £207,536 per mile.

On July 1, 1900, the rolling stock on all the lines of railway was returned at 335 locomotives, 388 passenger carriages, 6,036 goods waggons and 105 brake vans. Contracts are being made for a number of goods and passenger engines of the heaviest type, to be built in the Colony. Contracts for a large number of carriages, goods waggons, and cattle and sheep trucks have also been entered into during the past two years.

Tramways.—Tramways are in operation in Brisbane. Horses supplied the motive power originally, but about the middle of 1897 the electrical system came into operation, and has been applied to all the lines. The lines are being further extended into the suburbs. The power-house contains three 450 h.p. compound condensing engines, and three 300 Kilowatt General Electric Company's dynamos. Twenty-two and a half miles of streets are traversed, equal to 36 miles of single track. The rolling stock in September, 1900, consisted of 58 electric and 10 rail-cars, but this has been considerably augmented. Several extensions to the suburbs are now about being made. The head office of the Company is at 52, Moorgate Street, London, E.C.

Shipping.—The number of vessels of all nationalities entered inwards in 1899 was 662, of the aggregate tonnage of 730,450, with crews of 26,938 men. The clearances were 630 vessels, of 733,613 tons, and crews of 26,780. There are on the Register 19 ocean steamers of 12,493 tonnage and 3,415 h.p., 44 harbour steamers of 4,654 tonnage and 1,582 h.p., and 51 river-going steamers of 1,260 tonnage and 751 h.p.

Lighthouses.—The principal lights on the coast of Queensland are: on the north-east corner of Moreton Island (in lat. 27° 1′ 57″ S., long. 153° 28′ E.), a first order revolving light, attaining its greatest power at intervals of 60 seconds ; Comboyuro, Cowan Cowan Point, and the Yellow Patch fixed light (fourth order condensing), on the NE., W. and N. part respectively of Moreton Island, showing white or red according to their bearings. Tangaluma light, at the back of the Ship Patch, used in line with Cowan Cowan for entering by the North Channel, and in that direction having the power of a first order light ; two small lights at Cape Moreton to avoid Smith rock ; a fourth order D. condensing on Caloundra Head, also one on Bribie Island ; a fourth order holophote on Bribie Island which forms a lead with the latter for entering the North-West Channel : three gas buoys also mark this Channel ; twenty-five small lights for the navigation of the Brisbane river ; an iron screw pile lighthouse at the outer edge of the bar, fourth order occulting 10 seconds bright, 2 eclipsed ; red and white ; red and white, 4th order, leading lights for Bar cutting; two leading lights for entering boat channel, one sixth order light at Cleveland Point, one small light at St. Helena, and one at the south end of Moreton Island ; two leading lights Southport ; two leading lights at the bar of the Noosa river ; at Double Island Point a third order dioptric light revolving—intervals of flashes 30 seconds a dioptric light at Sandy Cape of the first order, reaching its greatest brilliancy every 75 seconds ; at Wide Bay Bar two leading lights Hook Point, and three at Inskip Point ; twenty-three small lights Great Sandy Strait ; two fourth order leading lights on Woody Island, and three small lights on Little Woody Island, for entering Great Sandy Strait from the north ; two leading lights Quarantine Station, white cliffs, leading to mouth of Mary River ; twenty-one leading and other lights in the Mary River ; fifth order fixed light at Burnett River Heads ; and thirteen small lights in river. At Lady Elliott Island (fourth order, revolving every 30 seconds) ; at Bustard Heads fixed and flashing second order, also screened fifth order light for clearing outlying rock ; Gatcombe Head, fixed white and red, also light on Oyster Rock and Settlement Point ; light at Auckland Point, and at Pilot's Cottage ; two red lights, Auckland Creek ; Cape Capricorn, third order light revolving every minute, auxiliary light for clearing Rocky Islets ; also fourth order holophote, forming lead with main light for clearing Cottier Bank, one gas buoy on Timandra Bank ; fourth order light, red and white at Sea Hill ; six leading lights Keppel Bay and Port Alma ; twelve leading lights and Upper Flats lightship in Fitzroy River ; at North Reef, second order fixed and double flashing light ; at Broad Sound one fixed white light ; a second order fixed and flashing light at the Pine Islets ; at Flat Top Island, fourth order red and white fixed light, and twenty-seven small lights in Pioneer River, and for Flat Top anchorage ; at Dent Island (Whitsunday passage), a 4th order dioptric light, revolving every 30 seconds ; at Port Denison, a fixed white light, four leading lights south entrance, and red light at each end of jetty ; at Cape Bowling Green, a third order light revolving every minute ; at Cape Cleveland, a revolving light of the fourth order, attaining its greatest brilliancy every 20 seconds ; and an auxiliary light leading between Four Foot and Twenty Foot rocks. At Townsville, one sixth order light at end of eastern breakwater, small green light at end of western breakwater, and six other lights at Ross Creek,

a fourth order fixed light on Bay Rock. Five leading lights at South entrance Hinchinbrook Channel; Mourilyan Harbour two leading lights; a sixth order double-flashing white light, from summit of south-eastern of the North Barnard Islands; five leading lights at the Johnstone river; at Cairns two white leading lights and one small red light; illuminated tide-gauge on Fairway Beacon; at Low Islands a third order revolving light (minute intervals); at Island Point, a fifth order fixed red light; two lights at entrance of Dickson Inlet; fourth order holophote on Rocky Islet, and fourth order condensing Archer Point, for leading between Cape Tribulation and "a" reef; and also coloured arcs for leading clear of "d" reef and Blackbird Patch, off Monkhouse Point; at Cooktown (Endeavour River), two red leading lights; and a fourth order fixed white light on Grassy Hill; at Channel Rock (Cape Melville), a lightship exhibiting a fixed light; at Claremont Islands, a lightship showing a fixed light; at Piper Island, a lightship showing a fixed light; at Goode Island, a fourth order fixed light; at Thursday Island, two leading and one single light; at Proudfoot Shoal, a lightship showing a fixed white light. At Booby Island a second order dioptric light, revolving at intervals of one minute. Off the Norman bar a lightship; at the entrance to the Norman River six leading lights. In all, in 1900, the number and order of lights exhibited was:—1st order 2, 2nd order 4, 3rd order 4, 4th order 16, 5th order 6, 6th order 4, holophotes 7, lightships 6, smaller lights 200, yearly consumption of oil, about 7,000 gallons of paraffin and 19,000 of kerosene. During 1899-1900 these lights were maintained at an expense of £23,000.

Friendly Societies. — There are numerous Friendly Societies in Queensland, comprising Oddfellows, Foresters, Rechabites, Sons and Daughters of Temperance, Protestant Alliance, Hibernian Benefit, Druids, and others, in all numbering about 347, with 27,135 members, and funds to the amount of £201,831. There were distributed in the way of benefit during 1899 £60,439, the cost of management being £14,296.

Defence and Volunteer Forces.—On December 31, 1899, the Defence Force (including A Battery P.F.) numbered 470 officers and 1,937 men. The Volunteer Force numbered 147 officers and 446 men, in addition to which there are members of Rifle Clubs and Police Force, which latter could be called out if necessary for the defence of the Colony. The forces comprise eight batteries of artillery, one company of engineers, four regiments of infantry, ten companies of Rifles, twelve companies of Mounted Infantry, and four Ambulance Corps. Two batteries protect the entrance to the Brisbane River, besides a system of submarine mines, and there are batteries at Rockhampton, Townsville, and Thursday Island. Two gunboats and two torpedo boats belong to the Colonial Government, and are stationed in the Brisbane River; the hopper barges too can be utilized for defence. Steps are now being taken not only to more completely arm the various forts, but also to largely increase the active forces. There are already numerous corps of school cadets. The Marine Defence Force on January 1, 1900, numbered 26 officers and 458 seamen, 484 in all. There are also several grammar and State school companies of cadets, totalling 550, and naval cadet corps at Maryborough and Cairns totalling 200 boys.

Under the Australian Naval Defence Bill Queensland is a contributory to the maintenance of what is known as the Auxiliary Squadron, which arrived in Australian waters in August, 1891.

Real Property.—From the year 1862 to December 31, 1899, the operations in the Real Property Office have been as follows:—Instruments lodged for registration, 394,003; titles operated on, 621,120; new titles, 290,204; deeds of grant registered, 92,583. The total area now subject to the provisions of the Real Property Acts of 1861 and 1877 is 13,026,199a 3r. 0p. During 1899 the business of the Real Property Transfer Office was: instruments presented for registration, 17,382; new titles issued, 11,798; number of titles operated on, 28,313.

Mills and Manufactories.—On January 1, 1900, there were 2,610 mills, manufactories and works, employing in all 28,883 hands. Among the more important of these were:—25 boiling down works, 43 tanneries, 28 fellmongeries and wool-scouring establishments, 169 cordial factories, 24 breweries, 6 distilleries, 18 flour-mills, 18 ice works, 16 jam factories, 13 meat-preserving works, 69 sugar-mills, 256 butter factories, 44 boot and shoe factories, 23 clothing factories, 147 saw-mills, 112 machinery and engine works, 6 railway carriage works, 6 docks and slips, 10 ship and boat-building yards, 24 bedding and curled hair factories, 91 coach and carriage works, 14 gas works, 23 soap and candle works, 9 tobacco factories, and 438 creameries.

At Ipswich an extensive tweed factory has for some time been in successful operation; also locomotive works; at Nundah there are large railway-carriage works; and at Toombul works for the manufacture of signals and interlocking appliances. Locomotive engines are being manufactured at private establishments in Brisbane, Ipswich, Toowoomba and Maryborough. There are several cheese and butter factories and creameries in full work. Under "The Meat and Dairy Produce Encouragement Act of 1893" provision is made for the subscribing of a portion of the capital required for the erection of suitable buildings and machinery for the manufacture and exportation of meat and dairy produce from the colony, and a bonus is also given on all butter and cheese exported, provided the shipment is not less than 1 cwt. in the case of an individual, or 10 cwt. from a factory.

Patents, &c.—Fees: On application for provisional protection, £1; on filing complete specification, £2; on certificate of renewal before end of 4 years, £5; before end of 8 years, £10. Trade Marks: On application to register, £2; for continuance of market and of 14 years, £1. During 1899 there were granted or registered 383 patents, 263 trade marks, 13 designs, 22 copyrights (books), 21 copyrights (fine arts).

Distilleries and Breweries. — There are six distilleries; one in the Mackay district, one at Strathpine near Brisbane, one at the Logan, one at Marburg, and two at Bundaberg. During the year ending June 30, 1899, there were 159,205·7 gallons of proof spirit made at these distilleries. There were 26 registered breweries in working. During the year ending June 30, 1899, there were brewed 5,287,448 gallons of beer. For the year ending June 30, 1900, the figures were: distilleries, 6; proof spirit distilled, 129,997·0 gallons; breweries registered, 22; beer brewed, 5,616,443 gallons.

Revenue.—The Revenue for the year ending June 30, 1900, was £4,588,206 14s. 8d., being an increase on the previous year of £414,120 14s. 0d. The Expenditure for the year was £4,540,417 18s. 10d., the excess of Revenue over Expenditure being £47,788 15s. 10d. Deducting amount transferred to Trustees Public Debt Reduction Fund, £47,788 15s. 10d., there remained a Credit Balance on June 30, 1900, of £11,804 14s. 2d. The principal heads of revenue, and comparison with 1898-99 are as under: — Customs, £1,461,689 11s. 2d., an increase of £93,765 13s. 8d.; Excise, £148,422 15s. 9d., an increase of £4,518 3s. 8d.; Stamp Duty, £245,425 19s. 9d., an increase of £124,612 3s. 1d.; Dividend Duty, £66,476 11s. 2d., an increase of £5,989 13s. 6d.; Licenses, £62,698 2s. 1d., an increase of £5,419 0s. 2d.; Land Revenue, £202,280 13s. 3d., an increase of £6,472 1s. 4d.; Pastoral Occupation, £323,622 2s. 7d., a decrease of £11,338 6s. 8d.; Mines, £92,840 9s. 6d., an increase of £48,503 16s. 0d.; Railways, £1,422,852 3s. 9d., an increase of £100,185 14s. 8d.; Post Office, £206,093 0s. 5d., an increase of £13,763 9s. 7d.; Electric Telegraph, £103,377 11s. 6d., an increase of £11,528 9s. 6d.; Harbour Rates, £22,452 5s. 1d., an increase of £105 4s. 11d.; Office Fees, £24,865 2s. 2d., an increase of £927 13s. 2d.; Fines and Forfeitures, £4,483 4s. 8d., an increase of £584 6s. 0d.; Miscellaneous Receipts, £200,627 1s. 10d., an increase of £7,025 11s. 5d.

Public Debt.—On December 31, 1899, the public debt of the Colony amounted to £34,348,414, represented by Debentures, £12,284,380, and by stock inscribed in the Bank of England, £22,064,034. The yearly interest now amounts to about £1,296,744, there being £1,748,694 at 3 per cent., £10,489,414 at 3½ per cent., and £21,389,300 at 4 per cent. The debt has been incurred on account of immigration, railways, telegraphs, roads, bridges, and other public works.

Insolvency.—During 1899, 355 estates were surrendered—357 voluntarily and 18 compulsorily. The liabilities amounted to £104,960 9s. 1d., and the assets realised £6,281 7s. 7d.

Savings Banks. — On June 30, 1900, there were 167 branches of the Government Savings Banks in operation, the amount to the credit of 84,796 depositors being £3,624,740, an increase on the previous year of 8,785 depositors, and of £366,552 in the amount of deposits. The total sum deposited during the year was £2,039,626; the average value of each account was £42 14s. 11d., and the average value of each deposit, £10 9s. 2d. The interest added to depositors' accounts was £91,400 0s. 2d. The revenue for the year was £104,263, and the expenses (interest, salaries, &c.), £102,197, leaving a profit on the year's business of £2,066. The funds are principally invested in Queensland Government Debentures and Treasury Bills. In 1895-96 the interest allowed on deposits (not exceeding £200) was 3½ per cent, but in July 1, 1896, it was reduced to 3 per cent., which rate is now being paid.

Banking.—On June 30, 1900, eleven banking companies were in business, having about 150 branches or agencies throughout the colony. Of these, the Queensland National Bank the Royal Bank of Queensland, and the Bank o North Queensland, are local institutions; the first-named Corporation doing the Government banking business. The Government deposits, however, are distributed among several of the banks. The total assets of the 11 banks on the date mentioned were £16,130,953; of which gold and other coin was £1,586,390; bullion, £318,595; and landed property, £727,824. The liabilities were £13,524,938. The paid-up capital of the companies amounted to £12,822,674; the aggregate of the last dividends to £158,276. The deposits not bearing interest amounted to £4,514,950; those bearing interest to £5,588,595; the Government deposits bearing interest amounted to £3,133,903.

Imports and Exports.—In 1899 the Exports amounted in value to £10,856,127, being £22 0s. 9d. per head of population; and the Imports, inclusive of live stock (overland), to £6,007,266, being £12 3s. 11d. per head. The principal exports, the produce or manufacture of the colony, in name and value, were: — Arrowroot, 497,075 lbs., value £4,228; bone dust, 4,153¾ tons, value £15,473; butter, 1,157,669 lbs., value £49,517; cheese, 9,774 lbs., value £250; coal, 3,877 tons, value £7,428; horns and hoofs, 777½ tons, value £13,796; manure, 5,751¼ tons, value £24,297; 5 packages, value £2,398; tortoiseshell, 45 packages, value £2,630; copper ore, smelted and matté, 725 tons, value £10,924; oysters, value £13,406; fruit, value £93,291; gold, 785,952 ozs., value £2,613,511; gold ore, 504¾ tons, value £9,491; guano, 6,177 tons, value £14,743; hides, value £482,125; molasses and treacle, 1,472¼ tons, value £11,683; pearl shell, 1,256½ tons, value £137,873; meat, preserved, frozen, and salt, value £1,492,778; silver ore, value £10,936; rum (colonial), 29,746 gallons, value £2,225; sugar, value £1,163,010; tallow, 23,525 tons, value £468,829; timber, value £6,848; tin (ore and smelted), 1,049 tons, value £80,959; wool (clean and greasy), 71,138,545 lbs., value £3,390,779.

The exports overland of live stock comprised 4,057 horses, value £20,904; 204,570 head of cattle, value £707,626; and

462,126 sheep, valued at £180,525; total value of live stock exported, £909,055.

The imports comprise every description of manufactured goods, the bulk coming from the United Kingdom. A large trade in American manufactures, particularly agricultural implements, tools, and articles for domestic use, is also done.

In 1899 the exports amounted in value to £11,942,858, being £23 9s. 5d. per head of population; and the imports to £6,764,097, being £13 5s. 10d. per head.

Immigration.—During 1899 the arrivals in the colony from all quarters numbered 39,916. The departures during the year were 33,590, leaving a net increase of 6,326 souls. Immigration from Great Britain has been re-established, 1,552½ statute adults arriving by various steamers in 1899.

Pacific Island Immigration.—During 1899 16 vessels, aggregating 2,545 tons, were engaged in the trade. They brought 4,716 males and 48 females, principally from the New Hebrides Banks and Solomon Islands, who were distributed over the Ayr, Childers, Bundaberg, Maryborough, Mackay, Ingham, Geraldton, and Cairns districts. The number returned to the Islands was 956—887 males, 69 females, 38 being children. On January 1, 1900, it was estimated that the Pacific Islanders in Queensland numbered 9,053.

Charitable Institutions.—There are 57 public hospitals in the colony (two being for children, one each at Brisbane and Rockhampton), also three benevolent asylums, one at Dunwich (Stradbroke Island), one at Toowoomba the other at Rockhampton, and 14 orphan asylums. Into the hospitals during the year 1899 16,284 patients were admitted; of the 17,452 under treatment, 14,789 were discharged, relieved or cured, 1,171 died, and 1,065 were still under treatment on December 31. These institutions have 370 wards, and 2,061 beds. In addition to the hospitals mentioned there are three lying-in hospitals—at Brisbane (2) and Rockhampton respectively. In the Benevolent asylums the admissions during the year numbered 449, and there were 944 inmates at the end of the year. The number of inmates in the State and licensed orphanages on December 31, 1899, was 747; there were also 137 boarded out and hired out, apprenticed, or adopted. In addition to the foregoing there are three lock hospitals, one at Brisbane, one at Maryborough, and one at Rockhampton; four Lunatic reception Houses and three Lunatic Asylums. The reception houses have 11 wards and 30 beds. In the Asylums and reception houses 1,947 were under treatment during the year. The lunatic asylum at Woogaroo has 63 wards, 185 dormitories, and 1,111 beds; the asylum at Ipswich 10 wards and 120 beds, and the Toowoomba asylum 26 wards, 433 beds. (The proportion of insane to rest of population is about 3 per 1,000, or one in 396.) There is a Blind, Deaf and Dumb Institution at South Brisbane. There are nine Refuges or Homes, four of them being in connection with the Salvation Army. There are also 17 Benevolent Societies, to afford outdoor relief to the distressed, established in the more important towns in the colony, who distributed upwards of £5,050 during 1899.

Police.—The total strength of the force on January 1, 1900, not including Native troopers and trackers, was 845, comprising 1 Chief Inspector, 1 Senior Inspector, 3 First Class Inspectors, 6 Second Class Inspectors, 5 First Class Sub-Inspectors, 3 Second Class, and 5 Third Class, 15 Senior Sergeants, 63 Sergeants, 133 Acting Sergeants, 610 Constables. The number of Native trackers was 135. There are 11 prisons, including the penal establishment at St. Helena, and 5 police gaols.

Law and Justice.—The administration of justice is carried on by a Supreme Court, composed of a Chief Justice and four puisne Judges; by District Courts, each presided over by a District Court Judge; and by Police Magistrates, assisted by Justices of the Peace.

Constitution.—The form of State government is vested in a Governor (the Queen's representative), an Executive Council, and a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Council consists at present (1900) of forty members, nominated by the Crown for life, presided over by a President elected by themselves. The House of Assembly by the Redistribution Bill passed in 1887 now comprises seventy-two members; representing sixty electorates, elected for three years. To exercise the franchise a person must be of the age of twenty-one years; he must also possess a freehold worth £100, or pay rent for a house or land of not less than £10 per annum, or hold a pastoral license from the Crown, or be in receipt of £100 per annum as a salary, or pay £40 per annum for board and lodging, or £10 for lodging alone. He must also be a natural-born or naturalized subject of the Queen, and have resided in the colony two months before voting. Persons having property, either leasehold or freehold, or a license to depasture land in any electoral district in which they do not reside, have the right of a vote in any district in which such property is situated as well as in the district for which they claim as residents. The Premier announced, as as one of the results of the adoption of the Commonwealth Bill, that the principle of one man one vote will be introduced into the electorate system. Members of Parliament are entitled to £300 per annum each, and also to mileage expenses of 1s. 6d. on land, and the actual cost of passage to and fro by sea.

GOVERNMENT AND EXECUTIVE.

Governor and Commander-in-Chief, Right Hon. Charles Wallace Alexander Napier Cochrane-Baillie, Baron Lamington, K.C.M.G., son of the first baron from Annabella Mary Elizabeth, daughter of Alexander Robert Drummond, of Cadlands, Hants, and grand-daughter of the fifth Duke of Rutland, was born 1860, and succeeded his father in 1890. Was educated at Eton and Christ Church, Oxford, B.A., 1881. M.P. for North St. Pancras from 1886 until he succeeded to the peerage. Was Assistant Private Secretary to the Marquis of Salisbury when Prime Minister in 1885-86. Lieutenant Lanarkshire Yeomanry Cavalry. D.L. and J.P. Lanark.

Private Secretary, Pascoe William Grenfell Stuart.

ARTICLES EXEMPTED FROM DUTY.

From 31st March, 1897.

Agricultural Implements and machines, namely:—Acme harrows, cane shavers, chaff-cutting machines, cheese pressers, circular coulters, clod crushers, corn crushers, cultivators, dairy refrigerators, disc harrows, drill-wheel hoe cultivator, earth scoops, fertiliser and drill combined, field and garden rollers, furrower, marker, hiller, and ridger combined, gang ploughs, grain cleaners and dressing machines, grain mills, grain separators, grain sowers, hay presses, hedge cutting and trimming, horse hoe and cultivator combined, horse hoes, horse rakes, huskers and shellers, mowing machines, potato raisers, rake and plough combined, reapers, root cutters, scarifiers, screening, seed drills, sifting, smutters, spading harrows, strawsonisers, straw stackers, stubble diggers, stump extractors, stump-jumping ploughs, sulky ploughs, thatch making, threshers, winnowing machines; alkaline earth; alumina; American oak for staves; animals, alive; anchors over 3 cwt.; antifermentine; art materials and mediums, including canvasses mounted or in rolls, brushes, &c.; art pictures, printed, used as studies or copies by artists; artists' colours; asbestos, unmanufactured; ash timber in plank; asphalt.

Backs (wooden) for brushes; bagging and wool-bagging; ballast, being stone unsuitable for building purposes, gravel, sand, or earth; bark for tanning; bark (long) in bundles; bass and bristles; bicycle and tricycle parts and accessories, rough and unfinished, namely:—brackets, lugs, fork sides, rims, chain wheels and chain rings, hubs, handle bars, stems and T pieces, seat pillar stems and T pieces, crowns and crown plates, spokes, fork and tube strengtheners, steel stamping and forgings, and any other part or parts which may come in rough and unfinished, as may be specified from time to time by the Treasurer and published in the *Gazette*; birthday cards; blocks; boiler plates, boiler tubes; bolts and nuts; books, copy—for schools, with printed headings; books (printed), except for advertising purposes; bookbinders' leather and cloth; bottles, empty; bottling wire; boots, children's, 0 to 6; braces, rachet; brass—bar, sheet, and rolled; brass cocks and valves; brass, ingot; brass screw wire, wove wire, and gauze; brimstone; buckles of every description; bunting, in the piece; buttons, braids, tapes, waddings, pins, needles: and such minor articles required in the making up of apparel, boots, shoes, hats, caps, saddlery, upholstery, carriage and other vehicles, umbrellas, parasols and sunshades, as may be enumerated in any order of the Treasurer and published in the *Government Gazette*.

Cabbage-tree leaf; candlewick; cane shredders; canvas: capsules for bottles; cartridges for sporting purposes, filled and unfilled; cartridge fillers and recappers; carriage and cart makers' materials, namely:—axles, axle-boxes, and whip sockets, carriage shafts, spokes, felloes, naves, hubs, bent wheel rims, spring steel, brass hinges, tacks, tire-bolts, shackle-holders, rubber cloth and American cloth; castor-oil seeds; castor-oil in bulk; chaff-cutting knives; chalk; chloride of lime; Christmas cards; cocoanuts; coin—gold, silver, and bronze; copper—sheet, plain, ingot, rod, wire; copper nails, piping, and wire (thread-covered); copper, perforated, and copper gauze; copper, bar and scrap; copper-wire rope; copper tacks, copper rivets, copper clouts, and Flemish nails; copperas; corks, cork, and cork socking; corn sacks (jute), to contain three bushels; cotton wicks; cotton waste; cotton wool; cotton-seed oil; cotton and linen thread, sewing, knitting, embroidery, crochet, crochet thread, sewing silks and twists; cream separators; cream testers; curiosities (antique); cylinders and tubes containing gas or ammonia.

Diving pumps and dresses; diving dress parts, namely:—helmets, corsets, cup leathers, valves, springs and screws, corset screws, nuts and keys, pump spanners, pipe couplings, face glasses repairing cloth in solution; dredgers and steam tugs to be used in execution of harbour works; droppers and standards for wire fencing; drugs and chemicals, viz.:—acetate of soda, boracic acid, benzoic acid. carbolic acid, citric acid, oxalic acid, phosphoric acid, pyrogallic acid, salicylic acid, sulphurous acid, tannic acid, tartaric acid, albertine, aloes, alum, ammonia, anti-toxin serums, arsenic, bisulphide of carbon; borax, calumba root camphor, carbolate of lime, carbonate of potash, cascara bark, caustic potash, chloride of gold and tin, cinchona bark, collodion, cream of tartar, cyanide of potassium, ergot, Garfield tea, gentian root, glacialine, glycerine, iodine, ipecacuanha root, lithofuge, nitrate of silver, nut-galls, nux vomica, pearl-ash phosphorus, saltpetre, senega root, silicate of soda, soda nitrate, soda sulphate, soda caustic, sulphur, sulphate of copper or blue-stone, sulphate of barytes, sulphate of iron, sulphate of ammonia, sulphate of magnesia, sulphate of potash, sulphate of quinine, sulphide of sodium, superphosphate of lime, strychnine; dye.

Elastic; electro-plating materials, namely:—Nickle anodes, nickle salts, rouge composition, Tripoli composition, wire scratch brushes, polishing mops, wheels, felt and leather; engine packing; engravers' prepared plates or process blocks; explosives, bellit, roburite, sporting powder, and percussion caps, dynamite, gelatine dynamite, lithofracteur, blasting powder, fuse, detonators, and other explosives; eyelet punches and eyelets.

Family portraits and clothing (old), felt and felt sheathing, fibre, cocoanut; fire engines; fish oil in bulk, fish, frozen and fresh; flax; flock; fruit, green; flowers, cut.

Game, frozen and fresh; garden seeds, bulbs, trees, and shrubs; gimp, silk or cotton; glaziers' tools; gold, 'unmanufactured; gold leaf; graining combs; grass yarn or grass rope, twisted; grindstones; gutta percha.

Hatmakers' materials, namely—felt hoods, shellac, galloons, spale-boards for hat boxes, black silk plush, cap-peaks, straps and hat leathers, cork tips and sides, corrugated cork and vents; heirlooms, which have been in use and which have been left by will to, or inherited by, the importer, provided that such articles are not imported for sale, and that the intrinsic value thereof does not exceed 75 per centum of the value of new articles of a similar description; hemp; hessian; hides, raw; hooks and eyes; hose, india-rubber and canvas; hydraulic lifts.

India-rubber; india-rubber insertion; india-rubber in solution; infusorial earth; ink, ruling; ink, printing; insulating materials; iron, ore; iron, plain sheet (not including galvanized); iron, pig; iron, bar; ironrod—from $\frac{1}{16}$ths to $\frac{1}{2}$ inch; channel iron, angle and tee iron, rolled iron joists up to 10 inches by 5 inches; iron, scrap; iron, hoop; iron sleepers, fish plates, points and crossings, switch-box for portable railways and clutch bolts; iron, sheet, chequered and gauze; iron pipes, cast; ivory.

Jewellers' tools:—Bellows, broachers or rimers, burnishers, doming punches and dies, drawplates, drawtongs, bench and hand; emery wheels, felt, wool, leather polishing wheels; furnace bodies, gauges, gravers and scoopers, ingot moulds, mallets, nippers, plyers, polishing lathe heads, polishing lathes, saw-frames, screwdrivers, triblets for rings, tweezers, watch and clock brushes; jute.

Kapock.

Lead, pig; leather—patent, enamelled, kid, hogskins, levant, morocco, and imitations thereof; grained, Russia, chamois, chrome, and glace; linotype metal, linseed; liquid stain for leather; lithographic stones; lithographic ink and colours; locomotives under ten inch cylinders.

Machinery of the following descriptions, not including engines and boilers—Flour-milling; bookbinding and ruling machines; yaryan evaporators; canning machines; steam-threshing machinery. Machinery for carding, spinning, weaving, and finishing the manufacture of fibrous material, and cards for such machinery; machinery used in the manufacture of paper and felting; machinery—Centrifugals—multiple effets; dry-air, for refrigerating, without engine; freezing machines, not including engine power; gas engines; portable engines; sewing machines; traction engines and steam ploughs; tubing for artesian wells. Machines—namely—Planing machines and machines for joinery, hot-air machinery for drying timber, hydraulic hat-moulds, knitting machines, printing machines and presses, but not the motive power (if any) for same; machinery for telegraphic purposes. Machines and machinery, not including boilers and engines, namely:—American band-saw frames, bag-folding, bark-cutting, biscuit, for cutting and stamping designs; bone crushing, bootmaking, bottle washing, brick and tile making, burring, used by fellmongers; burring, used in woollen factories; button fastening, button-making, cash registering and numbering, cloth cutting, condensers, corrugated iron curving, darning, drilling, drying (Cummer style), electric, and fittings; electrotyping, embossing, engine governors, eyelet, felting, flock-making, fret-saw, fruit-paring, fruit-preserving, honeycomb-making, horse clippers, label cutting, lathes, manure, mincing, oil expressing, patent brakes for locomotives and motors, pill-making, plate bending, platform weighbridges, printers' and bookbinders', punching, punching and flaring hoops, rice dressing and cleaning, rubber stamp making, shaping, shearing, for iron; sheep shearing, and all parts thereof; slotting, soda water, steam hammers, stone breakers, stone grinding (for printers), tinsmiths, tobacco cutting, twine balling, washing and scouring, for manufacture of blankets and rugs; washing and wringing, all kinds; wire net making, woodworkers' boring. Mining machinery, namely:—air compressors, ball mills for crushing quartz, rock drills, roller mills for crushing quartz, steel rings for quartz mills screens and gratings, vanners. Machines and machinery, and parts thereof, required for mining purposes, agricultural, pastoral, or other purposes, which are not specified, and are of new invention, and of a description not heretofore made in Queensland, as may be exempted from time to time by the Governor in Council, and published in the *Gazette*. Machine belting, not leather; magic lanterns and slides, malleable iron piping; manure, guano; maps, charts, and globes; marble, unwrought; materials, for scientific purposes, of china, earthenware, and porcelain; metal fittings for portmanteaus, travelling bags, and leggings; metal frames for bags and satchels; metal tubing, except tin, zinc, welded and lead; millet straw; mould boards and shears, steel for ploughs and steel beams; mill-stones; mill silk; Muntz metal; music; Myrabolans, unground.

Naval and military stores imported for the service of the Colonial Governments, or for the use of Her Majesty's land or sea forces; newspapers (printed); Newlandite.

Oakum; oars; oil of rhodium; oil engines and fittings which can be only used for oil engines; opticians' materials—optical tools, lenses, rough-edged; spectacle and eye-glass frames, empty, and repairing parts; spectacle and eye-glass cases,

empty; ores; outside packages, in which goods are ordinarily imported, and which are of no commercial value except as covering for goods.

Packages returned empty in which Queensland produce has been exported, namely:—Crates, bales, and bags, provided that the number of such articles re-imported by any person or firm is not greater than that exported by them, and are of a similar size and kind; paint brushes; paper patterns; paper, hand-made or machine-made, book or writing, of sizes not less than the size known as "demy" when in original wrappers, and with uncut edges as it leaves the mill; paper (printing); pallet knives; passengers' cabin furniture and baggage and passengers' personal effects (not including vehicles, musical instruments, glassware, chinaware, silver and gold plate, and plated goods, and furniture other than cabin furniture), which are imported with and by passengers *bonâ fide* for their own personal use, and not imported for the purpose of sale; patent porcelain or steel roller for flour mills; persons coming to reside permanently in Queensland may import with them their furniture and effects which have been in use, and are not imported for sale, up to the value of one hundred pounds (£100), duty free; *Phormium tenax*; phosphorised pollard and distributing carts for same; photographic materials—cameras, sensitised plates, lenses, and mounts; picture cards for schools; plated nails; pottery materials, namely:—Potters' lead, Paris white, ground body manganese, oxides of chrome, copper, zinc, tin, black cobalt and uranium, sub-oxide of copper, carbonate of iron, bichromate of potash, white fluorspar, ball clay and Brandon mineral paint, ground flint, cornish stone, china clay, ground glass, felspar, granite shavings, glaze for porcelain or china; preservitas; precious stones, unset; pumps.

Quicksilver.

Rattans, canes and willows; regalia for friendly societies; resin; reaper and binder—combined, strippers.

Saddlers' tools; saddlers' ironmongery, such as hames, and mounts for harness, straining, surcingle, brace, girth, and roller webs; collar check; saddle serge; saddle trees; saddle-binding; safety matches; salt; scientific instruments, being metal or glassware; seaming twine; sheep dip; sheep lick; shoe pegs, peg wood; shoemakers' nails, viz.:—Sparrow-bills, wrought and cast tips, bright and black malleable hobs, wrought hobs, nuggets, Hungarian cut sprigs, steel bills, tingles, iron and brass rivets; shot; silver—bar, ingot, and sheet; silver, unmanufactured; silver leaf; skins, raw; slates, school; slate pencils; soda-ash; sizeoline and hytra size; soap colourings; specimens of natural history; split wood staves; staymakers' binding, eyelet-holes, corset fasteners, jean, lasting, and cotell; starch, manufactured in bond from imported rice, under such restrictions and regulations as the Treasurer may impose; staples for wire fencing; steel wire rope; steel rails; steel—unwrought, sheet, bar, angle, and tee; straw, mill, and paste boards; straw plaits, palm-leaf plaits, Tuscan plaits; surgical and dental appliances and instruments, namely:—Aspirators, atomisers for surgical purposes only, bandages, basins (pus), batteries, galvanic belts, surgical binders, bistouries, bottles, injection bougies, brushes (throat), catheters, chairs (dental, complete), chairs (operating, surgical), dilators, elevators, bed-clothes, enemas, exhausters, breast forceps, head-rests (dental), inhalers, injectors, instruments, namely:—amputation, cupping, dissecting, ear, eye, midwifery, tooth, uterine, and veterinary, instruments and engines used in dental operations, lancets, lamps (used solely for surgical or dental purposes), laryngoscopes, pessaries, probes, protectors (chest), pumps (stomach), specula, splints, stethoscopes, stockings (elastic, silk), suspenders, syringes, trocars, trusses, tubes, and urinometers.

Tailors' trimmings, namely:—French canvas, buckram, wadding, padding; silk, worsted and cotton bindings and braids; stay binding; tar, Stockholm; thimbles (ship's gear); tinfoil; tin plates; tools, namely:—Grindery tools, edge-planes, kit, peg, shaves, and welt-trimmers; adzes, anvils, augers, screw and shell and auger bits; awls, awl pads, and hafts; axes, hatchets, tomahawks; bevels, blowpipes, braces and bits, and breastdrills; bruzzes for wheelwrights; bung-borers; brushes, patent roller for blockmaking; chisels and gouges; choppers and cleavers, butchers'; compasses—dividers: compasses—carpenters' and coopers'; diamonds, glaziers'; files and rasps; forks—digging, hay, and stable; hoes, garden, plantation; knives—butchers', hay, pruning, putty, saddlers', shoemakers', cane; needles of all sorts; palms, leather; planes and plane-irons; rules, tapes, and chains—measuring; saws of all kinds, but not the machinery (if any) connected therewith: scissors, scrapers (ship); screws—bench brass, coach, galvanized, hand, table, wood; scythes and scythe-handles; shears—garden, hedge, sheep, tailors', tinmen's; shovels—iron or wood; sickles, spades; spokeshaves, shaves, and spoke trimmers; squares; squeezers, cork; steels, butchers'; stocks and dies, and taps for same; saddlers' tools, namely:—Rein rounders, claw, carving, French edge, patent leather tools, wheels, rosette cutters; trowels; vices, and patent saw-vices; tools—hammers (mining), picks (mining); trace and plough chains, and iron hames; traps, iron and steel; twine, for net-making, only when imported by net-makers; type; typewriters.

Umbrella-makers' materials, namely—sticks, runners, notches, caps, ferrules, cups, ribs, stretchers, tips, and rings, for use in the making of umbrellas, parasols, and sunshades; reversible and levantine silk mixtures, of not less than 44 inches in width.

Valonia, unground.

Whalebone; wheels and axles, steel; wire, iron—plain, barbed, and galvanised; wire, steel; wire, heel; wire netting; wooden hoops for casks; wool, unmanufactured; wool packs; works of art, namely:—paintings, engravings, and statuary.

Yarn—Russian, Italian, and coir; yarn—jute and hemp.

Zinc.

Articles and materials (as may from time to time be specified by the Treasurer) which are suited only for, and are to be used and applied solely in the fabrication of goods within the colony. All decisions of the Treasurer in reference to articles so admitted free to be published from time to time in the *Government Gazette*.

AD VALOREM DUTIES.

For every £100 of the value thereof, a duty of £5.

Alpaca cloth, with border.
Cotton piece goods; Crimean flannel, in the piece.
Furniture springs.
Linen piece goods.
Moleskin, in the piece.
Paper, except otherwise enumerated.
Tailors' trimmings—Italians.
Union ticks, in the piece.
Zanella cloth, with border.

For every £100 of the value thereof, a duty of £15.

Bags and sacks, being bran, corn sacks (except jute corn sacks to contain 3 bushels, free, March 31, 1897, flour, gunny, ore, and sugar bags and mats; bicycles and tricycles; bootcloth; burnishing ink.

Carriage-makers' materials, viz.:—Carriage springs, carriage trimmings, carriage cloth in the piece; castors for furniture; casks, and staves and heads imported in shooks; cigarette papers; cocoa-beans, raw; cotton, raw; cutlery; curled hair.

Drapery and millinery, viz:—bonnet shapes; cotton blind nets; cords—cotton, linen; worsted (in hanks, coils and reels); piece goods, viz.:—baize, Bedford cord, cloths, dress goods, flannel, linseys, mosquito nets and valence nets, ribbons, serges and estamenes, silks, trimmings (mantle and dress), tweeds, velvets and velvcteens, woollens; wool (Berlin and knitting); carpeting, druggeting, floorcloth, oilcloth (in the piece); lace (cotton and silk); straw hats and bonnets (untrimmed and unlined, paper and glazed calico not to be considered lining).

Gilt mouldings for pictures; glass-stoppers for soda-water bottles.

Hair-seating for furniture.

Ironmongery and hardware, viz:—door-knobs—glass, brass and china; emery cloth, emery paper, emery powder; hammers (except mining); hinges (except otherwise enumerated); holystones; irons—hatters', Italian, smoothing, and tailors'; latches; locks, mortice furniture, all kinds; patent door-springs; pencils, carpenters'; sash fasteners; tinned rivets, weighing machines of all kinds (except platform weighbridges), and weights for same; isinglass.

Lamp chimneys and globes; lemon peel in brine.

Ostrich feathers, raw.

Paper hangings; pens.

Saddlers' materials, viz.:—saddle-cloths and saddle-girths made up; sponge; stone, unwrought.

Watches, clocks, and all parts thereof; window and plate glass.

Upon all goods, wares, and merchandise, imported into Queensland other than those mentioned in the foregoing schedules, for every £100 of the value thereof a duty of £25.

DIVIDENDS DUTY ACT.

(Came into operation, September 19, 1890.)

For and in respect of all dividends declared or ascertained by, or becoming due from any Company having its Head Office or chief place of business in Queensland, for every twenty shillings of the amount of such dividend the sum of one shilling and a proportionate sum for any part of such twenty shillings.

In the case of Companies not having their Head Office or chief place of business in Queensland (and not being insurance companies), the same duty shall be paid on so much of the total dividends declared by the company during the year, as is proportionate to the average amount of capital employed in Queensland during the year, as compared with the total average capital of the Company during the year.

In the case of mining companies, the first and subsequent dividends shall be taken to be applied in repayment of the cost actually incurred by the Company before the declaration of the first dividend in respect of labour or material employed in developing the mine, and in the second place, in repayment of three-fourths of the cost of any machinery erected for raising ores and other materials from the mine.

Every Company carrying on life fire, fidelity guarantee, or marine insurance business, a sum equal to twenty shillings for every one hundred pounds on the amount of the gross premiums received (excluding any portion actually paid away by way of re-insurance effected in Queensland with any other company) during the year ending December 31.

TOTALISATOR TAX.

	£	s.	d
On all moneys received by the conductor of any authorized Totalisator by way of stakes, wagers, or bets, or agreed to be paid to him, for every twenty shillings	0	0	6

PILOTAGE RATES.

For anchorages: 4d. to 6d. per ton according to locality, the minimum rate being 20s. and 50s. respectively.

For distances: according to distance and tonnage. Minimum rates for 3 miles: vessels under 100 tons, 10s.; vessels over 2,000 tons, 100s. Maximum rates for upwards of 30 miles: vessels under 100 tons, 30s. vessels over 2,000 tons, 240s.

Vessels calling at Queensland ports to land or ship passengers, 1s. 6d. per head or per ton of cargo landed or shipped. Intercolonial vessels: where master is exempt, 6d. per ton once in every month; for every coaster, 4d. per ton (if under 50 tons, 2d. per ton).

COMMERCIAL CHARGES, BRISBANE.

On sale of merchandise, whether for cash or credit	5 per cent.
On purchases of merchandise when not in funds—	
For the first £500 or under	5 ,,
On all over £500	2½ ,,
On cash purchases when in funds—	
For the first £1,000 or under	2½ per cent.
On all above £1,000	1½ ,,

TOWNS IN QUEENSLAND.

ADAVALE (25° 50′ S. lat., 144° 36′ E. long.), a postal township, with savings bank and telegraph station and money-order office, occupying a small portion of a large flat in the Warrego district and electorate, about 610 miles W. of Brisbane, and 116 miles W. of Charleville (to which a coach runs twice weekly, fare £2), situated on the Blackwater Creek, 7 miles above its junction with the Bulloo River. There are here four hotels, Imperial, Green Gate, Blackwater and Great Western, four stores, four tradesmen's premises, post and telegraph office and police quarters, courthouse, Divisional Board's Hall—a commodious building and provisional school. Episcopal minister and Roman Catholic priest visit occasionally. Coach runs weekly to Windorah (136 miles, and Thargomindah (210 miles). The Racing Club here holds three meetings annually, at which large sums, as well as valuable trophies, are given away. It is the centre of a fine pastoral district, the principal stations being Milo, Gumbardo, Kyabra, Gooyea, Welford Downs and others. In the Jundah district, about 40 miles distant, mining for opals is carried on. Population, 192 (census 1891).

ALBERTON (27° 54′ S. lat., 153° 14′ E. long.), a small township situated on the Logan river, in the parish of Albert, county of Ward, electorate of Logan and police district of Beenleigh, 28 miles NW. of Brisbane, It has a Lutheran chapel, State school (No. 265), and private school. Agricultural district, producing sugar, maize, potatoes, and arrowroot. Steamer communication with Brisbane regularly, and by Beenleigh railway (4 miles). Population, 63 (census 1891), now about 200.

ALBION (27° 25′ S. lat., 153° 4′ E. long.), a suburban township (county Stanley, electorate of Toombul), forming portions of the Shire of Windsor and Toombul Divisional Board, 3½ miles from Brisbane, situate on the Breakfast Creek. It is a station with telegraphic communication with Brisbane on the Sandgate Railway; there is also frequent communication by omnibus. The direct line, *viâ* Fortitude Valley, was opened to here in November, 1890. Industries: saw-mill, a pottery, brickyards, and stone quarries. There are Episcopal, Presbyterian, Baptist, and Salvation Army places of worship, a branch of the Queensland National Bank, and a hotel, the Albion. In a large and commodious public hall, Freemasons, Oddfellows, and other societies hold their meetings. There is a post and telephone office, money-order office and savings bank, and a daily delivery of mails.

ALICE (24° 2′ S. lat., 144° 47′ E. long.), a post and telegraph station on the Central Railway, in the electorate of Mitchell, 326 miles W. of Rockhampton. Delta, Evora, and an outstation of Coreena, called Lochnagar, have all their supplies sent here, and their wool also is despatched from here. The next railway station to Alice is Busthinia, 4 miles. Eight miles from Alice is Back Creek, where is an artesian well and a tank, which is filled by a windmill.

ALLORA (28° 1′ S. lat., 152° 1′ E. long.), a small municipal township, with money-order office, savings bank, telegraph and railway station, 17 miles from Warwick, and 153 miles by rail SW. of Brisbane. A branch line from Hendon, 3½ miles distant, was opened during 1897. This railway is one of the lines constructed under the Railway Guarantee Act, 1895. It is situated on the south side of Dalrymple Creek (which falls into the Condamine), in the county of Merivale, electorate of Cunningham, of which it is the headquarters. There are 70 miles of streets and roads in the municipality, which was proclaimed on July 24, 1869; area 18 7-10 square miles. The value of the ratable property is estimated at £56,319. In 1890 Allora was gazetted a licensing district. It is also the headquarters of the Allora Police district. The district is an agricultural and pastoral one. The Australian Joint Stock Bank, Queensland National Bank, post and telegraph office, court-house, police quarters and town hall are the principal public buildings. There is also a School of Arts, with library of 1,395 vols., and two large halls for entertainments. State school (No. 3). The places of worship comprise Episcopal, Methodist, Presbyterian, and Roman Catholic churches. Hotels: Princess of Wales, Tattersall's, Club, Commercial and Royal, and two boarding houses. Two steam flour-mills and a saw-mill are here. Lodges: Masonic (E.C.), Oddfellows, H.A.B.C. Society, and Protestant Alliance. Allora is surrounded on every side by farms, on which wheat, maize and lucerne (for hay) are principally grown. The soil is a deep black, and is of exceeding richness, giving heavy yields of wheat, as well as growing all descriptions of vegetables of a temperate clime to great perfection. The Central Downs Agricultural and Horticultural Society meets here. The far-famed stations of Glengallan, East Talgai, Goomburra, and Clifton are all within a radius of 10 miles of Allora. In January, 1898, the Headington Hill Estate, purchased by the Government under the provisions of the Agricultural Lands Repurchase Act, comprising nearly 37,000 acres, was thrown open to selection, and almost the entire area has been selected. Over 8,000 acres of the Glengallan Estate have also been similarly purchased and selected. There is a large supply of valuable timber at the head of Dalrymple Creek, among which are very fine samples of cedar, beech, and mahogany, and an almost inexhaustible supply of pine and hardwood. The Clifton Coal Mine is situated about five miles from Allora, on the Southern Railway line. The coal is of good quality. There is also a very good supply of fireclay; but neither at present is being worked. Formation: Mostly volcanic alluvial black soil on flats, the ridges being basaltic. The water supply is

obtained from the creek and from wells, water being found at a depth of from 30 to 40 feet on the flats. Population, 994 (census 1891), now about 1,100. Newspaper: *Allora Guardian.*

ARAMAC (22° 59′ S. lat., 145° 14′ long.), a post-town about 750 miles NW. of Brisbane, 40 miles N. from Barcaldine, the nearest railway station, and 390 miles from Rockhampton, in the Mitchell electorate and county of Rodney, situated on a beautiful site surrounded by magnificent downs on the Aramac Creek, a tributary of the Thompson River. Coaches run to the Barcaldine Railway Station, 42 miles, and to Muttaburra twice weekly, fares, 25s.; also to Ilfracombe weekly, fare, 25s. Hotels: Royal, Aramac, Albion, and Marathon. Branches of the Government Savings Bank and Bank of New South Wales are here, also money-order office, telegraph station, hospital, court-house and police station, school of arts with 658 vols., State school (No. 312), cordial factory, six general stores, and tradesmen's premises. The surrounding country is taken up by sheep runs. Several homestead farms and grazing selections have been surveyed and taken, and when favoured by good seasons produce fair returns, and large areas of land in 20,000 acre blocks have been selected, and fenced and stocked with sheep or cattle. There are splendid high downs, well grassed; the natural water is limited, and the climate generally arid. There is no scarcity of water in the town, owing to the fact that several artesian wells overflow into the Politic and Pelican creeks tributary to the Aramac. An artesian bore put down here struck a fine supply of water at 1,400 feet depth; estimated daily output 750,000 gallons, and supplying an excellent free public bath, through which the water from the bore flows directly into the Aramac Creek. The town is also reticulated from the bore, and the town fruit and vegetable gardens are irrigated by its means. The water diffuses a sulphurous smell, similar to that of other bores in the neighbourhood, which have an excellent medicinal reputation for rheumatic and kindred affections. Chinamen's gardens afford supply of vegetables in good seasons. It is the place of meeting for the divisional board, petty sessions, licensing court and small debts court, and there is a flourishing Jockey Club, also Masonic Lodge. A Roman Catholic priest visits monthly, regular weekly services being conducted by lay readers, and there is an Episcopal church (visited monthly). The Aramac Divisional Board, also the Marsupial Board, hold their meetings here. Geological formation: soft sedimentary rock, with an upper stratum of marine fossils, belemnites, and innumerable species of bivalves. Population of town, 389; district (census 1891), 2,765.

ARRILALAH. *See* FOREST GROVE.

AUGATHELLA (25° 47 S. lat., 146° 34′ E. long.), electorate of Warrego, co. of Orrery and shire of Augathella, formerly known as ELLANGOWAN, is a post-town with savings bank, money-order office and telegraph station on the left bank of the Warrego river; on the direct road from Mitchell, Morven, and Charleville to Tambo, 52 miles from Charleville, 80 from Tambo, and 62½ miles from Morven; about 180 miles NW. of Roma, and 489 miles W.N.W. from Brisbane, with which there is bi-weekly mail communication by coach to Charleville railway station; a coach runs also to Morven twice a week. Public-houses: Royal, Ellangowan and Tattersalls, 5 stores, post and telegraph office, court-house, police barracks, 2 saddlers' shops, 1 hairdresser, 1 baker, 2 blacksmiths, 1 shoemaker's shop, a butchery, and a State school (No. 357). Anglican and Roman Catholic clergy visit. Augathella is the business centre of a large number of stations, and there is a large through traffic ot teams and cattle. It is the principal stock route from the West to the leading markets of Queensland and N. S. Wales. Burenda cattle station is 12 miles distant. Population 238 (census 1891), with vicinity about 327. There are here Mulga soil, fit for wheat, and rich black soil for farming. Nive Downs and Burenda stations are noted for their beautiful prairie plains.

AYR (19° 33′ S. lat., 147° 24′ E. long.), a township on the Bondekin Delta (Bowen electorate), 60 miles SE. from Townsville and 810 miles NW. of Brisbane, having post and money-order office, telegraph station, and Government savings bank. It is situated near Plantation Creek, about eight miles above the landing wharf for coasting steamers, within a radius of about four miles of the Pioneer, Seaforth, and Kalamia stations. It has direct communication with Townsville and Bowen, to the former by coach four times weekly to the Reid River, and thence by rail, and also by steamer from Plantation and Barrata Creek at irregular intervals. To Bowen the transit is by coach twice weekly to Wangarratta, thence by rail. The Government buildings are a court-house, police station, gaol, post office and State school (with an attendance of 110). There are in the town two hotels, (Delta and Queen's), five stores, two saddlers, two blacksmiths. There is but one church, the Church of England, but the Presbyterians hold service in the Federal Hall each Sunday evening, and the town is visited at stated intervals by by Roman Catholic clergymen from Bowen. Government officers are P.M., senior constable, and two constables, postmaster, and assistant medical officer, and school teacher and assistant. Masons are represented by the Delta lodge, S.C.A., Oddfellows by the Lower Burdekin lodge, M.U.I.O.O.F. A Progress Association is in existence, as is also a Turf Club (the Burdekin Delta). The other associations are the Lower Burdekin Farmers, the Lower Burdekin Athletic Club, and the Ayr Chamber of Commerce. The district is purely agricultural, the manufacture of sugar being the only industry carried on, for which purpose there are three mills. The district possesses very few attractions to the tourist, beyond the shooting and the fishing (game and fish being plentiful), the only point of interest being the irrigation works, instituted and carried on by the various plantations. Local government is represented by the Ayr Divisional Board. The population of the town is about 210, of the town and district about 2,200 (of which 700 are aliens); these figures include children and aliens. Newspaper: *Ayr Chronicle.* Kalamia and Seaforth mills are now amalgamated, and are worked under one management. There are two other townships adjacent to Ayr, Brandon and Clare. Brandon is four miles out; has two hotels (Imperial and Pioneer), Church of England, Catholic church, post-office, and four stores. Clare has one hotel, store, and telegraph office.

BALLANDEAN (28° 50′ S. lat., 151° 45′ E. long.), a receiving office and railway station, in the county of Bentinck, electorate of Carnarvon, and Stanthorpe police district, situated on the Severn river, 14 miles SSW. of Stanthorpe, 221 miles SW. of Brisbane. Tin-mining, stock-rearing, and fruit, tobacco and maize-growing are the industries of the district. The Ballandean cattle station is here. Hotel: Britannia. Provisional school, one store. The country is granite, sandy, with lime and clay. Silver, copper, gold, and other minerals have been discovered in the district, also bismuth. A fine quality of marble has also been found in the vicinity. Population, 108 (census 1886).

BANANA (24° 29′ S. lat., 150° 6′ E. long.), a post-town, savings bank, and telegraph station and district registry office, in the county of Ferguson, electorate of Port Curtis, police district of Banana, on the road from Dalby to Westwood, near the Dawson river (about 14 miles), 320 miles (374 by telegraph route) NW. of Brisbane, and 110 miles S. of Rockhampton. Coach runs weekly to and from Westwood railway station (70 miles), fare 30s. Hotels: Criterion and Banana. Trades—butcher, blacksmith, and a storekeeper. The township is situated on a gentle rise, at the foot of which is a large lagoon, fringed by a belt of scrub, adding beauty to the scene and denoting the fertility of the soil. From this lagoon the water supply is derived. In 1885 this dried up, and a well was sunk for the use of the townspeople, when an abundant supply of water was struck at a depth of 70 feet. There is a very fair supply of water in the well at all times, but it is inclined to be brackish; but for this, water would have had to be brought from the Dawson. Generally the district suffers from deficient water-supply in dry times: wells have been sunk in various places along the main road by the Divisional Board. The Divisional Board completed in the latter part of 1890, within sight of Banana, a fine dam, which proved a great success, and is expected to conserve a constant water supply. Public buildings: court-house, lock-up, barracks, school-house (No. 5), and post and telegraph office. The Banana Divisional Board meets here and a Lands office is now established. The district surrounding Banana is purely pastoral, but the soil is said to be well adapted for agricultural purposes. At Woolein Creek, and also at Camboon, 24 and 45 miles distant respectively, quartz reefs have been found. Character of country—black soil plains. Population, 117 (census 1891).

BARCALDINE (23° 33′ S. lat., 145° 17′ E. long.) (county Rodney), formerly Lagoon Creek, a station on the Central Railway, 358 miles W. of Rockhampton, with post, money-order, telegraph, and savings bank office. Mail coach to Blackhall weekly, and to Aramac and Muttaburra twice a week. It lies 869 feet above sea-level. It has a District Court, convent, and convent school, a State school (No. 531), a public hall, a Masonic hall, and a School of Arts reading-room, with library of 1,100 vols. The lodges of the Masons (E.C.), Oddfellows (M.U.), Hibernians, and Foresters (A.O.F.), meet here. Places of worship for Primitive Methodists, Anglicans, Roman Catholics, also Salvation Army barracks, branches of the Queensland National and New South Wales Banks, the Victoria Hospital, and three carrying agencies. Hotels: Shakespeare, Royal, Union, Welcome Home, West End, Commercial, Carriers' Arms, Springsure, the Exchange, and Railway. A new Masonic hall is about to be erected, and a lands office has been built. The stations (sheep) in the neighbourhood are: Saltern Creek, Barcaldine, Delta, Dalgi, Lochnagar, Home Creek, Evora, Leichhardt, Tara, Coreena, and Dunraven, and there are several grazing farms in the vicinity of the town. Shearing machines are now fixed at Westbourne woolscour, five miles out, and at the local woolscour. Water is obtained from three artesian wells. The first one, sunk by the Government at a depth of 690 feet, yielded 175,000 gallons per day, and though a diminution in the flow was reported, the water is now running stronger than when the bore was first put down. The second one was put down by the Divisional Board, and yields about one million gallons per day; depth, 1,310 feet. The third was also put down by the Board; depth 1,420 ft., flow 800,000 gallons. At the railway station sheep and cattle yards are provided with troughs for watering travelling stock. A large wool-scouring works is supplied with artesian water from a bore put down near the establishment. A large boiling-down works, with wool-scouring plant, has been established at Westbourne, 5 miles from Barcaldine, the water for which is supplied by an artesian well. There are two other wool-scouring establishments in operation, a soap works, a brewery, a boiling-down works, and a steam joinery. The town is situated on the edge of the Downs, and some of the best country in the district is open for selection here. Some of the settlers are now trying wheat growing. There are ten artesian wells on Corinda station, six on Saltern Creek, the largest of which yields 1,500,000 gallons per day, several on Coreena, two on Leichhardt, three on Tara, one on Peuts, one on Dunraven, one on Clover Hills, one on Elton grazing farms, one at Home Creek, one at Evora, and two on the Aramac Road. Two wells, in both of which water has been struck in useful quantities, at Wellshot. Most of the grazing farms open to

date in this district have been selected and stocked. The town generally is reported to be progressing. Newspaper: the *Western Champion*. Population (census 1891), 2,482.

BEAUDESERT (co. Ward) (27° 59′ S. lat., 153° 2′ E. long.), a post town, with money-order office, Government savings bank, telegraph, and railway terminus of the Beaudesert branch of the South Coast line, 47 miles from Brisbane. It has several tradesmen's premises, an Episcopal church, (St. Thomas), Roman Catholic church (St. Mary), and Baptist church, Court of Petty Sessions, lock-up, Oddfellows' lodge, post and telegraph office, and three hotels. There are two State and one private schools, one bank, Q.N.B., eight saw-mills, several creameries, a butter factory, and a cottage hospital. Formation: basaltic flats. Population (census 1891), 450. Newspapers: *Beaudesert Despatch*.

BEENLEIGH (27° 44′ S. lat., 153° 15′ E. long.), county of Ward, parish of Boyd, electorate and police district of Logan, situate between the rivers Albert and Logan, a short distance from the western bank of the former, is the chief town of the Logan district. The river is navigable for many miles above it, and steamers ply on it to and from Brisbane, with which it is connected by railway, 24 miles; and Southport, 26 miles. Many small townships and industrious communities surround and are in touch with it, viz.—Yatala, Waterford, Alberton, Gramzow, Loganholme, Mount Cotton, Redland Bay, Woolfdean, Pimpama, Coomera, Nerang, Tambourine, Beaudesert, etc., nearly all enjoying railway communication. A mail coach plies to and from Tambourine (15 miles) daily, fare 3s. Sundry other mails are delivered by horse. The town itself is of a good size, possessing railway station, court-house, police quarters, with their accessories, post and telegraph bureau, with its adjuncts of savings bank and money-order office, pound yard, first-class State school: five churches, Church of England, Wesleyan, two Lutheran and the Apostolic, four hotels of commodious size, viz.—Imperial, Railway, Beenleigh, and Roval, School of Arts with 265 vols., with one of the finest dancing halls in the colony, Masonic lodge, and agricultural show grounds, with yards, ring, and all other requisite conveniences. There are also racing, cricket, tennis and bowling clubs. A police magistrate resides in the town. There are several general and tradesmen's stores, also a resident doctor, and chemist's shop. It is surrounded by several sugar mills, central and private; two distilleries, and two soda-water factories. The water supply is derived from a small reservoir situate towards the west of the town. The whole district was exceedingly prosperous until the disastrous flood of 21st January, 1887, gave it a severe check, ruining many, and injuring all more or less. The successive floods of 1893 also caused a good deal of damage to the sugar crop, but there has been of late a satisfactory extension of industry throughout the whole district. Two sugar-mills are on the Albert River at Yatala, a mile distant, while others of smaller capacity are at various centres. Long experience has proved the thorough adaptability of its rich varied soils and genial climate for the successful growth of the sugar-cane, which amply repays the labour expended upon it. It is bought by the manufacturers either delivered at the rollers, or on the river bank, whence loaded into the punts, which are brought alongside of and taken away from the growers' various properties by steam launch. Beenleigh is the centre of an extensive agricultural district, the population being chiefly composed of the German element, who make the best of farmers and are a most industrious class of people. They grow all kinds of produce on their various farms, but prefer sugar cane. Arrowroot is extensively grown and manufactured at Pimpama, the clear running streams there giving it a beautiful and delicate appearance. It is compressed into neat 1lb. packages, and surplus exported to London. Several saw-mills are scattered over the district, timber being plentiful. Brick-making constitutes also one of the varied industries. The breeding of horses, cattle, and pigs is a business of no mean dimensions; and dairying occupies a large share of attention. The climate is exceedingly genial and healthy. Beenleigh is a prettily located town, high and dry, and its adjacent surroundings are highly picturesque. The Logan electorate returns one member to the House of Parliament; some years ago it was partitioned into an additional electorate—the Albert, which returns one member also. Formation: argillaceous and quartzose schists and basalt. Population (census 1891), 536. Newspaper: *Logan and Albert Leader*.

BETOOTA, a township and receiving office on the Mount Leonard station, in the North Gregory district (co. Rosebery), situated about midway between Canterbury and Birdsville, about 900 miles W. from Brisbane, and about 25 miles from the South Australian border, at the junction of several roads—Windorah to Birdsville, the Diamentina to South Australia *viâ* Haddon, and the stock route from the Herbert and Diamentina to Bourke and Wodonga; consequently, it may be expected to have a fair trade in the future. Brown's Creek passes round the town on two sides, forming an island in flood times. On the north side a water-hole gives a permanent supply to the town. It has Custom House officers' quarters, police barracks, a hotel, store, saddler's, and butcher's shop. Grazing locality. Population, about 50

BIGGENDEN. *See* MOUNT BIGGENDEN.

BIRDSVILLE, (25° 55 S lat., 139° 20 E. long.), a post-town in the co. of Rosebery, and Diamentina division, electorate of Bulloo and Gregory, on the west bank of the Everard, an outside channel of the Diamentina river, about seven miles on the Queensland side of the South Australian border, 15 miles from Pandie Pandie (S.A.), and about 340 miles from the Hergott Springs (S.A.) railway station, to which a coach runs weekly (fare, £7 10s.), 950 miles W. of Brisbane. The principal mail route from Brisbane is *viâ* Charleville, Windorah, and Betoota. There are also three other mail routes—Birdsville to Boulia (257 miles); Birdsville to Dubbo Downs (150 miles), fortnightly; Birdsville to Haddon Downs (S.A.), 120 miles, fortnightly. These three mails are run with pack-horses. Hotels: Birdsville, Royal, and Tattersall's; there are three stores, two butchers' shops, and a cordial manufactory, and a court-house, customs, and police station. There are three vegetable gardens kept by Chinamen. The Diamentina Divisional Board meets at Monkira. There is a weekly mail from Brisbane, Hergott Springs and Adelaide, with which latter place much of the business of the district is done, and whence all the stores are brought principally by camels. The southern markets are largely supplied with fat cattle from the stations around here. District is purely pastoral, rather thinly grassed, principally stony plains, stony ridges, and sand hills, with flooded flats. There are about 52 permanent residents and 3 Chinese.

BLACKALL (24° 25′ 37″ S. lat., 145° 28′ 3″ E. long.), a municipal borough (incorporated May 20, 1880), with money-order, telegraph and savings bank office, in the county of Tambo, and Barcoo electorate, on the Barcoo river, about 625 miles NW. of Brisbane, 380 miles inland from Rockhampton, and 75 miles S. from Jericho Railway Station. "It is prettily situated in the centre of undulating plains upon a sandy ridge, and runs parallel with the Barcoo river." Hotels, Dash's, Royal, Prince of Wales, Universal, Bushman's Arms, Barcoo, and Tattersall's; and several stores and tradesmen's shops. The District Commissioner of Crown Lands has his office here. Public buildings comprise a lock-up, inspector's quarters, Lands Office, Town Hall, court-house, Council Chambers, a district gaol, post and telegraph office, parsonage, and hospital. Churches: Anglican, and Roman Catholic. Banks: Queensland National and New South Wales. State school, No. 299 Newspaper: *Barcoo Independent*. School of Arts, with library of 972 vols. The district is almost entirely pastoral. The sheep stations are Northampton Downs, Minnie Downs, Ravensbourne, Listowel Downs, Terrick Terrick, Malvern Hills, Avington, Lorne, Alice Downs and Bloomfield. The inhabitants are well supplied with vegetables from market gardens. A reservoir supplies the township with water, and there is in addition an artesian supply yielding 280,000 gallons daily. The communication is by rail from Rockhampton to Jericho, 75 miles, thence coach; or by coach to Barcaldine railway station, or coach to Charlesville. Blackall is the most central town in Queensland. The Divisional Board, also the Marsupial Board, meet here. There is a lodge of Oddfellows, Foresters, and a Masonic lodge, also a cricket, a racing, tennis, athletic and bicycle clubs, and a pastoral society. The estimated area of the municipality is 5 square miles, having 8 miles of roads, 155 dwellings, and property of the ratable value of £21,770. The country around Blackall is well grassed, timbered chiefly with gidyah, and considered first-class for sheep. Much land has been taken up by selectors, and there are a few grazing areas. Formation: blue rock, sandstone, and limestone. Population, by census 1891, of the municipality 777 (now 800), of the census district 4,529.

BLACK SNAKE (26° 6′ S. lat., 152° 28′ E. long.), co. Lennox, electorate of Wide Bay, police district of Gympie, is about 12 miles from Kilkivan SW. at an altitude of 1,200 feet, and about 170 miles N. by W. of Brisbane, situated on the Black Snake Creek. Hotel: Black Snake, with store in connection. There are eight distinct lines of reefs, notably the "Black Snake" and the "Mariners," which when working yielded a large average of gold per ton. Three miles due north of Black Snake is the Mount Coora Copper Mining Company's works. Near here a cobalt lode was discovered by Mr. F. Smith. It is of great width and extends for over half-a-mile in length. The Assistant Government Geologist believes that it will prove a very valuable deposit. Formation: hard hornblendic and micaceous schists and altered volcanic rock. Principally a mining district, although pastoral and agricultural pursuits are engaged in to a limited extent. In the scrubs, large quantities of valuable timber, pine, cedar, iron bark and gum exist, but owing to the almost impassable roads over the Black Snake range it cannot be brought to a market.

BLOOMFIELD RIVER (16° 5′ S. lat., 145° 16′ E. long.), a tin-mining and sugar-growing locality, with a receiving office, lying about 40 miles to the south of Cooktown, 45 miles by mail route, *viâ* Mount Romeo, and 30 miles by sea. The river from which it takes its name flows into the south end of Weary Bay. It has a sand-bar at its mouth, and is only navigable for about eight miles, owing to falls and rapids; in one place the water falls almost perpendicularly over a wall of rock 185 feet high. A short distance from the mouth is the wharf, and the township of Ayton, which consists of a post-office, police station, and several private houses. Three miles from the river is the Vilele Plantation of 5,000 acres, and adjoining is that of Messrs. Hislop & Co., of 2,500 acres, and Mr. P. Cochran's of 1,200 acres. Tin is found in greater or less quantities in all the gullies to the south, west, and north of the river. The principal mining centres are Mount Romeo, 12 miles north, Rossville; Mount Hartley, 14 miles north; and China Camp and Upper Bloomfield, 10 to 13 miles south-west. Most of the country being covered with a dense tropical scrub, it is hard to penetrate and difficult to prospect, but several promising looking lodes of tin are known of. These rich tropical scrubs have been proved very suitable for the growing of sugar-cane, coffee and tobacco, the latter flourishing much as in Java, and of a similar quality. Population, about 250.

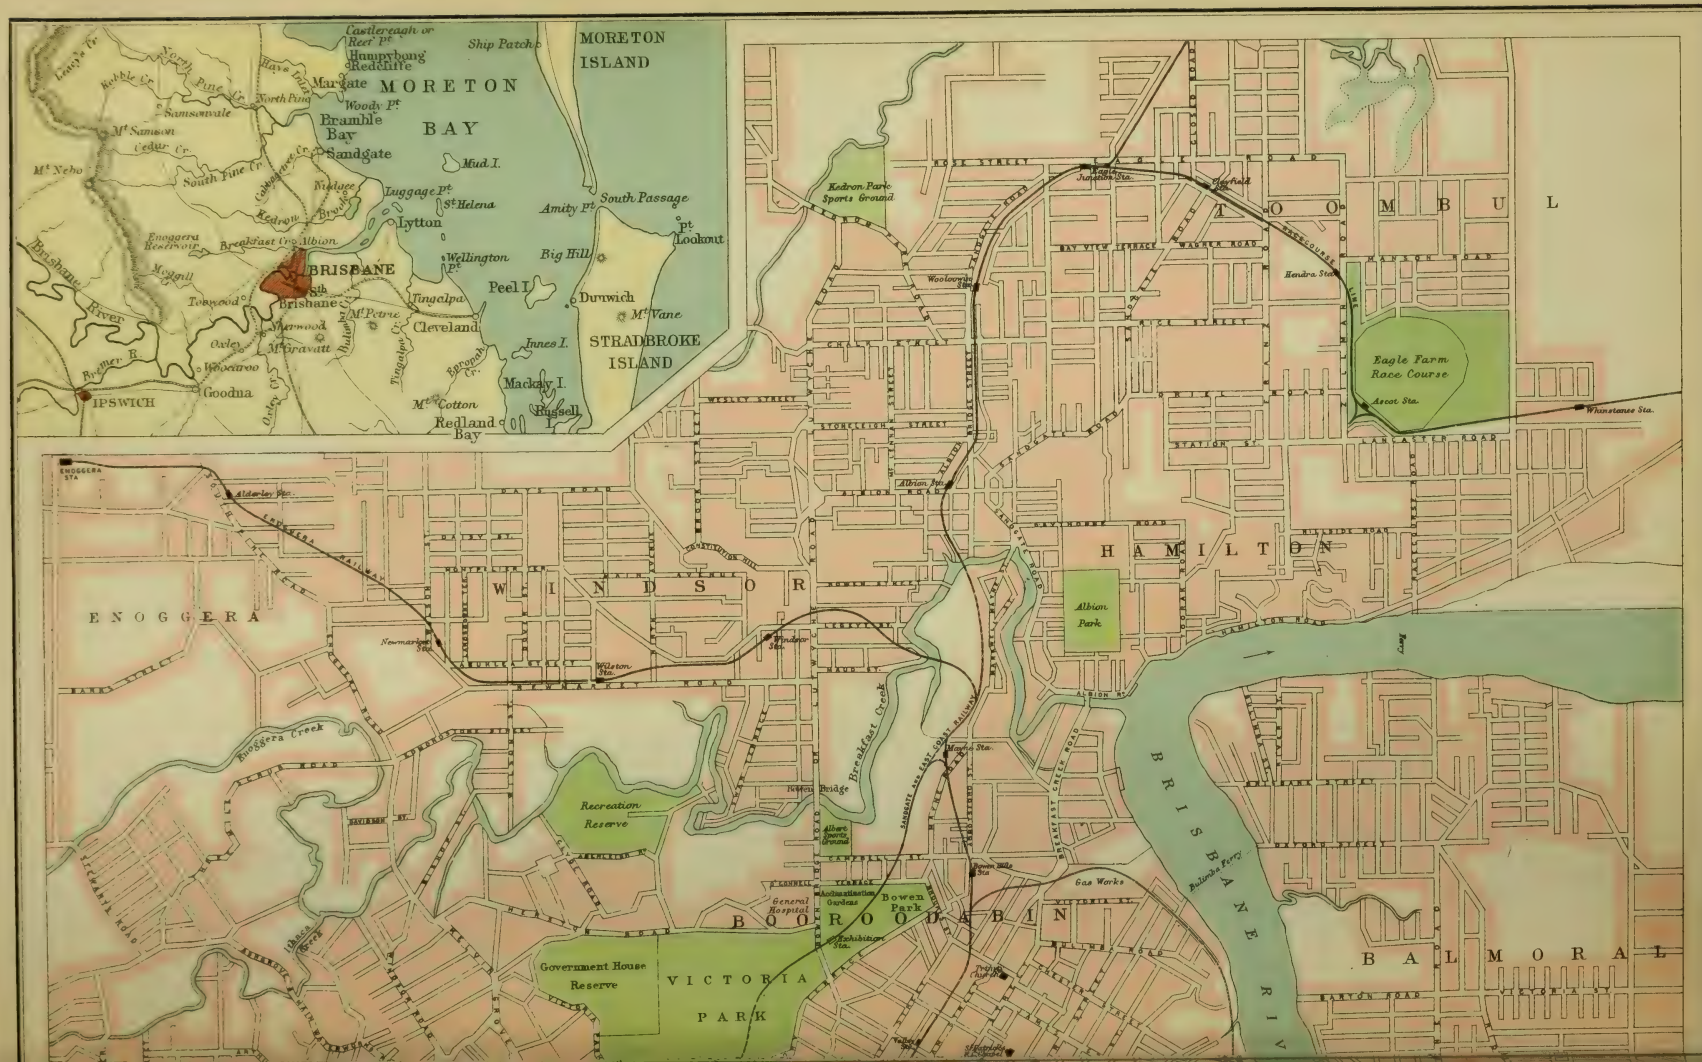
BOGANTUNGAN (23° 36′ S. lat., 147° 14′ E. long.), a railway station and post-town with money-order, and telegraph

facilities, 227 miles west of Rockhampton. It is in the police district of Clermont, county of Plantagenet, electorate of Leichhardt, and is situated on the Medway and Grass Tree creeks. Public buildings: Institute, railway station, and State School (No. 384). Hotel: Commercial, one store and butcher's shop. It was once a thriving busy place, but the extension of the line westward has affected its prosperity and reduced its population, and the township, has had to take its place with other minor camps along the line. Population (census 1891), 143.

BOOLBURRA (23° 45′ S. lat., 149° 45′ E. long.) is in the Port Curtis district, county of Packington, and Rockhampton police district, about 100 miles W. of Gladstone, and 400 miles NW. of Brisbane, situated on the river Dawson, near the junction with the Mackenzie. It is a station on the Central line, a receiving office, and is distant 58 miles SW. from Rockhampton. It has a provisional school (No. 202). The school-house is used occasionally as a place of worship. There are permanent reserves for a public cemetery and schools. Agricultural and pastoral district, subject to floods in the rainy season. Population of town, 58 (census 1891); with vicinity about 120.

BOONAH, a railway station on the Fassifern line and the Teviot Creek, 59 miles from Brisbane, and one mile from Dugandan, the terminus of the branch. It is a telegraph station, and has also a post office, money-order office, branch of the Government savings bank and Queensland National bank, two hotels, State school, school of art, with 175 vols., Episcopal, Roman Catholic, Primitive Methodist and Salvation Army places of worship; a drill shed, and there are three saw-mills in the vicinity. There is a corps of about sixty mounted infantry. Boonah is surrounded by mountain ranges, and the scenery is said to be unsurpassed for grandeur and natural beauty. Agricultural and pastoral district.

BOULIA (22° 55′ S. lat., 139° 38′ E. long.), a post-town, "well and prettily" situated on the west bank of the Burke river, about 500 feet above sea level, in the county of Wills, electorate of North Gregory. The Wills Channel joins the Burke 15 miles above the town, at the site of the old N. M. Police Barracks. The town contains two hotels, Australian and Royal, two large stores, and "fully a score of presentable houses," and some tradesmen's premises. The water supply is derived from the river and from wells sunk in the town, good water being obtainable at an average depth of about 40 feet. Boulia is distant from Winton about 240 miles, shorter than this by two other routes; about 1,350 miles from Brisbane, to which the route is by rail to Winton, coach to Longreach, thence rail and steamer, or coach to Winton, thence rail to Hughenden, from there rail and steamer. Cloncurry is about 193 miles distant, and Birdsville 257 miles. There are post and telegraph offices, also a court-house and barracks. Water is obtainable by sinking at an average depth of about 30 feet: The country around Boulia is described as magnificent grazing country, chiefly stocked with cattle. Many of the stations around exceed 3,000 square miles of country. Good building timber is found in the neighbourhood. Boulia is a first-class meteorological station. Population, 101 (census 1891).



BOWEN (19° 59′ S. lat., 148° 16′ E. long.), Port Denison, co. of Herbert, parish of Pring, police and electoral district of Bowen, a seaport and municipal town, under a mayor and five councillors, with money-order office, savings bank, and telegraph repeating station, on the northern shore of the inlet in Edgcumbe Bay, known as Port Denison, about 725 miles (817 by overland telegraph route) NW. of Brisbane. There is regular steam communication with Brisbane (by the A.U.S.N. Co.'s and the British India Mail Co.'s steamers), also with Rockhampton, Sydney, and other Southern ports. The harbour, which was discovered in 1859, by Captain Sinclair, is one of the best on the eastern coast of Australia, secure in all weathers, and admirably adapted as a port of call for all vessels using the inner passage to the Torres Strait. Bowen is the outlet and port of a large area of pastoral country. There is an extensive deposit of good coal within 60 miles, but lack of capital prevents its being worked. Mr. Jack, the late Government Geologist, who visited and reported on the coalfields, states his opinion that "the Bowen river coalfield is the geological equivalent of the most valuable part of the New South Wales coal measures." There are within the boundary of the municipality 3¾ square miles, 26 miles of streets and 265 dwellings. Estimated value of ratable property, £63,757. It was proclaimed on August 7th, 1863. The Australian Joint-Stock Bank, and the Bank of N. S. Wales have branches here. The town possesses Anglican (Trinity) and Roman Catholic (St. Mary's) churches, a Presbyterian church, Salvation Army barracks, a State school (No. 10), girl and infant schools (No. 235), a convent and private school, a good hospital (Kennedy), a school of arts, with a library of 2,485 volumes, police court-house, and derives a good supply of water from the river Don. There are five hotels—Beaver's, North Australian, Union, Railway and Commercial. The Court-house, a large brick and stucco building, is now also utilised for the Post-office and Lands Departments. Bowen, being the telegraph repeating station for the North, has a large number of operators. A commodious pier, upwards of one-third of a mile in length, affords facilities for the loading and discharge of vessels. A "swinging basin" is now dredged to a depth of 22 feet below low water, and the channel and swinging basin are respectively 150 and 350 feet wide. The jetty here has been strengthened, and its width at the outer end increased, and the berths and swinging basin dredged. Vessels of very large tonnage, registering up to 9,000 tons, are loaded and discharged with great facility. The district is a pastoral one, but there is a considerable extent of excellent agricultural land around the town as well as in the vicinity of the coalfield. The first sod of the Bowen railway was turned by the Mayor on June 14, 1888, and the line is now completed to Wangaratta, (48 miles). Boring with the diamond drill was tried on the coalfield at the foot of the Leichhardt range, and several narrow coal seams have been cut through. The drill was continued to the depth of 391 feet to the bedded porphyrites. At Havilah, Bowen River, coal seams of various thicknesses were gone through to a depth of 340 feet. There are indications of coal within 15 miles of the port. Marble has been found in the neighbourhood. The Normanby gold-field lies about 60 miles S. from Bowen, but of late little has been done here. The Warden describes it as being too expensive for the present miners to work properly, yet too good to abandon. The water supply is derived from the Don River, at a distance of 3 miles. A meat freezing works on the railway line 6 miles from town is now in operation. Geological formation of the town site—granite. Population of the municipality, 1,200; of the district, 2,778 (census 1891). Local newspaper: *Port Denison Times*.

BOWEN DOWNS (county Rodney) (22° 30′ S. lat., 145° 1′ E. long.) is a postal receiving office, situated on Cornish Creek, a tributary of the Thompson river, about 750 miles NW. of Brisbane, and 318 miles SW. of Bowen *viâ* Rockhampton; there is mail communication once a week. Aramac, the nearest town, is about 36 miles S. The surrounding country is of a pastoral character, being fairly grassed in undulating downs.

BOWER BIRD, a mining locality on the Creek of the same name, distant about 100 miles NW. of Cloncurry, and 2 miles W. of the Leichhardt river (it is also known as the Leichhardt Goldfield), at a point 5 or 6 miles above the "Impassable Gorge." The nearest port is Burketown, about 190 miles, nearly due north. Normanton is about 195 miles in a direct line NNE. The actual distance by road from Cloncurry is about 110 miles, of which the first 60 miles are described as good and the latter part rough, though capable of improvement. According to Mr. Rand's report the reefs are situate on the eastern fall of a hill in the Bower Bird Creek Valley. On this hill there are numerous large outcrops of quartz running in a northerly direction which stand out very prominently, having the appearance of large "buck" reefs, as they are termed by miners. In 1899 the Warden reported that there had not been that development in mining which its prospects a year or so before appeared to warrant.

BREAKFAST CREEK (27° 27′ S. lat., 153° 5′ E. long.), an important suburb of Brisbane, distant from the General Post-office about two miles. It is situate on the creek of the same name and the Brisbane River, which it faces, and on its banks are the residences of many merchants and tradesmen. Omnibuses and tramcars ply frequently during the day. The Creek proper is crossed by a bridge, consisting of three continuous main girders, having curved top and bottom booms, a centre span of 77 feet and two side spans of 36 feet and 51 feet respectively, each resting upon cast-iron cylinder piers and masonry abutments, total width 52 feet. It is built of steel throughout, and cost about £12,000. In this locality is a post-office, a large State school and a commodious hotel near the bridge. Near the bridge is the office of the Hamilton divisional board. About 1½ mile from the bridge is the racecourse of the Queensland Turf Club, said to be one of the best in Australia, and connected not only by train but by electric trams. Meetings of the club are held four times a year. A nicely laid out bowling green is not far from the bridge and is well patronised. The Breakfast Creek road is the main route by road to Sandgate, and there is great traffic to this locality on Sundays and holidays. Near the bridge is a large area of ground, known as the Albion Park, where horse races are held weekly, the centre of the ground is used for football and cricket. A wharf erected by the Toombul Divisional Board affords facilities for the landing of fish and meat.

BRISBANE (27° 28′ 3″ S. lat., 153° 6′ 54·93″ E. long.), an Episcopal city, and the capital of Queensland, is situated 58 feet above sea-level, on the river Brisbane, which surrounds it on two sides, about 25 miles by water (12 in a direct line) from its debouchement into Moreton Bay, one of the largest bays on the coast of Australia, and after which for a long time the district was called. It lies about 500 miles N. of Sydney. Brisbane was originally settled in 1825, having been made a penal station by Sir Thomas Brisbane, the Governor at that time of Australia, from whom its name is derived. In 1842 the colony was opened to free settlers, and from that period the city has been yearly growing in importance as the population of the country increases, and its resources are developed. Brisbane is divided into four portions; North Brisbane, South Brisbane, Kangaroo Point, and Fortitude Valley, and comprises three electorates—North Brisbane, South Brisbane, and Fortitude Valley, each returning two members. (South Brisbane is now a separate Municipality.) There are seven principal streets, Ann, Adelaide, Queen, Elizabeth, Charlotte, Mary, and Alice—Queen Street being the leading thoroughfare—running about north-east and south-west, about half a mile long; these are crossed at right angles by six others, William, George, Albert, Edward, Creek and Wharf Streets. In Eagle Street, and what is known as Petrie's Bight, are the principal wharves. The length of streets in all is 52½ miles, with 5,265 dwellings. The area of the city is 2½ square miles, and the value of the ratable property is estimated at £5,860,612. Amount of rates levied in 1899 was £36,163 (the general rate being 1d. in the £). The city was incorporated September 7, 1859. The public buildings comprise several churches and chapels—ten Episcopal, five Wesleyan, six Baptist, five Congregational, one Bible Christian, one Lutheran, seven Presbyterian, three Primitive Methodist, one

BRISBANE RIVER

PUBLISHED WITH THE "AUSTRALIAN HANDBOOK" FOR 1901. : GORDON AND GOTCH, MELBOURNE, SYDNEY, BRISBANE PERTH (W.A.) AND LONDON. John Bartholomew & Co. Edin.ʳ

United Methodist, four Roman Catholic, one New Church, a Friends' Meeting-house, a Jews' Synagogue, and one Scandinavian. There are besides several places of worship in the suburbs. The Presbyterian Church is a handsome building with tower, on Wickham Terrace, and the Wesleyan Chapel in Albert Street is a fine building with a lofty spire. Among some of the principal buildings are St. Stephen's (Roman Catholic) Cathedral, in Elizabeth Street, a fine imposing edifice; a campanile has been built in the Cathedral yard, in which is hung a bell of 2 tons weight, the largest in the Australian colonies; St. John's Church, in William Street, by the river side, the largest Episcopal and the cathedral church (a wooden bell-tower with a peal of 8 bells adjoins the building); the site, however, has been sold to the Government, who have made the excavations for a new pile of buildings for the use of the Lands Department, and a new cathedral is to be erected on an eminence in Ann Street, overlooking the City; All Saints', on Wickham terrace with a fine organ, ranking next; Trinity Church at Fortitude Valley; the Baptist Tabernacle on Wickham Terrace: the Town Hall, which has a frontage of 99 feet to Queen Street (a building of large proportions and commanding appearance is at a future time to be erected in Roma Street); the Houses of Legislature, in George Street, the largest buildings in the city; the Post and Telegraph Office (about to be rebuilt at great expense); Police Court in Elizabeth Street; the Government Printing Office, overlooking the river, now much enlarged, extending through from William to George Streets; Government House; the Masonic Hall in Alice Street; the Temperance Hall in Edward Street; the School of Arts in Ann Street, with a library of about 25,000 volumes; the new Technical College opposite; the Museum in William Street, nearly facing the Government Printing Office on the river bank—this is being converted into a Free Public Library—the exhibition building having reverted to the Government, who have converted it into a National Museum and Art Gallery; Supreme Court, and large public offices between George and Quay Streets; the Police-station in Roma and Albert Streets, having barrack accommodation for 45 men; the Government Analyst's quarters; the Port offices in Edward Street, a drill shed for the Volunteer Artillery in Adelaide Street; Her Majesty's Opera House in Queen Street, one of the finest theatres in Australia, and All Hallows Convent, with school. An immense four-story building, known as the Treasury Buildings, one of the finest architectural piles in the colonies, has been erected, replacing the Treasury and other buildings in William and George Streets. At Kangaroo Point are large immigration barracks capable of accommodating 500 inmates. The Custom House is a three-story building with dome, on the river bank. The business of the banks, insurance, and other societies is carried on in buildings worthy of the city; the Union Bank, the Commercial Bank, the Bank of New South Wales, the premises of the Australian Joint Stock Bank, the premises lately used by the Queensland Deposit Bank, the Australian Mutual Provident, New Zealand, Colonial Mutual, and Mutual Assurance Companies' Offices, are the most notable among them. The building of the Queensland National Bank, on the site formerly occupied by the School of Arts, is in the Classical Italian style, and is one of the largest and finest banking houses in the Australian colonies. The London Bank of Australia, at the corner of Queen and Creek Streets, is also a very fine building; the Royal Bank has commodious premises in Queen Street. The premises of the Queensland Club, at the corner of Alice and George Streets, are in the Italian style, with wide verandahs and colonnades. Very many other buildings, both public and private, have been erected, and most of the streets show signs of advancement in their architecture. The warehouses, shops and stores are numerous, and some of the former are handsome and commodious buildings. The premises of the Brisbane Newspaper Company, at the corner of Edward and Queen Streets, are a palatial pile of seven stories, 82 feet in height. At the opposite corner is a large three-story building of stone for the Australian Mutual Provident Society. A fine pile of buildings has been erected in Queen Street, for the *Telegraph* Newspaper Company. Like the *Courier* Office it is fitted with the most modern machinery. The Brisbane Newspaper Company have for some years operated with Linotype machines and have recently added a large photo-reproduction and colour-printing plants to their premises, The Company, too, are about to replace their printing machinery with more modern types. Ample provision for the education of the rising generation is afforded by the Boys' Grammar School, the Girls' Grammar School, and the Normal School, and other State schools. The grammar school is on Gregory terrace, on an elevated site. Extensive accommodation is provided for boarders. A Girls' Grammar School has been built near to the Boys' School, and the premises have been enlarged. The Christian Brothers have also a fine school on Gregory Terrace, with accommodation for 200 pupils, and other schools have been opened in Charlotte Street and in Boundary Street. The old Supreme Court buildings in Queen Street (erected 1828) were pulled down at the end of 1880. They were among the oldest buildings in the city, and dated back to convict days. They had long been an architectural eyesore to the street, and apart from their historic interest had little to recommend them. The site is now covered with a superior class of commercial premises. A magnificent iron bridge, called the Victoria, on the lattice-girder principle, with swing openings to allow of the passage of ships, until February, 1893, connected North and South Brisbane. This bridge was designed by Robinson and I'Anson, of Darlington; the iron-work was manufactured by Peto, Brassey and Betts, of Birkenhead; and it was erected under the engineership of the late Thomas Oldham, and subsequently of A. R. Jones. It was commenced in 1863, and was opened with some ceremony by the Marquis of Normanby on June 15, 1874. On February 6, 1893, the northern half of this bridge was swept away by the most destructive flood ever known in Brisbane. An entirely new bridge costing, including approaches, about £111,987, is now completed and open. The new structure consists of six 170 feet steel spans, carried on five piers of cast iron cylinders filled with concrete, with abutments of masonry and concrete. There are two carriage-ways, each 24 feet in width, and two footways, each 9 feet wide, carried upon steel cantilevers from the outside main girders. The decking is of steel trough plates covered with tarred metal, and the carriage-way on same formed of hardwood block paving. Total length of bridge 1,040 feet 8 inches, being 35 feet 8 inches longer than London Bridge, and width between parapets of footways 73 feet. The gradient of the bridge is one in 90, and the clear height of the superstructure above high water 34½ feet at the north end and 23 feet at the south end. The structure was designed by Mr. A. B. Brady, Engineer of Bridges to the Government. There is frequent communication with Sydney by the A.U.S.N. Co.'s, Messrs. Howard Smith and Co's., Adelaide Steamship Cos.' and other steamers, and there is also overland communication by rail, the railway journey occupying about 26 hours. A regular line carrying the mails plies between Brisbane and the northern ports, Cooktown being the northern terminus. There is also regular communication with London by the vessels of the British India Steam Navigation Company, and occasionally by sailing ships. There is good wharf accommodation for a large amount of tonnage, but owing to the great increase of the shipping trade, extended wharfage has been found necessary, and has been provided both on the north and south sides of the river. The A.U.S.N. Co. have a wharf, extending from their Mary Street to the Eagle Street wharves, called the Norman wharf. Near the Victoria Bridge is a large wharf, 700 feet long, erected by the Corporation, at a cost of £35,000. Till recently, owing to the bar at the mouth of the river, and the shallowness of the river itself, vessels of large tonnage could not come up to the city, but this was overcome by a direct cutting made through the bar at the mouth of the river. During 1891–92 the bar cutting was deepened to 20 feet for a width of 100 feet along centre and a complete channel 300 feet wide to upwards of 15 feet at low water was available between Brisbane and the Bay. Owing to the heavy floods in February, 1893, a considerable silting up of the channels took place, to such an extent that even the inter-colonial steamers, unless of light draught, were unable to come to the Brisbane wharves. The channels have been redredged, and some of them deepened, and the river is now in such a condition, enabling the largest steamers to come up the river and berth at the wharves. At the Lytton Rocks the first channel, 100 feet wide, and having a depth of 21 feet at low water, has been blasted, giving an extra depth of 18 inches all through the river cuttings. There is now a depth of 22 feet at dead low water available from the Bar to the town wharves. Training walls are being built along the Hamilton Reach of the river, the spaces behind which will be filled up with silt, dredged from the river channels by the latest type of Lindon Bates suction dredges, two of which are nearing completion. It is intended also to cut off several of the points, thus straightening the river and, to an extent, reducing the risk of floods by allowing of a more ready escape of the water. This work has actually been commenced. A spacious dry dock at South Brisbane, completed and opened in September, 1881, takes in large vessels. Brisbane is the terminus of the Southern and Western railway, the connecting link between it and Ipswich having been opened in June, 1875. The railway station in Roma Street is a commodious building, and admirably fitted for its purpose. Cold storage works have been erected. A line is now constructed to a temporary Central station in the heart of the city, in Ann Street, where permanent palatial station buildings are nearing completion. From here the line is carried to the Valley, and now extended to connect with the Main North Coast Line to Gympie, Maryborough, Bundaberg and Gladstone. Several omnibuses ply to various parts of the city and the suburbs, and electric tramways are open to beyond the Exhibition and South Brisbane, New Farm, Breakfast Creek, western suburbs, and Bulimba, other extensions being contemplated. Among the leading hotels are the Gresham, Metropolitan, Queen's, Royal, Lennon's, Belle Vue, Imperial, Grand, and the Excelsior. The city has a good general hospital at Bowen Bridge, to which several additions have been made, with extensive quarters for the nurses, and a large sick children's hospital adjoins; a lying-in hospital — Lady Bowen, on Wickham Terrace, a female refuge, an orphanage, and several other institutions of a charitable character, as well as two thoroughly equipped private hospitals. A movement is now on foot for the establishment of a women's hospital, the prime mover in the scheme being Lady Lamington. There is a fire brigade, well equipped with 5 steam fire engines, reels, hose, &c., having its head station in Edward Street. This building now ranks as one of the best appointed institutions in Australia. The Town Hall, the Norman, the Centennial, and other Halls, are used as places of entertainment. The Theatre Royal is in Elizabeth Street; the Opera House before alluded to is in Queen Street. Race-meetings are regularly held at the Eagle Farm and Breakfast Creek course, and large prizes are offered. A central

market has been erected in Roma Street, and one on a smaller scale in Stanley Street, South Brisbane. The Botanic Gardens are laid out with great taste; they abound with tropical and semi-tropical trees, shrubs, and plants, and may be considered one of the principal "lions" of Brisbane. A stone wall and iron fence has been built round them, and the walks are now asphalted. The Queen's Park is a portion of the Botanical Gardens, and is used as a cricket and football ground. A battery of guns is here. Other lungs of the city are Victoria Park, Albert Park and Bowen Park. At the latter place the annual exhibitions of the Queensland National Association are held, and those already held have attracted a large number of visitors from all parts. An International Exhibition on a large scale was held during the winter of 1897, the additional buildings imported for the purpose being those used at the Tasmanian Exhibition. Great improvements have been made on the grounds to fit them for athletic and other sports and exhibition purposes. The original wooden structure, burned to the ground during 1888, has been replaced by a much finer one of brick, with towers. This building is now utilised for a Museum and National Art Gallery, the annexes being retained as show buildings. A concert hall forms part of it, and this will hold 3,000 persons. A large organ, one of the finest in the colonies, has been erected in it, and was opened in December 1892. The Municipal Council has since purchased this instrument, which will ultimately be removed to the new Town Hall when built. The Acclimatisation Society's grounds at Bowen Park, adjoining those of the Association, are much frequented, and the society is doing a most useful work. At One Tree Hill, now called Mount Coot-tha, a large area has been reserved as a public park. From the summit of the hill a magnificent view is to be had, embracing Ipswich on the one hand and Sandgate and the Bay on the other. The cemetery is at Toowong, about 2 miles distant from the General Post Office. It is picturesquely situated and well laid out. Nearly in the centre of the ground is a dome-shaped hill, the top of which is surmounted by a monument to Governor Blackall. The city is divided into five wards—East, West, North, Valley, and Kangaroo Point, each of which returns two aldermen, one of whom retires annually; the mayor is chosen by the aldermen. The boundaries of these wards were amended in October, 1880. The first Mayor was the late Mr. John Petrie, in 1859-60. Brisbane and is lighted with gas (a second company has now its works mains in operation supplying South Brisbane), and the majority of private firms have their premises lighted by electricity, and is well supplied with water from a large artificial lake (186 acres in area) in the ranges near the heads of the Enoggera creek, 240 feet above sea-level, 7 miles distant from the city, whence it is conveyed by a double service of pipes, one 8 inches in diameter and 7½ miles long, the other 12 inches in diameter and 8 miles long, the aggregate discharging capacity of both mains being about 53,400 gallons per hour into smaller pipes that reticulate all parts of the city. The area of the watershed is about 8,295 acres, and the storage capacity of water, one thousand million gallons. The requirements of the city and suburbs have demanded an additional storage reservoir, which has been made at Gold Creek, between the Enoggera watershed and that of Moggill. The area of the watershed from which the new reservoir is filled is 2,476 acres, the area of the reservoir is 67½ acres, and its capacity 395,500,000 gallons. The water from this source is brought by a 16-inch main, capable of discharging 1,678,752 gallons in 24 hours, *viâ* Brookfield, Taringa, and Toowong. The supply from here was available during 1886. Further provision for water supply becoming absolutely necessary, works for obtaining a supply from a point on the Upper Brisbane River were undertaken, and the supply of the city and suburbs with water from this source is now an accomplished fact. According to the engineer's report, "The Brisbane River works, now completed with the connecting mains, as laid are capable of delivering at the rate of 6 million gallons of water per day in Brisbane, and by simply increasing the main capacity, and adding two pair of engines to the machinery, this quantity can be doubled. The present works, with the assistance of the two reservoirs, will allow 40 gallons per head to a population of 250,000. There is a service reservoir on Wickham Terrace, which has been supplemented by a second one of larger capacity, in order to improve the water supply to the higher levels of South Brisbane and Kangaroo Point, and two other service reservoirs, one at Highgate Hill, 190 feet above high-water mark, with capacity of 2,000,000 gallons, and another at Red Hill, 230 feet above high-water mark, have been made. Both these reservoirs are in connection with the Gold Creek works. The extension of the city has been much hindered by the hilly nature of the ground: and the formation of the roads has been attended with a large expenditure of money and labour. Some portions of the city are elevated, upwards of 100 feet above the mean sea-level. During the last few years great improvements have been made in the formation and paving of the streets of Brisbane. The principal line of traffic has been paved with wood blocks, and all telephone and telegraph lines laid under ground. The drainage has received attention, and provision made for flushing the sewers with salt water. The climate of Brisbane is, as a rule, dry and healthy, though the temperature is high in the summer months. The mean external shade temperature is about 70°. Population (census 1891), within a five miles radius, 93,657; within a ten miles radius, 101,554. In 1898 the estimated population within a five miles radius was 105,734. The newspapers published in Brisbane are the *Brisbane Courier*, the *Evening Observer* (with specially illustrated sports issue on Saturday evenings), and the *Telegraph*, issued daily; the *Queenslander*, the *Week*, *Government Gazette*, *Flashes*, *Queensland Figaro*, the *Worker*, *Queensland Sportsman*, *N. A. Zeitung*, *Queensland Herald*, *Queensland Grazier*, *Age*, *Street*, and the *Australian*, published weekly, and some small class papers monthly.

BRISBANE, SOUTH (South Brisbane) (27° 29′ S. lat., 153° 44′ E. long.), an independent municipality, with four wards, is that portion of the city on the opposite, or southern, side of the Brisbane River. It is connected with the city by the new Victoria bridge, a five-span iron structure, with two roadways. Omnibuses ply continuously, also ferry boats, and there is also electric tramway communication on the overhead trolly system. Total length of tramways, six miles. Incorporated January 7, 1888; 73 miles of streets. 5,187 dwellings, area 4½ square miles. Value of ratable property, £1,413,398; estimated population, 25,935. Revenue, receipts for 1899, £38,790 5s. 2d.; expenditure, £40,055; liabilities, £100,147 2s. 3d.; assets (including reserves), £203,431 18s. 3d.; It has two post, money-order, telegraph and savings bank offices, a court-house, a fine town hall, completed in 1892 at a cost of £12,000, near the intersection of Vulture and Stanley Streets, and two fire brigade stations (one volunteer). Branches of the New South Wales, Royal and Queensland National Banks. Hotels: Palace, Graham's, Clarence, Terminus, Railway, Stanley and others. The dry-dock here was opened in September, 1881. The first vessel taken in being the *Doon*; it will take in vessels up to 420 feet in length. Spacious wharves have been erected, at which ships of considerable tonnage can lie alongside and load where the Southern and Western Railways deliver alongside *ex* truck. The Government wharves in the bight below the dry-dock are 500 feet long and 50 feet wide, and provided with four ten-ton cranes. The markets and cold storage works of Geddes, Birt & Co., recently erected at a cost of £36,000, are on the wharves, and connected with the Southern and Western Railway system. Stanley Street is the principal thoroughfare. The Corporation has also erected wholesale and retail markets. There are several places of worship and five State schools, and two municipal schools of arts, with a free reading-room and a library of 4,463 volumes, and in conjunction with the largest of the two, a large technical college has recently been built and opened. The Brisbane gaol is here, it is of brick with concrete foundations, and has gaoler's and warders' quarters, hospital, workshop, kitchens, store, debtor's and warders' room, and underground tank together with brick boundary wall 18 feet high. The South Brisbane line connects with the main line at Corinda. The railway is completed to Melbourne Street, where there is a fine commodious station, a two-storey red brick building. All passenger trains now start from here for Beenleigh, Southport, Beaudesert, Wynnum and Cleveland. The boarding-out system for orphans having been adopted, the Diamantina Orphanage buildings are being used by the Government as an asylum for incurables. Magnificent buildings have been erected for the Deaf, Dumb and Blind Institution, which is now in full working order. South Brisbane is now directly connected with the Mount Crosby Water Reservoir by syphon laid on the bed of the river. A service reservoir has been erected on Highgate Hill, capable of holding 2½ millions of gallons of water. There are several factories, a flour mill, and other industries carried on in South Brisbane. The Brisbane cricket ground is at Woolloongutta; it has an area of 13 acres, vested by the Government in three trustees; it has bicycle track (three laps to mile), cricket pitches, two football grounds, lawn tennis courts. Grand stand and pavilions have been erected, and the ground is now classed as amongst the best in Australia.

BROOKFIELD (county Stanley), a small settlement and post town, about 10 miles from Brisbane. The beautiful Moreton Bay chestnut grows here on the banks of the creeks. The public buildings are the Bible Christian Church, Orange Hall, and State school No. 16. The locality is picturesque. The country has the character of being more or less auriferous, but no payable results have yet been obtained.

BROUGHTON (20° 27′ S. lat., 146° 40′ E. long.), a post town at the junction of the Broughton river with the Burdekin, about 14 miles SE. from Charters Towers, known as a gold field before Charters Towers. Coaches ply daily, fare 5s. Principal hotel: Broughton. Several quartz reefs are here. One store.

BUDERIM MOUNTAIN. *See* Mount Buderim.

BULIMBA (27° 26′ 40″ S. lat., 153° 3′ 30″ E. long.), a postal suburban township on the creek of the same name, in the electorate of Bulimba, and Balmoral Divisional Board, about 4 miles distant from the Post Office, Brisbane. It is in telephonic communication with the city, the public telephone being at the Post Office. It has an Episcopal Church (St. John Baptist), a Primitive Methodist and a Baptist Chapel, a public school (No. 17), a school of arts, with library of 1,081 vols., one hotel (Bulimba), extensive stearine candle and soap works (Apollo Company, Limited), and chemical works. At Queensport are extensive works for meat freezing and meat preserving, also brickyards. The plague hospital is here. Communication with Brisbane is maintained by means of the steam ferry and tramcars and 'buses.

BUNDABERG (24° 53′ S. lat., 152° 21′ E. long.), a port and municipality, in the county of Cook, electorate and police district of Bundaberg, situated on the banks of the river Burnett, about 10 miles from its mouth, 70 miles (52 postal) N. of Maryborough, and 217 miles N. of Brisbane, with which it is now connected by rail. It is governed by four local bodies: North (under the Gooburrum Divisional Board), East (under the Woongarra Divisional Board), South and West (under the Barolin Divisional Board), and the municipality proper by the Municipal Council. The Mount Perry Railway and North Coast line, constructed to Gladstone, cross the River Burnett by a steel lattice girder bridge. The distance to Mount Perry is 66½ miles. Hotels: The Grand, Imperial, Club, Royal, Queen's,

Leichhardt, Metropolitan, Palace, Tattersalls, Federal, Gympie, Melbourne, Sydney, and Custom House, North Bundaberg, the smallest township at present, though the longest settled, contains five hotels, five general stores, two butchers' shops, several small stores, Waterview saw-mills, sugar factory and distillery, Bundaberg foundry, connected by a branch line with the railway; Methodist and Anglican churches, a lock-up, a primary school (No. 161), Gooburrum boards hall and town hall, and 1,200 inhabitants. It is connected by steam ferry to South Bundaberg, but a fine steel traffic bridge was opened in 1900. The bridge cost £75,000. East Bundaberg is an important suburb, containing a public school (No. 497), Woongarra Board's Office, Ebenezer Hall, the Millaquin Refinery, Burnett River saw-mills, Skyring's saw-mills, five hotels, stores, brickyards, a brewery, gas works, butchers' shops, a fine distillery, and a number of residences. Bundaberg proper has branches of the N. S. Wales, Commercial, Union, Royal, and Queensland National Banks, a fine School of Arts, with library of 6,501 volumes, superior post and telegraph offices, a 2-storey brick building, with a clock tower 92 feet high, a court-house, lands office, immigration depôt, a hospital, Anglican, Roman Catholic, Primitive Methodist, Baptist, Lutheran, Presbyterian and Wesleyan churches, and two State schools (Nos. 412 and 18), for boys and girls respectively, a money-order office and Government Savings Bank, a number of stores and tradesmen's premises, and a steam joinery. Societies: Oddfellows, Manchester Unity and Independent Orders, Protestant Alliance, Foresters, Rechabites, Orange, Masonic (3), Building, Penny Bank, Caledonian, Good Templars, W.C.T. Union, Pastoral and Agricultural Society, also Horticultural Society. The area of the municipality is 1¾ square miles, length of streets 30 miles, 1,100 dwellings, ratable property valued at £234,267. The town has been lit with gas since October, 1884. A good water supply is in course of construction. The bar has 17 feet of water at spring tides, and vessels of moderate draught can cross with safety. An active harbour board has now control of the river, and have imported a large sand pump dredge which is busily occupied deepening the river. Three saw-mills supply large quantities of timber to the northern markets. There are also two breweries. Regular steam communication is established with Rockhampton, and some of the boats of the A.U.S.N. Co.'s fleet call on their round to and from Brisbane and the northern ports. The great staple exports are sugar (the average annual output being about 35,000 tons), golden syrup and sawn timber. The Woongarra scrub is situated here, which takes its name from a hummock in the locality. The scrub is of volcanic origin, and is eight miles broad by twelve long. The town is connected by rail to the Isis scrub, and large quantities of cane and juice are brought hither to be manufactured into sugar at Millaquin Refinery and other factories. A great impetus has been given to the sugar industry since the erection, in 1882, of the Millaquin Refinery on the river bank, a mile below the town. This is the largest sugar factory in the Colony; it has a frontage of 200 feet, by a depth of 225 feet, the buildings—three in number—being three stories high. 90,000 gallons of juice can be treated here daily; from the factory, pipes are laid under the roadways, connecting with a number of crushing mills situated on plantations, reaching out in all directions through Woongarra for a space of eight miles. Other mills send juice to Millaquin by punts. The factory has now undertaken the manufacture of golden syrup. In 1894 a branch railway connecting Millaquin with Bundaberg was opened. There are, besides the Millaquin refinery, the Fairymead refinery, and plantation, three miles lower down the river, and the Bingera plantation and refinery, situate up the river, twelve miles above the town. There are other sugar factories making vacuum pan sugars. There are about thirty-two sugar-mills at work; about one-half make their own sugar, the others sell to the factories. There are four good wharves, which are connected by rail to the Main Coast line. Bundaberg was gazetted a district court town on May 29, 1880, sittings being three times a year, and a Circuit Court, October 6, 1888, sittings being twice in each year. The climate of Bundaberg is remarkable for its salubrity. Being within the influence of the trades, and in close proximity to the sea, a fresh south-east wind prevails in summer, which counteracts to a great extent the heat of the sun. The average rainfall is 45 inches. Summer heat seldom exceeds 90° in the shade. Coal has been found in the neighbourhood, but the seams are too thin to pay for working. Bundaberg is the port of the Eidsvold, the Mount Perry and Glassford Creek Mines. Population of town and district, about 17,000 whites and 2,500 blacks. Local papers: *Bundaberg Mail* and *Star* (both tri-weekly.)

BUNDAMBA (27° 39′ S. lat., 152° 42′ E. long.), a post-town, telegraph, and railway station on the Ipswich line, 22 miles from Brisbane, in the electorate of the same name. Two State schools are in the vicinity (Nos. 19 and 137). Large quarries are here, from which much of the stone with which the streets of Brisbane are metalled is obtained; several coal pits are also at work. Population, 145 (census 1891.)

BURKETOWN (17° 48′ S. lat., 139° 34′ E. long.), a post-town, money-order savings bank office and telegraph station, in the co. of Porchester, electorate of Carpentaria and police district of Burke, on the left bank of the Albert River, about 1,500 miles NW. from Brisbane, and 80 miles distant from the South Australian boundary. It is a port of entry and clearance, a warehousing port, and is the second port of the Gulf of Carpentaria. It has steamer communication, *viâ* Normanton, with Brisbane. The southern mail steamers with mails, passengers, and cargo arrive at the Albert Bar, and are there met by a small steamer, into which they are transhipped and brought up to town. In a direct line it lies about 12 miles from the sea, but the river winds nearly 30 miles. Hotels: Albert, and Commercial. It was first settled many years ago, but was practically deserted, owing to an epidemic of yellow fever that was brought by an infected boat. It is now reputed to be a healthy locality. The Burke Divisional Board have a fine hall capable of accommodating 300 persons. There are here a court house, custom house, police barracks, and boatmen's quarters, a State school (No. 530), gymnastic club and reading-room, post and telegraph office, aerated water company, Dugong Fisheries Company, Carpentaria Meat Export Company's works, treating about 90 head of cattle per day; branch of the Queensland National Bank (a fine building), three general stores, several tradesmen's premises and private residences. There are two gardens kept by Chinamen, and a large market garden. A lagoon and an artesian well supplies the township with fresh water. A coach runs to Camooweal every week, and also to the Bower Bird Goldfield on arrival of steamer. Silver has been found in the district. At Lawn Hill there is considerable mining activity by the Queensland Silver Lead Mines Company. With tramline communication it is believed that the place will become an important mining centre. Quantities of wool are forwarded from Burketown. At Rocklands station, situated on the tableland 200 miles from Burketown, the Company have an artesian boring plant. Should abundant water be found there will probably come the substitution of sheep for cattle. Artesian boring is in progress in other parts. Land has been surveyed and open to selection, but the capital is said to be wanting to encourage settlement. Newspaper: *Burke Telegraph*. Population (census 1891), 164.

BYERSTOWN (16° 14′ S. lat., 144° 31′ E. long.), lies at the head of the Palmer river, about 75 miles SW. of Cooktown, though by a more direct route it is stated to be only 60, and about 1,110 miles NW. of Brisbane. It occupies an elevated and healthy site on the banks of the Palmer river, and had police barracks, and two Chinese stores. It is now nearly deserted except by Chinamen. Formation: granite. The Normanby diggings are a few miles distant on the Cooktown road. Large reefs have been found here, and gold is believed to be present in considerable quantities.

CABOOLTURE (27° 6′ S. lat., 152° 59 E. long.), a post-town, with Government Savings Bank, money-order office, and telegraph station in the county of Canning, electorate of Moreton, 31 miles N. of Brisbane, situated on the north bank of the Caboolture river, where is the railway station; there is also a railway station at Morayfield on the south side of the river; two lines of mail coaches run to Kilcoy *viâ* Woodford and Villeneuve, and to Hopetown three times a week. Steamers come up to the township for timber at irregular intervals. Hotels: Club, Royal, and Stanley. There are four stores, some tradesmen's premises, and entertainment hall. The Government buildings are post and telegraph office, State school, police barracks and quarters, and court-house. A police court is held here once a month. Episcopal, Roman Catholic and Primitive Methodist churches, and Government Savings Bank. Salvation Army Barracks. The Good Templars have a hall here, with weekly lodge meeting. The Masons' and Oddfellows' also meet in the same building. About 5 miles from the village, up the river, the Primitive Methodists have another chapel, and the Good Templars have a hall opposite. The German Lutherans have also a chapel on the Durundur road, about two miles from the village. A co-operative creamery is located at Upper Caboolture, the produce being sent to the Brisbane factories. The water supply is derived from creeks about half a mile north of the township. Maize and other farm products are grown on the banks of the river. Dairying is now largely followed, particularly in Upper Caboolture; pig raising is being carried on to a considerable extent. Large quantities of cedar, beech, pine and hardwood obtained in the coast range, are exported from the place. There are State schools at Upper Caboolture, Caboolture South, and at Caboolture North, and provisional schools at Stoney Creek, Round Mountain, Durundur road, Roxburgh, Fernvale, and Toorbul. The Divisional Board meets at Caboolture township about once in six weeks. There are two saw-mills on the river, between the bridge and the wharf, and one on Lagoon Creek. Caboolture is on the North Coast Railway, which is now open through to Gladstone. Population (census 1891), 248; of entire district (census 1891), 18,591 persons.

CAIRNS (16° 54′ S. lat., 145° 44′ E. long.) (county Nares), electorate of Cairns, is a municipality (proclaimed May 28th, 1885), and seaport, about 900 miles NW. of Brisbane (established in September, 1876), at the mouth of Trinity Inlet, on the western shores of Trinity Bay, with a fine harbour, commodious and well sheltered, where coasting vessels of any tonnage can go alongside the wharves at all times. Mails arrive and depart to and from the South once or twice a week. A harbour board is being formed. Cairns contains a court-house, Divisional hall, Municipal chambers, State school (No. 332), St. Monica's school, Girls' High school, School of Arts, with library of 1,000 vols., police-office, pilot-station, custom-house, two bonded stores, police-barracks, hospital, savings bank, money-order and telegraph office, and Recreation Reserve. Hotels: Cairns, Crown, Railway, Court-house, Imperial, Mining Exchange, and others. Sittings of the Northern Supreme Court and District Court are held here. Cairns may be considered, by the great advantages of its harbour and wharves, as the natural outlet for the Mulgrave, Etheridge, Hodgkinson, Russell River, Towalla, and Mareeba goldfields, the Tinaroo and Wild River Herberton tin mines, and the silver fields of Muldiva and Montalbion district; the

Wolfram deposits at the Hodgkinson ; also for the rich copper district of Chillagoe, which has recently come into prominence. The distance by road from Cairns to Thornborough is 60 miles. Cairns is surrounded by miles of the finest sugar lands in Queensland. A number of Chinese hold freehold property thereabouts, and are sucessfully carrying on agricultural pursuits. The Colonial Sugar Refining Company have a sugar plantation at Hambledon, about 6,000 acres, worked with a 8,000-ton mill, fitted with double-crushing power and refinery, and all the most improved machinery. The Mulgrave Central Mill Company is in full swing, with a 5,000-ton mill. The Aloomba cane is crushed at Hambledon. Steps are being initiated for securing a central mill for the Russell River districts. A rice mill is erected on the Barron River, about six miles from Cairns. On the Smithfield Road there are numerous farms on scrublands, which produce prolifically all semi-tropical produce, and even English potatoes. The same on the Mulgrave Road, where there are many orchards also. The 16 miles from Cairns to Riverstone is a fine stretch of road to travel over. In 1896 the Cairns District Board started to construct a full-gauge tram line to Nelson, 14 miles from Cairns, at the Mulgrave. A loan of £25,400 was secured from the Government and a contract let to Kirk Bros. and Frew, for £15,319. The line was finished in April, 1897. The average cost for construction only was £1,827 per mile. Rolling stock cost £2,879, equal to £206 11s. per mile opened. An extension of 3 miles 61 chains to Aloomba was built last year with a loan of £14,245 from the Government, granted in June, 1898. A bridge was built over the Mulgrave with a further loan of £2,500. The total loan indebtedness of the Board was £43,394. The net revenue to June 30 for one year 59 days was £1,953 12s. 7d. The percentage of working expenses to revenue is 63·67. The gross earnings now vary between £150 to £250 per week. All interest has been paid, and the tramway is in a magnificent position, and has opened up thousands of acres of rich land. The sugar for the 1899 season estimated to be hauled is 15,000 tons. A trial survey to Harvey's Creek, a distance of 32 miles from Cairns, has been made, and the money for the extension promised. The Board will probably not stop till the line goes to the Geraldton boundary, where another sugar-mill is to be erected. Cairns enjoys a salubrious and healthy climate. The town is situated parallel with the sea, and has a fine long beach, a feature of which is the magnificent natural shade trees dotted over it, and facing which are numerous private residences. The court-house, town hall, and hospital are built on the Esplanade, as are most of the Government buildings. The principal thoroughfares are Abbott, Spence and Lake Streets. The area of the borough is 3¼ square miles, having 38 miles of roads, 450 dwellings, and property of the ratable value of £252,359. The streets are lighted with gas, and the Municipal Council is taking steps to borrow £35,000 for a water supply. A large industry has been opened up in red cedar now that railway communication is available and roads built able to carry traction engines. Tin is shipped here from the Irvinebank District, a distance of 50 miles. Gold was found in August, 1879, about 26 and 32 miles from Cairns at the Mulgrave, which is a declared goldfield. In 1891 gold was discovered in Freshwater Creek, 12 miles from Cairns. The Russell goldfield has been worked for some years. Towalla, seven miles from the Russell, keeps fairly going as a reefing field. Mareeba gold-field, five miles from Mareeba, the terminus of the third section of the railway broke out in May, 1893. Cairns is the 72nd division under the Divisional Boards Act, having nine members. Separated in 1891, and the Barron Divisional Board started in addition to the old Cairns board. A Land Court is established, with an acting Land Commissioner. Banks: Queensland National, Australasia, New South Wales, and Bank of North Queensland. Anglican and Roman Catholic places of worship, also a Primitive Methodist chapel. A road is open from Cairns to the Herberton tin mines, passing through Goldsborough and the Upper Mulgrave gold-fields, and another passing over Tinaroo Spur. The second section of the Cairns-Herberton Railway to Myola (24 miles) was opened in May, 1891, and the third section, to Mareeba (46 miles), on Aug. 1st, 1893. The Chillagoe private line is now completed to the 54th mile. The stream tin at the Tate River is very rich, but only workable during the wet season. The late Rev. J. E. Tenison-Woods, when lecturing upon the tin fields of this district, compared the surrounding country to a second Cornwall, and asserted that with capital it would afford employment for 20,000 people for some years. The rich scrubland sheltered by the coast range has been found equal to the production of three tons of sugar to the acre, and to be also specially adapted for tobacco culture. Tobacco is being cultivated, but only on a small scale. Coffee is rapidly becoming one of the staple crops. Large exports of bananas, 700,000 bunches a year, also of fruit, particularly pine-apples, during the season. Several new centres have been erected along the line of railway, the principal being Kuranda. Near Kuranda are the Barron Falls, ranking for their beauty and great depth of fall amongst the finest in Australia. The population of Cairns by census of 1891 was 2,460, now about 3,000. The average rainfall for the past six years has been 117 inches per annum. Local papers : *Cairns Advocate* and *North Queensland Miner, Cairns Argus*, and *Morning Post*.

CALCIFER, *see* CHILLAGOE.

CALLIOPE (24° 4′ S. lat., 151° 6′ E. long.), a gold-field and postal centre in the county of Clinton, situated between the Calliope and Boyne rivers, about 17 miles from river to river, and 329 miles NW. of Brisbane. Hotels : Sun, Diggers' Arms, and Tattersall's. There is a State school (No. 20), a school of arts, with library of 291 vols., two places of worship, Undenominational and Roman Catholic (both visited), Episcopal and Presbyterian ministers also visit, and two stores. The port of Gladstone is about 15 miles distant NE. Coaches run to Rockhampton bi-weekly, fare, 25s. ; to Gladstone twice a week, fare, 5s. It is a rich mineral district, and is also of good grazing capabilities. Population, 202 (census 1891). Formation : metamorphosed rock, principally grey and green slates. At Marblestone, 9 miles from Calliope, large beds of fossiliferous limestone are to be seen.

CAMBOOYA (27° 41′ S. lat., 151° 53′ E. long.), a post-town, telegraph and railway station in the county of Aubigny, 125 miles SW. of Brisbane, situated on Hodgson's creek. The railway line from Warwick to Toowoomba runs through the centre of the township. Cambooya is 1,524 feet above the sea-level, and is 24 miles by rail (13 miles by road) from Toowoomba. Coach runs to Pittsworth three times a week, fare, 10s. Hotel : Royal. Provisional school, No. 196.

CAMOOWEAL (19° 57′ S. lat., 138° 17′ E. long.), a pastoral township, situated on a plain 1,500 feet above sea-level, in the county of Nowrana, and electorate of Carpentaria, with post and postal note office and telegraph station, and Government Savings Bank, 250 miles from Burketown, 200 miles E. from Cloncurry, situated on the Georgina Creek, about 7 miles from the Northern Territory border. A coach runs to and from Burketown ; fare, £5. A coach also runs to Cloncurry, thence to Hughenden railway-station. Buggies also run to Urandangie and Boorooloola (Northern Territory). It is the chief trading centre of the north-western stations of Queensland, and is the meeting-place of five mails—viz., Urandangie, Northern Territory (S.A.), Burketown, Herbert Vale, and Cloncurry. Hotels : Landsborough and Cosmopolitan, provisional school, post and telegraph office, police quarters, court-house and customs (Queensland and Northern Territory) police and customs quarters. Tradesmen : Two storekeepers, a blacksmith, a saddler, butcher and dairyman. Court sits first Wednesday in each month. Local institutions : Jockey Club, Progress Association, and Cricket Club. Camooweal is now a first-class meteorological station. District is of pastoral character, reputed to be one of the finest in Australia. Principal stations are, cattle ; Rocklands Pastoral Company (5 miles), Barclay Downs (35 miles), Yelvertoft (50 miles), Austral Downs (60 miles), Lake Nash (80 miles), Undilla (50 miles), Herbert Vale, Margaret Vale, Lily Dale, Riversleigh, sheep : Morestone Downs (45 miles). Chinese grow potatoes and other vegetables, also grapes. The Rocklands Pastoral Co. have enhanced greatly the value of their property by boring. Seven artesian bores give now an unlimited supply of well water (requiring pumping), at an average depth of 350 feet ; and the success which attended the efforts of this station has induced others to follow their example, notably, Avon Downs and Alexandria. Formation : Flint and limestone. Remarkable caves exist some 14 miles from the town. They are four in number, one lying under the other. They vary in height from 60 feet to 103 feet, and are approached from a well or hole in the roof. In wet weather a waterfall of great beauty is formed. A bonded store has been established at Camooweal. Population, 83 (census 1891), now about 120.

CANNIBAL CREEK, a tin-mining locality in the Palmer district, opened in 1882. Rich discoveries of ore have been made here, but the yield of metal has not been equal to expectation. In June, 1882, a site for a township was fixed and the main and cross streets were marked out by the warden. Large and extensive machinery was erected here, but the venture was a failure.

CAPE BEDFORD is an aboriginal Mission station, situated on the north side of Cape Bedford, about fourteen miles (by water) from Cooktown. It is in charge of the Rev. Mr. Schwarz, and was started in 1886. The site appears to have few advantages, "the surface for miles being barren drift-sand, swept by the winds into dome-topped and ridge-crested drives." Mr. Meston speaks highly of the management, and describes the aboriginal girls at the station in the politeness of their manners and modesty of demeanour as excelling any he had seen before. A service is conducted entirely in their own language, into which hymns, chapters, prayer, and responses have been translated.

CAPE GRAFTON, an aboriginal Mission station, usually known as the Bellender-Ker Mission, is situated about ten miles from Cairns, on the shore of the West side of False Bay, looking North across Trinity Bay. The Mission funds are chiefly supplied by the Church of England. Mr. Meston describes the locality as having much excellent land, abundance of water, a large hunting area, and unlimited sea fishing. A considerable amount of work is reported to have been done. The school children are said to be cheerful and healthy, and the system of teaching, feeding, and housing apparently satisfactory.

CAPELLA (Co. Talbot) (23° 11′ S. lat., 148° 4′ E. long.), a township, post, telegraph and railway station on the Clermont Railway, 32 miles from Emerald and 197 miles W. from Rockhampton. It is in the electorate of Peak Downs, and situated on the Capella Creek. It has two hotels, Royal Mail and Exchange, a provisional school (No. 410), and two stores. The school-house is used for divine service. The Catholics have a chapel. The surrounding country is fine open downs, suitable for all kinds of agriculture. Coal has been found in the neighbourhood, and a shaft is now down upwards of 100 feet. Population, 83 (census 1891).

CAPEVILLE (20° 32′ S. lat., 145° 28′ E. long.) is a mining locality on the Cape River, 870 miles NW. of Brisbane, in the electorate of Kennedy, police district of Charters Towers, divisional board district of Dalrymple. It is 59 miles from Charters Towers, and 141 miles from Townsville. The district is pastoral

and mining, principally of the reefing character. Many of the reefs have yielded handsome returns, but of late little progress has been made in mining, and in quartz mining very little has been done. The railway was extended to Cape River in October, 1884, crossing the river six miles below Capeville, and is now open to Hughenden, and in course of further extension. Pentland, to which a mail coach runs daily, is situated on the Northern Railway, about six miles distant, and is the principal township railway depôt for the Cape River district. A small battery has been erected here. Specimen Gully is mainly populated by Chinese diggers, by whom alluvial mining is carried on. Upper Cape is situated 15 miles higher up the Cape River than Capeville, and 18 miles from Pentland. Population fluctuates, generally about 30 white and same number of Chinese. Alluvial sluicing is the principal occupation. The mail route from Pentland to Georgetown passes through here. Formation: principally granite. Population, 19 (census 1886).

CARDWELL (18° 15′ S. lat., 146° 3′ E. long.), a township about 950 miles NW. of Brisbane, on Rockingham Bay, situated at the foot of a range of mountains, in the county and police district of Cardwell, electorate of Herbert, opposite the North-west end of Hinchinbrook Island, 2 miles from Meunga Creek, now bridged. It was founded in 1863 by Mr. G. E. Dalrymple. Mails arrive regularly by steamers plying between Townsville, Dungeness, Cardwell, Mourilyan Harbour, the Johnstone River, Cairns, and Port Douglas. Hotels: Marine and Royal. It was till recently the port of Hinchinbrook, Rockingham Bay, which includes Dungeness, at the mouth of the River Herbert on the south, and the Murray, the Tully, and the Hull rivers, with several smaller streams, all of which flow into the bay, north of the town. Both Dungeness and Geraldton are now ports of entry and clearance. Cardwell possesses one of the finest harbours in the colony, easily approached in all weathers, with a depth of water varying from four to ten fathoms, and it is a post town, money-order office, savings bank and telegraph station. A jetty, 2,000 feet long, extended into the bay, but it was partially destroyed by a cyclone in 1882, and the gales of March 1890 almost wrecked it. Some 500 feet are yet remaining, and a new jetty, 530 feet in length, was completed in June, 1892. There is a court-house, a custom-house, harbour-office, telegraph office, police station, pilot-station and divisional hall, lands office, four stores, one hotel ("The Marine"), two butchers, one baker, one blacksmith, and about 24 dwelling houses, State school No. 136. Meat works, including boiling down, extract, and tinning, have been erected. No church, but a minister and a priest of the R. C. Church visit from Ingham. The town is cut up into allotments, but the principal street faces the beach. The surrounding country is of a very fertile character, and will grow nearly anything, and for grazing purposes cannot be surpassed, the lands on the Murray, the Tully, and the Hull—practically unlimited in extent—being especially celebrated for richness and fertility. The range at the back of the town has all along been a formidable barrier to its advancement, cutting off as it practically does the communication between it and the country to the westward. Immense Kauri pine-scrubs clothe the eastern and western slopes of this range. There is excellent forest timber in quantities throughout the district, and one steam saw-mill is in operation near the town, whilst there is a large export of cedar from Clump Point. In the district a large area is under cultivation, principally for cane, other crops being maize, yams, sweet potatoes and coffee. Various minerals are known to exist in the district, including gold, and there are tin mines about seven miles out, on what is known as Five Mile Creek. Cardwell is 28 miles from the Herbert River, 240 from the Etheridge diggings, and about 90 miles (120 by telegraph route) NW. from Townsville. Large numbers of the dugong are caught here, and there is a factory for the extraction of the oil. Population of town, 139; with vicinity, 3,435 (census 1891).

CARNARVON (17° 10′ S. lat., 139° 45′ E. long.) is situated on the western point of Sweer's Island, called Inscription Point, Gulf of Carpentaria, about 70 miles to the westward of Normanton, and about 1,650 miles NW. of Brisbane, *viâ* Townsville. Sweer's Island is not now a port of entry and clearance.

CAWARRAL (23° 15′ S. lat., 150° 45′ E. long.) (county of Livingston, police district of Rockhampton), electorate of Rockhampton North, a township and post town, 29 miles from Rockhampton on the Cawarral Creek, 395 miles NW. of Brisbane, and 4 miles from Tungamull, the nearest railway station, to which coaches run, coach fare, 1s. 6d. Rockhampton is its port. Hotel: Cawarral. A primary school (No. 135), two places of worship, Primitive Methodist and Roman Catholic, and a school of arts. Saw mill about 3 miles off. District is principally pastoral, but there are quartz reefs in the vicinity. Principal mines are Long Tunnel, Commissioner, Nil Desperandum, Helena, and Hunter Extended. The year 1898 was a fairly prosperous one for the field, 1,112 ozs. 3 dwts. were obtained from crushings, and 952½ ozs. from tailings. Formation: Serpentine and slate. Population, 320 (census 1891).

CHARLEVILLE (26° 24′ S. lat., 146° 14′ E. long.), a municipal town, till 1897 the terminus of the Western Railway, 483 miles W. of Brisbane, with tri-weekly mail from Brisbane. Coaches run to Blackall, Adavale, Tambo, Angathella, Toompine, Eulo and Thargomindah. The town, which has a money-order, telegraph and savings bank office, is situated on the east bank of the Warrego river, and is the centre of the electorate of Warrego, which returns one member. Nearly the whole of the district is included in the Murweh Divisional Board, which meets here. The division is subdivided into three parts, each returning three members. Municipality was proclaimed March 24, 1894, area 29½ square miles, 26 miles of streets and roads, 420 dwellings, ratable property estimated at £311,161. There is a Masonic Lodge, Oddfellows' Lodge, and School of Arts. Public buildings: court-house, barracks, and police quarters, post and telegraph office, hospital, School of Arts, State school (No. 185), and railway station, divisional hall, Episcopal, Presbyterian, and Roman Catholic churches. The town possesses an artesian well, giving an output of 3,000,000 gallons of clean fresh water daily, with pipe-pressure of 96 lbs. to the square inch, the bore reticulating the town. Eleven hotels: leading, Charleville Hotel, Royal, Norman, and Victoria. Ten stores, two bakers, four blacksmiths, and other tradesmen. Banks: Queensland National and Commercial. Newspaper: *Charleville Times*. District exclusively pastoral, but market gardening carried on by Chinese. Population of town, 1,456 (census 1891); now about 1,500.

CHARTERS TOWERS (20° 3′ S. lat., 146° 18′ E. long.), a mining municipal town, with post, money-order, savings bank, and telegraph office, in the county of Davenport, electorate and police district of Charters Towers, 82 miles from Townsville, with which it is connected by rail, three through trains daily, 2½ miles from Millchester, and about 820 miles NW. of Brisbane. A 'bus runs every hour to Millchester, fare 6d. There are over 30 hotels, among others the Exchange, Australian, Crown, Royal, Occidental, Imperial, the Courthouse, Reefers' Arms, Excelsior, Mac's, Queen, Railway, Day Dawn, Brilliant and Metropolitan. The Burdekin River is about 8 miles distant. The town is situated on the northern spurs of the Towers Mountain, at an elevation of about 1,000 feet, and consisted originally of two main streets—Gill and Mosman, but the town has considerably increased of late. It was incorporated June 21, 1877. In the municipality are 17 miles of streets (6 miles metalled), and 1,350 dwellings, area 640 acres, estimated value of ratable property, £261,818. Charters Towers was discovered in January, 1872, by a party of miners (Mosman, Clarke and Fraser). It received its name from Mr. Charters, who was the first warden, Towers or Tors signifying the peaks where the first gold was discovered. It was proclaimed as a goldfield on August 31, 1872. The town is about the centre of the goldfield. Sittings of the Supreme Court are now held here twice a year, and of the District Court quarterly. Local banking establishments: Queensland National, Union, London, N. S. Wales, Australian Joint-Stock, Australasia, Royal, and North Queensland. There is an iron foundry. Among the local institutions are a school of arts, with library of about 2,721 volumes, and a hall with stage appointments, court-house, hospital, Church of England (St. Paul's), Wesleyan, Roman Catholic (St. Columba), Presbyterian, Primitive Methodist, Baptist and Lutheran places of worship, Salvation Army, and a school (No. 215) for boys, and one (No. 118) for girls and infants, and two mixed State schools, one at Queenton and one at Richmond Hill. The girls' school occupies a central site on the crown of the Mexican ridge. The hospital of brick has eleven wards and 88 beds. The post and telegraph office is also of brick. An abundant supply of water is obtained from the Burdekin. Gas works have been erected, and are now supplying the town with gas, and a company also supplying electric light. It is a large reefing district, some of the principal lines of reefs being Day-Dawn, St. Patrick, Queen, North Australian, Old Identity, Victory, Brilliant and St. George, Queen and Victory, Brilliant, Sunburst, Caledonia, Wellington, Golden Surprise, and Alexandra. Some of the reefs are found to improve at lower depths. The Brilliant reef has been proved to carry gold to a depth of over 2,500 feet, and the workings on the Day Dawn line are approaching that depth, and wherever they are on strikes of gold they are not getting poorer with depth. The principal mines are the Brilliant, Day Dawn Block and Wyndham, Brilliant and St. George, Craven's Caledonia, Mill's Day Dawn United, New Queen, Victoria, Victory, Kelly's Queen, Queen Cress, Papuan, and Queen Central. For the year 1899, the total dividends paid by registered companies totalled £302,262 2s. 5d., the leading mines contributing, being: Brilliant, £45,500; Brilliant and St. George, £95,400; Kelly's Queen Block, £54,000; Day Dawn Block and Wyndham, £37,500, eleven other mines contributing the rest. The cyanide profits were £70,000 in addition. The total yield of gold was 512,042 ozs., valued at £1,216,750. Several extensive pyrites works are also in operation, by which large quantities of gold are obtained. The deepest mine on the field is the Brilliant Deep Levels, now down to 2,558 feet, the Brilliant Extended being about 200 feet less. Number of miners employed, 2,256—2,200 being engaged in quartz, and 56 alluvial mining. About 419 of the population are Chinese, principally gardeners, cooks, servants, and storekeepers. Since the opening of the field to December 31, 1899, the total yield of gold from the Charters Towers and Cape diggings has been 4,914,659 ozs. In the early part of 1899 the Warden wrote that appearances promised that the yield of 1899 would equal that of the previous year, and this was fulfilled, the returns being considerably in excess, a result due entirely to the increase from cyanide works. Great things were at one time looked for from a pyramidal hill, near the Seventy-mile diggings, about 16 miles S. of Charters Towers, now known as Mount Leyshon, whose formation is supposed to be similar to that of Mount Morgan, being the deep-seated core or "neck" of an ash-discharging volcano, while Mount Morgan is a deposit from a hot spring or geyser. This has been taken up by a local syndicate, and a ten-head battery has been erected. An occasional small dividend is declared. To the east of Mount Leyshon is an isolated "neck," the highest neck of which is now called Mount Mawe. Payable gold is believed to exist here, as gold has been found in most of the creeks which rise in the mount. The gold is exceedingly fine, and needs careful treatment to work without losing much of it. The Day Dawn mine has a railway, 1¼ mile to their Ex-

celsior machine, a steam motor drawing the trucks. The works are spoken of as one of the finest plants in Australia. In the latter end of 1885 a reefing district called the Black Jack was discovered, situate about 5 miles SW. from Charters Towers. Most of the other larger mills are connected with the Government railway by small branches or sidings, among them being Mill's Day Dawn United, Day Dawn P.C., Brilliant, Brilliant Block, Brilliant and St. George United, Kelly's Queen Block, Brilliant Extended. The Brilliant Central Company are applying for permission to connect. There are numerous friendly societies and a mining institute. Population of municipality, 4,597 (census 1891); now about 5,000. Population of the field, including Cape River, 23,290. Newspapers—the *Northern Miner*, *Mining Standard*, and *Herald* (daily), *North Queensland Register*, and *New Eagle* (weekly). Formation: syenite granite, diorite, porphyry.

CHILDERS, a rising township in the Isis district, and a railway-station on the Maryborough-Childers branch, 40 miles N. from Maryborough, with postal, money-order, savings bank and telegraph facilities. It owes its rise and existence to the development of the sugar industry, and has every prospect of becoming an important centre. It has branches of the North Queensland, Queensland National and Commercial Banks, six hotels, a State school, Primitive Methodist, Anglican, and Roman Catholic churches, the usual tradesmen's premises, court-house, post and telegraph and other Government offices, and several stores. Newspaper: the *Isis Recorder*. Masons, Oddfellows, and Foresters have lodges. In the neighbourhood are four large sugar-mills.

CHILLAGOE, which includes Calcifer and Girofla, a copper and silver mining locality in co. Chelmsford, situated between the Tate and Walsh rivers, about 8 miles distant from and on the watershed of the latter river, and about 80 miles NW. from Herberton. The prospects were reported as being exceptionally good, and it was expected that Chillagoe would become a large and important field for both copper and silver, as several rich silver lodes have been discovered. The nearest and best route to the coast is *viâ* Mareeba to Cairns. The Chillagoe Railway and Mines, Ltd., are now building a railway to connect the field with the Cairns line at Mareeba, over fifty miles of the line having been opened. They have a concession of 2,000 acres of mineral lands for a period of fifty years, besides 1,156 acres of mineral lands held under the usual mining conditions. Several shafts have been sunk, and about 200 men are being employed in conjunction with these mines. The ores are copper with some lead. At present McDonald & Co. run the mail coach from Mareeba to Herberton, and in conjunction with their mail coach is run a mail coach from Herberton to Gerofla once a week, *via* Watsonville, Irvinebank, Montalbon, Coorboora, Calcifer, Chillagoe, and Girofla. Large smelting works have been erected and work is now going on, and others are being erected at Chillagoe. The Company have telephonic communication with the Government line at Mareeba. There are two hotels, a dance hall, and a provisional school. Formation: Feldspar granite, intruded upon in many places by large bands or bodies of quartzite dyke, impregnated with ferruginous matter. But the most striking feature in this locality is the presence of large bodies or hills of limestone, extending for miles over the surface, and worn by atmospheric influences into picturesque and fantastical shapes, assuming in places the appearance of towers and in others of embattled parapets with numerous caves. One locally known as The Temple is described as having a magnificent theatre, 100 feet in diameter, and some 80 feet high, the roof festooned with stalactites, while the floor was covered in places with stalagmite. Another cave is 200 feet in length, and 50 feet in width, with a gothic roof 80 feet high. The Government geologist is of opinion that the Chillagoe and Koorbora fields bid fair to rival or excel the richest of our mineral fields. Some of the deposits of silver and copper ore are on a gigantic scale. Population of town, about 50; of district, about 5,000, of whom 4,613 are Europeans.

CHINCHILLA, a township, post, telegraph and railway station on the Western line, 203 miles SW. from Brisbane, having a State school, branch of the Government savings bank, two hotels—Royal and Commercial—and two stores. Farming district.

CLERMONT (22° 49′ 11″ S. lat., 147° 38′ E. long.), a municipal town (originally proclaimed January 21, 1867) having a mayor and five councillors, money-order office, savings bank, post, telegraph, and railway station, in the county, parish and electorate of Clermont, about 227 miles NW. of Rockhampton, 575 miles NW. of Brisbane, situated on Sandy Creek and both sides of a large permanent lagoon; the main part of the town is on low ground and liable to floods; the Government buildings are on higher ground. Hotels: Prince of Wales, Commercial, Leo, Railway, Queen's, Federal, Grand, Clermont, and Terminus. The celebrated Peak Downs copper mines are four miles from the town. They were discovered in 1862 by a digger named Mollard, who was at the time prospecting for gold, and have yielded a large quantity of ore. Operations are now stopped, but may be resumed, if copper should rise in price. The district is also an auriferous one. There are three collieries, Blair Athol, El Dorado and Hope, within 12 miles of the town; they supply coal to the Government for use on the western line, and also supply the town, and it is reported the demand is greatly increasing, and is considered to compare favourably with the best Queensland coal. The cost of carriage is reported to be much hampering this industry, but with the building of the proposed railway to Blair Athol, new life will be given to coal mining. The New Quarry Hill G. M. Co. took up the sandstone formation at the east end of the town, known as the Quarry. At a depth of 210 feet a seam of coal from 9 to 12 inches in thickness was struck and passed, and another at 222 feet, but at 300 feet heavy water was met. A pit was sunk along the railway line close to Clermont, but operations did not result in success. The Government contemplate building a railway to junction with Ravenswood on the Northern system. The places of worship are Episcopal (All Saints), Wesleyan, Roman Catholic Church (St. Mary's), Presbyterian Church, and Salvation Army. Public buildings—court-house, hospital (a very large building, situated in a salubrious position on the crest of an eminence, about ¾ mile SW. of the town), State school (No. 21), several private schools, lock-up, and police quarters. Banks: Joint Stock and New South Wales. Clermont has also a School of Arts (with a library of 1,587 vols.), the Peak Downs Telegram buildings, two aerated water factories, and a town hall. There are in the municipality (area 18 square miles) 31½ miles of roads and streets, 450 dwellings, value of ratable property, £72,533. The bridge across the lagoon was completed in August, 1886. A district court is held twice a year, and there is a resident police magistrate and warden. The railway station is about half a mile from the town. The surrounding country is largely occupied by stations, the principal being Logan Downs, Wolfang, Retro, Huntly, Peak Downs, Gordon Downs, Langton, Peak Vale, Surbiton, Banchory, Beaufort, Kilcummin, Avon Downs, Malvern Downs, Cotherstone, Craven, Emerald Downs, Moray Downs, Elgin, Downs, Laglan, Albro, Frankfield, Leichhardt Downs, Grosvenor, May Downs, Bully Creek, and Fleurs. This township is on the main road to the Aramac and Western Country. The climate of Peak Downs (the name of the district) is very salubrious. A considerable amount of land has been selected in the neighbourhood, and some attention is now being bestowed on agriculture. Local societies: Pastoral, Agricultural and Horticultural Society, Peak Downs Turf Club, Miners' Association, Oddfellows '(2), Freemasons', Foresters', H.A.C.B., and Good Templar Lodges. The Belyando Divisional Board, and the Clermont and Belyando Marsupial Boards meet here. In the district are iron bark forests of great extent, constituting one of its principal sources of wealth; an immense number of railway sleepers are sent from here. The gold yield for 1898 was 30,911 ozs., being by far the largest yet recorded. The Warden in 1899 considered that the progress of the field had been up to expectations, and that the general opinion was that the best of the gold had yet to be discovered. A new rush has taken place at the Venus, situated about 10 miles from Clermont. A nugget weighing over 20 ozs. of pure gold was obtained four inches under the ground. All the old fields, such as the Wild Cat and the Dead Horse, are worked out, but it is considered that there is yet a bright future for the mining district in and around Clermont. The discovery of gold in the vicinity of Sandy Creek, about 29 years ago, caused the establishment of Clermont. From Sandy Creek the principal yield of gold came for a long time, but it is now reported as being nearly deserted. At the Miclere and the Springs a steady little population is still maintained. After the mining fever subsided Clermont became the centre of the splendid pastoral country adjacent to it. On three occasions severe floods have occurred, causing an immense amount of damage. One of the features of the district is the Peak Range, which is composed of a number of isolated peaks. The most remarkable one is Wolfang Peak, about 28 miles NE., consisting of an immense natural obelisk rising out of a high mount, which stands alone about the centre of a large expanse of undulating downs. This peak, which is nearly 1,000 feet in height, is only a few feet in extent on the top. Other remarkable peaks are Fletcher's Awl, the Gemini, Table Mountain, and Malvern Peak. The water supply is derived from Corporation Wells on the Lagoon, and other places. Formation: volcanic. Population of municipality, 1,300; of census district, 5,080 (1891), of the gold-field about 2,800. The *Peak Downs Telegram*, established 1864, is the local paper.

CLEVELAND (27° 33′ S. lat., 153° 19′ E. long.), a small township, with money-order, telegraph and savings bank office and railway station on the west shore of Moreton Bay, 22 miles E. of Brisbane by land and about 35 miles by water. It is in the electorate of Bulimba, Stanley Co., and police district of Cleveland. Hotels: Brighton and Cleveland. Schools at Cleveland East and West (Nos. 35 and 20). Government buildings: Railway station, police-station, court-house, and post and telegraph office, also Divisional Board Office. Episcopal and Roman Catholic places of worship, and a school of arts, with library 950 vols. It is much frequented as a watering-place, and has a jetty extending into deep water. The jetty into Raby Bay has at low spring tide 8 feet. There are two neatly kept reserves for public recreation. The one at the extreme point has been much improved by levelling, tree planting, and enclosing with a circular fence, forming a pleasant drive round, from which the new jetty runs into Raby Bay. A commodious public bath has been provided by the Divisional Board. There are some splendid oyster beds in the immediate neighbourhood of Cleveland, which are reserved for the use of the inhabitants. Splendid oranges and bananas are grown in the district. The railway station buildings are in close proximity to the post and telegraph and police offices. Cleveland was one of the first places in Queensland where sugar cultivation was tried. As early as 1862 the late Hon. Louis Hope had several acres of land under cane. Fellmongery works on Hilliard's Creek, about 4 miles distant. Population, 282 (census 1891).

CLIFTON.—An agricultural township, telegraph office, money-order office, and railway station on the Southern and Western Line, 143 miles from Brisbane, and 26 miles from Warwick. Through the development of the farming and dairying industries, the locality is becoming of importance. Wheat

is largely grown. It has two banks—Queensland National and Australian Joint Stock—also a branch of the Government savings bank, a State school, Angiican, Methodist, Presbyterian, and Roman Catholic places of worship, School of Arts, three hotels, Clifton Arms, Australian, and Club, and the trades are fairly well represented. There are several local clubs and societies. A coach runs to Leyburn. Population, about 250.

CLONCURRY (21° 41′ S.lat., 140° 33′ E. long.), a post town with money-order, telegraph and savings bank office, and copper-mining centre in the Burke district (co. Beaconsfield, electorate of Flinders), on the river of the same name, a tributary of the Flinders, about 272 miles S. of Normanton, its port, 540 miles W. from Townsville, and about 1,500 miles NW. of Brisbane. The main road to Boulia and the Herbert River passes through it. The communication with Brisbane is either *viâ* Townsville by rail to Hughenden, thence coach : coach fare £8 ; or by steamer from Thursday Island to Normanton, thence coach : coach fare £6 14s. Hotels : Royal, Imperial, Prince of Wales, Post Office. There is a court-house and police-station, State school (No. 411), a hospital, several stores, a branch of the Queensland National Bank, Divisional Board's hall, and several tradesmen's shops. Divisional Board meets here. The most auriferous part of the district was the Top Camp, on the Cloncurry river, about 30 miles S. of Cloncurry. At Soldier's Cap, 6 miles from Top Camp, is a reefing centre, but the place is now nearly deserted. The Warden reported that the district had made little progress in mining during 1899. The district is abundantly rich in copper, and has fine grazing capabilities ; most of the runs are now fenced. The principal stations are Fort Constantine, Eddington (sheep), Dalgonally, Leilavale, and Devoncourt for cattle, and Penola Downs, Eulolo, Granada and Clonagh for sheep. The proposed transcontinental line was projected to come within 30 or 40 miles of Cloncurry, and a railway is much needed to develop the mineral resources of the locality. In 1883 the Great Australian copper mine, which is about a mile S. of the town, was bought by a syndicate of English capitalists. Operations were for some time stopped, with little chance of being resumed unless railway communication should be made, and the metal rise in price. However, copper has risen, and a Bill is now before Parliament for the building of a private line. The ore averages about 25 per cent. of copper. Very rich copper discoveries have been made to the southward of the township. Silver lead in quantities has been found, about 45 miles NW. of Cloncurry. Near to the town on the Boulia road is a mountain of rich iron ore known as "Mount Leviathan," better known as the Black Mountain. This hill is about 250 feet high and a mile in circumference. Cloncurry is plentifully supplied with water from two public and many private wells. Cloncurry has also a progress association. Newspaper : *Cloncurry Advocate*. Population, 243 (census 1891) ; of district (1896), 513.

COEN (13° 55′ S. at., 143° 15′ E. long.), a quartz reefing township, proclaimed August 16, 1892, situated on the headwaters of the Coen River, in the Cook district, about 160 miles from Laura (terminus Cooktown railway). It has a post office and savings bank, the building being also utilised as Warden's and petty sessions court, and a school of arts, with library of 387 vols., portion of the building being available as a school, two hotels, four stores, and two butcheries. Progress Association meets here. It is a telegraph station on the telegraph line to Thursday Island. There is a weekly mail service overland between Coen and Cooktown. A fortnightly service runs from Coen to Moreton *viâ* Rokeby, Meta Downs, Mein, Pinetree, Merluna, and York Downs. Two cutters sail weekly from Cooktown to Port Stewart, conveying goods and passengers ; from thence to Coen is 45 miles. An alluvial diggings of considerable extent but poor, has been discovered between Coen and the east coast, at what is called the Rocky. The port for Rocky is Chester River, about 20 miles north of Port Stewart. In 1897 the Rocky alluvial diggings were almost abandoned ; but a new reefing field in the vicinity of Neville Creek, about 7 miles from the Rocky, has been opened, a small water-power battery erected, and some good crushings obtained. Chester River will probably be the port for Coen in the future. In the early part of 1900 the Warden reported that much prospecting work has been done, but the field had not materially benefited, due principally to the drought. A crushing company has been formed to work Klondike. The yield of gold for 1899 from quartz was 3,783 ozs. Mining (quartz reefs) pastoral and agricultural district. Coen is the township for five pastoral properties of the district, viz., Rokeby, Langi, Pinetree, Merluna and York Downs, all fairly good stations that are gradually being stocked. Formation : granite and schist.

COMET (or COMETVILLE) (23° 40′ S. lat., 148° 31′ E. long.) is a railway station on the Central Railway in the county of Denison, electorate of Leichhardt, police district of Rockhampton. The township, which has a post office, savings bank, money-order office, and telegraph station, is on the banks of the river of the same name, 140 miles W. of Rockhampton. The present terminus of the line is at a place called Longreach, 424 miles W. of Rockhampton. Public buildings are comprised in the railway station, and State school. Hotel : the Comet. There are no resident clergymen, but the township is visited occasionally by Primitive Methodist, Church of England, and Roman Catholic ministers. State school (No. 173), formerly the court-house. A large gum tree, marked $\frac{\text{DIG}}{\text{L}}$, about five miles below the township, at the junction of the Nogoa and Comet Rivers, marked by Leichhardt, and locally known as the Leichhardt Tree, though not known when done (though believed to be Dec., 1844), and two gum-trees marked L, on a deserted sheep station, called "Corio," about a mile from the township, are locally supposed to be Leichhardt's last marks. Eleven miles to the east of the township, and immediately contiguous to the railway, a surface seam of coal was struck some years ago ; but the quality, as usual in surface seams, was not good. A tract of country about ten miles square, on the west of Tolmie's Range, shows indications of an extensive coal-mine, the surface of the ground being strewn with petrified wood. Gold has also been found in this range, but not in payable quantities. Population 80 (census 1891). Pastoral district. Formation : carboniferous.

CONDAMINE (26° 57′ S. lat., 150° 6′ E. long.), a post town situated on the river of the same name, 24 miles from the Western Railway, in the county of Bulwer, electorate of Murilla, about 240 miles W. of Brisbane. State school (No. 24), and police barracks here. The communication with the metropolis is *viâ* the Miles railway station. A buggy runs twice a week with mails. Population, 106 (census 1891). Pastoral district. Formation : generally a sandy soil with hard chalky subsoil. Great quantities of ironstone are to be found on the river bank.

COOKTOWN (15° 27′ 20″ S. lat., 145° 17′ E. long.), a municipal township, in co. Banks, Cook electorate, on the southern bank of the Endeavour River, about 1,050 miles NW. of Brisbane. The entrance to the river is about 800 yards wide ; it lies between Grassy Hill on the south side, and a low sandy point on the north, named St. Patrick's Point, and is easy of access, Mount Cook (about 1,500 feet high) being a most prominent landmark. The A.U.S.N. Company's steamers ply weekly, and the Torres Strait steamers monthly, to Brisbane ; there are also other steamers. The A.U.S.N. Co.'s steamers run from here to Normanton and Burketown *viâ* Thursday Island. Hotels : Sovereign, Great Northern, Queen's, and fourteen others. In 1770 Captain Cook beached his vessel, the *Endeavour*, in the river for repairs, having previously had to throw his guns overboard to get off the reef on which the vessel had been stranded. It is believed that the *Endeavour* struck not far from 15° 7′ S. lat. 145° 36′ 48″ E. long. on a large reef to the northward of the true Endeavour Reef. The exact locality has been identified, but the guns themselves, though searched for, have not been found, thick layers of coral having grown, it is believed, over them. The river is rather an arm of the sea, the tidal influence extending inland about 15 miles. The mouth is really an estuary, into which the Endeavour River runs just above the town. On the southern side of the estuary—which is nearly a mile wide in front of the town—and between the houses and the sea rises Grassy Hill, which forms a good shelter to vessels lying at or near the wharves. The main street (Charlotte Street) runs parallel with this hill, nearly north and south, beginning at the wharves to the northward and ultimately merging into the Palmer Road. This street is a wide thoroughfare, is well built upon for more than half a mile, many of the business places being commodious and substantial structures. In this street, at the junction of Adelaide Street, a memorial to the late Mrs. Watson has been erected. There are a number of cross streets also, on which have been erected many business and private houses. Most of the streets are a chain and a half wide. Cooktown is the port for vessels plying between Queensland, New Guinea, and New Britain. It extends for 1½ mile along the river bank, and is almost environed by hills. Municipal area, 15 square miles, with 20 miles of streets and 812 dwellings ; value of ratable property, £136,162, incorporated April 3, 1876. Among other institutions are branches of the Queensland National, New South Wales, and North Queensland banks ; these are handsome buildings, more especially the Queensland National Bank, a court-house, Federal Hall, built for a skating rink, Masonic hall, and Immigration barracks. The hospital is a fine building on an elevated site, and can accommodate 60 patients ; a new wing has been added to accommodate 20 patients ; the tower is used as a fever ward. There are bonded stores, a custom house, four wharves, with 14 feet of water at low tides, with sheds and dry stores for goods, money-order office, telegraph station, savings bank, and post office. A monument to Captain Cook, erected at a cost of about £1,300, was unveiled here in 1889. Several large stores have been erected in various parts of the town by European and Chinese merchants. Places of worship : a Roman Catholic Church (St. Mary's), Primitive Methodist, also an Episcopal Church with parsonage, and Presbyterian church. The Salvation Army meet in their own barracks in Charlotte Street There is a convent school in connection with the Roman Catholic church. Cooktown is the residence of the Vicar-Apostolic, Dr. Hutchinson, who is assisted by two priests. There is a national school, a girls' school (No. 177), a boys' school (No. 453), and a Roman Catholic school. Assizes of the district court and sittings of the Supreme Court are held at stated intervals in the court-house, a large building at the lower end of Flinders Street. The School of Arts has a library of 2,293 vols., with reading-room and mineral and curio collection. Among the local societies are a Turf Club, Lodges of Freemasons, Oddfellows, Good Templars, Rechabite Lodge and Foresters' Lodge, Rifle Club, and a rifle butt for practice, a fire brigade engine house in Charlotte Street. The Queen's park is well situated near Fynch's Bay, and is planted with numerous tropical plants. The cemetery and also the race course are situated at the Two Mile, the latter being alongside the railway line. The Chinese quarter called China Town, is in Adelaide Street, running parallel with Charlotte Street. The most prominent building here is the Joss House. The Chinese population has greatly decreased within the last few years. The water supply is rather defective. It has been proposed to get it by pumping and gravitation from the Isabella creek, a tributary of the Endeavour, about 19 miles WNW. from Cooktown. Cooktown is the port of, and owes its rise to, the

Palmer River diggings. A railway to the Palmer gold field is now open to Laura Station, 67 miles from Cooktown. Coal has been discovered in the district on Fairleigh Station, Little River, and Mr. Jack, the geologist, reports hopefully of it. The coal burns well, but the proportion of ash is high. Coal has also been discovered at Indian Head, just across the river beyond the North Shore. A coach leaves the Laura Station for Maytown weekly. Much land is being taken for sugar and tobacco growing, and both are found to grow well. The McIvor and Morgan lands are highly spoken of. Since the Annan bridge was opened, the whole of the land between the Annan and Bloomfield rivers has been withdrawn from selection and proclaimed a mining district. Two bridges now cross the Annan and Endeavour. The Endeavour Bridge is a low-level one, 364 feet long, in nine spans of 40 feet. The Annan River Bridge is 1,100 feet in length, being 22 spans of 50 feet. Both the two last named bridges have been lowered for their better protection against floods. There are several schooners trading between Cooktown and New Guinea. Rice has been grown with success in the vicinity, and the cocoanut palm has been found to thrive. There is plenty of suitable land to be found for the growth of the sugar-cane on the coast both north and south of Cooktown. Tobacco growing has been tried with success, and is likely to become a great industry. Coffee is also found to grow well, and several acres of it have been planted. Much attention is being given to fruit-growing, especially the mango, smooth-leaf pineapple and cocoanuts. All of these thrive abundantly, both trees and fruit being larger than grown elsewhere. The Cook District Pastoral and Agricultural Society have a fine piece of land near Boundary Street for show purposes. Cooktown is the centre of a very extensive *bêche-de-mer* and pearl fishery, extending from Cape Grafton to the islands of New Guinea. The Daintree Divisional Board holds its meetings in the Board office next the School of Arts. The tin-fields within a few miles of Cooktown are Rossville or Upper Annan, on a branch of the Annan river, almost due south from Cooktown, distant 25 miles. Good tin also is found on the plateaux or table-lands, chief of which is O'Keefe's, where there are lodes. Mount Amos is distant SE. by E. 25 miles. A good deal of work has been done, and good prospects obtained from the lodes. At Mount Leswell rich lodes have been found and favourably reported on by mining experts. Mount Romeo is an important tinfield, distant about 45 miles. At Cocoa Creek, on the Endeavour river, about 40 miles distant, both alluvial and quartz gold have been found, also antimony. There are several splendid waterfalls, which, in case of irrigation, would prove very valuable. At the Starcke No. 2 goldfield the yield for 1899 was 2,644 ozs. Stream tin is found along the banks of the numerous creeks which run into the Annan and its tributaries, and tin-mining is also prosecuted on Mount Windsor, above the Normanby, where gold has also been found. Mount Hartley is distant 47 miles, and lies between Mount Amos and Mount Thomas. The lodes here are exceptionally rich, and only awaiting capital to develop them. The Bloomfield tinfield lies 10 miles inland from the southern bank of the Bloomfield river. Pencil cedar flourishes here, and is of considerable value. Population 2,200 whites, and 360 Chinese. Newspapers: *Cooktown Independent* and *Endeavour Beacon*.

COOLGARRA (17° 30′ S. lat., 145° 29′ E. long.), formerly known as RETURN CREEK, is a mining township in the Herberton district, situated 21 miles from Herberton, and 14 miles from Irvinebank. Tin, silver, copper and bismuth are found here. The township is pleasantly situated near the head of Return Creek, a tributary of the Herbert River. It has a general store, and public-house. At Glen Linedale, about 10 miles S. from Coolgarra, the Oberlin Tin Mining Company have a fine plant for the treatment of tin ores. In the early part of 1900 the Warden described the locality as being in a most prosperous state. There are hot springs in the neighbourhood, about 2¾ miles NW. of Woodleigh Station. Hotel and bath-house have been built here. The locality is likely to become a favourite resort. Formation: "a series of altered vertical greywackes, quartzites and shales." Population, 93.

COOMERA (27° 51′ S. lat., 153° 20′ E. long.), a small township, with post office, telephone and railway station (on the River Coomera and the Beenleigh and Southport railway), in the county of Ward, electorate of Albert, police district of Coomera 38 miles SE. from Brisbane. Has Church of England and Wesleyan chapel, two State schools (Nos. 124 and 283), Divisional Board's office, police-station, and two hotels, Ferry and Railway. Products of the district are sugar, maize potatoes, and timber. There are here a sugar-mill and a saw-mill. Population, 188 (census 1891).

COPPERFIELD (22° 49′ S. lat., 147° 43′ E. long.), a post town, in the county of Clermont, about 580 miles NW. of Brisbane, 4 miles from Clermont SW., and about 232 miles inland W. of Rockhampton, its port, situate on Douglas Creek. A provisional school (No. 26), and a general store, one hotel, with butcher's shop, are here. Wesleyan and Salvation Army ministers visit. A buggy with mails plies to and from the Clermont railway station. Close to the township are the remains of the largest smelting works in the colony. At one time thirteen shafts were being worked and twenty-five furnaces were in full blast on one property; now everything is silent and desolate. A municipality was proclaimed on May 10, 1872, but the corporation is now defunct, and the town is included in the Belyando Divisional Board. In the past the town has been principally supported by copper mining, but a considerable quantity of gold has been obtained, and agriculture is steadily increasing. The reefs here are well spoken of by all experts who have examined them, but capitalists have not been induced to open them up to any depth, and the surface stone has all been taken out in most places. Copper is getting a better trial than ever before. About £2,000 worth was got in 1899. Gold is also being obtained—both alluvial and quartz. Population is now 156, the township having continued to decay by the closing of the Peak Downs copper mine, which has been a great detriment to the locality, but there is some prospect of the copper-mining industry being revived at no distant date. Formation, principally grey slate.

CRAIGLEE, county Nares, a small township, about 4 miles distant from Port Douglas, situated at the foot of the range. It is a camping place for teams travelling between Herberton and Port Douglas. It has one hotel (Mowbray), and primary school. Population (census 1891) 77.

CROW'S NEST (27° 17′ S. lat., 152° 4′ E. long.), a post town, with money-order, telegraph office, savings' bank, and railway station, 135 miles NW. (75 miles in a direct line) from Brisbane in county of Cavendish and electorate of Aubigny, police district of Crow's Nest, situated on the head of Cressbrook Creek. In 1884 this locality attracted some notice from gold being found in the vicinity. The goldfield is situated about 13 miles from Crow's Nest township and 18 miles from Murphy's Creek on the Cressbrook Creek watershed. Some 20 years ago gold was discovered here, and small finds have from time to time been made, but not of a paying character. Gold has been discovered in various places in the district, but not as yet in any great quantity. Tin has also been found, but sufficient trial has not yet been given to ascertain if it would pay to work. The country around bears considerable resemblance to the Stanthorpe district. In the district are thousands of acres of the finest pine forests in Queensland, and large areas have been taken up for agricultural and grazing purposes. State school here (No. 293), Anglican, Roman Catholic and Methodist churches; the latter is visited from Roma. Salvation Army place of worship. Hotel: Royal; court-house, police barracks; three stores, blacksmith's and carpenter's shop. The societies are a Progress Association and Debating Society. Maize, potatoes, and lucerne principally are cultivated in the neighbourhood. Large waterfalls and numerous varieties of ferns are to be found. Settlement is reported to be increasing in the district, new land being taken up every year. Population, 155 (census 1891); with district now estimated at about 400.

CROYDON (18° 12′ 13″ S. lat., 142° 14′ 55″ E. long.), a gold-mining field and township, 94 miles due E. of Normanton, 103 miles from Georgetown, and 25 miles due S. from Creen Creek telegraph station, in the police district and county of Burke, and electorate of Croydon. It has a post-office, money-order, savings bank, and telegraph office, and is a municipality (incorporated April 9, 1892). Area 1⅝ square mile, 16 miles of roads, 780 dwellings; value of ratable property, £94,574. The route to it is *viâ* Normanton, thence by rail. Coaches run to Herberton and Georgetown. Abundance of excellent water can be obtained at a moderate depth on any part of the field. Several dams are built at various machine sites, but a number of batteries now obtain a sufficient supply to enable crushing to be continued throughout the year. There are twenty hotels, the principal being the Palace, The Club, Criterion, Queen's, Commercial, and Imperial; several stores, also a court-house, gaol, hospital, and police barracks. Banks: Queensland National, New South Wales, and Royal. Churches: Episcopal, Roman Catholic, Wesleyan, and Salvation Army. State school and two private schools. This gold-field is on what was known as Croydon Downs cattle station, the owner of the station being Mr. W. C. Brown, who, with Messrs. Aldridge Bros., originally prospected the locality, and found gold in October, 1885. Soon afterwards a rush set in, and in a short time about 1,500 people were on the field, and at the end of 1887 it is estimated there was a population of about 6,000. The first reefs discovered were the True Blue, Iguana and Lady Mary, and the first claim laid off was the Lady Mary Reward claim. The gold obtained at or near the surface was very rich; the average yield of gold per ton during the first year of the field was 4 ozs. 12 dwts. 8 grs. At the present time the number of distinct quartz reefs is over 200, and the extent of auriferous ground worked, about 600 miles. In the early part of 1900 the population of the field was 3,892. Some of the shafts are now down a considerable distance, and the stone is reported to be improving as a lower depth is reached. Gold shows freely, and some of the stone has assayed a large percentage. Mining operations are located in an undulating flat, running out from the broken ridgy country, between ridges and hillocks into the plain or low-level forest country, which stretches away towards the shores of the Gulf. This flat has alternate layers of clay and heavy sand on its surface, and bands of granite, sandstone, conglomerate, and auriferous quartz traverse it in all directions. One remarkable blow of quartz on this flat is the Iguana Hill. The yield of gold for 1899 amounted to 45,182 oz. 18 dwt. 19 grs. from mill treatment and 17,668 oz. 14 dwt. 8 grs. from tailings treated by cyanidation. The average yield from mines being 1 oz. 7 dwts. 21¼ grs., the gross value of gold won during the year being £134,697 1s. 1½d. (£18,256 16s. 6d. representing bullion). Since the field was opened the output has amounted to 822,255 oz. of gold. At present there are 239 stamps, four Huntington mills, and five cyanide plants at work. The number of European quartz miners increased from 573 in 1898 to 692 in 1899. During the year about £10,000 worth of machinery was taken to Croydon from the Etheridge. The gold was worth 3s. 6d. per oz. more in 1899 than it was in 1898—

namely £2 11s. 6½d. per oz. The town itself is situated on the southern boundary of the goldfield, the principal lines of reef in the immediate vicinity being the Iguana, Mark Twain, Golden Gate, Lady Isabelle, Highland Mary, True Blue, Glengarry, and Mountain Maid, all of which have given rich returns. There are several mining camps in the vicinity; Table Top is 4 miles NE. of the Upper Twelve Mile: Golden Valley, about 4 miles N. Mark Twain is 6 miles from Croydon. Golden Gate is 6 miles distant N.W. along the Normanton road. This locality has the largest output of any line of reef on the field. A large township of over 600 residents has sprung up at Golden Gate, and there are several hotels and stores. At the Jubilee or Twelve Mile there are large reefs. At Esmeralda station, about 70 miles distant south, the reefs are large, but so far are reported not to have been remunerative. Newspaper: *Mining News.*

CUMBERLAND (18° 23′ S. lat., 143° 28′ E. long.), a post town, with telegraph office and savings bank, in the co. of Gilbert, electorate of Burke, about 18 miles S. of W. of Georgetown, situated on Cumberland Creek, six miles from its junction with the Gilbert River. Hotels: the Etheridge, Welcome Inn; police barracks, post and telegraph office, 2 stores, butcher's, and baker's shops, but no buildings of any very great note. It has a provisional school. Coach passes weekly from Georgetown to Croydon; fare to Croydon £2; to Georgetown 12s. The water supply is derived from a dam erected by the mining companies. Within a few hundred yards of the town is situated the famous Cumberland mine; operations were suspended in 1899 and mill closed. A considerable proportion of the inhabitants left for Green Hills, distant about 18 miles from Cumberland, and within 4 of the Gilbert River. There are other mines in and near the town. The country around is well adapted for cattle and horses. The class of stock is equal to any in the outside districts of the colony. Though virtually a mining town, a little farming is done in the neighbourhood, which well repays the trouble devoted to it. Maize grows remarkably well, and yields from 40 to 80 bushels to the acre. Potatoes, both English and sweet, do well. Tropical fruits of all descriptions flourish when a little care is bestowed on them. Along the banks of the Gilbert River there is magnificent soil, and in the bed of it there is a never-failing supply of underground running fresh water. Though very hot for five or six months in the year, the climate is very healthy. The wet season generally commences in December and lasts up to March. The average rainfall is about 31 inches. Formation: granite and quartz. Population, 118 (census 1891), now reduced.

CUNNAMULLA (28° 04′ 14″ S. lat., 145° 40′ 53″ E. long.), a post town with money-order office, telegraph station, railway station, and savings bank, in the county of Wellington, electorate of Balonne, on the eastern bank of the Warrego River, and most centrally situated, being almost equally distant from St. George in the east, Bourke in the south, Thargomindah in the west, and Charleville in the north, about 560 miles W. from Brisbane, with which it has been connected by rail. Coaches leave regularly for Barringun, Eulo, Thargomindah, St. George, and Widgeegoara. The streets of Cunnamulla are well formed, and the hotels and stores are above the average to be found in back country townships. Hotels: Railway, Post Office, Commercial, Royal Exchange, Tattersall's and Gladstone Club. The public buildings comprise post and telegraph office, a court-house, lock-up police station, reading room, divisional board room, Anglican and Roman Catholic churches. The Divisional Board Hall is used as a place of worship by the Methodists and Salvation Army. There are five principal stores, a Chinese store, several tradesmen's premises, aërated water factories, saw mill, and branches of the Queensland National and Commercial Banks. State school (No. 289). Local clubs: South Warrego Jockey Club and Cricket Club, Reading Room (1,200 vols.), and Tennis Club. The hospital, with accommodation for 14 patients, is a fine building. It is constructed on the cottage or bungalow principle. It stands in a reserve containing 40 acres, about a mile from the business portion of the town. Two Customs (Inland) Office and bonded stores have been established here. There are 4 gardens kept by Chinamen, and there are 3 dairies about 3 miles out. The town is in telegraphic communication with the metropolis, and is now connected with Brisbane and Charleville by rail, through communication being effected on October 10, 1898. From its favourable position Cunnamulla is expected to become a great depôt for delivery of stock going to southern markets. Boring here has resulted in a plentiful supply of artesian water, estimated at 22,500 gallons per hour, being struck at a depth of 1,402 feet. All over the district artesian supplies have been struck, mostly the bores yielding immense supplies. The surrounding stations have been much improved for sheep. A very large area has been selected as grazing farms and agricultural farms. The Paroo Divisional Board meets at Cunnamulla. The sittings of the Southern District Court are held here twice a year. Opal mines have been found in the district, about 90 miles W. and N. from here. Formation, principally volcanic. Population (1,000 estimated), of district (census 1891), 2,114. Lodges: Masonic, Oddfellows, M.U.I.O.O.F. and Foresters. Newspapers: *Warrego Watchman.*

DALBY (27° 32′ S. lat., 151° 15′ E. long.), co. Aubigny, on Myall creek, electorate and police district of Dalby, 1,123 feet above the sea level, is a municipal township (proclaimed August 21, 1863), with money-order office, savings bank, and telegraph station, and station on the Western Railway, about 140 miles by road W. of Brisbane (153 miles by rail), and 129 miles distant from Ipswich. It is the central depôt for a large tract of country. The Royal, Queen's Arms, Imperial, and Post Office are the leading hotels. Within the bounds of the municipality (2½ square miles) are 23 miles of streets and roads, and 220 dwellings. Ratable value of property is £29,122. There are in the town a school of arts, with a library of about 1,000 books; branches of the Commercial and Queensland National Banks; three churches—Episcopal, Roman Catholic (St. Joseph), and Presbyterian—Salvation Army barracks, one primary school (No. 238). A Roman Catholic school is conducted at the Convent, by the Sisters of Mercy. Near the railway station is a neat and useful hospital; the post and telegraph offices are in the main street. The district is mainly a sheep-grazing one, but large areas are now being placed under wheat. Lucerne, maize, and potatoes are also grown. The Bunya mountains are a point of interest to tourists. Dalby is gaining some reputation as a resort for persons suffering from phthisis, the atmosphere being uniformly dry, the heat of summer rarely oppressive, and the nights always cool. The Queensland Government has erected a consumptive sanatorium about three miles out from Dalby, the first State institution of the kind in Australia. Its cost was over £10,000. Race meetings are held twice a year by the Northern Downs Jockey Club on a fine course just outside the town. Societies: Oddfellows' Lodge, Cricket, Amateur Dramatic Clubs, Masonic Lodge (S.C), Gymnasium and Orchestral Society and Progress Association. The Southern District Court meets three times in the year, and a Land Court is held monthly. A large area has been taken up by selectors, particularly at Cattle Creek, Irvingdale, Maida Hill, St. Ruth, Jimbour and Cecil plains. The farmers combine sheep and cattle breeding with agriculture. Hares and plain turkeys are plentiful on the Jimbour and other stations. The water supply is derived from wells and dam. Population of district, 1,378 (census 1891) (now about 1,550). The *Dalby Herald* and the *Dalby Record* are the local papers. One member is returned to the Legislative Assembly. An artesian bore is now being put down.

DALRYMPLE (19° 55′ S. lat., 146° 5′ E. long.) is in the Charters Towers police district, on the Burdekin River, 75 miles SW. from Townsville, 25 NW. from Charters Towers, and 830 miles NW. from Brisbane. There are two private residences, and an accommodation house. The Great Northern Hotel is 5 miles distant. The water supply is derived from Fletcher Creek. The district is entirely of a pastoral character. Dalrymple is named after Mr. G. E. Dalrymple. The northern traffic that formerly passed through here now goes by a new road from Townsville to Gilberton, Georgetown, &c. A short distance from here is the wonderful basaltic wall, covering nearly 70 miles. It is of volcanic formation, and is one of the greatest natural curiosities on the Australian continent. It is said to be inaccessible to horsemen, and is a great stronghold of the aborigines. Formation: primary, granitic, basaltic. Population, 25 (census 1886).

DARRA (27° 35′ S. lat., 152° 55′ E. long.). This is a stopping-place on the Southern and Western Railway Line, 10 miles from Brisbane. The country here is heavily timbered, and there is but little settlement at present.

DRAYTON (27° 33′ S. lat., 151° 59′ E. long.), a township, with post and savings bank office, in the county of Aubigny, electorate of Drayton and Toowoomba, on Drayton Creek, a tributary of the Condamine, about 4 miles S. from Toowoomba, of which it may now almost be considered a suburb, and 100 miles W. of Brisbane. Hotels: Downs and Criterion, a State school (No. 31), four places of worship—Episcopal (St. Matthew), a stone building, Roman Catholic, Presbyterian, and Wesleyan—a court-house, and town hall. A shire council has been formed, and the meetings are held at Drayton, area 31 square miles, 70 miles of roads, 180 dwellings. Population, now about 1,000. Value of ratable property, £103,128. It is an agricultural district, studded with farms and homesteads. In the vicinity are Eton Vale, Harrow, and Westbrook station properties. Formation: basalt. The soil is rich red and black, and very fertile, and the cereals and English fruits are largely grown.

DUGANDAN (county Churchill), a post town and telegraph station, and terminus of the Fassifern Railway, 60 miles from Brisbane. A State school (No. 333), some tradesmen's premises, and two hotels, Australian and Dugandan, are here. Farming and grazing district. Population, 144 (census 1891).

DULVADILLA (or DULBYDILLA) (23° 40′ S. lat., 148° 46′ E. long.) formerly the terminus of the Western Railway, 411 miles W. of Brisbane; the line is now open to Cunnamulla. It lies 1,443 feet above sea-level, and is 39 miles from Mitchell.

DUNGENESS (now called LUCINDA) (18° 33′ S. lat., 146° 19′ E. long.) lies at the mouth of the Lower Herbert River, and the entrance to Hinchinbrook Channel, 20 miles from Ingham, 28 miles from Cardwell, and about 935 miles NW. of Brisbane, in the electorate of Cardwell, police district of Ingham. It is a port of entry and clearance, and has a pilot station, customs' office, light-keeper's residence, and one hotel (Sea View). It comprises about half a dozen houses built on the low sandy point on the southern side of the river mouth, which is here nearly ¼ of a mile wide. The site at the extreme point is by no means a secure one, as each wet season brings a heavy fresh down the river, cutting off a portion of the point. At 5 miles up its course the river water becomes fresh or only slightly brackish. There is a wharf and shed for the convenience of the Herbert River trade. A tram line from this wharf to Halifax, a distance of 8 miles, to connect on with the Colonial Sugar Company's tram road (whose western terminus is at present only half a mile from Ingham), is much needed. There is a good route for the proposed tram line from Lucinda Point and it is said it could be laid down at a comparatively small cost. The output of sugar each season shows favourably.

The imports and the passenger traffic are also increasing. The best sites available for building purposes are the allotments reserved for Government offices, and a few adjoining allotments opposite the Government wharf, also at the first elbow of the river, at a point known as the Chinaman's Hut. A good site for wharfage is also obtainable here. Steamers ply to Townsville, 70 miles S.; fare 20s. Hinchinbrook Channel, dividing Hinchinbrook Island from the mainland, has a bar at its south entrance, which is liable to shift after bad weather or heavy floods. There is considerable passenger and cargo traffic passing through the township to and from the plantations and Ingham, all passengers and cargo being transhipped here. The place is reported to have an unenviable reputation for the myriads of sand-flies and mosquitoes. Established at this township is the receiving and forwarding depôt for the Herbert River passenger and cargo traffic; and it is consequently a busy place during the sugar season, which begins July 1, and ends March 1. The limits of Dungeness Harbour have lately been altered as follows:—The area between two lines drawn respectively SE. by S. ½ S. from the eastern extreme of Hillock Point, and from the leading beacons to the south of Lucinda Point, continuing their line NE. ¾ E. to the point of intersection in about latitude 18° 30′ S. on the east, to a line with Leafe Peak and Bishop's Peak in line bearing SW. by W. ½ W. on the west, including all rivers, creeks, and navigable waters in that area. Formation, level, low lying sand and mangrove mud marshes. Population, 53 (census 1891), now less.

DURHAM, a mining locality, with a receiving office, in the electorate of Burke, on the Durham Creek. Water supply is derived from a Government well and the battery dam. It is about 6 miles W. from Georgetown, with one hotel—Bush Inn, and provisional school. At Mount Turner, between here and Cumberland, a rich silver ore lode has been found. The Warden a year or so ago reported "the whole of the country is teeming with gold, silver, copper, and innumerable indications of other ores." The Durham Company's mine is the principal claim. The mine was closed during the year, and the township was reported to be "rapidly assuming the aspect of decay peculiar to deserted mining camps, where a partial clearing in the bush strewn with countless empty bottles is the sole memento of former glory." Population, about 30.

DYKEHEAD, a new reefing locality in the Burnett district, situated about forty miles S. of Eidsvold, and sixty-five miles W. of Gayndah. There are several reefs now in course of being prospected and worked, and a promising future is predicted for this gold-field, the area over which the reefs extend being estimated at eight or nine miles. A visitor reported that the reefs are large, but the ore would be, he thought, of a low grade.

EIDSVOLD (25° 24′ S. lat., 151° 5′ E. long.) a mining township, proclaimed July 25, 1887, situated between the Burnett River and Boundary Creek, 2½ miles from the former, about 37 miles in a direct line WSW. of Mount Perry, the nearest railway station to which a coach runs daily, fare 20s., and about the same distance a little N. of W. of Gayndah; distance by road about 60 miles. It is in the county of Rawbelle, electorate of Burnett, Eidsvold police district. The discovery of the Mount Rose reef by Mr. Achilles, while prospecting in this district in December, 1886, led to the opening up of this field. The formation, according to the Assistant Government Geologist, consists of granite; he judged from the work already done that the prospects of Eidsvold as a reefing district were good. The sinking through hard blue granite is slow, laborious and expensive. The deeper stone is much richer in gold. During 1899 the yield was 4,253 ozs. of gold from quartz and 3,604¼ ozs. from cyaniding. Generally the operations during the year were said to be disheartening. Works for the systematic treatment of tailings have now been erected. The most prolific mines are the Minerva, the Lady Augusta, Craven Extended, S.W. Lady Minerva, No. 1 East Perseverance, and the Mount Rose. Churches: Episcopal, Roman Catholic, Primitive Methodist and Salvation Army barracks. Public buildings: Post, money-order and savings bank office and telegraph station, court-house, police barracks, State school and two private schools. Hotels: Grand, Garry's, Star, Tattersall's and Post Office. Large public hall called the Variety Hall. The principal thoroughfare is Morton Street. Pastoral and mining district. Population, 1,258 (census 1891), but now about 1,015.

EMERALD (23° 28′ S. lat., 148° 5′ E. long.), a post town and railway station, with savings bank, money-order office, and telegraph station, in the police district of Emerald, Leichhardt electorate, on the Central line, situated on the west bank of the Nogoa river, 165 miles W. of Rockhampton. It was the terminus of the line, but the railway is now opened to Longreach. A line from here to Springsure (42 miles) is completed and open. The branching-off point is about a mile from the post office, on the east side of the Nogoa River. The branch line to Clermont (60 miles) is also opened. The township has now settled into a permanent country town. There is a branch of the Commercial Bank of Sydney. There are four general stores besides three or four small Chinese fruit shops, &c., four hotels, Bryden's, Leichhardt, and Commercial and Railway, four butchers' shops, four dressmakers, two shoemakers, two saddler's shops, one chemist and newsagent, two private boarding-houses, two carpenters and contractors, two drapery stores, one tailor, two stock and station agents, and two cordial factories. State school (No. 354), Church of England (St. Luke's), Presbyterian church, Roman Catholic church (St. Patrick's), and Primitive Methodist chapel. Court-house, post and telegraph offices, police barracks, and railway workshops. The institutions include School of Arts, tennis club, brass band, football and cricket clubs, Progress Association, and Court Leichardt A.O.F. Newspaper: *Emerald Star*. The climate is dry and salubrious. The water supply is derived from a pumping station on the Nogoa. There is a good racecourse about 3 miles from town, where race meetings are held periodically. There is also a fine sports ground, neatly fenced, and being planted with shade trees. Pastoral district, but a successful start has been made to grow oranges, grapes, lemons, and other fruit; as the soil is very fertile (a sandy loam), this industry has proved very successful, the fruit finding a ready market in the far west. Wheat growing on a large scale has been commenced 12 miles south of Emerald. A Government experimental farm is established about 12 miles south of Emerald, where many varieties of wheat are being tried. Wheat growing in the district has been very successful. Population, 406 (census 1891); now about 800.

EMU PARK (or HEWITTVILLE) (23° 15′ S. lat., 150° 51′ E. long.), in the county of Livingstone, electorate of Rockhampton North, police district of Rockhampton, about 29 miles E. from Rockhampton, is the watering place for Rockhampton, with which it is now in railway connection, and the central district and has many natural advantages. Hotels: Emu Park, Grand, and Railway. It has a State school, Church of England, police station, a telegraph station and post office, two stores, bakery, butchery, aerated water factory, skating rink, and several villa residences and cottages, and is a favourite place of resort. There are pleasure boats, several gardens and an excellent race course, plenty of fishing and shooting to be had. Emu Park is prettily situated near the north end of Keppel Bay, and opposite Keppel Islands. Pastoral district. Population 228 (census 1891).

EROMANGA, known locally as "Opalopolis," is described as "pleasantly situated on light red-soil open country on the north bank of Eurongella Creek, South Gregory district, about a quarter of a mile east from the Eurongella homestead. Indeed, by the older residents, the town is best known by the name of Eurongella. The road from Thargomindah *viâ* Kyabra, to Windorah passes through the town, and it is one of the main stock routes of the colony. Generally as far as Mount Margaret it traverses rather poor country, abounding in flats and mulga ridges, fit for cattle-grazing only; but from the mount it passes through rather pretty, open, well-grassed country, the soil of which is evidently excellent, and this part is well suited for carrying sheep. Within a distance of, say, fifty miles in a direct line from Eromanga there are in the west and north-west five opal properties, each averaging about 12 acres," at times giving employment to several men, but worked intermittently according to water-supply. The principal mines are the Little Wonder and the Lucknow; the former is about 35 miles W. from Eromanga. The township contains two public-houses, a store and blacksmith's shop, all built of brick, and it is a postal receiving office, and has a police-station.

ESK (27° 15′ S. lat., 152° 26′ E. long.), electorate of Stanley, a post town, with telegraph, savings bank, and money-order office, and railway station on Sandy or Esk Creek, 43 miles from Ipswich, and 67 miles from Brisbane. The line to Esk was opened in 1886. State school (No. 140); School of art, with library of 525 vols. Church of England, Primitive Methodist, Presbyterian, and Roman Catholic places of worship, police station and post-office, branch of Q.N. Bank, three hotels (Royal, Commercial and Central), saw-mills, several tradesmen's shops, a large store and cattle sale yards, capable of accommodating 6,000 head of cattle. There is a branch of the Masonic body (Scottish Constitution.) Mount Esk, a high mountain of quartz, felspar and granite, lies E. of the township, between it and the Brisbane River. District grazing principally. Formation: low undulating sandstone ridges. Population, 407 (census 1891); now about 500.

ESMERALDA. A mining locality situated about 80 miles SE. from Croydon. There are here several reefs — Huon, Esmeralda, True Blue, and Good Iron—but so far as tried are reported to have not proved remunerative, but under cyanide treatment, works for which are in progress, better results were anticipated.

ETHERIDGE. *See* GEORGETOWN.

ETON (27° 45′ S. lat., 151° 57′ E. long.), a small town, 23 miles from Mackay. It is connected with Mackay by rail (line opened in Aug., 1885); the line was brought right into the town, and opened in March, 1886. It has post, savings bank, money-order, and telegraph office, police quarters, lock-up, a State school (No. 96), and a railway station. Hotels: Railway and Northern. A central sugar mill, subsidized by the Government, is here, as well as a large meat preserving and extract works, and a dairy factory. In 1896 a small alluvial rush took place to a locality on Blackwater Hole Creek, about 12 miles W. of Eton, and some of the miners were reported to be doing well. Population, 28 (census 1886).

EUNGELLA, a mining locality in the Bowen district, county of Carlyle, situated on the south bank of the Broken River, 8 miles from its head, and about 7 miles southerly from "B." Creek, about 57 miles in a direct line West of Mackay, but farther by any known route, which at present is through scrubs and rugged mountainous country. A good track has been cut through the scrub. It is reached by horse from the Mirani railway station (34 miles), by a passable road to the foot of the coast range, on the inland side of which Eungulla is situated. It has one hotel, a butcher's shop, a post-office, and a provisional school. The road from here is described as a bad one, over an ascent of 2,500 feet above sea-level. The reef is cavernous, ferruginous quartz, changing to mundic stone at a depth of 28 feet. District principally a grazing one. Population, about 60.

FIG TREE POCKET. This settlement lies 9 miles from Brisbane, and is so called from a gigantic fig-tree, which once stood on the point called Fig Tree Point. Sugar, maize, and the pine do well here. A Roman Catholic church and Primitive Methodist and State school (No. 36) are the public buildings. The nearest railway station is Indooroopilly, on the same side of the river; unless the river be crossed, when the Sherwood station may be reached in about a mile.

FOREST GROVE (or ARRILALAH), a post town, in the county of Portland, electorate of Mitchell, police district of Arrilalah, on the Thompson River, about 850 miles from Brisbane, and 30 miles from Longreach, the present terminus of the Central Railway. Coach runs to Longreach, fare 15s., and Stonehenge and back weekly. It has two hotels, Club and Royal, a provisional school, 3 stores, blacksmith's, baker, butcher, and saddlers' shops, and police barracks and court-house combined. Grazing district. It is on the main route south for all stock going to southern markets. Population (census 1891) 135.

FORTITUDE VALLEY (27° 28′ S. lat., 153° 4′ E. long.) (generally known as "The Valley") formerly a marshy, low-lying flat, much of which has now been filled up, situated one mile NNE. of the General Post-office, is the largest and most important suburb of Brisbane, to which it is connected by a continuous row of shops. It takes its name from the circumstance that a number of immigrants from the *Fortitude*, one of the first of the immigrant ships sent out by Dr. Lang, settled here (January 21, 1849). It returns two members to the Legislative Assembly, and two members to the Municipal Council. Places of worship: Church of England (Trinity), St. Michael and All Angels (New Farm), Roman Catholic church (St. Patrick's), and Presbyterian church. There are also four chapels belonging to various denominations; the largest of which is the Wesleyan chapel; schools in connection with the Board of Education (boys' No. 37, and girls' No. 239); Roman Catholic boys', girls', and infants' schools; an Oddfellows' hall, used for public meetings, to which is attached a free reading-room and library of 1,748 volumes; a Foresters' hall, one of the largest places of assembly in the suburbs; a second Oddfellows' hall, in Wickham Street; branches of the Queensland National Bank, Commercial Bank of Sydney, and N. S. Wales Banks (the latter a new building); and post, money-order, telegraph, and savings bank office. The building of the Queensland National Bank is a very striking edifice, the front being terra-cotta work in the Italian style. The residence of the Roman Catholic Archbishop, Dr. Dunne, is situated here, a new and handsome building, also a convent of the Sisters of Mercy, in connection with which is an industrial school (St. Ann's), a new and imposing building, in which are taught lace-making, needlework, etc. The Convent School is the largest and most commodious ladies' boarding school in Brisbane, and is a prominent edifice from its elevation and size; it also commands the finest view of the city and environs; there is also a convent and large school under the control of the Christian Brothers, situated on Gregory Terrace, with a branch school for poorer scholars in Boundary Street. A public swimming bath has been erected in Wickham Street; it is supplied with salt water. On Bowen Terrace and on the elevated points on the banks of the river are numerous villa residences. From here fine views around Brisbane may be obtained. On the outskirts of the Valley are many residences of wealthy citizens, merchants, and others. The hospital, and children's hospital, are also here situated; opposite the former are the Acclimatization Society's garden. The grounds of the National Association adjoin those of the Acclimatization Society. The building known as the Exhibition was destroyed by fire in June, 1888. This has been replaced by a large and handsome brick building with spacious concert hall attached, which has one of the finest organs in the colonies. It is now used as a museum and art gallery. The grounds are well provided with stalls and sheds for stock of all kinds, and in the centre is a large ring used for the show of cattle, and also for cricket, football, and other sports. The Rugby Football Association have grounds on the Bowen Bridge Road, where the principal football matches are played. There has been erected on the Brisbane River at the old racecourse, New Farm, a sugar refinery fitted with the latest and most improved machinery. Various factories, including two tobacco and several boot, are now carried on in the Valley. The main northern road runs through the Valley. About three miles distant from the post-office is the race-course, connected by rail with Brisbane. The race-course is reputed to be one of the prettiest in Australia, the grand stand, training ground, and horse accommodation being very complete. The line to Sandgate and the Main North Coast Line to Gympie, Maryborough, and Bundaberg passes through the valley, with a station at Brunswick Street where provision is made for goods traffic, not only from the shipping but from all the Northern ports; it has the largest and most complete goods depot in Brisbane. Branches have also been extended to Bulimba and Pinkinba, where wharves are erected, to enable the large ocean steamers to receive and discharge their cargoes. The bulk of the inhabitants belong to the working class, nearly all of whom reside on their own freeholds. Considerable improvement have been made in the drainage of the Valley. On the river bank within the boundaries the Valley are the works of the Brisbane Gas Company, also of several wharves. Some four miles further down the river are the Queensland Meat Export Works erected in 1892, which are now in full work and can dispose of more than 100 head of bullocks per day. Steamers for England berth alongside and take in the frozen meat, a trade that is being largely developed. Population, included in that of Brisbane, is 15,955.

GATTON (27° 40′ S. lat., 152° 17′ E. long.), counties of Churchill and Cavendish, electorate of Lockyer, a post town, with telegraph station, money-order and savings bank office on Lockyer's Creek, and the S. and W. Railway, 61 miles W. of Brisbane, 337 feet above sea level. Hotels: the Royal, the Wilmot, and the Brian Boru. State school (No. 41). Places of worship: Episcopalian, Roman Catholic, Congregationalist, and Presbyterian; the Congregationalists and Roman Catholics have resident ministers. Bank: Royal. The Government buildings comprise the railway station, courthouse, and State school, and there is a school of arts, with 914 vols., Gatton has four general stores, two blacksmiths, two butchers, and two saddlers, and the usual accompaniments of a country township, with a racecourse and recreation ground. The Government Agricultural College is in the vicinity. This institution was opened in July, 1897, Professor Shelton being the first Principal. Twelve months afterwards, on the resignation of Professor Shelton, Mr. John Mahon took charge. The College buildings are situated about four miles from the township of Gatton, and stand almost in the centre of the College land, of which there is in all 1,692 acres, nearly 300 acres being under cultivation; the balance is at present used for grazing purposes. The college has accommodation for about 56 students, the number at present enrolled being 45. The farm, dairy and other departments are well equipped with modern and up-to-date appliances, the uses of which are taught to the students. In addition to the crops usually grown in Southern Queensland, attention is paid to the introduction of new fodder plants, varieties of wheat, and other crops not generally grown by farmers, and the result of such experiments made known to those interested. The fees for students are £25 per annum. Galton is surrounded by an extensive pastoral and farming district, from which large quantities of agricultural produce—potatoes, maize, lucerne, and vegetables—are obtained. Orangeries and vineyards are also in full yielding. The country is open forest plain with black soil on sandstone rock. Formation: carboniferous. The Tarampa Divisional Board has its office and holds its meetings at Gatton; the Marsupial Board for the district also meets here. Population, 241 (census 1891).

GAYNDAH (25° 38′ S. lat., 151° 37′ E. long.), county of Mackenzie, electorate of Burnett, a small municipal township (proclaimed November 28, 1866), with post, telegraph, savings bank, and money-order office, 80 miles W. of Maryborough, and about 200 miles NW. of Brisbane. The railway (Maryborough and Gayndah) is now open to Woowoonga, 30 miles distant. It starts from Mungarr, on the Maryborough-Gympie Railway. Coaches run to Shamrock, fare 15s.; Mount Perry, 20s; Eidsvold, 20s.; and Degilbo (35 miles). It is the capital of the Burnett district, and is prettily situated on the south bank of the Burnett River, and surrounded by hills. "To the traveller approaching from the east the first view of the town is attractive; from the last of many hills the main street may be seen stretching away for nearly two miles along the windings of the great river; most of the houses have kept the line of march along the western road, but few having ventured up the steep slope of One Tree Hill which dominates the town on the left." It has a school of art, with library of about 1,806 vols., hospital, a school (No. 42), a courthouse, town-hall, and police-quarters. Hotels—Club, North Star, and Queensland, a new two storey building. An Episcopal church (St. Matthew's) is the principal place of worship. There is also a Roman Catholic chapel (St. Joseph's). The Gayndah and Burnett District Hospital is a fine building, prettily situated at the entrance of the town from McKenzie's Bridge, capable of accommodating 30 patients. Within the limits of the municipality (31 square miles) are 20 miles of streets and 181 dwellings; ratable value of property £34,403. All kinds of cereals and vegetables grow moderately, and the Land Commissioner considers that the soil about Gayndah is exceptionally good for farming, fruit—grape, orange, fig, and peach—growing, and for vegetables. Wheat is being cultivated largely, and grows well; the soil and climate are reported as admirably suiting the orange tribe. The district is also well suited for pastoral purposes. Most of the land within 15 miles of the town is reported to be of the finest description, with plenty of water available for irrigation, requiring only capital and energy to ensure the prosperity of town and district. In June, 1886, gold was discovered about 30 miles NE. from Gayndah, at a place called Mount Shamrock, by F. G. Simpson, John Roberts, and John Woodyatt. The locale is at the junction of the Chowey and Didcot Creeks, about 3 miles SW. of Degilbo head station. Chlorination works have been erected here, the plant is extensive and complete. Silver has also been found in this neighbourhood, but most of the claims taken up for silver have been abandoned on account principally of the difficulty of treating the ores, and the low price of silver. A new mining company has been floated to work the British Empire claim, about fifteen miles from Gayndah. At Dykehead, some 65 miles W., some promising reefs have been discovered, and are now being prospected. Valuable slate beds have been found at Mount Debateable. At Eidsvold, about 50 miles W. of Gayndah, gold reefs have been found, which promise well. At Paradise, 30 miles E. from Gayndah, are promising reefs. The Rawbelle Divisional Board and the Marsupial Board meet here. In the neighbourhood are the following stations:—Wetheron, Yenda, Ideraway, Mount Debateable, Mundubbera, Coonambulo, Cooranga, and Ban Ban. Population, 513 (census 1891); now about 500.

GEORGETOWN (18° 22′ S. lat., 143° 32′ E. long.), a post town, savings bank, money-order and telegraph station (county of Gilbert, electorate of Burke), on the west bank of the Etheridge river, a tributary of the Einasleigh, about 1,100 miles

NW. of Brisbane, 360 from Townsville NW., 225 from Normanton E., 238 (postal) from Cardwell, and 102 miles from Croydon Railway station. The south end of the township is close to the confluence of the Etheridge with the Delaney River. There are several hotels, the principal being Royal, Australian, Salutation, Welcome and Queensland; branch bank of N.S. Wales, a hospital, courthouse, Divisional Board's Office, warden's office, police barracks, post and telegraph office, three general stores, besides Chinese stores, and several tradesmen's premises. District court sittings are held here twice a year. State school (No. 178). Religious services are held occasionally by visiting clergymen from Croydon. Georgetown is the meeting-place of three mails, viz., from Townsville, Normanton, and Herberton. The Gilbert and Etheridge district comprises an area of 12,000 square miles. The principal claims are the Cumberland (17 miles distant), Durham (6 miles distant), and Golden Crown, situated at Durham township; West Spiro, and St. George, situated in Georgetown. In the district copper and tin are found; also galena largely impregnated with silver, bismuth and other minerals, and marble. In 1893 the Mineral Commissioner reported there is scarcely a square mile of country in the Etheridge district that does not contain some mineral or other. "The Rocky," a locality about 8 miles south of Georgetown, is described as the most promising centre on the field, but the Warden could not speak favourably of progress during 1898. Lane's Creek is a mining camp, about 20 miles E. of Georgetown. It has one crushing-mill, and all the usual adjuncts to a small township. The principal claims are the Brilliant, National, Cosmopolitan, Calliope and Jenolan. Castleton, formerly known as the O'Donoghue, is a mining centre, about 33 miles S. from Georgetown. The principal claim is the Big Reef, so called on account of its immense size. Owing to the destruction of the dam by the floods the mill was closed during the greater part of 1896. Charleston has 5 hotels—one to each stamper, a state school and court of petty sessions is held here. The cyanide works are being successfully worked, the tailings giving payable results. During 1899 mining matters were reported to be in a depressed state. A considerable area of country on the Gilbert and its tributaries has been taken up for pastoral occupation. The Government Geologist, reporting of this district in April, 1887, says: "The Etheridge gold-field more than any other in the colony requires the introduction of capital and a denser population. The mines being scattered over so wide an area require a battery for each, whereas if a number were at work within reasonable distance one central plant would be sufficient for all. Some of the mundic ore is found to be very difficult of treatment by ordinary appliances." The presence of sulphurets, notably of lead, interposes great difficulty in the profitable treatment of ores, some of which under the exhaustive treatment at Footscray melting works yielded at the rate of 20 oz. to the ton. Coaches run to Herberton and Port Douglas, fare 20s., Herberton to Georgetown, £5, Georgetown to Croydon, £2. Owing to its elevated situation, about 1,000 feet above sea level, Georgetown is reported to enjoy a salubrity unknown almost in the coast towns, though a mild form of fever prevails after the wet season. About 40 miles NE. from Georgetown, near the Einasleigh River, hot springs are found to exist, boiling up into geysers. In 1889 they were visited and reported on by the Government geologist. At present they are quiet springs, though in the past it is believed that at rare intervals they were active geysers. The water, which is spoken of as being indescribably nasty, has been analyzed by the Government analyst, who considers it a chlorinated sulphuretted water, and possessing similar medicinal properties to that of Harrogate, but in a lesser degree. Formation: granite. The Institutions include Etheridge Lodge, E.C. Population (census 1891), 433, now 442, of whom 77 were Chinese. Newspaper: *Mundic Miner*.

GERALDTON. *See* JOHNSTONE RIVER.

GIN GIN (25° 0′ S. lat., 152° 0′ E. long.), a post town and railway-station on the Bundaberg Line, and creek of the same name, 29 miles from Bundaberg. It has a telegraph station, a branch of the Government Savings Bank, a state school (No. 298), a court-house, lock-up, and police quarters, Presbyterian, Wesleyan and Roman Catholic places of worship, stores, mechanics' institute, with library of 500 vols., and two hotels—the Queen's and Gin Gin. There is daily rail communication with Brisbane. Among the social institutions are race and cricket clubs, quadrille assembly and Oddfellows' lodge. Agricultural and general farming and dairying district. Sugar is also grown. There is a central sugar mill which cost £50,000, and there is some gold mining. Much timber is also sent away. Population, 148 (census 1891). Much increased since.

GILBERTON (19° 15′ S. lat. and 143° 14′ E. long.), a receiving office, about midway between Cardwell, on the east coast of the colony, and Normanton, on the north west (Gulf of Carpentaria), each being about 225 miles away. (Burke electorate). It is distant from Brisbane about 870 miles NW., by steamer 110 miles from Georgetown, less as the crow flies, and 240 W. from Townsville, which is the port. It is about 130 miles from Hughenden railway station. Part of the town is situated on the south bank of the Upper Gilbert River, which is here nearly 200 yards wide. The locality is about 2,000 feet above sea-level, but the highest places are Christmas Hill, Mount Hogan, and the head of Percy River. The place comprises two European stores, a receiving post-office, one butchery, a 10-head battery, and one Chinaman's garden. Early in 1897 it was reported to have ceased to be a reefing centre. Formation: slate, granite schist, quartz mica, sandstone, felspar, and diorite. The regular mails of Pentland and Georgetown run from Lyndhurst by Mount Hogan and Gilberton weekly. There is a good road between Hughenden and Georgetown by Oak Park Station. At Mount Hogan there is an improved machine with 10 head of stamps and 8 grinding pans. Population, 70 European miners and a few Chinamen. Two stores, one butcher, two Chinese gardens, a receiving office and police station. At Upper Percy River there is a crushing mill, a public-house and store, a receiving post-office, a butcher, and two Chinese gardens. At Christmas Hill, 10 miles E. from Mount Hogan, there are three mining claims.

GIROFLA. *See* CHILLAGOE.

GLADSTONE (23° 52′ S. lat., 151° 17′ E. long.), a seaport, railway station in the county of Clinton, electorate of Port Curtis, about 328 miles NE. of Brisbane, with which it is now in railway connection, and 91 SW. of Rockhampton. A bi-weekly service is carried on by the A.U.S.N. Co. from Brisbane and Rockhampton. Hotels: Metropolitan, Blue Bell, Commercial, Young Australia, Royal, and Railway. It is one of the oldest places on the coast, having been settled in 1846, at the instance of the late Mr. W. E. Gladstone, and up to the time of Separation, had a Government Residency appointed and maintained by the Sydney authorities. It possesses a fine harbour, reputed to be the best in Queensland, spacious, deep, and well sheltered by Facing and Curtis Islands, and the Auckland creek at this point empties itself. A jetty, named by a late Governor, Sir A. Musgrave, the Victoria pier, has been erected, at which there is 26 feet of water at low springs, but vessels of large tonnage can also berth at the wharves in the creek. It was proclaimed a municipality on February 1, 1863; is governed by a mayor and five councillors, and contains 10 miles of streets, 350 dwellings, and in area of 8½ square miles. Estimated total value of ratable property, £55,656. There is a money-order office, savings bank, and a telegraph station, post office, customs house and bonded store, and court house, branches of the Joint Stock and Commercial Banks, a school of art, with reading-room and library of 2,303 volumes, a town-hall, a national school (No. 44), eight stores, two blacksmiths, a coach builder, several milliners, builders, a fruiterer, and a book and stationery establishment in connection with the *Observer*. Places of Worship: Church of England, Presbyterian, Roman Catholic church and Salvation Army. Gold in quantity is found in the neighbourhood, and manganese. At the Cania goldfield there is some mining, and dredging machines were expected to be at work during 1900. Gold has been discovered at the Boyne and Mount Jacob. Maize, potatoes, hay and fruit are grown in the district. Large numbers of cattle are shipped from time to time, and here the Gladstone Meat Company have their works. The Institutions include a free Masonic lodge, Gladstone lodge, M.U. Oddfellows, Foresters, football, cricket, tennis, and turf clubs. The bridge over the Boyne is the principal work on the railway. Total length of bridge 2,196 feet, being one of the longest in the colony. At Callide Creek, about 62 miles from Gladstone, coal has been discovered. The assistant geologist considers it a good steam coal, and estimates the total weight of available coal at 50 million tons, but its distance from a port is a great drawback. Population 416; of the census district, 2,306. Newspapers: *Gladstone Observer* and *Gladstone Advocate*.

GLASSFORD CREEK. A copper-mining locality in the Gladstone district that will probably become an important centre as the industry develops and the projected railway is constructed. In the early part of 1900 it was reported by the Warden to contain three hotels, four stores, two butchers' shops, lemonade factory, and a steam saw-mill. A branch of the Commercial Bank has since been opened. Smelting works were about to be erected. The road from the Boyne River, a distance of about 15 miles, is said to be dangerous in many places for wheel traffic.

GOLDEN VALLEY. *See* CROYDON.

GOLDSBOROUGH (17° 2′ S. lat., 145° 50′ E. long.), a mining centre on the Mulgrave goldfield, 26 miles from Cairns. The township is most picturesquely placed in the valley of the Mulgrave, from which river it is but a short distance, and is built upon a fine creek which runs into that river. Before the discovery of tin at Herberton there were about 100 miners on the field, and several of the claims were paying fairly, but there is little doing now, though it is believed that with proper and energetic working there would be profitable returns. At six miles distant is the Upper Camp, where reefs were worked.

GOOBURRUM, a settlement, with a receiving office, about 4½ miles from North Bundaberg (with which it is connected by a good road) inhabited by farmers, timber-getters, and cattle rearers. There is a school (No. 407), and an Episcopal place of worship on the Kolan Road. The country around is thickly timbered and overrun with native animals—dingo, kangaroo, and wallaby. Sugar-cane, maize, pine-apple, and sweet potatoes grow well. Population about 100.

GOODNA (27° 37′ S. lat., 152° 56′ E. long.), a railway station on the Brisbane and Ipswich line and the Brisbane River, 15 miles W. of Brisbane, 43 ft above sea-level. It has a post office, money order and savings bank office, and is also in telegraphic communication with the metropolis. It is in the county of Stanley and electorate of Bundamba. Hotels: Royal Mail, Redbank, and Railway. Places of worship: Congregational, Primitive Methodist, Episcopal (St. Albans) and Roman Catholic There is a primary school (No. 45). The Woogaroo Lunatic Asylum, the principal asylum for the insane in the colony, is here. District is noted for its coal-mines, has good building stone and a considerable extent of land under tillage, prin-

cipally for maize. Industries: Brickmaking, bee-keeping, dairying, timber-getting and wood-cutting, and there are several tradesmen. Population, 291 (census 1891).

GOOMBUNGEE. A populous and important farming locality contiguous to the Crow's Nest line of railway, about 14 miles from Toowoomba. The rich scrub has been rapidly taken up by a prosperous body of small settlers, who have effected a surprising change in the appearance of the district in a few years.

GOONDIWINDI (28° 33′ S. lat., 150° 21′ E. long.), electorate of Carnarvon, a municipal town with post office, money-order and savings bank office and telegraph station, in the county of Marsh, and electorate of Carnarvon, on the borders of New South Wales and Queensland, lying distant from Brisbane about 200 miles SW., and from Warwick, 140 miles, and situated on the north bank of the Barwon or Macintyre river. It was proclaimed Oct. 12, 1888. Municipal area 5¾ square miles, 140 dwellings, 27 miles of roads and streets. Ratable value of property £26,720. A mail coach runs bi-weekly to Warwick, fare 50s. There are five hotels, Commercial, Royal, Queen's Arms, Queensland, and Victoria, five stores, and several tradesmen's premises, a court-house, Episcopal, Presbyterian and Roman Catholic churches, a primary school (No. 46), a branch of the N.S. Wales Bank Masonic lodge, Oddfellows' lodge (M.U.), a school of art, with library of 891 vols., a jockey club, divisional hall, hospital, police quarters and there is here a public crossing-place by bridge across the Macintyre River to N.S. Wales. It is the chief crossing place for stock from Central Queensland to N.S. Wales. The large bridge connecting the two colonies was finished in June, 1880, and is called the Goondiwindi and Border Bridge. It has been built at the expense of both colonies, but on the responsibility of Queensland. An inspector of customs for N.S. Wales is stationed here. Two saw-mills are in the vicinity. Teamsters go regularly to Cambooya and Warwick. The soil is very suitable for growing cotton, oranges, grapes, and other fruit, and no doubt if the country were properly irrigated by the noble stream running through it, both horticultural and agricultural operations to a large extent could be carried on. Formation: alluvial. Population, 510 (census 1891), now about 800; inclusive of district, now about 1,900. Newspaper: *McIntyre Herald*.

GRANITE CREEK (19° 32′ S. lat., 146° 16′ E. long.), a tin-mining locality in the Palmer district, opened in 1876 by Whitehead and Co. and Messrs. Tracey. The produce of the mines has been considerable.

GRANTHAM A station on the Southern and Western Railway 67 miles west of Brisbane. Within a few miles of the station is a rapidly rising farming community principally engaged in the dairying and pig-raising industries, which have been very successful of late. A township is being formed, which promises to rapidly increase through the general prosperity of the district.

GREEN HILLS, a new gold-field proclaimed April 23, 1896, situate about eighteen miles from Cumberland. It has been the scene of a considerable rush of miners, and several fine specimens have been found, as many as sixty to seventy varying from 8 to 180 ozs. The Warden in 1898-99 reported that the locality had produced a fair quantity of gold.

GREGORY (15° 59′ S. lat., 144° 16′ E. long.), co. of Chelmsford, about 3 miles SE. from Maytown, is on Queen Creek, on the road to Byerstown. It was formerly known as the "Queen of the North" reef. It has one crushing plant, a Miners' Institute, with library of 615 vols. It is the chief reefing district of the Palmer. Population 29 Europeans, 5 Chinese.

GYMPIE (26° 12′ S. lat., 152° 38′ E. long.), a goldfields township and municipality, with a money-order office, savings bank and telegraph stations, in the county of March, prettily situated on the side of a range of hills on the upper waters of the River Mary, 107 miles N. of Brisbane, and 54 miles (61 by rail) S. of Maryborough. It is described as "a large township, extending over 3 miles N. to S., consisting of three distinct portions, Gympie, the One Mile, and Monkland." The latter part is extending steadily, owing to rich discoveries in the lower levels. There is rail communication between Gympie, Maryborough and Brisbane. The existence of gold was made known in October, 1867, by Mr. James Nash (after whom the town was first named Nashville, but it was afterwards altered to Gympie, the native name for a certain kind of stinging tree growing in the district), and the discovery soon attracted a large number of miners and others. In the following month (Nov. 8) the first quartz reef, the Lady Mary, was opened up by Messrs. Pollock and Laurence. The Caledonian reef was discovered a day or two later by Mr. Goodchap. White's and Walker's gullies were found and worked soon afterwards. Immediately after the finds at the Deep Creek, the One Mile Township was formed. "The richest workings were in Nash's, Sailor's, White's, Walker's, and Nuggetty Gullies, and on Deep Creek nuggets of large size were often found, the largest being one of 804 ounces, which was picked up in the neighbourhood of Sailor's Gully. The alluvial gold was easily worked, as only in a few exceptional cases was it more than a few feet below the surface." There are now numerous reefs being worked; those giving best results being the Smithfield, Phœnix, Pile, Oriental, Victory, 2 South Great Eastern, and Scottish Reefs; the principal claims are No. 1 North Phœnix, No. 4 and No. 5 North Phœnix, Wilmot Extended, No. 2 Great Eastern, Phœnix Golden Pile, North Smithfield, South Glanmire and Monkland, Oriental and Glanmire, 2 South Great Eastern, Australasian, Columbia-Smithfield. Scottish Gympie Gold Mines, 1 North Oriental and Glanmire, South New Zealand Junction, 1 North Columbia-Smithfield, Columbia Consolidated, 1 North Victory, 2 North Victory, 3 North Smithfield, 1 North Smithfield, 7 South Lady Mary, Smithfield and Phœnix Golden Pile, 6 North Phœnix, North Oriental and Glanmire, 3 North Phœnix, 1 South Great Eastern, 1 North Great Eastern, 2 North Oriental and Glanmire, 3 South Great Eastern, Orient Tribute, West of Scotland, 2 North Great New Zealand, East Oriental and Glanmire, Eastern 2 and 3 Smithfield Tribute, Great Eastern, Two Mile, and Great New Zealand, Phœnix Eastern Tribute, 1 South Oriental and Glanmire, 1 South Gympie Gold Mines, 2 North Columbia and Smithfield, Columbia Extended, Oriental and Columbia consolidated. The most successful mines in 1899 were:—Scottish Gympie, 19,011 ozs.; 2 South Great Eastern, 15,258 ozs.; South Glanmire and Monkland, 9,097 ozs.; 3 North Phœnix, 4,323 ozs.; Smithfield and Phœnix Golden Pile, 4,115 ozs.; No. 2 Great Eastern, 3,650 ozs.; Columbia Smithfield, 3,594 ozs. The returns for the year totalled 89,831 ozs. of gold from 99,983 tons of stone. Dividends £92,917. Up to the end of 1899 the total yield had been 2,403,727 ozs., valued at £8,413,044. As evidence of the permanency of the field the following are the results of the first half of the year 1900:- Stone crushed, 56,496 tons; gold yield, 46,598 ozs.; dividends declared, £44,573. The largest individual producer was the Scottish Gympie, with 12,876 ozs., closely followed by the 2 South Great Eastern, with 9,181 ozs. The eastern and south-eastern ends of the field are now attracting much attention, and new shafts are going down, and the field is extending in all directions. The most valuable and best known part of the Gympie field lies on the eastern side of the Mary. The deepest shafts are the Aurelia shaft, or the Great Monkland, 1,500 feet; Scottish Gympie Gold Mines, about 1,500 feet; Australasian, about 1,414 feet; Smithfield and Phœnix Golden Pile about 1,200 feet: Inglewood United, 1,215 feet; the United Smithfield, 1,400 feet; Wilmot Extended, 1,120 feet; No. 1 North Phœnix, 1,200 feet; Phœnix Golden Pile, 1,405 feet; North Oriental and Glanmire, 1,640 feet; West of Scotland, 1,150 feet; Columbia Consolidated, 1,450 feet; Columbia Extended, 1,300 feet; South Gympie Gold Mines, 1,420 feet; several of which are still being deepened. The Australian Joint-Stock Bank, the Bank of New South Wales, the Queensland National Bank, the Union and Royal Banks have branches here, and there are agencies of the principal Insurance Companies. The town possesses a good hospital (a handsome and roomy two-story brick building with accommodation for 60 in-door patients), a school of arts, with a library of over 4,500 volumes, one theatre—the Royal—the Masonic, Hibernian, and Oddfellows' halls, a court-house, a powder magazine, the usual public offices, and a building including post and telegraph offices. The places of worship are St. Peter's and St. Andrew's (Church of England), St. Patrick's (Roman Catholic) (stone building), Presbyterian, Welsh, Baptist and Methodist chapels and Salvation Army barracks. There are eight State schools, two Roman Catholic, and several private schools. The Queensland National Bank, Royal Bank, Bank of New South Wales, and the A.J.S. Bank have handsome brick buildings for their banking houses. Hotels: Northumberland, Commercial, Freemasons, Queen's, Mining Exchange, Royal Exchange, Royal, and about thirty others. Sittings of the district court are held three times a year. There are twenty-two lodges of different friendly societies, having a total membership of about 1,600. The Oddfellows have six lodges; Foresters, four; Masons, five; and Hibernians, two; Protestant Alliance, two; Rechabites, two; Druids, one. A Stock Exchange was established in 1884. A gas company was formed in 1881, and gas was laid on in September, 1883. Waterworks are now in course of construction. The country surrounding Gympie, although but little prospected, is known to abound in minerals; copper, silver, antimony, cinnabar, bismuth, and nickel having been found in payable quantities. At Miva, about 40 miles to the north, extensive coal-beds have been discovered, but remain as yet unworked. Indications of the existence of coal have also been found in the Noosa district near Lake Weyba. Companies worked dredges in the Mary river and Deep Creek, but the results were not sufficiently encouraging, so operations were discontinued. The area of the municipality (proclaimed June 26, 1880) is 3,840 acres, having 2,220 dwellings, 69 miles of roads and streets, and property of the ratable value of £253,872. The Government geologist is of opinion that the Gympie beds belong rather to the lower carboniferous than to the Devonian formation, to which they are generally attributed. The rocks are chiefly grey shales, black pyritous shales, greywackes, sandstones, grit, and conglomerates. The latter are masses of pebbles and boulders suggestive of a volcanic origin. Population of the municipality 12,000; of census district about 15,000. The *Gympie Times*, the *Gympie Miner* and *Truth* are the local papers.

HALIFAX, a post, telegraph, savings bank, and money-order office, near the mouth of the Lower Herbert River, about seven miles from Dungeness, and twelve miles from Ingham, to which conveyances run. Bank: Queensland National. Further information of the district will be found under Ingham and Dungeness.

HARRISVILLE (27° 50′ S. lat., 152° 40′ E. long.), a railway station on the Ipswich and Fassifern line, lies at an elevation of 175 feet, is 19 miles from Ipswich, and 43 W. from Brisbane. The line is completed to Dugandan. It has a telegraph station, money-order office savings bank, court-house, State school (No. 621) school of arts, with library of 424 vols., hotel (Railway), Episcopal Church (St. John's), Presbyterian Church and Masonic lodge. Industry: Trelawney cheese factory. It is in the county of Churchill, electorate of Fassifern, and

is situated on the Warrill creek, a tributary of the Bremer. Agricultural and pastoral district.

HELIDON —A refreshment station of the S. and W. Railway, 72 miles from Brisbane, having telegraph and savings bank facilities. In the neighbourhood are stone quarries and also the noted spa water springs.

HENDON (Co. Merivale) (28° 2′ S. lat., 151° 57′ E. long.), a railway and telegraph station on the southern line, 154 miles S.W. from Brisbane, lying on high ground 1,500 ft. above sea-level. The line to Allora, opened in 1897, branches off here. State school (No. 143). Hotel: Railway. Population about 180.

HERBERTON (17° 24′ S. lat., 145° 26′ E. long.), county Cardwell, police district of Herberton, electorate of Woothakata, a tin-mining township of eighteen years' standing. It is situated on the Wild River, about 3,000 feet above sea-level, 85 miles SW. of Port Douglas, 35 miles from the Mareeba railway station, and 55 W. by S. of the port of Cairns (about 85 miles by railway route). Tin was first discovered by Mr. W. Jack and party in April, 1880, though stream tin was found by John Newell in November, 1879. There are 6 hotels—Post Office, Cosmopolitan (both 2 stories), and Royal, and three others—all built of cedar. It has a money-order office, telegraph station, and savings bank. The road from Port Douglas passes along the western bank of the Barron River until it reaches a point 25 miles from Herberton, when it bears SSW., crossing first-class pastoral forest country, and passing through a belt of rich scrub containing thousands of acres of level agricultural land covered with cedar and other valuable timbers, and passing through the township of Atherton, 12 miles from Herberton. The prospector's selection of 60 acres, containing several valuable working tin-lodes, adjoins the township, which is situated on a granite ridge on the eastern bank of the Wild River, which is one of the principal branches of the Herbert. The tin-country, lode and alluvial, of which Herberton is the capital town, extends for an occupied distance of 40 miles SW., and several miles in each other direction, which includes the town of Watsonville, seven miles west, Montalbion 18 miles W., and the mining townships at Irvine bank and Return Creek, 17 and 25 miles distant respectively, also Koorboora. There are also extensive alluvial tin workings on the Tate and Quartz Hill on the Georgetown road. The principal mines are the Great Northern Freehold, at Herberton, the Great Western New North Australian mines near Watsonville, and the Vulcan Tin mine at Irvinebank. The country around is high and dry, with, during the greater part of the year, plenty of grass and water. In the town are two large stores, and some smaller ones. The main street, Grace Street, is a wide thoroughfare. A large hall for public assemblies, the property of the School of Arts (library of 1,349 vols.), Divisional Board's Hall, a State school (No. 254), Episcopal, Salvation Army, Primitive Methodist, Presbyterian and Roman Catholic places of worship, court-house, police barracks, gaol, and hospital are amongst the institutions of the town. Banks: Queensland National, Bank of Australasia. There are Masonic and Oddfellows' Lodges. There are three saw-mills in the Barron, about 10 miles from Herberton. The principal traffic is with Cairns, *via* Mareeba railway terminus, to and from which Cobb's coach runs twice weekly, and also a line of buggies; although a portion goes to Port Douglas. Coach also runs to Georgetown, fare £5, and to Croydon, £8. There are crushing machines at work, beside a silver and copper-smelter and tin-smelting works. Fresh lode discoveries are of frequent occurrence, and one section of the district—14 miles from Herberton—is being worked for silver-lead; while valuable copper-lodes are found in all directions, notably in the Chillagoe district, about 85 miles west from Herberton, the principal being Boomerang, Griffith, Calcifer, and Girofla. At Irvine-bank are tin-crushing and smelting works. During 1899 there were turned out from here 510¼ tons of tin, valued at £59,300. The silver produced for the district amounted to 209 tons, and the copper to 309¾ tons. The gold output was: From quartz, 296 ozs.; from alluvial, 1,591¾ ozs. The deep alluvial lead near Herberton, which has been worked for a length of two miles, and has turned out 600 tons of tin, is still being energetically worked and prospected. The water supply of Herberton is derived from the Wild River. District court is held twice a year. Eureka Creek is a large mining centre, as is also a rising site at what is known as Baker's Camp, between Watsonville and Irvine-bank. The Evelyn tableland and Upper Barron Valley are agricultural centres. Hot mineral springs exist at Nettle Creek 25 miles from Herberton. There are three of them, the principal one being in the bed of the Creek, and the other two on the bank. The temperature varies from 165° to 185°. These waters are said to have wonderful medicinal properties, and the cures of several confirmed invalids suffering from rheumatism are reported. It is expected that when the railway is completed to this district the hot springs will be much frequented. The population of the town and suburbs was 1,175 (700 in 1897); and of the district, of which it is the centre (census 1891), 3,477, and 344 Chinese. Newspaper: the *Wild River Times*. Formation: granite and porphyry principally.

HOMESTEAD, a railway and telegraph station, 127 miles distant from Townsville, and 45 from Charters Towers. Reefs are reported to be in the vicinity, and some mines are at work.

HORN ISLAND, one of the islands of the Prince of Wales's group, off the apex of the Cape York peninsula, has lately come into notice through the discovery of gold by Smith and party in 1894, since which time the field has been more or less worked. During 1899 533 tons of stone were crushed for 329 ozs. of gold; 432 ozs. were got from 492 tons of stone at Possession Island. Stampers to systematically work extensive reefs are now being erected. Population 18.

HOWARD (25° 30′ S. lat., 152° 28′ E. long.), a coal-mining town, and the commercial centre of the Burrum coalfield, 18 miles by railway NW. of Maryborough, in the county of Cook, division of Isis, electorate of Burrum, and police district of Maryborough, situated about one mile west of the Burrum River. The coal mines are at Torbanlea, about 3 miles S.E. of Howard; there is a branch railway line to the pit. There are two shafts at the mines. One is worked and the other used for ventilation. The pits belong to the Isis Investment Company. There are here two general stores, two hotels, and several small cottages. A State school and teachers' residence on the north side of the railway line opposite the Torbanlea station have been erected. The Queensland Colliery Company have two shafts working; there is a railway siding to the pit. The coal is reported to be little inferior to the Newcastle coal, with a probability of its heating properties improving when a greater depth is reached. Under energetic management the Queensland Colliery Company have developed splendidly. A new shaft with 7 feet clean seam of coal has been opened. The supply is practically unlimited. The coal is of excellent quality both for gas and steam. A deep sea lading port is only required to make Howard an extensive coaling centre. The mines are situated about 18 miles from the mouth of the Burrum River, the bar at the entrance is sand and shale. The depth at high water is about 14 feet, with safe anchorage and deep water inside. Vessels of 8 feet draught can run up about 6 miles to the junction at the Isis River, which flows into the Burrum. If the channel of the Burrum Bar were deepened to, say, 8 feet at low water, it is said it would be one of the most useful harbours in the Colony. The Hon. A. C. Gregory and the late Rev. Tenison-Woods declared that the Burrum coal age and formation was identical with that of Newcastle, N.S.W. Mr. Rands, late the assistant Government geologist, is of opinion that the Burrum coal-field will prove to belong to the Mesozoic carbonaceous series. The coal-beds have been traced in a NW. direction from Torbanlea to the Gregory River, a distance of 20 miles. Besides the coal industry, orange growing is about the only other source of income. The soil on the banks of the Burrum is particularly adapted for orange culture. Walker's orangery has about 4,000 trees, and Henry Smith's Sheffield orangery is a splendidly kept place with nearly 2,000 trees. The famous Isis scrub is about 20 miles distant in a NW. direction. Sugar is largely grown there. A third colliery, the Riverbank, has been opened up on the bank of the Burrum about 1½ mile S. of Howard. Brickmaking has been tried, and would be a successful industry if there were a larger demand for the article. Howard has two hotels: Royal, and Miners; three churches: St. Matthew's Episcopal, Roman Catholic, and Primitive Methodist. State school (No. 345). Police station, court-house, post, money-order, savings bank, and telegraph office, School of Arts with 718 vols., saw mills, stores, bakery, boot-shops, two butchers, and other tradesmen; Population, 461 (census 1891), now considerably larger.

HUGHENDEN (20° 51′ S. lat., 144° 13′ E. long.), a post-town (opened in 1877, and municipality, proclaimed April 30, 1887), with money-order, savings bank, and telegraph office, picturesquely situated on the banks of the Flinders River, 90 miles SW. of Charters Towers (153 miles by the railway line), and 235¼ miles from Townsville, in the county of Douglas, electorate of Flinders, police district of Bourke. The area of the borough is 16 square miles, it has 15 miles of streets, 375 houses, value of ratable property £36,206. The country upon which the township and station of Hughenden now stand was first taken up by Messrs. Henry and Devlin in 1863-4. In the following year Mr. R. Gray, who had been in partnership with Mr. Henry, purchased the cattle and country from him. It has four stores, nine public-houses—Hughenden, Great Western, Railway, Shamrock, Flinders, London Tavern, Royal, Australian and Exchange, three saddlers, three wheelwrights, two chemists, two blacksmiths, and other trades, a State school (No. 388), a provisional school, private school, a court-house, lock-up and sergeant's residence, and a school of arts, with library of 932 vols. The Queensland National Bank is a substantial and imposing banking house, also the Bank of Australasia. The New South Wales Bank has also a branch. There is a fine Episcopal Church (St. Thomas's), a Roman Catholic church, a Divisional Board's Hall capable of seating 400 persons, and a Masonic Hall (two story building), Lodge Star of the West, E.C. In the neighbourhood is one saw mill. Meat works have also been established in the vicinity of the town, which employ a large number of hands. The fourth section of the Northern line from Torrens Creek to Hughenden was opened on October 19, 1887. An extension of the line to Winton has been completed. Coaches run to Cloncurry, fare £5; Richmond, fare £2. Hughenden is in the centre of a good pastoral district, and is at present the main watering place for travelling stock. It will be the principal emporium for wool and station supplies for the western and north-western portions of the colony. The country all round is taken up chiefly with sheep stations, and grazing farms are being taken up almost daily. It is on the direct road to the Cloncurry, 280 miles distant, also on the road to Normanton, and to Winton. The hydraulic engineer is of opinion that were plenty of water available for irrigation purposes, some of the country in the vicinity of Hughenden would become of great value for agricultural purposes. Hughenden Divisional Board meets here monthly, and a District Court is held here twice a year. The water supply is derived from the Flinders by means of a pulsometer pump. Formation:

Cretaceous, with grey clay shales and sandstone. Population: 1,516 (census 1891), now about 1,500; of census district, 2,463. There is a Dumping company established here, where most wool from the surrounding district is pressed prior to being railed to Townsville. Many homestead areas and grazing farms have been taken up in the vicinity of the town, and owing to the richness of the soil and close proximity to the Flinders River, where water can at all times be procured, the selectors should do well. The town has a Chamber of Commerce, Pastoral Association, Jockey Club and Licensed Victuallers' Association, Masonic, Oddfellow's and Foresters' Lodges. Newspaper: *Hughenden Observer*.

HUMPYBONG (or REDCLIFFE) (27° 14′ S. lat., 153° 8° E. long.) (county of Stanley), electorate of Moreton, police district of North Pine, is situated about 30 miles N. from Brisbane, (about 18 miles in a direct line), on the shores of Bramble Bay on the South, Moreton Bay on the E., and Deception Bay on the North, the southern extremity, Woody Point being immediately opposite Sandgate; the northern, Reef Point, being opposite the North Passage. It is here that the first settlement in Moreton Bay was made by Mr. Oxley, who left Sydney in the year 1824 in the brig *Amity*, for the purpose of establishing a penal settlement. The locality was found to be ineligible on account of its supposed unhealthiness, scarcity of water, and other reasons, and the camp was transferred and re-established where Brisbane now stands. The houses of which the original settlement consisted were allowed to go to ruin, or, in the language of the aboriginal proprietors of the soil, "The humpies were allowed to go 'bong.'" Remains of the first settlement of Queensland were until recently to be seen. Several villa residences have been erected in the vicinity; much land has been cut up into allotments and sold, and the locality is becoming a very favourite watering-place. A steam-boat now runs to Brisbane; fare 2s. 6d. A larger steamer, the *Emerald* (a magnificently fitted craft), to meet the growing trade has just been built (1900). The nearest railway station is North Pine (11 miles), to which a conveyance runs. Agitation is going on for the extension of the railway to Humpybong. Provisional school (No. 164): there is also a school near Redcliffe Point); post and telegraph office, also police barracks. Hotels: Great Western, at Woody Point; Red Cliff Point Hotel and Walsh's Hotel at Scarborough. Four general stores, a baker's and two butchers' shops. Congregational place of worship. Episcopal services are regularly held. Masonic Lodge I.C. here. Direct telegraphic communication with Brisbane is now established, and there is a Government savings bank. There are several commodious private boarding establishments at Redcliffe, and there are a temperance hotel and numerous boarding-houses at Woody Point. Coaches from the hotels and boarding-houses meet the steamer. There are two jetties, one at Woody Point and one at Redcliffe Point. The average temperature, as compared with Brisbane, is, summer, 8° to 9° lower; winter, 8° to 9° higher. Wells have been sunk in different parts of the peninsula, and permanent water obtained. A magnificent sandy beach extends (with trifling breaks) from Hay's Inlet to Reef Point, over 4 miles in length, affording good bathing and fishing. Population, 203 (census 1891).

IDA, 2 miles N.E. from Maytown, the principal mining centre for the Ida, Comet, Just in Time, Louisa, and Heart's Content reefs having two hotels—Perseverance and Club House, one store, a Mechanics' Institute with library of 393 vols., and 3 crushing machines.

INDOOROOPILLY (27° 29′ S. lat., 153° E. long.), a postal town, telegraph and railway station, suburban to Brisbane (5 miles), in the county of Stanley and electorate of Oxley, on the Brisbane River. There are here Episcopal, Wesleyan, Primitive Methodist, and Bible Christian places of worship, a State school, No. 108, and the Stamford Hotel. At this point the railway crosses the river on a fine new bridge that replaces the one destroyed by flood. It consists of two spans 340 feet each, supported in mid-channel upon a stone central pier, and cantilevers carry a footbridge for passenger traffic. The total cost of the bridge was £70,894.

INGHAM (18° 39′ S. lat., 146° 10′ E. long.), a township, with a post, savings bank and money-order office, and telegraph station, on Palm Creek, a branch of the Herbert River (Lower Herbert), in co. Cardwell, electorate of Herbert, police district of Ingham, and division of Hinchinbrook. The communication from Brisbane is by steamer to Townsville, thence by steamer. Coaches run to Halifax township and various plantations, and to meet passengers at the various landings. A railway to Townsville has been surveyed—distance 66½ miles. It has three hotels—Royal, Day Dawn, Exchange, and Planters' Retreat, and the Halifax at Victoria Wharf—branches of the Queensland National and Commercial Banks, Church of England, Wesleyan, and Presbyterian churches, parsonage, court-house, police barracks, gaol, customs quarters, hospital, State school (No. 450), also State school at Halifax, and Provisional schools at Ripple Creek, Macknade, and Victoria, lands office and tradesmen's premises, telegraph office, three stores, and school of arts with library of 493 vols. Cardwell is the nearest town, 42 miles north. The district is largely taken up for sugar-cane. The Colonial Sugar Refining Company have a large area of land, the whole of it, with the exception of 500 acres, being leased to tenants, who grow cane on contract, and there are very extensive appliances for the crushing of cane and manufacture of sugar, equal to about 6,000 tons of sugar for the working season of six months. Gairloch Plantation, about 5,000 acres, owned by A. S. Cowley and Co., is leased in small areas to farmers, who grow cane for the Colonial Sugar Refining Co., and Ripple Creek. Hamleigh Plantation, owned by Messrs. Whittingham Bros. of Melbourne, is situate on the banks of Trebourne Creek. Area about 4,627 acres. Ripple Creek Plantation, owned by Messrs. Wood Bros. and Boyd. Area about 1,000 acres, situate on the north bank of the Herbert River, opposite Gairloch. Macknade Plantation, owned by F. and A. Neame, is situated on the north bank of the Herbert River, nearly opposite Halifax township. Area 7,194 acres, of which a considerable area is leased to farmers, being divided up into 27 farms. The mill has treble crushing, and is capable of turning out 6,000 tons of sugar in the season. Since the Pacific Islanders Labour Act has been extended, large portions of land in the district have been leased by small farmers for the purpose of growing cane for the Colonial Sugar Refining Co. At Halifax, about 12 miles from Ingham, there are settled a large number of small and prosperous farmers who have been growing cane for that company for some years, and are now extending their cultivation; Victoria and Fairford Plantations belong to the Colonial Sugar Refining Company; and there are other plantations. The Victoria plantation has a large mill, illuminated at night by the electric light; it has two steam ploughs, 24 miles of permanent tramway, 4 locomotives and the latest manufacturing appliances. An additional sugar mill has been erected at Ripple Creek plantation. In all upwards of 60 farmers are engaged in sugar growing, the yearly crop being about 50,000 tons. A Pastoral and Agricultural Society has been formed. The Hinchinbrook Divisional Board meets at Ingham. The extension of the sugar industry induced a large number of men on the plantations and small farmers from the Southern colonies, and elsewhere, to select homesteads, and settle on the land with their families. A large quantity of tin ore has been shipped from Ingham, the produce of the tin mines near Mount Fox, about 30 miles distant, but there are few mines now working. The tin mines at Mount Benham, about 16 miles from Ingham, have sent down a large quantity of stream tin, and many rich lodes have been found there only waiting for capital to develop them. Several valuable lodes have also been discovered at the Kangaroo Hills Tin Mines, but want capital to develop them. Population 320 (census 1891); inclusive of Malays, Kanakas, and others, it is said there are about 1,500 in the district. Newspaper: *Northern Planter*.

INGLEWOOD (28° 25′ S. lat., 151° 7′ E. long.), a post town, with money-order and telegraph station, in the county of Clive, electorate of Carnarvon, on the McIntyre Brook, at the junction of Canning Creek, 180 miles SW. of Brisbane, the communication being by the Cambooya or Warwick Railway Stations, the former 80 and the latter 70 miles distant. It has court-house (visited by the Stanthorpe police magistrate), two hotels (the Royal and the Sportsman's Arms), a school (No. 55), Church of England, a Masonic lodge (Scottish Constitution, and a police station; and is surrounded by sheep and cattle stations. Two coaches run from Goondiwindi to Warwick, through fare £1 10s.; Inglewood to Warwick, (80 miles) £1. A coach also runs twice a week from Pittsworth to Goondwindi, stopping at Inglewood each night. Fare, Pittsworth to Inglewood, £1. A Stanthorpe mail runs twice a week to Inglewood. The Inglewood Divisional Board meets here in the Board Hall. The soil is reported to be "very fair arable land, fit for carrying lucerne, potatoes, maize, wheat, barley, oats, and many other useful crops, including tobacco, if the means of communicating with a good market were available." At Texas, about 35 miles distant, a large area of tobacco is being grown, and there is a tobacco factory. Population (census 1891), 84.

IPSWICH (27° 37′ S. lat., 152° 48′ E. long.) is situated at the head of navigation, on the river Bremer, 23½ miles W. of Brisbane, 65 feet above sea-level. It is in the county of Stanley, electorate of Ipswich, and is the capital town of the district of West Moreton. The principal part of the town is on the south side of the river. It is connected with the north side by two bridges; a new structure having been built at a cost of £13,384 to carry the railway, the original one is devoted solely to vehicular traffic. It is in direct railway communication with Brisbane A station was formed here during the Governorship of Captain Logan, who gave the name of Limestone Hill to the ridge overlooking the present town. From this fact the locality originally bore the name of Limestone. On this ridge a kiln was erected for burning lime for buildings in Brisbane. The party consisted of five convicts and an overseer. The first house was erected in 1829. From this small beginning Ipswich began its career, and it is now one of the largest towns in Queensland, and, till the opening of the railway, almost rivalled Brisbane in business importance. It is pleasantly situated on the slopes of three hills, which drain into the Bremer, and is very salubrious. The district is a mining, manufacturing, and agricultural one. There are some rich seams of coal on the banks of the Brisbane and Bremer near the town, which have been worked for some time with profitable results; the coal crops out from the surface, and needs little labour to obtain it. The Waterstown, Tivoli, Aberdare, West Moreton, Upper Swanbank, Bogside, Boxflat, Haighmoon, Rothwell, Haigh, The Bishop, Bindley, Rose Hill, Borehole, Radstock, Everton, Braeside, New Chum, Mount Pleasant, Boxwood, Nil Desperandum, Liverpool, Dinmore, Swanbank, and other pits now do a large trade. Pits have also been opened at Walloon and Purga. The district may be said to be one vast bed of coal of good quality. The public buildings comprise the churches and chapels, among them being Anglican (St. Paul's, St. Thomas's), Roman Catholic (St. Mary's), Presbyterian (St. Stephen's), four Methodist, Lutheran, Baptist, four Congregational; the seven State

schools (Nos. 56, 59, 61, 246, 366, 60, and 247); Roman Catholic schools; (the Catholics have a convent and school-house—fine large buildings—at the back of their church), the Christian Brothers have a large school; the hospital, the court-house, lands-office, custom-house, the post, telegraph and money-order office, Government savings bank, two grammar schools (boys' and girls'), the school of arts, with a library of upwards of 7,000 volumes, the railway station—lunatic asylum (which is built on a pretty piece of ground at Sandy Gallop, commanding a very fine view); woollen factory, at which excellent tweeds, worsteds, blankets, &c., are turned out, three butter factories, gas works, the *Queensland Times* office, a handsome two-storey structure, with numerous large mercantile establishments and stores. There are two large saw-mills in operation, also three extensive foundries. Ipswich also boasts of some fine public halls, among them being those belonging to the Freemasons, the Oddfellows (2), Hibernian Catholic Benefit Society, and the Good Templars; the Olympic Assembly Rooms, situated in Down Street, North Ipswich, and one in Brisbane Street. The Queensland Pastoral and Agricultural Society, which has a fine show-ground at Sandy Gallop just beyond the town boundary, is in a flourishing condition. A Building Society has been established some time. Principal hotels—North Star, Palais Royal, North Australian, Commercial, Caledonian, Club, and Volunteer Arms. There are branches of the Australasia, New South Wales, Australian Joint-Stock, Royal, and Queensland National Banks, also agencies of the leading insurance companies. The railway to Brisbane was opened in June, 1875, the line to Harrisville (18 miles) was opened in July, 1882, and a further extension to Dugandan in October, and that to Esk, in 1886. The railway workshops are on the reserve at North Ipswich. The area occupied by buildings and sidings is about 22 acres, but about 100 acres have been enclosed with a substantial paling fence. The railway workshops are being considerably added to. It is estimated that the total cost of the additions will be over £200,000. A new goods station and extensive alterations have been made at the station to cope with the increasing traffic; the new bridge constructed over the Bremer was opened in May, 1897. Ipswich was incorporated into a municipality on March 2, 1860. The length of roads and streets in the municipal boundaries is 41½ miles, covering an area of 2,560 acres. There are 1,750 dwellings, and the value of the ratable property is stated at £251,828. The town is lighted with gas, and water is also laid on. The waterworks were opened by Governor Kennedy in 1878, and the water is obtained by pumping from a point of the Upper Brisbane River about 3½ miles from the town. The mains and sub-mains are laid throughout the town and in most of the suburbs. Geological formation: limestone. Population of the municipality 7,750, including the suburbs, 5 miles radius (census 1891), 13,059 persons. Local newspapers: the *Queenstand Times*, tri-weekly, established 1859, and the *Standard*, published in the labour interests. The *Courier*, *Observer*, and *Queenslander* (published in Brisbane) have also established a branch.

IRVINE BANK is a township, with money-order, Government savings bank, telegraph and telephone office, on Gibbs Creek, Chelmsford county, electorate of Woothakata, police district of Herberton, 11 miles west from Watsonville, 18 miles westward of Herberton, and 80 miles from Port Douglas, where an extensive reducing and tin-saving plant has been erected by Messrs. Moffatt & Co., who have been styled the fathers of Irvine Bank. The lodes are described as being unusually rich. The chief produce here is the Vulcan mine, "which, after a period of comparative eclipse, has again disclosed a large body of ore." It is spoken of as being the mainstay of Irvine Bank. The smelting works and plant here are described as being now quite perfect in the district for the treatment of tin. The most important claims are the Great Vulcan and the Great Southern mines. In connection with the Loudoun Mill there are complete wheelwright, blacksmithing, and tinsmiths works, also an ironfoundry at which all castings are made. One store, butcher's and baker's shops, four hotels, Commercial Cosmopolitan, Post Office, and Irvine Bank, police barracks, post-office, school of arts with library of 1,371 vols., and State school (No. 519). Episcopal and United Methodist ministers visit. Coach runs *viâ* Herberton to Mareeba railway station. Water is derived from Irvine Bank Mining Co.'s dam. Population, 250 (census 1891), now about 400.

ISISFORD, formerly known as WITTOWN (24° 14′ S. lat., 144° 22′ E. long.), is a township, with a post, telegraph, money-order, and savings bank office, in the parish of the same name, electorate of Barcoo, situated on the banks of the Barcoo (Mitchell's Victoria), on the direct route westward to the Diamentina and Herbert Rivers, about 80 miles W. of Blackall, and 460 miles W. from Rockhampton. Coach runs twice weekly to and from Ilfracombe railway station, 60 miles, fare £2 2s. 6d., also a weekly coach to and from Blackall, 80 miles. Bank: Queensland National Bank. There is a hospital and resident surgeon. Two hotels: The Club and Westward Ho, and another hotel, the Belvoir, situated on the east side of the Barcoo river, one mile from Isisford. A court-house and police barracks, and a State school (No. 63); resident police magistrate; Jockey Club; Oddfellows' and Foresters' lodge. The tradesmen include four principal stores, tobacconist, two saddlers, blacksmith, commission agent, two fruiterers, and two butchers. Pastoral district. Population of town (census 1891) 214, now about 350.

JERICHO, so named after Henry Jordan, the pioneer of the country, a post, Government savings bank, money-order and telegraph office, on the Central Railway, electorate of Barcoo, distant 305 miles W. from Rockhampton. Jericho has three hotels: Railway, Queen's, and Empire; two stores, and other places of business, a good police barracks and quarters, provisional school, and Roman Catholic place of worship. Most of the Blackall traffic and surrounding stations is done through here. The extension of the line westward has however, seriously affected the trade of the town. A coach runs twice a week to Blackall. The surrounding country consists generally of downs lightly timbered but poorly watered, and to some extent infested with poison grass. Population 183 (Census 1891).

JIMNA (26° 35′ S. lat., 152° 20′ E. long.) is situated on the creek of the same name, in the county of Lennox, and electorate and police district of Wide Bay, 100 miles NW. of Brisbane, the communication being by mail coach to Kilcoy, fare £1, thence horse. The district is partly of a mining (alluvial) and partly of a grazing character. There are patches of good land in the neighbourhood that might be turned to agricultural account. Jimna was originally an out-station belonging to Yabber station. In 1868 heavy alluvial gold was found here; population at the time was 2,000, now estimated at 30. The country in and around Jimna is of a very auriferous character. Reefs have been found showing a little gold, but sufficient capital was not employed to develop them. The place has been almost deserted, but it was reported that some promising-looking reefs were being opened out. The country is of a very broken nature, fine timber on all sides, cedar and pine among them. The climate is said to be delightful. All fruit grows well here, particularly oranges and apples. Soil, mostly black and chocolate and well grassed. Formation: Porphyry, slate, and granite. The falls of Yabber, estimated to be nearly 250 feet high, are about 15 miles distant NW.

JOHNSTONE RIVER (17° 32′ S. lat., 146° 4′ E. long.) (of which the postal centre is now called GERALDTON) is in the county of Nares, electorate of Herbert, and police district of Mourilyan, situated on the Johnstone river. The township lies at the junction of the north and south branches, four miles from the Ocean, and about 160 miles NW. of Townsville (to and from which there is a bi-weekly mail, while there are three steamers plying between Townsville and Cairns), and 930 miles NW. of Brisbane. It is now a port of entry and clearance. Johnstone River has come into prominence from the fine rich alluvial soil in the district, which has been found admirably adapted for sugar culture, and a large area of land is under cane cultivation on the four plantations on the two branches of the river. The principal plantations are Goondi, the property of the Colonial Sugar Co., Mourilyan, belonging to the Mourilyan Sugar Co., Innishowen, belonging to the Queensland Sugar Company, and Innisfail, the property of the Johnstone River Sugar Co. Geraldton is a place of petty sessions, has five hotels, Johnstone River, Union, Federal, White Horse, and Exchange, money-order, savings bank, post and telegraph offices, a court-house, customs-house, lands office, police barracks, and several general stores, and four stores kept by Chinamen, an aërated water-works, two boarding-houses, two bakeries, butchers, saddler, hospital, including surgeon's quarters, and State school (No. 527), and Mundoo Provisional school, a Roman Catholic church (Our Lady of Good Counsel), joss-house, Church of England (St. Albans), and school of Arts. Branches of Queensland National and Commercial Banks. The plantations have almost larger establishments than the township itself, and there is also a butchering establishment on the south branch. The Divisional Board have erected a good wharf at the township, and their hall is a credit to the town. A large wire rope ferry for conveying horses and drays to East Geraldton is now working. Town is reported to be improving, and the health of both town and district is bettered as the scrub is cut down and cleared. Streets are levelled and drained, and footpaths marked off. The entrance to the Johnstone is navigable at spring tides for vessels drawing 14 feet of water, and several sailing ships discharge cargo at Goondi, nine miles by water above Geraldton. One plantation—the Mourilyan—has made a tramway 2 feet gauge to convey produce and stores to and from Mourilyan harbour, about seven miles distant. The Divisional Board are spending £30,000 in building and equipping a tramway as a means of opening up the country. The harbour, though not so large as appears from the Admiralty charts, is a well-sheltered place, and contains about 150 acres of water of fair depth, and a deep-water frontage of a quarter to half-a-mile. The entrance has been greatly improved. A local correspondent reports as follows:—"Geraldton is the centre of the Mourilyan and Johnstone River sugar district, and the following companies hold large areas of the land, and have powerful and extensive sugar-manufacturing plants erected thereon—namely, on the south branch of the river, the Mourilyan Sugar Company, Limited, and, the Queensland Sugar Company, Limited; and on the north branch, opposite the township, the Johnstone River Sugar Company," also Goondi Mill, the largest and most complete. In addition to the companies mentioned, there are also a very large number of non-resident selectors. Large quantities of sugar are exported to southern ports and China. A considerable breadth is under crop for maize by Chinamen, and immense quantities of bananas are sent away weekly. Gold having been found in the two branches in 1884, a "rush" took place; several good finds were made. Since then rich alluvial finds have been made at Jordan, some miles distant from Geraldton. A good track has been cut to Herberton. The almost impenetrable jungle prevents prospecting to any consider-

able extent, and it will be some time before the true richness of the district will be ascertained. Average yearly rainfall is about 120 inches. The climate, though very humid (Johnstone River has the largest rainfall of any place in Queensland), seldom exceeds 80° in the shade, and with the exception of periodical slight visitations of fever there is nothing to prevent Europeans working. The population of Geraldton numbers 353 (census 1891); with the residents on the plantations, selections, and Mourilyan Harbour, Chinese, Malays, Cingalese, and Kanakas, 1,500. Newspaper: *Geraldton World*.

KAMERUNGA (16° 53′ S. lat., 145° 41′ E. long.), a settlement and proclaimed township, in the county and electorate of Cairns on the Barron River, 9 miles from Cairns. This was a flourishing township during the construction of the second section of the Cairns Herberton Railway, but is now almost deserted. Five families, mostly employed at the State nursery, reside here. Successful experiments on a large scale in the cultivation of plants are carried on here, particularly with sugar-cane of New Guinea varieties. Coffee and tropical economic plants are cultivated to a large extent.

KARUMBA. *See* KIMBERLEY.

KILKIVAN (26° 6′ S. lat., 152° 13′ E. long.) is a post, telegraph, savings bank, and money-order station, and mining township, on Wide Bay Creek, in the electorate of Wide Bay, mining and police district of Gympie, co. of Lennox, about 50 miles (65 by rail) SSW. of Maryborough, 26 miles W. of Gympie, and 135 miles NW. of Brisbane. It is a very mountainous country, and full of metallic substances. Gold, copper, cinnabar, silver, antimony, coal, iron, cobalt, and other minerals exist hereabouts in quantities, but cinnabar, cobalt and silver have not been worked for the past three or four years. Pine and cedar, too, are plentiful. Kilkivan, as a gold-field, gave some good yields a few years since. Very little gold mining has been done in this district of late. The Cobalt mines are near Black Snake. The mines at Black Snake and Mount Corra are owned by English and Sydney capitalists, who have over 3,000 acres of freehold land, but mining is at a standstill. Mount Corra is abandoned. In 1892 silver discoveries that promised much were made. An argentiferous lode at the head of Fat Hen Creek, about 4 miles from the railway station, was tried, and the results were encouraging, but later on the mines were either exempt or abandoned. Mining is going on at Running River, where the returns are satisfactory. A battery has been erected there. A State school (No. 168), Union, Methodist, and Presbyterian, Episcopal and Roman Catholic churches, railway station, court-house, and police quarters. Hotels: Railway and Kilkivan. Lodge of Protestant Alliance F. Society. There are three general stores. The Kilkivan branch of the Maryborough Railway was opened for traffic on December 6, 1886. There is weekly coach communication with Nanango, fare 25s. Population, 153 (census 1891), now about the same. The Kilkivan Divisional Board has its office here. The Division embraces an area of about 1,500 square miles, and extends for a considerable distance on the Burnett Watershed. Kilkivan being in the centre of some of the finest grazing country in the colony, should at no distant date be a depôt for receiving stock for the various freezing works in the south. There are facilities for cattle trucking. Besides being superior grazing country, the land immediately surrounding Kilkivan is particularly well adapted for agriculture. The Government have surveyed and opened a large area of the land included in the large gold-field reserve for Homestead selection, giving a rare opportunity for a number of settlers to secure homesteads for the purposes of dairying and agriculture, with rail facilities with such important markets as Bundaberg, Maryborough, Gympie, and even Brisbane. Formation: granite and porphyry.

KILLARNEY (28° 5′ S. lat., 152° 25′ E. long.), an agricultural township and centre, in the electorate of Cunningham, police district of Killarney, with post-office, and savings bank, 28miles from Warwick, with which it was connected by rail in August, 1886. It is situated on the River Condamine on elevated ground, being 1,691 feet above sea-level. By rail Brisbane is 197 miles distant NE.—about 90 miles in a direct line. Bank: Australian Joint-Stock. State school (No. 163). Hotels: Royal and Killarney. It has a court-house and lock-up, Episcopalian and Presbyterian places of worship, Salvation Army barracks, three stores, and three sawmills. It is described as a thriving locality, having rich soil, yielding in suitable seasons heavy crops of maize and tobacco. Fruit is grown to perfection. Population 387 (census 1891).

KIMBERLEY or KARUMBA (17° 27′ 37″ S. lat., 140° 52′ 54″ E. long.) is a telegraph, pilot station, and post office, at the mouth of the Norman River (on the North Head), 38 miles NW. of Normanton by land, 60 miles by the river. It is in the county of Burke, electorate of Carpentaria, police district of Norman. There is a mail service by steamer between Brisbane and Burketown, *viâ* Thursday Island. Coasting vessels from inter-colonial ports also arrive at intervals. Much dredging work has been done here, and a wharf and coal store have been erected on the bank of the river. Government buildings are post and telegraph office and pilot's cottage. Vessels after crossing the bar have a depth of water from 5 to 6 fathoms for a distance of 25 miles. There is a lightship at the Norman River bar for the guidance of vessels making the port at night. The country is mostly sandy, of fairly pastoral quality, and abundance of fresh water may be procured by sinking to a depth of from 6 to 14 feet. The district comprises an undulating plain, with salt-pans and patches of timber. One large plain, submerged in the wet season, would, it is believed, be well adapted for rice-growing. Kimberley is the terminus of the telegraph, the wire extending in an unbroken line from Brisbane on the east coast to here, on the western coast, a distance of 1,425 miles. There is also a telephone service. The place is reported to be very healthy, and visitors from Croydon and Normanton suffering from fever speak highly of its recuperative climate as being equal to any of the southern watering places. Good fishing and shooting most of the year. Population about 20.

KINGSBOROUGH (16° 53′ S. lat., 144° 53′ E. long.), a mining centre, with postal receiving office on the Hodgkinson gold-field, distant about 2½ miles from Thornborough, and 66½ miles W. from Cairns. There are here a court-house, Catholic church (closed), a provisional school (No. 143), one store, and several private houses. There are numerous reefs in the vicinity. Yield of gold for the Hodgkinson district for 1898, 4,169 ozs. Claims in the vicinity are Reconstruction, General Grant Tunnel, Vulcan, Caledonia, Homeward Bound, and Tyrconnell. Population, 50 (census 1886); now less.

KINGSTON (16° 18′ S. lat., 144° 18′ E. long.), more generally known as OAKEY CREEK, a post and telegraph station, and Government savings bank, is the centre of the several alluvial (Palmer) diggings. Stoney Creek is 5 miles distant: Fine Gold, 10 miles: Limestone, 19 miles. Many gold-bearing reefs have been discovered in this neighbourhood, and during 1893 some nice alluvial gold, principally small nuggets, was obtained in Boomerang Gully, a tributary of Oakey Creek, but the extent of the gully was small. Population, 91 (census 1891).

KURANDA, a township on the Cairns railway line, in close proximity to the famous Barron Falls. The district is 21 miles from Cairns, and it is delightfully situated at an altitude of 1,300 feet, in the centre of a rich alluvial scrub, so that it is likely to become an important agricultural township, and a favourite resort for parties visiting the falls. Population of district, 250.

LAIDLEY (27° 38′ S. lat., 152° 25′ E. long.), a post-town and railway station, in the electorate of Lockyer, police district of Laidley, on the Ipswich and Toowoomba Line, 51 miles W. from Brisbane. Hotels: Railway, Exchange, Britannia, Empire, and Queensland National. It is situated 353 feet above sea-level, on the creek of the same name in the county of Churchill, and has a money-order, telegraph, and savings bank office, branches of Queensland National and Royal Banks, court-house, police barracks, and Victoria, Norman and Masonic Halls. Tradesmen: two painters, two plumbers, nine storekeepers, two watchmakers, three cabinet makers, two saddlers, five blacksmiths, five butchers, two ironmongers, a chemist, two bakers, two tailors, two bootmakers, two stationers, and three auctioneers; two State schools, and Church of England, Primitive Methodist and Presbyterian places of worship; School of Arts (library 1,400 vols.), lodges of Masons, Oddfellows and Foresters, and a brass band. Two doctors and one solicitor are in practice in the town. Divisional Board has its offices in the Victoria Hall. Local Societies: Agricultural and Industrial Society, Farmers' Union and branch of Women's Christian Temperance Union, Choral Union. Industries: Bacon factory, brickyard, saw mill, timber yards and flour mills. A bore for artesian water was sunk by the Government to a depth of 2,600 feet, but no artesian water was obtained. Agricultural district. At the old township, 1½ mile from the railway station, is a Roman Catholic church. Farming locality. Population of town 391 (census 1891). Newspaper: *Lockyer Star*, tri-weekly.

LANDSBOROUGH, a railway station and township on the north coast line, 52 miles from Brisbane. Owing to the proximity of the Blackall Ranges a considerable traffic is carried on in timber with the metropolis. Population, about 150.

LEYBURN (28° S. lat., 151° 37′ E. long.), a post, savings-bank, money-order and telegraph town on Canal Creek, in the county of Merivale, electorate of Cambooya, Warwick police district, 150 miles SW. of Brisbane, with which the communication is by the Cambooya Railway Station, 29 miles distant. Toowoomba is 42 miles NE., Warwick 40 miles SE., and Goondiwindi 110 miles distant SW. There are two hotels (Golden Fleece and Royal), two stores, blacksmith, shoemaker, and carpenter's shop, a tannery and a saddler, an Episcopal place of worship (St. Augustine's), Roman Catholic church, a public school (No. 68), police barracks, and court-house. Coaches run to Warwick, fare 10s., and to Cambooya, fare 10s. A telegraph line has been erected to Yandilla, which is reported to be a great benefit to the district. Within a radius of from 7 to 20 miles are the following stations:—Ellangowan, Talgai, Canal Creek, Balgownie, Felton, Stonehenge, Yandilla, and Tummaville. Population, 216 (census 1891). It is a very old mining district, embracing Thane's Creek and Darkey Flat.

LIMESTONE, a mining district, situated on Limestone Creek, about 35 miles S. of Maytown, about 7 miles N. of Mitchell river, and 75 miles E. from Thornborough. Names of towns, "Groganville," "Harbord" and "Quartzboro." The road from Maytown is well watered, with accommodation houses at Oakey Junction, Goat Station, Cradle Point, Sandy Creek, and McGhan's. In the district are two Chinese stores, one hotel, the Union, provisional school, police station, court-house, post and telegraph office, and a butcher. Mining company: North Cross. On the north bank of the Mitchell River, about 25 miles E. from Limestone, is what is known as the antimony mine. It is now abandoned, want of machinery, the fall in price of the ore, and a good road to the locality kept the place back; there is a new road about five miles farther than the old one. Though named Limestone, it is reported that there is not an atom of limestone within ten miles. Population, including neighbourhood, 50 Europeans and about 30 Chinese.

LOGAN VILLAGE (27° 50′ S. lat., 153° 10′ E. long.), a small township, railway station in the county of Ward, Tambourine Division, on the south bank of the Logan River, about 27 miles from Brisbane. Has a Primitive Methodist chapel, a Provisional School (No. 123), a creamery (Model Dairy Company), and an hotel. Produces maize, cattle, and timber. The railway was extended to here from Bethania Junction in September, 1885. Grazing and farming district. Tambourine Mountain is a favourite resort for tourists. Population, 61 (census 1891), now about 85.

LONGREACH (28° 27′ S. lat., 144° 8′ E. long.), a post town, money-order office, savings bank and telegraph station, and terminus of the Central Railway, 424 miles W. of Rockhampton, situated on a stony knoll within 3 miles of permanent water-holes in the Thompson river. It has branches of the Queensland National, Commercial, and N.S.W. and Australasia Banks and several hotels—Commercial, Longreach, Royal, Federal, Imperial, Great Western, and others—and stores and other buildings, police-station, court-house, post and telegraph office, two cordial factories, boiling down and wool scouring works, a State school and two private schools, School of Arts library of 853 vols., Church of England, Methodist, and Roman Catholic places of worship, and a brewery. Coaches run to Winton, Windorah, Muttaburra, and Opalton. There are lodges of Masons, Oddfellows, Foresters, Hibernians, and Rechabites, and there is the Longreach Club. Population, 157 (census 1891). Newspaper: *Standard*.

LOWOOD, an agricultural township on the Brisbane Valley Railway, 45 miles from Brisbane and 21 from Ipswich. The soil of the district is extremely fertile, dairying being one of the most important and flourishing industries. Population, 240.

LUCINDA. *See* DUNGENESS.

LUKINVILLE (16° S. lat., 143° 46′ E. long.), formerly the postal centre of a mining locality, named after Mr. George L. Lukin, from 20 to 30 miles W. of Palmerville, near the junction of the Garnet creek with the Palmer river. The digging is alluvial, either the bed or the banks of the river, and is described by the Warden as being evidently derived from the gold-bearing rocks higher up the river.

LYTTON (27° 25′ S. lat., 153° 11′ E. long.), a small township in the co. of Stanley, parish of Tingalpa, electorate of Bulimba, near the mouth of the Brisbane River, of which it may be considered the south head, 13 miles NE. of Brisbane. It has a lighthouse, water police, and custom-house station, and is in telegraphic communication with the metroplis, with which it has a daily mail. There is steamer communication, or the Cleveland line can be made use of. Hotel: the Lytton. The reformatory school for boys, has been removed, the site being required in connection with a scheme for the extension of defence works. State school. A battery mounting two 5-ton and two 64-pounder guns has been made here, and a redoubt constructed on the top of Signal Hill, mounted with two 10-barrelled Nordenfelt and heavy guns, commanding the entrance to the river; considerable additions have lately been made, and are still being made, to the fort. The river is also defended by a system of submarine mines. The water supply is derived from wells close to the Reformatory hill. A rifle range, with nine targets, has been established here. Agricultural district.

MACKAY (21° 9′ S. lat., 149° 13′ E. long.), a seaport, municipal township, with money-order, savings bank, post and telegraph station and telephone exchange, on the south bank of the Pioneer River, 625 miles NW. of Brisbane, in the county of Carlisle, parish of Howard, and Mackay electorate. Captain John Mackay claims to be the discoverer of Port Mackay in the early part of 1860, while the leader of a party organized in New England to search for grazing country. The town was named after him, and so was the river, but at the suggestion of Commodore Burnett, the river's name was altered to Pioneer, as there was another Mackay River. From Brisbane and Keppel Bay in the south, and from Townsville and Bowen in the north, there is communication by the regular A.U.S.N. Co.'s mail boats, and also by the steamers of Howard Smith and the Adelaide S.S. Co.. Intermediate boats also run, and give communication with the ports north and south. Coaches run to Nebo and to St. Lawrence from the terminus of the line and from the town respectively. The late Sir John Coode inspected the harbour, and reported on it, but though he suggested three designs he considered that the improvement of the Harbour of Mackay must, from the adverse circumstances that surround the case, prove a work of exceptional difficulty. A proposal is now (1900) before the Local Harbour Board to erect a groin some distance up the river to divest the stream into a new channel. The town contains a court-house; the hospital is situated on the river bank two miles above the town. Roman Catholic, Presbyterian, Lutheran, Church of England (Trinity), and Primitive Methodist churches, two State schools (Nos. 71 and 313) in town and nine in the country—Eton, Walkerston, Te Kowai, Hill End, Mirani, Marian, Coningsby, Homebush and Chelona. There are Provisional schools at Habana, Flat Top, Kelvin Grove, Hampden, The Leap, Grasstree, Alligator Creek, and Plane Creek; one Roman Catholic and one ladies' school, two private schools; branches of the Queensland National, Union, Joint-Stock and Commercial, Government Savings and Penny Savings Banks, a School of Arts, with library of 3,913 volumes, and large hall for public entertainments, police barracks, immigration barracks, court-house, lands office, customs-house, post and telegraph office, gas-works, and Good Templars', Masonic, Druids', Oddfellows' and Protestant Alliance, Foresters', Rechabite and Good Templars' Lodges, and Benevolent Society. There are eighteen hotels, namely, Naval Brigade, Riverview, Prince of Wales, Post Office, Gympie, Victoria, Pioneer, Queen's, Australian, Imperial, Oxford, Wills', Metropolitan, Commercial, Tattersall's, Belmor Arms, School of Arts and Queensland. A bridge has been built over the Pioneer at Sydney-street. It is an iron lattice girder bridge, 1,414 feet long by 24½ feet wide. Telephonic communication with the various Government offices and leading business places has been installed. The Divisional Board (Pioneer) have constructed a bridge over Barnes Creek, a necessary adjunct to the Sydney Street bridge. These, with the wooden bridge (Pioneer), are under the control of a Board, known as the Mackay Bridges Board. There are in the municipality (area 5,120 acres) 49 miles of streets, 940 dwellings, and property rated at £194,402. Sugar, tobacco, coffee, and other tropical and semi-tropical productions thrive here. One brewery is in full work. The district is pastoral and agricultural, containing large areas of rich alluvial deposits of considerable depth, with hundreds of sugar farms within a radius of 20 miles from the township. The mills on the south side of the river are Homebush, Meadowlands, Te Kowai, Race Course C.M., Marian, The Palms, Pleystowe and Plane Creek Central Mill Company. and on the north side of the river: North Eton C.M. Habana, Farleigh, Nindaroo, Proserpine Central Mill Company, Foulden, Pioneer, Ashburton and Richmond. The four last are not working. The sugar industry dates from September 14, 1868, when the first sugar mill was started working in the Mackay district by Mr. John Spiller, who was the first grower of cane at the Alexandra plantation; the first cane planted was in 1864. At the Alexandra plantation is a rum distillery. The distillery at Pleystowe has been dismantled and closed, the site being required for the erection of extensive sugar works. The Colonial Sugar Refining Company have a large area of freehold land, now mostly occupied by farmers who have taken purchasing leases, and have on a portion of it, Homebush, the largest mill in Queensland, capable of turning out annually about 8,000 tons of sugar. With this mill are connected about six miles of permanent tramway, and a long length of portable tram-lines. All the more important mills have now adopted double-crushing, and the triple effet. Homebush is lit by the electric light, also Habana, Farleigh, Marian, Racecourse, and Plane Creek Mills, for which there is a complete plant on each estate. The central mill system, by which the manufacture and cultivation of sugar is divided between the mill-owners and farmers, is now generally adopted. The old Homebush, Habana and Pleystowe plantations are peopled with small settlers, and other estates are being subdivided. Two mills capable of making 6,000 tons of sugar each yearly, have been erected under the Sugar Works Guarantee Act of 1893: one at Marian and the other at Pleystowe Last year the district produced 17,521 tons of sugar. The developments in sugar have greatly increased the prices of land lately, and added largely to the population. Mackay is the port for the produce of the Mount Orange and Mount Gotthard copper mines—when these mines are at work; it is also the port for the Mount Britten and Eungella gold field; and at Yatton, in the adjoining district, rich gold deposits have been found. Much of the auriferous land is owned by Mackay residents. Extensive gold deposits have been found at Eungella in the ranges to the SW. of Mackay. The Orchid P.C. (now Eungella G.M. Co.) was described as a surface show of "phenomenal richness," and machinery was erected to work the claim, but the results were very disappointing; early in 1894 the place made "a most astonishing recovery, but the recovery was of short duration only"; and the claim is now abandoned and the machinery sold to the Homeward Gold Mining Company. At Grass Tree, now known as Minterton, on the coast, 25 miles S. of Mackay, gold has been found in kaolin felspathic porphyry dykes from 8 feet to 18 feet through. A railway is now open to Eton. Total length of line, Mackay to Mirani, 22 miles; Newbury junction to Eton, 8 miles. The terminus of the line is at the corner of Tennyson and Alfred Streets, whence an extension goes to the Pioneer River, where commodious wharves are erected. During 1897 communication with the southern portion of the district was considerably assisted by the building of a bridge over Sandy Creek. Several tramways are projected for facilitating the carriage of cane from the rapidly extending plantations to the existing mills. Mackay is a Circuit Court town, courts being held twice a year. According to the Government geologist "coal seams of workable thickness and of good quality are known to exist in the Mackay district, and others may with confidence be expected to be discovered in localities not yet explored." Formation: sedimentary lying on basaltic and granitic basis with coal seams of the tertiary period. Population of municipality (incorporated September 22, 1869), 4,600; of the district about 13,200. The *Mackay Mercury* (established 1866), the second oldest paper in North Queensland, *Mackay Standard*, and the *Mackay Chronicle* are the local papers. The *Sugar Journal* is also published in Mackay, but it is a colonial rather than a local production.

MAPOON, the locale of the Batavia river Aboriginal Mission, is situated on the shores of Port Musgrave, about a mile from the extreme end of Cullen point, about 120 miles S. of Thursday Island. This mission is under the auspices of the Federated Presbyterian churches of Australia and Tasmania, and was started in the latter part of 1891, the Rev. J. G. Ward (since deceased) and N. Hey, Moravians, being the first missionaries. Mr. and Mrs. Brown have since joined the mission. Under their guidance the natives have been set to work usefully.

About 50 acres have been partially cleared, 3 or 4 acres put under vegetable and fruit culture, and a substantial house put together. The natives are paid in food, and only paid if they work. Owing to the lightness of the soil and the climate, the growth of vegetation and trees has not come up to expectation, though cocoanuts and bananas thrive. As a centre of influence, Mr. Douglas thinks a better selection could not have been made. In his last report he stated, "I have no doubt myself of the beneficial effects of the mission, it has humanized the natives and has made them feel that some, at any rate, of the white men are their friends." Mr. A. Meston, who visited the locality, considers the site as in many respects very unfavourable, being unhealthy, the land of the most worthless character, heat oppressive, and swarming with millions of mosquitoes and flies. The buildings comprise a commodious residence, a church and schoolhouse. The missionaries are reported as doing a good work under very adverse circumstances.

MARBURG, a post town with telephone, money-order and savings bank office in the Rosewood Scrub, about 7 miles from the Walloon railway station, to and from which a coach runs daily. It has three hotels, Marburg, Royal, and Post Office, a school of arts, State school, four stores and several tradesmen's premises. Lutheran and Anglican places of worship. Dairying and agricultural district Population, about 350.

MAREEBA (17° 1′ 4″ S. lat., 125° 26′ 48″ E. long.), a mining township, in county of Nares, in the parish of Tinaroo, electorate and police district of Cairns, having post and money-order office and telegraph station and Government savings bank. It is the present terminus of the Cairns-Herberton railway (46 miles), the line having been opened for traffic in August, 1893. It is situated on Granite Creek and the Barron River. The field itself is about five miles distant from the township. An Agency of the Bank of North Queensland is here, also a provisional school, School of Arts, police station, and a newspaper, the *Mareeba Herald*, 6 hotels, Federal, Terminus, Exchange, Carriers' Arms, Imperial, and Railway; stores, and other tradesmen's premises. Churches: United Protestant and Roman Catholic. Ministers of several denominations visit. The town site was officially marked out in July, 1893. On February 21st, 1893, Messrs. Hort and Finlayson reported the discovery of a payable gold reef 6 miles from Mareeba. A large population was attracted, but the expectations have, it is stated, not been realized. The mine, so far as it is yet known, is an immense outcrop of gold-bearing quartz, crowning the summit of a low hill, the only elevation for miles around. Yield of gold 1899, 222 ozs., principally from the Jubilee, G. M. Lease. All the rest of the field was reported as abandoned. The Queen Constance and Clohesey Companies were reported to be in liquidation in 1897; the former was let on tribute, and gave fair wages; later on the mine was sold to Messrs. Munro and Newell, and several encouraging crushings were soon after made. The output of the metals from Herberton, Montalion, Irvinebank, and Chillagoe comes to Mareeba for railage to deep water (Cairns). Meat preserving works (known as the Barron Meat Co.'s) have been erected on the railway line about 5 miles from Mareeba. The company started early in 1897, killing on an average 50 to 60 head of cattle daily, the produce from which is concentrated beef, tallow, hides, bones and manure. Cobb's coaches run to Herberton and through to Croydon *viâ* Georgetown; McRea runs to Herberton only; fare to Herberton, 10s., Georgetown, £5 10s., Croydon, £7 10s. Mareeba is surrounded by fair agricultural and pastoral country. Population (Sept. 1898), of town and district 400. Formation: Clay slates and schists, covered here and there with basalt. At Clohesey, 8 miles distant, reefs have been discovered, and a crushing plant erected.

MARYBOROUGH (25° 33′ S. lat., 152° 43′ E. long.), a municipal township (proclaimed March 23, 1861, reincorporated January 8, 1875), in the county of March, electorate of Maryborough, on the north bank of the river Mary, 25 miles from its mouth, about 180 miles N. of Brisbane. Communication with Brisbane is by rail, and also steamer several times a week. The railway to Gympie was opened for traffic on August 8, 1881; there is also railway communication to Gladstone, Bundaberg, Mount Perry, Kilkivan, Degilbo, and the Isis Scrub. A railway, under the Guarantee Act, is now open to Pialba, the watering-place for the district, and a large centre of agriculture. Hotels: The Royal, Custom House, Commercial, Sydney, Southern Cross, Melbourne, Queen's, Tattersall's, the Grand, and numerous others. Vessels drawing 17½ feet of water can reach and be berthed at the town wharves. It is the port of shipment for the greater portion of the produce of the Wide Bay and Burnett Manango and Gayndah districts, and is also the principal town in the district. There are 100 miles of streets (municipal area 22 square miles), 2,284 dwellings, and property rated at £378,536. It has a fine hospital, having accommodation for 96 patients, a School of Arts, in connection with which is a Technical College with a competent staff of teachers, in Kent Street, with a library of about 8,880 volumes, branches of the Joint-Stock, Australasia, New South Wales, Commercial, Queensland National, and Union Banks, and agencies of the leading Insurance Companies, also a custom-house, immigration barracks, and a town-hall, and several other public halls. In connection with the post-office is a money-order and telegraph office, savings bank, and telephone exchange. A large handsome building is occupied as court-house, survey and land offices, and also by the clerk of petty sessions. The Grammar Schools for boys and girls were opened in September, 1881. The schools are built on commanding sites. The Wesleyan and Presbyterian churches are handsome brick edifices. There are ten places of worship—St. Paul's church (Episcopal), which has a handsome tower and peal of nine bells; Presbyterian, and Wesleyan churches, Roman Catholic church (St. Mary's), all fine brick and stone edifices, and Baptist, Lutheran, and Primitive Methodist chapels. There are seven State schools (Nos. 38, 72, 9, 315, 193, 236, 485), also one at Newtown. There are also a Roman Catholic and Christian Brothers' Schools. The town has companies of Defence Force, Rifle Club, a Naval and a Fire Brigade, an Agricultural and Pastoral Society, also Horticultural Society. The public gardens are small but beautiful. Maryborough is a well laid out town, and the number of its pretty gardens has earned for it the name of the Garden Town of Queensland. A bridge, the longest in the colony; spanned the river in the direction of Gympie, this was destroyed in the great flood of 1893, and is now replaced by a low level concrete bridge. The water supply is derived from Tinana Creek. The water is pumped through a rising main, 10 inches in diameter and two miles long, into the service reservoir, placed at an altitude of 162 feet above Tinana Creek. This reservoir is 102 feet in diameter, 13 feet deep, and holds 650,000 gallons; from here the water flows into town by a gravitative main, 9 inches in diameter and about 7¾ miles long. The water is conveyed across the river Mary by means of a wrought-iron inverted syphon of about 480 feet, supplied at each end with an expansion joint. This syphon is embedded several feet in the river bed, in a trench excavated by divers. The town has been lighted with gas since August, 1879. On the land under cultivation maize, potatoes, lucerne, and other crops and sugar are principally grown. Oranges are also largely cultivated and exported to Melbourne and other southern markets, where they command good prices. The banks of the Mary, from the township up, consist chiefly of rich scrublands under cultivation for sugar, and other crops, giving employment to a large sugar factory in the town. Timber suitable for building and other purposes, abounds in the neighbourhood, and is largely exported. In its preparation for shipment several large mills in the vicinity of the town are employed, Wilson, Hart and Co.'s being the largest in Queensland. There are two large iron-foundries, with one of which is connected a large ship-building yard. The Union Foundry (Walker's, Limited), is the largest in the colony, employing, when in full work, upwards of 600 hands. The firm make a speciality of locomotive construction. Most of the large central sugar mills erected in the colony under the provisions of the "Sugar Works Guarantee Act," have been manufactured at Walker's Limited. The same firm, in 1898, completed a contract for thirty railway locomotives for the Queensland Government, and are now engaged building a further number, having up to date (1900) turned out 59 for the Queensland Government alone; other industries being a brewery, one tannery; two large sash and door factories, extensive carriage works, boot and shoe factory, large flour-mill, two soap manufactories, and a stove and iron foundry. Maryborough is the outport of the Gympie, Mount Shamrock, and Eidsvold gold-fields and Burrum coal-field. The Queensland Smelting Company's Aldershot works, the largest in Australasia, are situated 5 miles from Maryborough, and treat ore from all the colonies. The stations in the neighbourhood are principally engaged in raising cattle. The district is under the control of the Tinana, Burrum, Isis, Antigua and Granville Divisional Boards. The population now numbers about 10,000 in the municipality. In the district (census 1891) were 12,178. The *Maryborough Chronicle* (daily), *Colonist* (weekly), and the *Wide Bay and Burnett News* (triweekly), are the local newspapers.

MAYTOWN (15° 59′ S. lat., 144° 20′ E. long.) (co. of Chelmsford, electorate of Cook, and Palmer Police District), formerly called Edwardstown, is a post-town, with money-order and savings bank office, and telephone station, about 122 miles SW. of Cooktown (about 90 miles in a straight line), the port of the district, and 961 miles from Brisbane. A mail coach runs between Laura Railway Station (Cooktown and Palmer Railway) and Maytown (50 miles) once a week, fare £2. The railway is in course of extension towards Maytown. The town is situated on the east bank of the Palmer River, at an elevation of 862 feet above the sea-level. It originated in the gold diggings in the vicinity (known as the Palmer), which attracted a large mining population. It has a branch of the Government Savings Bank, a State school (No. 292), court-house, school of arts, with library of 505 vols., and hospital (Palmer River), police barracks, and lock-up. Hotel: Prince of Wales. Episcopal and Roman Catholic services are held in the Divisional Board Hall. It has eight stores, of which about half re kept by Chinamen, a miner's institute and some small public buildings. It is a quartz reefing district of promising character, and with railway communication would, it is expected, prove to be one of the richest gold-fields in Australia, mountains containing gold existing for miles. The reefs extend in all directions for about 30 miles from the township. The gold obtained is of a high quality, its average value being over £4 per oz. Many of the reefs, owing to high rate of carriage and want of machinery, will not yet pay for working. In addition to gold, tin, iron, antimony, coal and silver are found in the district. On the entire field (Palmer) the population was estimated, by census of 1891, at 838, of whom about one half were Chinese; of town alone, 135 (census 1891), now (1898), 276 Europeans and 422 Chinese. Maytown is the capital of the Palmer Goldfield, whence roads communicate with Limestone (16° 30′ S. lat., 144° 40′ E. long., bearing 36′ 31″ E.), distance 40 miles, which became of note in 1886 by the discovery of the Anglo-Saxon line of reef, which for some years gave

rather phenomenal returns of gold. The Coen (13° 50′ S. lat., 143 5′ E. long., bearing N. 28° 2′′ W.), distance 170 miles, where gold was discovered first in 1878, but was virtually abandoned until 1890, when some rich gold-bearing reefs were discovered, which have yielded handsome returns to the miners. This field is distinct from the Palmer Goldfield (although in the Palmer police district), and is distinguished by a different set of rocks from the former, being principally a micaceous granite, also by a poorer quality of gold, which however, is compensated by the richness of the reefs. Formation: basalt, conglomerate sandstone, clay slate, granite quartz, diorite, &c., and marine limestone, in which occur iron, stone veins. During 1900 leases were taken up on behalf of London investors on the Ida, Louisa, Queen and Comet lines of reef. In the direction of Oaky and Stony Creeks leases have also been taken up on the ironstone lodes, many of them proving by assay to be of considerable value. Numerous dredging claims have been secured on the Palmer river, and as this phase of mining is new to the locality its development will be watched with considerable interest. Tin and antimony are also to be found, the former in small quantities, the latter in large lodes; but the difficulty in the matter of treatment is a great drawback.

MEKINGANDAN, an agricultural township and railway station on the Crow's Nest Line, 11 miles from Toowoomba. Dairy farming is carried on successfully in the neighbourhood.

MILES (26° 39′ S. lat., 150° 7′ E. long.), a post town, in the electorate of Murilla, with money-order office, telegraph station, savings bank, and railway station, 231 miles from Brisbane, It lies 972 feet above sea-level. State school (No. 341), two hotels: Queensland and Sportsman's Arms, and two stores. Well timbered district, with poor sandy soil. Large quantities of ironbark sleepers and bridge timber are supplied from the neighbourhood, there being two saw-mills. Population, 170 (census 1891).

MILLCHESTER (20° 10′ S. lat., 146° 19′ E. long.),a post town, about 820 miles NW. of Brisbane. It owes its name to most of the quartz crushing mills being first erected there. Hotels: Royal, Rose, Shamrock and Thistle, Old Identity and Millchester. Churches: Anglican and Roman Catholic (St. Bridget's); also a primary school (No. 157), and several tradesmen's premises. Pyrites are in the vicinity. Charters Towers is about 2½ miles distant; coaches run about every quarter of an hour, fare 6d. The Burdekin low-level bridge is about 14 miles distant. Population, 630 (census 1891).

MITCHELL (26° 32′ S. lat., 147° 52′ E. long.), a post town, with money-order office, and telegraph station, and Government Savings Bank on Western Railway Line, in the county of Dublin, electorate of Maranoa, on the Maranoa river, 372 miles NW. of Brisbane, and 54 miles W. of Roma. It lies 1,104 feet above sea-level. There are five hotels—Post-Office and Green Gate being the principal—five general stores, two saddlers, two butchers, chemist, two medical men, two saw-mills, and a shoemaker, aerated water factory, a State school (No. 27), also Provisional school five miles out at Balmoral East, Roman Catholic chapel, Anglican church, Wesleyan church, court-house, post and telegraph offices, police quarters and lock-up, land office, and first-class meteorological station. Clergymen of the different denominations make periodical visits and hold services. An amateur jockey club (Mitchell Downs) is here, and in the neighbourhood is a good racecourse. It is the centre of a wealthy pastoral district, over forty large stations being in the neighbourhood. Table vegetables and fruits grow well, and the soil is now being turned to account for farming operations. Much land having been selected, attention is being given to vine-growing, for which the soil and climate seem well adapted. Several Homestead selections have been, and are still being, taken up, and, with favourable seasons, farming, and more particularly maize, wheat and vine culture, will be carried on to a large extent. This district is destined in the near future to become one of the most important agricultural centres in Queensland. Trial is also being made of broom, millet, cotton and other plants of commercial value. Four lines of coaches ply to St. George, Bollon, Westgrove and Warrenville. The Divisional Board of Booringa and Booringa Marsupial Board have their headquarters here. Among the local institutions are Rifle, Cricket, Tennis, and Football Clubs, the Mitchell and Maranoa Agricultural Association, and the Vine-growers' Association. The building trade is particularly brisk just now (1900), several new structures being in course of erection. Population (census 1891), 376.

MONAL, a gold-field, in the co. of Bowen, electorate of Burnett and police district of Eidsvold, about 22 miles SE. of Cania, 70 from Gladstone, and 80 from Mount Perry, but nearly 130 by road. It lies at the head of Monal Creek, which forms the head of the Burnett waters at the junction of Raspberry Creek. The first reward claim was granted on this field in June, 1891, to John MacNamara and party. The principal line of reefs are Lady Griffith, Trident, United Rise and Great Eastern. During 1898 1,257½ tons of stone yielded 1,277¾ ozs. of gold. The township consists mainly—from the rugged nature of the country—of one irregular main street. There are here two hotels, Royal and Monal, a Provisional school, one butcher and three stores. Communication is by coach to Gladstone (70 miles) weekly. Population, 188. Formation: volcanic.

MONTALBION (17° 29′ S. lat., 145° 3′ E. long), a silver-mining township, with post and telegraph office and police station, in the county of Chelmsford (Walsh division), electorate of Woothakata, police district of Herberton, situated on Gibbs Creek, a branch of the Walsh River, about 22 miles W. from Herberton, on the main road to Georgetown; a coach runs to Herberton *viâ* Irvine Bank and Watsonville, twice a week; fare 10s. each way; also a coach to Mareeba (37 miles), the terminus of the Cairns railway. It has one hotel, a State school, hospital, Petty Debts Court, one store, and school of arts, with library of 774 vols. It is now connected with the railway terminus by telephone. No place of worship, but periodical services are held by Roman Catholics, and other ministers occasionally visit. Police station and court-house. Water supply is derived from two large dams and several good natural waterholes. Montalbion was supported by the silver-mining industry. The original discoverers were two brothers by the name of Prentice, who sold to Messrs. George Young & Co. The new owners erected smelting works and developed the mines at a large outlay, ultimately disposing of the mine to a company; the works are now closed. About the middle of 1889 silver ore of unusual richness was unearthed at Albion West claim. It was expected to average from 150 to 300 oz. per ton; but on further development it was found there was intrusion of galena in large quantities, disturbing and displacing the richer sulphide ore. The ore could not be treated successfully on the spot, and would have to be sent away for treatment. The township of Muldiva is now nearly deserted. Other smaller places are Red Cap, Daryalong, Kooboora, and Lappa Lappa. An impetus is being given to Montalbion by the discoveries and the developments at Chillagoe. There are enormous copper lodes in the vicinity. Other metals are gold, silver, tin. Formation: granite and porphyry. Population, 485 (census 1891); now about 120.

MORVEN (26° 25′ S. lat., 147° 5′ E. long.), originally called Sadler's Waterholes, is a post town, savings bank, telegraph and railway station on the Western line and Hamburg Creek, originally part of the Victoria Downs run, the head station of which is some six miles distant. It was formerly one of the oldest bush camping grounds for teamsters in this part of the colony. It is in the electorate and police district of Warrego, and lies 427 miles from Brisbane. Hotels: Royal and Victoria Downs, State school (No. 525); Episcopal place of worship, Roman Catholics hold service in the police barracks, and the Salvationists in Burenda Hall; court-house, police barracks, lock-up, two butchers', blacksmith's, and two saddlers' shops, two storekeepers and forwarding agent. The station building serves for post, telegraph, and savings bank offices. Pastoral district. The following stations receive their rations, and forward their wool from here: Victoria Downs, Burenda, Nive Downs, Killarney, Brunnell Downs, and Angellala Downs, all lying north-west of Morven. Morven is the postal centre of a large number of stations, south of Morven, on Boatman Road, a new road having been opened up a distance of 70 miles. Stations on this route are Armadilla, East Tregoning, Ularunda, Clifton Chance Downs, Thirsty Downs, Boatman, Bendena, Bonna Vonna, Elverton and Elmina. Trucking yards are here for sheep and cattle. There is a good road from here to Tambo *viâ* Augathella; distance to Augathella, 61½ miles; Augathella to Tambo, 80 miles; coach runs to Augathella, fare 20s. The water supply is from a large dam fed by the Hamburg creek. Town reserve is 16½ square miles. Population, 114 (census 1891), now about 160. Formation: Upper cretaceous.

MOUNT BIGGENDEN, a receiving office and station on the Maryborough to Gayndah railway, fifty-four miles from Maryborough. The line is now completed and open to Woowoonga, 4 miles beyond. The mine is situated about five miles SW. of Baxter's Hotel, on the Gayndah road, about six miles SSE. of Degilbo head station and about four miles from the Biggenden railway station. The deposit consists of an irregular mass of magnetite, bounded on the north by the slates and on the south by a bed of limestone. The Warden reported: "I should not wonder if this ground is going to turn out another geological wonder, for the whole of the ground seems to abound with different kinds of minerals, especially bismuth, copper, cobalt, gold, &c." The gold-bearing rock in this mine is spoken of as being of great geological interest, being the only body of hornblendic rock in the world being worked payably for gold; the bismuth, too, has been got in treating this rock. During part of 1899-1900 the mine was not worked. Population (census 1891) 69, now about 20 adults. Good agricultural land exists in the district, and a large farming population now obtains.

MOUNT BRITTEN (21° 30′ S. lat., 148° 27′ E. long.) county of Wodehouse, electorate of Normanby, police district of Fort Cooper, a gold-field, situated on Oakey Creek running into Cooper's Creek, which belongs to the watershed of Nebo creek. It is said to have been discovered by Patrick Heenan in 1879, but was first prospected in February, 1881. The field is situated on the Leichhardt, Denham and Connor's ranges. It is about 25 miles NW. of Nebo, and 85 miles SW. from its port, Mackay, with which, however, there is no regular communication. It has a post office, boarding-house (Mount Britten), and Provisional school (No. 404). Several large nuggets have been found in the field, the largest being 69 ounces. Several reefs show good signs, and may probably turn out payable. Several rich patches of alluvial have been found. The gold-field is described as a very picturesque and romantic spot, hills of every shape and colour, conical, dome-shaped and isolated, looking like a huge military camp from the distant ranges. The most promising reefs are the Little Wanderer, the Erratic Star, and the Edith Mary, but the field has gone back very much, and population fallen off. The district is of a pastoral and mining character, abounding more or less in minerals and precious stones—rubies, opals and supposed diamonds have been found. Much of the surrounding country is suitable for agricultural purposes. Formation: volcanic. The Eungella gold-field is 20 miles distant. All vehicular traffic

from Mackay to Eungella passes through Mount Britten. Population (1892) about 100, now less.

MOUNT BUDERIM (or Buderim Mountain), 26° 41′ S. lat., 153° 4′ E. long.), a postal township, with tri-weekly mail communication, 13 miles from Mooloolah, about 40 miles from the Caboolture railway station. There are a school of arts, with a library of 1,112 vols., a general store, two sugar mills (closed), 30 or 40 private residences, and a State school, with an attendance of from 43 to 48. There is also a school for coloured adults. There are two boarding houses, the place being regarded as a health resort. Bananas are the principal production. Sugar, fruit, and oranges are also grown, and coffee, of which there are now large areas planted, promises to be one of the principal crops.

MOUNT MORGAN, a gold-mining municipality in the co. of Raglan, electorate of Fitzroy, and a police district, with post office, money-order, savings bank and telegraph office, at the head of Dee River, 28 miles SSW. from Rockhampton, and the site of the famous mine believed to be the richest deposit of gold in Australia. The mine is at the summit of the Mount, and originally formed part of a selection belonging to a man named Donald Gordon, by whom it was sold to Messrs. Frederick, E. G., and T. S. Morgan (brothers), at the rate of £1 per acre, in all £640. A co-partnership was formed, and the mine worked. The interests in the property several times changed hands, and eventually the whole was merged into a Limited Liability Co., with a capital of £1,000,000, in one million shares of £1 each (17s. 6d. paid up). These shares are now valued at £5 10s. Gold occurs here in a formation in which it has never hitherto been recognized, the greater part of the mount being "a mass of drusy ironstone and siliceous sinter." The gold is of unusual fineness and unprecedented purity. The place of deposit is the centre of an extinct hot spring or geyser. Large yields of gold have already been made from this mine, the gold, which is the richest native gold yet found (assaying, 99·7), having been extracted from the stone at from 2 oz. to 12 oz. to the ton. The so-called reef is 600 feet long by 300 feet wide, and of unknown depth. The original works have been largely augmented, and there are extensive chlorination works. The new mundie works are now completed. Water is at present obtained from four large dams on the Dee River. One of them has a capacity of 227 million gallons, and from this the municipality has the right to draw the water supply of the town. The yield from the mine for the year to 31st May, 1900, was 187,352½ ozs. of a total value of £748,918 19s. 3d. Dividends were declared to the amount of £350,000. During 1899, 2,000 hands were employed. Large works have been added, by which low grade ore can be treated at a minimum of cost. The works are erected on the side of a hill, and the material treated goes from one process to the other by means of gravity. On 26th November, 1898, railway communication with Rockhampton was established. A line was built from Kabra to the Mount on the guarantee principle. This line crosses the famous Razor Back Range by means of the "rack-rail" system with Abt locomotives, the grade in some places being 1 in 16. This, together with the now proved permanent character of the Company's mines (shares are now at £5 10s. 0d.) is causing the town to progress even more rapidly than it has done in the past. A large population has now settled around the mine, and a town of some size has sprung up, having a branch of the Bank of North Queensland, Queensland National Bank, three State schools, School of Arts with library of 2,000 vols., and stage well found in scenery and appointments. Anglican, Primitive Methodist, Wesleyan, Presbyterian, Baptist, Salvation Army and Roman Catholic places of worship; police barracks and court-room. A new court-house of brick and cement has been erected, and new police quarters are completed. Hotels: Leichhardt, Calliungal, Queensland National, Sunburst, Mountain View, Imperial, Metropole, Great Northern, Railway, Champion, Miners' Arms, Australian and Central. Several stores and tradesmen's premises, Foresters' hall, and Oddfellows' hall. Clubs: Turf, Rifle, Cricket, Polo, Football, Hurling, Bicycle, Tennis and Golf. A system of electric lighting and gas for the town are projected. A splendid sanitary system, including cremation works, has recently been initiated. Newspapers: *Mount Morgan Chronicle, Mount Morgan Herald, Truth* and *Argus*. It is now a municipality (proclaimed May 22, 1890). Area, 4 square miles; 14 miles of streets, 1,100 dwellings; ratable property, £166,755. Population (census 1891), 3,514, now about 7,000.

MOUNT PERRY (25° 13′ S. lat., 151° 41′ E. long.), for some time called Tenningering, but now known by its old name, is a postal centre, 200 miles NW. of Brisbane, comprising the townships of Fife Barnett and Tenningering. It is in the county of Bowen, police district of Tenningering, and electorate of Burnett, and is situated on Sunday creek, at the foot of the mountain whose name it bears, about 67 miles by rail, inland from the port of Bundaberg; 110 miles from that of Maryborough, and 200 miles NW. of Brisbane. The district is of an auriferous, pastoral, and cupriferous character, principally the latter. There is a great extent of mineral country, containing vast deposits of iron, copper, gold, silver, lead, and coal, within a radius of 60 miles; much of this is practically unexplored. The largest of the mines is the Mount Perry Copper Mine, which employed, when in full work, from 70 to 100 men. The development of the auriferous reefs at Reid's Creek has not been attended with the success expected. The places of worship are a Wesleyan chapel and a Roman Catholic church (St. Patrick's), only occasionally used, the visiting priest residing at Bundaberg. Services are occasionally held by visiting clergymen of the various denominations, while a regular Episcopal service is conducted by a lay reader. Hotels are Royal, Club, and Commercial. The public buildings are comprised in court-house, police quarters, and lock-up, a hospital, a primary school (No. 75), a school of art, post and telegraph office, railway station and Perry divisional board's office (formerly the old court-house). There are money-order, telegraph and savings bank facilities in the township, four stores, and several tradesmen's premises —blacksmiths, wheelwrights, bakers, butchers, and a chemist. Coaches ply to Eidsvold gold-field, fare 25s. The water supply is derived from Sandy Creek. Formation: granite and schist. Population of Mount Perry and Fife Barnett townships, 351 (census 1891). Discoveries of bismuth, silver, and gold have been made about 30 miles from the town.

MOURILYAN, a receiving office on the South branch of the Johnstone River, about 880 miles N. (by sea) of Brisbane. It is a fine harbour on the eastern coast, the entrance to which has been improved by dredging to a depth of 14 feet at low water for a width of 100 feet. It is intended to further deepen the channel. The steamers of the A.U.S.N. and Adelaide S.S. Cos. find no difficulty in entering and leaving by the improved channel. During the crushing season the large steamers of the latter company call at the harbour. Much sugar has been grown in the neighbourhood, and the Mourilyan Sugar Company's plant is of a very complete character, the cane being conveyed to the mills by trucks and locomotive power. The plantation is about 7 miles distant, and is reached by train line. The scenery of the harbour is described as being very romantic. Population, 50 Europeans, 250 Asiatics.

MULDIVA, a silver mining locality in the Herberton district, about 60 miles from Mareeba, the present terminus of the Cairns railway. The fall in silver has resulted in the closing of both mine and smelting works, and the place is now almost deserted, the late residents having removed to Calcifer, better known as Chillagoe, where smelting works have been erected.

MULGRAVE (19° 45′ S. lat., 147° 15′ E. long.). The Mulgrave gold-field is composed of the Upper Camp and Goldsborough, the latter being 26 miles from Cairns, and the former 6 miles farther. Upper Mulgrave consists of two stores, a residence, and a few humpies and tents scattered about. In 1899 the Warden reported that "the prospects of the field were anything but bright." The locality is healthy, and abounds in fine agricultural soil. Population, 46 (census 1886); now 75.

MURPHY'S CREEK (27° 30′ S. lat., 152° 10′ E. long.), a postal, telegraph, and money-order township, savings bank, and railway station, on the creek from which it takes its name (a branch of the Lockyer), 82 miles W. of Brisbane, 788 feet above sea-level. It has one hotel— Railway, and a store; State school (No. 76), a commodious railway station, and Presbyterian, Wesleyan, and Catholic places of worship. Farming and grazing land in the vicinity

MUTTABURRA (22° 36′ S. lat., 144° 31′ E. long.), a post town, with money-order and savings bank office, and telegraph station, in the county of Cumberland, electorate of Mitchell, police district of Muttaburra, on the western bank of the Thompson River, 53 miles NW. of Aramac (70 miles N. of Longreach), fare 25s., about 98 miles from Barcaldine Railway Station, to which a coach runs weekly, fare 30s.; and about 810 miles NW. from Brisbane. Bank: Queensland National Bank. Hotels: Mount Cornish (Cobb and Co.'s office), Australian, Tattersall's, Royal Mail, and Landsborough. It is pleasantly situated, and likely to be of importance, as it is on the high-road, north and south, for all travelling stock, and in the centre of a large tract of good pastoral country, composed of black soil plains and sandy ridges. State school (No. 304), court-house (in which divine service is held), police barracks, police magistrate's residence, Roman Catholic church, post and telegraph office, hospital, and two principal stores. The water supply is from the Landsborough and the Town Dam. At Sardine Creek, on the road to Aramac, 20 miles SE. from Muttaburra, is the Union Hotel. At 30 miles S., at Camoola, is the Camoola Hotel, on the road to Longreach. Population, 412 (census 1891). Principal stations in the neighbourhood are Bowen Downs and Mount Cornish.

NAMBOUR, a rising township on the north coast railway line, 65 miles from Brisbane, in a rich agricultural district. Sugar is largely grown in the vicinity, and a sugar mill has been erected on the outskirts of the town. Population about 200.

NANANGO (26° 41′ S. lat., 152° 1′ E. long.), a money-order, telegraph, savings bank, and post town, in the county of Fitzroy, electorate of Burnett and Nanango police district, about 130 miles NW. of Brisbane. It is situated on Sandy Creek, an offshoot of Barambah Creek, which is a tributary of the Burnett River. Bank: Royal. Hotels: Commercial and Star, a court-house, police quarters and lock-up, post and telegraph office, School of Arts, with a library of upwards of 1,172 vols., a primary school (No. 77), and seven Provisional schools in the outlying centres, a Roman Catholic chapel (St. George's), Presbyterian Church, an Anglican church (resident Minister), a large boarding-house, two steam saw-mills, two blacksmiths' shops, two butchers' shops, two bakers, and two stores. Sale yards covering 5 acres of land have been erected by a company, at which sales are regularly held. There is also a hospital with resident wardsman and matron, and medical officer in attendance. Mails run from here to Cresselly *viâ* Taabinga, Booie, and Kilkivan. The Nanango Diggings are situated in the scrub, about one mile North of East of the township, on the Burnett fall of the Brisbane range. The Seven Mile Diggings are about 7 miles SE. on the Brisbane side of the range. Gold has been discovered at various places near the township of a superior quality, but is only imperfectly worked. At Cooyar

Creek a small quantity of very rich gold has been found. Not far from here plumbago has been found. Gold-mining has been carried on about 2 miles to the eastward, also at a place on Taromeo and Cooyar, 7 miles to the S. of Nanango. At the Two Mile there is a lode of about 20 feet, full, it is said, of rich leaders; at the Seven Mile reefs prevail, having outcrop of poor antimony. The communication with Brisbane is by coach twice a week to the Esk Railway Station (63 miles); fare, 20s. A coach also runs to Jondaryan (65 miles.), and another coach to Kilkivan once a week. The Nanango Jockey Club holds its annual meeting here. The district is a mining, agricultural, and pastoral one. The breadth of land under tillage is increasing. The Divisional Board of Nanango meets here. The Board have erected a hall for their own use and for public purposes. The Taromeo head station is 17 miles from Nanango. The Nanango station is 2 miles distant, Taabinga 18 miles, Tarong 13 miles, Barambah 28½. From Nanango to Mount Stanley, on the Brisbane River, by marked tree line is 14 miles. All roads in the district have been properly chained, and the miles legibly marked on tin plates affixed to trees. Formation: hard sandstone, quartzsites, and slates; immediately south of the town a grey granite occurs. The district is reported as being selected very freely for homestead and grazing farms, many of the selectors being Germans. It is stated that over 200,000 acres of land have been selected during the last two years, and the demand still continues. It is expected to become a great fruit-producing district. Oranges, almonds, apples, and grapes grow in profusion. The timber, consisting of cedar, yellow-wood, hardwood and pine, cannot be surpassed. Population, 274 (census 1891); that of the district has been increased by persons who have taken up land. Newspaper: *Nanango News.*

NEBO (21° 41′ S. lat., 148° 44′ E. long.), a small township with money-order office, savings bank, post and telegraph station, on the creek of the same name which falls into the Connors River, at the extreme north of the Leichhardt district, in the co. of Wodehouse, electorate of Normanby, police district of Mackay, 75 miles (postal) from Mackay SW., and about 636 miles (612 by telegraph route) from Brisbane, NW. Coach runs between Eton and Nebo (45 miles), twice a week, fare 20s. There is one hotel, Fort Cooper, a provisional school (No. 184;) one large store, police barracks, and Divisional Board room, but no building of any note. The district is principally of a pastoral character. Gold has been found in the neighbourhood at a locality known as Mount Britten. The Mount Gotthard mine lies about 40 miles NW. The Mount Orange mine is about 30 miles S. The country immediately surrounding Nebo has been laid out in grazing and agricultural farms. Several grazing and agricultural farms have been taken up on the resumed portion of Fort Cooper runs North and South; of the grazing farms, three are stocked with sheep, three with cattle, two with horses and two with horses and cattle. The Mount of Fort Cooper is about 10 miles distant. Population, 63 (census 1891).

NERANG (27° 58′ S. lat., 153° 23′ E. long.), a small township, in the county of Ward, electorate of Albert, police district of Nerang, situate on the Nerang River. Communication with Brisbane daily by rail; distance, 49 miles (44½ by telegraph route), SE. Has post, telegraph, and money-order office, Government Savings Bank, Court-house, State school (No. 218), Church of England, Presbyterian and R.C. Church, School of Arts, with library of 631 vols., several stores. Hotels: Queen's, Star. A coach runs to the Tweed River. Nerang is the head-quarters of the Nerang Divisional Board, and also of the Southern Queensland Agricultural Society. Sugar, maize, cattle, and timber are the products of the district. There is a State school at Tallebudgera (No. 201). Population, 268 (census 1891).

NEWELTON, county of Cardwell, electorate of Woothakata, so named after Mr. James Newell, is a mining locality on the Dry River, about 10 miles from Herberton and 8 from Watsonville, where silver ore has been found in large quantities. The revival of the copper market gave an impetus to mining in this locality, many of the mines changing hands, being taken over by southern investors. Mining district—silver, copper, and tin.

NOOSA. *See* TEWANTIN.

NORMANBY, a gold-field originally opened in 1872, about 60 miles due south of Bowen, with a weekly mail coach service. The road thereto is very rough and steep, having to cross a range about 2,000 feet high. In the township are a store, three butcheries, and other tradesmen's shops. In September 1892, the field was visited by Mr. Jack, the then Government Geologist, who reported that the stone in the reefs was small and the working unremunerative. The character of the reefs as true fissure veins had been sufficiently demonstrated, and he believed they would improve when sunk lower. The Warden, early in 1900, was able to say that though no stone had been treated during the year, yet, as a matter of fact, the prospects of the field were better than they had been for some time, southern capital having been introduced. The principal claims are the Grace Darling and the Albion. Population, 117.

NORMANTON (17° 39′ S. lat., 141° 9′ E. long.), county of Normanton, electorate of Carpentaria, a town with telegraph station, money-order office, and Government savings bank, and a port of entrance and clearance, situated on the banks of the river Norman about 25 miles from its mouth by land, and 50 miles by water, near the shores of the Gulf of Carpentaria, about 1,382 miles NW. of Brisbane by land, but much farther by sea. The river has a very tortuous course from the sea to the town, where navigation ceases. The minimum depth on the bar of the Norman River is 5 feet. Mr. E. A. Cullen surveyed the river between Baffle Group and Normanton in 1888. He reports that there are eight shoals, for the most part rocky, with not more than 2 feet of water over them at low water springs, and that on account of the cost of improving the navigation it would be unwise to hold out any hopes of improvement in the immediate future. He suggests that the Red Bluff, with which some 18 miles of railway would connect Normanton, would be a suitable shipping terminus. A site, Port Norman, has since been chosen. The lightship, formerly stationed at the Brisbane River bar, is now placed off the entrance to the Norman River. Port Darwin is about 900 miles distant. The Queensland National Bank and the Bank of New South Wales have each established branches here, in substantial buildings, a substantial school house (No. 360), with teachers' residence, court-house and lands office, a Customs building and post and telegraph office, several stores, and eight hotels, Heley's, Imperial, Central, Albion, and others. Normanton has a large and handsome School of Arts, with library of 2,000 vols., and a Roman Catholic church, a Church of England and Wesleyan church (the last closed). The Normanton Jockey Club has its meetings here. It is the outlet for the Cloncurry gold and copper mines, and also for the Etheridge and Croydon goldfields. There is an acting police magistrate, who is also Subcollector of Customs. A C.P.S. also acts as Lands Agent, Normanton being the headquarters for Lands office in the Carpentaria district. The township is reported as healthy. Water supply is derived from surface wells at present, but an artesian bore, giving a good supply (300,000 gallons per diem) has been sunk. The Carpentaria district, of which Normanton is the capital, is growing in population, and promises to become in a few years one of the largest sheep and cattle producers in the colony. Normanton, on February 6, 1886, was formed into a municipality, having an area of 20 square miles, 130 dwellings, 20 miles of roads, and property of the ratable value of £30,960. Mr. George Phillips considers that no unimproved river in Queensland, except the Batavia, can compare with the Norman for depth and clearness of channel up to the head of navigation. A short distance from the mouth, the river, turning to the SW., forms a magnificent land-locked harbour, three miles long by half a mile wide, with plenty of room and depth of water for almost any number of vessels to anchor, while on the N. head of the river (Karumba) there is rising ground for fortifications. A railway from Normanton to Croydon was opened for general traffic in July, 1891. The Government favour an extension of the line to the Etheridge. It is also expected that a railway will be constructed from Port Norman to Normanton and Cloncurry, a private company having applied for powers to construct. Normanton is situated on high ground, consisting of ironstone gravel ridges, which continue in a NW. direction for about 1½ mile from the township, when a low flat occurs. The large steamers of the A.U.S.N. Co. and the Northern Steamship Company ply between Normanton and Brisbane. The country immediately around Normanton is reported to be of the poorest description, but there is good agricultural land at certain places that could be turned to account if water were available. There are meat works capable of treating 100 head per diem. Formation: Ironstone above old desert sandstone, with cretaceous commencing 12 miles south of the town. Population, 1,251 (census 1891), now about 650. Newspaper: *The Normanton Chronicle.*

NORTHCOTE (16° 54′ lat., 145° 3′ E. long.), a mining township and receiving office, on Leadingham Creek, a tributary of the Walsh River, 16 miles E. of Thornborough, on the Cairns road (the main dray road from Port Douglas to Thornborough passes through Northcote), and about 16 miles from Mareeba railway station. Within a few miles there are several homesteads occupied by families, also a number of Chinamen's gardens. It has one hotel (Winfield's Antimony), one store, Provisional school, and a post-office. Lodes of antimony have been discovered in the district, some of them situated within a mile of the township. One of the first reefs taken up on the Hodgkinson was by McLeod and party in this district. A Five-head quartz crushing mill is erected near the township. The miners say there are several reefs which would pay well if properly worked. Formation: Slate sandstone diorite; Elvan dyke running through Northcote range. Population, 29.

NORTH PINE (27° 16′ S. lat., 153° E. long.), (county Stanley, division of Redcliffe), a post town with money-order office, savings bank, telegraph and railway station, on the North Pine River and North Coast Line, 17 miles from Brisbane. Public school, No. 183, police station, and court-house. School of arts, with a library of 428 vols. Hotel: North Pine. Episcopal, Presbyterian, and Wesleyan places of worship; Masonic and W.C.T.U. lodges. Factory for making of churns and dairy utensils here. Coach runs from here to Redcliffe. Good farming, grazing, dairying, and timber-getting district. Population about 600.

NORTON (24° 20′ S. lat., 151° 16′ E. long.), a mining township, in the county of Clinton, electorate of Port Curtis, Gladstone police district, situate on Wattle Creek, a tributary of the Boyne River, about 36 miles SE. from Calliope, and 400 miles NW. from Brisbane. A mail coach runs to Calliope, 10s., and to Gladstone, 15s. A receiving office, school of arts, with library of 324 vols., provisional school (No. 393), and police barracks. Cheese is made in the district. The reefs here are the "Who'd 'a' thought it," the "Advance," "Frampton's United," "Goody's," and the "Never, Never." Formation: slate and granite. Population, 101 (census 1891), now 35.

NUDGEE (27° 24′ S. lat., 153° 4′ E. long.) is a small settlement, with post and telegraph station, about nine miles from Brisbane, and contains a State school (No. 48), Roman

Catholic orphanage (St. Vincent's), and German Lutheran church. The train to Sandgate stops about two miles from the centre of the village, which is noted for the production of pineapples.

NUNDAH, a railway station, with post, telegraph, and savings bank office, on the Sandgate line, 5 miles from Brisbane. It is the site of the Moravian Mission established many years ago for the Christianizing of the aborigines, but the labours of the missionaries were not marked by great results. There are here two hotels, a good primary school, several stores, churches belonging to the Anglican, Baptist, Wesleyan and German Lutheran denominations, and large carriage works; on the surrounding heights are some really handsome private residences. Nundah is also the centre of the pine-apple growing industry.

OAKEY CREEK. *See* KINGSTON.

ONE MILE. *See* GYMPIE.

OPALTON, a principal centre of the opal industry, which extends over an area of some 30 by 50 miles; about 30 claims being worked when water is available. During 1899 about £6,000 worth was the yield, much of it being sold on the field to southern buyers. About 80 miners are employed in the industry. Communication is by the Longreach railway station, thence coach about 130 miles.

OXLEY (27° 33′ S. lat., 152° 57′ E. long.), a post town, telegraph, and railway station on the S. and W. Railway, eight miles S. of Brisbane It lies 63 feet above sea-level. It is in the county of Stanley, electorate of Oxley, and police district of Brisbane. The post-office is at the railway station. Hotel: Coach and Horses. There are two stores and a butcher's shop. State school (No. 79), also a State school at Seventeen mile Rocks (No. 98), about two miles distant. Police station here. Episcopal church. Oxley Creek is about half-a-mile distant, and the Brisbane River the same. The water supply is derived from Lucock's reservoir, and from a spring which has been utilized on the main Oxley road, whence an apparently inexhaustible supply seems available. There is also a mineral spring. The river at about 4 miles distance was spanned by a fine iron bridge, called the Albert. It consisted of eight lengths of girders resting on massive freestone abutments, and supported by piers of cast-iron cylinders, 8 feet in diameter, but in the terrible floods of February, 1893, the greater portion was swept away. It has now been replaced by a bridge of entirely new design consisting of 2 spans of 340 feet each, supported by a massive and substantial centre pier of stone and concrete. The district is an agricultural one. The extension of the line from between Oxley and Sherwood to South Brisbane was opened for traffic June 2, 1884. Population about 300, with vicinity (census 1891), 7,799.

PALMER (16° 4′ S. lat., 144° 20′ E. long.), a gold-field in the northern part of the colony, about 961 miles NW. of Brisbane, and about 120 miles SW. of Cooktown, by road *viâ* Byerstown (96 miles by direct route). These diggings were discovered about the middle of 1873 by Mr. James V. Mulligan. A large digging population was drawn thither, and much gold raised. Tin also has been found in quantities, and will pay handsomely for working when there are better means of transport. The tin is principally found on Granite Creek waters, where, in the form of stream tin, it occurs in association with gold. The quartz reefs are believed to be remunerative, were capital for their development forthcoming. There are, it is estimated, 100 well-defined reefs on the Palmer, the auriferous ground extending over 2,040 square miles. The gold is very pure, averaging an assay value of £4 to the ounce. In 1899 769 tons of quartz were crushed, yielding 1,225 ozs. of gold, an average of 1 oz. 11 dwts. 21 grs. to the ton. About 1,215½ ozs. were also won from the alluvial. Since the opening of the field the yield of gold to December 31, 1899, has been 1,359,349 ozs. Gold in quantity was appearing in the Conglomerate range, about 12 miles from Maytown, and the locality was examined by Mr. J. Mulligan, but the results did not fulfil the expectations. However, a considerable quantity of gold was obtained by the pioneers, and a competent authority believes that the "caps" and sheets of conglomerate on the north-eastern slope of the main range cover auriferous deposits, which has been proved by several "patches" being found by tunnelling under the "caps" 800 feet above the bottom of the gullies. An experienced miner writes regarding these diggings that "the geological evidences betoken a regular formation of gold-bearing rocks, extending in a northerly and southerly direction for some hundreds of miles." Palmer is reached from Cooktown by the railway to Laura station, thence the coach. Palmerville, or Lower Camp, was the dray terminus when the field was first opened. Maytown is the postal centre of the gold-fields. In the vicinity are coal-measures, extending from a point on the Cooktown and Palmerville Road, about 19 miles from Palmerville, for 6 or 7 miles northward down the valley of the Little River. They were discovered in 1872 by Mr. N. Taylor. Mr. Jack, the late Government geologist, has reported on the field. The surface-coal is not equal to the Newcastle, but it was expected to improve at a lower depth. The geological features of the field comprise: Clay, slate, sandstone, metamorphic granite, conglomerate, limestone and basalt. In the clay, slate, and sandstone the richest reefs and alluvial deposits have been found. In February, 1887, he again visited this field, but owing to the floods the examination was a cursory one. At the lower depths he believes gold will yet be found in quantity. "It would not surprise me if the gold yet to be derived from deep leads below the desert sandstone should greatly outweigh the poor four or five millions worth taken from the modern valley." In 1884 the boundaries of the Palmer field were amended; it now comprises the whole of the watershed of the Palmer River above its junction with the Mitchell River, and the watershed of the West Normanby River above the northern watershed of Isabella creek. Some reefs were laid off in October, 1887, by the Warden, at Limestone Creek, which flows into the Mitchell River southerly from Maytown, and distant about 35 miles. These did not come up to expectation, and would probably be abandoned. Population, including Limestone, in 1898, 746, of whom 480 were Chinese.

PALMERVILLE (15° 56′ S. lat., 144° 8′ E. long.), is about 20 miles W. from Maytown. It had public-houses and stores, but is now nearly deserted. It is the spot where gold was first discovered on the Palmer River by Hann. Independently of its auriferous resources there is a wide area of good agricultural land in the surrounding district. Population principally Chinese.

PALMWOODS, a railway station and small township on the north coast railway, 60 miles from Brisbane. On the spurs of the Blackall ranges, in close proximity, strawberries are grown and forwarded in great quantities to the Brisbane, Sydney and Melbourne markets.

PARADISE. The Paradise gold-field is situated on the S. side of the Burnett River about 8 miles NW. of Degilbo station, and 2 miles below the mouth of Tarrabil Creek. It is in the electorate of Burnett and Burrum Division. Gold was discovered here in reefs about June, 1889, by Messrs. Allen and party. The reefs extend back for a distance of 2 miles from the Burnett River, and are situated on the steep ridges which lie between Scrubby or Paradise Creek and Finney's Creek. The site of the township is on the alluvial flat which fringes the river. During 1899 396½ tons of quartz were crushed for 385 ozs. 15 dwts. 6 grs. of gold; 40 ozs. were got from alluvial and 49 ozs. from tailings and concentrates. It has a post-office, three hotels—Paradise, Pioneer Club and Commercial; Provisional school, court-house, Warden's office and some tradesmen's shops. Divine service is held in the mission and public halls. Two lines of coaches run to Woowoonga, the nearest railway station (about 15 miles). Formation: Mostly metamorphic slate and granite quartzitic. Population (census 1891), 320, now 226.

PENTLAND (formerly known as BETTS CREEK) (20° 33′ S. lat., 145° 25′ E. long.), distant 148 miles from Townsville on the Northern Railway, is a mining township, in the electorate of Kennedy Cape River District, on Betts Creek, 6 miles from Capeville, and 7 miles SE. of Norwood, comprising three hotels: Sportsman's Arms, Pentland and Railway, three stores, one butcher, a blacksmith, a saddler, a wheelwright, cordial factory, provisional school (No. 467), court-house, police quarters, about 40 private residences, goods shed, and station buildings, in the latter post and telegraphic business is conducted by the station-master. Large trucking yards for horses and cattle have been erected. The Georgetown mails leave here weekly, and there is a good deal of traffic on this route and to the Etheridge. It is the centre for railway communication to the Lower and Upper Cape gold-fields, Lolworth, Milray, and several other cattle stations. Several good reefs have been discovered from two to three miles N. of this, these have a favourable appearance. Mill timber of a superior quality is found here, which is trucked to Charters Towers. The water supply is derived from the creek and a dam erected by the Dalrymple Divisional Board. An alluvial gold field has been discovered about midway between Lower Cape and Pentland. Population, 131 (census 1891).

PERCYVILLE or PERCY RIVER, a gold-field township on the Percy Creek, in the county of Gilberton, electorate of Burke, 28 miles N. of Gilberton, about 80 miles from Georgetown S., and 260 miles W. of Townsville. It has one hotel, Percy, two stores, a butcher's shop, police barracks, and court-house. There are a few working reefs six miles down the river, and some alluvial six miles or so up the river. Formation: Slate and granite. Population, 30.

PIALBA (25° 22′ S. lat., 152° 46′ E. long.) is a watering place, with a post and telegraph office, on the shore of Hervey Bay, county of March, electorate of Wide Bay, and Maryborough police district, 22 miles (by road) north of Maryborough (with which it is now connected by rail), the citizens of which town and Gympie make Pialba their favourite summer resort. The climate is reported to be very salubrious and pleasant, the maximum shade temperature in summer (February) being only 89°, and the minimum temperature in winter (July) 37°. It has, facing the beach (which is described as being for eight miles splendid hard beach, sufficiently wide for six buggies abreast), State school (No. 419), a police-station, Catholic and Undenominational churches, four stores, two blacksmiths' shops, four good hotels, one butcher's shop, and a bakery. There is abundance of fishing. A long sandpit runs out across the bay, keeping out sharks and making bathing in the open sea safe at all times. The hard beach lies between Point Vernon on the west of Pialba to Urangan Point on the east. The Urangan end is known as Torquay, where there are a number of small houses. There are large and handsome villas at Point Vernon, and there is a splendid carriage drive of four miles. Sugar-growing is cultivated in the neighbourhood. Population, 118 (census 1891), now with vicinity about 500, among them many Danish farmers, who reside on the tract of rich agricultural country stretching along the coast here. Sugar growing is making great strides, over 5,000 acres being now under cane, and this area, it is expected, will soon be doubled. The tested sugar contents of Pialba cane is the highest in Queensland. There is a coffee plantation. The local societies are the Farmers' Association and an ambulance transport brigade.

PIMPAMA (27° 51′ S. lat., 153° 14′ E. long.), a small township and railway station on Hotham Creek, in the county of Ward

Albert electorate. Has receiving office, a State school (No. 81), Methodist chapel, school of arts, with library of 653 vols. Is the centre of the Queensland arrowroot and cornflour manufacture. Wine is also made. Communication with Brisbane by rail, distance 34 miles. There is a good road from Brisbane, which is much used by cyclists. Population, 42 (census 1886); of town and district about 300.

PINE HILL (23° 39′ S, lat., 146° 59′ E. long.) is situated about 2½ miles to the eastward of the Belyando river, 251 miles W. of Rockhampton, in the electorate of Leichhardt and Clermont, police district of Barcaldine. It has a post and telegraph office. The railway buildings comprise passenger station, and station-master's house. Provisional school (No. 413), Episcopal church. Pine Hill was composed to a considerable extent of what was once Bogantungan, the buildings having been moved from one place to the other, and many of these have been removed to Barcaldine. Population about 45. Pastoral district.

PITTSWORTH (27° 42′ S. lat., 151° 38′ E. long.) (formerly BEAUARABA), a post town, in the county of Aubigny, electorate of Cambooya and Darling Downs central police district. It has a savings bank office, and is a telegraph, money-order and railway station. It is distant 137 miles from Brisbane, and 36 miles from Toowoomba, and is the present terminus of the Railway. It has a State school (No. 373), court-house, lock-up and police barracks, branches of the Queensland National and Union banks, five hotels—Beauaraba, Railway, Union, Royal and Grand; Anglican, Wesleyan and Roman Catholic churches, Salvation Army barracks, three auctioneers, six stores, four blacksmiths and wheelwrights, aërated water factory, two shoemakers, two saddlers, two fruiterers, boot factory, two butchers, jeweller and cabinet maker, and other tradesmen, one soap factory, and one cheese factory. Newspaper: *Pittsworth Herald*. There are two branches of the Masonic body, and lodges of Rechabites, Hibernian and Protestant Alliance organizations. The district is an agricultural and pastoral one, with deep black soil. Good coal is found in several places. The principal sheep stations in the vicinity are Felton, Yandilla, St. Helen's, Pine creek, and Lemon Tree. Coach runs to Hermitage, Brookstead, Yandilla, Lemon Tree, and Pine Creek. Population: town, 600; town and district, 3,000

POINT PARKER (17° S. lat., 139° 25′ E. long.) is situated on the shores of the Gulf of Carpentaria, to the southward of the Wellesley Islands. The anchorage is between Allen Island and the mainland. At spring-tide vessels of any depth could enter the harbour, and berth at low water in the "Basin," within a mile of the shore. At low tides, steamers of ordinary draught can enter. It was the proposed terminus of the Trans-Continental railway. Geographically it is said to be a most suitable position for a shipping port for the wool from the Diamentina, Flinders, Burke, Herbert, and Lorne Rivers, and Buchanan's Creek; and for fresh meat from the Cloncurry, Leichhardt, Gregory, and Nicholson Rivers. Many thousands of cattle are already depastured on the latter rivers. According to Mr. Hann, "Point Parker is a series of sand ridges, which continue on each side for miles; these ridges are intersected by springy flats, which form a small creek running into the sea about four miles on the east side of Point Parker. The ridges are covered with pandanus trees, a sure sign of abundance of water being obtainable by sinking. I consider the Point has all the facilities for a large town being formed thereon."

PORT DOUGLAS (16° 30′ S. lat., 145° 28′ E. long.), co. Cook, parish of Salisbury, Woothakata electorate, lies about the centre of the coast of Trinity Bay, 40 miles distant from Cairns, NW. Cooktown is 70 miles N., and Townsville about 164 miles SE.; the distance to Thornborough is about 56 miles, and to Herberton about 80. There is weekly steamer communication with Brisbane, and also with Townsville. A good road leads to the Hodgkinson and Herberton. Hotels: Exchange (a two-story building), Court-house, North Australian, Caledonian, Queen's (a two-story building), Mossman, O'Brien's, Exchange, Royal and Mount Pleasant. It received the name of Port Douglas after the Hon. John Douglas, Government Resident at Thursday Island. It is situated on Island Point, about six miles north-west of Mowbray River and ten of White Cliffs. The "Point" is a long, high grassy hill or peninsula, 190 feet high (being surrounded on three sides by water), projecting a considerable distance into the sea to the eastward; to the northward of which, and protected by it against south and south-easterly gales, is the entrance to Dickson's Inlet. The latter has a depth of between 7 feet and 8 feet on the bar at low water, and inside, and for at least three miles up, a channel wide and deep enough for large ships to float and turn. An uninterrupted deep-water channel continues for three miles still higher up, but narrows greatly beyond that point. The Inlet is entirely an arm of the sea and affected by the tide to its furthest extremity inland. The main street, called Macrossan Street, extending from beach to beach, having the sea at one end, and the waters of the harbour at the other, lies at the bottom of a hill, and is for the most part lined with buildings. The beach at the far end of the town is magnificent. It extends for about five miles along the coast, is fringed with beautiful green scrub, and the sand is white and hard under foot. There is a sand bar which has been dredged to enable vessels to come up to the wharves. The cutting is 80 feet wide to 8 feet below low water, and extends from deep water outside to deep water inside the bar. The present anchorage is about 100 yards from the shore, and landing is effected by a jetty. The Inlet is to be dredged, when the channel will be deepened and a swing basin made to allow the steamers to come up to a wharf at the foot of Macrossan Street. There are here a custom-house, money-order office, post and telegraph, police station, pilot's residence, court-house, Lands office, and Government Bond store, a substantial Roman Catholic church, Church of England (St. Andrew's). Banks: Queensland National, and Government Savings Bank. Primary school (No. 334), school of arts (with library of 450 volumes), and hospital, a substantial building of hardwood, to contain 30 beds, to which is attached a residence for the surgeon. Masonic and Oddfellows' lodges are here. The extension of the Cairns line has been a detriment to the business of the town by diverting it to Cairns, but the establishment of central sugar mills on Mossman River, Saltwater Creek, and the Daintree River, under the Sugar Works Guarantee Act, will, it is believed, again bring commercial prosperity. The Mossman Mill, which is the largest under the Sugar Works Guarantee Act, and which has 22 miles of permanent and 6½ miles of portable tramway attached, crushed 60,000 tons of cane in 1899. A telephone line connects Port Douglas with the Mossman, and a tramway between the two places is being constructed. Port Douglas is the seaport of the Hodgkinson and Etheridge gold-fields, and the Herberton and Tate tin-mines. Mounts Spurgeon, Lewis and Frazer tin-mines, about 22 miles SW. from Port Douglas, are producing a considerable amount of stream tin. Large areas of land have been taken up for agricultural purposes, and under cultivation for corn and fruit, such as oranges, mangoes, and other kinds, which grow in abundance, and are exported to all parts of Australia. Newspaper: *Gazette*. Formation: slate and soft sandstone. Population, 494 (census 1891).

PORT KENNEDY. *See* THURSDAY ISLAND.

QUEENTON, a post town, money-order office, savings bank and telegraph station, in county Davenport, about 1¼ mile from Charters Towers, of which it may be considered a suburb, as the Charters Towers railway station is situated here. Coaches ply to Charters Towers, fare 1s. It has several hotels—Junction, Queen's Head, Railway, Sunburst, and others; State school, Church of England and Baptist places of worship, police station, post and telegraph office, several tradesmen's premises, a foundry, six stores, and quartz-crushing works. It is the chief centre of mining operations, the famous Brilliant mine, also the Victory, Brilliant and St. George, Victoria Carrington, No. 2 Queen, No. 7 North-east Queen, Golden Gate and the Sunburst line, Brilliant Block, Great Eastern, and other mines which have proved themselves to be among the richest in North Queensland, are here. The crushing mills are the Junction, Enterprise, and the No. 2 crushing mill, also the North Queensland Smelting and Gold Extracting Company. Population, 2,060 (census 1891).

RANNES, a settlement on the Woolein Creek, 43 miles from Westwood Railway Station, on the mail route between Taroom and Westwood. Coach passes, fare 20s. It has one inn, Rannes, two boarding houses, two stores, a butcher and baker. As a gold-mining locality, the expectations have not been realized. Population about 100.

RAVENSWOOD (20° 5′ S. lat., 146° 54′ E. long.), a mining township, with money-order, savings bank, and telegraph office, about 770 miles NW. of Brisbane, in the county of Gladstone, electorate of Kennedy, situated on the watersheds of the Connelly and Elphinstone Creeks, tributaries of the Burdekin River, and the Northern Railway, being the terminus of the branch line from Ravenswood Junction. It is 50 miles distant from Charters Towers, E., 78 from Townsville, S., and within 12 of the Burdekin river. Public-houses: Ravenswood, Royal, Commercial, Exchange, Miners' Arms, Tattersall's, and Railway. Ravenswood owns a court-house, a police barracks, post and telegraph office, a hospital, a school of arts, with a nice hall, good library of about 1,279 volumes, and reading-room, a private hall used for Oddfellows, Foresters, and Masons, and a State school (No. 141). The school buildings are good, and crown a hill, being visible for miles. Of places of worship there are the Church of England (St. Paul's), Wesleyan church, and Roman Catholic church and house, with a resident clergyman, and a cottage for the Sisters of Mercy. The Good Templars have a substantial hall. There are also lodges of Oddfellows, Foresters, and Masons. There are nine European stores and about eleven Chinese, three butchers' and one chemist's shops, and branch of the Queensland National Bank. Ravenswood gold-field was opened in 1870, Messrs. Jessop, Buchanan and party being the pioneers in gold discovery; the then run-holders were Messrs. Curr, Carr and Cunningham. The site of the first workings was at a place known as Middle Camp. In 1879 prospectors extended their operations to Connelly's Creek, thence to Nolan's and Jessop's gullies, settling down eventually at Top Camp, the present site of Ravenswood town. The Jessop and Buchanan gullies were the real commencement of the gold-field. The total yield since then to Dec. 31, 1899, has been 523,422 ozs. The deepest shafts are the John Bull G.M. Co., General Grant, the Politician, the Black Jack, the John Bull block, and the Sunset. At the water level mundic, from which it is most difficult to separate the gold, is found in abundance, which would give handsome returns if the gold could be extracted at a nominal figure. The great drawback to the gold-mining industry has been the intractable nature of the mundic, and the great cost and incomplete results of local treatment. Several dredging areas on the Lower Burdekin have been taken up. During 1899 the yield of gold, including alluvial, was 25,697 ozs. There was, the Warden reports, a marked progress in development work. Cyaniding was largely extending, and several new works had been erected. "The outlook," he said, "is at the present time very good. I have the very fullest confidence in our mines as they are now." There is a mundic extracting works at Ravenswood. There are also two cyanide works, D. McIntyre's

and Peek and Peace's, and another at John Bull Mine. The field is rich in argentiferous ores, and from the great interest centred in them their development was expected to prove the leading industry. Owing to the fall in silver most of the mines have been abandoned. King and party were the first to open the ground. The outlying mining settlements dependent on Ravenswood are—Strathalbyn, 27 miles; Kirk, 20 miles; Rochford, 25 miles, at which place, the reefs are large and the ore is not of so refractory a character; Lower Camp, 16 miles; and Sandy creek. Water is found in abundance at a depth seldom exceeding 25 feet. Formation: granite and trap. The "country rock is grey syenitic granite, in which hornblende accompanies or replaces mica." During 1886 several excellent gal na lodes were found about 20 miles South of Mount McConnell station. Payable alluvial gold has been found in the bed of the Burdekin River between the Twelve Mile Yard and Ravenswood station, and at the Gorge, some 12 miles below the junction of the Burdekin and Suttor Rivers. Population 1,167 (census 1891). Total mining population is now estimated at 2,508. Newspaper —*Ravenswood Mining Journal* (Sat.).

RAVENSWOOD JUNCTION (20° S. lat., 146° 47′ E. long.), a railway, telegraph station and money order office, on the Northern Railway, on the top of the range, 951 feet above sea-level, 54 miles from Townsville, 24 miles from Ravenswood, and 29 miles from Charters Towers. It is in the electorate of Kennedy, and police district of Charters Towers. There are here a small station, goods and passenger-. Close to the line is a small township, which includes two public-houses, North Australian and Railway, two stores, two butchers' shops, and several other business or private houses, a State school, police station and trackers' hut. The line here is remarkable for a combination of very steep gradients and sharp curves, necessitated from the line having had to follow the top of a spur to secure the advantages of an inexpensive ascent of the range, which would otherwise have been a costly and tedious undertaking. The line is found to work admirably, heavy loads being taken up with ease. In recent years the line over the range has been altered. It was formerly 1 in 25; on the new line it is 1 in 50. The new line is one mile longer than the old one. The branch line to Ravenswood joins at the station. A dam has been constructed here to store water for railway purposes and the town's folk. There are several claims working in the vicinity. The Fanning reefs are about four miles off, W. by N., and the Grass Hut diggings about the same distance; both are reported to be looking up, and new claims are being taken up on the former. The small village called Haughton Valley is about 5 miles distant. About 40 miles distant is the Dottswood Freehold Mine (copper), which is now (1900) being worked. Some dairying was carried on in the locality, but drought and the tick pest are reported to have destroyed this industry for the time. Formation: granite and limestone. Population, 60 (census 1891), with vicinity about 300.

REDCLIFFE. *See* HUMPYBONG.

REDLAND BAY (27° 37′ S. lat., 153° 15′ E. long.). This settlement lies 25 miles S. from Brisbane (by road) in the co of Stanley, electorate of Logan, division of Tingalpa, police district of Cleveland on the shore of Moreton Bay State school (No. 229) and school of arts, with library of 534 vols. Hotel: Redland Bay. Primitive Methodist and Anglican places of worship, and a number of substantial dwellings, and two piers. Coach runs daily to and from Cleveland railway station (7 miles), fare 2s. The scenery here is noted for its beauty. Agricultural district. Oyster fishery. Soil chocolate and very fertile. Chief products, bananas, mangoes, oranges and grapes, which are sent to town partly by steamer, but chiefly by road direct. Survey of railway from Cleveland has been made. Population 133 (census 1891), with vicinity about 300.

REID'S CREEK (25° 40′ S. lat., 151° 40′ E. long.), situated on Branch Creek, about 4 miles SW. of Mount Perry, is a mining locality, in the electorate of Burnett. There is a Wesleyan church, but services have been suspended for some little time. The most extensively developed of the mines is the property known as the "Reid's Creek and Mount Perry Copper and Smelting Company," which is being worked on tribute. Nearly all the gold-bearing stone is mundic stone and very difficult to treat locally; and although the yield has been from four to seven ounces of gold per ton, yet the heavy expenses absorb much of the proceeds. From the abundance of auriferous minerals known to exist in the district, it was thought by mining experts that a great future was in store for the field. Reid's Creek is now almost abandoned; there are a few diggers working the alluvial and the reefs, the stone being sent to the Aldershot works for treatment. An auriferous sand claim has been taken up with the intention of erecting cyanide works. Population about 50.

REIDSVILLE (19° 43′ S. lat., 146° 56′ E. long.), now known as Reid River, is a railway and telegraph station on the Northern Railway (Townsville to Charters' Towers), being 35 miles S. of Townsville, on the east bank of the Reid river. Hotel: Railway.

RETREAT CREEK.—A mining locality discovered in October, 1892, by Mr. William Baird. The diggings are situated on Retreat Creek, a tributary of the Batavia, about 60 miles N. of the Coen and 16 miles due E. of the Mein telegraph station.

RICHMOND, a rising pastoral township, situated on the Flinders River, about 80 miles NW. of Hughenden railway station, to and from which coaches run twice a week. It has branches of the Government Savings Bank, Queensland National and Australasia Banks, a provisional school, three hotels - Royal, Star and Garter, and Western Star—and tradesmen's premises.

ROCKHAMPTON (23° 24′ S. lat., 150° 30′ E. long.) is the commercial capital of the Central Division of Queensland, under municipal government, on the south and north banks of the Fitzroy River, 43 miles by river from Sea Hill (generally considered the mouth of the river), by course of river (21 miles as the crow flies) at the head of navigation, and about 420 miles (441 by overland telegraph route), (335 in a direct line), NW. of Brisbane. The city took its rise from the famous Canoona rush in 1858, when thousands of people flocked there, many of whom had to be taken back at the expense of the Governments of Victoria and New South Wales, as the extremely limited patch of surfacing became exhausted in a few days. The leading hotels are the Leichhardt, Criterion, Commercial, Grosvenor, Belmore, Imperial, Railway, Masonic, Palace, Albion, Union, Scariff, Royal, Crown, and Queensland. It is in the county of Livingstone, and owes its origin in the first instance to the settlement of the Messrs. Archer at Gracemere (6 miles distant from the present town), in August, 1855, and subsequently, as stated above, to the great Port Curtis rush in 1858. Frequent communication by steamer is maintained with all the principal ports of Australia. It is the port of Central Queensland, and the outlet of the Dawson, Peak Downs and Springsure districts, and the rich and extensive western lands watered by the Barcoo, Alice, Thompson, South Diamentina, Herbert, and other rivers flowing into the interior. A large shipping trade is done; the value of its exports in 1899 were £2,390,380. There is fresh-water service at all the wharves, and coal is procurable in town. Vessels of 1,000 tons, drawing 16 to 17½ feet of water, can come up to the town wharves at spring tides. A Harbour Board for the improvement and management of the Fitzroy River was created in February, 1896. Its revenue is derived chiefly from harbour and wharfage dues. The Board is doing excellent work in deepening and otherwise improving the river. Two dredges are constantly employed, the *Saurian* and the *Ellwood*. A contract has also been signed for the supply of a Bates' suction dredge. Port Alma, 36 miles distant by course of river (22 miles in a direct line), at the mouth of the river Fitzroy, is a fine natural harbour, where ocean-going steamers and vessels can load and discharge their cargoes. Wharves have been built here by the Government. They are 500 feet in length, with a depth of 25 feet at low water, enabling the largest vessels to lie alongside. A patent slip takes up vessels from 50 tons and in addition there is a gridiron at Sea Hill. There is another port, Broadmount, just inside the mouth of the river, which is now connected by rail (24 miles) with Rockhampton. This harbour can accommodate large ocean steamers up to 25 feet draught. All the frozen meat boats now load here, drawing their loading from Lakes Creek works. Rockhampton is the starting-point of the Central Railway, the terminus at present being at Longreach, 424 miles from Rockhampton, and branches north and south from Emerald to Clermont (62 miles) and Springsure (40 miles). A line also runs to Emu Park from North Rockhampton, 29 miles. This line is now connected with the Central system. Through communication with Mount Morgan has also been established, the line over the "Razor-back" being on the "rack" principle. Emu Park is a pleasant watering-place. The principal streets of Rockhampton are lined with trees, are wide and well planned, the main streets having a width of 99 feet, the principal business thoroughfares being East Street and William Street, and are ornamented with numerous substantial stores and other buildings. Among the latter are the Episcopal (St. Paul's church, consecrated in October, 1883), Roman Catholic (St. Joseph's), Presbyterian, (two), Wesleyan, Baptist, Congregational, Primitive Methodist (three) churches, Salvation Army barracks, and Friends' meeting house, immigration barracks, the hospital, salubriously situated, and accommodating on an average 70 patients, children's hospital, lunatic reception house, the school of arts, with a library of about 9,551 volumes, and museum in connection; the Supreme Court buildings, and Government offices, gaol, police office and barracks, post and telegraph offices (a two-story building of brick and stone with clock tower), Masonic Hall, Oddfellows' and Protestant Hall, the Orphanage, and the Benevolent Asylum. A new Masonic Hall of large dimensions is now in course of construction on a site situated at the corner of Kent and Archer Streets. An orphanage has been erected on Nerkoll Creek, about 14 miles distant, on the Central Railway. It is known as the Meteor Park Orphanage. A new Lands office has just been completed on a site adjacent to the Supreme Court. A new Customs House has also been erected. The Union, Australian Joint-Stock, Commercial, Queensland National, Australasia, New South Wales, Royal, and North Queensland Banks have branches, and the leading Insurance Companies are represented by local agents. A useful mercantile institution is the Chamber of Commerce. There are five State schools and three Roman Catholic schools. A handsome State school for boys is in William Street, and steps are being taken for the erection of a more commodious State school for girls. A boys' grammar school, built from the design of Mr. S. Williams, was opened in 1881; a girls' grammar school was opened in 1882. The Corporation consists of a mayor and eight aldermen. There are 76 miles of roads and streets in the municipality (incorporated December 22, 1860), area 23 1-10th square miles, and an estimated number of 3,500 dwellings. Capital value of property, £1,059,772. Many of the shops and private residences have the electric light. The streets are well lighted with gas. The town is supplied with water, brought from the Crescent Lagoon, some two miles distant, and pumped by steam power into two artificial reservoirs at the summit of Athelstane Range, 150 feet in height. The water supply is under the control of the

Council. The Botanical Gardens are about two miles from town, on the bank of the Murray Lagoon, beyond the Athelstane Range. They have been much improved, and are largely frequented, notwithstanding their distance from town. The Fitzroy Bridge, a fine structure, resting on piers, with five spans of 232 feet each and lit by electric light, its height from high-water springs to the suspension chains being 20 feet, connects with North Rockhampton. During the floods of 1890 it was much damaged but is now restored. Footways have recently been added on either side of the bridge. The new railway bridge, situated a little higher up the river, will also afford means of communication to North Rockhampton for foot passengers. The Crocodile Creek Bridge, on the road to the Town Common, was completed during 1878. The span is 117 feet in length by 20 feet wide. North Rockhampton is now a municipal borough (incorporated September 19, 1883). It has an area of 31 square miles, 536 dwellings, and 18 miles of streets. Capital value of land estimated at £155,374. Population in 1897 2,565. A coach runs weekly to Yaamba, Marlborough, and St. Lawrence on the north coast. The gold-fields in the vicinity of Rockhampton and on Peak Downs give employment to a number of miners. Minerals are widely diffused; gold, copper, and silver deposits being found in various places within a radius of 50 miles of the town. At about 26 miles SSW. from Rockhampton, at the head of Dee River, a tributary of the Dawson River, is the famous Mount Morgan gold-mine, believed to be the most valuable mining property in Australia. Yield of gold in 1898 from the Rockhampton fields, excluding Mount Morgan, 3,910¾ ozs., valued at £12,896 3s. 4d. There are emerald mines at Witherfield. About 15 miles NW. of Rockhampton, in the neighbourhood of Mount Etna, are spacious caves known as Olsen's and Johannsen's, containing large quantities of bat guano. About three miles from Rockhampton is the establishment of the Central Queensland Meat Export Company's meat-preserving works, known as the Lake's Creek Works, which employs, when in full work, upwards of 900 hands. Large refrigerating chambers and apparatus are connected with the works. It is now one of the most complete establishments in Australia. On the opposite bank of the river are the works of the Allcutt Extract Company, which employs a large number of hands. Rockhampton is surrounded by land of good quality, especially suitable for grazing purposes. The Barcoo, Thompson, Darr, Diamentina, Hamilton, and Herbert Rivers to the westward run through some of the finest pastoral country in Queensland. Population (census 1891), 11,629, now estimated at about 16,000. Newspapers: the *Morning Bulletin* and the *Daily Record*, both daily, the *Capricornian*, the *North Rockhampton Times*, and the *People's Newspaper*, all weekly.

ROCKY WATER HOLES (27° 39′ S. lat., 152° 56′ E. long.) This may be considered the metropolis of the division of Yeerongpilly. It lies on the Ipswich road, about six miles from Brisbane and two from Sherwood. There are two public-houses, Primitive Methodist church, Presbyterian meeting-house, Divisional Board room, and blacksmith's and other shops.

ROLLESTON (24° 27′ S. lat., 148° 30′ E. long.), a post town and telegraph station, in the county of Denison, district of Leichhardt, formerly known as THE BROWN, pleasantly situated on the banks of the Comet River, 44½ miles SE. of Springsure, the nearest railway station, to which horse or buggy must be the means of conveyance. It is the centre of a large squatting district, being well grassed and watered, and admirably adapted for squatting pursuits. The township, which is perhaps one of the oldest in the colony, contains one store, a blacksmith's and saddler's shop, one public-house—the Planet, post and telegraph office, police station, and a Provisional school (No. 92). Population about 265.

ROMA (26° 36′ S. lat., 148° 42′ E. long.), a town on Bungil Creek, in the county of Waldegrave, and electoral district of Maranoa, 318 miles WNW. of Brisbane, lying 978 feet above sea-level. It has a repeating telegraph station, savings bank, money-order office and railway station. There is a mail from Brisbane four times a week, and daily mail to Mitchell, Charleville and to the West. The N. S. Wales, Australasia, and Q.N. Banks have branches here. Roma possesses a good hospital, a court-house, a handsome Episcopalian church (St. Paul's), Presbyterian church, Wesleyan church, Baptist church, very fine Roman Catholic church (All Saints), and Salvation Army barracks, twelve hotels—among others, School of Arts, Queen's Arms, Royal, and Railway, the first a substantial two-storied building—a gaol, a State school (No. 93), a convent school, a survey office, a lands office, police station, and a town hall, five large stores, and several smaller ones. In the municipality (area 5 sq. miles) incorporated May 25, 1867, and re-incorporated May 25, 1876, having a mayor and eight aldermen. The property rated at £60,703. Among the local institutions are the Western Turf Club, the Western Pastoral and Agricultural Association, an amateur dramatic club, and two Masonic lodges (English and Scottish Constitutions), and lodges of Oddfellows, Good Templars, Hibernians, and Protestant Alliance, also a school of arts, with excellent library and one of the best equipped reading-rooms in the colony. The district is a rich pastoral one, and well stocked with sheep and cattle. Agriculture has been receiving considerable attention for some years, since it has been found that wheat can be grown, but the industry is precarious, in consequence of long droughts. A flour mill is here, and a movement is on foot to establish another. There are some good gardens, and the vine is extensively and successfully grown and has become an important and profitable industry. The orange has been found to thrive in the locality. Wheat, oats, barley, rye and potatoes are successfully cultivated. Much land has been taken up under conditional purchase and as homesteads. The Bungil Marsupial Board and the Bungil Divisional Board meet here, also the Leichhardt Rabbit Board. The water supply is derived from the Bungil Creek and from a reservoir and tank. A bore has also been put down, and yields 300,000 gallons per diem from a depth of 1,700 feet. This yield not being sufficient, the Government is sinking another bore on a different site. Population (census 1891), 1,698, now about 1,500. Newspapers: *Western Star* (Wed. and Sat.), and *Maranoa Advocate* (Tues. and Fri.).

ROSEWOOD (27° 43′ S. lat., 152° 35′ E. long.), co. Churchill, electorate of Rosewood, police district of Moreton, a station on the Southern and Western Railway, and the postal centre of the settlement in the Rosewood Scrub, 36 miles SW. of Brisbane. It is now a division, the Board's office being in the township. There is a large public hall, and nine fire insurance companies have agents. It has four hotels, the Rosewood, Commercial, and Royal on the northern or Scrub side of the railway, and the Rising Sun on the opposite side; also six stores, two lighted with acetylene gas and one with bakery attached, a chemist, plumber, carpenter, three saddlers, two shoemakers, two blacksmiths, and two butchers' shops, a post and telegraph office, a State school (No. 131), a court house, police barracks and lock-up, a branch of the Government Savings Bank, Anglican, Congregational (with a manse and resident minister), Catholic, and Baptist churches, Salvation Army, an agricultural hall and show grounds. A large hall known as the Victoria Hall is used for public meetings. A large area of land is under crop, principally for maize, but owing to the Lanefield Dairy and Rosewood Co-operative Dairy Companies and three other creameries being established in the district, a number of the farmers are sowing oats and planting sugar-cane to feed their dairy stock. There are four apiaries having from 40 to 80 stands of bees. Large quantities of Cape gooseberries are sent from Rosewood. Also much timber; butter and other dairy produce, poultry and eggs. There are also two sawmills, one on each side of the line, and a flour-mill in connection with the sawmill on the south side of the railway. The Ashwell State school is about 2½ miles distant. Water supply is derived from Government tanks and private dams. There is a well in the township, but the water is brackish. Formation: sandstone. Population, 41 (census 1886), now about 140.

RUSSELL RIVER, known as the Lower Russell, is a receiving office on the Russell River, in the county of Nares, parish of Bellender Kerr. It lies within 3 miles of the mouth of the river, and 30 miles south of Cairns. There is one hotel, and a central mill belonging to the Bellender Kerr Company. The river is navigable for small craft up to the mill site. The surrounding country is all dense scrub.

RUSSELL RIVER UPPER, or Boongie, is a mining locality at the head waters of the Russell River, where there are some sluicing claims at work.

SALISBURY. *See* PORT DOUGLAS.

SANDGATE (27° 20′ S. lat., 153° 5′ E. long.), a municipal post town, with money-order and savings bank office, and telegraph station, in the county of Stanley, electorate of Nundah, on the shores of Moreton Bay and Cabbage Tree Creek, 12¾ miles N. of Brisbane, and about 8 miles NW. of the mouth of the Brisbane River. It is pleasantly situated, and as a watering place is well patronized all the year round by visitors. It is also a favourite resort for enthusiastic fishermen and boating parties, a large number of yachts being kept by residents and others. A pier, with bathing places attached, extends out about 1,150 feet into the Bay, and a Town Band performs in the parks frequently during the summer evenings, special excursion trains being run from Brisbane. It is connected by railway with the metropolis. Hotels: Osborne, Sea View, and Musgrave, with several excellent boarding-houses. Bank, Queensland National. There are Anglican, Baptist, Wesleyan, and Roman Catholic places of worship; also a convent, a mission hall occupied by the Salvation Army, a school of arts, with library of 2,140 vols., a town hall and an Anglican mission church for West Sandgate and Brighton. There are also post and telegraph offices, a court-house and police station, a primary school (No. 153), and two convalescent homes in connection with the Brisbane and the Children's Hospitals. The accommodation for visitors has been much improved by the erection of public bathing-houses and several shelter sheds by the Corporation. The town is lighted with gas from the local gasworks near the railway station. It is under municipal government (proclaimed April 29, 1880), with three wards, East, Central and North, area 3,840 acres, and has been gazetted a place of petty sessions; it has 450 dwellings, 41½ miles of roads and streets, and ratable property of the value of £141,946. Population 1,756 (census 1891), now about 1,900, but it fluctuates according to the season, there being a travelling population of about 500 besides. Newspaper: *Sandgate and Mundah Dispatch*.

SANDY CREEK. This village is on the Leyburn road, about seven miles from Warwick. It contains a State school (No. 96), receiving office and two public-houses. Wheat is grown here, and large quantities of wine are produced.

SCARRBURY (22° 59′ S. lat., 144° 30′ E. long.) is 36 miles west of Aramac, on Aramac Creek, at the junction of four roads, to Winton, Muttaburra, Aramac, and Blackall, *viâ* Saltern Creek. Proceeding to Blackall from Muttaburra is a saving of 35 miles to go by this place on to Saltern Creek and Rodney Downs. It has a store and a public-house.

SEVENTEEN MILE ROCKS. This village lies about 12 miles from Brisbane by road, and is on the Brisbane River.

In addition to about 20 houses it has a Primitive Methodist Church, State school (No. 98), and public hall. The principal productions are maize, lucerne, wines, and potatoes. The wattle bark in the vicinity has become an article of trade. Population about 150.

SHERWOOD (27° 30′ S. lat., 152° 59′ E. long.) lies on the railway line, 7 miles from Brisbane. It is surrounded by a large number of farms. The public buildings are—Presbyterian Wesleyan, and Anglican churches, post and telegraph offices, and a State school, with an average attendance of 176. In the Corinda portion of Sherwood the public buildings are the school of arts, masonic hall, and Sherwood Divisional Board offices. Arrowroot, maize, and other farm produce are grown here.

SOMERSET (10° 45′ S. lat., 142° 40′ E. long.) is in the county of North Cook, on the E. coast of Cape York Peninsula, almost at its extreme point, and the south side of Albany Pass, about 1,500 miles NNW. of Brisbane. It is the most northerly settlement on the mainland. It was the residence of several of the Government officials, but its situation having many drawbacks, Thursday Island has now taken its place for governmental purposes. The buildings and sheds are now used for a pearl-fishing station. Population, 64; of census district, 1,470 (1891), exclusive of the native population.

SOUTH BRISBANE. *See* BRISBANE SOUTH.

SOUTHPORT (27° 57′ S. lat., 153° 27′ E. long.), a watering place, with money order and savings bank office, and telegraph and railway station in the county of Ward, Albert electorate, Nerang police district, at the mouth of the Nerang River or Creek, 51 miles SE. of Brisbane. Hotels: the Pacific, better known as Hanlon's, Scottish Prince. Railway, Southport, Queen's, the Grand at Deepwater Point (now called Central Southport), about halfway between Southport and Labrador; a State school (average attendance 225), and one private school, Anglican Church (St. Peter), Congregational, Catholic and Presbyterian chapels, Salvation Army barracks, court-house, post and telegraph office, police barracks, school of arts, with library of 1,600 vols., stores, lifeboat house, saw-mills and a central sugar-mill, and several villa residences. It is surrounded by magnificent scenery, and there is excellent fishing, boating, and shooting in the neighbourhood. It is an agricultural and pastoral district, and includes amongst its industries oyster culture, timber for export, sugar growing, and a remunerative schnappering trade carried on a few miles outside the ocean bars. The jetty has been lengthened to 900 feet, and widened to 12 feet, and there is now a depth of water alongside of 10½ feet at low water. Tide rises about 4 feet. There is a ferry over the creek which gives access to the main beach. Nerang is about 7 miles distant, and is reached by train daily. Burleigh Heads, about 9 miles distant, a bluff basaltic promontory about 500 or 600 feet above the ocean is a pleasant drive, principally along the main beach. The social institutions include Masonic lodge, football, cricket, tennis and rifle clubs, brass band, amateur dramatic company, volunteer corps, Gordon Club, and branch of the Women's Christian Temperance Union. Two coaches run daily during the summer to the Tweed Heads *viâ* Burleigh. Southport was formed into a shire, Feb. 6, 1889, but the shire has been dissolved and the district embodied in the Southport Division. The remaining portion of the district is included within the Divisional Board boundaries. Value of ratable property, £143,039. Population, 895 (census 1891), but varies according to the season. Newspaper: *Logan and Albert Bulletin*.

SPRINGSURE (24° 3′ S. lat. 148° 3′ E. long.), a money-order, savings bank, railway, and telegraph station on the creek of the same name, in the county of Denison, electorate and police district of Springsure, about 485 miles NW. of Brisbane. Emerald railway station (40 miles) distant, is connected by rail. Hotels: Commercial, Shearer's Arms, and Queen's Arms. Four stores, one saddler, one wheelwright, one blacksmith. The principal buildings, public and private, are comprised in the Anglican church, (St. Peter's), Presbyterian and Roman Catholic chapels (St. Malachy's), school of arts, with library of 750 volumes, the court-house, Divisional Board's office, the hospital, post and telegraph buildings, and school (No. 102). Masonic lodge E.C. and an Oddfellows' lodge M.U. The Bauhinia Divisional Board and Leichhardt South Marsupial Board meet here. Population, 264 (census 1891). Societies: Masonic Lodge, Jockey Club and Queensland Pastoral. Cricket and Tennis Clubs. Agricultural and pastoral district. It is nearly 1,100 feet above sea-level, and is sometimes referred to as the most salubrious and picturesque inland town in Central Queensland. It is 205 miles by rail from Rockhampton. Formation: it is in the centre of a volcanic region built up of successive beds of lava, sometimes trachitic, but for the most part consisting of variable basic rocks.

ST. GEORGE (28° 4′ S. lat., 148° 33′ E. long.) (county of Belmore, electorate of Balonne, police district of St. George) is situated on a magnificent reach of the Balonne River, about 380 miles WSW. (412 by rail and coach) route *viâ* Yeulba, or Mitchell, from Brisbane on the direct road from North Queensland to the Southern markets. Hotels: Royal, Tattersall's, Commercial, Australian, Metropolitan, and Victoria. On July 31, 1884, St. George was constituted a municipality under the title of the "Borough of St. George," but it has ceased to be one, and is now under the supervision of the Ula Ula Divisional Board. Sittings of the District Court are held here. It has a money-order office, branches of the New South Wales and Government Savings Banks, and seven stores. Public buildings: a court-house, police quarters, lock-up; school (No. 134), post and telegraph office, hospital, Episcopal, Presbyterian and Roman Catholic churches, and a School of Arts and reading room (445 vols.). The headquarters of the St. George Amateur Turf Club, Maranoa Rabbit Board, Pastoral and Agricultural Association, and Divisional and Marsupial Board are here; other local institutions are polo, rowing, lawn tennis, and cricket clubs. Coaches: Cobb and Co.'s and Isles'; the former runs to Yeulba (125 miles) and Mitchell railway stations, and to Bollon (80 miles), and Mungindi (95 miles) on the N.S. Wales border. Isles' runs down the Balonne River to Dirranbandi (50 miles), and Hebel (95 miles) on the N.S.W. border. Railway connection with Yeulba will probably be made before long; this route has been recommended by the Commissioner for Railways as the easiest and cheapest line to construct. A flour mill is proposed to be started here, and there are steam saw mills. The district is mostly pastoral, and contains some very fine cattle and sheep stations, and large grazing farms varying from 70,000 to 20,000 acres depasturing sheep. An unlimited supply of artesian water can be had all over the district by boring. The district also contains some of the finest wheat growing land in Australia. The climate is reported to be almost perfect. A bridge across the Balonne River was erected and opened in the winter of 1892. It is 481 feet in length, with twelve 35 feet and two 28 feet spans, with a roadway 18 feet in width between the kerbs. Population of town 900 (census 1891). Newspaper: *St. George Standard*.

ST. HELENA (27° 25′ S. lat., 153 15′ E. long.) (county Stanley) is an island in Moreton Bay, used as a penal settlement. It lies about 5 miles from the mouth of the Brisbane River, 17 miles NE. of Brisbane, with which it is in telegraphic communication: it is 1½ mile long from N. to S., and three-fourths of a mile from E. to W. The prisoners are employed in the cultivation of maize, lucerne, and sweet potatoes. in saddlery work, tailoring, shoemaking, tinsmithing, blacksmithing, bricklaying, bookbinding, quarrying, and carpentry. Sugar-cane was grown here, but the cultivation of cane is now abandoned and the mill house used as a laundry. The wooden end of the jetty has been enlarged, and the steamers can berth alongside now at all states of the tide. The buildings comprise the officers' residences and the penal establishment. The prison covers an area of nearly 6 acres, and is surrounded by a hard-wood fence, 12 feet high. The staff numbers 40. There are about 179 prisoners in confinement. Free population, 52.

ST. LAWRENCE (22° 20′ S. lat., 149° 32′ E. long.) (county of Murchison, electorate of Normanby), a post town, with money-order office, savings bank, and telegraph station, situated on the southern bank of the St. Lawrence Creek, and lying 556 miles (532 by telegraph route), to the NW. of Brisbane, and about 6 miles from the head of Broad Sound. Coaches run to and from Rockhampton weekly. Hotels: Sportsman's Arms and Carrier's Arms. St. Lawrence is the outlet for a wide area of country, but the Connor's Range at the back of the town is a serious barrier to the traffic. There is a court-house, used on Sunday as a place of worship, police barracks, a custom-house and lands office, both substantial hardwood structures, but no building calling for particular notice. State school (No. 103), two general stores and two butchers' shops. The meat-preserving works are capable of treating 50 head of cattle per day; the boiling-down works can put through 100 head per day. There is steamer communication with the metropolis about once a month; mails are forwarded *viâ* Rockhampton. A Jockey Club is here. The district is a pastoral one, mainly for cattle and sheep-raising. The water supply is derived from a Government dam a short distance from town. The Broad Sound Divisional Board meets here. A large area of land for sugar-growing has been taken up in this district on Scrubby, Spider, West Hill, and Marion Creeks; as the country is well suited for agricultural purposes there was every probability of this industry succeeding. Gold has been discovered at Yatton, about 26 miles W. from St. Lawrence (32 miles by the bridle road and dray track by way of Accommodation House). Coal has also been found. Formation: granite. Population, 206; of district (census 1891), 1,967.

STANTHORPE (28° 39′ S. lat., 152° E. long.), a township situated on the Quart Pot Creek, in the county of Bentinck, electorate of Carnarvon, distant from Maryland (N.S. Wales) 10 miles W., from Warwick 36 miles S., and from Brisbane 184 miles SW. (by rail 207 miles), 2,656 feet above sea-level. Hotels: Farley's, Commercial, Horse and Jockey, Sportsman's Arms, and others. Stanthorpe, or the Border Town, as it is sometimes called, possesses some good buildings, notably the court-house, police barracks, land office, post and telegraph office, hospital, school of arts with 1,024 vols., National school (No. 132), Roman Catholic school, Temperance hall, and Freemasons' hall. Money-order and savings bank institutions are also established. The places of worship are Church of England (St. Paul's), Roman Catholic (St. Joseph's), with convent, and Wesleyan. It is the headquarters of the Border Agricultural, Pastoral, Horticultural and Mining Society, the show grounds of which are situate in the town, the Stanthorpe Viticultural and Horticultural Society. Freemasons, Orangemen, Oddfellows, and Sons and Daughters of Temperance have duly constituted lodges. Bank: Royal. There is a bi-weekly coach service to and from Texas. In the latter district tobacco is being grown on a large scale, and the leaf produced is reported to be the best grown in Queensland, commanding a ready sale at a remunerative price. Water supply is derived from the creek and wells. The tin-mines, for which this district is celebrated, are extensively scattered around the township, but the alluvial deposits are gradually becoming worked out. Tin was first found in the district by "Joe Green" on the Nun-

dubbermere Run. Fruit-growing is rapidly becoming a very important industry in the district, and as the tin is being worked out it is being replaced by fruit culture, for which the climate and soil are admirably adapted. Sugar Loaf is situate on the road to Tenterfield, distant 8 miles S. from Stanthorpe; it has a national school (No. 133). A large saw-mill, extensive tannery, and mill for grinding wattle bark have been established here. Almost every article of European growth, particularly fruit, is productive all over this district; in fact, the invigorating character of its climate has earned for the district of Stanthorpe the title of the Sanatorium of Queensland. During the past few years Stanthorpe has greatly increased in popularity as a health resort. In the summer months a very large number of Brisbane and northern residents avail themselves of its delightful climate. In 1882, Mr. Jack, the late Government Geologist, visited this district, and reported favourably of its mineral resources. It has also been visited twice by Mr. Rands, now the Government Geologist, who is of opinion that the extent and character of the stream tin deposits found in the neighbourhood afforded a very strong presumption that payable lodes exist in the district. The mining industry has, during the last year or so, been stimulated by the discovery of several important copper and silver lodes, on which large sums of money have been expended in development work. The Silver Spur Mine has paid dividends aggregating £56,000, and the prospects are said to be better now than ever before. The Sundown Mine promises, too, to be a most successful venture. Formation: granite greywacke and basalt. The population within the town boundary is 735: in the district it is 1,869 (census 1891). Newspaper: *Border Post* (Saturday).

STONEY POINT (Windorah), (25° 26′ S. lat., 142° 36′ E. long.), a postal township with telegraph station, situated about 250 miles NW. by N. of Thargomindah, on the western channel of the Cooper, in the county of South Gregory, electorate of Bulloo. It lies on Cooper's Creek, about 7 miles from the crossing, and is about 780 miles from Brisbane. It is reported to be difficult of access from the south after rain, but in dry weather there are no obstacles. Coach runs to Charleville railway station (306 miles), fare £6 10s., *viâ* Adavale; and buggies conveying mails run to Longreach, Thargomindah, and Birdsville. Hotels: Western Star and Crossing; a court-house, police station, public school (No. 556), post and telegraph office, School of Arts, one store, a blacksmith, butcher, and in the vicinity two or three gardens. Opals are abundant in the neighbourhood, but the mines have not been systematically worked, nor have the best means been taken to turn the discovery to the most practical account; but it is fully anticipated that some day this resource will be a valuable one. Stoney Point takes its name from a slight stony elevation near the creek in the vicinity of the town. It was founded in 1878 by G. C. Fitzwalter. Population, 99 (census 1891).

SURAT (27° 11′ S. lat., 149° 2′ E. long.), a post town, with money-order, savings bank, and telegraph office, in the county of Elgin, electorate of Murilla, police district of Surat, situated on the Balonne River, about 50 miles (61 postal) SE. of Roma, 84 from St. George, and 346 miles (by rail and coach route) due W. of Brisbane. Cobb's coaches run twice a week from Yuelba Railway Station (47 miles), fare 20s.; from Surat to St. George 30s. Hotels: Royal and Commercial. Churches: Church of England and Roman Catholic, visited from Roma. Other buildings, a State school (No. 142), a court-house, police barracks, telegraph station, the Divisional Board's hall, and three principal stores. A bridge spans the Balonne at this point. The country is utilized for both sheep and cattle, but sheep farming is the principal industry. Many of the selections are now well watered, having dams and wells on them. The quality of some of the land is highly spoken of for grazing purposes, and in good seasons some of the selections might be utilized for agricultural purposes. Much land has been taken up by Southern capitalists and also by selectors. Formation: sandstone conglomerate. Population, 221 (census 1891).

TABLETOP (23° 16′ S. lat., 147° 30′ E. long.), a mining township, situated about 13 miles south-east from Croydon, Burke electorate, and about 8 miles from the Carron River. Hotels: Australian, Miner's Rest, and others. Tabletop is the centre of a large rich auriferous district, many of the most valuable and promising claims in the Croydon district being in its immediate vicinity. There are several large stores; a cordial manufactory, and other business establishments, and a post office. Provisional school (No. 554). Population 139 (census 1891); with Twelve Mile, 256.

TAMBO (24° 53′ S. lat., 146° 14′ E. long.), a money-order, savings bank, and telegraph station and post town, situated in the electorate of Mitchell, on a branch of the Barcoo River, about 550 miles NW. of Brisbane and 330 miles (400 by rail and coach route) inland SW. from Rockhampton, and the oldest town on the Barcoo River. It can be reached by coach *viâ* Charleville (136 miles) and rail, and by coach *viâ* Alpha, 99 miles. Hotels: The Club, to which is attached a commodious hall with stage fittings, Telegraph, and Carrangarra. A State school (No. 150) is here; also a hospital (Mitchell and Warrego), Divisional Board's office, school of arts, court-house, and police barracks. Catholic church and Anglican church. There are two principal stores, several tradesmen's premises, and a cricket and lawn tennis club, and a Foresters' and Masonic lodge. District Court sittings held twice a year. Coaches run to Augathella; to Alpha; to Blackall; and to Charleville, besides horse mails. A large dam at the head of the township has been constructed. Artesian water, estimated at 80,000 gallons per day, has been struck at a depth of 1,000 feet. Purely pastoral district. Population, 500; census district (1891), 900.

TAMBOURINE (Co. Ward) (27° 55′ S. lat., 153° 17′ E. long.), a post town, 9 miles from Logan village, 15 from Beenleigh, coaches ply to both places, with a Roman Catholic church, a public-house, the Tambourine, one store, and provisional school (No. 195). It is the centre of a fine agricultural and pastoral district, producing tobacco, maize, arrowroot, oaten hay, lucerne, and other crops. There are in the neighbourhood several fine cattle stations and farms. It is situated about 9 miles from the head of navigation on the Logan. There is regular communication by steamer. Local paper: *Logan and Albert Advocate*.

TAROOM (25° 38′ S. lat., 149° 45′ E. long.), a money-order, savings bank, post, and telegraph station, in the county of Leichhardt, Murilla electorate, on the Dawson River, 180 miles S. of Rockhampton and 343 miles NW. of Brisbane, the route from Brisbane being by train to Miles, 231 miles, thence bi-weekly mail coach, 95 miles. Hotels: Taroom and Leichhardt. Three stores, two auctioneers, one saddler, two blacksmiths, one bootmaker, two contractors, and one baker. Principal buildings: Divisional Board hall, police barracks, court-house, Clarke's Taroom hotel; Anglican and Roman Catholic churches, and State school (No. 105). Both the hospital and School of Arts are lodged in temporary buildings. During 1897 a new building was completed on the site of the post-office for post, telegraph, and land offices. Besides the mail coaches a coach runs to and from Miles weekly. District pastoral, but a number of agricultural farms recently thrown open have been all taken and others in demand. The soil is said to be well adapted for grapes and fruit trees. Population 300, census district 812 (census 1891).

TENNINGERING *See* Mount Perry.

TEWANTIN (26° 20′ S. lat. 153° E. long.), a post town, with money-order office, savings bank, and telegraph station, is the township of the Newsa (or Noosa) district, which occupies the Southern end of the Wide Bay electorate. It is situated about 3 miles from Laguna Bay on the Noosa River, on a long neck of high ground 32 miles SE. of Gympie (in the Wide Bay police district and co. of March), and 90 miles due N. from Brisbane. Hotel: Royal Mail. State school (No. 181), also police quarters, court-house, lock-up and telegraph station, one store, 2 butchers, a bakery, and a blacksmith's shop. It is reached from Brisbane by steamer, which trades regularly, bringing timber to the metropolis, occasionally by other steamers, or by coach to and from Cooroy railway station (12 miles) daily; coach fare 5s. Large timber-yards are in the neighbourhood of the township, and many persons earn their living by timber-getting. A small steamer is employed in taking rafts of timber to Brisbane. There are also tramways in all directions into the scrub, and when in full work employ a large number of hands, also timber yards at Colloy, about 1½ mile down the river from Tewantin, where the steamer loads. Messrs. Pettigrew and Son have also a wharf. The North Coast line passes behind the town at a distance of about 9 miles. The bay abounds in oysters and shellfish, and the lakes in the neighbourhood afford good shooting. The largest of the lakes, Cootharaba, is estimated to be upwards of 12 miles in length by 6 miles in breadth. The wood found here comprises Kauri (otherwise Dundathu or Noosa) pine, cedar, Cypress pine, beech, ash, tulip, and hardwoods. The Kauri pine is a remarkably tall and straight tree, tapering very little, measuring at the butt 4 to 10 feet in diameter, the average contents of a tree being reckoned at 6,000 feet of timber. The water supply of the town is derived from wells, tanks and lagoons. Formation: Sandstone. At Noosa Heads are boarding-houses for the accommodation of visitors. Here there is reported to be one of the finest beaches in the colony. It is a favourite sea-side resort for the residents of Gympie and Brisbane. Population 148 (census 1891), in district about 500.

TEXAS, a township on the Macintyre river, 282 miles SW. from Brisbane and 75 miles W. from Stanthorpe. The mainstay of the place is tobacco-growing, for which the soil in the neighbourhood seems to be specially adapted, as the leaf produced is of a superior quality. There are also several mines in the vicinity, one of which—the Silver Spur—has been worked successfully for many years. Mail coaches run to and from Stanthorpe once a week.

THARGOMINDAH (27° 58′ S. lat., 143° 43′ E. long.), co. of Wellington, Bulloo electorate, a post town with money-order, savings bank, and telegraph station, on the Bulloo River, about 670 miles (750 by mail route) nearly due W. of Brisbane. It is 140 miles W. from Cunnamulla, and 340 miles W. from St. George. Cobb and Co.'s coaches run to Cunnamulla Railway Station, fare 70s. Coaches also run to Hungerford, fare £3; to Kyabra, fare £3 10s.; to Windorah, fare £5; and to other places. Hotels: Royal, Thargomindah, and Club. Branches of the Commercial and Q.N. Banks are here, also school of arts, with library of 1,104 vols., a local finance company (Bulloo Agency Co., Ltd.), no church, a hospital, court-house, post and telegraph office, police barracks, 7 stores, including a bonded store known as Leahy's Bond, 2 saddlers, 2 blacksmiths, 1 butcher, and an aërated water factory. A battery, a tailor's shop, and a brewery is shortly to be erected. Offices for the Bulloo Divisional Board, built of brick and stone, are here, and a public school (No. 409). Five gardens along the river bank supply the town with vegetables and fruit. Opals have been found in several parts in the district, and silver is believed to exist in the Grey Range, a continuation of the Barrier Range, about 40 miles distant. The town is built on Mulga-stony ridge, with cement about two feet below surface. District principally grazing. Country is well adapted for sheep sta-

tions, but is at present principally stocked with cattle. Some of the stations have an area of over 2,000 square miles. Water is found by boring at trifling depths. In March, 1893, artesian water was struck at a depth of 1,100 feet, boring was continued to a depth of 2,650 feet, and a flow of water amounting to about 670,000 gallons per diem secured. The bore has been leased from the Government for a term of years by the Divisional Board, who have laid the water on to the town, having borrowed £1,400 from the Government for that purpose. The town is now lit by electricity, the flow from the artesian bore driving a waterwheel connected with two dynamos. About 100 lights are continually in use, the cost for a 16-candle power light being 1s. per week. The Divisional Board controls the scheme, which pays. A pastoralists' association has been formed. Clubs: Jockey, Cricket, Tennis, and Debating Society. The district has every prospect of becoming an important one, and Thargomindah, from its central position, a thriving town. The nearest railway station is Cunnamulla, 140 miles, the next nearest being Bourke, in N.S. Wales. Until lately most of the trade has been done with Sydney, but the reduction made in the Queensland railway rates and the approach of the S. & W. railway has diverted the bulk of the business back to Brisbane. The headquarters of the Warrego Rabbit Board are here, and the meetings are held in the Divisional hall. Population 338 (census 1891). Newspaper: *Thargomindah Herald*.

THORNBOROUGH (16° 58′ S. lat., 144° 57′ E. long.) is the principal centre of the Hodgkinson gold-field, and is situate in the electorate of Woothakata, County of Chelmsford, on the south branch of the Hodgkinson River, about 56 miles (70 postal) SW. of Island Point (Port Douglas), 1,100 miles NW. from Brisbane, and 30 miles from Mareeba railway station, the present terminus of the Cairns-Herberton Railway. Coaches ply bi-weekly to and from Mareeba railway station. Hotels: Royal, Commercial, and Canton. Both Thornborough and Kingsborough lie in a valley surrounded by abruptly-rising bare-looking hills, on the brows and summits of which the claims are situated. Thornborough is built mostly on two streets, the site being a very rough one. It has a court-house, police barracks, a post, telegraph, and money-order office with savings bank, a district hospital, a Provisional school (No. 306), a Roman Catholic chapel, school of arts with library of 200 vols., and other social institutions. Bank: North Queensland. There is an assay office, powder magazine, also two principal stores, and smaller ones. The district (within a radius of 20 miles) is an auriferous one, principally of the reefing character, the stone averaging at first 1½ ounce to the ton, but now only a little more than half that. The discoverer of the field was Mr. J. V. Mulligan, in March, 1876, and the gold-field was proclaimed on June 15 following. It promised to be one of the leading mining centres of Australia, but the gold was principally near the surface, and the reefs deteriorated as the shafts deepened. In 1899 the Warden reported that the field had been steadily progressing, and the population was daily increasing. The total yield of gold since the first discovery to December 31, 1899, has been 246,533 ozs. During 1899 4,092 tons of quartz were crushed for 3,886 ozs. of gold. Several antimony lodes have been discovered near Northcote. The ore averages 60 to 70 per cent., and is easily got. About 12 miles distant from Thornborough, wolfram in quantity has been found and worked. "There is no regular lode, but the Wolfram is found in quartz or mixed with the loose earth in pieces from the size of an egg up to lumps about six or seven pounds weight." The water supply is limited owing to the river becoming almost dry in the hot season. The Woothakata Divisional Board meets at Thornborough. Town population, 68; with district 500, of whom 100 were Chinese.

THURSDAY ISLAND (PORT KENNEDY) (10° 34′ S. lat., 142° 12′ E. long.), district of Somerset, is an island of the Prince of Wales group, situated in Normanby Sound, Torres Strait, about 1,500 miles N. of Brisbane, 400 from Cooktown, and a like distance from Normanton. It is about the most central (and almost the smallest) of the group, being located between Horn, Prince of Wales, Friday, Goode and Hammond Islands. The township is named after the harbour — Port Kennedy — which is one of the finest on the coast of Australia, vessels of large tonnage being able to enter and anchor in safety off the township at any stage of the tide and in all weathers. The main streets of the town have been well formed, and many fairly substantial houses erected. It consists of a number of buildings (inclusive of eighteen Government buildings). The Government buildings comprise Government Residency, court-house, custom-house, bonded warehouse, sub-collector's and other customs-house residences, harbour-master's cottage, gaol, water police and town's police barracks, post, telegraph, money-order and savings bank office, also garrison and forts and a school-house, erected on a commanding site. Banks: Queensland National (a handsome and commodious building) and Bank of North Queensland. Hotels: Federal, Torres Straits, Royal, Imperial Hotel, Metropole, and Grand, the first-named and the two latter being amongst the finest hotel buildings in North Queensland, four stores, besides many other smaller places, the majority of which are kept by Chinese, Manilamen, Japanese, Cingalese, and other coloured races. There is a Roman Catholic school (kept by Sisters of the Mission of the Sacred Heart of Jesus). Churches: French Mission of the Sacred Heart of Jesus. Church of England service is held in the memorial church erected to the memory of those lost in the wreck of the *Quetta* on February 28th, 1890; the bell of the ill-fated steamer is now hung at the church. The North Queensland Anglican Episcopacy has just (1900) been divided, the centre of the new Bishopric being at Thursday Island, and called "Carpentaria," Archdeacon White, of Townsville, being the first Bishop. The general hospital is at Vivien Point. There is a school of arts, with well-appointed stage, and hall with seating accommodation for 250, and an excellent library of about 2,300 volumes, also Oddfellows' and Masons' lodges. The township is included in the Cook electorate, and is under the care of the Torres Divisional Board, and many substantial improvements have recently been made. Population of Thursday Island on March 1st, 1900: Europeans, 644; Japanese, 385; all other races, 402; total on the Island, 1,431. Besides this population, according to the returns furnished by the Shipping Office, there were afloat, engaged in the shelling industry of the Straits, 1,984 men of all nationalities, Japanese being predominant with 707. Horn Island population is 113, nearly all Europeans. The water supply is derived from a reservoir excavated in one of the hillsides, besides private supplies. A condenser has been erected by the Government. Communication with the outside world is frequent and regular; there being a service to Brisbane and all Queensland coastal ports by A.U.S.N. Co.'s steamers, a service by the B.I.S.N. Co.'s steamers with London, besides communication by the steamers of the China Navigation, Eastern and Australian, Japanese, and other lines, which are constantly calling. The climate is very salubrious during the prevalence of the SE. monsoon, which blows from March to October, during which period the thermometer rarely rises above 85°, or falls below 72°. The NW. monsoon prevails from November to March, when heavy rains set in, and the atmosphere becomes very humid. The thermometer, however, rarely registers higher than 95°. Thursday Island was first established by the Douglas administration as a harbour of refuge (to supersede Somerset, which had previously been the Government settlement), on account of its fine harbour and advantageous position. It is in the direct track of all vessels reaching Australia *viâ* Torres Strait, is the centre of the large and important pearl-shell and bêche-de-mer fishing industries of Torres Strait; and, being only 90 miles distant from British New Guinea, will eventually become the entrepôt for the Western trade of that colony, and also the sanatorium for its fever-stricken residents. The Imperial Government purpose making a large coaling station here, and fortification works in connection therewith are now constructed and manned by a garrison of 100 men, for whom barracks have been provided. Three 6-in. guns are in position, and an additional sum has been voted by Parliament to augment the armament, which is now being increased by one 4·7-in. quick-firing gun and smaller weapons. A jetty, which will give 22 feet water at neap tides, has been erected. Its total length is 947 feet, the T head being 45 feet wide and 200 feet long, enabling foreign-going steamers to discharge and load cargo direct from and to shore, and is likely to be in general use shortly. Hulks moored in the port provide facilities for coaling and the transhipment of cargo; Messrs. Burns, Philp and Co. have also erected a jetty 800 feet long, which runs out into 15 feet of water. In August, 1887, the telegraph wire was extended to here. The providing and laying the cable was undertaken by the Eastern Extension Co., and the cable was successfully laid by the cable ship *Recorder*, on the night of November 17th, 1886. The cable (a new one) extends from Thursday Island to Paterson. Friday Island has been selected as the site for the Federal quarantine station, and passengers who may unfortunately be compelled to remain there will be pleased that they have a beautiful spot on which to endure their enforced stay. Several cottages, formerly residences of pearl-shellers, have been fitted out for the comfort of passengers, and are now under the care of an experienced man. A leper station has also been established on Friday Island. The harbour pilot station is situated on Goode Island, and vessels entering the harbour are there boarded by the pilot. There is also a signal station and lighthouse on Goode Island, for the purposes of signalling approaching vessels and guiding them through the Ipili Reefs, and recently Lloyd's took this over. Thursday Island is also the headquarters of the Torres Strait Inner Route coast pilots, who board ships there to pilot them through the intricacies of the "Inner Route" to Brisbane and other Southern ports. Thursday Island is the transhipping port for cargo and passengers from London and the East bound to Normanton and the Gulf ports, and Port Darwin, and from its geographical position must in time become a place of very great importance. There are numerous pearl-fishing stations within from 3 to 50 miles of Thursday Island, 319 luggers and boats being engaged in the trade. The principal items of local produce exported from Thursday Island are pearl shell, bêche-de-mer and tortoiseshell. The exports during 1899 were valued at £142,047, of which £137,401 was for local produce. Gold-bearing reefs have been discovered and worked on Hammond Island, close to Thursday Island. At Horn Island a gold-field has also been proclaimed, and is now being worked, the principal company there operating with a 50-head battery, which has now (1900) been working some months. The returns are small, but the ease with which the ore is obtained renders the work payable, less than 3 dwts. to the ton clearing expenses. Local paper: *The Torres Strait Pilot*.

TIARO (25° 44′ S. lat., 152° 37′ E. long.), a post, money-order, savings bank, and telegraph town, in the co. of March, and electorate of Burrum, on the Mary River, about 146 miles NW. of Brisbane, and 21 miles S. from Maryborough (15 miles by road), to which it is connected by rail. Hotels: Victoria, Railway, Royal and Queen's; Protestant and Good Templars' halls, and Divisional Board's office. The hall of the latter served for a school of arts (now closed). There is an Episcopal place of worship (St. Philip's), with par-

sonage, Primitive Methodist and Presbyterian chapels, Roman Catholic church, Salvation Army barracks and resident Primitive Methodist and Presbyterian ministers. Government buildings: court-house, post and telegraph office, police station, State school No. (107), and railway station. There are about 150 private dwellings, six stores and several tradesmen. Protestant, Good Templars', and Protestant Alliance lodges are held here. A large bridge, 306 ft. in length, spans the Mary River at this locality. An extensive trade is done in timber, principally hardwood. Most of the Northern contracts for piles, bridge-building, &c., are supplied from Tiaro and surrounding district. There is an almost unlimited supply that suffers from want of cheap transport to the main railway line. The local government is looked to by the Tiaro Divisional Board. The water supply is derived from the river. Coal-seams are in the vicinity. An antimony mine—Neardie, the property of a Company—exists about 25 miles distant. Plumbago has been found on Mount Bauple, about 4 miles distant. A large area of splendid scrub land is adjacent, occupied by farmers on both banks of the Mary River. There are three sugar mills. Agricultural and pastoral district. Maize and potatoes are largely grown. There is a co-operative dairy. The cattle stations in the district are Neardie, Gootchie, Miva, Gigoomgan, Merodian, Teebar, Clifton, Boompa, Glenbar, and Tahiti. There are many farmers at Gootchie. Formation: carboniferous, granitic, sandstone and slate. Population, 308; district (census 1891), 2,676.

TINANA (25° 34′ S. lat., 152° 36′ E. long.) is the southern suburb of Maryborough, and is connected with it by a bridge. There are several public-houses, a State school (No. 216), and post-office. Many of the inhabitants are Danes, Germans, or Poles. Sugar is grown in the neighbourhood, and coal has been found and worked. Population, 397 (census 1891).

TINAROO (17° 30′ S. lat., 145° 29′ E. long.) is a tin-mining locality, situated on a creek of the same name, about 45 miles from Cairns. It may be considered a portion of the Herberton tin-field, although on the northern watershed of the range. The first discovery of tin was made here. The production being stream tin, work can only be carried on during the wet season. In 1897 it was reported that a few miners obtained about 1 ton of tin each, valued at £32 10s. per ton the scarcity of water prohibiting them from getting more throughout the year.

TOOWOOMBA (27° 34′ S. lat., 151° 58′ E. long.) is the principal town of the rich pastoral district called the Darling Downs. It is situated upon the summit of the Great Dividing Range, 1,921 feet above the sea-level, at the head of Gowrie Creek, a tributary of the Condamine, in the county of Aubigny, electorate of Drayton and Toowoomba. The district was for 20 years represented by one member, Mr. W. H. Groom, but is now divided into three electorates, Drayton and Toowoomba Cambooya and Aubigny. It lies 101 miles W. of Brisbane and 76 miles (by rail) from Ipswich. The hotels are numerous, among them being the Imperial, Royal, Queen's, Gladstone, Globe, White Horse, Central, Governor Blackall, Club, Freemasons' Arms, School of Arts, Opera, and Union. It was erected into a municipality on November 19, 1860 (Mr. W. H. Groom being the first mayor), has 61 miles of roads and streets, 1,850 dwellings, and is governed by a mayor and eight aldermen. Municipal area, 3,840 acres, divided into three wards, South, East, and West. Ratable land unimproved is estimated to be of the value of £594,128, rated at 1¼d. in the £. The principal thoroughfares are Ruthven, Russell, Hume, Neil, Campbell, Margaret, Herries, James, Mort and Taylor Streets. The places of worship in the town are the Episcopal church (St. James's) in Russell Street, also St. Luke's, a fine new stone building, the Roman Catholic church (St. Patrick's), in James Street, the Presbyterian church, in Neil Street, Wesleyan church and School-room, Neil Street, also German Lutherans (three), Congregationalists, Baptists, Primitive Methodists; there is also a Jewish synagogue. In connection with the department of public instruction there are 7 State schools (Nos. 112, 110, 256, 109, 399, 414, 499), besides which there is a Roman Catholic school, and the German residents have two schools, which receive no aid from the State. In addition to these, there is a grammar school for boys, on a commanding and healthy site overlooking the town, erected at a cost of £10,000. Downs' school, Carlton school, Technical college, and three seminaries for young ladies. The old court-house has been turned into an industrial and reformatory school. There are two companies of Volunteers and a company of the Mounted Infantry, as well as a company of the Darling Downs Rifle Club. A good hospital—a building of brick—with largely increased accommodation, has been erected, and a lunatic asylum, consisting of five blocks of buildings of brick, two stories high, which will accommodate 350 patients, is now opened. There are also a Masonic Hall and Theatre Royal, a Town Hall in James Street, a School of Arts, with a library of about 2,401 volumes. The old School of Arts building having been destroyed by fire in 1899, the Municipal Council took over the property, and have lately (1900) erected a fine and imposing block at a cost of £10,000. The buildings comprise Town Hall and office, theatre capable of seating 2,000, School of Arts, library, &c. There are branches of the Queensland National, Australasia, Australian Joint-Stock, Union, N.S. Wales, Royal, Commercial, and Government Savings Banks; and agencies of the principal Insurance Companies. A Supreme and District Court and police-office, post and telegraph offices, and lock-up and police quarters are among recent public buildings. Waterworks, costing about £22,000, have been constructed, and the water is now laid on to the town. The supply is derived from wells, whence the water is pumped into a reservoir, from which the water flows by gravitation. Swimming baths, at a cost of about £1,000, are now open. The streets, public buildings, and many of the private houses are lit with gas. There are many handsome private residences, with well aid-out gardens and grounds, in or near the town. The town is extending, and new buildings are being erected, especially on the Main Range, which is considered the most healthy and charming locality in Southern Queensland. The locality is now the centre of a large agricultural settlement. Some of the large sheep stations have recently been repurchased by the Government under the provisions of the Agricultural Lands Repurchase Act, and thrown open to selection. Practically the whole of this country has been taken up and settled by a most desirable class. Consequently the agricultural industry has received a distinct stimulus. There are two flour mills in the town, also four saw mills, three tanneries, two soap factories, two breweries, two malthouses, a foundry, and jam and fruit preserving and pickling companies. A very fine butter factory has been added to the industries. There are about 1,000 Germans in the suburbs of Toowoomba, who have all vineyards of more or less extent, and many thousand gallons of wine are annually made. The grapes are ripe in January and February, and bunches weighing 15 lbs. have been shown at the local exhibition. There are two societies, the oldest of the kind in Queensland, which hold annual exhibitions: the Royal Agricultural Society, holding its show for stock in August, and the Drayton and Toowoomba Agricultural and Horticultural Society holds its annual exhibition in January. There is also a Horticultural Society which meets monthly, when amateur and professional gardeners show flowers and vegetables. There are two clubs, Downs' and Gordon; the last has erected a gymnasium. During the summer of 1896-7 Lord Lamington, the Governor, made Westbrook Hall his summer residence. The population of the district, including the municipalities of Drayton and Toowoomba, by census of 1891, of the municipality was 7,007, now about 14,000. In the entire district it is estimated that the population is nearly 35,000. The *Darling Downs Gazette* (established 1858) and the *Toowoomba Chronicle* (established in 1861), both tri-weekly, and the *Settler* (1895), are the local journals. Formation: basaltic.

TOOWONG (27° 28′ S. at., 153° 1′ E. long.), a residential suburb of Brisbane, 2½ miles distant, with rail, 'bus, telegraphic and telephonic communication, and money-order office, and savings bank. It is in the county of Stanley, parish of Enoggera and municipal shire and electorate of Toowong. It has many villa residences, and has become both a popular and populous suburb of Brisbane. Hotels: Regatta and Railway; a large post and telegraph office; State school,) No. 13), and two private schools; churches, Episcopal, Wesleyan, Presbyterian, Primitive Methodist, and Baptist. Both water and gas are now available. The new 16-inch main from Gold creek reservoir passes through, and gives an ample water supply. The cemetery here is the principal place of interment for the metropolis. The area of the shire (proclaimed May 20, 1880) is 2,880 acres, with 25 miles of streets, 954 dwellings, capital value of £277,338. Toowong is an electoral district under the Act of 1887, and returns one member to the Legislative Assembly. Population of shire (census 1891) 4,437, now about 4,325.

TORBANLEA, a township on the railway line from Maryborough to Bundaberg, about 15 miles from Maryborough. It is a coal-mining centre, and has a State school, several churches, a School of Arts, Good Templars and Provident Alliance lodges, and a Miners' Union. Population, about 400.

TORQUAY-BY-THE-SEA. This is a small township and watering-place in the county of March, division of Burrum, situate on Hervey Bay, about 23½ miles from Maryborough. There is an excellent deep-water anchorage close by the township, in which the largest vessels can lie, and it possesses a magnificent beach. There are three sugar mills outside the township. Hotel: the Torquay. A coach plies to the Pialba railway station. Population fluctuates according to the season.

TOWALLA. A mining locality on the Russell extended goldfield, on Coolaman Creek, at the heads of the north branch of the Johnstone Water, about 27 miles nearly due W. from Geraldton and 35 miles E. from Herberton, in the district of Herbert. There is a good dray road from Mareeba station, on the Cairns line, which is distant about 50 miles. The assistant Government geologist describes the field as being situated in the midst of an immense and dense scrub, at an elevation of about 2,300 feet above the sea-level, and in very rough country. In October, 1893, Warden Macdonald described the locality thus: "The camp at Towalla is situated on the left bank of Coolaman Creek, and as yet is a mere cluster of tents with a few slab huts interspersed, all dotted about without any semblance of regularity." There are two stores and a butcher's shop. The site cannot be commended as a suitable one for a town; moreover, some of the main lines of reef seem to run right through the camp. A township has been surveyed and gazetted, a mile from the present camp. Average yearly rainy days 230. Formation: micaceous slate and sandstone.

TOWNSVILLE (19° 10′ 10″ S. lat., 146° 57′ 56″ E. long.) is a municipal town (proclaimed on February 15, 1866), and the principal city in North Queensland, with money-order office, savings bank, and telegraph station, situated on the shore of Cleveland Bay, and about 870 miles NW. of Brisbane. It was discovered by John Medwin Black in 1864, and named after his partner, the late Captain Towns. It is in the county of Elphinstone and electoral district of Townsville, and meeting-place of the Thuringowa Divisional Board. There is regular communication with all ports north and south

by several lines of steamers. There is monthly communication with the home country, *viâ* Torres Strait, per the steamers of the B.I. Company; and to China every three weeks, per China Navigation Company's steamers and the E. and A. boats. Hotels: The Queen's, the Imperial, the Palace, Metropole, Tattersall's, Post-office, Commercial, Courthouse, Grand, Alexandra, Exchange, and many others. It has 75 miles of roads and streets, 2,433 dwellings within the municipality, and property of ratable value of £788,289. Estimated area of municipality 2,080 acres, with vicinity 8,000 acres. It is a picturesque, if not elegant, town, built on the banks of Ross Creek, and partly on the slope of Castle Hill, which rises to an altitude of 1,000 feet. On the beach, which is a fine stretch of sand, several hotels and private dwellings are erected, while on Melton Hill there are numerous superior residences. The business portion of the town consists almost entirely of the main (Flinders) street, Melton and Castle Hills preventing it from extending to the northward. The street however extends for a considerable distance following the course of Ross Creek, and is thickly built upon for over a mile. A swing bridge, named Victoria, spanning Ross Creek from North to South Townsville, with a total length of 550 feet, has been built. It has ten fixed spans of 40 feet each, and two opening spans of 57 feet 7⅝ inches in the clear. The swing is operated by hydraulic power. There is a large shipping trade (the exports in 1899 amounted to £3,176,531, largely exceeding both Brisbane and Rockhampton), Townsville being the port for an immense territory to the W. and NW., including several gold-fields and a large area of pastoral country, even to the Diamentina, which, however, is hampered by the openness of the anchorage. There are stone breakwaters which enclose a fine harbour, the depth of which is being gradually increased by dredging. Large vessels fitted for the carriage of frozen meat enter the harbour and load direct from the refrigerating cars which bring the meat from the works, about three miles away. Substantial wharves and bulk stores line the northern bank of the creek, which is navigable in full tides beyond the swing bridge to the railway wharves for shipping of considerable tonnage. The eastern breakwater, which was completed on March 31st, 1889, is 4,088 feet in length, with a concrete parapet 4 feet high to within 900 feet of the full length, and has a branch railway communicating with the main (Northern) line. The damages to the eastern and western breakwater caused by the last cyclone are now in course of being made good, and other extensive harbour improvements are being carried out in conjunction with the work. The N. S.Wales, Queensland National, Union, Australasia, Australian Joint-Stock, Commercial, North Queensland, and London Banks have branches, all substantial and handsome buildings. There are agents of several insurance societies, and a branch of the Mutual Provident Society, the latter lodged in a fine brick edifice next the Exchange Hotel. The hospital, three two-story brick buildings, has ample accommodation for about 100 patients. There are also a customs-house, a large and commodious post and telegraph office, a town-hall, two Masonic halls, immigration barracks, a court-house, and a brick gaol, now proposed to be converted into a lunatic asylum, and an extensive penal establishment at Stewart's Creek (4½ miles distant), one of the best buildings of the kind in Queensland. The Supreme Court is a fine two-story building situated on Melton Hill facing the sea. There are now two judges with the necessary officials resident here, so that most of the legal business can be transacted on the spot. The regular sittings of the District Court are held here at stated intervals. The Registrar of Titles and the Sub-Commissioner of Stamps for the Northern District are stationed here. There are four State schools (Nos. 113, 257, 303, and 436) also a State school (No. 509) at North Townsville, and another (No. 498) at West Townsville, and the St. Joseph R.C. schools, a grammar school and an orphanage. The school of arts is a fine two-story brick structure in the centre of the town, with a large and well-appointed concert hall, capable of seating 500, and a library of 2,116 vols. The Norman Hall is one of the largest concert and ball rooms north of Brisbane, having seating accommodation for 1,000; there is a splendid floor for skating and dancing, together with all the appointments of a bijou theatre. The places of worship are St. James's, St. Peter's and St. John's (Episcopal), St. Joseph's and St. Mary's (Roman Catholic), Presbyterian, Congregational, and two Wesleyan chapels. Townsville is the head-quarters of the Bishop of North Queensland, the Right Rev. Dr. Barlow An Episcopal cathedral, costing £23,000 when completed, is sufficiently far advanced to be used for worship. Even in its semi-finished state it is the most imposing ecclesiastical edifice in the city. Foundations are laid for a new large and picturesque Roman Catholic Church. A quarantine station has been erected on Magnetic Island, and a reception house built. Batteries are now completed on Magazine Island and Kissing Point, manned by a permanent garrison. Among the local institutions are the Townsville Turf Club, a Pastoral and Agricultural Society, Freemasons', Oddfellows', Caledonians', and other benefit and social lodges. Fire Brigade Board, Chamber of Commerce, and Stock Exchange. The immigration barracks is a long wooden building, situated on Ross Island, near the mouth of the Creek, having accommodation for about 500 inmates. There are two large foundries, an extensive brewery, a soap factory, also an ice works, a gas company, four printing offices, a manufacturing stationery and bookbinding establishment, and Free Bond and Storage Company's building. The Queensland Meat Export and Agency Co.'s works, on the banks of the Ross river, when in full working order, employ a large number of hands. The meat is conveyed, per rail, in special cars to the jetty, where it is transhipped into the steamers. The North Queensland Meat Export Co.'s works, situated at Alligator Creek, have also extensive operations. The district is principally a pastoral one, though some portion is under crop for maize and potatoes. The country west of Townsville is famed for its pastoral wealth. The Northern railway from Townsville westward is completed to Hughenden (235 miles), with a branch line to Ravenswood. During 1899 it was extended to Winton. Three trains run daily to Charters Towers and the intermediate stations, with several special cattle, sheep and goods trains every twenty-four hours. The station is on Flinders Street, some little distance from the business portion of the town. Waterworks afford one of the best supplies in the colony; the supply is derived from two wells, sunk about 3 and 4 miles respectively from Townsville, believed to have tapped a subterranean stream. The water is pumped into a reservoir of 650,000 gallons capacity on Castle Hill, about 180 feet above sea-level, and thence distributed to all parts of the town. The pumping machinery is most complete, being equal to 30,000 gallons per hour. According to the Government Geologist's report, the whole of the alluvial deposit up to the sea-level is saturated with fresh water, and this alluvial flat will afford an abundant supply of water to meet the wants of a large city for all time. There are promising indications of coal-measures near Townsville. A considerable trade in lime is now being done. It is carried by rail to the town, where it is largely used for building purposes. Population, about 11,000—inclusive of neighbourhood, 13,016 (census 1891). The mean annual rainfall for the 24 years during which records have been kept is 52·09 inches, the mean temperature about 73°. Newspapers: the *Daily Bulletin*, and *Evening Star*, daily; *North Queensland Weekly Herald*. Formation: porphyry, blended with granite, and decided granite in the ranges.

ULAM.—A gold-field at Twelve Mile Creek, about 32 miles S. from Rockhampton, a few miles from Mount Morgan, where some remarkable finds of gold have been made. The prospects of the field are reported to be dependent on the alluvial. Two men obtained in a few days 300 ozs. from the surface of a small ravine, about 1 mile from the township. In 1898 the yield of gold was 122½ ozs., from 140 tons. 12 cwt. The town was laid out on October 6, and there were prospects of the field becoming permanent; but the field so far has not fulfilled its first promise. Population estimated 350.

UNION CAMP (16° 38′ S. lat., 144° 40′ E. long.), a mining township on the Hodgkinson gold-field, electorate of Woothakuta, in the centre of a promising reefing district. There are two stores, two public-houses, two or three tradesmen, and a crushing machine.

URANDANGIE (21° 35′ S. lat., 138° 24′ E. long.), a township with telegraph station, situated three-quarters of a mile east of the Georgina river, in the county of Piturie, opened in 1885 by Charles Webster and James Hutton in the centre of a splendid pastoral district on the main route for travelling stock coming from the Gulf table-lands, the Northern Territory of South Australia and West Australia for Southern markets. The country around is principally taken up with sheep and cattle stations. It is distant from the South Australian border 20 miles eastward, 147 miles by the telegraph line SE. from Camooweal, 200 miles W. from Cloncurry, 210 miles NW. from Boulia and 350 miles SW. from Burketown. Buggy runs to Boulia. Hotel: Tattersall's. One store, and a saddler. Local institutions: A Jockey Club and Progress Association. Town population, 28.

VERESDALE (27° 55′ S. lat., 153° 0′ E. long.), a small post-town and railway station on the Logan river, in the county of Ward and Tabragalba division. Has police quarters, post office, and State school (No. 122), school of arts, and chapel, used by all Protestants. Communication with Brisbane (distance 42 miles) by rail. Is the centre of a very large grazing and farming district, comprising black soil flats and apple tree ridges, producing maize, cotton, oats, &c., and yields timber largely. Population, 80 (census 1891). District now 277.

WALKERSTON (21° 14′ S. lat., 148° 33′ E. long.), co. Carlisle, electorate and police district of Mackay, parish of Greenmount, a post town, 637 miles NW. of Brisbane, with money-order office, savings bank, telegraph and railway station, about 9 miles WSW. from Mackay, to and from which there is a daily mail. Hotels: the Albion, Duke of Edinburgh, and Queen's, the first-named having a fine assembly-room. It is built on both sides of Baker's Creek, whence the water supply is derived, and is about a mile from the Pioneer River. It is the centre of the Mackay sugar district. It has a State school (No. 353), post and telegraph office, police barracks, aerated water factory, four large stores, two bakers, one blacksmith, one butcher, two carpenters, some tradesmen, and several cottages. Episcopal, Presbyterian, and Roman Catholic places of worship, and Kanaka mission. The Good Templars have a handsome and commodious hall. Local clubs: Good Templars, and cricket. Adjoining Walkerston is the township of Alsatia, but as the two places are only a street apart, they practically form one township, and are known by the name of Walkerston. The railway line from Mackay to Eton and Mirani passes through Walkerston. Sugar mills within a radius of 3 miles are: Te Kowai, Peri, Palmyra, Cassada, Pleystowe, Branscombe, Nebia, Dumbleton, and Palms. Sugar mills with distilleries: Alexandra, Pleystowe and Te Kowai. Formation: a sort of brittle sandstone, covered with clay, and having an alluvial surface soil. Population, 378 (census 1891), now about 500.

WALLANGARRA (28° 54′ S. lat., 151° 59′ E. long.), the southern terminal station of the Queensland Railways, the northern terminus of the Great Northern railway (N.S.W.), (called Jennings), and the changing station for New South Wales is situated in the co. of Bentinck, Carnarvon electorate, close to the border, 233 miles SSW. from Brisbane. Hotel: Commercial. It has a post, money-order and savings-bank office, telegraph, and railway station, police barracks, a Roman Catholic church, supplied from Stanthorpe, and an undenominational place of worship used by Wesleyans and Presbyterians, being supplied from Tenterfield; Episcopal services are also held. Customs officers' residence and office here also. A State school (No. 458). A small public school is located at Jennings on the N.S. Wales side. Cattle yards and goods shed have been erected for the intercolonial exchange of traffic, and additional station accommodation has been provided. The climate is cool and bracing, being about 2,870 feet above sea-level, and is well adapted for fruit-growing, especially English fruits. Boonoo Boonoo, an old N.S. Wales gold-field, is 12 miles distant, Tenterfield is also 12 miles distant, and is a depot for chilled meat industry. Population, 181 (census 1891), now about 200. Formation: granite.

WARWICK (28° 12′ S. lat., 152° 4′ E. long.), a municipal town (proclaimed May 25, 1861), on the river Condamine, about 64 miles by rail from the border of New South Wales, in the county of Merivale, and electoral district of Warwick, about 100 miles by road SW. of Brisbane (169 miles by rail). It is situated in the very heart of one of the richest agricultural districts in Queensland, and is surrounded on all sides by farms, in which operations are carried on similar to those in the "old country." It has been described as beyond doubt the prettiest, healthiest, cleanest, and most attractive inland town in the colony, with broad, straight, rectangular streets, all running due north and south and east and west; viewed from one of the surrounding hills, or from the town hall tower, the town looks like a large checker board, so evenly are the square blocks cut out, each containing 10 acres. The buildings, both private and public, have a substantial look about them; most of the residences outside the business centres, and many in them, have gardens in front of them, giving an air of comfort rarely seen in Australian towns. Two large recreation squares of 10 acres each neatly laid out and planted with ornamental trees, flowers, and shrubs, exist in the centre of the town and give to the main street a pretty and picturesque appearance. There are besides two large parks. There is an immense quantity of excellent building stone in the district, also good clay for bricks, and plenty of marble, from which an excellent lime is made; in consequence, many of the buildings are of stone and brick. Warwick is situated at an elevation above the sea-level of 1,497 feet, and enjoys a temperate and bracing climate. The municipality has an area of 24 square miles, 48 miles of streets, 860 dwellings, capital value of land being £156,312. It has four churches, English (St. Mark's), Roman Catholic (St. Mary's), Wesleyan and Presbyterian, all substantial buildings of stone. Attached to St. Mark's is a neat rectory of stone, a schoolhouse and other buildings. The Salvation Army also has new barracks of its own. The hospital is on an elevated site; it is a two-storey stone building. It will accommodate about 60 patients. The school of arts has a library of about 4,000 volumes, the reading-room is free to the public, the Council subsidizing the same. Technical classes have been established in connection therewith. The building is of brick, and is both convenient and roomy; with a large room where meetings of various institutions are held, and a billiard-room for the use of members. The post and telegraph office is a two-storey stone building adjoining the telegraph office, also of stone, erected in a central position, at a cost of about £5,500. The court-house, at the corner of Guy and Fitzroy Streets, is a commodious and ornamental building, with a clock tower; new police offices of stone are now being erected at a cost of about £6,500. The town-hall, in the centre of the town, is a very fine building of stone, two stories high, surmounted with a clock tower; behind the main building is a large room, with stage, scenery, &c., for theatrical and other performances, concerts, &c. The tower is fitted with a large four-dial clock which strikes the hours; the bell, which came from St. Mary's Cathedral, Sydney, is on the outside top of the tower, weighing nearly 3 cwt., being some 30 feet above the clock itself. The Masonic Hall is a pretentious structure, and the lodge-room is admitted to be one of the most complete in he Colonies. Four banks, the Australian Joint-Stock, New South Wales, Queensland National, and Royal, also a branch of the Government Savings Bank, are established here, and nearly all the Home and Colonial insurance companies have agents in the town and district. All the bank buildings are substantial structures in the centre of the town. The principal hotels are the Royal, Commercial, Cosmopolitan, Criterion, Sovereign, and several smaller ones. The district of Warwick has long been famous for its wheat-growing capabilities; in favourable seasons a return of 40 or 50 bushels to the acre has been harvested off some of the best land. The annual output of maize amounts to about 500,000 bushels. The district is also famous for grape-growing, and the cultivation of the grape is extending. The making of the wine is an industry which finds occupation for a large number of people. The Warwick wines are known all over the country as being sound and good. Bacon curing, quarrying, tanning, flour milling, and cheese and butter making are carried on. The district is famous for its general agricultural produce; potatoes, oats, lucerne, and other farm products are largely grown, and its gardens have the fruits of a temperate clime growing side by side with those of a hot climate. Tobacco is also grown in the district. It has long been known that auriferous reefs existed to the west of the town, in the localities of Talgai, Thane's Creek, Leyburn, and other places. Mining population estimated at 192. During 1899 the Warden was unable to report any material improvement or progress in mining matters. The wheat, flour, and wool from this district have carried off the highest honours where exhibited. Stock of all descriptions can be raised with great success. Glengallan, North and South Toolburra and Canning Downs, the principal stations in the district, are noted for their excellent stock. There are three State schools (Nos. 116, 225, 258), one boarding school, a school in connection with the Roman Catholic church, besides two or three others of a private character. Mercantile offices are well represented, several large and substantial stores, some built of brick, and some of stone, supply the wants of the districts. There are in the town two lodges of Oddfellows, (whose hall is the second finest building in the town), also of Masonic, Orange, Protestant Alliance, Good Templars, and Hibernians, a Ladies' Benevolent Society, a Convent of Sisters of Mercy, an Agricultural Society (the Eastern Downs, whose annual show is held in January), two turf clubs, a coursing club (there being plenty of hares in the district), a rifle club, tennis, football, and cricket clubs, fire brigade, and a company of the Mounted Infantry and a volunteer company. There are in the town two steam flour mills, one built of brick, the other of stone, both substantial buildings, and possessing machinery with the latest improvements. There is also a saw-mill, there being a plentiful supply of timber to work upon, and a foundry near the railway station. Warwick returns one member to Parliament, the present member being the Hon. Arthur Morgan, the Speaker. The town is furnished with an unlimited supply of excellent water from the Condamine, and gas illumines the streets and houses. The telephone is now being installed, and a through line to Toowoomba, Ipswich and Brisbane is in course of erection (1900). Coal is found in large quantities in various parts of the district and is now fast becoming an important feature in the industries of the district. A great drawback to the progress of the town has been the aggregation of the several large estates in the vicinity. The Government, however, during July, 1895, purchased 18,000 acres from these stations, within a few miles of the town, for close agricultural settlement; of this area the whole has since been selected, and the bulk of it is now under cultivation. A further area on Glengallan of 6,000 acres was recently re-purchased for close settlement. Agriculture is the backbone of Warwick, and with good land available close handy, with good markets, the progress of the town is certain. In fact, during the past years the progress of Warwick has been noted, new buildings of a substantial nature following the increased settlement on the land that has manifested itself. There is a commodious railway station at the east side of the town. Population of the town, by census of 1891, 3,402, now about 4,200; of the neighbourhood, 8,000. Warwick has two newspapers, the *Argus* and the *Examiner and Times* (published twice a week). Formation: Sandstone and limestone.

WATAWA, sometimes known as the Thirty Mile, is a settlement and railway station on the Bundaberg and Mount Perry line, 31 miles from Bundaberg, with a public-house and store attached, a blacksmith and wheelwright's shop, and Provisional School (No. 460). The neighbourhood is well timbered.

WATERFORD (27° 46′ S. lat., 153° 4′ E. long.), a small township with post-office, in the county of Ward, on the Logan River and Dairy Creek. Communication with Brisbane, 22 miles NW., daily by the South Coast line, which was opened in 1885. Products of district: sugar, maize, cattle, and dairy produce. State school (No. 130). Churches: Roman Catholic and Lutheran. Hotels: Waterford Arms and Morning Star. There is a saw mill in the vicinity. Population, 133 (census 1891).

WATSONVILLE (17° 23′ S. lat., 145° 11′ E. long.), co. Chelmsford, Herberton police district, electorate of Woothakata, a tin-mining locality with post and telephone office, about 7 miles NW. from Herberton, situated on Jamies Creek, a tributary of the Walsh river, on a sandy flat at the base of the Great Western Hill. The town owes its founding to the discovery of tin here on February 19, 1881, by Mr. R. H. Watson. Hotels: Post Office, Albion, Commercial, and Royal. It has two stores, a State school (No. 220), with teacher's residence, a court-house, police-station, and school of arts, with library of 1,048 vols. Church of England and other services are held in the school of arts; Roman Catholic chapel. Coaches run *viâ* Herberton to Mareeba, the present terminus of the Cairns-Herberton railway; coaches also run to Montalbion and Irvinebank, but the nearest railway line is "The Pinnacles," on the Chillagoe Company's line. Lodes containing silver and copper, which assay well, have been opened. The tin-mines in the vicinity comprise the Ben Lomond, King of the Ranges, T Claim, Glencairn, Wild Irish Girl, the Pioneer Tin Mining Company, the New North Australian, and several other claims. At Eureka are the Gladstone, Ivanhoe, Young Australia, Blackrock, and Great Eastern claims. From the T Claim good tin has been obtained at a depth of 444 feet. Copper is also plentiful in the district. The Great Western claims are on the top of a very precipitous mountain, forming a portion of the divide between the Wild river and the Walsh, the former being eastern and the latter western (or Gulf) waters. Work has been actively renewed at Silver Valley by a German company. The country between Herberton and the Western is particularly rugged, and the Great Western Hill is estimated to be 3,500 feet above sea-level. At Bakersville about four miles from Watsonville, on the Irvinebank dray track, rich tin lodes have been discovered, particularly in the Tourmaline claim. Various tin mines are at Eureka Creek, Irvinebank, and Cumming's Camp. Silver centres are Montalbion

and Orient Camp. Copper has been discovered in the Tait district, about 60 miles distant. Formation: Primary chiefly granite or porphyry. Population, 142 (census 1891); now about 350.

WESTWOOD (23° 37′ S. lat., 150° 8′ E. long. a money-order, savings bank, telegraph, and post-town, in the Port Curtis district, and station on the Central Railway, 30 miles SW. of Rockhampton. Inns: Westwood and Railway. It has two places of worship, Wesleyan and Catholic (St Bridget's), school of arts, and a school (No. 119). Both copper and gold have been found in the neighbourhood, and claims have been worked. Population, 114 (census 1891); of district, 1,602.

WILD RIVER. *See* HERBERTON.

WINDORAH. *See* STONEY POINT.

WINTON (22° 33′ S. lat., 143° 3′ E. long.), co. of Ayrshire, electorate of Gregory, police district of Marathon, a post town with money-order, telegraph, and savings bank office, situated on the Pelican Waterholes (on the north side of the Western River), 131½ miles from Hughenden, 130 miles from Longreach, and about 1,018 miles (*viâ* Rockhampton) NW. of Brisbane. The line was extended to here in 1899, and it is now the terminus of the Northern railway. It has ten hotels, the North Gregory, Royal Mail, Club, Post Office, Winton, Imperial, Cosmopolitan, Tattersall's, Australian and Railway; five stores, post and telegraph office, hospital, court-house, water supply office, branches of the Queensland National, Australasia, and N. S. Wales Banks, quarters for Inspector of Police, Roman Catholic church, St. Paul's Church, Winton Divisional Board offices, many tradesmen's premises, aërated water-works. State school (No. 478), School of Arts. Lodges: Oddfellows, Loyal Winton M.U.I.O.O.F., Masons, Alfred Neal (W.M.). Coaches run to Longreach, Boulia, and Cloncurry. The water supply is derived from a Government bore sunk to a depth of 4,010 feet, yielding 650,000 gallons daily, and from waterholes in Western River and Mistake Creek. Water has been found at a great depth by boring, and the outflow is estimated at 647,000 gallons per day. A scheme for reticulation of bore water has been carried out, the pressure being 123 lbs. to the square inch. Between Winton and Muttaburra, and Winton and Hughenden, several large water tanks and dams have been formed. Surrounding country is reported to be good and soil rich, and if adequately watered would produce large and valuable crops of fruit and agricultural produce. Around Winton is some of the richest pastoral country in Queensland. It is the centre for twelve large stations, and is also on the principal stock route in the colony. Population, 625 (census 1891), now estimated at 900. Local paper: *Winton Herald.*

WITHERSFIELD a station on the Central Railway, 203 miles W. of Rockhampton. About 12 miles NNE. from here is Retreat Creek, where sapphires, zircons, and other precious stones in large quantities have been found. There are three reward claims held by Richardson and Fisher, and ten other holdings. The former are reported to be the most promising; the "finds" so far have been sapphires of every shade of blue, green, yellow, and some red (ruby), spiral crystals and zircons, and also a true ruby, the first ever found in Australia. Many of the stones have been cut and polished in Brisbane, and are reputed to be of great value. The stones are found in a gravelly drift; the source is unknown, but believed by the Government geologist to be from the desert sandstone, probably on the divide between the Barcoo and Burdekin water, where there is a large area of desert sandstone.

WOOLGAR (co. Rupert), a gold-field adjacent to the Etheridge, on the Woolgar River, a tributary of the Flinders, about 80 miles north of Richmond, and about 150 miles S. of Georgetown, 150 miles W. of N. of Hughenden railway station, to which a coach runs *viâ* Richmond, reported to be rich in mineral and auriferous deposits, with reefs well defined. Silver and galena lodes with a percentage of gold exist here. The reefing places are Lower Camp, Middle Camp and Cattle Camp. Early in 1900 the Warden reported depression in mining matters. Population of district, 60.

WOOLLOONGABBA. *See* BRISBANE SOUTH.

WOONGARRA (24° 50′ S. lat., 152° 25′ E. long.), is a village in county Cook, lying some six miles from Bundaberg. It contains Primitive Methodist, Episcopal and Apostolic (German) churches, and a State school. The land about is very fertile in some parts, and sugar is largely grown, also corn. There are many plantations and mills in the surrounding district. In the neighbourhood of Woongarra rises the singular mountain known as the Sloping Hummock, the only elevation near the town of Bundaberg. Formation: volcanic. Soil red chocolate and sandy loam.

WYANDRA is 544 miles W. of Brisbane, on the Warrego river, and is becoming place of some importance, having postal and telegraphic communication. There are three hotels, wholesale and retail stores, blacksmith's and wheelwright's shops, and carrying agent's premises. There is a provisional school, with an attendance of 35.

YAAMBA (23° 5′ S. lat., 151° 25′ E. long.), (county of Livingstone), a township, with telegraph and money-order office on the Fitzroy River, about 20 miles N. of Rockhampton and 450 NW. of Brisbane. State school (No. 120), and two hotels. Pastoral district. Population, 136 (census 1886).

YANDILLA (27° 50′ S. lat., 151° 22′ E. long.) is on the Grasstree Creek, 150 miles SW. of Brisbane. Communication is by the Pittsworth Railway Station, from which it is about 13 miles distant. It has one place of worship, Church of England. The surrounding district is occupied for grazing and wheat-growing purposes. A provisional school did exist here, but it has been removed to Millmerran, a new town centre which has sprung up seven miles distant from Yandilla.

YATALA (27° 45′ S. lat., 153° 10′ E. long.), a small township on the Albert River, 2 miles from Beenleigh, in the county of Ward, with hotel, ferry, and Roman Catholic chapel. Communication with Brisbane, 26 miles distant, is by rail and weekly steamer. The Stapylton railway station is about half a mile distant. Several sugar mills are in the vicinity. Population, 81 (census 1891); with district about 150.

YENGARIE (25° 32′ S. lat., 152° 34′ E. long.), (county March, Burrum electorate, Maryborough police district), a township on Graham's Creek, a tributary of the Mary River, and touched by the railway between Gympie and Maryborough, about 5 miles from the latter port by road and 9 by rail; about 120 miles NW. from Brisbane. Hotel: the Mary River. There is a receiving office in connection with the railway station and in the village is a State school (No. 121), and public hall, one store, a butcher's and a baker's shops, &c. A brick Divisional Board room has been erected about three-quarters of a mile distant. The Antigua Board meets here once a month. Roman Catholics hold services every two months. A Lay service (Church of England) is held every Sunday evening. There is a ferry punt working on the Mary River near the Mary River Hotel. Land is very suitable for wheat and other cereals as well as green crops, and transit to market easy both by rail and road. Population, 168 (census 1891).

YEULBA (26° 43′ S. lat., 149° 24′ E. long.), sometimes written as Yuleba, Yuelba, and Yulebah, is a post town, with savings bank and money-order office, telegraph and railway station on the Western Line, 281 miles W. from Brisbane, in the county of Waldegrave, electorate of Murilla, and police district of Roma, on the creek of the same name. Coaches run to St. George: fare, 40s. The stations in the neighbourhood are Bendemere, 8 miles north, Moongool, 12 miles south, Wallumbilla, 12 miles west. There are three hotels. Yeulba has Anglican and Roman Catholic places of worship. It lies about 986 feet above sea-level. As this is expected to be the point to which the traffic from Surat and St. George will converge, and the depôt from which stock will be forwarded by rail, the necessary stock yards and other conveniences for the traffic have been erected. It is reputed to be one of the most important stations for carrying traffic, as it supplies the country south to N.S. Wales border and north to the Dawson river. Business places are six stores, one butchers, two blacksmiths, one saddler, and saw-mill. Police station and court-house. State school No. 372. The country is rather heavily timbered with good workable timber (pine and hardwood), and well supplied with water. The Experimental Farm is in the neighbourhood, about a mile from the railway station. It has an area of 400 acres, all fenced in, but it has been turned over to the Police Department; 200 acres are now used as a police paddock, and 200 acres are used by the Rabbit Board. Good agricultural district, only medium grazing not being well suited for sheep. Yeulba is the post town for the following stations: Warkon 35 miles SE., Muggleton 28 miles NW., Clifford 35 miles NW., Bundi 42 miles NE., Wallabilla 18 miles S., and Tinawan 25 miles S. Population, 233 (census 1891). Formation: sandstone ridges, red loam, brown and black soil flats. Newspaper: *News Budget.*

THE STATE (LATE THE COLONY) OF TASMANIA.

THE STATE (LATE THE COLONY) OF TASMANIA.

THE island of TASMANIA, or, as it was formerly called, Van Diemen's Land, was discovered on the 24th November, 1642, by Abel Jans Tasman, an enterprising and skilful Dutch navigator, who was commissioned by Anthony Van Diemen, then Governor-General of the Dutch East Indies, to explore the "Great South Land." Tasman sailed from Batavia on August 4th, in command of two vessels, the *Heemskirk* and the fly-boat (or tender) *Zeehaan*. He anchored in Frederick Hendrik Bay (so named after the Stadtholder of Holland), on the south-eastern coast, on the 1st of December, 1642, and named the newly-found land Van Diemen, after the Governor-General, Anthony Van Diemen. (The change of name to Tasmania took place on January 1st, 1856, in reply to an address from the Legislative Council, in which it was represented that the "letters patent of the Bishop were for the diocese of Tasmania, and that the colonists used the title generally, and it was preferred to Van Diemen's Land by the colonists and by this Council.") Tasman's stay was limited to five days, when he left for New Zealand; his impression was that the land formed part of the great mainland. The first land seen by Tasman was Point Hibbs, about 30 miles to the south of Macquarie Harbour. On March 4th, 1772, Captain Marion du Fresne, a French navigator, commanding the *Mascarin* and *Castries*, landed in Frederick Hendrik Bay, but, after a brush with the natives, some on both sides being wounded, finding neither wood nor water, he departed with a poor opinion of the capabilities of the island. On March 9, 1773, Captain Tobias Furneaux, of the *Adventure*, discovered Adventure Bay; he sailed along the eastern coast to the latitude of 40° 50′, and then steered for New Zealand, being convinced "that there was no strait between New Holland and Van Diemen's Land, but a very deep bay." Captain Cook, of the *Resolution*, also landed at Adventure Bay on January 26th, 1777, when on his third voyage, and held friendly intercourse with the natives. In 1778 the island was visited by Lieutenant Bligh, and later on again, in 1792, when he planted some fruit trees. In 1789 John Henry Cox, in the brig *Mercury*, discovered Oyster Bay. In 1792 (April 20) Admiral Brune d'Entrecasteaux, in the *Récherche*, accompanied by Captain Huon Kermandee, in the *Espérance*, in the course of the search after the unfortunate *La Perouse*, sailed up the Huon and the Derwent, discovering the channel bearing the name of d'Entrecasteaux; in 1793 (January 20) they returned in order to complete their observations; in 1794 Captain Hayes, of the Bombay Marine, with the ships *Duke* and *Duchess*, made further examinations of the same localities. In 1798 the island was further explored by Dr. Bass, surgeon of H.M.S. *Reliance*, who established the fact of its insularity; the straits separating it from the continent of Australia were named after him by Governor Hunter. The first voyage was undertaken in a tiny craft called the *Tom Thumb*. On a subsequent occasion the voyage was made in the colonial sloop the *Norfolk* (25 tons), Flinders being associated with Bass, and 8 volunteer seamen forming the crew. Port Jackson was left on October 7th, 1798; on November 1st the North Coast of Van Diemen's Land was made, and a course westward steered along it, until the extreme north-west headland, Cape Grim, was made, whence a southerly course along the western coast of the island was steered. Port Dalrymple (on which Launceston is now situated, named after the hydrographer of the Admiralty, Alexander Dalrymple), was entered on the 3rd, and quitted on the 20th; the River Derwent was made on the 21st, and the sloop was taken up the river some 12 miles. On January 3rd, 1799, the head of the little craft was pointed Australia-wards; land near Ram Head was sighted on the 9th, and two days afterwards the *Norfolk* was safely anchored in Port Jackson.

In 1802 the French Exploring Expedition, under Commodore Baudin, the vessels being the *Geographe* and *Naturaliste*, examined the eastern coast of the island, and at Port Cygnet, near the entrance of D'Entrecasteaux channel, communication was had with the aborigines.

Van Diemen's Land was taken possession of in August, 1803, by Lieutenant John Bowen, of H.M.S. *Glatton*, who, with Mr. Jacob Mountgarret as surgeon, Mr. Williams as storekeeper, a detachment of the New South Wales corps, and ten male and six female prisoners, left Sydney in the *Lady Nelson* on or about June 3rd, for the purpose of forming a subsidiary penal settlement, and of forestalling the French Exploring Expedition under Commodore Baudin, which was believed to be casting longing eyes on the island. Lieutenant Bowen, who bore the title of Commandant and Superintendent, landed at a spot on the banks of the Derwent river, and eventually Risdon was chosen as the site of the future convict establishment. Lieutenant Bowen was succeeded, in 1804, by Colonel David Collins, formerly Judge-Advocate of Sydney, who had previously visited Port Phillip, and abandoned it, from its supposed unfitness for colonization purposes. Collins, disapproving of the spot selected by Lieutenant Bowen for settlement, selected another locality on the shores of Sullivan's Cove, on the opposite side of the Derwent (named after the Derwent in Cumberland), as the site for the future town, and it was named Hobart Town, after Lord Hobart, at that period Secretary of State for the Colonies (on January 1, 1881, this name was altered to Hobart). Colonel Collins's expedition sailed from England on April 24th, 1803, reached Port Phillip in October, and left there on January 27, 1804. It consisted of H.M.S. *Calcutta*, 50 guns, under the command of Captain Daniel Woodriff, R.N., and the hired transport *Ocean*, 481 tons register, Captain Mertho. Besides prisoners and marines, it comprised a number of individuals appointed to fill the various offices and departments of the infant settlement, among others, Rev. R. Knopwood, chaplain, E. Bromley, surgeon superintendent, W. Anson, colonial surgeon, A. W. H. Humphreys, mineralogist, Lieutenant Fosbroke, deputy commissary general, G. P. Harris, deputy surveyor, Thomas Clarke, and William Paterson, superintendents of convicts. There were 307 convicts and 12 women (wives of prisoners), also 6 soldiers' wives; the entire party being under the guardianship of a detachment of the Royal Marines, consisting of 39 privates, 3 sergeants, 1 drummer, 1 fifer, officered by Lieutenants William Sladen, J. M. Johnson, and Edward Lord, with Lieutenant-Colonel David Collins as supreme head. (The last of this party, Mr. Thos. Wiggins, who was born on board the ship *Calcutta*, June 11th, 1803, died in September, 1884. The oldest resident of Tasmania, born at Risdon in 1805, Mr. John Hayes, died early in 1884.) Just before leaving Port Phillip the commanding officer issued a garrison order, dated December 31, 1803, in which he stated that he hurried the departure of the vessels from "so unpromising and unproductive a country." In another despatch he says, "I found Port Phillip wholly unfit for the settlement." The transference was made in the *Ocean*, the *Calcutta* having, according to instructions, gone on to Port Jackson. Two trips were necessary; the first embarkation taking place on January 25 and 26, and the second on April 20; on her first trip the *Ocean* arrived in Risdon Cove on February 15, and on the second she anchored on May 25. Soon after landing, scurvy prevailed for some time, and the aborigines, too, were found to be very troublesome. On May 3, 1804, a hostile encounter between about 500 of them (supposed to belong to the Oyster Bay tribe) and the troops took place, which resulted in 50 of the natives being shot. This collision was the beginning of the Black War, which continued with little intermission till 1832, when the majority of the natives had been exterminated. It is said that the natives had no hostile intentions on the settlement, having their wives with them, and that the action of the soldiers in shooting them was caused by fear and misapprehension of their friendly signs and intentions, and the condition of the commanding officer, one Lieutenant Moore. In the following year the natives attacked the settlement, but were repulsed with a loss of 40. There are no means of ascertaining the aboriginal population at this time; but the Brown river tribe alone consisted of 300, and the Ben Lomond and Oyster Bay tribes were still more numerous. In 1804 Port Dalrymple was settled from Sydney by Colonel Paterson; the entrance to the Tamar and the country having been previously surveyed and favourably reported on by the commander of the *Lady Nelson*. He took possession on October 10, the debarkation taking place on the 14th. His party consisted of 66 soldiers and a few convicts. In the *Gazette* of January 6th, 1805, the locality is described as "at the head of the western arm, between two streams of fresh water named Kent's and McMillan's Burns; it is intended to name the settlement York Town Two years later, however, a more suitable locality was found for the new settlement at what is now Launceston, named after Launceston in Cornwall, in honour of Governor King, who was born there; though it took some time for the recognition and confirmation of this spot as the capital of Northern Tasmania—Yorktown or Yorkton, and Georgetown for years disputing the palm for the seat of Government.

The colony made but little progress at first, and the inhabitants, being dependent for their support on foreign supplies, suffered many hardships, were frequently reduced to great straits, and for several years had a desperate struggle for existence. Kangaroo was purchased by the commissariat at 8d. per lb., and flour was £112 per ton. The wheat crop failed in 1807, and the price of that article rose to £4 per bushel, which would make flour about £200 per ton. The selling rate was regulated by a garrison order, and armed sentinels mounted guard over the wheat-fields, so valuable had the corn become. In 1808 the position of the settlement was fearful, as by July all the wheat and maize had been consumed, and in the following month the salt beef and pork gave out, and kangaroo meat had to be the means of subsistence. In October all the barley was eaten up, and 1½ lbs. of rice were issued as the weekly ration of each man. Only one vessel arrived during this year from Bengal with sugar, which was purchased by the Government, and issued to the settlers. In 1809 the settlers were allowed to pay their debts to the Crown in wheat at 15s. per bushel. It was not till nearly three years after the settlement that the first sheep and cattle were imported. On January 8, 1810, the first newspaper issued in Tasmania, the *Derwent Star and Van Diemen's Land Intelligencer*, was published. It was of quarto size, issued fortnightly, at 2s. a copy. After the death of Colonel Collins, which occurred suddenly on March 24, 1810, Lieutenant Lord, Captain Murray, and Lieutenant-Colonel Gells were successively the acting commandants of the colony. On the night of Colonel Collins's death two officers of the Government, for some unknown reason, burned all the official books, papers, and documents they could find. During Captain Murray's administration Governor Macquarie visited the island and partially traced out the future City of Hobart, naming many of the principal streets. The population at this time was estimated at 1,500. Population began to stretch over to Launceston, the vicinity of which was more favourable for cultivation than that of Hobart, and in 1812 Major Gordon was appointed Commandant at Port Dalrymple. In the early days of the colony much of the business was

transacted by paper money, in the form of promissory notes varying from sixpence to a dollar. H.M. Stores were the grand depôt for all sorts of provisions; stock and material there were sold to the settlers and promissory notes, payable in three years, either in money or kind, were accepted as payment. So late as 1819 the officer who then took charge had to look up between £3,000 and £4,000 of these bills, and to call in the cows and sheep—with indifferent success.

In 1813 (February 4th) Colonel Thomas Davey became the Lieutenant-Governor, and though a man of coarse and rough habits, with little regard for conventional rules, yet during his *régime* the colony steadily progressed. The ports were opened for general commerce in June, 1813. In 1816 the first corn was exported to New South Wales, and whales were caught in the Derwent. During this year Captain Kelly discovered Macquarie Harbour and Port Davey. On June 1st of that year the *Hobart Town Gazette and Southern Reporter* was first published by Andrew Bent, Mr. Emmett being the first official editor. In 1824 the title of the paper was changed to the *Gazette and Van Diemen's Land Advertiser;* it ceased to appear on August 19th, 1825. Colonel Davey's administration lasted about four and a quarter years, when he relinquished his appointment to settle on the land, but finally returned to England, and died there on May 2nd, 1823. Colonel William Sorell, 48th Regiment, assumed the governorship in 1817 (April 9th). Bushranging about this time became prevalent throughout the island; large rewards were offered for the death or capture of these robbers, and in some instances this resulted in their apprehension or destruction. During the second year of his administration a census was taken, and statistics regarding the social and agricultural position of the colony were collected. The population was then 3,240. Early in 1819 Judge Wylde, from Sydney, held the first criminal sitting, all prisoners prior to this date having been sent to New South Wales for trial. In 1820 the first importation of Merino lambs took place from Mr. Macarthur's flocks. Of 300 shipped about 200 were landed, which were distributed to the settlers by lot. The census taken in 1821 showed as follows: population, 7,400; sheep, 182,468; cattle, 34,790; horses, 550; and 14,940 acres of land under cultivation. Successful industry evoked commerce; 26 vessels arrived and sailed, 20,000 bushels of wheat were exported to Sydney, and a weekly post was established between Launceston and Hobart Town. In 1818 the first ship bringing passengers direct from England arrived; and in 1821 the first wool, consisting of 12 bales, was exported from Tasmania to London, realizing 7d. per pound, or £88 for the entire shipment. On October 29, 1820, the first gathering of Methodists took place. The place of worship was a house in Collins Street, Hobart, the worshippers numbering eight. In the previous year the Rev. B. Carvosso, on his way to New South Wales, had initiated the Wesleyan ministry by holding services. On May 13, 1821, the first Sunday-school in the island was established. The Presbyterian Church was founded in 1823 by the Rev. A. Macarthur. The first Congregational Church was not established till 1830.

In 1822-23 several breweries and distilleries were commenced. About the same period the Home Government introduced Courts of Justice for all civil and criminal matters, by sending a Chief Justice, Mr. John Lewes Pedder, with the necessary officials for a supreme Court of Judicature. The court was first opened for business on May 24th, 1824, Mr. J. Tice Gellibrand being Attorney-General. In 1823 Colonel Sorell was relieved from his post, after a period of seven years' service. On leaving Tasmania he received an address and a testimonial of £750 from the colonists. His recall was earnestly petitioned against, but the petition was received too late. He died in England on June 4, 1848, twenty-four years after leaving the colony. On May 14th, 1824, he was succeeded by Colonel George Arthur, formerly Superintendent of Honduras, who, by his energetic rule, restored order in all departments, and succeeded in elevating the character of the colony. From that time the records of Tasmania are formal and authentic; up to then the colony might be said to have been governed by garrison orders. A *carte blanche* could not have conveyed fuller powers than the local rulers exercised.

In the early part of 1824 the colonists petitioned the Home Government for independence; this petition was favourably received, and in December of the following year Van Diemen's Land was erected into an independent colony. On January 5th, 1825, the first newspaper issued in Launceston, called the *Tasmanian Gazette and Launceston Advertiser*, appeared, Mr. George Terry Howe being the printer. In 1827 Colonel Arthur divided the colony into districts, and placed each division under the charge of a stipendiary magistrate. In 1827, also, the Archdeacon of New South Wales made his first visitation. About this time the Van Diemen's Land Company commenced operations, having received a grant of 250,000, ultimately increased to 350,000 acres; and the first land sales took place. In 1828 the Queen's Orphan Asylum was founded (it was closed in 1879). In 1829 (February 9) Mr. J. P Fawkner, the founder of Melbourne, started the *Launceston Advertiser*. After the departure of Colonel Arthur the government was administered from October 31, 1836, to January 6, 1837, by Lieut.-Col. Snodgrass. Sir John Franklin—afterwards lost in the Arctic regions (in June, 1847)—was the next Governor, assuming office on January 6th, 1837, under whom Tasmania made great progress. In his efforts he was much assisted by his noble wife, the late Lady Franklin. He left the colony in August, 1843, and was succeeded by Sir Eardley Wilmot, who governed but a short time (from August 21, 1843, to October 13th, 1846), the measures he initiated giving great offence; these, and rumours affecting his moral character (believed to be false), ultimately leading to his recall. He died, however, at Hobart, on February 3, 1847, it is said of a broken heart, and was honoured with a public funeral. After his retirement the government was for a short time administered by Mr. C. J. Latrobe, the first Governor of Port Phillip. In 1842 (March 12), the *Launceston Examiner* began its career, absorbing the *Launceston Advertiser*, and eventually the *Cornwall Chronicle*, being now the oldest existing newspaper in the colony. The *Hobart Mercury* was first published as a daily paper, on January 1st, 1858. During its career it has incorporated the *Colonial Times* and *Tasmanian Daily News* and *Courier*. The diocese of Tasmania was founded by letters patent on August 27, 1842, when Dr. Francis Russell Nixon was constituted first bishop. Two eras in the history of the colony occurred under the governorship of Sir William Thomas Denison, who took office on January 26th, 1847—one being the cessation of transportation, in 1853, which, however, was only brought about by the most strenuous exertions and earnest representations of the colonists of Australia generally; and the other the discovery of gold in Australia in 1851. This latter fact had an untoward influence on the fortunes of the colony for a long time, leading to a great exodus of the population, which more or less continued until the last few years. Another event of great importance was the establishment of Representative Government. Sir Henry Young succeeded Sir William Denison in the governorship of Tasmania, being the first Governor-in-Chief: he filled the office from January 8th, 1855, to December 10th, 1861. During his time the electric telegraph was introduced, the division of the colony into municipalities took place, the metropolis was lit with gas, railway communication was initiated, and the first submarine cable connecting Tasmania with Victoria was laid. Colonel T. Gore Browne was the next vice-regal representative, and remained in office till December 30th, 1868. In December, 1868, H.R.H. the Duke of Edinburgh visited the colony. On January 15th, 1869, Mr., afterwards Sir, Charles Ducane, K.C.M.G., arrived in the colony. He mixed freely in the amusements and movements generally of the colonists, and became very popular. During his governorship the opening of the Launceston and Western Railway took place (February 10, 1871), telegraphic communication with Victoria was successfully completed, and the discovery of tin at Mount Bischoff was made by James Smith (December 4, 1871). In July, 1874, Mr., afterwards Sir, F. A. Weld, formerly Governor of West Australia, was gazetted to the governorship of the colony, being sworn in on January 13th of the following year. He completed his term of office in the early part of 1880, and was succeeded by Major Sir G. C. Strahan, K.C.M.G., late governor of the Barbados and Windward Islands, who, however, only arrived in the colony on December 7, 1881, having in the meantime administered the government of the Cape Colony, pending the arrival of Sir Hercules Robinson (the late Lord Rosmead). After the retirement of Mr. Weld the government was administered for a time (April 6 to October 21) by Sir Francis Smith, the Chief Justice, who was afterwards relieved by General Sir J. H. Lefroy. Sir J. H. Lefroy, during his short time of administration (October 21, 1880, to November 25, 1881), quite won the hearts of the colonists, becoming the most popular governor they had had for years. During the period of his sojourn he is said to have promoted in every possible way the social, material, and highest interests of the people under his rule; and in all works of benevolence and philanthropy was worthily seconded by Lady and Miss Lefroy. He departed from the colony on November 25, 1881. Sir George C. Strahan, his successor, acquired a considerable degree of popularity by availing himself of every opportunity of gaining a thorough knowledge of the resources and requirements of the colony. He left in December, 1886, and died in England shortly after his return (on February 18, 1887). Sir Robert C. Hamilton arrived in the colony on March 11, 1887. His term of office expired during October, 1892. He died in England in April, 1895. His successor, Viscount Gormanston, arrived in Hobart on 8th August, 1893. His term of office terminated in November, 1900. He left the colony in August, 1900, and the Chief Justice will hold the Governatorial office till a successor is appointed.

For many years past the progress of improvement and development in the colony has been marked with decisive strides. The improved intercommunication which is now afforded by the railways, and the general improvement of ordinary roads continues to give a decided impetus to agricultural operations. Railway transit is now speedily effected from Hobart in the south to Scottsdale in the north, the extension from Launceston to Scottsdale, passing through some magnificent agricultural country. The Formby line, also now extended to Emu Bay, taps splendid country, as also the Derwent Valley line, which now terminating at Glenora will, on its extension towards Hamilton, pass through large areas of fertile and well-timbered country. Survey for extension of this line right through to the West Coast, is being made, and will give direct communication with the silver fields and open up much valuable country. The syndicate formed among Australian and London capitalists for construction of the Great Western Railway have commenced this work. Its estimated cost for construction and equipment is £1,400,000. The Brighton and Apsley line and Sorell and Hobart line bring producers and consumers into closer business connections. The branch line to Chudleigh and Mole Creek is a useful feeder. The lines from Strahan to Zeehan and Strahan to Mount Lyell (Queenstown) give easy communication between the sea-board and the silver fields, and light tramways form connecting traffic links between Zeehan and Dundas. The V.D.L. Company's line between Burnie and Waratah has been extended to Rosebery, and its extension to Zeehan and probably to Gormanston is a work of the near future. An extension of the Formby line from Ulverstone to Burnie is now nearly completed, and forms a connecting link in the through railway service. The West Coast silver fields continue to develop most encouragingly. Mt. Lyell, one of the richest silver

districts, if not the richest, in the world, has been opened up by a railway connecting with Strahan. Extensive smelting works are now in operation, and others are projected. Bullion is sent to Hobart for transhipment in English steamers. The deepening of the Macquarie Harbour bar to admit large vessels entering has been decided on and a contract for breakwater construction commenced. An expert report gives an estimate of £250,000 as cost of necessary work, with a probable heavy increase as the actual necessities of the parts are developed. The coal measures at Mount Nicholas and Cornwall (Fingal district) are systematically worked, the coal proving excellent in quality and abundant in quantity. For domestic purposes it is almost beyond compare, it also cokes well, and is used exclusively on the Tasmanian railways. Coal mines at Hastings, in the southern part of the island, are being brought into profit. At Jerusalem a mine has been opened, and at Langloh, in the Glenore district, 55 miles from Hobart, some splendid coal has been struck. Coal seams which promise to be valuable, have been struck at Ivanhoe, in the Derwent Valley. Bituminous coal has been struck at Eden, near Zeehan. Tin, both lode and alluvial, is being developed in many places with profitable results. The hydraulic system of working is in operation on both the East and West Coast, and plans are being matured for utilising the dredging system. The timber industry, notwithstanding adverse tariffs in adjacent colonies, fairly holds its own, especially in the southern and south-west districts, where magnificent pine forests exist almost intact. A patent system of drying the wood, thus reducing its weight and making it fit for immediate use, is in operation in Hobart. The fisheries of the island give promise of a wonderful abundance when present careful conservation has been judiciously relaxed. The Territorial revenue for 1899 amounted to £80,500, including sales and rental of Crown lands. The capital value of land subject to real estate duty and land tax was in 1899, £19,213,591. A new Assessment Act comes into operation in 1901.

Geographical Features.—Tasmania is about one-sixth smaller than Ireland and a little larger than the island of Ceylon. Its length is 170 miles, or if taken from Cape Grim to South Cape, 210 miles, its greatest breadth 200 miles, and the area about 24,330 square miles, or 15,571,500 acres, exclusive of lakes and islands which belong to the colony, the aggregate of these being 1,206,500 acres; including these the total area is 16,778,000 acres, or 26,215 square miles. It is in the form of a triangle, or rather of a heart. Tasmania is situated between the parallels of 40° 40′ and 43° 38′ south latitude, and 144° 30′ and 148° 30′ meridians of longitude east, at the southern extremity of the Australian mainland, from which it is divided by Bass's Straits, about 150 miles wide. The precise latitude of Hobart is 42° 53′ 25″ S.; longitude, 147° 20′ 6″ E. It is conjectured that Tasmania was once part of the mainland, the islands in the Straits being, it is supposed, part of a mountain range that connected the two lands. Indeed, it has been asserted that in remote ages Tasmania, Australia, and New Zealand all formed part of one immense continent that extended to Madagascar, Andaman and Ceylon. The botanical researches and comparisons of Drs. Hooker and Mueller go far to confirm the supposition of the connection of the Islands of Tasmania and New Zealand with the mainland; the analogy of the flora of New Zealand and Australia, and of Tasmania with both, being, it is said, almost complete. Tasmania has been described as "a beautiful, well-watered island, rich in harbours and inlets, traversed by high mountain chains, full of crags, glens, and ravines of commanding appearance, the basaltic cliffs of some being several hundred feet in perpendicular height. Everywhere on the coast there are good anchorages, and many excellent harbours. Altogether the coast offers the most manifold changes, and generally charming scenery, being for the most part of a bold and rocky character. The interior especially is delightful, and here are united, so to speak, the climate of Italy, the beauty of the Apennines, and the fertility of England. Mountain and valley, hill and dale, crowned with high forests, and rich pasture grounds in the plains, afford the most pleasing variety."

Islands.—The principal islands belonging to Tasmania are fifty-five in number. The Furneaux group, at the east end of Bass's Straits, and off the NE. corner of Tasmania, including Flinders Island, with an area of 513,000 acres; Cape Barren Island 110,000 acres, and Clarke Island 20,000 acres; beside these are Chappell Island and Kent's Group, aggregating about 27,000 acres. These islands are inhabited by persons who procure a living by seal-fishing and preserving mutton-birds. They number 450 males and 375 females. Many of them are "half-castes," the offspring of marriages between the sealers and aboriginal women. At the time of the census there were living 19 adult descendants of Tasmanian aborigines. At the West end of Bass's Straits are:—King's Island, 272,000 acres, has a lighthouse on its most dangerous side, and a second lighthouse at Currie Harbour. Settlement is rapidly expanding here, many settlers having taken up land and secured steam communication with the mainland; Robin's Island, 24,500 acres; and Hunter's Islands. Other islands of importance are—Waterhouse Island, Swan Island, Schouten Island, 7,000 acres; Maria Island, 24,000 acres; Bruni Island (north and south), 90,000 acres (South Bruni Island was the locality where the aborigines collected by Mr. Robinson were placed); Slopen, Franklin, and Huon Islands. Macquarie Island, formerly an appanage of New Zealand, is under Tasmanian control. There are no permanent settlers; but at certain seasons penguin and seal oil is obtained there in large quantities.

Mountains.—Tasmania may be described as having two mountain chains, separated by the central district, through which is the communication between the north and south of the island. That to the east, or the dividing range, winding in its course in the form of an irregular Z through the island, has an average height of 3,750 feet, and an average distance of 40 miles from the sea. It runs nearly north and south, parallel with the east coast, and among the peaks are Row Tor, or Mount Arthur, 3,895 feet; Mount Barrow, 6,444 feet; Mount Victoria, 3,964 feet; Ben Nevis, 3,910 feet; Ben Lomond, 5,010 feet; Mount Nicholas, 2,812 feet; and Brown Mountain, 2,598 feet. The western chain consists of an elevated table-land, averaging 3,000 feet in height, in the centre of the island, which contains all the large lakes, and from which diverge numerous ranges in all directions except to the eastward. From the table-land spring the following peaks:—Table Mountain, 3,596 feet; Miller's Bluff, 3,977 feet; Dry's Bluff, 4,257 feet; Quamby Bluff, 4,000 feet; Ironstone Mountain, 4,736 feet; Cradle Mountain, 5,069 feet (the highest in the colony); the Du Cane Range; Mount Olympus; Mount Humboldt; Mount Hugel, 4,700 feet; Mount William, 4,360 feet; and Mount Hobhouse, 4,031 feet. Among the other diverging ranges and peaks are, to the north, Mount Roland, 4,047 feet; Black Bluff, 4,381 feet; Valentine's Peak, 3,637 feet; to the west, Mount Dundas, 3,922 feet; Mount Murchison; the Eldon Range, 4,789 feet; the Frenchman's Cap, 4,756 feet; to the south are Wyld's Crag, 4,399 feet; Mount Field, 4,721 feet; Mount Anne, the Arthur Range, 3,668 feet; Mount Picton, 3,340 feet; Mount Wellington, 4,166 feet; Collins' Bonnet, 4,131 feet; Adamson's Peak, 4,017 feet; Mount La Perouse, 3,800 feet; and the Bathurst range, 2,626 feet. Besides these there are numerous others of lesser altitude in various parts of the island.

Peninsulas.—On the east coast is Freycinet Peninsula, its western shore being washed by the waters of Oyster Bay; on the south-east Forestier Peninsula, connected to the mainland by East Bay Neck. Tasman Peninsula is a continuation of Forestier, and is joined to it by Eagle Hawk Neck. Ralph Bay Peninsula is also on the south-eastern side of the island, jutting out into Storm Bay.

Capes.—On the northern coast from west to east are:—Cape Grim, Circular Head, Rocky Cape, Table Cape, Port Sorell Point, Flinders Point, Stony Head, Waterhouse Point, and Cape Portland; on the eastern coast are:—Cape Naturaliste, Eddystone Point, St. Helen's Point, Long Point, Cape Tourville, Cape Bougainville, and Cape Bernier; on the southern coast are:—Cape Pillar, Cape Raoul, Tasman Head, Bruni Head, South-East Cape (the most southerly point of the island), South Cape, and South-West Cape; on the western coast are:—Rocky Point, Point Hibbs, Cape Sorell, Sandy Cape, Bluff Point, and West Point.

Rivers.—The island is well watered, and abounds in rivers, rivulets, and creeks, many of them rising from the lakes of the table-land, the average fall to the sea being estimated at 93 feet per mile. The principal rivers are:—the Derwent, about 130 miles long (on the estuary of which is Hobart), which issues from Lake St. Clair, receiving in its course the rivers Nive, Dee, Ouse and Clyde, and Jordan from the north, and the Florentine, Russell, Styx, and Plenty from the South; the Huon, about 100 miles in length, issuing from Lake Edgar, navigable, and running through a fertile heavily-timbered and fruit-growing country, which receives the Cracroft and Picton, from the south, and the Weld and Russell from the north, and other streams, and falls into D'Entrecasteaux Channel; the Coal River, rising in the eastern chain of mountains, and running south into Pittwater. The mouths of these three rivers are to the south-east of Tasmania. To the south-west and west are—the Davey River, running into Port Davey; the Spring, falling into Bathurst Harbour; the Gordon, flowing from Lake Richmond, and receiving in its course the Wedge, Denison, Serpentine, and Franklin Rivers, falling into Macquarie Harbour; King River, with its tributaries the Queen and Elden, also falling into Macquarie Harbour; the Pieman River, consisting of the Rivers Mackintosh, Murchison, Huskisson, and Donaldson; the Arthur River, which receives the Hellyer, Horton, Waratah, and other streams—these two last falling into the Southern Ocean. On the north, flowing into Bass's Straits, are the Montagu, the Duck, the Detention, the Inglis, the Cam, the Emu, the Blythe, the Leven, the Forth, the Don, the Mersey, and the Tamar—the latter a tidal river formed by the confluence of the North and South Esk at Launceston, a stream of considerable magnitude, navigable for 40 miles from its mouth to Launceston for vessels of 600 tons drawing 16 feet of water, and to Rosevear's, 15 miles below Launceston, for vessels of much greater draught. Systematic dredging operations have effected a permanent improvement in the channel. The Launceston Marine Board, aided by the Government, has voted substantial sums for general improvement of the port, and also in the removal of rocks which had heretofore impeded navigation of the river Tamar. The North Esk receives the St. Patrick's River about 15 miles up, and the South Esk receives as tributaries the Meander Lake River, Macquarie River, St. Paul's River, and some minor streams.

To the north-east are the Piper, Little Forester, Trent or Great Forester, Little Boobyalla, and the Ringarooma—this last, the largest of all, rising in the western slopes of Mount Victoria, and debouching into Ringarooma Bay. The Mussel Roe, in the NE. corner of the Island, falls into the Bay of the same name.

Flowing to the east are the Anson, emptying into Anson Bay, the George, falling into George's Bay, Scamander, Swan, Little Swanport, and Prosser—the latter emptying itself into Prosser Bay (Maria Strait).

Bays and Harbours.—The west coast is bold, rocky, and inhospitable; but there are at least three accessible ports. The principal harbours are, on the west coast, Port Davey (formerly much frequented by whaling vessels), Pieman River, and Macquarie Harbour. On the north coast, Stanley, at Circular Head, Emu Bay, Port Frederick, at the mouth of the Mersey (Devonport), Port Sorell, Port Dalrymple, on the Tamar, Anderson Bay, Ringarooma Bay; and Waterhouse Roads between the two

last mentioned bays. On the east coast, George's Bay, Oyster Bay, Prosser Bay, Spring Bay, and Fortescue Bay. The south and south-east of the island is studded with safe bays and harbours, the principal being Port Arthur Storm Bay, Norfolk Bay, Frederick Henry Bay, D'Entrecasteaux Channel, Port Espérance, Southport, and Récherche Bay.

LAKES.—There are numerous and extensive freshwater lakes on the elevated table-lands, the largest being the Great Lake, in the county of Westmoreland (3,822 feet above sea-level), covering an area of upwards of 28,000 acres; Lake Sorell, in the county of Somerset (3,000 feet above sea-level), 12,300 acres; Lake St. Clair (3,239 feet above sea-level), in the county of Lincoln, 9,400 acres; Arthur Lake (county of Westmoreland) (3,388 feet above sea-level), 8,000 acres, and Lake Echo (county of Cumberland), occupying 8,500 acres. These lakes form the head waters of the principal streams flowing south, west, and north.

Subdivisions.—For purposes of record in the Department of lands, the colony is divided into counties, which are again subdivided into parishes. There are eighteen counties, namely:—Dorset, Cornwall, Devon, Wellington, Russell, Montagu, Lincoln, Westmoreland, Somerset, Glamorgan, Pembroke, Monmouth, Cumberland, Franklin, Montgomery, Arthur, Buckingham, and Kent. For the purpose of electing representatives to Parliament, the colony is divided into electoral districts, namely, fifteen, returning nineteen members for the Legislative Council, and twenty-nine, returning thirty-eight members for the House of Assembly. The constituencies for the Legislative Council are thirteen, returning one member each; one returning two members, and one returning three members. The electors number 9,090. For the Legislative Assembly twenty-eight constituencies return one member each, and one returns four members. The electors number 39,002. It is further divided into road districts, to manage internal communication; and municipalities, for the purpose of local self-government. There are twenty rural municipalities, each with its warden and councillors, exclusive of Hobart and Launceston, viz., Bothwell, Brighton, Campbelltown, Clarence, Deloraine, Evandale, Fingal, Glamorgan, Glenorchy, Green Ponds, Hamilton, Longford, New Norfolk, Oatlands, Richmond, Ross, Sorell, Spring Bay, Westbury, and Russell; and thirteen police districts, viz., Carnarvon, Emu Bay, Franklin, George Town, Hobart, Kingborough, Macquarie, Port Sorell, Portland, Ringarooma, South Longford, and Selby. The area of the twenty-one municipalities is 6,102,455 acres; the rates (exclusive of water-rates) vary from 2d. to 3s. in the pound in the country municipalities, and 2s. and 2s. 9d. in Hobart and Launceston respectively. The assessed annual value of property, exclusive of railways, in 1899, was £994,993—Municipalities, £676,763; Road Trusts, £557,553 (inclusive); and the capital value £20,006,000. The estimate of capital value varies from 17½ to 34¾ years' purchase, the assessors adopting differing bases.

There are 101 road districts in the colony, and the rate of assessment varies from 3d. to 1s. in the £. In the year ending 28th February, 1900, the total amount thus raised was £21,978, including Government contribution thereon of £4,524.

Government expenditure on roads and bridges amounted to £73,608.

Town Board receipts were £22,379, including £954 Government grant.

The position and features of the Counties are as follows:—

CORNWALL is in the NE., in which the northern capital of the colony, Launceston, is situated, also the towns of Evandale, Avoca and Falmouth, St. Helen's on George's Bay, Scottsdale, and the gold diggings of Fingal and Scamander. It has in all upwards of 26 townships, and is watered by the Tamar, North Esk, Nile, and South Esk rivers and their tributaries. Coal is found here, and there are extensive dairy farms and much land under cultivation. Area, 1,000,700 acres.

DORSET occupies the NE. corner, and is surrounded on three sides by water, the River Tamar forming its western boundary; it is the largest of the counties; the Ringarooma, St. Patrick, Great and Little Forester, Mussel Roe, Anson, and other streams traverse it. Georgetown, Lefroy, Lyndhurst, Ringarooma, and Bridport are its principal ports and towns. Tin and gold are found here, and there is a large extent of good farming and grazing country. Area, 1,434,800 acres.

DEVON is situated mid-north between the counties of Dorset and Wellington. It is bisected by the Launceston and Western Railway. The principal towns are—Devonport, Latrobe, Deloraine, Penguin, and Ulverstone. It is watered by the Emu, Blyth, Leven, Forth, Don, Mersey, and other rivers, and contains some of the finest agricultural land in the colony; some of it heavily timbered. Area, 1,066,300 acres.

WELLINGTON occupies the NW. corner. Its ports are Wynyard and Stanley. The principal rivers are Montagu, Arthur, Detention, Inglis, and Cam. Gold is found in the Hellyer and Arthur rivers, and the railway to Mount Bischoff tin country runs through the county. The settlement of the Van Diemen's Land Company, comprising 350,000 acres, is here. There is a large area of good agricultural and pastoral land in this county. Area, 970,700 acres.

RUSSELL is on the west coast, and contains Mount Bischoff, with its apparently exhaustless tin stores, and the goldfields of Pieman River and Meredith ranges. The Arthur, with its southern tributaries, waters the northern portion, and the Pieman the south; other streams are the Donaldson, Coldstream, and Huskisson. Generally the country is mountainous. Area, 1,140,800 acres.

MONTAGU is to the south of Russell county. Macquarie Harbour is the port. Here are the Heemskirk tin-mines, and the King River and Mt. Lyell mineral fields. This county, which is very broken and rangy, is rich in gold, silver, copper, and other minerals. The general inaccessibility of the country, and the scarcity of water for sluicing purposes, has led to an already heavy expenditure, both by the Colonial Government and prospecting associations. Government and company money is still being expended on light railway lines. A road connecting the mines with Bothwell affords communication with the settled districts, it being possible to make the through journey in three days in dry weather. Survey has been made of the Great Western Railway, to be constructed by private enterprise. Area, 594,600 acres.

MONTGOMERY is on the south-west coast, having also Macquarie Harbour for its port. It is very mountainous, and sparsely populated. The Gordon is the principal stream. Rich mineral areas are being developed. Area, 506,000 acres.

ARTHUR lies to the SW. It has a fine harbour—Port Davey—on the south-east coast, whence is shipped much Huon pine from the neighbouring forests. The rivers Huon, Davey, De Witt, Serpentine, and others water it. The county is proving to be rich in minerals. Area, 816,000 acres.

KENT is the southernmost county. Principal towns: Franklin, Folkestone, Hythe, and Bathurst. Rivers: Huon, Arve, Spring, Picton, and others. Produce: Huon pine and fruit. Area, 820,500 acres.

PEMBROKE is on the south-east coast. Principal towns: Buckland, Sorell, and Triabunna. In this county are the splendid freestone quarries of Orford, Rheban, and Okehampton, from which stone is sent to Victoria. Coal is found at Triabunna. Maria Island is a few miles from the coast, and in this county is Tasman's Peninsula. The penal establishment known as Port Arthur was here. The buildings have all fallen to decay, and some have been sold, and the material removed, except such as have been utilized for private residences, which form the little township of Carnarvon. Fires have destroyed nearly all the places of historic interest. Area, 645,000 acres.

GLAMORGAN is on the east coast. Principal townships: Seymour, Swansea, and Bicheno. Minerals: Tin on Freycinet's peninsula, and coal at Seymour and Bicheno. Extensive fruit-growing district. Principal rivers are the Swan, Elizabeth, Macquarie, and Wye. Area, 658,600 acres.

SOMERSET is an inland county, and is traversed by the Main Line of Railway. Townships: Ross, Tunbridge, Campbell Town. In this county are the large sheep pastures of Campbell Town, Cleveland, Tunbridge, and Oatlands. Freestone is found at Mona Vale and Ross. The larger streams are the South Esk, Isis, Macquarie, and Elizabeth. Area, 763,300 acres.

WESTMORELAND is a midland county to the south of Devon. The Launceston and Western Railway traverses the northern portion of it. The principal towns are Longford, Perth, Chudleigh and Westbury. Fine agricultural and farming land is found in the north. The Great Lake and Lake Arthur are in this county, and many streams run through it. Area, 767,300 acres.

LINCOLN is also a midland county, but comparatively little known and settled. Principal rivers: the Dove, Forth, Cuvier, Mersey, and Murchison. The Derwent takes its rise from Lake St. Clair in this county. This county is described as being almost entirely rugged, lofty, mountainous, and wet marshes, of coarse herbage. Area, 940,500 acres.

CUMBERLAND is an almost central county. Principal township: Ouse. Rivers: Derwent, Ouse, and Dee, and many smaller streams. Pastoral district. Coal has also been found. Area, 553,000 acres.

MONMOUTH lies to the south, and, though a comparatively small county, is one of the richest and most important, abounding in coal, and having some of the finest agricultural and fruit-growing land in the colony. The Main Line of Railway traverses its centre. The rivers are the Derwent, the Clyde, Jordan, and Coal. Townships: Bothwell, Pontville, Kempton, Richmond, and Hamilton. Area, 713,000 acres.

BUCKINGHAM lies also to the south, and is the metropolitan county. Beside HOBART, the capital, are New Norfolk, Bridgewater, Glenorchy, and Kingston. Rivers: the Derwent and its tributaries, the Huon, and several smaller streams. Coal, freestone, limestone, and excellent clay for brick making and pottery are found in this county. Area, 1,072,700 acres.

FRANKLIN county is in the SW. portion of the island; it is watered by the Franklin, Gordon (which separates it from Montgomery), Denison, and Surprise rivers. It is reported to be the most mountainous portion of Tasmania, presenting an imposing array of lofty rugged peaks, many of them attaining an elevation of over 4,000 feet above sea-level. The rivers are all very rapid, subject to sudden floods, and rush along the bottoms of tremendous gorges. It has a few townships of minor importance. Area, 1,007,700 acres.

Climate.—The climate is remarkable for its mildness, being, by its geographical position, removed from the extremes of heat or cold. The summers are not unpleasantly hot, and woollen clothes may be worn throughout the year. The winters are never so cold, even in the more elevated table-lands, as to put a stop to the operations of the agriculturist. The climatic condition of the island may be estimated by its rich *flora*, and by the healthy condition of its indigenous animals. The general death rate in Tasmania for all ages in 1899 was 12·25 per 1,000 of population. The percentage of deaths under five years was 32·58; five years and under sixty-five, 37·02; and sixty-five years and upwards, 30·40. The cause assigned for the largest number of deaths is always "old age." The percentage per 1,000 persons living over the age of sixty-five years, and dying from old age during 1899 was 35·28. Snow rarely falls in Hobart, but Mount Wellington, overlooking it, is frequently coated with it, even in the summer months. The purity of the atmosphere,

as indicated by the ozonometer, is very great, and consequently zymotic diseases have a very small share of the general mortality. The north-west hot winds of the Australian continent occasionally reach Tasmania, but are greatly subdued in temperature by their passage over Bass's Straits. The climate is a decidedly breezy and invigorating one, and is said to have almost miraculous restorative powers on the enfeebled constitutions of visitors from hotter countries. Generally speaking, throughout the summer months there are alternate land and sea breezes every twenty-four hours, which tend to cool the atmosphere in the hottest days. The prevailing winds are from the north-west and the south-east. The average temperature of the summer at Hobart is about 62°, but occasionally 100°, or even 110°, has been registered by the thermometer. The summer of 1899–1900 was marked with moderate rainfall, which assured abundant crops. The winter of 1899–1900 was in May and June the severest known for years, and there was a lack of grass. The rainfall of 1899–1900 was about the average of previous year. Thunderstorms are not common, and seldom violent. September, October, and November are spring months, at which time the weather is bright and clear, the mean temperature being 54°. December, January, and February are summer months, during which there is little rain—the mean temperature is 62°. March, April, and May are autumn months, generally the pleasantest season of the year; the medium temperature then is 55°. June, July, and August are winter months; the average temperature is 47°. The mean temperature of the year is about 55·01°. The mean reading of the thermometer during 1899–1900 was at Hobart 54·41, and Launceston 56·6. The mean number of days on which rain fell in Hobart was 177, the prevailing direction of wind being NNW. and NW. The rainfall for the twelve months ending December, 1899, was 20·520 and at Launceston 27·16 inches. The longest day is reckoned to be 15·2 hours, in December; the shortest 9, in June.

Natural Features.—In appearance the colony of Tasmania is more English than the rest of the Australian group. This remark applies to its natural as well as its social features—of course, in the districts longest settled. The surface of the island is remarkably uneven, perhaps as much so as any island known, being a succession of hills and valleys of greater or less height and depth, and peaks and glens, and it presents every variety of scenery—the snow-capped mountain, the glassy lake, the wild shore, the barren tract, the green valley, watered by never-failing rivers, the extensive sheep-land, and the wild expanse of agricultural country, studded with neat or splendid homesteads, and made pleasant to the English eye by the subdivision into fields and highly-cultivated gardens and orchards, fenced by hedges such as adorn the landscapes of Britain. The valleys and plains well repay cultivation, and there is a large area of grazing land, but in some parts of the land the soil is poor, and in others very heavily timbered, and the rugged character of the country prevents its utilization for farming purposes. There are wide stretches of good agricultural land in many parts of the island, not yet opened up by roads, and which, if utilized, would provide homes for a large agricultural population.

Fauna.—In all about 230 species are indigenous to the colony, comprising 26 mammals (of which 12 are peculiar to Tasmania), 156 birds (170 according to Gould), 7 lizards, 3 snakes, 7 frogs and 21 freshwater fishes. Of the birds not more than fifteen kinds are peculiar to Tasmania. The larger animals indigenous to the colony are the kangaroo, wallaby, native hyæna (*Thylacinus cynocephalus*), native devil (*Sarcophilus ursinus*), wombat (*Phas colomys wombat*), platypus, opossum, and tiger-cat (*Dasyurus maculatus*); smaller ones are the kangaroo-rat, bandicoot, and native cat. The majority of these are nocturnal in their habits. Among reptiles are snakes—tiger copperhead, and whip, all venomous; lizards, and iguanas, also scorpions, centipedes, and tarantulas. Insect life of all kinds is almost as prevalent as in the other colonies; as many as 1,460 species have been described. The feathered tribes are abundantly represented both in land and aquatic birds. Among the former black and white cockatoos, jays, magpies, whitehawks, crows eagles (*Aquila audax*), sparrowhawks, owls, moreporks, miner, quail, bronze-winged pigeons, white cockatoo (*Catatua galerita*), parrots, paroquets, thrushes, robins, diamond birds, larks, honeysuckers, blue wrens, firetails, redbills, and many others. Among the frequenters of the lakes, lagoons, and sea-coast are black swans, snipe, herons, bitterns, teal, duck, tern, penguins, petrel, pelicans, gulls, cormorants or shag, native hen, baldcoot, and divers. Among the salt-water fish are the kingfish, trumpeter, flounder, garfish, and gurnard (*Trigla*). The principal fresh-water fish are the eel, blackfish, trout, and lamprey. Special attention is given to oyster and other fisheries. There are various species of whales, seals, and porpoises in the neighbouring seas. The latter enter the estuaries and rivers during the summer in immense shoals.

Very many animals and birds have been introduced and acclimatized with success; one of the most unfortunate of these importations has been the rabbit, which soon became a serious plague, needing the most energetic efforts to prevent its ruining the agricultural and pastoral industry. Brown trout are now abundant in many of the rivers and lakes, and the efforts to acclimatize salmon (*salmo salar*) have been crowned with success; several years and much money having been spent in these attempts.

Flora.—There are about 1,100 known species of plants, of which about 1,000 are indigenous; of these twenty-two genera and about 270 species are peculiar to the island; about 80 distinct kinds of terrestrial *orchidæ* have been enumerated. The flora is in many respects similar to that of the more elevated parts of the colony of Victoria. The larger timber is comprised in the Blue Gum (*Eucalyptus globulus*), which vies in size with the Eucalypts of Victoria, and the Huon pine (*Dacrydium Franklinii*), used for boat-building and other constructive purposes. The Australian Lloyd's classify Blue Gum for ship-building for a range of eight to twelve years. The Blue Gum in some of the southern parts of the island attains a height of 350 feet and a girth of 100 feet. Within five miles of Hobart a tree was measured which was 330 feet high and 86 feet round; the myrtle wattle, blackwood, and King William pine also attain considerable dimensions. In the mountain gullies and ravines tree ferns of large size are very plentiful. Licenses are issued to men engaged in cutting pine logs, this industry being mainly confined to the West coast districts. Under the Waste Lands Act, twelve forest reserves have been set apart in various localities, aggregating 115,300 acres. The income from the forest is comparatively trivial. A forest officer and bailiffs check illicit cutting of timber.

Geological Formation.—The great mountain range that traverses nearly the whole of Central Tasmania is of trap, or greenstone formation, and its upheaval has burst through the more recent rocks of sandstone, clay-slate, and limestone that once overlaid it, and which are now found around its bases and in its depressions, in quantities so vast, as to spread over a very considerable extent of country. The rocks in the country to the east and south-west coasts are respectively granite and quartz, associated with vast quantities of micaceous rocks. Another authority thus describes the physical conformation of the island: "Tasmania may be said to be entirely occupied by a network of ridges, called here tiers, enclosing a multitude of small plains and valleys. In two or three places an altitude of 5,000 feet is reached, while several attain to the height of 4,000 feet. From the north-east corner of Tasmania the chain may, on a fine day, be traced in winding and lengthened array across Bass's Strait by the curved line of lofty and rugged islands that lead up to Wilson's Promontory. From this point the chain strikes into the interior of New South Wales, attaining its greatest elevation in Mount Kosciusko. In the north-eastern portion of Tasmania, granite and metamorphic rocks exist in large masses, and in still larger quantities all over the south-western corner of the island. These rocks also show themselves in other positions towards the centre, and also on the north coast. The remainder of the island seems to be formed of great intersecting ridges of greenstone, enclosing plains or valleys of the Palæozoic or primary formation. The range towards St. Clair and the Frenchman's Cap is topped for the most part by bare and cloven summits of quartz rocks and sienite. Mount Wellington consists mainly of massive greenstone. Volcanic action in various parts of the island is strongly marked, and igneous and volcanic rocks are prevalent."

The Soil.—There is much variety in the nature of the soil of Tasmania, according to locality. In some places it is poor, with hardly alluvium enough for cultivation; in others it is remarkably rich, yielding luxuriant crops to a very indifferent style of farming. The central plateau affords a great extent of fine pasture, and the alluvial soil of the lower plains and valleys, derived chiefly from the disintegration of the trap rocks, is exceedingly fertile. As a rule, most of the European grains, fruits, and vegetables can be cultivated and brought to perfection, and some kinds of tropical plants also thrive in certain localities. Tasmanian wheat and barley have long held a high reputation, although, in common with other Australian colonies, the farms suffer severely from the ravages of 'rust,' and, in occasional seasons, frost very materially affects many crops. Of the soil generally, it may be said, the basaltic formation prevails in unbroken sections all over the island, and, as a rule, is good friable land, easy to work, dry lying, suitable for all kinds of crops grown, and also a good soil for artificial grasses and clover. Another and more lasting kind of soil for repeated croppings is the alluvial clayey nature overlying the numerous river flats, and in some localities prevailing on the hillsides and uplands of broken country in irregular patches. This class of land gives a splendid permanent pasture. A third variety is a sandy loam of a light nature, easy to work, and is the best wheat-growing soil, but does not hold grasses or clover for a series of years. The soil in the Ringarooma and Scottsdale country and along the North-West Coast is especially rich, being a chocolate loam, of great depth. The only difficulty in the way of cultivation is the dense forests which cover it. The same remark applies to the North-West and Huon districts, wherein sturdy settlers, wrestling continuously with the forest giants, are steadily increasing the acreage under profitable culture.

The high central table-land of the island is comparatively treeless and exposed to the full force of cold westerly hurricanes and icy winds from the south.

Population.—The population of the colony by the census taken on April 8, 1891, was 146,667—77,560 males, 69,107 females. On June 30, 1899, the total was estimated at 177,340 (6·77 per square mile); males, 95,633, females, 81,707. Males over 21 years, 49,366; males at soldiers' age, 30,650. Females over 21 years, 38,541. Birth places, percentages:—Tasmania, 73·88; other Australian Colonies, 5·02; United Kingdom, 18·47; elsewhere, 2·63. The total number of householders on June 30, 1900, was 37,095; dwellings per square mile, 1·41; ditto having one room (per cent.), 8·38; having more than one room, 91·62; under £20 rental, 65·51; ditto £20 and over, 34·49.

The conjugal condition of the people is thus estimated (1900); —Married, 54,588—males, 28,680; females, 25,908; widowers, 2,300; widows, 3,800. Percentage in 1900:—Married males, 29·00; married females, 30·49.

In regard to occupation, the analysis of the Government statistician, computed on the census of 1891, gave the following results:—breadwinners, total, 61,411; professional, 3,918 persons; domestic, 7,180; commercial class, 9,593; agricultural and pasto-

ral, 25,568 ; industrial, 16,016 ; property and finance, 1,662. Non-breadwinners, 85,256. Total, 146,667. For 1900 breadwinners are thus computed : Males, 61,701 ; females, 15,396. Total, 77,097 ; the percentage being :—males 62·40 ; females, 18·41 ; persons, 42·25.

The ages of the people (census, 5th April, 1891) were :—Under five, 21,466 ; five and under ten, 19,399 ; ten and under fifteen, 16,461 ; fifteen and under twenty, 13,893 ; twenty and under twenty-five, 13,737 ; twenty-five and under thirty, 13,322 ; thirty and under thirty-five, 10,851 ; thirty-five and under forty, 7,799 ; forty and under forty-five, 5,981 ; forty-five and under fifty, 4,915 ; fifty and under fifty-five, 4,438 ; fifty-five and under sixty, 3,719 ; sixty and under sixty-five, 3,389 ; sixty-five and under seventy, 2,462 ; seventy and under seventy-five, 2,171 ; seventy-five and under eighty, 1,191 ; eighty and under eighty-five, 629 ; eighty-five and over, 274 ; age not specified, 590. The approximate percentages for 1899 were : under 5 years, 14·69 ; under 65 years, 80·71 ; over 65 years, 4·60.

On the 31st March, 1901, a census of the Tasmanian population will be taken.

For 1899 arrivals in the colony aggregated 24,959, and departures 20,805.

For the first half-year of 1900 arrivals in the colony aggregated 12,524, and departures, 13,148.

During the year 1899 there were registered 4,624 births—2,415 males and 2,259 females ; and 2,204 deaths ; and 1,097 marriages, the ratio to the mean population per thousand being—births, 25·98 ; deaths, 12·25 ; marriages, 6·37. Illegitimate births during 1899 numbered 284, being in the proportion of 6·07 per cent. to the total births registered.

Aborigines.—The origin of the natives can only be guessed at. It is believed that the race is of great antiquity, and much older than the native race of the Australian mainland. At the present time, not a single representative is in existence, the last of the race, Truganini, or Lalla Rookh, having died in May, 1876, at the advanced age of 73. The last man, William Lanne (King Billy), died at Hobart on March 3, 1869, aged 34 years. In January, 1868, clad in a blue suit, with a gold lace band round his cap, he had walked side by side with the Duke of Edinburgh on the Queen's domain, Hobart, proud in thus asserting his possession of royal blood. At the first settlement of the colony the aborigines numbered some thousands, probably four or five, but from the time of the massacre at Risdon in 1803, till 1832, war was ruthlessly waged between them and the colonists. In 1830 an attempt on a gigantic scale, called The Line, was made to drive the aborigines into a corner of the island ; it signally failed, only one being captured, but the exhibition of numbers and power is thought to have had some influence on the blacks, and to have led to some extent to the success of the efforts of Mr. Robinson. In the year 1830 he undertook the part of conciliator or pacificator, and after five years of untold dangers and hardships, with the assistance of some friendly blacks, was successful in gathering in the whole of the remains of the Tasmanian race, who were placed on South Bruni Island. From here they were transferred to Gun Carriage Island, thence to Flinders Island ; and eventually the remnant, reduced to 44 souls, was transported to Oyster Cove, a few miles from Hobart. In 1854 they numbered but sixteen, and from that time they gradually died off. At their several settlements, efforts were made to Christianize them and teach them the arts of civilization, but the results were not very encouraging, and the change of mode of living and other causes had a detrimental effect, and considerably hastened their end.

Religion.—According to latest records the religious denominations are thus estimated : Church of England, 90,135 ; Church of Rome, 33,289 ; Presbyterian Church of Tasmania, 12,575 ; Wesleyan Methodists, 22,120 ; Independents, 5,804 ; Baptists, 4,234 ; Jews, 90 ; Society of Friends, 200 ; Mahommedans, Pagans, and other sects, 6,351. The Church of England has in all upwards of 150 places of worship, with sittings capable of accommodating about 17,500 persons. The body, now known as the Church of England in Tasmania, is under the government of a Synod, comprising the Bishop, all licensed clergymen, and lay communicants representing the various congregations, the diocese being divided into 46 parishes, every act requiring the consent of all three orders. The Synod must have at least one meeting annually, and a dissolution and fresh election of lay members must take place every three years. The financial and other secular business of the diocese is directed by the Diocesan Council, consisting of the Bishop, the Archdeacons and Trustees of Church Property (ex-officio). Two members appointed by the Bishop, and five elected. The Synod is comprised of 67 clergy and 60 laymen. There are 93 consecrated churches and 90 other buildings used for church services, 25 being free and open churches. The number of lay readers is 82 ; number of children attending Sunday-school, 5,000 ; and number of Sunday school teachers, 500. The Cathedral Chapter consists of the dean, archdeacons, and six canons. The Cathedral Board—the dean and churchwardens of St. David's. The Roman Catholic diocese is an archbishopric. It has 86 places of worship, and an estimated number of 17,000 attendants, and 110 Sunday-schools, with 376 teachers and 5,000 scholars. Connected with this church are the Presentation Convent, Convent of Sisters of Charity, and Sisterhood of Mary Help of Christians at Hobart, and Presentation Convent at Launceston. The Presbyterian Church of Tasmania has 68 places of worship and 30 ordained ministers and licensed preachers, 30 Sunday-schools, 165 teachers, and 2,000 pupils. They support a missionary and several native teachers in the New Hebrides. There is one Synod and two presbyteries in the colony. The Synod, which meets annually in October, is the Supreme Court of the Church, and has free legislative and administrative authority. The Wesleyans have 165 churches and other preaching places. There are 148 ministers and local preachers attached to the body. The Sabbath-schools number 99, with 778 teachers and 6,938 scholars. The Congregationalists have 18 ministers, 22 churches, and 26 mission stations, and 30 Sabbath-schools. The Primitive Methodists have 18 chapels, with an average attendance of 3,000, 9 preaching places, 9 ministers, 1 evangelist, 66 lay preachers, and 17 Sunday-schools, with 100 teachers and 1,000 scholars. The United Free Methodists have 13 chapels and 2 Sunday-schools, with 20 teachers and 340 children. The Baptist Union have 11 places of worship, including mission stations, comprising 2,850 sittings, 4 pastors, 10 Sunday-schools, with 800 scholars and 90 teachers. The Society of Friends have a meeting-house, and the Jews a synagogue at Hobart and also at Launceston. (The foregoing figures are in a few items approximate only.) The Christian Brethren, Disciples of Christ, and Adventists have meeting-houses in Hobart and Launceston, and in some up-country towns. Undenominational, Evangelistic, and Salvation Army organisations also carry on regular worship. The estimated percentage proportion of persons belonging to the principal religious denominations was on June 30, 1900, as follows :—Baptist, 2·32 ; Catholics, 18·24 ; Episcopalians, 53·77 ; Independents, 3·18 ; Methodists, 12·12 ; Presbyterians, 6·89 ; Society of Friends, ·12 ; Christian Brethren, ·86 ; Salvation Army, ·95 ; other Christian sects, 2·71 ; non-Christian sects, 0·77. These figures will be readjusted by census of current year.

Education.—The higher branches of education are under the management of a Council ; the lower under the Government. There are six public schools in Hobart, two in Launceston, and at least one in every country township, supported by the Government, and open to all. These schools, up to December 31, 1884, were managed by a body called the Board of Education, but the Board was dissolved, and all the buildings and lands reverted to the Crown, and the powers hitherto exercised by the Board were transferred to the Chief Secretary, who holds the portfolio of Minister of Education ; there is also a Director of Education. The system of instruction is non-sectarian, but religious instruction may be given in the schools by clergymen or other teachers. Education is compulsory between the ages of 7 and 13. School districts are appointed, and Boards of Advice, consisting of not more than seven members, exercise general supervision over the schools in their district. These Boards of Advice are formed either by the Municipal Councils of the colony, or where no such council exists, from the stipendiary magistrate and local people of influence. In 1899 292 schools were in operation, the number of scholars on the roll being 23,272, and the average daily attendance 17,682. These scholars were taught by 189 male teachers, 297 female teachers, and 74 male and 63 female pupil teachers and paid monitors. The school fees paid by parents in aid of teachers' salaries during the year amounted to £10,948 7s. The Department paid £1,257 1s. 9d. during the year for free scholars ; the average number in attendance being 2,512. The amount paid to teachers of all classes in salaries and allowances was £33,128 9s. 2d. The gross expenditure, including erecting and maintaining schoolhouses, was £40,049 6s. 6d. Expenditure on exhibitions for pupils has increased. The Council of the Tasmanian University offers annually 5 exhibitions of the value of £20 per annum each, tenable for 3 years, and is empowered to hold local examinations similar to the Oxford and Cambridge annual examinations ; to confer annually two scholarships of £25 each, tenable for three years, and the degree of Associate of Arts on such candidates as have obtained the prescribed standard. During 1899 the University expended for scholarships and exhibitions £590. The gross expenditure of the Council was £3,783. The attendance of children at school is compulsory, under a fine not exceeding £2, unless it can be shown that the child is being privately educated, or is prevented by sickness or other valid cause from being present. In 1900 the number of persons in the colony of all ages who were able to read and write was estimated at 207,030, including 78,800 males ; 9,000 were unable to read or write, the figures including children under 3 years of age. There are three Ragged schools, all in Hobart ; they are supported by private subscriptions and Government aid. At the Boys' Training school, Boys' Home, and Girls' Industrial schools, systematic, rudimentary, and also to some extent, technical education is given. Night schools number 17, enrolment 239, average attendance 107. Registered private schools number 241, with an enrolment of 8,781 scholars.

Local examinations are now held in Hobart for matriculation and for degrees in connection with the London University, and also for matriculation at the Melbourne and Sydney Universities.

The Council of Education is merged in the Council of the University. Application has been made for a Royal Charter. The contribution from Government for 1899–1900 was £3,200.

The grant for Technical Education was £900.

Public Libraries.—There are forty-two public libraries, containing 87,000 volumes. The largest of these are the Launceston Institute with 20,000 vols., and the Tasmanian Public Library at the Town Hall, Hobart, with 18,500 vols. The receipts at the latter for the year ending December 31, 1899, were £520 1s. 6d., including a Government grant of £150. The City Council granted £265. Launceston Public Library had a Government grant of £120.

Philanthropic.—There is a general hospital at Hobart, another at Launceston, one at Campbell Town, Mount Bischoff, Latrobe, Zeehan, Beaconsfield, Strahan, Queenstown and New Norfolk, for relief of the sick and injured. Hospitals for contagious diseases are established at Hobart and at Launceston. At Hobart General Hospital during 1899-1900 the average daily number of in-patients was 86, total number of cases treated (in-patients), 1,329.

Cost of each bed occupied, £65 11s. 11d. For Launceston the corresponding figures are : 77 ; 985 ; £81 3s. Cottage Hospitals are maintained by private subscriptions, patients' fees, and Government subsidy at the Mount Bischoff, Campbell Town, Latrobe, Beaconsfield, Zeehan, and Strahan. The cost of the Contagious Diseases Hospitals (Hobart and Launceston) for 1898-9 was £403, the number of patients for the year being 42. There were thirteen patients under treatment at the end of the year. For the relief of the destitute poor there are two pauper establishments, one at New Town, and one at Launceston. Government expenditure on these institutions for 1899 was £4,482 and £2,000 respectively. There are two hospitals for the insane, one at New Norfolk, and one at Hobart gaol ; the cost of the latter is partly chargeable to the Imperial Government for cases which are the residuum of the old penal system. The Government expenditure on the New Norfolk Hospital for 1899-1900 was £12,500. The hospitals have 69 wards or rooms, and 185 beds for males and 148 for females. The lunatic asylums have 148 wards or rooms, and 200 beds for males and 190 for females. The daily average number of inmates of the invalid depôts was 749. The total expenditure by the Wardens and Stipendiary Magistrates, under supervision of the Chief Secretary, during 1899, for outdoor relief, was £1,948 3s. 7d. This total amount does not include grants in aid disbursed by Benevolent Societies—Hobart, £990 ; Launceston, £880.

Temperance Societies. — There were on 30th June, 1900, the following Temperance Societies in active operation in Tasmania :—Tasmanian Temperance Alliance, Good Templars, 12 lodges ; Degree Temple, 1 ; Juvenile Temples, 5 ; Rechabites' tents, 27 ; Juvenile tents, 5 ; Bands of Hope, 18 ; Women's Christian Temperance Union, 17. The Independent Order of Good Templars' Grand Lodge of Tasmania was instituted on 25th May, 1874. The Tasmania Temperance Alliance publishes a local organ, *The People's Friend*, issued monthly.

Friendly Societies.—There were on June 30th, 1900, 120 Benefit or Friendly Societies in Tasmania, of which 35 are connected with the order of Oddfellows (Manchester Unity), and 34 are Rechabite tents. The members number in all 11,000. The total receipts in 1899 were approximately £34,000 ; and the expenditure £29,700, the capital being £94,000. The benefits distributed during 1899 amounted to about £27,500, exclusive of charges of management.

Agriculture.—The yield per acre (1899-1900) for crops was somewhat below the usual average. There was an estimated decrease in wheat amounting to 1,209,936 bushels, or nearly 100,000 bushels below the average yearly local requirement for food and seed. Oats showed a decrease of 1,243,320 bushels, barley a decrease of 62,529 bushels, hay 18,991 tons, and potatoes a decrease of 575 tons. The acreage under crop as a whole shows an increase of 11,114 acres, or 8·40 per cent. The decline in cereals was caused by very dry season and ravages of insect pests. Fruits of all kinds grow luxuriantly, including cherries, plums, quinces, mulberries, peaches, apricots, walnuts, filberts, almonds, figs, gooseberries, strawberries, raspberries, currants, and the grape. Fruit-preserving forms a steadily increasing branch of industry. The Tasmanian export of jams for 1899 was valued at £40,329 ; of green fruit, at £170,394 ; pulp and preserved fruit, £20,486. Jam sold for local consumption amounted to about 400,000 lbs., valued at £6,670. The estimated annual quantity of fruit used is 1,800,000 lbs. There are 7 jam factories in work, employing 70 males and 80 females, and the capital invested in buildings, equipment, &c., is estimated at £53,000. The statistics for the year ending March 31, 1900, show that the number of acres under cultivation was 543,381, of which 64,328 were in wheat ; 7,606 in barley ; 41,110 in oats ; 651 in hops ; 26,951 in potatoes ; 42,305 in hay ; 6,400 in green forage ; 288,777 in permanent artificial grasses ; other tillage, 41,988. Land being broken up, 3,145 acres ; bush land cleared and fit for grazing, 3,943,939 acres. The yield of the principal crops is thus stated :—Wheat, 1,093,576 bushels ; barley, 121,696 bushels ; oats, 1,027,750 bushels ; rye, 1,000 bushels ; peas, 34,000 bushels ; potatoes, 87,591 tons ; hay, 63,457 tons. The following were the prices of these articles of produce :—Wheat, 2s. 6d. to 3s. 6d. per bushel ; barley, 3s. 6d. to 5s. per bushel ; oats, 2s. to 2s. 6d. per bushel ; potatoes, 25s. to 65s. per ton ; hay, 50s. to 65s. per ton.

The yield of fruit for year ending 31st March, 1900, was : Apples, 642,600 ; pears, 34,614 bushels. The direct exports of apples to England in 1898-1900 numbered 225,000 cases. The exports of hops were valued at £25,000. The agricultural machinery (according to latest statistics) employed on farms and stations comprised 168 engines of 1,350 h.p., 145 clod-crushers, 865 chaff-cutters, 295 cultivators, 16 hay elevators, 350 hay rakes, 3,450 horse-hoes, grubbers and scarifiers, 390 mowing machines, 430 subsoil ploughs, 1,240 double-furrow ploughs, 330 reaping machines, 350 reaper and mower combined, 530 reaper and binder, 75 sowing machines, and 150 threshing machines ; 131 irrigation works ; 140 lift and force pumps ; 165 seed drills ; 20 strippers. These machinery statistics are approximate.

Live Stock Returns.—Horses, 31,189 ; horned cattle (including calves), 160,204 ; milch cows kept for dairy purposes, 36,000 ; sheep (including lambs, also sheep on islands in Bass's Straits), 1,672,068 ; pigs, 74,451.

The imports of live stock during 1899-1900 were valued thus :—Cattle, £4,371 ; sheep, £26,475. Wool, exported and consumed locally, 1899-1900, amounted in value to £357,757, as compared with the 1898 value of £254,960. The value of stud sheep and other live stock exported during 1899-1900 was £27,073. The exports for first six months of 1900 were : Wool, £164,403 ; stud sheep, £31,397.

Land.—Statistics of the Crown Lands Office show that the revenue received for 1898 was £45,898. The rent of crown lands for pastoral purposes in 1898 was £5,091. Sales of crown lands by auction and private contract amounted to £34,882. Sales by auction and private contracts and rents of mineral lands totalled £25,745.

Mineral and Other Resources.—The colony is now divided into five mining districts—Northern and Southern, Eastern, North-Eastern, Western, and North-Western, each being under a Commissioner or Registrar. The mineral resources of the colony, which had been neglected for many years, received a great impetus at the end of 1872 by the discovery by Mr. James Smith of extensive deposits of tin ore at Mount Bischoff, in the north-west quarter of the island. And this is now the greatest tin-producing mine in the world. Lode tin-mining is being prosecuted with vigour in the Ben Lomond and Blue Tier districts and on the East Coast. The tin country of Tasmania consists mainly of a formation of granite, the metal being also found in schist, slate, and porphyry formations. It occurs in masses or lodes, bound up with cement-like matter, and also in a free state, varying in size from grains small as sand to lumps as large as beans. Gold-mining is a firmly-established and expanding industry, and returns steadily encouraging. The precious metal has been found most widely scattered over the Northern and Western portion of the island, both in the alluvial and in quartz veins. The alluvial has been tested in the Corinna district by hydraulic sluicing, but with no great success. The quartz veins are true fissure reefs, and sinking on these is being vigorously carried on at the principal fields, good gold being got at 800 feet. The auriferous region has been described as embracing the following localities :—The Pieman River (Corinna), the King River, the Hellyer diggings, in the bed and on the banks of the river of that name, Anderson's Creek, Beaconsfield, Lefroy, Back Creek Diggings, Leura, Piper's River, Denison Diggings, Waterhouse, Middlesex, Belmont, Mangana, and the Mathinna goldfields. The richest finds have been made in the vicinity of the Tamar River. The first discovery of gold, it is said, was on the Tullochgorum estate, near Fingal, shortly after the Victoria diggings were opened. Extensive deposits of galena and other silver ores occur in various localities, notably at Zeehan and Dundas, on the West Coast. The very extensive discovery of copper made at Mount Lyell is being opened up in such a manner as to leave no doubt in the minds of experts, such as Dr. Peters, Junr., the great American mineralogist, that the products will exceed in bulk and richness those of the famed Rio Tinto and the Tharsis mines in Europe. The ore contains not only a high percentage of copper, but is also very rich in silver and gold. Many other important discoveries continue to be made in the surrounding country, notably at Mount Reid and Rosebery. The Mount Lyell Co.'s railway from the mine is completed, and large smelting works are in full blast and working satisfactorily. The Government are assisting in the construction of light railways or tramways in this part of the colony, to further the interests of the mining industry. Deposits of nickel have been found near Dundas, and at Heazlewood. At Branxholm and the Mussel Roe River there are deposits of excellent kaolin. The great advance in price of tin led to the taking up on lease of large tracts of mineral land in the Eastern and North-Eastern districts during 1900 and the floating of substantial companies. At Cape Barren Island a discovery of plumbago has been made, but has not been turned to profitable account. A quartz discovery at Flinders Island and also copper ore give promise of great things. Chinese miners for years past have collected gems and sent them to their own country for sale ; some have also been sent to London. Bismuth, antimony, wolfram, and asbestos have been found in various parts of Tasmania. The mining statistics for 1899 and period ending 30th June, 1900, show the following values :—Gold won, £333,980 ; silver ore, raised, £266,618 ; tin ore raised, £312,376 ; coal, £41,883 ; copper (blister), £810,005 ; copper ore, £1,835 ; iron ore, £5,137 ; wolfram, £1,537 ; asbestos, £432 ; Total, £1,773,803. Year ending 31st December, 1899 :—Gold won, £327,545 ; silver ore raised, £250,331 : tin ore raised, £331,290 ; coal, £38,349 ; copper (blister), £631,219 ; copper ore, £26,833 ; iron ore, £3,474 ; wolfram, £342 ; asbestos, £363. Total, £1,609,746. The gold varies in quality according to locality ; that from Beaconsfield is valued at about £3 15s. per oz., some from the Golconda and Denison diggings being valued only at £3 10s. The Lefroy, Fingal, Mangana and West Coast gold is the most valuable, averaging £4 per oz. Dividends paid for six months ending 30th June, 1900, amounted to £388,114 0s. 10d. True coal is abundant in Fingal, Mount Nicholas, and Douglas River, in the north-east of the colony ; also at Hamilton in the centre, at the Mersey in the north-west, at Jerusalem, and at Gardiner's Bay, a locality about 50 miles S. of Hobart, where a 4-ft. seam has been discovered. It analyzed 61·4 per cent. of pure carbon. In addition to these there are extensive seams of bituminous coal at Port Seymour, East Coast. A seam of bituminous coal has also been found near the Sandfly Rivulet. There are also extensive deposits of anthracite coal at Port Arthur and at New Town, close to Hobart, also in the Derwent Valley. The Fingal and Mount Nicholas Coal Measures represent the most valuable accumulations, and, being properly developed and worked, have nearly superseded the imported article. The Fingal Railway between Corners, on the main line, and St. Mary's, with tramway extension to Mount Nicholas, and the construction of coal wharves and staiths at Launceston, has developed the coal-mining industry. Fingal coal for smelting purposes proves in every material point equal to the best Newcastle coal. This native coal, which is largely used for steam and domestic purposes, is solely used on the Tas-

manian railways. Commercial clays are found in many parts, and deposits of kaolin or porcelain clay are at Circular Head. Coloured earths suitable for paints exist in quantities near the banks of the Tamar. Limestone is abundant, and of excellent quality. Large quarries of stone, admirably suited for building purposes, yield a compact, fine-grained white or brown freestone. During the year 1900 there were 50 new companies, with a capital of £340,430, registered. Mineral land granted during the year aggregated 39,872 acres, and on 30th June, 1900, there were 2,186 leases in force, aggregating 84,379 acres. The value of minerals exported for the year was—gold, £205,936; silver, £208,869; tin, £281,947; blister copper, £738,055; copper ore and other minerals, £29,698. Total, £1,464,515, as against £912,885 in the previous year. Coal produced was valued at £41,883. The revenue from mines (rents, fees, &c., and exclusive of stamp duties and dividend tax) during 1899–1900 was £28,380 11s. 10d., compared with £24,696 10s. 5d. in 1898–9.

Dividends paid during quarter ending June 30th, 1900, were: From copper mines, £55,000; from gold mines, £15,600; from tin mines, £31,545; from silver mines, £19,553. Total, £121,698. For the previous quarter the total was £27,000, plus a bonus of £150,000 paid by the Briscis Tin Mining Company.

Timber is plentiful, the wood of the eucalyptus, or gum-tree, being of great value for shipbuilding purposes, railway sleepers, and house work, and all purposes where strength and endurance are required. The pine and the wood of many other trees is well adapted for furniture, fittings, and in-door work generally. The wattle bark is largely exported for tanning purposes. Wherever shown at public exhibitions, Tasmanian woods have always attracted marked attention, and specimens, both in the rough and polished state, figure conspicuously in many museums, in the Australasian Colonies and in the home countries.

Shipments of Tasmanian wood-paving blocks are regularly made, and find increased favour in the English market and at Cape Colony; stringy bark timber continues in special request.

Coaches.—There are several lines of stage coaches out of Hobart, connecting with important townships. Coaches leave every day for the Huon, traversing romantic mountain scenery. There is also coach connection with Brown's River, and to Richmond, from Campana Railway Station. Coaches also run from Launceston to Lefroy, Beaconsfield, and Lymington. Numerous cabs and omnibuses ply about Hobart and Launceston, and afford a ready means of reaching the suburbs and other parts. Cab fares are one shilling the first mile, and sixpence for every half-mile beyond. Country coaches run from Apsley Station to Bothwell and Melton Mowbray, Barrington and Don, Brothers Home, Burnie to Circular Head, St. Mary's to St. Helen's and Moorina, Campbell Town to Avoca, New Norfolk to Ouse, Launceston to Perth, Lefroy, Beaconsfield, and Lymington, Campania to Swansea *viâ* Richmond, connecting with express train to Hobart, to Sandfly and Longley, Orpington, Dunally to Sorell, connecting with train, Scottsdale and Branxholm, Launceston to Upper Piper.

Roads.—There are 5,839 miles of roads maintained throughout the island, of which 5,400 miles are under the control of 99 local road trusts, also 750 miles maintained by main road boards. The proposed expenditure on roads, bridges, jetties and tracks for the twelve months ending 30th June, 1901, was £67,690.

Shipping.—The total number of registered vessels belonging to Tasmania on December 31, 1899, was as follows:—156 sailing vessels of 8,894 tons and 44 steamers of 6,485 tons; total tonnage, 15,379. In the year 1899–1900 793 vessels, of the aggregate tonnage of 663,102, with crews 25,275, entered at the ports of Tasmania, and 756 vessels of 655,601 tons, with crews 25,800, cleared outwards. The Union Steam Ship Company maintain frequent and speedy communication between Hobart, Sydney, and Launceston, and between Hobart and Melbourne, Launceston and Melbourne, Hobart and Strahan, and Strahan and Melbourne. They also run boats regularly to Stanley, Emu Bay, and Devonport, on the North-West Coast. Huddart, Parker and Co.'s boats also ply in the intercolonial trade. The Union Steam Ship Company's steamers leave Hobart at regular intervals for New Zealand ports. The New Zealand Shipping Company and Shaw, Savill and Albion & Co.'s boats, between London and New Zealand, *viâ* the Cape, call at Hobart, as also large cargo steamers; many of the latter also call at Launceston. Steamers and sailing craft also trade regularly to Spring Bay, Maria Island and East Coast ports from Hobart and Launceston.

Lighthouses.—All Tasmanian lighthouses are painted white. Kent's Group, on Deal Island, revolving, 950 feet above high-water; Goose Island, fixed, 135 ft.; Swan Island, revolving flash, 100 ft.; Low Head, at the entrance to the River Tamar, revolving, 142 ft.; on Cape Wickham, King's Island, fixed, 280 ft.; South Bruni, revolving, 335 ft.; Derwent (on Cape Direction), guide to the River Derwent, fixed, 65 ft. Currie Harbour (West Coast of King's Island), revolving, 5 bright flashes every minute, 150 ft. Tamar Heads, leading lights to the entrance of the River Tamar, 55 and 38 ft. Table Cape, fixed 390 feet, Mersey Bluff fixed light, 122 feet, Eddystone Point, 142 feet, flashing, Maatsuyker Island, S.W. coast flashing 350 feet. Macquarie Heads fixed white light with red sector, 34 feet on Entrance Island and on Bushy Cap and Bonnet Islets, green fixed lights, 45 feet. Cape Sorell, fixed light and flashing white and red lights, 186 feet. These are under the charge of the Hobart Marine Board. The expense of two of them (Kent's Group, and Cape Wickham) is shared with Tasmania by the colonies of Victoria and New South Wales, and the expense of four (Currie Harbour, Swan Island, Goose Island, and Eddystone Point) is shared between Tasmania and Victoria.

Marine Boards.—There are seven Marine Boards in the colony, viz., Hobart, Launceston, Mersey, Circula Head, Leven, Strahan and Table Cape. The Government grant to Boards in 1899–1900 was £26,661. Hobart Marine Board. Receipts: Harbour Trust, £14,105 5s. 4d.; expenditure, £9,876 12s. 1d. Receipts, Lighthouse Fund, £23,212 15s. 6d. (including £3,596 11s. 7d. contributed by Victoria and New South Wales towards maintenance of lights in Tasmania, and £8,550 refunded by Government of Tasmania on account of Cape Sorell lighthouse); expenditure, £16,771 15s. 3d. Launceston Marine Board receipts, £12,014 16s.; expenditure, £12,163 13s. 1d.

Museum and Botanical Gardens.—During the session of 1885 an Act was passed making these institutions national, with a yearly endowment of £500 to the Museum and £800 to the Gardens. Hitherto they were under the direction and control of the Royal Society, but are now under a board of trustees, of which five are official trustees and a Crown trustee, and six elective trustees being members of the Council of the Royal Society. In connection with the Museum rooms are set apart as an Art Gallery, containing a choice collection of paintings, to which additions are frequently made either as gifts or loans. There is also a room devoted for the Tasmanian collection, and another as an Australian room, besides the General and Geological room. Increasingly large collections of museum and art treasures crowd the building. A Tourist room has been added, containing Tasmanian landscape photographic views, representing all the principal parts of the island. There is also in the room railway and postal time-tables, guide-books, and writing material free for the public. Open daily, Sundays from 2.30 P.M. to 5 P.M. The Gardens in the Domain are open daily from 7 A.M. to 6 P.M., except on Sunday, when they are opened after 1 P.M. until 6 P.M. The cost of maintaining the Museum during 1900 was £575; and Botanical Gardens £800.

Fisheries.—The annual reports presented to Parliament of the Fisheries Board show that good work is done in fish conservation, although strictness might be relaxed. There are seventy fishing boats at Hobart, with a total crew of 180. Boats are similarly engaged at the Tamar and other rivers, and on the coast of the colony. The value of boats and equipment engaged in the fishing industry is estimated at £12,500. The introduction of *salmo salar* has succeeded well. Salmon-fishing affords good sport in the Derwent, its tributaries, and most of the rivers and lakes of the island, fish of large size being captured. The production of oysters upon the east coast is of some importance. The whale fishery, once an important trade from Hobart, has practically closed, the *Helen* barque, the only vessel whaling, having been taken off in 1900. The cost of the Fisheries Department in 1899 was £270.

Department of Agriculture.—The Council of Agriculture Act, 55 Vic., No. 43, created a Council of Agriculture, consisting of eleven members. Powers are given to the Council to appoint Boards of Agriculture throughout the colony, and to maintain correspondence and co-operation with these Boards with a view to advancing agriculture generally; to collect and publish by means of the Press and by aid of the Boards of Agriculture, information of every kind calculated to prove beneficial to colonists engaged in agricultural, horticultural, pastoral and other pursuits connected with the culture of the soil; to employ persons competent to give instruction of a practical character in all such matters; to furnish analyses of soils and manures free of cost to agriculturists; to supply under direction of an expert seeds, plants, trees and manures for experimental purposes; to arrange for holding occasionally an Agricultural Congress. The Council supplies information on matters relating to agriculture, the Entomologists conduct experiments with a view to exterminating insect and fungoid pests, and the honorary botanist renders good service in identifying plants and their parasites. The Council meets about ten times a year. An agricultural *Gazette* containing reports of Council and Branch proceedings and copies of papers read is issued periodically. An impetus has been given to the establishment of butter factories, creameries and bacon factories throughout the farming districts. A Government agricultural, dairy, and poultry expert do good educational work among the farmers. Experimental wheat and potato cultivation plots have been established in various parts of the colony. Fruit spraying experiments and facilities for agricultural education are encouraged by the Council.

Electric Telegraphs.—A triple line of telegraph connects Hobart and Launceston; there is a line between Launceston and Formby, extending also along the North-West coast and inland to Mount Bischoff, and to Strahan (Macquarie Harbour). A line also extends from Ouse to Strahan, 113 miles, and from Launceston to Scottsdale, 47 miles, and the wires also extend to every township of any importance, there being 184 stations and 2,559 miles of wire (including 359 miles cable). In April, 1869, telegraphic communication was established, by means of a submarine cable, between Tasmania and Victoria. In November, 1885, the communication was duplicated. The shore ends are at Low Head (Tamar) and at Flinders, near Cape Schank, Victoria. This cable is worked by the Eastern Extension Australasia and China Telegraph Company, under a guarantee from the Tasmanian Government. Communication has also been made with Swan Island, where a complete set of signals (international code) is worked from a flagstaff. Thus passing steamers are signalled, and the service is of great value to shipping interests. The use of the telephone has enabled telegraphic communication to be obtained with many small outlying places at a minimum of cost. Telegraphic charges within the colony are ten words one shilling, and one penny for every additional word. Messages between central and suburban offices in Hobart and Launceston, 6d. for first ten words, and one penny each additional word. Sunday messages double rates; press messages 100 words and under 1s. 6d., each additional fifty words 6d. Parliamentary reports, Hobart to Launceston and

PUBLISHED WITH THE AUSTRALIAN HANDBOOK. 1901.

other towns where papers are published, 9d. per 100 words. The cable charges are: to Victoria, ten words two shillings, each additional word twopence; to New South Wales, ten words two shillings and sixpence, each additional word threepence; to South Australia, three shillings, each additional word threepence; to Western Australia and Queensland, four shillings, each additional word fourpence; address and signature must not exceed ten words. To New Zealand, ten words five shillings and sixpence, each additional word sevenpence; address and signature charged for; New Caledonia, six shillings, each additional word sixpence, address and signature counted, in addition to ordinary rate to Queensland. In 1899 there were 328,654 paid messages transmitted. The expenditure for the year (Post and Telegraph Department) was £78,094 19s. 11d., and actual cash revenue £100,271 8s. 11d.; telegraph receipts amounting to £17,932 1s. 11d. The value of unpaid business, for public service, was £5,494 3s. 4d. The total number of messages transmitted by submarine cable during the year was 129,708, of which 1,518 were European, and the net receipts for submarine messages sent from the colony were £8,717 9s. 10d. The European business for 1899 shows total receipts £74 7s. 1d. The rental received from telephone lines was £4,284 12s. 10d.

Communication with England by submarine cable is available by three routes. The charge per word *viâ* Suez or Teheran is 5s. 5d., and *viâ* Hong Kong 13s. 3d., the name and address of sender and receiver being charged for, and words over ten letters counted as two words. The Telephone Exchange annual subscription is £6 for a distance not exceeding half a mile, and 15s. extra for every additional quarter of a mile. Non-subscribers can use the telephone on payment of sixpence for first five minutes, and 6d. for each additional five minutes or fraction, within radius of six miles; beyond that distance one shilling for each five minutes or fraction.

Postal and Money Order.—Postage rates are as follows:—Postal cards, one penny. Town letters, half-ounce and under, one penny. Inland letters, twopence. Ship letters for transmission to the Australian colonies, Fiji, or New Zealand, twopence. To United Kingdom and foreign countries 2½d. per half-ounce; post-cards, 1½d.; newspapers, 1d. each paper of four ounces, and for every additional two ounces ½d. Registered letters must bear an extra 3d. stamp. Mails for Europe are forwarded every fortnight by the overland route, *viâ* Melbourne, and every two weeks by the Orient Line. The Government have a contract with the Union Steam Navigation Company for a bi-weekly mail service between Melbourne and Launceston, the boats arriving at the latter port every Tuesday and Friday. The services *viâ* California and Torres Strait are also available for the transmission of correspondence and other mail matter to England. Postal notes for any sum not exceeding 20s. are issued within the colony. Post cards to Australian colonies, one penny. Book packets for the colony, the Australian colonies or New Zealand are charged one penny for every four ounces; to the United Kingdom and foreign countries the rate is one penny for every two ounces. Newspapers:—1. Newspapers printed and posted in the colony for delivery at any place within the colony beyond the boundaries of the city or town at which they may be published, and posted within seven days from the date of publication, free. 2. Newspapers published under similar regulations for West Australia, and to New Zealand, free. 3. Newspapers printed and posted in the colony for transmission to other Australian colonies not exceeding 10 oz., ½d. each, additional 10 oz. or under, ½d. 4. Newspapers printed and posted in the colony after seven days from the date of publication, ½d. each. 5. Newspapers posted within any city, town, or district in the colony for delivery by letter-carriers within such city, town, or district, ½d. each. 6. Newspapers received from places beyond the limits of the colony shall be delivered free; but when re-posted, whether in single numbers or stitched monthly parts of two or more numbers, shall be subject to a charge for each number, ½d. 7. Bulk parcels of newspapers printed in or out of the colony, and of any date, posted by a registered newspaper publisher or newsvendor for delivery within the colony, per pound or fraction thereof, 1d. To England: Commercial papers not exceeding 2 oz., 3d.; 4 oz., 3½d.; exceeding 4 oz., but not exceeding 6 oz., 4d.; 8 oz., 4½d.; 10 oz., 5d.; 12 oz., 6d.; every additional 2 oz. or under up to 5 lb., 1d. For newspapers in which registration is necessary:—United Kingdom: Newspapers each not exceediug 10 oz., 1d. each; each additional 4 oz. or under, ½d. 8. Newspapers liable to postage must be fully prepaid by affixing stamps of sufficient value. 9. Newspapers on being re-directed by postmasters consequent upon change of residence of addressee are not subject to additional postage. Parcel Post rates between Tasmania and United Kingdom, 2lb., 1s. 6d., and for each additional lb. or fraction, 9d.; maximum weight, 11lbs.; maximum size, 3ft. 6in. To Australian Colonies, not exceeding 1lb., 8d.; each additional 1lb., 6d. Spent letters, obliterated stamps, and travellers' cards or circulars pass at postal rate inland and intermediary. Also accounts and invoices if not of the nature of personal correspondence. Set of stamps, and also postcards, bearing views of Tasmanian scenery are in use.

In 1899 there were 355 post-offices or receiving houses, including 168 money-order offices, and the total work for the year was:—orders issued, £265,967 13s. 2d.; orders paid, £330,094 6s. 9d. During the year the receipt and despatch of correspondence through the various offices was as follows:—Received: letters, 6,196,773; post-cards, 268,675; packets, 1,588,042; newspapers, 7,176,758. Despatched: letters, 8,234,901; post-cards, 288,583; packets, 1,255,913; newspapers, 4,388,898. The revenue was £100,271 8s. 11d., the expenditure £78,094 19s. 11d. Of the letters and packets received during the year 1 196,967 were franked, and of those despatched 1,376,317 were franked. The business of the Department for the year shows an increase of £7,604 1s. 6d. on that of the previous year. In addition Customs Duty on parcels received amounted to £3,077 0s. 6d.

Money-orders can be obtained and made payable at all the leading post-towns in the colony; also on the leading towns in Australia and Great Britain, Canada, Cape of Good Hope, India, Germany, and United States of America. The commission charged for Tasmania is £2 and under, threepence; above £2 and not exceeding £5, sixpence; above £5 and not exceeding £7, ninepence; above £7 and not exceeding £10, one shilling. For the colonies the charge is £5 and under, one shilling; above £5 and not exceeding £10, two shillings. On the United Kingdom, and foreign countries, United States and Canada, the rates are: £2 and under, one shilling; above £2 and under £5, two shillings and sixpence; above £5 and under £7, three shillings and sixpence; above £7 and under £10, five shillings. No order is issued above £10. Through orders for foreign places, sent via London, will be liable to deduction of fees (3d. to 1s.) for issue of new orders. Money-orders can, when necessary, be sent to any part of the colony by means of the telegraph, on payment of the charge for telegraphing, in addition to the usual commission. Postal notes for amounts not exceeding £1 are payable at any office in the colony, or in Victoria, South Australia and New Zealand, and *vice versâ*.

In 1899 130,554 money-orders were issued, and 233,203 money-orders were paid; the total amount of transactions was £599,278 12s. 11d., being an increase of £21,068 10s. on transactions for 1898.

Postal notes numbering 56,114, and aggregating £16,883 0s. 11d. were sold.

Railways.—The lines of railway in working in Tasmania are the Launceston and Western Railway, from Launceston to Formby; the Main line of railway from Hobart to Launceston, and branches from Launceston to Scottsdale, Parattah to Oatlands, Corners to St. Mary's, Derwent Valley line from Bridgewater to Glenora, and Brighton to Apsley. Also Sorell line, from Bellerive to Sorell. On the West Coast Strahan to Zeehan, Ringville and North-East Dundas. The stations on the Launceston and Western Line are—Launceston; St. Leonard's, 4 miles; Breadalbane, 7¼ miles; Evandale Junction, 11¼ miles; Perth, 14¾ miles; Longford, 17¾ miles; Wilmore's Lane, 21¼ miles; Littlehampton, 22¾ miles; Bishopsbourne, 24¾ miles; Oaks, 26½ miles; Glenore, 28½ miles; Hagley, 31½ miles; Westbury, 35 miles; Exton, 41¼ miles; Deloraine, 45 miles; Chudleigh Junction, 48 miles; Dunorlan, 53¼ miles; Whitefoord Hills, 55 miles; Kimberley, 61½ miles; Railton, 67 miles; Dulverton, 69 miles; Latrobe, 75 miles; Tarleton, 77 miles; Spreyton, 79¾ miles, West Devonport, 82 miles, Ulverstone, 99 miles. Intermediate stations Lillico, Leith and Kindred. Between Chudleigh Junction and Mole Creek are two stations.—Needles 3 miles, Chudleigh 6 miles. Launceston to Scottsdale, 47 miles. The intermediate stations on this line are:—Mowbray, 2 miles: Rochers, 4¾ miles; Turner's Marsh, 13¼ miles; Karoola, 16½ miles; Lilydale, 21 miles; Tunnel, 25¾ miles; Lebrina, 28 miles; Denison Gorge, 29 miles; Wyena, 31 miles; Golconda, 34 miles; Lisle Road, 38 miles; and Lietinna, 43¾ miles. Derwent Valley Railway—Bridgewater to New Norfolk, 8½ miles; New Norfolk to Glenora, 6½ miles; Fingal branch, Conara to Stony Creek, 8 miles; Hanleth, 11 miles; Eastbourne, 13 miles; Avoca, 17 miles; Ormley, 24 miles; Tullochgorum, 30 miles; Fingal, 34 miles; Break o'Day, 38 miles; Mount Nicholas, 43 miles; Cullenswood, 45 miles; St. Mary's, 47 miles; Parattah to Oatlands, 5 miles. The line from Launceston to Deloraine is 82 miles in length, the gauge being 5 ft. 3 in. This now extends to Emu Bay, *viâ* West Devonport, on the Mersey River, deep-water port, Penquin and Ulverstone agricultural centres. At Emu Bay it connects with West Coast, giving through communication *viâ* Zeehan to Strahan and Mount Lyell. It is proposed to extend a branch line to Stanley, thus tapping a rising north-west agricultural and mining district.

The total expenditure on the Government lines which had been opened for traffic, in 1900, was £8,189 per mile. The gross revenue earned in 1899 was £193,158, and working expenditure, £152,798. The gross revenue for 1899 was more than that of 1898 by £14,978. The profit per cent. to cost of construction was 1·11, as compared with 1·03 in 1898. The profit for the year's working was £40,360, an increase of £5,359 over 1898.

The Main Line Railway extends from Hobart to Launceston, 133 miles. Stations and distances are:—Botanical Gardens, 2 miles; Risdon Road, 3 miles: New Town, 4 miles; O'Brien's Bridge, 5½ miles; Berriedale Road, 7½ miles; Austin's Ferry, 9½ miles; New Norfolk Road, 12½ miles; North Bridgewater, 13½ miles; Brighton, 17½ miles; Tea Tree, 21 miles; Richmond Road, 25 miles; Campania (Richmond), 27½ miles; Lower Jerusalem, 31 miles; Jerusalem, 39 miles; Flat Top, 46½ miles; Jericho, 51½ miles; Parattah for Oatlands, 55 miles; Eastern Marshes, 57½ miles; York Plains, 62½ miles; Antill Ponds, 68 miles; Antill Ponds Post Office, 70 miles; Tunbridge, 74 miles; Ross, 83 miles; Campbelltown, 91 miles; Corners (Fingal Road), 98 miles; Cleveland, 101 miles; Epping Forest, 105 miles; Snake Banks, 112 miles; Clarendon, 115 miles; Evandale, 120 miles; Evandale Junction, 122 miles; Breadalbane, 126 miles; St. Leonards, 129 miles; Launceston, 133 miles. It connects with the Western Railway at Evandale Junction. The Parattah line is a short length of 4½ miles. The Corners and St. Mary's line, specially constructed for development of the Mount Nicholas Coal Fields, is 47 miles long. Connection with George's Bay is made from the terminus, St. Mary's, by coach. The Parattah and Oatlands, Brighton and Apsley, Sorell and Bellerive and Chudleigh lines do not yet yield revenue covering ex-

penditure. The total cost of Government lines open for traffic in 1899—437·75 miles—was £3,604,222, being an average of £8,233 per mile. It is proposed to expend £200,000 in a new railway, Railton to Wilmot.

There are three through trains a day on the Main line—fares, 30s. and 20s. Intermediate fares, 3d. per mile first class, 2d. per mile second class. The gauge is 3½ feet.

A line from Mount Lyell to Strahan to open up silver and copper mines has been constructed by the Mt. Lyell Company. It conveys goods and passengers to and from Queenstown daily. The North Lyell line connects with deep water at Kelly's basin. The Great Western Railway Company have roughly surveyed a line to connect with Derwent Valley line at Glenora and terminate at Mount Lyell.

The line from Parattah to Oatlands (4 miles), on which one train to and fro runs daily, is the property of the Government; the Elwick line connecting at Glenorchy with Racecourse belongs to a private company.

The Hobart Electric Tram Company under Act of Parliament are working lines from Hobart railway station to New Town, Sandy Bay, and Cascade, Upper Macquarie Street. During 1899 the cars carried 1,409,996 passengers, and ran 313,745 miles, at a working cost of 7d. per car mile.

Banks.—There are four banks in Tasmania having branches or agencies established both in Hobart and Launceston, and also in various country districts, about twenty-eight in all. On June 30, 1900, the total assets of the four banks amounted to £3,352,231 15s. 9d.; the liabilities to £3,348,037 8s. 8d. Government securities held by the Commercial Bank of Tasmania amounted to £159,698 10s. 2d. The note circulation was £154,422, and the deposits amounted to £3,173,639 1s. 9d.. Interest on deposits: for 6 months, 1½ per cent.; for 12 months, 3 per cent. The Bank of Van Diemen's Land suspended in August, 1891. Up to June 30, 1900, the liquidators had paid nearly 17s. 6d. in the pound. At that date the liabilities were £30,816 10s. 3d.; assets were valued at £33,593 14s. A return in part to shareholders is anticipated.

Savings Banks.—The Savings Banks returns for the year 1899–1900 showed the following results:—Hobart.—Amount to credit of depositors on February 28th, £300,783 11s. 1d.; reserve fund, £44,373 11s. 10d.; amount lent on mortgage, £174,514 17s. 1d.; amount lent on Government securities, £150,000; fixed deposits, £88,500; cash in banks and on hand, £18,655 18s. 3d.; amount received from depositors during the half-year ending February 28th, 1900, £100,675 19s. 10d.; amount repaid during the half-year, £86,059 5s. 8d. Launceston.—Amount to credit of depositors on February 28th, 1900, £275,902; reserve fund, £22,883; amount lent on mortgage, £192,744; on local inscribed stock, 10,000 electric light debentures, £18,700; fixed deposits, £68,700; cash in banks and on hand, £13,366; amount received from depositors during half-year ending 28th February, £30,295 7s. 9d.; amount repaid during half-year, £65,373 18s. 6d. Accounts open on 28th February, Hobart, 13,653; Launceston, 13,560. Total, 27,213. All money-order offices are now savings banks. At these Post-office Savings Banks £179,608 8s. 10d. was received as deposits during the year 1899, and £5,924 1s. 7d. was apportioned to depositors as interest; £124,135 7s. 3d. was withdrawn, leaving a balance of £248,375 12s. 10d. to credit of investors, against £186,978 9s. 8d. at close of previous year. Deposits are received from one shilling upwards, and interest at the rate of 3 per cent. is allowed on all sums up to £150 in the Post-office, and 3 per cent. in the ordinary Savings Banks.

Revenue.—Receipts proper for the year 1899 were £943,970, and expenditure £871,454, leaving a balance of £72,516. Including special revenue from loans, suspense accounts, etc., the gross revenue was £2,419,533, and expenditure £2,336,527. Customs revenue was £424,547; land, income, and companies' tax, £38,579; inland revenue, £168,834; territorial, £84,621; and railways, £192,561. An increase on each is anticipated for 1899–1900, the Treasurer's estimated surplus for 1901 being £3,359. Commencing 1900 with a total deficiency of £183,804 18s. 3d., he estimated that at the end of 1900 it would be reduced to £70,061 18s. 3d., and a surplus of £3,358 16s. 4d. would be in hand.

Imports and Exports.—The imports in 1899 amounted to £1,769,324, and first six months of 1900 to £1,002,019 15s. 4d. The exports in 1899 amounted to £2,577,475, and first six months of 1900 to £1,315,968. Imports and exports for 1899 were £453,414 greater than in 1898. For the six months ended June 30, 1900, there was an excess of £304,982 compared with first half of 1899. The estimated Customs revenue for 1900–1901 is £480,200. For the first six months of 1900 the Customs duties were £230,439, as compared with £205,439 in the first six months of 1899.

Public Debt. — The Public Debt on 31st December, 1899, amounted to £8,413,694. The Public Debt's Sinking Fund on June 30, 1900, amounted to £169,367.

Real Estate. Assessed capital value, £19,973,150; Assessed annual value, £998,657. Taxation: Land Tax, £15,106; Municipal, £51,482; Road rates, £17,207; Town Boards, £7,258.

Patents.—Fees for obtaining patents in the colony of Tasmania are as follows:—On depositing specification, £2 10s.; to the law officer for any appointment, £2 4s. 6d.; on obtaining letters patent, £2 10s.; at or before the expiration of the third year, £15; at or before the expiration of the 7th year, £20; to the law officer with particulars of objections, £2 4s. 6d.; on presenting petition for extension or confirmation, £2 10s.; every search and inspection, 1s.; entry of assignment or license, 10s.; certificate of assignment or license 10s.; filing disclaimer or memorandum of alteration, £2 10s.; entering any caveat, £2 10s.; copy or extract of any writing per common law folio, 1s. All letters patent granted in the United Kingdom after the 30th June, 1859, are void, so far as Tasmania is concerned; patents granted in the United Kingdom previous to that are treated as valid.

Manufactories and Industries.—The climate of Tasmania is especially adapted to malting and brewing, and also to the growth of hops and fruit. The Tasmanian brewed ale is that chiefly used in the colony, and an export trade in this article is carried on with New South Wales and Victoria. Cider of excellent quality is also made Jam making is extensively carried on. There are 14 breweries, 17 tanneries, 8 soap manufactories, 8 candle manufactories, 7 jam manufactories, 73 saw mills, 35 agricultural implement makers, 3 brass foundries, 12 coachbuilding factories, 18 fellmongeries, 56 flour mills, 7 tin smelting works, 9 silver smelting, and 3 manufactories of cloth, tweeds, blankets, &c., from Tasmanian wool; the articles manufactured are of excellent quality. The manufactories, large and small, are estimated at 3,560. The continued discoveries of silver on the West Coast has induced the erection of smelting works at Strahan, Zeehan, and Williamsford, and connecting links with the mines in the shape of tramways.

Defence Forces. — The number of efficients on the rolls on 1st January, 1900, in all branches of the service, totals 1,450. Grand total, including 300 cadets, 1,750. The permanent staff comprises a commandant and other officers, with Artillery and Infantry instructors. A permanent Artillery force, 10 men, and a torpedo force of 42 men; the general staff and instructors numbering 4. Their duties are mainly the care of the batteries. Twenty-four companies of the Auxiliary Force, whose aggregate numerical strength was 1,256, returned 950 members who had completed the annual course of musketry. Small annual camps of exercise for the auxiliary force are held, and officers and non-commissioned officers attend instruction classes at their own cost. The defences consist of four batteries on the River Derwent, and a small battery on the Tamar. At Brown's Bluff, on the Tamar, another battery is to be erected for the defence of Launceston. The completion of the other batteries, as recommended by Sir W. Jervois and the late Major-General Scratchley, and the providing of additional means of defence for Hobart and Launceston, will not yet be perfected. Two 8-inch and two 80-pounder Armstrong guns are mounted on the Kangaroo Bluff battery. The guns are worked by hydro-pneumatic machinery. The fort is pentagonal in shape, and is surrounded by a wide ditch. At Alexandra Battery, on the other side of the river, a bomb-proof shelter has been constructed for the pumps and other stores, and the armament is in position. A powerful dynamo-electric light is used for lighting the Derwent. The cost of these two batteries, including ammunition, has been £25,500. An Act passed in 1891 prohibits any sketches being made of defences or information being given. A "Whitehead" torpedo-boat in the Derwent is manned by an officer and crew from the Torpedo Corps. The country auxiliaries do very satisfactory work in rifle practice and squad and company drill, and form the most efficient branch of the volunteer service. They provide themselves with ranges, butts, markers, mantlets, &c., and pay the cost of transit of arms, accoutrements, ammunition, &c., supplied by the Government. A grant in aid is made by Parliament, and Government prizes are annually awarded. Martini-Henry rifles and accoutrements are supplied, and also uniforms. The defence force is being extended by formation of Rifle Corps. The total cost of the defences of the colony for the year ending 31st December, 1899, was £13,894, including £4,971 contribution to Imperial Naval defence. For South African Contingents £22,000 was appropriated.

Administration of Justice.—The machinery for carrying out the laws and the settlement of money and other disputes consists of a Supreme Court, presided over by a Chief Justice and two Puisne Judges, Courts of Petty, General, and Quarter Sessions, the former presided over by Stipendiary Magistrates, assisted by Justices of the Peace, and Courts of Requests for the recovery of small debts (with jurisdiction up to £50), presided over by Commissioners. The Supreme Court have also jurisdiction under the Small Debts Act up to £100. The judges go on circuit, and sittings of the Supreme Court are held in the principal up-country towns. Commissioners reside on the goldfields.

Government.—The constitution of Tasmania was defined by the local Act of 18 Vict. No. 17. By this Act a Legislative Council and a House of Assembly are constituted, called the "Parliament of Van Diemen's Land." By 23 Vict. No. 43 it was provided that Members of the Legislative Council should be elected for six years. The House of Assembly is dissolved by effluxion of time every three years. By the Constitution Act Amendment Bill of 1896 the Council consists of eighteen members, and the Assembly of thirty-seven. Members of the Council must be natural-born or naturalized subjects, not holding offices of profit or emolument from the Crown (except responsible ministers), and not less than 30 years of age, elected by all natural-born or naturalized male subjects of the Crown, of full age, who possess freehold of the annual value of £20, a leasehold of the annual value of £40, or are graduates in any university in the British dominions, or Associates of Art of Tasmania, or are barristers or solicitors in the Supreme Court of Tasmania, or legally qualified medical practitioners, or officiating ministers of religion, or officers or retired officers of Her Majesty's land or sea forces not being on actual service, or retired officers of the Volunteer Force of Tasmania. Members of the House of Assembly must be 21 years of age, and subjects of the Queen, and are elected by all natural born or naturalized male subjects of Her Majesty, whose names are included in the Assessment Roll as the owners or occupiers of property within the district for which their votes are to be given, or who are in receipt of income, salary, or wages at the rate of £60 a year, and have

received income, salary, or wages equal to £30 during the period of six months next before the 1st of November in any year, and are resident in the district for which their votes are to be given. In computing wages, rations and allowances are to be included. These qualifications are fixed by 48 Vict., No. 54. The elections are conducted on the ballot system. At the Assembly elections (1897) the Hare system was satisfactorily adopted in Hobart and Launceston electorates. The stringent provisions of the Bribery Act of Great Britain have been made local law almost without alteration. An honorarium of £100 per annum is paid each member attending a certain number of days per session. The Legislative authority rests in both Houses united; while the executive power is vested in a Governor appointed by the Crown, and aided in the exercise of the executive power by a Cabinet of responsible ministers, consisting of five official members—Premier, Chief Secretary, the Treasurer, the Attorney-General, and the Minister of Lands and Works. A Minister without a portfolio is generally included. The Members of the Cabinet must have a seat in either House of Parliament.

THE GOVERNMENT OF TASMANIA.

Captain-General, Governor-in-Chief, and Vice-Admiral of Tasmania, His Excellency Viscount Gormanston, K.C.M.G., whose term of office expired on 9th November, 1900, left Tasmania on 6th August, having obtained leave of absence until expiration of such term.

Chief Justice Sir John Stockell Dodds was appointed Administrator of the Colony, which office he holds until a new Governor is appointed. £3,000.
Private Secretary, Mr. Norman Dodds, £250.

Commercial Club, Bathurst Street. Secretary, A. M. Hayton.
Working Men's Club, Liverpool Street. Secretary, W. M. Hodgman.
Bowling Club. President, R. Snowden; Secretary, H. M. Steinbach; Treasurer, E. M. Fisher.
Chess Club. Secretary, G. D'Emden.
Military Club. Secretary, Lieut. G. E. Reid.

CLUBS IN LAUNCESTON.

Launceston Club, Brisbane Street. Secretary, R. Montagu Browne.
Northern Club. Secretary, C. P. Hammond.
Workman's Club. Secretary, C. K. Ellis.
Bowling Club. Secretary, L. P. Collins.
Regatta Club. Secretary, W. Fletcher.
Yacht Club. Secretary, C. Smith.

AGENT-GENERAL IN LONDON—Sir P. O. Fysh, K.C.M.G., 5, Victoria Street.
BANKERS TO THE GOVERNMENT.—Consolidated Bank, 52, Threadneedle Street; and Bank of New South Wales, 64, Old Broad Street, London.

QUEEN'S DOMAIN COMMITTEE.

Chairman, Hon. C. H. Grant.
Hon. Secretary, Alexander Morton.

IMPERIAL INSTITUTE.

TASMANIAN BRANCH.

Patron, the Governor.
Chairman (Hobart), A. G. Webster.
Chairman (Launceston), Adye Douglas, M.E.C.
Organizing Secretary, .

HOBART HORTICULTURAL SOCIETY.

Patron, the Governor.
President, S. Benjamin.
Vice-President, Russell Young.
Hon. Treasurer, E. J. Crouch, M.R.C.S.
Hon. Secretary, M. Mason.

COUNCIL OF AGRICULTURE.

President, W. E. Shoobridge.
Secretary, T. A. Tabart. Hon. Assistant Secretary, T. Hogarth.
Entomologist, A. M. Lea, Hobart.
Honorary Botanist—L. Rodway, Hobart.

TASMANIAN TOURIST ASSOCIATION, HOBART.

President, Hon. Henry Dobson, M.E.C.
Hon. Secretary, Alex. Morton.

NORTHERN TASMANIAN TOURIST ASSOCIATION.

LAUNCESTON.

President, E. H. Panton, Mayor of Launceston.
Secretary, C. Still.

CUSTOMS TARIFF OF TASMANIA.

(The following tariff came into operation on the 1st January, 1899, with alterations during 1899–1900.

SPECIFIC DUTIES.

Acid, tartaric, 4d. per lb.
Acid sulphuric, 2s. 6d. per cwt.
Acid, citric, 4d. per lb.
Acid, muriatic, 2s. 6d. per cwt.
Acid, nitric, 2s. 6d. per cwt.
Acid, Acetic, Glacial Acetic, and Pyroligneous, imported in any quantity of not less than one ton at any one time by manufacturers to be used in their own factories, for each gallon containing not more than thirty-three per cent. of absolute Acid, 1s. 4d. per gallon.
And for each additional one per cent. of Acid, ½d. per gallon.
Acid, Acetic, Glacial Acetic and Pyroligneous, for each gallon of any strength not exceeding six per cent. of absolute Acid, 1s. per gallon.
And for each additional one per cent. of Acid, ½d. per gallon.
Almonds, whole, 2d. per lb.
Almonds, shelled, 3d. per lb.
Amygdaline, as turpentine, 1s. per gallon.
Aniseed balls, as confectionery, 2d. per lb.
Arrowroot, 1d. per lb.
Arsenic, crude, 5 per cent., ad valorem.
Bacon and hams, 2d. lb.
Barley, pearl, ½d. per lb.
Beef and mutton, salt or fresh, except in tins, 1d. per lb.
Belting, as machinery, 10 per cent.
Biscuits, not being dog biscuits, 2d. per lb.
Black Japan, 1s. 6d. per gallon.
Blue, 2d. per lb.
Blue, Prussian, as paint, ½d. per lb.
Bran, pollard, and sharps, 10d. per 100 lbs.
Butter and lard, 2d. per lb.
Camphor, comp. liquid, as extract of opium, 20s. per lb.
Candied, bottled, and canned fruits and peels, 3d. per lb.
Candles, 2d. per lb.
Caramel, 2d. per lb.
Carbonate of soda, 1d. per lb.
Carriages on four wheels and springs, £12 each.
Ditto on two wheels, ditto, £6 each.
Cattle—viz., bulls, bullocks, cows, calves, heifers, steers, £2 each.
Cements, mineral, 9d. per cwt.
Cheese, 2d. per lb.
Chicory, 4d. per lb.
Cider and perry, in wood, 1s. 3d. per gallon.
Cider and perry, in bottle, 1s. 6d. per gallon.
Coals, small, 2s. per ton; coals, round, 3s. per ton.
Cocoa and chocolate, 4d. per lb.
Cocoa and chocolate, unsweetened, in block, 2d. per lb.
Coffee (green), 2d. per lb.
Coffee (roasted or ground), also essence, 4d. per lb.
Coke, 1s. per ton.
Confectionery, 2d. per lb.
Confectionery, medicated, 2d. lb.
Cornflour and maizena, 1d. per lb.
Flour, wheaten, 2s. per 100 lbs.
Flour, sausage, 1d. per lb.
Fruits, fresh, when in cases or casks, 1s. per reputed bushel.
Fruit, dried—viz., currants, raisins, dates, prunes, figs, dried apples, 2d. per lb.
Fruit trees, 2d. each.
Galvanized and corrugated iron, £2 per ton.
Ginger, dried, whole, 2d. per lb.
Ginger, ground or powdered, 4d. per lb.
Glucose, 6s. per cwt.
Glue, 1d. lb.
Gold size, as varnish, 1s. 6d. per gallon.
Grain and pulse of every description, unless imported for agricultural purposes, including maize, 1s. 6d. per 100 lbs.
Gunpowder, blasting, 1d. per lb.
Gunpowder, sporting, 6d. per lb.
Gunpowder, FFF loose, 1d. per lb.
Harvest yarn and binding twine, wharfage 5s. per ton.
Honey, 2d. per lb.
Hops, 3d. per lb.
Horses—viz., colts, fillies, geldings, horses, mares, £2 each.
Lead, milled, sheet, and pipe, 2s. 6d. cwt.
Linseed and linseed meal, 1d. per lb.
Liquorice, 2d. per lb.
Macaroni and Vermicelli, 2d. per lb.
Malt, 1s. per bushel.
Malt liquor, in wood, 1s. per gallon.
Malt liquor, in bottle, 1s. 6d. per gallon.
Mattocks, as tools, 10 per cent.
Melons, 1s. per bushel.
Mustard, 2d. per lb.
Mutton hams, 1d. per lb.
Nails, iron, except screw nails, 2s. 6d. per cwt
Nails, lead headed, 2s 6d. per cwt.
Naphtha, 6d. per gallon.
Nuts, edible, except cocoanuts, 2d. per lb.
Oatmeal, ½d. per lb.
Ochre, red, ½d. lb.
Oil, cotton-seed, 1s. 3d. per gallon.
Oil, kerosene and gasoline, 6d. per gallon.
Oil, crude, shale, or petroleum, for fuel or gas manufacture, also russoline, 3d. per gallon.
Oil, vapourising, black lubricating, dark marine, 6d. per gallon.
Oil of all kinds, not otherwise enumerated, 1s. 3d. per gallon.
Onions, 1s. per cwt.
Opium, or extract thereof, 20s. per lb.
Paints of every description, ½d. per lb.
Pastilles, black currant, as confectionery, 2d. per lb.
Perfume sprays, 20 per cent.
Pepper, black and white, whole, 1d. per lb.
Pepper, ground, not being cayenne, 2d. per lb.
Peas, split, ½d. per lb.
Pickles, in reputed quarts, 3s. per dozen.
Pickles, in reputed pints, 2s. per dozen.
Pickles, in reputed half-pints, 1s. 4d. per dozen.
Pigs, 2s. 6d. each
Pork, fresh, salted or pickled, 2d. per lb.
Potatoes, 6d. per cwt.
Preserves, jams, jellies, 2d. per lb.
Rice, ½d. per lb.
Sago, ½d. per lb.
Salt, 1s. 6d. per cwt.
Sauces, in bottles, reputed quarts, 4s. per dozen.
Ditto, reputed pints, 3s. per dozen.
Ditto, half-pints, 2s. per dozen.
Ditto, quarter-pints, and smaller sizes, 1s. 6d. per dozen.
And so on in proportion for any greater or less quantity than a dozen of each size.
Seeds, canary, hemp, rape, ½d. per lb.
Sen sen, 2d per lb.
Shot, 1d. per lb.
Sheep—viz., ewes, rams, lambs, wethers, hoggets, 2s. 6d. each.
Soap, except fancy or perfumed, 1d. per lb.
Soap, fancy or perfumed, 3d. per lb.
Soda crystals, ½d. per lb.
Soap, sanitas, antiseptic (in cake), 3d. per lb.
Soap, sanitas, disinfecting, 1d. per lb.
Spices of all kinds, 4d. per lb.
Spirit levels, carpenters', as tools, 10 per cent.
Spirits of tar and naphtha, 6d. per gallon.
Spirits of salt, 2s. 6d. per cwt.
Spirits, viz., brandy, cordials, rectified spirits, and all other liquors, or strong waters, Geneva, gin, rum, whisky, 15s. per gallon.
And so on in proportion for any greater or less quantity than a gallon, not being less than one thirty-second part of a gallon, for spirits in bottle, and spirits in bulk for any quantity not being less than one-tenth of a gallon. All spirits under proof to pay duty as proof.
Spirits, methylated, taken at proof, containing not less than 10 per cent. of methyle of alcohol, 3s. per gallon.
And so on in proportion for any quantity less than one-fifth of a gallon.
Spirits, perfumed, 24s. per gallon.
Spirituous compounds, essences, fluid extracts, sarsaparilla, tinctures, medicines, infusions, and toilet preparations, not otherwise enumerated, containing: Not more than 25 per cent. of proof spirit, 3s. 9d. per gallon; not more than 50 per cent. of proof spirit, 7s. 6d. per gallon; not more than 75 per cent. of proof spirit, 11s. 3d per gallon; if containing more than 75 per cent. of proof spirit, 15s. per gallon; if containing spirit over proof to be charged, per proof gallon, 15s. per gallon. Provided, that when calculated at 20 per cent. *ad valorem*, the amount exceeds the sum of duty payable at the

rate of 15s. per proof gallon, duty shall thereupon become chargeable at the rate of 20 per cent. *ad valorem*.
Starch, 1d. per lb.
Sugar, crushed and loaf, 1d. per lb.
Sugar, icing and castor, 1d. per lb.
Sugar, tablet, as loaf sugar, 1d. per lb.
Sugar, all other kinds, 6s. per cwt.
Tapioca, 1d. per lb.
Tea, 3d. per lb.
Thread or twine, macrame, upholsterers' sewing or seaming twine, as twine 1d. per lb.
Timber, sawn, not otherwise enumerated, 3 inches or over, 1s. 6d. per 100 super. feet
Timber, sawn, under 3 inches, 2s. 6d. per 100 super. feet.
Timber, boards, planed, of every description, including tongued and grooved, 5s. per 100 super. feet.
Timber in short lengths, suitable for making cases, not exceeding 2 cubic feet in measurement, 1½d. each case.
Tobacco, viz., cigars and cigarettes, 7s. per lb.
Tobacco, manufactured or unmanufactured, 3s. per lb.
Tobacco, snuff, 7s. per lb.
Treacle and molasses 3s. 6d. per cwt.
Turpentine, 1s. per gallon.
Twine of all kinds, whipcord, and other cords not otherwise enumerated, 1d. per lb.
Varnish and polish not otherwise enumerated, 1s. 6d. per gallon.
Vinegar, other than aromatic or raspberry, 1s. per gallon, not exceeding 6 per cent. of absolute acid, and for each additional 1 per cent. of acid ½d. per gallon.
Whiting, 9d. per cwt.
Wines, in wood, containing 40 per cent., or less, of spirits, proof strength, 6s. per gallon.
Wines, in bottles, 8s. per gallon
Wines, champagne and all other sparkling, in bottles, quarts, 20s. per dozen; pints, 10s.; half-pints or less, 5s. Bottles containing more than one quart, an additional rate of 10s. per gallon on the excess.
Woolpacks, 4d. each.

All goods subject to duty at per hundred pounds, or per hundred-weight, or per ton, to pay duty on net weight, and on fractional parts of a quarter of a hundred pounds as if twenty-five pounds, or of a quarter of a hundred-weight as if twenty-eight pounds, and so in proportion.

No allowance in weight or measure to be made for exempt articles used in packing goods subject to duty.

Goods sent to other places with the sanction of proper officer of Customs for repairs or renovation, to pay on return the duty on cost of such repair or renovation, except on free goods.

Any liquor imported under the name of wine, containing more than 40 per cent. of spirits, to be rated for duty as spirits.

ARTICLES SUBJECT TO FIVE PER CENT. DUTY.

Paper uncut, being news, in original wrappers as it leaves the mills, and under declaration that it will be used exclusively in production of registered newspapers in Tasmania.

SEVEN AND A HALF PER CENT. DUTY.

Paper, uncut, not otherwise specified, in sizes not less than post, viz., 18¼ inches by 14½ inches, without printing or ruling, in original packages.

TEN PER CENT.

Beef and mutton in tins.

Boilers used in connection with machinery; blankets, endless, for ironing machinery; bottle rinsers; separator boilers; boiler composition; cash register machines.

Copper tubing.

Detonators, blasting gunpowder in cartridges and fuse; dry-as-dust.

Electric light main cable, transformers connected therewith, and insulators for main cable; engine packing, including pump butt leather, and asbestos boiler composition; engines, engine fittings, and machinery of every description, not elsewhere specified

Flock, cotton or woollen.

Grape vines, and gooseberry, raspberry, and currant bushes, fruit plants, shade, lawn, and ornamental trees, shrubs, and plants not elsewhere specified; grease, axle, and other solid lubricants not elsewhere specified.

Iron or steel nuts, washers and rivets, iron or steel bolts with or without threads, nut and bolt blanks, rolled iron or steel channels, special sections, column sections, trough sections, bulb bars, and rolled iron or steel bridge plate.

Mincing and sausage-machines, other than hand power.

Nitro-compounds and other explosives, not elsewhere specified.

Pipes, iron, not being made of galvanized iron plain sheeting; pumps, steam.

Railway and tramway plant and material, consisting of locomotives, carriages, rails, fishplates, turntables, points, and crossings, bolts, spikes fastenings, springs, wheels and axles.

Steam sheep-shearing machines; saws, circular.

Typewriters and duplicators used in connection therewith.

Valves for water-mains.

Wool presses.

TWENTY PER CENT.

All articles, goods, wares, and merchandize not subject to the payment of any "specific duty," and not enumerated in the foregoing table of duties or in any table of exemptions, are to pay duty at the rate of 20 per cent. upon the value thereof, including the following:—Assayers' flasks; beans haricot); brose meal; butter nut; bone cutters; belting grease; tool baskets; cocoa shell, ground; chesca; coach screws and cotter pins; disinfectant powder; drawing instruments; electric wires; picture-frames; brass web gauze; incubators; Japan black; hand-power mincing and sausage machines; motor-cars; sanctuary oil; vacuum leather oil; pease meal; hand-power pumps; plans and specifications; plough and trace chains; preservitas; pumice-stone; razor strops; rubber brake blocks; sheep-shearing machines (hand); spurs: maypole dye; ticket-dating presses; tryers for grain, butter, cheese and sugar; woven brass wire.

EXEMPTIONS FROM ALL DUTIES.

Animals, live, not subject to any specific duty; animals, living exported from Tasmania and reimported within three months; animals, living, imported into Tasmania and re-exported within three months; Abney's levels; antimony, ingots; atlases; accoutrements, arms, and musical instruments specially imported by or for any company of the Boys' Brigade; acid, carbolic and boracic; acid, sulphuric, rendered unfit for other purpose than the manufacture of artificial manure; acid, sulphuric, for mining purposes only, or for the manufacture of aerated waters; action work and keys, in frame or otherwise, for the manufacture of organs, harmoniums, and pianos, organ pipes and stop knobs; agricultural, horticultural, and dairying machinery, and any parts thereof, also implements and tools; alum, in bulk, underground; ambergris; anatto, liquid or solid, and renet; antimony ingots; antitoxin; antifriction magnolia; apiary furniture and appliances; arsenic, crude; articles given or awarded per ons resident in the colony as a prize, reward, or trophy, at any public exhibition or competition, held in any country other than Tasmania; articles given or devised for the enrichment or benefit of public places; articles reintroduced into the colony on proof to the collector and under such conditions as the Minister may prescribe, provided that such articles were originally admitted for home use under the provisions of the law in force for the time being. Articles in a crude state used for tanning, not elsewhere specified; asbestos, unmanufactured; artificial limbs; ash, hickory, lignum vitæ and lancewood timber, unworked; atlases, charts, and maps.

Bagging, jute, canvas, Forfar, calico, Dowlais, Hessian, cut up, under supervision of an officer of Customs, in sizes not exceeding 47 inches by 36 inches for making flour and other bags; bags, bottles, cases, casks, crates, sheep cages, and other packages, empty, on proof to the collector that they have been used in the export of Tasmanian produce; bags, gunny, bran, chaff, ore, and cornsacks; bags, flour, secondhand, imported for the purpose of packing manure; ballast; Baltic deals, American red pine, American clear or sugar pine, 3 inches and over; banners and regalia specially imported by and for the use of Masonic bodies and friendly societies; bicromate of potash for dye stuff; blocks (Tangye); bass and broom corn, bristles, kitool, hair, fibre, whisk, brush and broom heads, unfitted, and brushmaker's wire; bees; bells, specially imported for the use of churches; boards, mill, straw, paste, and card, uncut, not otherwise manufactured; bones, crude; bookbinding and ruling machines, and materials, viz., cloth, leather, thread, head bands, wire, webbing, and papers, tacketing gut, marbling, colours, marble paper, blue paste for ruling ink, staple presses, wire staples, staple sticks; books, printed, including music hymn-books and music tutors; boot elastic; boiler plates, unflanged end-plates for boilers, boiler tubes unflanged, expansion rings, and furnace flues of iron or steel; borax in bulk; bottle envelopes of straw; bottles, empty, plain glass, not being cut or ground; braille or moon types, braille frames, arithmetic slates, braille books, paper and boss maps, used by the blind; brass, scrap or ingot, and brass in bars, sheets, or plates not perforated or otherwise manufactured; brewers' isinglass; bulbs; bungs; butter colouring; brushes (stencil, whitewash, watch and cycle spoke).

Card clothing for woollen mills; cardboard packets for dried fruit and vegetables; carriages, bicycles, tricycles, and other articles not otherwise provided for, brought into Tasmania temporarily by visitors for their personal use only, when approved by the Minister, and under such regulations as he may prescribe; cabinet-makers' and upholsterers' materials, viz., French polish, sofa and chair springs and webbing, Venetian blind tape and webbing, pulleys, check actions, hair-cloth, curled hair, and castors; cane and bamboo, unmanufactured; canvas, navy; carbon, bisulphide; carriage-makers' material, viz., carriage, cart, and buggy shafts, poles, spokes, hubs, naves, and felloes in the rough, arms, axles, and springs; metalware, plated and mixed, being door handles, locks, shaft tips, stump and finger joints, and slot irons; rim bands and all ironwork, wrought and cast, used in carriage-building; chalk in the lump; clay: fire, lumps, and pipe, unmanufactured; cider presses; clocks specially imported for the use of churches; cloth, cuttings, clippings, and scraps of, for manufacturing flock; collar cloth; corn crushers; compass tripods; chaff cutters; coin of the realm; coir and cocoa fibre, not otherwise manufactured; coke; communion plate when imported for the use of churches; copper, sulphate of; copperas; copper: rod, bar, sheet, plate, and sheathing, not perforated or otherwise manufactured; copper and yellow metal ingots, nails, rivets, and burrs; corks, cut, and cork, unmanufactured, and capsules; cotton: waste, wick, and candle; cyanide of potassium.

Dextrine; diving dresses; dyewoods and dye-stuffs for manufacturing purposes only; diamonds for diamond drills; dressings for bootmaking.

Eggs, on proof to the collector that such are imported solely for the purpose of producing a pure breed of poultry stock; emery cloth and paper, sand and glass paper, flint paper and granulated flint for saw belts; evaporating ovens, designed solely for drying fruit.

Felt sheathing; fencing wire, droppers, standards, winders, and wire fencing staples; fire-extinguishing appliances imported by or for Fire Brigade boards; fish, fresh; flax, unmanufactured; fumigators for green-houses.

Galvanized iron, in plain sheet; gems uncut and unmounted; globes: geographical, topographical, and astronomical; gold, in bar, sheet, or dust; granite, in rough block; grease, rough, the refuse of animal fat; grease, hand-stuffing or dubbing, to be exclusively used in the preparation of leather; grindery, and all articles to be exclusively used in bootmaking, not including leather or boot linings.

Hair, unmanufactured; haircloth for hopkilns; handles: scythe and axe; harmoniums and organs, specially imported for and to be used only in churches; harvest yarn, binder twine, rope yarn, and wire for pressing; hames, horse-clipping machines; hatters' material, viz., leather cap-peaks and straps and cap-stiffeners, hat buckles, lining, not silken, silk plush, felt hoods, shellac, galloons, calicoes, scale boards for hat boxes and hatters' ribbons, when cut into lengths not exceeding 34 inches before importation, to be used solely for fabrication of hats and caps in the colony; hellebore, crude; hemp and jute, unmanufactured; hides and skins, raw and unmanufactured.

Ink, printing; iron and iron wire, tinned and coppered; iron and steel: rod, bar, sheet, hoop, plate, pig, angle, H, and T, not perforated or otherwise manufactured; iron, scrap, being waste or refuse wrought iron or steel; ivory black, lamp black, and vegetable black; ivory, unmanufactured.

Jars, empty: viz., jam, fruit, and preserving; jacks for lifting and jack cups; Jadoo fibre.

Kapok; kerosene slush; kreosote, crude; keys for bench work.

Lard; lead, pig or scrap; leather, viz.: levants or imitations thereof, glacé kid or imitations thereof, patent calf, calf kid, mock kid, glove hide, glove kid, coloured roans, skyvers or split roans, giraffe roans or coloured Persians, enamelled hide, dash leather, rough tanned split, and rough tanned calf, not otherwise manufactured; leeches; lime, carbonate and chloride; logwood; London purple; lathes; litho varnish; lawn mowers.

Machines, sewing and knitting, and machinery for woollen and boot manufactures; machinery and stills to be used solely in manufacturing or distilling from "dysoldile"; machines: capsuling, iron drilling, seed cleaning, threshing, confectionery cutting; milk skimmers, strainers and yokes; measures (tailors), mounts, coloured; magazines, reviews, and pamphlets, not essentially advertising matter; manures; manufactures from products of Tasmanian dysodile; marble in rough block; materials and fittings to be used in the manufacture of basketware, wickerware, and perambulators viz., perambulator wheels, axles, springs, handles, hood frames, hood rods, bentwood top, leather-headed nails, body-straps, rubber rims or tyres for perambulator wheels, pitch cement for fastening same, caps, bolts, nuts, and screws for same; material and fittings to be used in the manufacture of travelling bags and trunks, viz.: bag frames, mountings, lock-plate for locks, bag handles, dees, strap slides. Trunk fittings: locks, clips, and lock clips, bellows' nails, portmanteau lock clamps, brass and nickel roller and other buckles, iron frames, woodlaths for portmanteau frames; medals and certificates awarded persons resident in the colony by the Royal Humane Society, or any similar institution; memorial windows for use of churches; menageries: horses, cattle, carriages, and harness, and all paraphernalia connected with *bona-fide* travelling shows, theatrical scenery and effects arriving before or after any company, to be used solely for the purpose of public exhibition or entertainment under conditions prescribed by the collector; molasses, raw, rendered unfit for human consumption; moulding sand; moulding starch and moulding glue, confectioner's: muntz and babbit metal not perforated or worked; music, printed, bound or in sheets, not elsewhere specified.

Nickel in bars; newspapers; needles (packing); nitrate of soda for manure.

Oakum and junk; oil, batching, to be used in the manufacture of woollens; oil, refuse shale, imported to be used in brick-making; oil cake and cocoanut cake, and similar compounds imported as food for cattle; oil, cocoanut and palm, unrefined; oil, cod, sod, whale, seal, and penguin oil, for tanning purposes; oil, direct from whale fisheries; oil, to be exclusively used in the preparation of leather, viz., currier's, sole leather, rough leather, finishing, and kid oils; ores of metal of all kinds.

Paintings, etchings, engravings, and photographs; paper for fruit-wrapping, not exceeding 10 inches by 10 inches; paper vegetable parchment, and imitation vegetable parchment, to be used exclusively for packing and wrapping butter; paraffin wax and mineral wax; Paris green, dry; passengers' baggage and effects, including only wearing apparel and other personal effects that have been worn and are in use by persons arriving in the colony; implements, instruments, and tools of trade, occupation or employment, that have been in the actual use of *bona-fide* immigrants, such articles not being intended for any other person or persons or for sale; household and other effects, except carriages and plate, which have been in use six months prior to embarcation by the persons or families bringing them to the colony, and not intended for any other person or persons or for sale; also cabin furnishings belonging to such persons; personal and household effects, not being merchandise, of British subjects dying abroad, but domiciled in Tasmania; personal effects, the property of a deceased relative formerly a relative of Tasmania; peel, green, preserved in brine; phosphor bronze and bronze in blocks, bars, and sheets, not perforated or otherwise manufactured; phosphorus; pitch; plumbago; Post Office packages, if the duty upon the articles contained therein does net exceed one shilling; potash and pearlash, crude, and caustic potash, in bulk; pottery materials, viz., litharge, China clay, Cornish stone, felspar, manganese, oxide of cobalt; preservitas and similar preservatives, to be used in the preservation of fruit and dairy produce, in a fresh condition, not elsewhere specified; printing machines, printing presses, and material; produce of Tasmania, on proof to the collector and under such declaration as he may prescribe; pyralicide; pegwood, perforating pins, prospectors' dishes and pans; photogravures.

Quicksilver.

Rabbit traps, phosphorisers, or any machine to be used exclusively for destroying rabbits; rattans, split or unsplit, plaited straw and rushes, and plaited matting for basket and wickerware; resin; rope, cordage, and wire rope; reports of life and insurance companies; religious tracts.

Sacred vessels imported for use in churches only; saddlers materials, except bits and stirrup irons, viz., saddle trees, collar check and the same article plain, straining, surcingle, brace girth, and roller webs, hogskins, and patent winker leather, and ironmongery, legging-springs and buckles exclusively used by saddlers; salt, rendered unfit for human consumption, and rock salt; seeding-stock, scions and grafts, for grafting fruit-trees; seeds, agricultural, pastoral, and garden, in quantities not less than 28 lbs.; scale boards; sheep-dip; shellac, sandaric, and mastic; silver, scrap; silver, ingot, sheet or bar, not otherwise manufactured; slates, school, and slate pencils; soda: ash, caustic, and silicate, in bulk; solder and soldering fluid; specimens of natural history, when imported as objects of science and not for sale; specimens of philately; spun-yarn of hemp, jute, or flax; statuary; stearine; stone in rough block; stones: mill, grind, oil, and whet; syphon-bottles for aerated waters, not being seltzogenes; suet and tallow; sulphur; sumac; surgical instruments; sand screens, sieves, saw sets; straw presses.

Tannin and tannin extracts; tar; teasels; terra japonica; ties of iron or steel, cut to length, punched or not punched, with or without buckles or keys, for baling wool or hops; timber in log; tin and tin plates, unmanufactured; tinfoil; tobacco, for sheepwash or insecticide, after being rendered unfit for human consumption to the satisfaction of the collector; tools of trade, hand or machine, for all purposes, not being machinery; toxa, and all other poisons for the destruction of rabbits; treenails; tobacco cutter (Gibbs' self-feeding); trees and shrubs, ornamental, for public purposes; turmeric in bulk; twine, sewing, seaming, of hemp or flax; typewriters, tablets with movable fixtures, and musical instruments, when imported by or for the use of schools for the blind, and being and remaining the sole property of the governing bodies of the said schools and not of private individuals, the above particulars to be verified by special declaration on each entry when presented.

Ultramarine blue; umbrella makers' materials, viz., sticks, runners, notches, caps, ferrules, cups, ribs, stretchers, tips, and rings.

Vaccine and ivory vaccine points; valonia; veneer-wood; vestments imported for use for Divine service only.

Washers for patent bottles and syphons; wax, bottling; whalebone and whale-fins from whale fisheries; whaling implements and whaling gear; wire, iron or steel of Numbers 13 and 14 gauge, flattened and corrugated, used in connection with the machine known as the wire-grip and champion nailing machine for the manufacture of boots, shoes, and leather-belting; wire netting and woven iron wire; wire, bottling; wire (iron) binding, of Numbers 14, 15, and 16 gauge; wire, steel, Bessemer soft-drawn spring, of Numbers 10, 12, and 13 gauge respectively, and steel wire, tinned, of Numbers 11, 12, 20, 21, and 22 gauge respectively, to be used in the manufacture of wire mattrasses; woven wire fence machines; works of art, all, for public institutions; wool, unmanufactured; woolpacks.

Yarns, worsted, pure wool in grease for hosiery manufacturing only, of not less invoice value than 1s. 6d. per lb. avoirdupois.

Zinc, salts of, and zinc shavings and discs; zinc in blocks and sheets, not perforated or otherwise manufactured.

IMPORTATION OF SPIRITS AND TOBACCO.

In reference to importation of spirits and tobacco, the former Act of 1889 makes the following restrictions:—Spirits (not being perfumed or medicinal spirits) brought into Tasmania, will be forfeited and destroyed, or otherwise disposed of as the Treasurer may direct, unless in ships of fifty tons burden at least, and in casks or other vessels capable of containing fourteen gallons at least, and duly reported, or in glass bottles or stone bottles packed in casks or cases, and being really part of the cargo of the importing ship and duly reported. Snuff or tobacco, unless in ships of fifty tons burden at least, and in whole and complete packages, each containing not less than 60 lbs. net weight, and not containing any other goods, and unless into such ports as are or may be approved by the Governor-in-Council for the importation and warehousing of tobacco. Any person may make entry inwards of tobacco, cigars, or cigarettes, of not more than 5 lbs. net weight, for his private use, but if wilfully making a false declaration will be liable to a penalty not exceeding £50. Any entry inwards of liquor for home consumption, if made by a person not the holder of a wholesale license or public-house license, shall be valid if the person making such entry declares before the collector that the liquor entered is for private use, a false declaration entailing a penalty not exceeding £50. No such entry shall be made of wines exceeding one pipe, or of spirits exceeding thirty-five gallons, or of malt liquor exceeding fifty-five gallons.

DRAWBACKS.

Drawbacks of the whole amount of duty are allowed upon exportation of all articles except the following:—Barley (pearl), barley (Scotch), butter, carriages, castings, chimney pots, cider, cigars, flour (wheaten), grain, jewellery, lard, linseed, linseed meal, malt liquors in wood, oatmeal, peas (split), seeds, shot, soda crystals, spirits, timber sawn under three inches, tobacco, vinegar, wines in the original packages in which the same were imported, if shipped within two years after the day of importation, and the duty on anyone amounts to £1.

A drawback of 6d. per 100 pounds is allowed on the exportation of malt made from imported barley, on which duty has been paid, if shipped within three months.

On carriages, pianofortes, musical instruments imported by visitors for their own private use a drawback of the whole amount of duty paid, if re-shipped within six months of their being imported; also on silver plate imported by the owner for his own use, the whole duty is allowed whenever it is exported.

On every ton weight of jams manufactured in the colony and packed in jars or tins only, an allowance of £3.

Beer manufactured in the colony, a sum equal to the duty paid thereon. Confectionery manufactured in colony, not less than one cwt., at the rate of £6 per ton.

Sea-going steamers may ship coal for fuel free of duty.

EXCISE DUTIES.

Ale, Porter, and all other Malt Liquor, or fermented beverage made in imitation of beer or malt liquor and brewed in whole or in part from any other substance than malt, 6d. per gallon. Cigars and cigarettes manufactured within the colony 2s. per lb.

PROBATE DUTIES.

Personal Estate of £200 and under £500 ... ... 2 per cent.
" " £500 " " £2,500 ... ... 6 per cent.

Duty on bequests to widows and children, one-half the above rates.

All debts to be deducted before Duty is charged.

No Duty payable on money receivable from any Friendly Society, nor on any sums received under life policies, not exceeding £1,000, where held by or for deceased, his wife or child.

TAXES.

On Property, Houses, and Land, ½d. per £ capital value.

PILOTAGE.—(Hobart.) On Sailing Vessels, inwards, per ton 6d.; on Steam Vessels, 4d.; maximum charge, £15; outward maximum, £5 (pilotage not compulsory). (Launceston.) Sailing Vessels, per ton 6d.; Steamers, per ton 4d.; vessels under 80 tons, exempt.

LIGHTHOUSE RATES.—Coasters and other vessels 3d. per ton; maximum charge £25. Payment at one port clears vessel at all others in Tasmania.

TOWNS IN TASMANIA

ALBERTON, a post town, with telegraph, in the county of Dorset, electorate of Fingal, and police district of Ringarooma. It lies about 7 miles S. from the township of Upper Ringarooma, on one of the slopes of Mount Victoria, 70 miles from Launceston and 186 miles from Hobart. Tin mining locality. Wesleyan Church and State school here, two hotels. The nearest station is Ellesmere, where there is train communication, once daily, to and from Launceston.

ANTILL PONDS (42° 10′ S. lat., 147° 27′ E. long.) named after Major Antill, of the 48th regiment, a post town, money-order, telegraph, parcel-post, and savings bank station in the county of Somerset, electoral and municipal district of Oatlands, 68 miles N. of Hobart, on the coach road to Launceston. It is a station on the Main Line Railway. Fares, 15s. 3d. and 10s. Hotel: Halfway House. State school.

APSLEY (42° 24′ S. lat., 147° 2′ E. long.), a post town, with telegraph, parcel-post in the county of Monmouth, electorate of Cumberland, and municipality of Bothwell, distant 9 miles from Bothwell, and 36 miles NW. of Hobart, and present terminus of the Brighton and Apsley line. It is on the river Jordan and the road from Melton Mowbray to Bothwell. Perch fishing may be had here. Good farming and agricultural land in the vicinity. The Brighton and Apsley branch railway connects with main line railway State school. One hotel. A coach plies once each way daily between Apsley and Brighton. Population of town and district about 150.

ARGENTON (42° S. lat., 145° 10′ E. long.) a railway station and post town on the Strahan and Zeehan Railway, county of Montagu. Mining and agricultural work progresses side by side. Terminus of Oceana Tramway. Flying survey made for railway connecting Strahan-Zeehan line with Henty, Tyndal and Red Hill mines. One hotel. Population, 50; of district, 9,000.

AUBURN. A post town, 65 miles S. of Launceston, and 15 miles from Ross Railway Station. Local industry agricultural.

AVOCA (41° 47′ S. lat., 147° 25′ E. long.), a proclaimed town with money-order office, savings bank, parcel-post, and telegraph station, in the county of Cornwall, on the borders of Glamorgan, electorate and municipality of Fingal, at the confluence of the St. Paul's and South Esk rivers, 103 miles NE. of Hobart, 52 miles SE. from Launceston, and 18 miles SW. from Fingal. The St. Paul's river is spanned by a free-stone bridge of handsome proportions, constructed upwards of 42 years ago. The main coach roads, Corners to St. Helens and Avoca to Swansea, join here. It is a station on the Fingal Railway line, and about midway between the Corners and St. Mary's. One train passes each way daily, and extra trains, as needed, run with coal freights from Mount Nicholas, fares 7s. 6d. and 5s. Hobart fares 26s. 9d., 17s. 10d. Hotel: Foster's. A coach plies to and from Leipsic tri-weekly, fare 3s. There are two places of worship, St. Thomas's Episcopal Church, and the Guardian Angels, Roman Catholic, and a public school. One hotel. Tin and wolfram widely distributed. Silver lead ore is also worked. Much wool is grown in the district, and the export of wattle bark is large. It is also an agricultural district. Places of interest Ben Lomond mountain, St. Paul's Dome, and tin mines. Population (census, 1891) 180; June, 1900, about 350.

BACK CREEK. A post town, county of Dorset, electoral district of George Town, 36 miles NE. of Launceston. Mail service twice weekly to and from Hobart and Launceston. An agricultural district.

BAGDAD (42° 36′ S. lat., 147° 14′ E. long.), a post town, parcel-post, and telegraph station in the county of Monmouth, electorate of Brighton and municipality of Greenponds, situated on the Strathallen and Bagdad Creeks, about 23 miles from Hobart. There is one hotel (the Swan), public school, and public library, with 750 vols., and cricket club. The district is of a grazing and farming character. Kempton or Greenponds is 5 miles distant. It is a railway station on the Brighton and Apsley line, which connects with the main line. Fare to or from Brighton 2s.

BARRINGTON (41° 21′ S. lat., 146° 15′ E. long.), a post town with money-order office, savings bank, parcel post, and telegraph, in the county of Devon, electorate of Devonport, and police district of Port Sorell, situated between the rivers Don and Forth, about 60 miles NW. of Launceston and 202 miles from Hobart. The only public buildings are the Wesleyan chapel and the public school. Agricultural and grazing district, hilly and heavily timbered. Kentish butter factory established 1895. Barrington is connected with good roads extending to Don, Latrobe, Devonport, and adjacent localities. The total land worked in 1899 in Mersey district was 94,605 acres, including wheat, 3,103 acres; oats, 4,731 acres; potatoes, 5,111 acres; gardens and orchards, 328 acres. Produce:—Wheat, 30,940 bushels; oats, 141,930 bushels; peas, 28,784 bushels; potatoes, 12,086 tons; apples, 6,034 bushels; pears, 175 bushels. Stock: Horses, 2,034; cattle, 8,411; sheep, 15,916; pigs, 5,001.

BARRINGTON LOWER. Post town, with telegraph, 84 miles West of Launceston and 7 miles from Formby Station. Agricultural district.

BEACONSFIELD (41° 9 S. lat., 146° 6′ E. long.) (so named by Governor Weld after the late Earl of Beaconsfield), formerly known as BRANDY CREEK, is a post town, with money-order, parcel-post and telegraph and savings bank, and place of petty sessions, and Court of Requests, in a gold-mining district, county of Devon, police and electoral district of Georgetown. It owes its position to the discovery of quartz reefs in June, 1877, by Mr. William Dally. It is situate on Brandy Creek and Blyth's Creek, the west bank of the river Tamar, at the foot of Cabbage Tree Hill, about 1½ miles from the water's edge, and lies about 28 miles NW. of Launceston, with which it is connected by a fair road, and is 156 miles N. from Hobart. Steamers from and to Georgetown (4 miles) and Launceston call daily to embark and discharge passengers and cargo at Beauty Point jetty (about 3½ miles distant), and Bowens jetty, connected with Beaconsfield by steam tramway. There is also coach communication with Launceston; fare 5s., 8s. return. Hotels: Club, Beaconsfield, Ophir, Duke of Edinburgh, Tasmania, and Exchange. In the township are six churches, Episcopal, Roman Catholic, Wesleyan, Presbyterian, and Salvation Army barracks, State and private schools, Masonic Hall and one lodge, Friendly Societies, A. O. Foresters, M. U. Oddfellows, Good Templars, Rechabites, Brass band, Chess Club, and a branch of the Amalgamated Miners' Association of Australasia, police-station, numerous stores, a public library and reading room, Alfred Hall, and Victoria Hall, a branch of the National Bank of Tasmania, and private houses and cottages numbering about 1,200; also a cottage hospital. A Town Board looks after local requirements. Geological formation: Silurian era with much limestone. The district is justly regarded as one of the most important mining districts in the colony. The Tasmania Gold Mining Company has proved itself to be one of the most productive in the southern hemisphere, comprising an area of 102 acres. Its cyanide and reduction plants for concentrating pyrites are of the newest and best kind. The mine is lighted by electricity. Two batteries with 105 heads of stampers turn out about 40,000 ozs. of gold yearly. The other leading mines are the North Tasmania, Wonder *cum* Moonlight, East Tasmania, Amalgamated West Tasmania, Ophir, Tasmania Consols, Eaglehawk, &c. The area of the field in immediate vicinity of the town is about 600 acres; the entire field, including Salisbury, is quite 13,000 acres, and the deepest shaft 1,000 feet; the length of drives and tunnels in the aggregate amount to several miles. The southern portion of this goldfield is known as the Blue Tier (Salisbury), which is about 5 miles distant. Some limestone caves about 5½ miles from the township are of interest to tourists. Population, 30th June, 1900, 3,600; district 7,000. Beaconsfield ranks as the fourth town of importance in the colony.

BELLERIVE (KANGAROO POINT) (42° 53′ S. lat., 147° 22′ E. long.), a rapidly extending suburb of Hobart, two miles distant, on the opposite side of the water, prettily situated on the E. Bank of the Derwent. It is in the county of Monmouth, and electoral district of Richmond, and is governed by a Town Board. It has a mechanics' institute, with library of 900 vols., stage and appointments for public entertainments, and places of worship belonging to the Episcopalians (St. Mark's), Roman Catholics, and Congregationalists, also a public school and a money-order, telegraph, parcel-post and savings bank office. Two hotels, the Clarence and Bellerive. Steamers and steam launches ply regularly throughout the day; fare, 3d. It is the terminus of the Bellerive and Sorell railway; a line which will eventually be extended to the East Coast of the island. Coaches run daily to Richmond and Sorell. Court of General and Quarter Sessions and Petty Sessions are held here. The Town Board is actively improving the streets and environs. The rural municipality of Clarence, proclaimed 9th October, 1860, has an area of 56,000 acres, the ratable value of property being £8,250, and capital value £265,300. Agricultural returns to March 1, 1900, were, acres worked, 52,371, including 1,693 acres wheat, 49 barley, 230 oats, 178 potatoes, 1,462 hay, 1 634 gardens, and orchards 397. Produce:—wheat, 23,502 bushels; barley, 1 372 bushels; oats, 5,290 bushels; peas, 2,432 bushels; potatoes, 534 tons; apples, 14,607 bushels; pears, 1,264 bushels. The live stock was 463 horses, 1,033 cattle, 16,253 sheep, and 805 pigs. Population (census 1891), 625; district, 1,063, present estimate, 1,800.

BELTANA. A river-side suburb facing the Derwent, two miles from Hobart; has post-office and parcels post, telephone connection, and hourly steamboat service. State school. It is a proclaimed town, and has a Town Board; annual valuation of property, £2,200; streets laid out and formed, and good recreation ground established, convalescent home, and many pleasant villas built. Good fishing and shooting. Population about 150.

BEN LOMOND. Post town, county of Cornwall, municipal and electoral district of Fingal; 122 miles from Hobart, 60 miles from Launceston, and 12 miles from Avoca railway station. From top of the famed Ben Lomond Mountain magnifi-

cent view obtained. There are also two lakes on the summit. Valuable tin, silver, gold, and coal lodes in this locality. Geological formation, granite, sandstone, and slate.

BERRIDALE, on banks of Derwent, three miles from Glenorchy, at junction of road to Bismarck settlement. Post and parcel-post, railway-station, telegraph office. Good fishing and boating.

BEULAH. Post town, county of Buckingham, municipal district of Deloraine, electoral district East Devon. Nine miles from Dunorlan railway station. State school. Centre of agricultural district. Road Trust: valuation, £1,250.

BICHENO (41° 51′ S. lat., 148° 9′ E. long.), a post and telegraph town, with parcel-post, on the eastern coast, in the county, electorate and municipality of Glamorgan, about 140 miles NE. from Hobart, 100 miles from Launceston SE., and 27 miles from Swansea NE. Coach to St. Mary's station, 28 miles, and to Campbell Town; mail cart to Swansea. Steamer communication every 10 days. It has one place of worship, used by all denominations. There is good tin mining at Freycinet's Peninsula, 20 miles distant. Population, 100.

BISHOPSBOURNE (41° 35′ S. lat., 146 E. long.), a village, with post-office, parcel-post, money-order and savings bank office, and telegraph station, within a short distance of the river Liffey, in the county of Westmoreland, electorate of Cressy, and municipality of Longford, about 8 miles W. of Longford. It is 138 miles distant N. from Hobart, 24¾ miles SW. from Launceston, and is a station on the Launceston and Western Railway. The station is about 1½ mile from the village. Fares, 3s. 9d. and 3s. to Launceston. A conveyance meets morning and evening trains carrying passengers to and from Carrick, Hadspen, and Bishopbourne. It has an Episcopal and Wesleyan place of worship, a public and a private school. Also an hotel and bacon factory. Agricultural and pastoral district. Good mountain and lake scenery in immediate vicinity.

BISMARCK. Post town, with telegraph, 12 miles from Hobart and 6 miles from Berridale station on main line. Agricultural district. Population mainly Germans, who follow agricultural pursuits. State school, and hall for public purposes.

BLACK BRUSH. Post town, with parcel-post, 7 miles from Brighton on main railway. State school. There is a station at Black-brush Road, on the Brighton and Apsley line. Agricultural district.

BLACK RIVER. Post town, Wellington county, Russell municipality, 134 miles E. of Launceston. Anglican and Wesleyan churches here. Coach and steamboat communication.

BLUE TIER (Poiemena) (40° S. lat., 147° E. long.). A post town, in the county of Dorset, electorate of Fingal, and police district of Portland, 180 miles from Hobart, situated about north-west from St. Helens, distance 20 miles. Several tin lodes are being worked here. Geological formation: Granite, probably Laurentian. Communication by railway to St. Mary's *viâ* Fingal, thence 43 miles by coach. Also by train from Launceston to Scottsdale, thence per coach. Fare 16s. Coach communication also with St. Helen's 8s. One hotel, the Blue Tier, and a State school. From Mount Michael, in the vicinity, a view of one-fourth of the island can be obtained. Population of town, about 150.

BLUE TIER JUNCTION. Lottah. Post town, with parcel-post and telegraph station, county of Dorset, police district of Portland, 40 miles from St. Mary's, 16 miles from St. Helen's, three miles from Gould's country. Coach fare to Georges Bay, 6s. 6d.; thence to St. Mary's, 7s. 6d.; thence per rail to Hobart. Daily mail to and from St. Helen's and Scottsdale. Two hotels. State school. Head-quarters of branch of Amalgamated Miners' Union of Victoria. Beautiful scenery. Industry: Tin mining; Anchor, Liberator, Australian, and Cambrian mines, all within a radius of three miles. Machinery for tin saving; finest south of the Line. Anchor has 120 head of stampers. Geological formation: granite, probably Laurentian. Population, 450.

BOAT HARBOUR. Post town, with telegraph, money-order, savings bank and parcel-post, in municipality of Emu Bay, county of Dorset. Seventeen miles from Burnie. The centre of large agricultural district.

BOTHWELL (42° 24′ S. lat., 146° 46′ E. long.) is pleasantly situated on the river Clyde, has a money-order and savings bank office, post, parcel-post and telegraph station. It is in the counties of Cumberland and Monmouth, and electorate of Cumberland, 46 miles NW. of Hobart, and about 100 miles S. from Launceston. It is distant 9 miles from Apsley, present terminus of the Brighton and Apsley branch line. There is daily coach communication with the metropolis by way of Apsley (fare 2s. 6d.), where the coaches meet trains, and a carrier's van leaves weekly. Hotels: Bothwell Castle, Crown and White Hart. It stands upon a flat, at a considerable elevation above the sea-level, having for a background a range of lofty mountains, densely wooded. There is a public library in the township, containing 3,000 volumes, also a working man's club, and an assembly room in Patrick Street. The places of worship are an Anglican church, St. Michael's; and Roman Catholic chapel; also public school and private school. Court of petty sessions is held here, also general and quarterly sessions. There are good municipal chambers and a public hall. There are two flour mills, a brewery, a cordial manufactory, and numerous stores. Anglers may obtain licenses and get good sport, the river abounding in brown trout. In the summer season there is coach communication with the Great Lakes, a favourite resort for tourists. Bothwell is also the name given to the rural municipality (proclaimed December 22, 1862), which has an area of 305,000 acres, the annual value of ratable property being £18,283, capital value £412,306. Road Trust valuation, £17 952. Pastoral district, with some tillage, principally wheat. Agricultural returns to March 1, 1900, were 303,800 acres worked. Wheat, 994 acres; barley, 35 acres; oats, 379 acres; potatoes, 37 acres. Produce: wheat, 9,940 bushels; barley, 350 bushels; oats, 5,785 bushels; potatoes, 74 tons; peas, 192 bushels. Stock: horses, 402; cattle, 3,524; sheep, 118,058; pigs, 550. Population (census 1891) 520; of the municipal district, June, 1900, about 1,800.

BRACKNELL (41° 45′ S. lat., 147° E. long.), a postal, telegraph, money-order, and savings bank township, in the county of Westmoreland, municipality of Westbury, and electoral district of Cressy, 4½ miles from Oaks which is the nearest railway station, (daily 'bus fare 1s.) 31 miles SW. of Launceston, and about 142 miles N. of Hobart, situated on the Liffey. There is telephonic communication with Bishopbourne. A 'bus runs to and from the Oaks railway station twice daily. Fare, 1s. single. Hotel, the Enfield. State school. Two general stores, Primitive Methodist and Baptist places of worship. The district is pastoral and agricultural. Water supplied by Liffey river. Geological formation, blue stone rock and gravel. There is good fishing for trout and black fish in the Liffey. Good shooting also in vicinity, and during summer the Great Lake can be reached by crossing the Western Tier. Guides obtainable at Blackwood Creek. Population (census 1891) 101; now 200.

BRADSHAW CREEK. Post town, money-order, sa ings bank, parcels-post, and telegraph office, county of Dorset, municipality and electoral district of Ringarooma. Thirty-five miles from Scottsdale. Tri-weekly coach, fare 15s.; thence by rail to Launceston, fares 11s. 9d. and 7s. 10d. One hotel. Tin mining township.

BRANXHOLM (41° 5′ S. lat., 147° 53′ E. long.), a post town, with parcel-post, telegraph station, savings bank and money-order office, in the county of Dorset, electorate and police district of Ringarooma, 196 miles from Hobart, 59 miles from Launceston E., and 16 miles from Ellesmere (Scottsdale), on the Ringarooma River, is the centre of a tin-mining district. Deep deposits of alluvial tin of considerable extent and richness exist here. The Warrentinna goldfield is about 1½ mile north. There is also splendid agricultural land in the vicinity. A daily coach runs to and from Scottsdale. Fare, 5s. Railway fare from Scottsdale to Launceston 11s. 9d. and 7s. 10d. One hotel, the Branxholm. Churches: Roman Catholic and Wesleyan. One State school, court-house and police buildings; also race club. Population 175.

BREADALBANE (41° 31′ S. lat., 147° 14′ E. long.), a postal town, parcel-post, and telegraph, county of Cornwall, electorate and police district of Evandale, 7¼ miles S. from Launceston, at the junction of the Evandale road with that to Hobart, 126 miles from the capital. It is a station on the Launceston and Western Railway. Fares, 1s. 6d. and 1s. 3d. Hotel: Woolpack. It contains a public school, and a church, open to any Christian denomination, and a Ploughing Association. The surrounding scenery is attractive. Population (census 1891) 131; now 190. Road trust valuation, £2,000.

BREAM CREEK (Kellevie) (42° 47′ S. lat., 147° 53′ E. long.), a post town with parcel-post and telegraph, about 16½ miles from Sorell, situated on the creek whose name it bears, near the head of Marion Bay, 30 miles E. of Hobart. It is in the county of Pembroke and municipality and electoral district of Sorell. This place is reached *viâ* Sorell, by conveyances running daily to and from Sorell, whence there is train communication with Hobart. Conveyances also connect with Copping and Kellevie. It has three places of worship and a spacious hall for public entertainments. Cricket club. Good roads for summer bicycling. Splendid scenery, good fishing and shooting. Agricultural district. Settlement is extending here steadily. A butter factory does profitable work. Road trust valuation, £3,000. Population of district about 500. Soil: volcanic.

BRIDGENORTH, post town, county of Devon, municipality and electoral district of Westbury; 12½ miles NW. of Launceston. State School. Agricultural district.

BRIDGEWATER (42° 45′ S. lat., 147° 11′ E. long.), a township with money-order, savings bank, parcel-post, and telegraph office, on the river Derwent, in the county of Buckingham, municipality and electoral district of New Norfolk, 12 miles NW. of Hobart, on the N. side of the Derwent, which is here crossed by a causeway and bridge nearly a mile in length. The Main Line Railway also crosses the Derwent at this point by a bridge of ten arches. A drawbridge is maintained for the convenience of navigation. The Derwent Valley Railway to New Norfolk and to Glenora junctions here with the main line. There is a station also at North Bridgewater (13½ miles by rail from Hobart); fares, 2s. 4d. and 1s. 9d. New Norfolk steamers call here once weekly in winter, and during the summer months daily; fare, 2s. There are two hotels, the Railway and Derwent, and one at South Bridgewater, the York. Episcopal church (St. Mary's); public school, cricket club. Population (census 1891), 143, now 240. Large cattle and produce markets are held here weekly. Road trust valuations, North Bridgewater, £1,200; South Bridgewater, £350.

BRIDPORT (41° 2′ S. lat., 147° 24′ E. long.), a post town, in the county of Dorset, police district, and electoral district of Ringarooma, situated 183 miles N. from Hobart, 50 miles NNE. from Launceston, and 45 miles from Georgetown, on the junction of the Great Forester and Brid River, near its discharge into Anderson's Bay. It is the port of Scottsdale and the upper Ringarooma. Communication is by occasional steamers, but principally by train from Scottsdale to Launceston. Fare, 11s. 9d. and 7s. 10d. Also by coach to Ringarooma, Branxholm, and Brothers' Home, fares, 5s. to 10s. The Union Methodists have a church here. Geological formation: granite eastward, sandstone and slate west, with auriferous deposits. Water supply from river. Bridport is a favourite

resort for fishing, shooting, and sea-bathing. Fruit grows abundantly, and there is good agricultural and grazing country. Population small, except in summer season, when Bridport is a favourite health resort.

BRIGHTON (42° 40′ S. lat., 147° 12′ E. long.), a rural municipality (proclaimed October 5, 1863), post and telegraph station, with parcel-post, money-order and savings bank, in the county of Monmouth, electoral and police district of Brighton, containing the townships of Pontville and Elderslie. It is a station on the main line of railway and junction of the Brighton and Apsley line. Railway fare to Hobart, 3s. and 2s. 3d. It has a well-established race club. Three hotels—Enterprise, Crown, and Bridge. The district has an area of 95,922 acres, with 64 miles of roads and streets, and property of yearly ratable value of £13,814, capital value £296,255. Agricultural returns for March 31, 1900, were 87,942 acres worked. Wheat, 2,588 acres; barley, 285 acres; oats, 855 acres; peas, 428 acres; potatoes, 420 acres; hay, 1,597 acres; gardens and orchards, 450 acres. Produce: wheat, 41,808 bushels; barley, 13,976 bushels; oats, 30,520 bushels; peas, 5,992 bushels; potatoes, 368 tons; mangolds, 1,506 tons. Stock: horses, 566; cattle, 1,419; sheep, 26,894; pigs, 1,069. Population of the electoral district (census 1891) 3,414; now about 3,700.

BROADMARSH (42° 38′ S. lat., 147° 10′ E. long.). With post-office, parcels-post, money-order and savings bank, and telegraph station at Lower Broadmarsh; municipality of Brighton, county of Monmouth, twenty miles from Hobart. State school, Anglican and Congregational churches, Road Trust, and cricket club. One hotel: the Prince of Wales. Road Trust valuation, £5,200. The drive from Brighton on main road to this village is one of the most attractive in South Tasmania. Shooting is abundant, and there is good fishing in the Jordan. Population 150.

BROWN RIVER (42° 59′ S. lat., 147° 19′ E. long.), a post town 10 miles S. of Hobart, with which it has daily coach communication. Telegraph station. A favourite place of resort for aquatic parties, for whose convenience a landing pier has been erected, and a good hotel, The Australasian. A spacious hall is available for public entertainments. *See* KINGSTON.

BUCKLAND (42° 37′ S. lat., 147° 44′ E. long.), a postal centre, with money-order, savings bank office, parcel-post, and telegraph station, 25 miles from Richmond, 40 miles NE. from Hobart, and 136 SE. from Launceston, in the Prosser's Plains district. It is in the county of Pembroke, electorate of Glamorgan, and municipality of Spring Bay, and is situated at the junction of the Prosser and Brushy Plains river, about 12 miles distant from Prosser Bay. There is coach communication direct to Campania railway station, on T. M. L. Railway. Coach fare, 8s.; railway, 5s. 3d. and 4s. Also with Orford and Spring Bay. It has an Episcopal Church (St. John Baptist), a Gothic building of stone; parsonage, State school, post and telegraph office. Hotel: Buckland. One general store, and some good houses. The district is pastoral and agricultural. Geological formation, sand and ironstone. Coal has been found in the district of good quality. Situated between Buckland and Orford is Paradise, a beautiful and well-known pass. The name well indicates the sublimely charming scenery and surroundings. Population 150, of electoral district about 2,200.

BURGESS (41° 9′ S. lat., 146° 31′ E. long.), a postal station on the west shore of Port Sorell Arm, in the county of Devon, electorate of East Devon, and police district of Port Sorell; twelve miles east of Torquay. The port trade is mainly confined to fruit produce and light timber. The port is said to be the best in North Tasmania, except Port Dalrymple—land-locked, deep, and wide. The arm of the sea which forms it extends inland about 7 miles, and its channels are navigable for small craft nearly the whole distance. Some good fishing may be obtained here, and splendid yachting-ground. Population of district 600.

BURNIE (40° 57′ S. lat., 145° 56′ E. long.), a post, savings bank, and money-order township, telegraph station, parcel-post, and port of entry and clearance, in the county of Wellington (at the extreme NE. point), situated on the shore of Emu Bay, in the electorate of Waratah, and police district of Emu Bay, about 91 miles NW. of Launceston, 37 from Stanley, 48 from Mount Bischoff, and 245 NW. from Hobart. It is the present terminus of Western Railway connecting with Launceston and Hobart on the main line, and also junction for line to Zeehan and West Coast *via* Waratah, 47 miles distant. Communication with Launceston and Melbourne is also by weekly steamers. Wiseman's well-appointed coaches ply twice daily to and from Wynyard. Fares, Wynyard, 3s. Railway to Hobart, first class, £2 10s. 6d. Weekly steam service to Sydney and Melbourne, also to Hobart, Launceston and Strahan. Hotels: T. Wiseman's Bay View, H. Wiseman's Burnie Hotel, and W. Wiseman's; also Surnam's private hotel. There are six places of worship—Anglican (St. George's), Roman Catholic (St. Mary's), Wesleyan, United Free Methodists, Baptist and Gospel Hall, a public school, convent and five private schools, Temperance Hotel, and a Town Hall, fitted with stage accessories, and public library. Banks of Australasia and National, Masonic Lodge, Odd Fellows' Lodge, Rechabite Lodge, Ministering Children's League, and race club. Newspaper: *Emu Bay Times*, published Tuesday, Thursday and Saturday. Quarterly sittings of Supreme Court are held here, with £100 jurisdiction. A proposal is under consideration for supplying acetylene light and waterworks. A breakwater has been constructed. It is proposed to construct an additional wharf with light visible 12 miles. Emu Bay (Burnie) is a safe anchorage with any wind. It is proposed to extend the breakwater, thus making it one of the most useful marine works in the colony, the water gradually deepening from 1½ to 32 feet at low water. Court of Petty Sessions is held here, also General Sessions. Saw-mills, butter, and bacon factories are in full work. Points of interest to tourists, Darling and Sanderson's Guide Falls. Annual ratable value of property £26,500. Capital value of district £545,000. Road Trust valuation, £10,800. Agricultural returns for the Emu Bay district to March 1, 1900, were 190,489 acres worked; wheat, 1,511 acres; barley, 21 acres; oats, 1,205 acres; peas, 511 acres; potatoes, 2,600 acres; gardens and orchards, 183 acres. Produce: wheat, 39,198 bushels; barley, 420 bushels; oats, 36,150 bushels; peas, 8,687 bushels; potatoes, 10,400 tons; apples, 2,511 bushels; pears, 136 bushels; stock: horses, 1,453; cattle, 13,965; sheep, 5,566; pigs, 4,558. Geological formation, basaltic and silurian slate. Water supplied from wells, adjacent creeks and tanks. Population, 1,600; of district 6,900.

CAMPANIA (42° 42′ S. lat. 147° 22′ E. long.), the railway station for Richmond, from which it is 5 miles distant. Fares, 5s. 3d. and 4s. 0d. Hobart is 27¼ miles S. by rail, much less in a direct line. It has a telegraph station, money-order and savings bank office and parcel-post, also an Anglican church, and is in the county of Monmouth and electorate and municipality of Richmond. Coaches leave for Richmond twice daily and for Buckland, Spring Bay, Lisdillon, and Swansea Tuesdays, Thursdays and Saturdays, connecting with the main railway train service. Agricultural and pastoral district. One hotel and a good flour mill. Gold and coal have been found in the vicinity. Cattle and sheep sales are held here monthly.

CAMPBELLTOWN (41° 56′ S. lat., 147° 4′ E. long.), a very pretty township built on the slope of a hill, on the banks of the Elizabeth River, which flows through it, in the county of Somerset, electorate and municipal district of Campbelltown (Macquarie for Legislative Council), distant 91 miles by rail from Hobart north, and 42 miles SE. of Launceston. There is railway communication daily with Avoca, Fingal, St. Mary's, Falmouth, and George's Bay, and the Main Line Railway can be availed of. Fares, 20s. 9d. and 13s. 9d. Launceston, 9s. and 6s. A coach leaves for Swansea and returns twice weekly. Hotel: Dawson's. There are in the town an institute, with reading-room and library of 4,600 volumes; a hospital, and four places of worship—Roman Catholic church, a fine Gothic building; the Church of England (St. Luke's), of brick; St. Andrew's Scottish church and a Wesleyan church in High Street; State school (No. 5). Flower shows are held in connection with the institute. One private school. Town lighted with kerosene. The surrounding country is very fertile, but at present is mainly utilized for sheep-grazing purposes. The greater portion of stud merino sheep are reared in this district, for which the climate, &c., is peculiarly favourable. Considerable fruit and horticultural produce is also grown. The Midland Agricultural Association holds its annual meetings here. The township is head-quarters of E Company Second Battalion Tasmanian Infantry. There is a savings bank, money-order office, parcel-post and telegraph station. Court of Petty Sessions is held regularly, also General Sessions. Water is supplied by a service constructed by private enterprise, giving water to every dwelling at a moderate cost. The scenery of wooded mountains, as viewed from a small island in centre of the dam, can hardly be surpassed. The lake of 1200 acres swarms with wild ducks and swans. There is an extensive quarry of excellent building stone of a dark colour, and which spalls readily to the hammer. Midland Star Lodge, M.U.I.O.O.F. and Future Help Tent I.O.R. Friendly Societies. Mechanics' Institute. Brass band, with 20 members. The rural municipality, proclaimed 6th August, 1866, has an area of 392,600 acres, 150 miles of roads and streets, and property of the yearly ratable value of £22,111; capital value £559,689. Road Trust valuation, £23,246. Agricultural returns to March 1, 1900, were 290,802 acres worked; wheat, 645 acres; oats, 399 acres; potatoes, 24 acres; barley, 64 acres; hay, 790 acres. Produce: wheat, 7,740 bushels; oats, 7,980 bushels; potatoes, 96 tons; barley, 1,296 bushels; mangolds, 1,988 tons. Stock: horses, 421; cattle, 3,630; sheep, 131,707; pigs, 427. Population, 818 (census 1891); of district 2,694; now 2,900.

CARLTON. A post town, with parcels-post, in the county of Pembroke, municipal and electoral district of Sorell; 24 miles from Hobart. Anglican and Congregational churches and State school here.

CARNARVON. The township of Port Arthur, 51 miles from Hobart, mainly composed of buildings formerly the residences of the staff of the penal settlement, now occupied by settlers. The prison buildings are rapidly falling into decay. There is a post, parcel-post, money order and telegraph office here, and a comfortable hotel, which add to the convenience of visitors who make Carnarvon a place of pleasant sojourn in summer. There is a hall for private and public assemblies, a gymnasium and a State school. The wharf permits of good-sized steamers going alongside and landing passengers. It is a favourite place for summer steamboat excursions. The places of note are the penal buildings, the Giant's Blowhole, 300 feet deep, the Caves, Brown's Mount, Terrace Rocks, Point Pier, and the "Isle of the Dead." Courts of general and petty sessions are held here. It is in the county of Pembroke and electorate of Sorell. There is coach communication with Taranna (fare, 2s. 6d.) and bi-weekly steamer from Hobart. Local affairs are administered by a Town Board. The manufacture of pottery has been established on a small scale. Ratable value of property, £2,702; capital value £58,465. Agricultural returns to March 1, 1900, were 7,654 acres worked; wheat, 67 acres; barley, 35 acres; oats, 60 acres; potatoes, 163 acres. Produce: wheat, 938 bushels; barley, 770 bushels; oats, 1,560 bushels; peas, 1,995 bushels; beans, 120 bushels; potatoes, 815 tons; apples, 10,649 bushels. Stock: horses, 216; cattle, 1,914; sheep, 6,314; pigs, 991. Population of township, 170.

CARRICK (41° 31′ S. lat., 147° 2′ E. long.), a post town, with parcel-post, savings bank, money-order office, and telegraph station, in the rural municipality and electorate of Westbury, and county of Westmoreland, situated on the river Liffey, ten miles from Westbury. There is daily coach communication with railway station at Bishopbourne, and also with Launceston, from which it is distant 11 miles SW., and 136 miles N. from Hobart. A coach runs to and from Westbury three times weekly. Two hotels : the Carrick and Prince of Wales. There is an Episcopal church (St. Andrew's), a Wesleyan church and a State school. Water supply from river, lifted by hydraulic ram. The Carrick Racing Club has its headquarters here, and the race course is one of the best in Tasmania. A Road Trust looks after the highways and by-ways here. Agricultural district. Geological formation : bluestone. Population now about 300. Road trust valuation, £4,000.

CASCADE (Tasman Peninsula), post town, 45 miles SE. from Hobart. Steamer runs bi-weekly. Fare, 10s. return. Agricultural district.

CASCADE RIVER (41° 9′ S. lat., 147° 52′ E. long.), a tin-mining centre, in the county of Dorset, Ringarooma electorate and police district, situated on the river whose name it bears, about 50 miles NW. of Launceston, and midway between Branxholm and Moorina. Tin mining is mainly carried on here by Chinese. Population about 150.

CASTRA. Post town, with money-order office, savings bank, and telegraph office ; mtunicipality of Mersey, county of Devon. Anglican and Presbyterian churches and State school. Daily coach communication between Castra Road and Ulverstone.

CAVESIDE, post town, 50 miles W. of Launceston ; nearest railway station Chudleigh, to which conveyance runs twice weekly. Wesleyan church and State school here.

CHUDLEIGH (41° 31′ S. lat., 146° 31′ E. long.), a village, with savings bank, money-order office, parcel-post, telegraph and railway station, with a public school. One hotel, and a Public Hall. It is situated on Lobster Creek, near the Rubicon river, in the county of Westmoreland, municipality and electoral district of Deloraine, 161 miles from Hobart, and 56½ miles SW. of Launceston. Fares, by rail to Launceston, 15s. and 8s. 2d. It has a rich dairy and agricultural country round it, extending far along the valleys of the Mersey and Forth. Fruit is also grown here very successfully. In the vicinity are some extensive caves, with stalactites, which are extremely grand and beautiful. At Bastian Bluff, 10 miles distant, a magnificent view of inland scenery is obtained. Lakes McKenzie, Lacey, Long, Balmoral, and others are within easy distance. the entire district presents charming scenery, and has become a favourite resort of tourists. Good fishing and shooting. There is a good cricket club and also rifle company. The Chudleigh Turf Club holds an annual race meeting. There is a Road Board here. the ratable value of property being £6,700. Churches : Anglican and Wesleyan, also Salvation Army. Geological formation : Chiefly limestone. There is a good recreation ground. Population, town 150 ; district 900.

CIRCULAR HEAD. *See* Stanley.

CLARENCE. *See* Rokeby.

CLEVELAND (41° 47′ S. lat., 147° 30′ E. long.), a small post town, money-order office, parcel-post and telegraph station, in Epping Forest, in the county of Somerset, on the main road, 32 miles SE. of Launceston, 101 miles by rail N. from Hobart, and 10 miles from Campbelltown. The Main Line Railway has a station here ; fares from Launceston, 6s. 9d. and 4s. 6d. ; Hobart, 23s. 3d. and 15s. 6d. It is in the electorate and municipal district of Campbelltown. Principal inn, The Bald-faced Stag. There is an Anglican church, and a State school. The country round is almost exclusively pastoral. Population, 150.

COLEBROOK (formerly Jerusalem) (42° 30′ S. lat., 147° 21′ E. long.), post town, parcel post, money-order, savings bank and telegraph station, about 17 miles from Richmond, 32 miles (39 by rail) N. of Hobart, and 94 miles S. from Launceston. It is a station on the Main Line Railway. Fares, 8s. 3d. and 5s. 9d. Coal seams are worked in the neighbourhood, and the coal is good for domestic purposes. A good deal of agricultural work is done in the surrounding district, and also cattle rearing. The gardens and orchards are a special feature. It is in the county of Monmouth, electorate and municipality of Richmond. It has a public school, and free school in connection with St. Patrick's church, two places of worship, Episcopal and Roman Catholic, and one inn. The Church of England (St. James) is a substantial freestone structure. The Roman Catholic church (St. Patrick's) is admittedly the most prominent and beautiful building in the town. Court of Requests held four times yearly. There is a Road Trust and Race Club. Good hunting and shooting. Coal found in many parts of the district. Population (census 1891), 189 ; now 300. Road Trust valuation £3,500.

CONARA (formerly known as the Corners) (41° 51′ S. lat., 147° 22′ E. long.), a post town, telegraph parcel-post, and railway station, 98 miles N. of Hobart, 35 miles from Launceston, Campbelltown municipality and electorate, and county of Buckingham. Anglican church. State school. One hotel, The Railway, and the place is of some importance as the junction of the T.M.L. Railway and Fingal line. Trains leave here for St. Mary's at 4.30 p.m on Monday, Wednesday and Friday, and at 1.0 p.m. on Tuesday, Thursday and Saturday. Fare, from Hobart, 22s. 6d. and 15s. From Launceston, 7s. 6d. and 5s. ; additional trains to Fingal on Wednesday and Friday.

CONSTITUTION HILL, post town, parcel-post, and telegraph station, county of Monmouth, municipality of Green Ponds, electoral district of Brighton ; 27 miles from Hobart and 10 from Brighton. Rail, 3s. and 2s. 3d. : coach, 2s. 6d. Anglican and Baptist churches here. Agricultural and pastoral district.

COPPINGTON, post, parcel-post, savings-bank, and telephone office ; 30 miles from Hobart and 14 from Sorell, county of Pembroke. Coach tri-weekly to and from Sorell, thence by train to Hobart. Conveyances also connect with Bream Creek, Kelleire, and Dunelley. State school, Anglican church (St. Paul's), Sunday-school, and Nonconformist place of worship, one hotel—the Coppington. Centre of flourishing agricultural and pastoral district. Population of district, 500. This is the principal centre of population in the Bream Creek district. Good fishing and shooting.

CORINNA (41° 40′ S. lat., 144° 58′ E. long.), on the west coast, about 12 miles from entrance of Corinna River. Official name Royerine. In the vicinity many tin and gold mines are being successfully worked. Copper wolfram and iridium are also found. It is in the county of Russell, police district of Macquarie, and electorate of Wellington, and has a post and telegraph office, also money-order office and savings-bank. State school One hotel. The township is NW. from Hobart, and distant, overland, about 220 miles, and about 240 by water. Nearest railway-station Zeehan, reached by horse track. The scenery around Corinna is wildly magnificent. Lovers' Creek Falls and Pieman Heads are points of interest. The river itself has a bad entrance, but inside widens out to a breadth of about 300 yards in some places, and navigation is easy for 23 miles from entrance. The river forms the division between the counties of Russell and Montagu. Population of town about 120, and district about 200.

CORNERS. *See* Conara

CRANBROOK (42° 3′ S. lat., 148° 7′ E. long.), a post town with parcel-post, money-order and savings bank office, and telephone station, is in the county, electorate, and municipality of Glamorgan, on Swan River, 100 miles NE. of Hobart, and 76 miles SE. from Launceston, lying in the midst of hilly country adapted for farming and grazing. Swansea, the nearest town, is 10 miles S. Coach runs to Campbell Town station and also to Campania, and mail tri-weekly to Hobart. Nearest railway-station Avoca, reached by road. The township is on the west shore of Oyster Bay, having a beautiful view of the Schouten Hills. There is a State school and Anglican, Roman Catholic, and Presbyterian church (Gala Kirk). There are two hotels, a Social club, and public library. Pastoral and agricultural district. Rich valleys and well grassed, hilly country. Good swan, duck, and kangaroo shooting in vicinity, also excellent fishing and picturesque scenery. The beach abounds with rare shells and seaweeds. Population 160 ; of district, 1,000.

CRESSY (41° 42′ S. lat., 147° 5′ E. long.), in the county of Westmoreland, electorate of Cressy, municipality and police district of Longford, is a village in the agricultural district of the same name, situated near the Lake River, about 7 miles SW. of Longford, the nearest railway station, and 21 miles S. of Launceston. A coach meets the morning and evening trains at Longford, connecting there with trains for Hobart and Launceston, and there is also a tri-weekly coach to Ross. Fare to Longford, 7 miles, 1s. 6d. There is a bi-weekly mail conveyance to Blackwood, carrying tourists 12 miles towards the Great Lake. It has a post and money-order office, parcel-post, telephone station, public and private school, and a Rechabite Tent, inns—Cressy and Ringwood—places of worship belonging to the Wesleyans and Episcopalians, a Good Templars' Hall, and a large Public Hall. The district is noted for its stud sheep stations. In the hunting season it is a famous meeting place for the hounds. There is good trout and blackfish fishing. The town is a convenient starting place for the western tiers and the great lakes, towards which there is much tourist traffic in the summer. It is supplied with water from the Lake River, under management of a Water Trust. Capital value of property, South Longford district, £146,116 ; ratable value, £6,904. Population (census 1891) of town, 229 ; of district, 2,303 ; 30th June, 1899, 2,550.

CULLENSWOOD, a post town with parcel post, in the county of Cornwall, electorate and police district of Fingal, a station on the Fingal branch railway, 44 miles from the Conara, on the main line, and 3 miles from St. Mary's, the terminus. Anglican church (Christ's Church) and Sunday School. Agricultural district.

DARLINGTON. *See* Maria Island.

DARWIN, a postal town in Macquarie district, electorate of Montagu. West coast. Daily mail service to Pillinger, thence to Sheehan. Mining centre. Population about 100.

DEDDINGTON, a postal town, 12 miles from Evandale. Presbyterian church and State school. Hotel : The Deddington. It is the centre of a gradually extending agricultural district.

DEEBRIDGE, post town and telegraph station, municipality of Hamilton, electoral district and county of Cumberland, 76 miles from Hobart ; 46 miles from Macquarie railway station. Coach connection, and also with Lakes. Two good boarding-houses. Excellent trout fishing. Pastoral district.

DELORAINE (41° 31′ S. lat., 146° 43′ E. long.), a town situated on both sides of the Meander, in the counties of Westmoreland and Devon, electorate of Meander for Legislative Council and electorate of Doleraine for Assembly and municipality of Deloraine, 156 miles NW. of Hobart, and 30 miles from Launceston, SW. (45 miles by rail). It has a money-order office, savings bank, parcel-post, and telegraph station, with telegraphic connection with Chudleigh, 10 miles, and Elizabeth Town, 8 miles distant. The Launceston and Western Railway has a station at Deloraine, placing the town

and the northern capital within easy access of each other; fares, 7s. and 5s. 6d. The line extends also to Ulverstone, and there is a branch line to Chudleigh and Mole Creek. There are five hotels, Railway, British, Deloraine, Plough and Bush. The town contains public and a convent schools, a public library with 2,000 volumes, branches of the Commercial Bank and Bank of Australasia, and places of worship, occupied respectively by the Episcopalians (St. Mark's), Roman Catholics (Holy Redeemer) Presbyterians, Baptists, and Wesleyans, and Salvation Army. A town hall and Oddfellows' hall. Quarterly General Sessions and Supreme Court sittings, monthly Courts of Requests and Petty Sessions are held here. Oddfellows (M.U.), and Masonic Lodges and Rechabite Tent. The Council Chamber, Town Hall, and Masonic Hall are the principal public buildings. The Turf Club has one meeting on Easter Monday on Recreation Ground, and the Avenue Club also a meeting in December at "The Avenue," the most beautiful natural racecourse in the Colonies. The surrounding country is fertile and well-watered, and suitable alike for grazing and agricultural purposes. A large area of land is under tillage for grain and root crops, and also for orchards. The soil is principally basaltic and limestone. Slate and silurian rocks crop out in the district. The rural municipality (proclaimed November 3rd,1863) has an area of 376,000 acres, annual value of ratable property being £37,000. Capital value of district £758,800. Road Trust, £16,750. Agricultural returns to March 1, 1900, were 149,612 acres worked; wheat, 4,894 acres; barley, 279 acres; oats, 6,773 acres; peas, 2,533 acres; potatoes, 2,188 acres; turnips, 843 acres; gardens and orchards, 252 acres. Produce: wheat, 88,092 bushels; barley, 5,322 bushels; oats, 162,552 bushels; peas, 50,650 bushels; potatoes, 6,564 tons; turnips, 8,430 tons; apples, 2,511 bushels; pears, 136 bushels. Stock: horses, 2,120; cattle, 9,690; sheep, 38,518; pigs, 7,117. Population (census 1891), 895; of electoral district, 4,913; 30th June, 1900, estimated at 5,700.

DERBY, a mining township, county of Dorset; municipal and electoral district of Ringarooma; 21 miles from Scottsdale, and 201 miles from Hobart, on Ringarooma river. Post-office, money-order, parcel-post, savings bank, and electric telegraph office. It has a board of health and State school; Court-house, Anglican, Roman Catholic and Wesleyan churches; branch of National bank of Tasmania; two hotels, and Rechabite lodge. Coaches run daily to and from Scottsdale, St. Helens, *via* Moorina and Weldborough, connecting with train at Scottsdale (21 miles) and St. Mary's, for Launceston and Hobart and intermediate stations. There is some good agricultural land here, but it is principally a mining district. Chief mines: Briscis, No. 1 Brothers Home, and Ringarooma Tin Mines. Water supply from wells, often indifferent. Geological formation: basaltic, with granite, slate, and sandstone in places. Population (census 1891) 273; June, 1899, 450; of district 3,000.

DETENTION RIVER, post town and telegraph station, with parcels post, 63 miles from Devonport, municipality of Russell, county of Devon. Coach communication daily. Agricultural district.

DEVONPORT East and West, formerly known as Formby and Torquay (41° 9′ S. lat., 146° 22′ E. long.), a post town, with parcel-post, savings bank, telegraph and money-order office, near the mouth of the river Mersey, in the county of Devon, electorate of Devonport, and police district of Port Sorell, 82 miles NW. from Launceston, and 192 from Hobart. It has Town Board powers. It is situated on both sides of river Mersey, with ferry communication, fares 1d. each way. Two trains daily run through from Emu Bay to Launceston; fares, 16s. 3d. and 11s. 8d.; Hobart, fare, 44s. 6d. and 39s. 6d. Masonic, Protestant A.N.A. Alliance, M. Unity, and Rechabites have lodges here. The post and telegraph office at West Devonport is a handsome building. The Union Company's steamers run weekly between here and Melbourne, and one fortnightly to Sydney. Also connected regularly with Shehan, West Coast, and Launceston. J. Paterson & Co.'s steamers trade weekly to Sydney in the produce season. The White Star line makes bi-weekly trips between Devonport, Launceston and north-west ports. Huddart Parker's and other intercolonial steamers frequently make trips for cargo. The P. and O. Company have an agency here. The bar entrance to the river has been deepened to 16 feet at low water with a rise of 10 feet to high. The Mersey Marine Board, which embraces Mersey, Don, and Burgess, is doing very good work in improving shipping accommodation, and the port ranks as third in Tasmania. Town Board valuation, £12,633. Ratable value of district £54,650. Capital value of Mersey district £1,200,000. Railway communication has greatly increased the value of all land in and around the township. Banks: Australasia, Commercial and National. Hotels: Sea View, Kimberleys Palace and Formby in West Devonport, and Victoria and Mersey in East Devonport; also coffee palace, two State schools, convent, private and other schools. Churches: Episcopalian, Roman Catholic, Wesleyan, Baptists, Salvation Army. East and West Devonport are supplied with water from the River Forth, 8½ miles distant. The supply is abundant, and the force sufficient to extinguish a fire at the highest buildings. There are good public baths, recreation grounds and cycling track, cricket, football, and golf clubs. Mersey regatta has been held continuously on New Year's Day for forty years, and the salubrious climate and attractive scenery makes it a favourite resort for tourists. A road to Spreyton furnishes a charming river bank promenade. Road through Wesley Vale, Northdown, and Newground into East Devonport, and from East Devonport to Latrobe offer pleasant suburban drives. Pardoe beach, Mersey Bluff and lighthouse are favourite resorts. The soil is clayey, and coal, limestone, and freestone are found in the neighbourhood. Orcharding is general on the farms between East Devonport and Latrobe. Population: West and East Devonport, 2,700; of district 11,400. Newspapers: Tri-weekly, *North West Post*; daily, *North Western Advocate*.

DILSTON, post town, county of Dorset, municipal and electoral district of Selby; 9 miles NE. from Launceston. Coach fare, 2s. 6d. Anglican church here. Agricultural district.

DON (41° 9′ S. lat., 146° 17′ E long.), a township situated near the mouth of the river Don, on the NW coast, two miles W. of Devonport on the Deloraine and Mersey Railway, Lillico siding being the nearest stopping place. In the county of Devon, electorate of West Devon, and Port Sorell police district (Devonport), 187 miles from Hobart. There are three places of worship (Church of England, Presbyterian and Congregational), a mechanics' institute and library of 800 volumes (with good public room), post, parcel-post, money-order, savings bank, and telegraph office, public school and private school; also Oddfellows' lodge. Places of interest: sea beaches and Blow-hole. Mail cart once daily to and from Devonport, fare, 1s. 6d. Only one hotel: The Don. Several stores. The district is a farming one, having rich soil. The harbour, which has no bar, admits vessels drawing 11 feet 4 inches, and is protected by a breakwater, and can be entered except during heavy NW. gales. The ratable value of property for Road Trust is £4,450. Population of town 250, of district 400.

DOVER. *See* PORT ESPERANCE.

DROMEDARY, post town, with parcel-post and telegraph, county of Monmouth, municipal and electoral district of Brighton. Railway station on Derwent valley line. State school. Agricultural district.

DUCK RIVER (or SMITHTON), post town and telegraph station, county and electoral district of Wellington, Russell municipality; 13 miles W. of Stanley (Circular Head). Bi-weekly mail service to and from Stanley. Timber and produce shipped hence. Port capable of easy improvement. Anglican Church here and State school. Population about 250.

DULVERTON, post town, with parcel post, telegraph and railway siding on the North-West line. Situated in the county of Devon, electorate of East Devon and police district of Port Sorell; distant about 4½ miles from Latrobe, and 3½ from Railton; 70 miles NW. from Launceston. There is a Wesleyan Chapel, and small social hall. Coal mining and farming district; especially noted for potato crops. A saw-mill finds full work here. Daily mail communication with Latrobe. Population, about 150.

DUNALLY, post town, parcel post, and telegraph station, county of Pembroke; municipality and electoral district of Sorell, bounded by Blackman's Bay to the east, and Norfolk Bay to the south. It is 20 miles from Sorell railway station. Thirty-four miles from Hobart. Mail cart and steamer each bi-weekly. Fare, 8s. return. Good fishing grounds, also shooting. The famed Eagle Hawk Neck, tesselated pavement, Tasman's Arch, Blowhole, Roaring Beach, Mt. Forestier, &c., all places of interest to tourists, are within one day's trip, and easy means of access are provided. Agricultural district. State school. Hotel: The Dunally. Population of township about 120; of district, 550.

DUNDAS (42° lat. S. 145° long E.), post town and telegraph station, with parcel post. Montagu county, electoral district of Montagu, north-west from Hobart, 244 miles. Terminus of Zeehan and Dundas and Emu Bay railways, which connect with Zeehan and Strahan. Several stores are here. One hotel: the Dundas. Church: Wesleyan. State school, Lodge of I.O O.F. The district abounds in silver, lead, and other metals. Montagu Road Trust controls local affairs. A railway line connects with Zeehan, and similar lines to other localities are likely to be constructed. Population, July, 1898, including North East Dundas, Mount Reid, Ringville, Rosebery, and Deep Seed, 1,500. Dundas proper about 200. The district abounds in wild and picturesque scenery. The mines, fast developing, attract many visitors, particularly on account of the variety of beautiful minerals produced.

DUNORLAN. *See* CHUDLEIGH.

ELDERSLIE (42° 36′ S. lat., 147° 5′ E. long.), a small town situated in the county of Monmouth, electoral and police district of Brighton, about 15 miles from Pontville, NW., through which place it has coach and rail communication with the capital. There is also a bi-weekly carrier. Has post office, parcel post, telephone and money-order office (Upper Broadmarsh). It lies about 30 miles NW. of Hobart, on the river Jordan, and has Episcopal place of worship (St. Augustine's), public school, money-order, telegraph, and savings bank office. Population about 100.

ELIZABETH TOWN (41° 22′ S. lat., 146° 37′ E. long.), a post town, with parcel post and telephone station, in the County of Devon, electorate and municipality of Deloraine, about 7 miles NW. from Deloraine, and 35½ from Launceston (50 miles by rail), on the Rubicon river. Nearest station, Whitefoord Hills, 2½ miles west of village. Anglican church here. One hotel, the Saddlers' Arms.

ELLENDALE, post town, money order, savings bank and telephone office, county of Buckingham, municipality of Hamilton; electoral district of Cumberland; distant 46 miles from Hobart and 13 from Glenora station on Derwent Valley railway. Daily coach fare, 2s. 6d. Anglican and R. C. Church and State School. Agricultural and hop-growing district.

ELLESMERE. *See* SCOTTSDALE.

EMU BAY (41° 4′ S lat., 145° 56′ E. long.). The township is situated upon the shore of a beautiful Bay, "suggestive of that of Naples." *See* BURNIE.

EPPING FOREST. Post, parcel post and telegraph office here, county of Somerset; municipality and electoral district of Campbelltown. Station on main line railway, 28 miles from Launceston (fare 5s. 9d.), 105 from Hobart (fare 24s., 16s.) Presbyterian church and State school here. One hotel. Agricultural district.

EVANDALE (41° 5′ S. lat., 147° 16′ E. long.), a township, 13 miles from Launceston SE., 120 miles N. of Hobart, situated on the South Esk river. It has a money-order, savings bank, parcel post and telegraph office, telegraph station, and two railway stations, and is in the county of Cornwall and electorate of Evandale. The Launceston and Western Railway and Main Line Railway place it in easy communication with Launceston, Hobart, and North-West Coast towns; fares to Launceston, 2s. 2d. and 1s. 8d. A coach also runs three times a week from Lymington. Evandale Junction station, for the two lines, is some little distance from the town. A conveyance meets every train; fare, 3d. Hotels: Prince of Wales and Clarendon. A remarkable group of rocks near here, known as Rose's Rocks, attract many strangers. There is a public library here, containing 3,275 volumes; also a public school. Places of interest to tourists: Logan Falls, 5 miles from township, and Cora Linn, 6 miles distant. The places of worship are St. Andrew's, Episcopalian, St. Andrew's, Presbyterian, a Roman Catholic church, and Wesleyan church, also a Mission room. There is an Oddfellows' Lodge and Working Men's Club. It is a place of Petty and Monthly Sessions. Geological formation, tertiary and post tertiary, sands, gravels, and lacustrine deposits, with basalt, probably of the Miocene age. Water is laid on to every house from the river. The rural municipality (proclaimed October 9, 1865) has an area of 255,000 acres, annual value of ratable property being £27,000. Capital value of district £590,776. Road Trust valuation, £20,950. Wheat is largely grown in the district. Agricultural returns to March 1, 1900, were 177,901 acres worked; wheat, 4,652 acres; barley, 1,795 acres; oats, 1,514 acres; potatoes, 81 acres; turnips, 93 acres; gardens and orchards, 106 acres. Produce: wheat, 83,736 bushels; barley, 37,695 bushels; oats, 42,392 bushels; potatoes, 380 tons; mangolds, 1,342 tons. Stock: horses, 914; cattle, 4,157; sheep, 107,790; pigs, 1,792. Population (census 1891), 540; of electoral district, 3,262; 30th June, 1900, about 3,500.

EXETER, post town, county of Devon, municipality and electoral district of George Town; 16 miles from Launceston. Coach fare, 3s. Wesleyan church here.

EXTON (41° 31′ S. lat., 146° 45′ E. long.), a small postal township, with savings bank, money-order office, parcel post, and railway and telegraph station, on the Launceston and Western line, in the county of Westmoreland, distant about 4 miles from Westbury (same electorate), 152 miles NW. of Hobart, and 42 miles W. from Launceston (by rail). Fares, 6s. 6d. and 5s. 3d. State school here, Wesleyan church, and two inns; principal, The Marsh. Farming district. Road Trust ratable property, £7,637. The population is about 260. Settlement here is steadily progressing.

FALMOUTH (41° 30′ S. lat., 148° 15′ E. long.), a post town and telegraph station on the east coast, near St. Patrick's Head, in the county of Cornwall, and electorate and municipality of Fingal, 22 miles NE. from Fingal, 88 miles E. from Launceston, and 144 miles from Hobart. A coach plies to St. Mary's on the Fingal line, which junctions with the main line at Conara, the coach passing daily within two miles of Falmouth. There is no hotel here, but a comfortable boarding-house. There is a State school here, in which Anglican and Wesleyan services are held. The district is agricultural, pastoral, and dairying. Good fishing, shooting, and bathing. A pleasant place of resort at all seasons. Population of town, about 150; of electoral district, 3,400.

FENTONBURY, post town, with money-order and telegraph office, county of Buckingham, municipality of Hamilton; electoral district of Cumberland; 46 miles N. from Hobart and 8 miles from Glenora station, Derwent Valley Railway. State school. Rail fare, 4s. 3d., 3s. 6d.; coach, 1s 9d.; return, 3s.

FINGAL (41° 37′ S. lat., 148° 0′ E. long.), a municipality, with savings bank, money-order office, parcel post, railway and telegraph station, in the county of Cornwall, electoral district of Fingal and South Esk (Legislative Council), 120 miles NE. of Hobart, 70 miles SE. from Launceston, situated on the South Esk river, whence its supply of water is obtained. Hotels: Talbot Arms and Tasmanian. Branch of the Bank of Australasia, Roman Catholic (St. Joseph's), Episcopal, Presbyterian, and Wesleyan places of worship, Council buildings and gaol. State school and three private schools. Masonic Lodge and Oddfellows' Lodge. The railway extends to St. Mary's, and connects with main line at Conara. There is coach communication daily with George's Bay, Mathinna, Mangana and St. Helen's. In this district are the Mangana, Mathinna and Scamander gold-fields, where quartz mining is being steadily developed. Silver mining at the Scamander river has revealed silver deposits in dykes of porphyry and in metamorphic schists. At Mount Malcolm, within 3 miles of Fingal, exists a large seam of coal, 8 and 12ft. in thickness. There are several other large seams at Mount Nicholas (8 miles from Fingal, and 4 from St Mary's); these seams are 8ft. and 14½ft. in thickness; and the Cornwall Company work various seams of different thickness; as also Durham Company and Cardiff mine. The quality of the coal is good both for domestic and steam purposes, and the Mt. Nicholas and Cornwall mines are being systematically worked, giving a steady weekly output. It is believed that these are the largest known coal fields out of Newcastle (N.S.W.). The coal is used on the Tasmanian railways, and for domestic purposes has almost superseded Newcastle, being more clean and giving abundant caloric. St. Mary's Pass, about 17 miles from Fingal, is a deep gorge several miles long, the slopes being covered with graceful foliage. The rural municipality (proclaimed Jan. 5, 1863) has an area of 657,000 acres, and ratable property of the annual value of £28,924. Capital value of district, £506,900. Road Trust valuation, £9,500. Courts of Supreme, General, and Petty Sessions are held here. Water supply from the South Esk river. Agricultural returns to March 1, 1900, were 240,776 acres worked: wheat, 1,888 acres; barley, 74 acres; oats, 827 acres; potatoes, 81 acres; gardens and orchards, 106 acres. Produce: wheat, 32,096 bushels; barley, 1,332 bushels; oats, 19,021 bushels; potatoes, 354 tons; apples, 1,124 bushels. Stock: horses, 978; cattle, 7,580; sheep, 92,809; pigs, 2,344. Population (census 1891), town, 450; municipality, 3,416; electoral district, 5,003; 30th June, 1900, 5,500.

FORCETT (42° 48′ S. lat., 147° 37′ E. long.), a post township, with parcel post, money-order office, savings bank, and telegraph station, in the county of Pembroke, police and electoral district of Sorell, situated on the Forcett Creek. It is 22 miles distant NE. from Hobart, and communication is by railway, *viâ* Sorell. Race Club holds annual meet. There is an hotel, The Albert, also a public school; the latter is used for devotional purposes on Sundays.

FOREST, post town with money order, savings bank, and telegraph office, county and electoral district of Wellington, municipality of Russell; 145 miles from Launceston and 3 miles from Stanley. State school and Presbyterian church. Agricultural district.

FORMBY. *See* DEVONPORT.

FRANKFORD, post town, with parcel post, money-order, savings bank and telegraph office, county of Devon; municipality and electoral district of Westbury. Road Trust valuation, £1,050. Situated 18 miles from Westbury station. State school. Agricultural district. Population of electoral district, 4,600.

FRANKLIN (43° 3′ S. lat., 147° 18′ E. long.), a township, with post, parcel post, telegraph, savings bank and money-order office, in the county of Kent, and electoral and police district of Franklin, 28 miles SW. of Hobart, and 163 miles from Launceston, on the west bank of the river Huon. Communication with Hobart is by two daily coaches, also by steamer. The coaches also serve Geeveston and Huonville, fares, Hobart to Geeveston, 7s., return, 10s.; Franklin, 6s., return, 10s.; Hounville, 5s., return, 8s. Hotels: Franklin and Lady Franklin. There is also a post office at North Franklin. The town contains Episcopal, Wesleyan, Roman Catholic, and Congregational places of worship, a court-house, gaol, public school, a mechanics' institute, with a library of 1,600 volumes, Lodge of Oddfellows. Also jam manufactory. Courts of Requests and Petty Sessions are held here, also Quarterly Sessions. Opposite the township is Egg Island, through which a canal has been cut, navigable for small craft. Twenty-four small vessels, including steamers, trade between the Huon district and Hobart. Franklin, as a place of summer resort for tourists and anglers, has many attractions. The surrounding country is thickly timbered, giving employment to several saw-mills. It produces heavy root crops, and much fruit is also grown—apples, pears, and jam fruits. The formation is basaltic. Coal has also been found and worked, the quality being good for domestic purposes. The town is named after Sir John Franklin. The river here is unsurpassed for salmon and trout fishing, and the scenery, both mountain and river, is very beautiful. Ratable value of property, £35,530. Capital value of district, £439,195. Total land worked, March 1, 1900, 46,062 acres: wheat, 140 acres; oats, 88 acres; potatoes, 575 acres; hay, 586 acres; gardens and orchards, 3,731 acres. Produce: wheat, 3,504 bushels; oats, 2,288 bushels; peas, 2,448 bushels; potatoes, 2,587 tons; apples, 330,511 bushels; pears, 14,366 bushels. Stock: horses, 1,042; cattle, 6,376; sheep, 4,180; and pigs, 2,749. Population, 1,000; of district (census 1891), 3,704; 30th June, 1900, 5,400.

GARDEN ISLAND CREEK, post town and telegraph office, county of Buckingham, municipality and electoral district of Kingborough, 40 miles from Hobart. State school. Bi-weekly steamer; fare, 5s.; return, 7s. 6d. Timber and fruit producing district.

GEEVESTON (43° 9′ S. lat., 146° 58′ E. long.), a post town, with parcel post, money-order office, savings bank, and telegraph station, in the county of Kent and police district and electorate of Franklin, situated on the Kermandie River, 37 miles SW. from Hobart and 9 miles from Franklin. It is connected with the capital by a good macadamised road. Daily coaches run to and from Hobart; fare, 7s., return 10s. A mail cart runs thrice weekly to Port Esperance, fare 4s. In addition a steamer runs twice weekly to Hobart from Shipwrights point, 3 miles from Geeveston, over which a free conveyance runs. Steamer fare, 6s.; return, 8s. Sittings of the Court of Requests are held here. It has a public school, a town hall, the property of a company, post and telegraph office, and a good temperance hotel. A Foresters' court flourishes here. There is an Anglican and a Congregational church. About 1¼ mile distant on the road to Shipwrights is a Roman Catholic chapel. The place takes its name from Mr. William Geeves, who with his family settled here in 1850. Farming and fruit growing district. Much timber is sawn and exported. There are two steam sawmills, and several miles of substantial tramways. Agricultural and pastoral occupations are followed. Geological formation, mixed basaltic and sandstone, with coal shale near Tongataboo, 3 miles S. of Geeveston. Population of town, 600; of district, 3,600. Geeveston is the starting point for tourists

visiting the famed Hartz Mountains, Lakes, and Falls, twelve miles distant.

GEORGE BAY. *See* St. Helen's.

GEORGE RIVER, post town and telegraph station, Pyengana, county of Cornwall, municipality of Portland, electoral district of Fingal; 120 miles from Launceston and 40 miles from St. Mary's railway station, Fingal line. Anglican church. One boarding-house and a State school. Agricultural and fruit growing district. A butter factory is worked by local farmers. The St. Columba Water Falls, about 5 miles from the settlement, is an attractive resort for tourists. These can also be reached by a track from Mathinna distance 12 miles. Good trout fishing. Ratable value of Portland district, £6,7?6; capital value, £65,618.

GEORGETOWN (Port Dalrymple, 41° 30′ S. lat., 147° 14 E. long.), a watering place at the mouth of the river Tamar, on the east bank, in the county of Dorset, electorate and police district of Georgetown, about 160 miles NW. of Hobart, 37 NW. of Launceston, and 10 miles from Beaconsfield. Steamers run regularly to and from Launceston; fare, 4s. Hotels: Petric's and Weight's. It is a post town, and has parcel post, money-order office, savings bank and telegraph station. It is the cable station for the Australian service. There is a public library, containing 1,200 volumes, two places of worship (Episcopal), St. Mary's and Primitive Methodist, one State school, and a private school. A Road Trust and Fruit District Board are established here. It is a place of petty and general sessions. Gold has been found in the district, principally in quartz. Iron ore, too, has been found in large quantities at no great distance. Coal has been prospected for between George Town and Lefroy, but with no tangible results. Chiefly an agricultural district. Good bathing, boating and fishing. Nearest towns are Exeter, 20 miles, Ilfracombe, 6 miles, Sidmouth, 13 miles, York Town, 6 miles, Leonardsburg, 6 miles, and Lefroy, 10 miles. Ratable value of property, £17,250. Capital value of district, £148,000. Road Trust valuation, £5,500. Agricultural returns to March 1st, 1900, were 82,372 acres worked: wheat, 180 acres; peas, 244 acres; oats, 316 acres; potatoes, 178 acres; gardens and orchards, 137 acres. Produce: wheat, 3,420 bushels; peas 2,400 bushels; oats, 7,900 bushels; potatoes, 534 tons; apples, 786 bushels; pears, 73 bushels. Stock: horses, 615; cattle, 2,144; sheep, 21,833; pigs, 1,249. Population of electoral district, 3,667; June, 1900, 4,050.

GLADSTONE (Mount Cameron), (40° 59′ S. lat., 147° 59′ E. long.), a tin mining township, proclaimed in April, 1881 about 85 miles NE. from Launceston, 223 from Hobart, and 43 from Ellesmere (Scottsdale) railway station. This is a purely tin-mining district. The town contains several substantial and commodious buildings, the town hall and Court House being prominent. One Catholic chapel. Other denominations hold services in the town hall. It is in the county of Dorset, electorate and police district of Ringarooma, and has a post-office, parcels post, money-order, telegraph, and savings bank office, State school and one private school, also a Medical League. Communication with Launceston and Hobart is by coach to Scottsdale, thence by train; fare 15s. Mail coach daily to and from Moorina; fare, 7s. 6d. One hotel, the Gladstone. There are two stores. The country in immediate vicinity is almost entirely mineral, but there are sheep runs in vicinity of Boobyalla, and good agricultural land towards Ringarooma. Eddystone lighthouse is distant 18 miles. Game is abundant in the lagoons. Geological formation: granite. Country stanniferous, with traces of gold. Population (census 1891), of town, 193; of district, 4,814; 30th June, 1900, town, 120; district 1,200.

GLEBE TOWN, a suburb of Hobart, adjacent to Queen's Domain. It is managed by a Road Trust and Town Board, and consists of Glebe lands given by Government to Churches of England, Scotland, and Rome. Annual value of property, £4,000. On the English and Scotch Glebes, tastefully built dwellings are erected on land leased for ninety-nine years. The Trustees of the Road and Town Board have succeeded in making this a pleasant place of residence. The streets are lighted with gas. A Presbyterian College has been erected here, and the Roman Catholic body have laid out their glebe in building sections, reserving a site for a church of their own denomination. Building thereon is gradually extending. Present tramway terminus at junction of Liverpool and Park Streets. Population (census, 1891), 643, now 97.

GLENFERN, post town, 25 miles from Hobart, *viâ* New Norfolk (by coach) bi-weekly. Agricultural district.

GLENGARRY, post town, with telegraph, 5 miles from Beaconsfield. State school and Presbyterian church. Agricultural district.

GLENLUSK, post town and money-order office, 10 miles from Hobart and 3 from Berridale station, main line railway. Agricultural district.

GLENORA, postal town, with parcel post, money-order office, savings bank, and electric telegraph; in rural municipality of New Norfolk and county of Buckingham. It is the present terminus of the Derwent Valley Railway, 40 miles from Hobart; fares, 7s. 6d. and 5s. 8d. The proposed Great Western Railway will junction here. Has State school, public library, many private dwellings, and a temperance hotel. In the vicinity are the Russell Falls, within easy access, forming one of the grandest scenes in Tasmania. Agriculture is steadily extending in this district. Coal, silver lodes and lithographic stones have been found in the neighbourhood.

GLENORCHY (42° 49′ S. lat., 147° 16′ E. long.), a railway station, with post office, parcel post, savings bank, and money-order office, also telegraph station at South Glenorchy, now named Moonah, in the electorate and police district of the same name, and county of Buckingham, 5 miles from Hobart NW., on the left bank of the river Derwent. There are omnibuses and cars plying throughout the day to the terminus of the Hobart tramway service at Newtown. Hotels: Club, and Race-course. The Protestant Alliance Hall is a commodious building. The town, or rather village, has been described as "thoroughly English-looking," with its surroundings of farms and homesteads. It contains English (St. Paul's), Presbyterian (St. Matthew's, restored in 1885), Roman Catholic and Wesleyan places of worship, and a public school with 275 scholars. New municipal chambers, post and telegraph offices have recently been erected. Grain, hops, and fruit are principally grown. There are also some small manufactories. The village was formerly known as "O'Brien's Bridge," and the railway station on the main line is now called Moonah. The rural municipality (proclaimed October 4, 1864) has an area of 24,000 acres, annual value of ratable property being £12,400. Capital value of district £296,670. Road Trust valuation, £5,000. Courts of General and Petty Sessions are held here. The Metropolitan racecourse known as Elwick is here. It is picturesquely placed on the banks of the Derwent, and has a spacious grand stand of brick. The course has good railway connection with Hobart. Bismarck a thriving German settlement, is 7 miles from Glenorchy, on Sorell Creek. Agricultural returns to March 1, 1900, were 16,007 acres worked: wheat, 244 acres; barley, 115 acres; oats, 138 acres; potatoes, 185 acres; gardens and orchards, 891 acres; hops, 955 acres. Produce: wheat, 4,880 bushels; barley, 2,070 bushels; oats, 4,470 bushels; peas, 3,381 bushels; potatoes, 551 tons; hops, 22,192 lbs.; apples, 42,606 bushels; pears, 2,124 bushels. Stock: horses, 368; cattle, 804; sheep, 1,212; pigs, 723. Population of municipality, 640; district (census 1891), 5,502 (30th June, 1900, 6,450).

GLENORE (41° 33′ S. lat., 146° 58′ E. long.), a post town, with parcel post, about 149 miles from Hobart and 28½ miles SW. from Launceston, situated in the municipality and electorate of Westbury, and the county of Westmoreland. It is a station on the Launceston and Western Railway; fares, 4s. 3d. and 3s. 6d., and has a public school, and a Wesleyan chapel. Agricultural settlement is extending here.

GOLCONDA, post town and railway station, with parcel-post, money-order office, and telegraph, county of Dorset, 32 miles NE. from Launceston, on Scottsdale line. State school. Fares, 8s. 6d. and 5s. 8d. Mining township.

GOLDEN VALLEY, post town, county of Westmoreland, 57 miles from Launceston and 9 from Deloraine railway station. Agricultural district.

GORDON. *See* Three Hut Point.

GORMANSTON, post town, with parcel post and telegraph office, county of Montagu, Town Board and Board of Health, 27 miles from Strahan. From Queenstown Strahan is reached by train or steam launch. Thence steamers trade to Hobart, north west ports, and Launceston. It is the terminal point of the North Lyell railway, and a mining centre of much importance. Ore from Mount Lyell mine is sent by hauling line and aerial railway to smelters at Queenstown. Six hotels, several stores, and police quarters. Bank: National of Tasmania. Anglican, Roman Catholic, and Wesleyan churches. State school, A.M.A. hall, Oddfellows' societies, M.U. and I.O.O.F. Geological formation: conglomerate schist. Places of interest: Mount Lyell and Mount Owen Mines. Present population, town and district, about 4,000.

GOSHEN, post town, county of Cornwall, 82 miles from Launceston and 33 miles from St. Mary's station, Fingal line. Agricultural district.

GOULD COUNTRY (Kunarra) (41° 15′ S. lat, 148° 12′ E. long.), a post town having a telegraph station and a money-order, savings bank office, and parcel post, in the county of Dorset, police district of Portland, and electorate of Fingal, on a tributary of the George River, about 110 miles from Launceston, and 172 from Hobart, the route being by coach to St. Mary's, thence by rail; fare, 36s. A court of Petty Sessions is held here. It is a tin mining district. Public school, Wesleyan and Union churches, and public hall here. One hotel. Coach communication with St. Helen's, Weldborough and Scottsdale, also to St. Mary's Station, Fingal line, 37 miles distant. Population of town and district, 400. Geological formation, stanniferous. Water supply from creeks. Lode tin mining rapidly expanding. Dairy farming carried on to a large extent. Grand waterfalls on the George River, especially St. Columba Falls, and splendid scenery on Scottsdale route. Road Trust valuation, £3,200.

GREENPONDS. *See* Kempton.

GREEN CREEK, post town, county of Devon, 56 miles N. of Launceston, and 10 miles from Latrobe railway station. State school and Wesleyan church here. Local race club holds autumn meet. Agricultural district.

HADSPEN (41° 30′ S. lat., 147° 3′ E. long.), a small postal township with telegraph station and post-office savings bank, 136 miles from Hobart, on the South Esk river, 32 miles S. from Launceston, in the county of Cornwall, electorate of Longford and police district of Selby. There is a Wesleyan place of worship, and a public school. A telephone station here connecting with Carrick. It is on the road from Launceston to Deloraine, and the river is crossed by a bridge. Selby district comprises also Breadalbane, Franklin village, Invermay, Lile, St. Leonards, Windermere, Young Town, and Pattersonia. There is a mail conveyance connecting with Bishopsbourne railway station, 8 miles distant. There is one hotel—the Hadspen. The soil is poor, and the principal local industry is wood carting. Ratable value of district £33,348. Capital value of district, £816,660. The total area

worked in Selby district on 1st March, 1900, was 17,076 acres, including wheat, 1,997 acres; oats, 2,460 acres; barley, 542 acres; potatoes, 651 acres; gardens and orchards, 710 acres. Produce: wheat, 31,952 bushels; barley, 9,756 bushels; oats, 73,960 bushels; potatoes, 2,059 tons; apples, 7,134 bushels; pears, 128 bushels. Stock: horses, 1,527; cattle, 6,672; sheep, 68,830; pigs, 4,045. The population of Hadspen numbers about 140.

HAGLEY (41° 30′ S. lat., 146° 55′ E. long.), a small postal township, with money-order office, savings bank, parcel post, telegraph, and railway station on the Launceston and Western line, 155 miles from Hobart; fares, 4s. 9d. and 3s. 9d., in the county of Westmoreland, electorate and police district of Westbury, four miles from Westbury, 155 miles NW. of Hobart, and 3¼ miles SW. of Launceston, situated about two miles from the Meander river. The Episcopalians have a church here built of bluestone (St. Mary's). There is also a Presbyterian church, a Wesleyan chapel, and a large public school-house. Hotel: Hagley. The district is purely agricultural. Population (census 1891), 114; June, 1900, 180.

HALL TRACK, post town, county of Dorset, 28 miles from Launceston on Scottsdale railway (Lebrina station), fares, 7s. and 4s. 8d.

HAMILTON-ON-CLYDE (42° 34′ S. lat., 146° 49′ E. long.), a township, with post, parcel post, and money-order office, savings bank and telegraph station, in the county of Monmouth, electorate of Cumberland, and municipality of Hamilton, 46 miles NW. of Hobart and 159 miles S. from Launceston. In the town are, an Episcopal church (St. Peter's), a Roman Catholic (St. Stephen's), a public school and three inns—New Inn, Glen Clyde, and Old Hamilton. Court of General and Petty Sessions is held here. Coaches run daily to Macquarie Plains station, connecting with trains for Hobart. Fare, coach 4s.6d., rail 7s. 6d. A coach also runs to the Ouse, connecting in summer season with conveyance to the Dee, where there is excellent trout fishing, and thence to Lake St. Claire. From the Lake a saddle-horse service takes travellers to Mt. Lyell. The chief beauty spot is the junction of Clyde and Derwent Rivers, about two miles from the township. The town is supplied with water by cartage from the river Clyde. At the Langloh coal-mines, in close vicinity to the township, and near the proposed extension of the Derwent Valley lines, several seams of bituminous coal have been struck, but no practical development has been attempted. Geological formation: igneous, intercepting coal measures. In the rural municipality of Hamilton (proclaimed August 24, 1863) there are 310 miles of roads and streets; ratable property of the annual value of £18,793, the area being estimated at 1,494,780 acres. Capital value of district £445,676. Road Trust valuation, £17,872. In the district, which is mainly pastoral, cereals and hops are principally grown. Agricultural returns to March 1st, 1900, were 364,762 acres worked; wheat, 549 acres; barley, 32 acres; oats, 136 acres; hops, 190 acres; potatoes, 110 acres. Produce: wheat, 5,490 bushels; barley, 384 bushels; oats, 2,448 bushels; peas, 3,038 bushels; potatoes, 220 tons; apples, 5,638 bushels; pears, 195 bushels. Stock: horses, 756; cattle, 10,933; sheep, 147,152; pigs, 1,340. Population, 350; of electoral district, 7,650.

HAMILTON-ON-FORTH (41° 12′ S. lat., 146° 15′ E. long.), a post-town, with parcel post, money-order office, savings bank and telegraph station, in the county of Devon, electorate of West Devon, and police district of Port Sorell, 7 miles W. of Devonport and 68 miles by road and 90 by rail NW. from Launceston, on the road to Circular Head, situated on both sides of the river Forth about 2 miles from the sea-coast, and distant from Hobart 218 miles. Coaches run to Leith railway station, meeting every train, distance 2 miles, fare 6d. Owing to the large area of rich agricultural land surrounding, it is steadily progressing. It possesses five places of worship, Anglican, Roman Catholic, Independent, and Wesleyan, one hotel, a town hall, and library (containing 900 volumes), a public school, convent school, and one private academy, an Oddfellows' Hall, which is also a Masonic Lodge, and several stores. A court of Petty Sessions is held here. The estuary of the Forth offers ample and excellent harbourage for moderate-sized craft, vessels drawing 13 feet lying there at any state of the tide without touching, and the improvement of the harbour by scouring the bar has further increased shipping facilities. The Forth is a favourite resort of disciples of Izaak Walton, various fish abounding there. The beach between the Forth and Leven is a charming recreation ground, and offers great attractions to the collectors of ocean shells and sponges. Other points of interest—Killturkey Falls and Kindred Falls. The Forth is rich in social institutions: it has its Agricultural Association, Devon Agricultural Society), its Working Men's Club, a Rechabite Tent, and cricket club. The town taps the large agricultural districts of Kindred, Wilmot and Barrington, which it is proposed to open up by railway. Road Trust valuation, £12,700. Population (census 1891), 456; now about 700.

HARFORD, agricultural settlement in Latrobe district. Post and telegraph office, one hotel. Road Trust valuation (Harford and Templeton), £6,442.

HASTINGS (43° 25′ S. lat., 146° 50′ E. long.), a post town with money-order office, savings bank, parcel post, and telegraph station, in county Kent, electorate and police district of Franklin, situated on an arm of the sea called the Narrows, 48 miles SW of Hobart. Communication by steamer and barges and by road. It has a Memorial Congregational Church, a public school and a Good Templars' Hall. The East and North country is hilly and densely wooded. To the South and West are large plains. Agricultural clearings have been made, and also small orchardings. An extensive saw-mill and timber-splitting gives employment to a number of hands. Good coal has been struck in the vicinity, in seams 6 feet thick, and there are large deposits of iron ore, valuable for fluxes. Gold in payable quantities has also been discovered, but only as yet in patches. The Queen's Caves attract the attention of summer tourists. The country rock is metamorphic sand stone, in many places capped with basalt. Limestone and porphyry also plentiful. Population about 175.

HEAZLEWOOD, post town, county of Dorset, 16 miles from Waratah, Emu Bay and Waratah railway. Tramway communication with Waratah has been constructed. Some extensive silver lead mining has been carried on here, but without profitable results to the promoters. Population 100.

HEEMSKIRK (41° 51′ S. lat., 145° 15′ E. long.), a mountainous district on the western coast to the north of Macquarie Harbour, in the county of Montagu, electorate of Cumberland, and police district of Macquarie, a populous and thriving settlement. It takes its name from the vessel in which Tasman sailed when the island (Tasmania) was discovered by him. Many leases have been taken up for working the tin field here, and water has been brought in for hydraulic sluicing, and there are strong indications of valuable deposits of tin and silver all along the line of route from Mount Granville to Mount Agnew, southwest of Heemskirk. Silver lodes identical with those of Mount Zeehan district have been traced here. Alluvial tin is raised, principally near the Tasman river. The railway to Zeehan from Macquarie Harbour is a good aid in opening up this district. Population, by the census of 1891, 270. (June 30th, 1900, 300.)

HEIDELBERG, or GREEN'S CREEK (41° 14′ S. lat., 146 32′ E. long.), is a post town in the county of Devon, electorate of East Devon, and Port Sorell police district, at the head of Port Sorell, 14 miles from Torquay, about 60 miles NW. of Launceston by sea, 56 by land, and 193 miles from Hobart. Wesleyan church, one hotel and a half-time school. Daily mail communication with Latrobe, 10 miles distant. Agricultural district.

HOBART (42° 53′ 32″ S. lat., 147° 21′ 20″ E. long.), the capital of Tasmania, and the seat of government, is picturesquely situated at the foot of Mount Wellington (which towers 4,166 feet above the north-west end of the city), on the river Derwent, about 12 miles from its mouth. Till January 1, 1881, it was known as HOBART TOWN, but on that day an Act of Parliament came into force altering the name to Hobart. The harbour is easy of access, well sheltered from winds, with sufficient depth of water and capacity for almost any number of vessels of the largest tonnage; there is also ample wharf and dock accommodation for the loading, discharge, and repair of ships and large Melbourne and English steamers. There is steam communication regularly to Melbourne and Sydney by the vessels of the Union Steamship Company and Huddart, Parker and Co.; the Union steamers also call on the way to and from New Zealand, and the Shaw, Savill and New Zealand Shipping Company's steamers, from London to New Zealand, make Hobart a regular port of call, landing passengers for Australian ports. Local steamers also trade regularly to East and West coast and river ports. During the fruit-shipping season large ocean steamers call here, taking shipments for London. Melbourne (443 miles NW.) can be reached twice a week *viâ* Launceston, and also once weekly, or oftener, *viâ* Devonport. There is direct steam communication weekly to and from Melbourne and Sydney. On the railway connecting Hobart with Launceston three trains run each way daily, besides several local trains. Coaches and carriers' vans leave regularly for adjacent townships. Electric tramways, extending from the railway station to Cascade, New Town and Sandy Bay, provide speedy service. Hobart, on account of its invigorating climate, is largely visited during the summer season by visitors from Melbourne, Adelaide, and Sydney, and no more pleasant resort could be found. The principal hotels are the Orient, Metropolitan, Heathorn's, Carlton, Ship, All Nations, West Coast, and Rock; there are numerous other good hotels, and also many first-class boarding-houses, where the charges range from 20s. to 60s. per week. The Imperial coffee palace in Collins Street affords first-class accommodation for a large number of patrons. The city proper forms nearly a square, and is built on a succession of hills. In area it covers within its boundaries about 1,270 acres, 162,500 houses, the annual value being assessed at £190,000. Capital value of district, £3,005,187. The streets, whose aggregate length is over 35 miles, are wide, well laid out, and intersect each other at right angles, the principal being Elizabeth, Liverpool, Collins, Macquarie, and Murray (one chain in width). Most of the streets were named by Governor Macquarie. There are numerous public buildings, of which Government House (a handsome castellated palatial pile of white freestone, on the banks of the Derwent) and the Government offices, which cover an extensive area, the Houses of Parliament (with library of about 12,000 vols., and specifications of patents from the year 1600), the town-hall, post-office, the museum and national gallery in Macquarie Street, the Freemasons' Hall in Murray Street, Temperance Hall in Melville Street, hospital in Liverpool Street, Technical School in Bathurst Street, Oddfellows' Hall in Victoria Street, the banks, and insurance offices, may be instanced as the largest. The Theatre Royal, in Campbell Street, ranks among the best buildings of the kind in the Australasian colonies. Churches and chapels are very numerous, numbering in all 36. Among the principal of these are, St. David's Cathedral (Episcopal), whose original foundation was laid on February 19th, 1817; in the churchyard lies Colonel Collins, the first Governor (to whose memory a monument was erected by Sir John Franklin in 1838), and not far from him Sir Eardley Wilmot; Trinity Church, with a peal of eight bells, in Warwick Street; St. George's (Battery

Point); St. Mary's Cathedral (Roman Catholic), Harrington Street, a beautiful and imposing structure which has been rebuilt (reopened January 24th, 1881), to which a large and handsome convent (of the Presentation Order) is attached, dedicated to the Sacred Heart, St. Joseph's, formerly the Roman Catholic pro-Cathedral, St. Andrew's (Church of Scotland), the Congregational Memorial Church, with a fine organ, and the Centenary Church (Wesleyan), in Melville Street, which has also a fine organ, and possesses larger seating accommodation than any other church in Hobart. The Baptist Denomination have, in Upper Elizabeth Street, a large tabernacle on the model of the Spurgeon churches built in England. It is a freestone building, and forms a striking object among its surroundings. The Society of Friends have a handsome meeting house in Murray Street, with a library of books treating on the principles and practice of the Friends. The Jews' Synagogue is in Argyle Street. The Nonconformist places of worship are all spacious and well fitted up. Attached to the Town-hall is a public library, well supplied with works in nearly every department of literature, comprising 20,000 volumes. The Town-hall, in Macquarie Street, the Freemasons' Hall, Tasmanian Hall, Temperance Hall, Memorial Hall, People's Hall, and the Oddfellows' Hall in Victoria Street, are frequently used for concerts and similar purposes; also the Institute Hall in Lansdowne Crescent, West Hobart. There are numerous private schools, six State schools, average attendance about 3,500. The State school buildings are mainly new, and erected on the most modern lines of school architecture. There are three Ragged schools in the city, with an average daily attendance of 500 scholars. The chief private schools are the Hutchins' School (so named in memory of Archdeacon Hutchins, who died in June, 1841), Officer and Queen's College. The Society of Friends have spacious school premises at Hobartville, on the New Town road. Among the charitable institutions, supported principally by private donations, are, the Benevolent Society, Dorcas Society, Girls' Industrial School, Boys' Home, St. Joseph's Orphanage, Deaf and Dumb Asylum and Convalescent Home. The public charitable institutions are numerous, and comprise a General Hospital, with 20 wards and 140 beds; the New Town Invalid Depot, averaging about 660 inmates. With this is also associated the Boys' Reformatory. A Magdalen Home, under control of Roman Catholic Sisterhood, is at Sandy Bay. Large buildings, public and private, are being erected, including new post office and Custom House. The city is delightfully situated, and from many points commanding views of land and sea are to be had. From Mount Nelson, the look-out station, the ascent of which is not laborious, one of the finest marine views may be obtained, while from Mount Wellington a still more comprehensive land and seascape repays the toiler to the summit. A carriage track gives easy access to the lower slopes. Mount Rumney, about five miles from Hobart on the Bellerive side of the river, also commands a magnificent view of the interior country and also of the sea coast. The suburbs of Hobart comprise New Town, Queenborough (Sandy Bay), Wellington, Glenorchy, Risdon, Bellerive, and Beltana. There are three breweries, the chief owned by the Cascade Brewery Company, Limited, and the others by Blake & Co. and Boag & Sons. There are also four flour-mills, five jam manufactories, numerous tanneries, two woollen factories and an iron foundry—"Derwent Iron Works," where iron ship, railway bridge works and steam machinery construction is successfully carried on. There are also several minor foundries. There are three first-class patent slips available for repairs to vessels of a considerable size. The Right Rev. H. H. Montgomery is the present Bishop of the Church of England. The Right Rev. D. Murphy is the Archbishop of the Roman Catholic Church, with the Rev. J. Delany as coadjutor Bishop. The Roman Catholic Episcopal palace is a large and commodious building, commanding a fine view. The city is under municipal government (incorporated December 22nd, 1857), the corporation consisting of a mayor and nine aldermen. The city is lighted with gas and electricity, and plentifully supplied with water. The supply is derived from springs in Mount Wellington, and is conserved in storage reservoirs on the Sandy Bay Rivulet (about one mile from the town boundary), capable of containing a hundred million gallons. It is estimated that the two reservoirs contain about three months' supply. There are two markets, the New Market in Macquarie Street, and the fish market near Victoria Dock. Under the auspices of the Hobart Bathing Society, spacious baths, including hot salt-water baths, with every private accommodation for ladies and gentlemen, have been erected in the Queen's Domain, within ten minutes' walk of the city. There are also, near the same spot, sheds for the accommodation of the members of the Hobart, Derwent, and Mercantile Rowing Clubs. The Derwent is celebrated for its annual regatta, which attracts visitors from all the colonies, and is the grand holiday of Hobart. The Queen's Domain, a spacious reserve of about 1,000 acres, serves as a most efficient lung for the city. Under direction of the Domain Committee many improvements are yearly carried out. The cricket-ground here is provided with a pavilion and every requisite for the comfort of members and visitors. There is a race-course and general recreation ground at Risdon, close to the Main Line Railway; also a polo ground close adjacent, all affording ample scope for athletic gatherings. The Royal Society's Gardens, close to Government House, covering an area of about 25 acres, are much frequented. The Tasmanian Racing Club, Hobart Turf Club, Butchers' Racing Club, Tasmanian Trotting Club, and Hobart Hunt Club are flourishing institutions. A bowling club has a green on Barrack Square. There are several tennis, golf and cycling clubs; also two dramatic clubs and two choral societies. Cook's Tourist Agency has an office in Macquarie Street. In the centre of the town stands a bronze statue to the memory of Sir John Franklin, formerly Governor of Tasmania, around which is a pleasant garden, known as Franklin Square, formerly the site of the old Government house, provided with seats and shade-trees. A statue to the late Dr. Crowther, of Hobart, has been erected in close proximity. A recreation ground near the Barracks, and another at Princes Square, a gentle rise above the Castray Esplanade, whence there is a good view of the harbour and lower part of the city; and the area in front of Parliamentary buildings, all afford healthful resorts. At North Hobart there is a spacious recreation ground. In the vicinity of Hobart are several cemeteries: the Public Cemetery, Cornelian Bay, the Queenborough Cemetery at Sandy Bay, near the second milestone, the Upper Davey Street Cemetery on the Huon Road, the Baptist (St. John's Episcopal), and Congregational Burial Grounds, New Town, and the Burial ground of the Society of Friends. Population (census 1891): city, 24,905 (June 30th, 1900, 30,687); suburbs, 10,725. The Press is represented by the *Mercury* and *Tasmanian News*, daily; *Tasmanian Mail*, weekly; *Clipper*, weekly; *Church News*, *Presbyterian Herald*, *Christian Record*, *Homœopathic Journal* and *People's Friend*, monthly.

HOLLOWTREE, post town, 40 miles NW. of Hobart, and 14 miles from Arundel station, Derwent Valley line. State school. Agricultural district.

HONEYWOOD, post town, with parcel post, Huon district, 36 miles from Hobart. Coach daily. Roman Catholic and Independent churches. Fruit-growing district.

HUONVILLE (See VICTORIA).

ILFRACOMBE, post town, county of Devon, electoral and municipal districts of George Town.

IMPRESSION BAY, post town, with parcel post, telegraph, savings bank, and money-order office, 50 miles SE. from Hobart, situated on Tasmania Peninsula; official name of township Premaydena. Communications by steamer. Agricultural district.

INVERMAY, post town, with telegraph, money-order, savings-bank, and parcels post. Anglican and Wesleyan churches. State school. A Town Board administers local affairs. A pleasant suburb of Launceston.

INTERLAKEN, post town, 16 miles from Tunbridge station, main line railway, whence coaches run bi-weekly in summer season. Beautiful lake scenery here and fishing, with good accommodation. Favourite resort of tourists.

IRISH TOWN (Upper Duck River), post town with telegraph office, 20 miles from Evandale railway station. State school. Cheese factory and public hall. Agricultural and pastoral district.

JERICHO, post town, parcel post and telegraph office, county of Monmouth, 43 miles from Hobart. Nearest railway station Brighton. Anglican church and State school and flour-mill. Daily coach. Agricultural and pastoral district.

JERUSALEM (See COLEBROOK).

JETSONVILLE, post town, county of Dorset, 50 miles from Launceston, and 3 miles from Scottsdale. State school. Agricultural district.

KAROOLA, post town, parcel post, money-order, savings bank and telegraph office. State school. Railway station on the Scottsdale line. Turner's Marsh Race Club has an annual meet here.

KELLEVIE (42° 47′ S. lat., 147° 53′ E. long.), a post town with telephone office, county of Pembroke, electoral district of Sorell, about 16½ miles from Sorell, nearest railway station. Conveyances run to-and-fro daily, connecting also with Bream Creek, Coppington, and Dunelley. Christian church and State school. Mountain and ocean scenery, good fishing, bicycling and cricket.

KELLY POINT, post town, with parcel post, 16 miles from Hobart in Huon district. Daily communication by steamer (fare 2s. 6d.). Anglican Church here. Agricultural district.

KELLY'S BASIN (42° 23′ S. lat., 135° 30′ E. long.). Macquarie Harbour Terminus of North Lyell Company's railway from Gormanston. Post and money order office, in county of Franklin, electorate of Lyell. Roman Catholic church, two schools, two hotels, several stores. Brickmaking and saw-milling works. Splendid anchorage for vessels. Twenty-five miles from Strahan. Agricultural and mining country.

KEMPTON (42° 32′ S. lat., 147° 14′ E. long.), more generally known as GREEN PONDS, a township 29 miles N. of Hobart, and 92 miles S. of Launceston, in the county of Monmouth, electorate of Brighton for Assembly, and Cambridge for Legislative Council, and municipal district of Green Ponds, situated on the Green Ponds Rivulet, and within three miles of the River Jordan. It has a post office, parcel post, money-order office, savings bank and telegraph station. Coaches run from Bothwell to meet trains at Apsley, also carrier's van. Hotels: Exchange, Turf, Wilmot Arms, and Victoria. The public library has about 2,000 vols. Public schools, State and Catholic, and also one at Constitution Hill, and an assembly room. Places of worship: St. Mary's Episcopal Church, Presbyterian Church, a Congregational chapel, and St. Peter's Roman Catholic Church. It is a place of Petty and Quarter Sessions. The rural municipality of Green Ponds (proclaimed March 7, 1862) has an area of 100,800 acres, 39 miles of roads and streets, and property of the annual ratable value of £9,272. Capital value of district, £210,799. Road Trust valuation, £11,413. It is an agricultural and pastoral district. Agricultural returns to 1st March, 1900, were 81,902 acres worked; wheat, 2,804 acres; oats, 804 acres; peas, 271 acres; potatoes,

183 acres; hay, 1,123 acres Produce: wheat, 28,040 bushels; oats 10,400 bushels; barley, 510 bushels; peas, 3,523 bushels; potatoes, 366 tons; apples, 2,076 bushels; pears, 65 bushels; hay, 472 tons. Stock: horses, 416; cattle, 1,270; sheep, 34,780; pigs, 929. Population, 426 (census 1891); of electoral district, 3,414; June, 1900, 3,600.

KENTISHBURY. *See* SHEFFIELD.

KETTERING *See* OYSTER COVE.

KINDRED, postal town, and railway station on Western line, 12 miles from Devonport. State school and Wesleyan church. Agricultural and potato-growing district.

KINGSTON (BROWN'S RIVER) (42° 59′ S. lat., 147° 19′ E. long.), a postal, telegraph, parcel post, savings bank and money-order town on Brown's river, in the county of Buckingham, electoral and police district of Kingborough, 10 miles S. of Hobart, and 131 miles from Launceston. There is an English church, also chapels belonging to Wesleyans and Primitive Methodists, Church of Rome (St. Aloysius), and a public school in the immediate neighbourhood; the public buildings are comprised in a court-house and police station and hall on the beach. There is a well surveyed race course on the flat adjoining Brown's river. About 4 miles on the road to Hobart there is a lofty shot tower of stone about 176 feet high, occasionally used, and as a place of observation. Courts of Petty and Quarter Sessions are held. The district is a good grazing and fruit-growing one. Coach leaves here twice daily for Hobart; fare 2s.; 3s. return. Steamers for Hobart ply frequently, a convenient jetty for landing passengers and goods having been erected. One good hotel, the Kingston, and some small boarding houses. At the beach the Australasian Hotel is conveniently situated. Water is supplied from the river. Geological formation, partly volcanic. Ratable value of property in district, £8,803. Capital value of district, £191,372. Road Trust valuation £2,467. The agricultural returns for Kingborough for the year ending 1st March, 1900, were:—Acres worked, 59,202. Produce: wheat, 2,560 bushels; oats, 2,368 bushels; barley, 630 bushels; peas, 2,816 bushels; potatoes, 848 tons; turnips, 175 tons; apples, 31,071 bushels; pears, 4,147 bushels. Stock: Horses, 421; cattle, 2,269; sheep, 8,593; pigs, 1,089. Population of road district, 600; electoral (census 1891), 7,690. (30th June, 1899, about 8,200.)

KOONYA, post town, with telegraph office and parcel post, in the county of Pembroke, municipal district of Carnarvon. State school here and boarding house accommodation. Favourite summer resort for tourists. Road Trust valuation, £2,300.

KRUSHKA BRIDGE. *See* MOORINA.

KUNARRA. *See* GOULD'S COUNTRY.

LACHLAN, post town, county of Buckingham; 20 miles NW. of Hobart, and 5 miles from New Norfolk railway station Anglican church here. Hop and fruit-growing district.

LADY BAY, post town, with telegraph office and parcel post, in the county of Buckingham, municipal district of Franklin. Riverside settlement with agricultural and timber trade.

LAKE DISTRICT (SOUTH LONGFORD). The Great Lake Road District includes country to the southward and eastward of the South Longford and Lake Districts, extending to the main road between Oatlands and Tunbridge. Postal communication weekly to Great Lake, Arthur Lake, Lake Sorell, Lake Crescent and Interlaken. The stock returns for South Longford for the year ending 1st March, 1900, were: Horses, 22; cattle, 2,779; sheep, 127,553. The ratable value of the district is £6,904, and capital value £146,116. This locality has become important from its attractiveness to tourists and anglers.

LATROBE (41° 30′ S. lat., 146° 39′ E. long.), a post, parcel post, telegraph, savings bank and money-order town in the county of Devon, electorate of East Devon, and police district of Port Sorell, near the mouth of the river Mersey, 6 miles SE. of East Devonport, 57 miles NW. from Launceston, and 203 miles NNW. from Hobart. Bank of Australasia and Commercial Bank, a State school, Catholic school, and three private schools, Episcopal (St. Luke's), Roman Catholic, Wesleyan, Congregational, Baptist, Seventh Day Adventists, Church of Christ, and Salvation Army places of worship; a spacious court-house (Court of Petty and General Sessions and Supreme Court sittings, £200 jurisdiction, are held regularly), police office, a public library, a Masonic hall, Oddfellows' hall, and a large assembly room. Principal hotels: Lucas's, Bramich's, Anderson's, Watts' and Young's, also two small coffee palaces. Roller flour and bone mills. Latrobe is the second station of the Western Railway; fares, 1s. 6d. and 10s. 6d. to Launceston. The Latrobe Chamber of Commerce, Turf Club, Masonic, Oddfellows', Druids', Rechabites', and Band of Hope Societies, Homing society, fire brigade, and Devon Cottage Hospital are local institutions. The local gas company supplies gas of good quality, and a water supply, which cost £7,000, is supplied at an annual rate. The town possesses considerable reserves for recreation, and one of the best cycling tracts in the Colony. The annual agricultural show held here is one of the most successful in the island. Spreyton colliery, within a few miles of Latrobe, employs about twelve miners. Annual output from 1,000 to 2,500 tons. Orchard-planting is carried on successfully. Good shooting and fishing and many picturesque drives in the district. Industries principally agricultural and pastoral. Ratable value of district, £15,318. Capital value of district, £325,170; Road Trust valuation, £7,000. The agricultural returns for Latrobe for the year ending 1st March, 1900, were:—Acres worked, 41,623; wheat, 1,547 acres; barley, 83 acres; oats, 2,396 acres; peas, 545 acres; potatoes, 5,111 acres; gardens and orchards, 253 acres. Produce:—Wheat, 37,128 bushels; oats, 71,880 bushels; barley, 2,324 bushels; peas, 8,687 bushels; potatoes, 20,444 tons; apples, 1,923 bushels; pears, 351 bushels. Stock: 858 horses; 2,962 cattle; 11,530 sheep; 2,365 pigs. Population, 1900, 1,800; district, 3,750.

LAUNCESTON (41° 30′ S. lat., 147° 14′ E. long.), the second city in Tasmania, and the principal business centre in the north, on the river Tamar, about 40 miles from its mouth, at the conflux of the North and South Esk rivers, county of Cornwall, electoral district of Launceston. The Tamar is navigable for vessels of 4,000 tons the whole distance at top of tide. The city lies in a valley enclosed by hills, known as the Windmill and Cataract Hills, and derives its name from Launceston in Cornwall, England. It is distant 120 miles (133 by rail) N. from Hobart, with which there is daily communication by railway; fares, 30s. and 20s. The Railway station is in Inveresk, Invermay Road. Steamers run to Melbourne (267 miles NW.) three times a week during the summer and twice during the winter seasons. To the north-west ports and west coast (Strahan) weekly, and to Sydney fortnightly. There is coach communication with Lymington, Lefroy, Beaconsfield, and other townships, and the Launceston and Western Railway (station, Invermay Road) is now open to Devonport and Ulverstone, with coach connection to Emu Bay, and thence by rail to Waratah (Mt. Bischoff). A line of railway, 47 miles in length, connecting the agricultural district of Scottsdale and the rich stanniferous district of Ringarooma with Launceston was opened in August, 1889. A new branch line from the Western line runs to Chudleigh, where there are natural caves rivalling the famed Jenolan caves in New South Wales. There are several first-class hotels and coffee palaces. The buildings and lands assessed number 4,275. The annual value of ratable property is £125,740. Capital value, £2,434,125. Extent of roads and streets 45 miles; area of city, 3,440 acres. The city is well laid out, is lighted with electricity, and has a good water supply (derived from St. Patrick's River, 15 miles E. of Launceston), with streets of ample width, in which are numerous fine public buildings, as well as substantial shops, stores, banks, private residences, and public halls, &c. The electric light installation and works, constructed at a total cost of over £90,000, is largely used for illuminating streets, shops, public buildings, and private residences and for driving machinery. The principal ecclesiastical edifices are St. John's (foundation stone laid on December 28th, 1824), Trinity, St. Paul's, St. George's (Invermay), St. Oswald's (Trevallyn), and St. Aidan's (Episcopal), St. Andrew's and Chalmers's church (Presbyterian), four Wesleyan churches in Patterson and Margaret Streets (city), Invermay, and Laurencevale, the Roman Catholic Church of the Apostles, two Congregational churches, Christ Church in Prince's Square, another in Tamar Street, the new Baptist tabernacle in Cimitiere Street, and the Memorial Church in Wellington Street. The Salvation Army has a large wooden building in Elizabeth Street West, which is used as a hall for meetings. It has accommodation for about 1,500 persons. There is also a Primitive Methodist Church in Frederick Street. The General Hospital has accommodation for 122 patients. The building has cost £25,000. Infectious diseases wards, and a new home for nurses were erected during 1897. The Benevolent Institution has an average of 150 inmates. Both are under local management, subsidised by an annual Government grant. The mechanics' institute is well patronized, and has a library of 22,450 volumes. The Albert Hall, in the City Park, cost £12,000, and will seat over 2,000 people. The town-hall is an elegant and spacious building. Victoria Baths, built as a Jubilee Memorial, have cost over £3,000. The Government buildings in St. John Street are also above the average order. There are a grammar school (Church of England), Wesleyan Ladies' College, numerous private schools, three public schools under the Board of Education, and a convent of the Presentation Order, with day-school attached. The banks are the Commercial, National (Tasmanian), Union, and the Bank of Australasia. There are also the Launceston Bank for Savings and the Post Office Savings Bank; the new post and telegraph office has been erected at a cost of £20,000, a Custom house has been erected at a cost of £10,000. These buildings form a group worthy of remark. A large and commodious building used as a Museum and Art Gallery was opened during 1891. The Academy of Music, a centrally placed theatre, is the best and most commodious building of the kind in the colony. The Mechanics' Institute has a hall suited for festive gatherings or minor entertainments. The A.M.P. Society has erected a new building next to the post office at a cost of £4,500. A handsome Fire Brigade station with tower is in Brisbane Street. The city was incorporated Nov. 1, 1885, and is governed by a mayor and eight aldermen. The City Park, extending over an area of 9 acres, is much frequented. The Princess Square Garden is permanently improved as a recreation ground or public garden. A new park has been opened in Inveresk, and is the largest in the city. Trevallyn is a charming suburb. The racecourse is at Mowbray, about 2 miles from the city. There is also Tattersall's Pony Club Proprietary Course at Elphin, one mile from the city, and Mowbray Club, with a course two miles from the city. The land under cultivation in the district is principally for wheat, oats peas, and potatoes. Fruit also is grown in yearly increasing quantities. Corra Linn, about 6 miles from the town, is much visited for its romantic scenery, being a deep gorge, through which the North Esk rushes. The Punch Bowl and the Cataract Gorge are also favourite places of resort, the latter being within five minutes' walk of the town, and so called from the falls of the South Esk immediately above its junction with

the North Esk. From a walk constructed along the Gorge beautiful panoramic views are obtained. There is a recreation ground, with refreshment rooms, at the First Basin, and the locality is the Beauty Spot of the North. The grounds are under the control of the City Corporation. Invermay, a suburb on the east bank of the Tamar, Distillery Creek, and Clarke's Ford are also favourite pic-nic places. By an Act which came into operation on 1st January, 1889, Launceston was made a city. The population, including suburbs, is 20,358. The newspapers published at Launceston are the *Launceston Examiner*, and *Telegraph*, published daily; the *Monitor* (R.C.), weekly; *Pioneer* and *Church Magazine* (Anglican), monthly. Agricultural returns to 1st March, 1900, were:—Acres worked 2,049, including 208 in gardens and orchards. Produce: Wheat, 350 bushels; peas, 165 bushels; potatoes, 110 tons; hay, 92 tons; apples, 160 bushels; pears, 100 bushels. Stock: 884 horses, 708 cattle, 662 sheep, 186 pigs. Population (census 1891), 17,208 (30th June, 1900, 21,046); of suburbs, 5,384.

LEFROY (41° 9′ S. lat., 146° 58′ E. long.), so called in honour of a late Acting-Governor, a mining township, with post, parcel post, telegraph station, telephone exchange, savings bank and money-order office and public library, in the county of Dorset, electorate and police district of Georgetown, about 27 miles NW. from Launceston, 159 N. from Hobart, and 10 miles from Georgetown. It is situated on the E. side of the River Tamar, on the Blanket Creek. Courts of Petty Sessions and Requests are held here. Two coaches run to and from Launceston and George Town daily. Train from Launceston to Hobart; river steamer also plies to Launceston. Nearest railway station at Karvola, 14 miles distant. Masonic lodge "Pembroke." Hotels: All Nations, Lefroy, Pinafore, Volunteer, Royal Mail, and Gilhams. Lefroy was formerly known as Nine-Mile Springs. The discovery of several gold-bearing quartz reefs first brought the town into prominence. On the principal line of reefs there is a suburb with about 150 residents. In the town are three places of worship, Episcopal, Roman Catholic, Wesleyan, and Salvation Army, State school and private school, police-station, an Institute, with library of 700 volumes, a spacious Masonic hall, and several stores. The goldfield is scattered, and covers an area of about 1,000 acres. Geological formation—Older Palæozoic, probably lower Silurian, in places covered with sand and quartz gravel of Tertiary Age, and basalt. Many auriferous reefs and alluvial leads. Good shooting and fishing at Piper river. Population, town and district, 1,300.

LEIPZIG, post town, Glamorgan county; 66 miles from Launceston, and 14 miles from Avoca railway station, Fingal line. Anglican church here. Agricultural district.

LEVEN RIVER (48° 8′ S. lat., 146° 14′ E. long.), a post money-order, savings bank and telegraph station, in the county of Devon, electorate of West Devon, and police district of Port Sorell, 70 miles from Launceston, NW., situated on the river whose name it bears, which has a bar entrance, and is only accessible to vessels of light draught of water. *See* Ulverstone.

LIFFEY, post town, Westmoreland county; 25 miles SW. of Launceston, and nine miles from Oaks station, Western line. State school and Primitive Methodist church. Agricultural district.

LILYDALE, post town, parcel post, telegraph, money-order and savings bank office. Railway station on Scottsdale line; 21 miles from Launceston. Fares, 5s. 3d. and 3s. 6d. Hotel, Railway; two saw-mills, and three stores. State school, Roman Catholic and Union Churches. Agricultural district.

LISDILLON (42° 17′ S. lat., 148° 4′ E. long.), a post place, with parcel post, savings bank, telegraph and money-order office, in the county, municipality, and electorate of Glamorgan, situated on the rivulet of the same name, about 76 miles NE. of Hobart, 51 from Launceston, and 13 miles from Swansea. It is the coach road between Swansea and Campania. From the latter place Hobart is reached by rail, whence there is occasional steamboat and sailing communication with Hobart. A public school here serves also as a place of worship. Agricultural and pastoral district. Population of district about 200.

LISLE (Mount Arthur) (41° 16′ S. lat., 147° 17′ E. long.), a goldfield, named after the family name of Mrs. Weld (De Lisle), about 32 miles NE. from Launceston, and six miles from Golconda station, Scottsdale line. It has several streets laid out, one undenominational church, State school, hotel and two stores. Three saw mills. A considerable extent of auriferous country is here. Lisle has a money-order office and savings bank, with post to Lisle Road station, and is in the county of Dorset, and police and electoral district of Selby. Industries: mining and agriculture. The population (including Golconda, Panama and Tobacco Creek) is about 250.

LITTLEHAMPTON (41° 34′ S. lat., 146° 43′ E. long.), a railway station on the Launceston and Western Railway, 22¾ miles S. of Launceston; fares, 3s. 6d. and 2s. 9d.

LITTLE OYSTER COVE, post town; 22 miles S. of Hobart in Huon district. Daily steamers. Fare 3s. 9d. return. Fruit-growing district.

LITTLE SWANPORT, post town, with parcel post, Pembroke county, 50 miles from Hobart. Coach communication with Campania railway station.

LLEWELLYN, post town, with parcel post and telegraph, Somerset county; 96 miles NE. from Hobart, and seven miles from Campbelltown railway station. Agricultural district.

LONGFORD (41° 35′ S. lat., 147° 11′ E. long.) is a municipality situated on the Norfolk Plains (which name the district formerly bore), and the Lake river, at its junction with the South Esk, in the county of Westmoreland, municipality of Longford, and electorate of Longford, 113 miles N. from Hobart, and 17¾ miles S. of Launceston by rail (12 miles by road), with which it is in direct railway communication by the Launceston and Western Railway; return fares, 3s. 6d. and 4s. 6d. Courts of Petty and General Sessions are held here. Two carriers ply to and from Launceston and a mail coach to Cressy twice daily. It has a money-order office, post office, savings bank, parcel post and telegraph station, State school, and Council chambers. Court of Petty and General Sessions is held regularly, also Supreme Court Sittings or small debts jurisdiction to £100. The principal place of worship in the town is Christ Church (Anglican), which is built of freestone, with a magnificent stained glass window, the gift of the late Charles Reid; cost £500. It also possesses a gold communion service, clock and bell, all presented by William IV. The grounds surrounding it are most tastefully laid out and well kept. The Roman Catholics have a chapel (St. Augustine's), built of bluestone and tastefully erected, as have also the Wesleyans, Primitive Methodists, and Baptists. Presbyterians meet in Rechabite Hall. Salvation Army have a contingent here. Public school, Grammar school, and private schools. The Commercial Bank has a branch here in very commodious premises. Five hotels: Blenheim, Commercial, Queen's Arms, Prince of Wales, and Racecourse. One steam flour-mill. The public library and reading-room, which cost £850, contains upwards of 2,500 volumes. The rural municipality, proclaimed January 27, 1862, has an area of 212,000 acres, with 136 miles of roads and streets; annual value of ratable property being £40,505. Capital value of district, £1,015 444. Road Trust valuation, £30,607. A Ploughing Association flourishes, the Northern Agricultural Society holds its annual exhibition here, and there are Football, Cycling, Rifle and Cricket Clubs. The Foresters and Rechabites have lodges, each with over 100 members, and halls of their own, the Foresters' being used for public entertainments. The Longford Racing Club and South Esk Rowing Club both flourish. The Great Lake, a popular place of tourist resort, is easily accessible. There is excellent fishing in the South Esk and Lake Rivers. Good roads also offer cycling facilities, and agricultural operations are profitably carried on in the district, wheat and oats being largely grown, and so also is fruit. The district has been called the "Garden of Tasmania." It is also a good pastoral district. Water is laid on from the South Esk. A series of coal seams in the neighbourhood supply excellent domestic fuel. The seam averages 3 feet. Agricultural returns to March 1, 1900, were 183,844 acres worked; wheat, 12,080 acres; barley, 1,096 acres; oats, 3,689 acres; potatoes, 204 acres; turnips, 77 acres; gardens and orchards, 275 acres. Produce: wheat, 241,600 bushels; barley, 21,920 bushels; oats, 95,914 bushels; potatoes, 561 tons; turnips, 770 tons; peas, 7,840 bushels. Stock: 1,827 horses, 52,119 cattle, 11,775 sheep, and pigs, 3,198. Population (census 1891), 1,084; of district, 3,126 (30th June, 1900, 3,700).

LONGLEY, post town, money-order, savings bank, parcel post and telephone office, Buckingham county, 12 miles SW. of Hobart, Huon district. Daily coach communication. The parcel post also extends to Lower Longley. Road Trust valuation, £600. Favourite resort for tourists. Hotel: Longley Inn. Agricultural district. Wesleyan church and State school at Lower Longley, 6 miles distant.

LOTTAH. *See* Blue Tier Junction.

LOVETT (43° 10′ S. lat., 147° 8′ E. long.), a township on the shores of Port Cygnet, in the county of Buckingham, electorate of Kingborough, and the municipal district of Franklin, about 33 miles SW. of Hobart. Steamers and mail coach daily. Hotels: Harvey's Commercial, Devereux's Huon. It has a post-office, parcel post, telegraph-office, savings bank, and money-order office, Roman Catholic church and convent school (St. James), an Anglican church (St. Mark's), also Wesleyan and Congregational, 3 schools—public, Roman Catholic, private—several stores. Two public halls. A Court of Petty Sessions is held here. Port Cygnet Race Club holds an annual meet. The surrounding country is agricultural and timber-producing, also fruit preserving. Apples and small fruits exported in immense quantities. Coal seams in the district are systematically worked. The coal is well suited for domestic purposes. Water supply from Agnes Rivulet. The estuary is a safe resort for yachting, and has most picturesque surroundings. Annual regatta attracts large attendances. Population 247 (census 1891); of electoral district, 7,690; June, 1900, town, 300; district, 7,800. Road Trust valuation, £3,200.

LOW HEAD, post town and telegraph office, Dorset county, 40 miles NW. of Launceston. Daily steam communication. Passengers for Georgetown and locality land from Melbourne steamers here. Anglican church and State school. Lighthouse station. Population (census 1891), 153, June, 1900, about 300.

LOWES BRIDGE, post town, with parcel post, Devon county, 71 miles W. of Launceston, and four miles from Railton railway station, Western line. Agricultural district.

LYMINGTON (Nile) (41° 39′ S. lat., 147° 22′ E. long.), a village, with post office, parcel post and telephone station, on the River Nile, a tributary of the South Esk, in the county of Cornwall, municipality and electorate of Evandale, about 7 miles SE. from Evandale, the nearest railway station being Charendon on the main line. Lymington is 125 miles from Hobart. A coach runs thrice a week to and from Launceston, *viâ* Evandale, 18 miles distant NW.; fare, 2s. 6d. Hotel: the Nile. A public school is here, and Episcopal, Presbyterian and Baptist places of worship and two stores. The country here is very flat, and mainly supports agricultural and pastoral pursuits.

LYNCH CREEK, or Lynchford, post town, Montagu county, on Mount Zeehan railway, connecting with Strahan

(Macquarie Harbour). A mining township, Mount Lyell district. Population about 350.

LYNDHURST (40° 52′ S. lat., 147° 41′ E. long.), a tin-mining centre, in the county of Dorset, Ringarooma electorate and police district, about 70 miles NE. of Launceston, 200 miles from Hobart, and 28 from Scottsdale railway station.

MACQUARIE HARBOUR (STRAHAN, EAST and WEST) (42° 9′ S. lat., 145° 20′ E. long.), in the electoral district of Montagu, a post town, with parcel post, telegraph station, money-order and savings bank office, the principal port on the Western side of the island, and a port of entry. It is the terminus of the Strahan and Mount Zeehan railway. The stations on the line are W. Strahan Henty, Mallana, Eden, Oceana Junction and Zeehan, and trains leave Strahan Wharf daily at 11.15 A.M. and 5.30 P.M. It is distant 229 miles by water from Hobart; bearings E. by S. half S. Fares by steamer, 25s. and 15s. It is in the county of Franklin, electorate of Lyell, and police district of Macquarie. Petty Sessions are held here. Gold exists in the district, and rich discoveries at the King River, Mount Lyell, Mount Zeehan, and Mount Dundas of gold and silver lead have caused very many mining leases to be taken up and worked. A good seam of lignite has been found in the immediate neighbourhood of the township. The difficult nature of the country to some extent retards progress, but the railway constructed from Macquarie Harbour to Mount Zeehan, distance about 24 miles, facilitates traffic and opens up some good agricultural lands. The line constructed to Mount Lyell is developing valuable mineral and agricultural country. Steamers call at Strahan regularly from Hobart and Launceston, and there is direct communication twice weekly with Melbourne. Small local steamers also ply to Kelly's Basin, from which point the North Mount Lyell Company are constructing a light railway to their mine at Gormanston. The Mount Lyell Company are extending their line from Teepeokana to Strahan. Principal hotels: Palace, Royal Exchange, Macquarie, and Bay View. Bank, National of Tasmania. Churches, Anglican, and Wesleyan. One State and two public schools. West Coast Amateur Jockey Club holds two meetings annually. A Town Board and Marine Board control local matters. Manchester Unity Lodge, Cricket and Football Clubs, and Mutual Improvement Society. Annual ratable value town property, £6,600; annual ratable value of district, £50,500; capital value of district, £425,000. Chief stores, F.O. Henry's, Gaffney's and Harvey's. It is a mining district, and the population in this locality is rapidly increasing. Agricultural returns to March 1, 1900, show 2,600 acres worked; land in permanent pasture, 2,530 acres. Stock: horses, 422; cattle, 249; sheep, 135; pigs, 620. Geological formation, tertiary. Population of town, about 1,000; of district, 10,500. Points of interest to tourists: Hogarth's Falls, Old Strahan Settlements, Swan Basin, Gordon River. Marine Board now constructing breakwaters at Macquarie Heads with Government assistance at probable cost of £250,000.

MACQUARIE PLAINS (42° 41′ S. lat., 146° 57′ E. long.), a post-town, with railway, post and telegraph station, parcel post, savings bank and money-order office, in the county of Cumberland, municipality and electorate of New Norfolk, situated on the N. bank of the River Derwent, 33 miles NW. from Hobart railway station on Derwent Valley Line. Fares 7s., and 5s. 2d. Coaches connect with Hamilton, the Ouse, Dee, and Lakes, with saddle-horse service from Lakes to Mt. Lyell. Hotels: Gretna Green and Rose Garland. Good fishing and shooting in the neighbourhood. Place of worship, St. Mary's Episcopal Church. Public school here and public library. Hop-growing and agricultural district.

MANGANA (41° 38′ S. lat., 147° 54′ E. long.), a mining town, with post office, savings bank, and parcel-post, and telegraph station, on Richardson's Creek, which flows into the South Esk, in the county of Cornwall, and electorate and municipality of Fingal, 91 miles SE. from Launceston, 120 NNE. from Hobart, and 5 miles from Fingal railway station. Conveyance can be hired. Public school here, Anglican and Roman Catholic places of worship, and a Concert Hall. One hotel, The Alpine. Mining district, both quartz and alluvial. Agricultural and pastoral pursuits also followed. Geological formation: slate and sandstone, with numerous quartz reefs; also alluvial gold. Water supply from wells. Ben Lomond mountain and Tower hill are the chief points of interest to tourists. Population (census 1891), 226, now 360.

MARGATE (43° 4′ S. lat., 147° 19′ E. long.), a post-town with parcel-post and telegraph station in the county of Buckingham, and electorate and police district of Kingborough, 15 miles S. of Hobart, and 5 miles from Kingston on North-west Bay river. Public school, Wesleyan church, and one hotel. Coach fare from Hobart 4s. 6d. return. Daily communication. Ratable value about £1,600. At the Sand Fly Rivulet, about 7 miles distant, excellent coal exists. Fruit and farming district. Good fishing. Population (census 1891) 158; June, 1900, 300.

MARIA ISLAND, post town, Pembroke county, 65 miles NE. from Hobart, and 40 miles from Campania railway station (main line), whence coaches run to Spring Bay (or Triabunna), and thence steamers; eight miles, fare 2s. 6d. The island has good agricultural, pastoral, and viticultural resources. Valuable quarries of limestone and cement. Fishing good and climate superb. Good boarding accommodation. Maria Island has been designated the Isle of Wight of the Antipodes. It presents most charming scenery, and has a climate unequalled in the Southern Hemisphere: temperate and bracing in the summer, mild and invigorating in the winter.

MATHINNA (41° 46′ S. lat., 147° 55′ E. long.), a gold-mining township, with post office, parcel-post, telegraph, money-order and savings bank office, in the county of Cornwall, municipality and electoral district of Fingal, 134 miles NE. of Hobart, about 17 miles from Fingal, and 84 miles E. from Launceston. It is situated on the South Esk river, not far from its source, and lies high, being about 570 ft. above sea-level. Active gold-mining operations prevail here. Several batteries are employed on the gold mines, notably on New Golden Gate. The buildings are lighted by electricity, and the plant is very complete and effective. Machinery and appliances for treating low-grade ore and tailings by the cyanide process are in use. Payable gold has been struck at 1,000 feet. A State school is here, also two private schools, public library, and reading-room. There is an Anglican, Roman Catholic and Union place of worship. Hotels: Mathinna, Telegraph, and Talbot. Oddfellows' Lodge M.U. Race Club holds meet in April. Communication with the metropolis is by way of daily coach connecting with the Fingal branch railway at Fingal and the Main line; fare, 5s. The district is elevated and mountainous. The tracks to George's Bay, Ringarooma, and Blessington, open up many picturesque forest and mountain views. Water is obtained from the Black Horse and Long Gully Creeks. Mining and agricultural pursuits are followed. Barren slate ranges surround the town. Population, July, 1900, 2,300.

MELROSE, post town, with parcel post, Devon county, 8½ miles W. of Launceston, and 3 miles from Spreyton railway station, Western line. State school. Agricultural district.

MELTON MOWBRAY (42° 28′ S. lat., 147° 15′ E. long.), a post town, parcel-post, money-order office, savings bank and telegraph station, 34 miles NW. of Hobart, on the main road to Bothwell, communication with which is by coach. It is a railway station on the Brighton and Apsley line. Hotel: Melton Mowbray. Congregational place of worship and State school. It is in the county of Monmouth, municipality of Green Ponds, and electorate of Brighton. Agricultural district.

MIDDLETON (LONG BAY) (43° 14′ S. lat., 147° 18′ E. long.), a township 28 miles S. from Hobart, in the county of Buckingham, and police and electoral district of Kingborough, situated on the western shores of D'Entrecasteaux Channel. Post-office, parcel-post, and telegraph office. Daily steam communication (fares, 3s. 9d. single, 5s. 3d. return). Fruit-growing district. Population estimated at 100.

MILLBROOK, post town, with telephone station, Cornwall county, 75 miles E. from Launceston. Close to Mount Nicholas siding on Fingal line. Mining township.

MOLE CREEK, post town, with parcel-post, money-order and savings bank office, Westmoreland county, 62 miles from Launceston and 15 miles from Deloraine railway station. A train leaves Deloraine for Chudleigh Junction and Mole Creek at 7.35 P.M., arriving at 8.30. Coach daily to meet other trains. Wesleyan church and State school. Agricultural district.

MONTAGU RIVER, post town, with telegraph office, Wellington county, 166 miles W. from Launceston (*viâ* Stanley). Communication by steamer or coach. Anglican church and State school here. Agricultural district. Population of district, 400.

MONTEZUMA, post town, with telegraph, in Mount Lyell district. Mining centre. Steamer communication with Strahan. Population 200.

MOONAH, or SOUTH GLENORCHY, 5 miles from Hobart. (*See* GLENORCHY.)

MOORINA (KRUSHKA'S BRIDGE) (41° 19′ S. lat., 147° 59′ E. long.), a post-town, with parcel post, money-order, telegraph office and savings bank, in the county of Dorset, electorate of Ringarooma and police district of Selby on the Upper Ringarooma, 180 miles N. from Hobart, 70 miles NE. from Launceston, and 27 from Scottsdale railway station. State school and large hall, fitted with stage appliances. The hall is used for occasional church services. One hotel, the Esplanade. Local race club holds annual meet. Court of Petty Sessions is held. There is coach communication with Derby, 3s.; Weldborough, 3s.; Gladstone, 6s.; George's Bay, 12s. 6d.; Scottsdale, 9s.; Pioneer, 2s. 6d.; Gould's Country (Lottah), 5s. Train communication from Scottsdale to Hobart. It is an important tin-mining centre; gold also has been found. The geological formation is granite and basalt. Good water supply from springs. Mining, agricultural and pastoral pursuits are followed; the land is fertile, and the climate is splendid. Fruit grows here to perfection. Population of town (census 1891), 150; June, 1900, on entire mining field, about 200 Europeans and 130 Chinese.

MORIARTY ROAD, post-town with telegraph, 80 miles W. from Launceston and 5 miles from Latrobe railway station. Anglican and Wesleyan churches and State school here. Agricultural district.

MOUNTAIN RIVER, post-town, Buckingham county, 24 miles N. of Hobart. Daily coach communication (fare, 10s. return). Anglican, Wesleyan and Congregational churches here and State school. Agricultural district.

MOUNT BISCHOFF (WARATAH) (41° 27′ S. lat. 145° 32′ E. long.), a post-town, with parcel-post, Government Savings Bank, telegraph station, and money-order office, about 60 miles W. in a direct line from Launceston (142 postal), 160 miles NW. from Hobart, and 47 NW. of Emu Bay in the county of Russell, electorate of Wellington and police district of Emu Bay. Owing to the extensive tin mines here this township is now the fourth in the island. Mount Bischoff takes its name from Mr. James Bischoff, chairman of the Van Diemen's Land Company in 1828. Notwithstanding its prominent position, it has as yet no exit coastways by any public road, its only means of egress having been by the Van Diemen's Land Company's tramway, until 16th July, 1884, when this was converted into a railway. An extension to Zeehan, nearly

finished, will complete railway extension between Emu Bay and Strahan. There are fairly good roads as far as Heazlewood and tracks to Corinna and Whyte River, and Zeehan. From Zeehan railway communication connects with Macquarie Harbour (Strahan), on the West Coast, whence there is steam communication almost daily with Hobart. Mount Bischoff can be reached per the Ulverstone railway station *viâ* Emu Bay (48 miles), with which latter place it is connected by the Emu Bay and Mount Bischoff Railway; fares from Emu Bay 15s. and 12s. 6d.; freight £3 per ton. Through fares to Hobart £3 9s. 6d. and £2 9s. 11d. A coach runs to Heazlewood. In the neighbourhood are the celebrated tin mines. Waratah, the township, at the foot of the Mount, is situated on both sides of the Waratah River (a tributary of the Arthur), which is crossed by a good bridge. It has two hotels, the Waratah and Bischoff. Church of England, Roman Catholic, and Wesleyan places of worship, a public school, also private school, Mount Bischoff Provident Hospital, a branch of the National Bank of Tasmania, a mechanics' institute, with library of 1,900 volumes, and an Oddfellows' Hall. Hotels: Waratah and Bischoff. The Mount Bischoff Race Club holds an annual meet. There is also a large well-appointed public hall. A court of Petty Sessions is held here. The Mount Bischoff Provident Hospital is managed by a Committee annually elected, and is supported by subscriptions and donations, supplemented by Government subsidy. A visiting magistrate presides at the Courts of Request, and Petty Sessions are also held. The Mount Bischoff mine is the richest tin mine in the world. The Mount is largely composed of tin ore in a wash dirt of clayey nature, which is all crushed and the concentrates conveyed to the dressing sheds near the township of Waratah by a line of railway over one mile long, worked by a locomotive. All the batteries and other machinery for dressing the ore at the sheds are worked by water-power, the river where the sheds are erected having a fall of 127 feet. The sheds are erected at various levels, so that the water is used four times in succession. Much of the machinery is automatic. The various parts of the works are connected by telephone; and the dressing sheds, offices, stores and manager's residence are lit by the electric light. The Company employ nearly 300 hands. The tin is smelted in Launceston, where the Company have six smelting furnaces. The Mount Bischoff Company is amalgamated with the Stanhope Company. Gold, silver, and bismuth are found in the district. The West Bischoff is another prominent mine. The Waratah Road Trust, levying local rates, supplemented by Government grant, have 20 miles of macadam sed road and streets and 84 miles of bush roads under their care, and are doing good work. Rate valuation, £7,500. Geological formation, slate, sandstone, porphyry and basaltic. Land here is very fertile, and the beautifully variegated foliage decking the mountain sides is one of the many grand sights of inland scenery. Population, June 30th, 1900, about 2,200.

MOUNT CAMERON. *See* GLADSTONE.

MOUNT DIRECTION (*see* DILSTON), post-town, 9 miles N. of Launceston. Anglican church here. Daily steamboat communication.

MOUNT FARRELL postal town with money-order and telephone office. Rising mining centre, on Mackintosh River. Western mining district.

MOUNT HEEMSKIRK. *See* HEEMSKIRK.

MOUNT READ. post-office, postal, money-order and savings bank, and telephone service. About 1½ mile from Williamsford. One hotel and two stores. Rapidly expanding mining locality. Mount Reid, Hercules, and other important mines here. Population about 160.

MOUNT SEYMOUR, post-town, with parcel-post, Monmouth county, 60 miles N. from Hobart and 4 miles from Parattah railway station. State school here. Agricultural district.

MOUNT VICTORIA (See PIONEER).

MOUNT NICHOLAS, coal-mining district, county of Cornwall. Railway station on Fingal line. Post-town, with parcel-post. State school. Population about 140.

MYRTLE BANK, post-town, Dorset county, 23 miles E. of Launceston, and 11 miles from Lisle railway station. State school. Agricultural district.

NEEDLES post town, with telegraph office and parcel post, in the county of Devon, rural municipality of Deloraine. Railway station. Small agricultural centre.

NEWNHAM, post-town, with parcel-post, Dorset county, 3 miles from Launceston. Frequent coach communication. Wesleyan church, State school, race-course, hotel and stores.

NEW NORFOLK (42° 46 S. lat., 197° 5′ E. long.), formerly called ELIZABETH TOWN, is in the county of Buckingham, and municipality and electoral district of New Norfolk, lying 21 miles NW. of Hobart, and 130 miles S. of Launceston, on the right bank of the Derwent at junction of Lachlan river. It is a post, parcel-post, telegraph, savings bank and money-order station, and is connected with Hobart by telephone. A bridge, erected at a cost of £5,000, was opened in June, 1880, total length 610 feet, in spans of 40 feet each, width of roadway 18 feet. It has railway connection with Hobart, and the Derwent Valley Railway has been extended northward to Glenora. There is daily coach communication with the Ouse. A steamer from Hobart plies on the river four days a week, calling at Old Beach and Bridgewater; fare, 3s. Chief hotels: the Bush, the Star and Garter and Leathams; there are two others. There is an Episcopal place of worship, St. Matthew's, with peal of bells; Roman Catholic church, St. Peter's and Wesleyan chapel, a public school, a lunatic asylum, capable of accommodating 400 patients, with ample space and every facility for classification, upon plans approved of by Drs. Manning, Paterson, and Dick, specialists in psychology. A public library with 3,800 volumes, Oddfellows' and Protestant Alliance lodges. Courts of Petty and General Sessions are held monthly. The salmon ponds are at Redlands, about six miles distant. Conveyances can be hired from the hotels. It is a great hop and fruit-growing district, and the scenery, particularly along the river, is very striking. Myrtle Falls, 7 miles, is a place of much interest. Russell Falls, 18 miles, also a favourite resort. Coal is found in the vicinity of the River Plenty. The rural municipality (proclaimed February 13, 1863) has an area of 248,000 acres, the annual ratable value of property being £18,152. Road Trust valuation, £6,325; capital value of district £289,167. This district was principally peopled in 1808 by settlers from Norfolk Island, who were transferred thence under imperative orders from the Home Government. Agricultural returns to March 1, 1900, were 84,340 acres worked; wheat, 1,024 acres; barley, 172 acres; oats, 896 acres; peas, 321 acres; potatoes, 312 acres; hay, 2,317 acres; hops, 402 acres; gardens and orchards, 292 acres. Produce: wheat, 9,236 bushels; barley, 1,548 bushels; oats, 5,160 bushels; peas, 2,723 bushels: potatoes, 658 tons: mangolds, 1,400 tons: hay, 1,444 tons; hops, 408.834 lbs.; apples, 132,207 bushels; pears, 4,609 bushels. Stock: horses, 675: cattle, 2,927; sheep, 18,314; pigs, 2,055. Population (census 1891), 1,072; of district 4,253. (30th June, 1900, 4,700.)

NEWTOWN (42° 57′ S. lat., 147° 21′ E. long.), in the county of Buckingham, electorate of Glenorchy, and 1½ miles N. of Hobart, is so connected by buildings as to constitute a suburb of that city. Electric tramway communication with Hobart; fare, 3d. It contains the Institution for Male and Female Paupers, in which there is accommodation for 450 males and 170 females, also Boys' Reformatory. There is a State school and private schools. Church of England (St. John's), Roman Catholic (Church of the Sacred Heart), Wesleyan, and Independent places of worship, post office, parcel-post, money-order, savings bank and telegraph office. The Templars' Hall is a convenient place for public meetings and local entertainments. There is a Town Board Hall, public library and Mutual Improvement Association. The Cornelian Bay public cemetery for Hobart is in the vicinity. Improvements are controlled by a Town Board. Property in this locality commands an increasing market value. Capital value, £801,141; annual value, with Queenborough, £48,271. Agriculture returns to March, 1, 1900, were 2,714 acres worked, including 372 acres in gardens and orchards. Produce: wheat, 150 bushels; barley, 264 bushels; peas, 260 bushels; potatoes, 30 tons; mangolds, 240 tons; apples, 9,371 bushels; pears, 1,659 bushels. Stock: horses, 322; cattle, 433; sheep, 130; pigs, 194. Population, including the inmates of the charitable institutions (census 1891), 2,288, now 3,000.

NINE-MILE SPRINGS. *See* LEFROY.

NORFOLK BAY. *See* TARANNA.

NORTHDOWN (41° 10′ S. lat., 146° 32′ E long.), a post town with money-order office, savings bank and a public school, in the county of Devon, electorate of East Devon, and police district of Port Sorell, on the road from Port Sorell to Port Frederick, about 4 miles distant from the former place, 6 miles from Latrobe, and 83 miles NW. of Launceston. There is daily communication with Latrobe by mail conveyance. It has two places of worship—Anglican and Wesleyan. The scenery seawards is very fine, and the place has attractions as a healthful resort.

NORTH MOTTON, post-town with telegraph, Devon county, 100 miles S. of Launceston, and 18 miles from Devonport railway station. Anglican and Primitive Methodist churches and State school. Agricultural district.

NUBEENA (43° 5′ S. lat., 147° 47′ E. long.), post town, with telephone (Tasman's Peninsula), Pembroke county, 25 miles E. of Hobart. State school here. One boarding house. Two churches, Independent and Christian. Geological formation; chiefly sandstone. Population 180. Agricultural and pastoral district.

NUGENT, post-town, Pembroke county, 45 miles from Hobart. Coach transit *viâ* Sorell. State school. Agricultural district.

OATLANDS (42° 18′ S. lat., 147° 25′ E. long.), a township, with post-office, parcel-post, savings bank, money-order office and telegraph station, in the counties of Somerset and Monmouth, and municipal and electoral district of the name it bears, on the main road between Hobart and Launceston, close to Lake Dulverton. It is distant from the former place about 50 miles N. (by rail 55½), from Launceston 70 miles S. It lies very high, being 1,400 feet above the level of the sea. The Main Line Railway is some little distance from the town (4½ miles), fares, 12s. and 8s. A short line also connects the township with the Main Line Station at Parattah. In the summer a well-appointed conveyance runs to the Lakes, a popular place of resort for visitors. Good accommodation there. There are three hotels; the Oatlands, Baileys, and the Kentish, with public rooms attached to each. Midlands Jockey Club holds one meeting annually. St. Peter's, (Episcopal), Presbyterian church, and St. Paul's (Roman Catholic) are the places of worship; the Wesleyans have a preaching station. There is a public school, and a commodious town-hall in High Street, with a concert-room attached; public library with 1,000 volumes. Courts of Petty and General Sessions are held here, and sittings of the Supreme Court. One bank, the Commercial. I.O.R. and I.O.O.F. lodges. The district is governed by a municipal council. Area of municipality (proclaimed 29th November, 1861), 400,000 acres, annual

value of ratable property, £31,149. Road Trust valuation, £12,183. Capital value of district, £750,440. Extent of roads and streets, 80 miles. Agricultural and pastoral. Agricultural returns to March, 1900, were 347,767 acres worked; wheat, 2,685 acres; barley, 82 acres; oats, 3,506 acres; peas, 231 acres; turnips, 305 acres; potatoes, 407 acres; hay, 2,155 acres. Produce: wheat, 34,905 bushels; barley, 984 bushels; oats, 73,626 bushels; peas, 2,772 bushels; turnips, 2,440 tons; potatoes, 1,628 tons; hay, 1,896 tons. Stock: horses, 1,093; cattle, 5,916; sheep, 167,829; pigs, 2,355. Population, 700; district (census 1891), 3,330. (30th June, 1900, 3,300.)

OLD BEACH, post-town, rural municipality of Brighton, county of Monmouth, near Bridgewater on Derwent River, 12 miles from Hobart. State school. Cricket club. Population about 100. Agricultural district.

ORFORD, post town, parcel-post and telephone station. Small sea coast town on East Coast facing Prosser's Bay and on the Prosser's river, 12 miles from Buckland, 34 miles from Campania. State school. Agricultural district. District noted for freestone quarries. Good fishing here. Population 100.

OUSE (42° 30′ S. lat., 146° 45′ E. long.), a post, parcel-post, money-order, savings bank and telegraph station, in the county and electorate of Cumberland, and municipality of Hamilton, 54 miles from Hobart NW., on the river Ouse. Place of worship (St. John's, Episcopal), a public school, two inns—the Bridge and Lachlan, and a Rechabite Hall. Population 150.

OYSTER COVE (Kettering), post town and telegraph station on right bank of Derwent river, 22 miles from Hobart, county of Buckingham, parish of Coningham. Centre of agricultural and fruit growing district. Communication by steamer and road. Good fishing and boating grounds. One hotel, one State school, one church building, used by all denominations, a public hall, headquarters of Channel Rifle club. The place is noted as being the last home and burial place of Tasmanian Aborigines. The chief local industries are farming, fruit growing, wine making, brick making and timber cutting. Population of town and immediate district about 450.

PARATTAH, post-town, with parcel-post and telegraph office. Monmouth county. Station on Main line railway; stopping-place for all trains. Fifty-five miles from Hobart (fares 12s. and 8s.), and 78 from Launceston (fares 18s., and 12s.). One hotel, specially built for railway travellers. Presbyterian church and State school.

PATEENA, post-town in Cornwall county, 3 miles from Longford on the Western line. Union church and State school here. Agricultural district.

PATERSONIA (41° 18′ S. lat., 147° 21′ E. long.), a post town in the county of Dorset, electorate and police district of Selby, about 15 miles NE. of Launceston, on the creek of the same name, and the main road to the Mount Cameron tin mines. There is a Wesleyan chapel and State school here. It is an agricultural centre. Geological formation, diversified, sandstone, slate and basalt. Road Trust valuation, £3,000.

PENGUIN (41° 7′ S. lat., 146° 6′ E. long.), a seaport town with post, parcel-post, money-order office, savings bank, telegraph station and custom house, on the creek of the same name, and the main road from Deloraine to Circular Head, in the county of Devon, electorate of West Devon, and police district of West Devon. It is 210 miles N. from Hobart, 81 miles W. from Launceston, and 20 miles west of Devonport. Penguin has two hotels, the Neptune and the Penguin, and several private boarding establishments, a town hall, a public school, and several stores. Church of England, Catholic Church (Pine Road), Methodist Free Church, Primitive Methodist and Presbyterian places of worship. Rechabite and Druids' lodges and working man's club, public library and reading room. Improvement association. Banks: Bank of Australasia and Commercial Bank of Tasmania. Court of Requests held here. The local Horticultural Society flourishes. Railway communication with Launceston and Hobart, also with Emu Bay and West coast mining districts. The harbour is protected by a breakwater. The Penguin district possesses a considerable area of first-class agricultural land, which is in the hands of an excellent class of yeoman farmers. It boasts of an agricultural association, and an annual show of farm and dairy produce is held. It is a favourite sanatorium much favoured by visitors from the Australian colonies. Good fishing river and sea. Good roads and a tramway permit excursions to many beautiful woodland resorts. Also to the iron mines. Silver lead and copper found in the vicinity, but the mines are not yet developed. Iron ore is shipped to Sydney. Geological formation: lower silurian. Ratable value of district, £22,906. Agricultural returns for West Devon to March 1st, 1900:—Acres worked 73,871; wheat, 1,785; oats, 5,210; potatoes, 5,435; gardens and orchards, 344. Produce: wheat, 37,485 bushels; oats, 167,930 bushels; barley, 980 bushels; potatoes, 21,196 tons; apples, 4,427 bushels; pears, 490 bushels. Stock: horses, 1,915; cattle, 8,894; sheep, 8,527; pigs, 5,771. Population, June, 1900: town, 650; district, about 2,500.

PERTH (41° 34′ S. lat., 147° 14′ E. long.), a village, with money-order office, parcel-post, savings bank and telegraph and railway station, on the Launceston and Western Railway, 11 miles S. from Launceston (by rail 14¾); fares, 2s. 9d. and 2s.; and 112 miles N. from Hobart. It is situated in the county of Cornwall, electoral district and municipality of Longford, on the west bank of the South Esk river, which at this point is crossed by a fine stone bridge of eight arches. The places of worship are St. Andrew's Episcopal Church, Wesleyan and Baptist church; other prominent buildings are the Temperance Hall, the Victoria Hall and reading-room, and the State school. Rechabite Lodge of about 45 members. The Queen's Head is the only hotel. Water is obtained from the South Esk. Tourists will find good fishing on the river and shooting in the neighbourhood. Scone estate is one of the famed stud sheep breeding estates of the colony. Road Trust valuation, £6,500. District pastoral and agricultural. Geological formation: carboniferous. Population (census 1891), 517; now, 650; police district, 1,150.

PIEMAN RIVER. *See* Corinna River.

PILLINGER, post town, in vicinity of Strahan, Macquarie Harbour. Mining centre. Population about 75. Steam communication with Strahan.

PINE CREEK (41° 34′ S. lat., 145° 6′ E. long.), a mining locality, on the banks of this creek, which rises in the Meredith range and flows into the Pieman River (on the southern side of the county of Russell). There are valuable tin deposits, samples of which have assayed from 64 to 71 per cent. of metal.

PIONEER. A mining town with post-office and telegraph station in the Mount Victoria district, 75 miles east from Launceston, on the Ringarooma River. Tin mining fast expanding here. Daily coach communication with Scottsdale, Gladstone, and Moorina. Principal hotel, the Pioneer. Local race club holds annual meet. A small hall available for entertainments or church services. Population of town, 150: of district, 600.

PIPER RIVER, LOWER (41° 2′ S. lat., 147° 6′ E. long.), a post-town, with parcel-post to Turner's Marsh, money-order, telegraph and savings bank office, in the county of Dorset and police district and electorate of Georgetown, situated about 21 miles from Georgetown, and 35 miles NW. of Launceston. The river itself debouches into Bass's Straits, near the township of Weymouth, flowing nearly due north a distance of about 30 miles. Extensive slate deposits have been found on its banks. Agricultural settlement is progressing. That portion of the district known as Turner's Marsh is served by a station on the Scottsdale line. Deposits of kaolin have been found near the railway line in the Piper Valley.

PITTWATER. *See* Sorell.

PLENTY, post town, with telegraph, money-order, savings bank and parcel post office, county of Buckingham, rural municipality of New Norfolk. State school. A railway station on the Derwent Valley line, near the New Norfolk salmon ponds. A favourite resort of tourists.

POIEMENA. *See* Blue Tier.

PONTVILLE (42° 40′ S. lat., 147° 12′ E. long.), county of Monmouth, electorate and municipality of Brighton, is 17 miles N. of Hobart, and 115 miles S. of Launceston, on the main road between those places and the river Jordan. The communication with the capital is by the Apsley line connecting with the Main Line Railway, Brighton station, distant 1 mile. A coach runs to Bothwell and Green Ponds. Fares 7s. 6d. and 3s. 6d. Hotels: the Epsom, Bridge, and Crown. There is a post office, parcel post, telegraph station, money-order and savings bank office. St. Mark's is the Episcopal church; there are chapels also belonging to the Congregationalists and Wesleyans, a Roman Catholic church (St. Matthew's), and a public school. Three of the churches are built of white freestone from quarries in the neighbourhood. Court of Petty and General Sessions is held here. Water is obtained from the Jordan river. Geological formation, quartziferous sandstone and volcanic tufa. Climate, dry, bracing and healthy. Population (census 1891), 172; of district, 2,111; now 2,400.

PORT ARTHUR. *See* Carnarvon.

PORT CYGNET. *See* Lovett.

PORT ESPERANCE (43° 20′ S. lat., 147° 0′ E. long.), which comprises the township of Dover and the neighbourhood, is a fine harbour on the east coast of county Kent, to the southward of the island, 52 miles from Hobart. It is in the police and electoral district of Franklin, and has a post-office, parcel-post, money-order office, savings bank, and telegraph station, and also public school, four places of worship, an hotel—the Dover, and a public reading-room with library of 1,200 vols., and a building called the Albert Hall, suited for meetings and public entertainments. Courts of Petty Sessions and Requests held periodically. Much fine timber grows in the district, giving employment to five saw-mills. The district is named after the vessel commanded by Captain Huon, Kermandee (1793). The bay is very picturesque. Near its entrance are three islands, named respectively Faith, Hope, and Charity, the largest of them—Hope—having an area of about 65 acres. There is regular steamboat communication with Hobart and river ports. Distance, 42 miles. Fare, 9s. return. The township (Dover), formerly known as "The Station," has not many inhabitants, and is situated on the north bank of the bay, Folkestone, another small township, being on the south bank. Chief industry, timber cutting. Soil well adapted for fruit-growing. There are in the townships and neighbourhood about 700 residents.

PREMAYDENA. *See* Impression Bay.

PYENGANA, post town, with telephone to Gould's Country. Mining centre, county of Dorset, electorate of Fingal. Population about 200.

QUEENBOROUGH (Sandy Bay) (42° 25′ S. lat., 147° 20′ E. long.), a post-town, with parcel-post, money-order and telegraph office, and savings bank, suburb of Hobart, about 2 miles distant S. It is the county of Buckingham and electorate of Kingborough, and under control of a Town Board. An electric tram connects with Hobart. There are four hotels, the chief being the Travellers' Rest and Clarendon. A well laid out cemetery is here, in the hands of a private company; also a public school, two places of worship, St. Stephen's, Anglican, and a Free Methodist Mission Hall, and some small factories. There is a Magdalen Home and Convent of the Good

Shepherd. Many private residences ornament this charming suburb. Mount Nelson, 1,195 feet high, signal station for shipping, is within easy distance. The summit affords splendid views of Hobart, River Derwent, islands and lighthouse. Ratable value of Queenborough and New Town, £48,950. Town Board valuation, £10,500. Agricultural returns to March 1st, 1900, were 15,044 acres worked, including 284 acres in gardens and orchards, and 351 in permanent pasture. Produce: apples, 3,859 bushels; pears, 1,314½bushels; peas, 220 bushels; potatoes, 174 tons; hay, 187 tons. Stock: horses, 287; cattle, 1,210; sheep, 10; pigs, 475. Population, Upper Sandy Bay, 1,800; Lower Sandy Bay, 550; of district (census 1891), 2,750; June, 1900, 3,750.

QUEENSTOWN.—Post town, with money-order, telegraph, parcels post, and savings bank office, on the Queen river, 23 miles from Strahan. Electoral district of Lyell (for Assembly) and Gordon (Legislative Council), and county of Montagu; municipal district of Macquarie. Terminus of the Mount Lyell Mining Company's Railway, connecting with Strahan, thence by steamer to Hobart, or by rail overland route *via* Zeehan and Launceston. Ten hotels, National Bank of Tasmania and Bank of Australasia, town board, Anglican, Roman Catholic, Presbyterian, Wesleyan, and Plymouth Brethren churches, State school, Presentation Convent school, cottage hospital. Water supply by pipes. Points of interest: Hunter's Falls, King River Gorge, Abt railway, on Mount Lyell line. Smelting works, mines, etc. The natural scenery, mountain, wood, and fell is very grand. Queenstown is the centre of Mount Lyell Smelting works. Brickmaking, saw-milling, and kindred industries progress. Population: town, 7,500, district, 12,000. Geological formation: schistose conglomerate and sandstone. Daily newspaper: *The Mount Lyell Standard*. Social Institutions: Masonic lodge, M.U. and I.O.O.F.: lodges of Oddfellows, Druids. Australian Miners' Association Branch. Recreation ground and four halls.

RAILTON (41° 15′ S. lat., 146° 25′ E. long.), a postal centre telegraph and railway station, with parcel-post, money-order office and savings bank, in the county of Devon, East Devon electorate, and Mersey police district, on the Red Water Creek, about 15 miles from Devonport, 8 miles from Latrobe, 67 miles NW. of Launceston, and 206 miles N. of Hobart; fares, 13s. 9d. and 9s. 2d. A coach meets every train, carrying passengers to and from Kentishbury and Sheffield. One hotel, East's. There are Church of England, Roman Catholic, and Wesleyan places of worship here. Also a State school and Board of Agriculture. Railton Jockey Club holds an annual meet. Good scenery throughout surrounding country and several beautiful water-falls. One saw-mill and lime works find profitable employment. Farming and grazing and coal mining district. The staple crop is potatoes. Good fruit is also grown. Railton is the centre for Kentish, Paradise, Beulah, and Promised Land, agricultural districts. Good shooting and fishing in season. Good scenery, &c. Road Trust valuation, £2,960. Population (census 1891), 265, now 400.

RAMINEA, post town, Kent county, 3 miles from Port Esperance, and 45 from Hobart. The Raminea saw-mills give employment to a small population. State school here.

RAMSGATE, post town, with telephone office, and small port south of the D'Entrecasteaux Channel, near Recherché Bay, Kent County. Timber and fishing industry. Population (census 1891), 134; June, 1900, 300.

RECHERCHE BAY, post town, with telegraph office, Kent county; 57 miles from Hobart. Congregational church and State school here. Timber producing district.

REMINE. *See* TRIAL HARBOUR.

RHYNDASTON, post town, with parcel-post and telegraph office, Monmouth county. Station on Main Line Railway; 46 miles from Hobart. Fares, 10s. and 6s. One hotel: the Tunnel. State school. Agricultural district.

RICHMOND (42° 44′ S. lat., 147° 29′ E. long.), a township in the county of Monmouth, electorate and municipality of Richmond, pleasantly situated on the banks of the Coal river, here spanned by a substantial stone bridge of six arches, about 14 miles distant from Hobart NE., and 136 miles from Launceston. A coach runs to (Bellerive) Hobart daily; and carriers leave and arrive every day; the nearest railway station is at Campania, 5 miles distant. A conveyance meets the trains. The most picturesque route from Hobart to Richmond is *viâ* Risdon and Grasstree Hill. Two hotels, the Bridge Inn and Railway, both good country hostelries. The Episcopalians, Congregationalists, and the Roman Catholics have each a place of worship, the first-named being dedicated to St. Luke, the Catholic to St. John. There is a State school, four private schools, and library of 1,500 vols. It has a post and money-order office, parcel-post, savings bank, and telegraph station. Council chambers, and gaol, and is a place of Petty and General Sessions. An Oddfellows' Lodge is established here. Also race club. The rural municipality, proclaimed 10th June, 1861, has an area of 137,078 acres; yearly value of ratable property, £11,631; capital value of district, £267,180. Road Trust valuation £7,000. A considerable breadth of land is under cultivation, principally for the cereals and wheat crops. Anthracite coal is found on the west bank of the Coal River. There is good shooting and fishing, and pleasant bush scenery for tourists. Agricultural returns to March 1, 1900, were 105,897 acres worked; wheat, 3,021 acres; barley, 255 acres; oats, 1,200 acres; peas, 387 acres; potatoes, 359 acres; hay, 890 acres. Produce: wheat, 54,578 bushels; barley, 5,610 bushels; oats, 27,600 bushels; peas, 5,031 bushels; potatoes, 1,077 tons; apples, 609 bushels; pears, 15 bushels; hops, 2,940 lbs. Stock: horses, 594; cattle, 1,977; sheep, 35,897; pigs, 1,303. Population (census 1891), 360; of district 561; 30th June, 1900 2 590.

RINGAROOMA (UPPER) (40° 53′ S. lat., 147° 57′ E. long.), a post town, with parcel-post, money-order office, savings bank, and telegraph station, in the county of Dorset, and electorate of Ringarooma, 193 miles from Hobart, 49 miles from Launceston NE., and 15 miles from Scottsdale railway station. Public library of 400 vols. Town Hall, Anglican, Catholic, Presbyterian, Wesleyan and Congregational churches, public and private schools. It is a place of Quarter Sessions, Petty Sessions, and Court of Requests, and has a public and also a private school, Board of Health, public library, Fruit Board, Masonic and Oddfellows' lodges, Mechanics' institute and racing club; Ringarooma is the most important of the North-eastern tin-fields, and gold is also found in payable quantities at Mount Victoria, 5 miles distant. Alluvial gold is being got at New River Settlement, 4 miles distant. Also at Mount Horror, where reefing machinery has been erected. Good alluvial ground also exists here. The stanniferous district is of large extent, running the entire length of the river and into the neighbouring mountainous country, which consists of the lowest quality of pastoral land, overgrown with musk, blackwood, myrtle, laurel, and dogwood. The geological formation is of basalt and granite, and the district is noted for its excellent agricultural land, the basaltic soil forming it being amongst the richest in the country. Pastoral pursuits are also followed. This place may be reached by train to Scottsdale, and thence by coach; coach fare, 3s. 9d. Also by train to St. Mary's and thence by coach, St. Helen's *viâ* George's Bay, Moorina, and Derby (Brothers' Home). Railway routes have been surveyed to Branxholm, Derby (Brothers' Home) and Moorina. One hotel, and another at Ringarooma Road. It is an agricultural and pastoral district, and orchard planting has proved successful. Population of town (census 1891), 117; of district, 4,783; 30th June, 1900, 750. In this district is the celebrated Krushka Brothers' Home Claim, consisting of one 80-acre section, which has been profitably worked by the proprietors, the Messrs. Krushka, for many years. Also the Brothers' Home No. 1, The Mount Cameron water-supply much benefits this district. Ringarooma (Lower) or Boobyalla, as it is now designated, is situated at the mouth of the Ringarooma river, facing Ringarooma Bay, 40 miles from Ringarooma. It is the shipping place for all tin raised in the Mount Cameron, Wyniford River and Moorina districts. Steamers ply regularly to and from Launceston; fare, 20s. Good trout fishing in Ringarooma river. Ratable value of property £18,123; Road Trust valuation, £5,500; capital value of district, £383,058. Agricultural returns to March 1, 1900, were 202,398 acres worked; wheat, 317 acres; barley, 43 acres: oats, 662 acres; peas, 225 acres; potatoes, 738 acres; gardens and orchards, 272 acres; permanent grass, 37,147 acres. Produce: wheat, 5,389 bushels; barley, 1,075 bushels; oats, 15,888 bushels; peas, 2,250 bushels; turnips, 1,056 tons; potatoes, 2,214 tons; apples, 4,883 bushels; pears, 110 bushels. Stock: horses, 1,204; cattle, 11,337; sheep, 26,696; pigs, 3,636.

RINGVILLE, postal centre, with parcel post, money-order, and telephone office, 15 miles by rail from Zeehan. Good alluvial gold obtained in Ring River valley. One hotel and two stores. Centre of Curtin Davis group of mines, and within half a mile of Montezuma railway station and Montezuma Falls. Population about 100.

RIVER PLENTY, post-town, with parcel-post, money-order office, Buckingham county, 26 miles from Hobart. Government salmon ponds here, and can be easily reached by conveyance from New Norfolk, or by track from Plenty station on Derwent Valley line.

ROKEBY (CLARENCE PLAINS) (42° 54′ S. lat., 147° 30′ E. long.), pleasantly placed on the shores of Ralph's Bay, in the county of Monmouth (municipality of Clarence and electorate of Sorell), is 7 miles E. of Hobart, 5 miles from Bellerive, and 127 miles from Launceston. It has post-office, parcel-post, and telephone station. Hotel: Horse and Jockey. There is an Episcopal (St. Mark's) and Congregational chapel and a public school. In the cemetery lies buried the Rev. Mr. Knopwood, the chaplain to Collins's expedition, who died here on 18th September, 1838. Annual value of property in Clarence municipality, £7,321; capital value of district, £265,918; Road Trust, £3,500. Agricultural returns to March 1, 1900, were 52,371 acres worked: wheat, 1,693 acres; oats, 230 acres; potatoes, 178 acres; hay, 1,462 acres; gardens and orchards, 397 acres. Population of municipality (census 1891), 1,063; June, 1900, 1,350.

ROSEVEARS, post-town, with parcel-post and telegraph office, Devon county, 11 miles from Launceston, on Tamar river. Anglican and Wesleyan churches. Agricultural and pastoral district. A favourite place of resort for bicyclists from Launceston. Melbourne steamers stop here waiting for tide.

ROSS (42° 3′ S. lat., 147° 32′ E. long.), a small but pleasant township in the county of Somerset, electorate of Campbell-town, and municipality of Ross, 73 miles (83 by rail) N. of Hobart, and 48 miles SE. from Launceston. It is on the Macquarie River (which is spanned by a freestone bridge), in the centre of rich and fertile plains of considerable extent. The Main Line Railway has a station here. There are two trains daily; fares from Hobart, 19s. and 12s. 9d. A mail conveyance runs to Longford, *viâ* Macquarie River, three times a week, returning on alternate days. There is also a tri-weekly mail to Auburn, and bi-weekly to Trefusis. Hotel: the Ross. Numerous stores. Town lit with kerosene. There is a large stone-built town-hall, comprising reading-room and library; places of worship belonging to the Episcopalians (St. John's, said to be one of the handsomest country churches in the colony) and Wesleyans (a fine building of freestone). Public school. Ross has a post-office, parcel-post, money-order office, savings bank, telegraph station and Council Chambers. It is a place of Petty and Quarter Sessions. Its building stone is celebrated for its quality

and white colour. Superior grindstones are made here. Water is supplied from the Tooms Lake and artificial reservoir, about 30 miles SE. of Ross. The lakes Sorell and Crescent are 25 miles from Ross, an excellent road extending thereto. The rural municipality of Ross (proclaimed Dec. 26, 1862) has an area of 178,000 acres, yearly value of ratable property being £12,496; capital value of district, £294,119. Road Trust valuation, £11,687. Extent of roads and streets, 90 miles. Pastoral district. Agricultural returns to March 31, 1900, were 156,458 acres worked; wheat, 86 acres; oats, 92 acres, hay, 294 acres. Produce: wheat, 1,204 bushels; oats, 2,300 bushels; barley, 315 bushels; hay, 199 tons; peas, 120 bushels. Stock: horses, 206; cattle, 1,381; sheep, 70,007; pigs, 126. Population (census 1891), 389; of district, 2,695. June, 1900, about 3,000.

ROYERINE. *See* CORINNA.

ST. HELEN (GEORGE BAY) (41° 21′ S. lat., 148° 15′ E. long.), a watering-place of summer resort, at the head of a land-locked harbour, on the east coast, in the county of Cornwall, electoral district of Fingal, and police district of Portland, 140 miles from Hobart, and 120 from Launceston. There is good accommodation for visitors, and abundance of fishing, boating, and shooting. Hotels: Telegraph, and Union. Anglican, Roman Catholic and Wesleyan churches, one public and two private schools, post office, parcel post, money-order office, savings bank, telegraph station; public library and reading-room; Odd Fellows' Lodge, court-house, gaol and public buildings; branch of Commercial Bank here. It is reached by coach from St. Mary's (fare, 7s. 6d., return 12s. 6d.), the terminus of the Fingal branch connecting at the Corners with the Main Line Railway. A coach also runs *viâ* Gould's country, Lottah, Weldborough, Moorina, and Derby to Scottsdale, terminus of Launceston and Scottsdale Railway. A steamer trades every alternate week to Hobart or Launceston. Petty and General Sessions and Court of Requests are held here. There is also a resident Commissioner of Supreme Courts of Tasmania, Victoria, and New South Wales. Much tin ore from the Blue Tier and Thomas Plain district is shipped here. From this place to Eddystone Point, where a massive stone lighthouse has been erected, is one of the best excursions on the Tasmanian coast, the scenery being much diversified. Fine scenery on road between Lottah and Weldborough, the road reaching an altitude of 2,000 feet above sea level. St. Helen's is unsurpassed as a summer resort for seaside visitors. St. Mary's Pass and Columba Falls at George's River, and Diana's Basin, Scamander River, are places of special interest. At the latter place there is good boarding accommodation. Geological formation, granite overlying schists, which lead up to gold-bearing formation at Mathinna, 20 miles SW. To the south of St. Helen's the formation is mainly Lower Silurian, containing silver-bearing ores at Scamander. Principal industries: mining, dairying, farming, and fish canning. Capital value of district, £65,618. Ratable value, £6,159. Agricultural returns for Portland district to March 1, 1900, were: Acres worked, 86,374; gardens and orchards, 61 acres. Produce: wheat, 860 bushels; oats, 1,025 bushels; barley, 20 bushels; potatoes, 297 tons; peas, 60 bushels; apples, 2,540 bushels. Stock: horses, 291; cattle, 2,505; sheep, 9,811; pigs, 774. Population, 500; of district, 2,300.

ST. LEONARDS (41° 30′ S. lat., 147° 12′ E. long.), a pretty village, with post-office, parcel-post, money-order, savings bank, and telegraph office, about 4 miles from Launceston, in the county of Dorset, police district of Selby, and electoral district of Evandale, on the North Esk river. A conveyance runs to and from the station on the Launceston and Western Railway; railway fares, 9d. and 6d.; conveyance, 4d. The Episcopalian church (St. Peter's) is a neat building. There are a Wesleyan and other places of worship, and a public school. One hotel, Pettersen's. About 3 miles from here is Cora Linn, remarkable for its romantic scenery. Road Trust valuation, £3,120. It has also an independent water supply carried out and owned by the Launceston Corporation. Population (census 1891) 254; June, 1900, 520.

ST. MARY (41° 35′ S. lat., 148° 15′ E. long.), a township, with post-office, parcel-post, money-order, savings bank, telephone and telegraph station, in the county of Cornwall, electorate and municipal district of Fingal, 135 miles NE. of Hobart, 80 miles E. of Launceston, and 12 from Fingal, situated on St. Patrick's Creek. Railway communication exists between Conara on the Main Line and St. Mary's, 47 miles. The intermediate stations are Cullenswood, Mount Nicholas, Fingal, Tullochgorum, Ormley, Avoca, Eastbourne, Hanleth, and Stony Creek. Fares to Hobart, first-class, 34s. 3d., return 51s. 5d. To Launceston, first-class, 19s. 3d., return 28s. 11d. A coach carries passengers on to George's Bay and Weldborough. Two hotels: St. Mary's and Criterion. Episcopal, Roman Catholic and Wesleyan churches, and public school are here, and branch of the National Bank of Tasmania. The Wesley Hall, erected for public gatherings, is a creditable structure. There is an Oddfellows' Lodge. Racing club holds an annual meet. In the neighbourhood at Mount Nicholas seams of coal of considerable thickness have been opened, the areas of coal-bearing land being held under lease from the Crown. The Mount Nicholas, Cornwal and Jubilee Companies are turning out about 1,500 tons per week. The quality of the coal for railway and domestic purposes is in high repute. Agricultural, pastoral and dairying pursuits are followed throughout the district. The climate is moist, but healthy. St. Mary's Pass, noted for its fine scenery, is two miles from township, on main road to St. Helen's. There are many other points of interest to tourists, commanding magnificent inland and marine scenery. Geological formation: Coal, sandstone and limestone. Population (census 1891), 268; of district, 3,404; June 1900 3,800. Road Trust valuation, £9,350.

SANDFORD. Post town, with telegraph office and parcels-post; State school and public hall. County of Monmouth, rural municipality of Clarence. Agricultural centre. Summer resort for tourists; good fishing in the vicinity.

SANDY BAY. *See* QUEENBOROUGH.

SASSAFRAS (41° 14′ S. lat., 146° 32′ E. long.), a post town with money-order office and telegraph, in the county of Devon, electorate of East Devon, and police district of Port Sorell, 6 miles SE. of the town of Latrobe, 51 miles NW. of Launceston, and 267 miles N. of Hobart, situated a short distance E. of Mersey River. Water is supplied from wells. A daily mail conveyance runs to and from Latrobe. It has a public school, one private school, and Wesleyan and Baptist places of worship. Wheat-growing, farming, and grazing district. It is also one of the largest potato-producing districts in the colony, the soil being a deep chocolate loam. Population of district about 300.

SCOTTSDALE (41° 7′ S. lat., 147° 31′ E. long.), a post-town, with money-order and savings bank office, parcel post and telegraph station in the county of Dorset, police district and electorate of Ringarooma, 39 miles NE. of Launceston, situated 3 miles from the Brid river. It is the terminus of the Launceston and Scottsdale railway line, about 180 miles from Hobart, and one train runs to and from Launceston daily. It has Anglican, Roman Catholic, Presbyterian, Wesleyan and Salvation places of worship, a State school, one private school, numerous stores, and three inns, Commercial, Scottsdale, and Inverness; coffee palace, temperance hotel, and two saw mills. Courts of General and Petty Sessions are held here, there being a Court House and Gaol. Bridport lies 13 miles N. Coaches run daily to and from Ringarooma, Branxholm, Derby, and Moorina. Good farming district and tin-mining to the eastward and extending to the East Coast. These mines are held by co-operative parties of working miners, but mining operations can only be carried on during the rainy periods of the year. A Board, established here under the Town Boards Acts, has made many improvements in streets and drainage. Annual value of property, £2,000; Road Trust valuation, £4,350. There are Local Boards of Health for the districts of Ringarooma, Derby, and Boobyalla. A mechanics' institute, with a fine library, has been established, the building including a large assembly hall. There is also a Masonic and an Oddfellows' hall, and Druids' Society. Geological formation, basaltic and granite. Agricultural and pastoral pursuits are followed in addition to mining. Population (census 1891), 590; of district, 4,783; June, 1900, 560.

SCAMANDER, Portland district. Post and telegraph office. One hotel. State school. Good fishing grounds, splendid scenery. Coach communication daily with Georges Bay (St. Helen's), 11 miles, and St. Mary's railway terminus on Fingal line, also 11 miles distant. Good sea-bathing, fishing, and shooting.

SEYMOUR, post-office, Glamorgan county, 151 miles from Hobart, and 16 miles from St. Mary's, Fingal railway. It is a small port, and steamers call occasionally from Hobart and Launceston.

SHEFFIELD (KENTISHBURY) (41° 20′ S. lat., 146° 18′ E. long.), a township in the rich agricultural district of Kentishbury, 130 miles N. from Hobart, 20 miles from Torquay, 16 from Latrobe, 74 from Launceston, and 7 miles from Railton station on the Ulverstone line. Conveyances meet every train. Fare, 2s. single, 3s. return. Two hotels: Wilson's and Maddox s, and a Temperance Hotel. The land around is very productive, but heavily timbered. It has Anglican, Wesleyan, Presbyterian, and Baptist places of worship, a State school, private school, post and money-order office, parcel post, savings bank, telegraph station, Court house, wherein courts are held monthly, and branches of Bank of Australasia and National Bank of Tasmania, the former having a new and handsome building. Benefit societies hold athletic meetings annually. It is in the county of Devon, electorate of East Devon, and police district of Port Sorell. Courts of Petty Sessions are held here. In the vicinity is Hope's roller flour mill, fitted with best modern appliances; also a butter factory. M.U.I.O.O.F. and I.O.R. Societies have lodges here. W.C.T.U. have a good lending library. Alluvial gold has been found near the Minnaw Rivulet, 10 miles from Sheffield. At the river Forth a rich tin lode has been opened up, and silver-lead mines at Mount Claude, seven miles distant. Bismuth is also profitably worked. The town has many substantial buildings, including an Oddfellows' Hall, available for public meetings. The town, under control of a Town Board, is being gradually improved. Annual value of property, £1,500. There are numerous stores. The Middlesex Goldfield, where important discoveries of reef gold have been made, is situate about 23 miles SW. from Sheffield. Belmont, where gold and also tin is obtained, is about 22 miles from Sheffield with fair roads. A large area is held under mining leases. An effort is being made to get a direct railway line connecting the Kentishbury district with Devonport. Points of interest to tourists—Mount Roland, 4,480 feet, Mount Claude, Mount Badgers, and Hell's Gates, on Forth River. Good fishing in this river, also in the Dusher stream. Population June, 1900, about 3,000.

SHIPWRIGHT POINT (43° 8′ S. lat., 147° 3 E. long.), a post town, with parcel post, savings bank, money-order office, and telegraph station, in the county of Kent, and Franklin electorate and police district, situated on the river Huon, about 35 miles SW. of Hobart and 5 miles from Franklin township. The river is navigable to this point. Jam manufacture and bacon curing is carried on here, and there is a large export trade in fruit. There is also at present a very brisk trade in timber export. Congregational church. One hotel. Bi-weekly steamer from Hobart (fare, 7s. 6d.), also daily coach (fare, 8s.). Hartz Mountains within easy distance. Population, 170.

SIDMOUTH (41° 12′ S. lat., 146° 55′ E. long.), a post town in the county of Devon, Georgetown electorate and police district, situate on the west bank of the River Tamar, 30 miles NW. of Launceston, with which there is daily steamer communication, 158 miles N. of Hobart, and 13 from George Town. One State school and Presbyterian place of worship. Some good fishing here. Population, 60.

SMITHTON. *See* Duck River.

SNUG RIVER, post town, with parcel post, Buckingham county, 18 miles S. from Hobart. Reached by steamer to Oyster Cove. Roman Catholic and Primitive Methodist churches. Fruit-growing district.

SOMERSET (41° 3′ S. lat., 145° 48′ E. long.), a township with post office, parcel post, money-order office, savings bank, and telegraph station, on the north coast at the mouth of the river Cam, on the west bank, in the county and electorate of Wellington, and police district of Emu Bay, 229 miles from Hobart, and 108 miles from Launceston N.W. The district has a representative on the Emu Bay Marine Board. Public school, two private schools, and a Church of England. Two saw-mills, King's and Lancester's. The district is chiefly agricultural. The place is reached by rail to Ulverstone, and thence by coach, or from Burnie by coach. Daily mails to and from the township.

SORELL, or Pittwater (42° 46′ S. lat., 147° 35′ E. long.), as it was formerly called, is a town near the coast, in the county of Pembroke, municipality and electoral district of Sorell, 15 miles from Hobart NE. and 148 miles S. from Launceston. It has a post office, parcel office, money-order office, savings bank, and telegraph station. There is train communication twice a day with the city, connecting with Bellerive and Hobart Ferry. Sorell Causeway is a very extensive work, nearly 3 miles long, which cost £27,000, and was formally opened by Governor Du Cane in June, 1874. Coaches run daily to and from Copping and Dunally, connecting with the train service to Hobart. Hotels: Pembroke Inn, and Gordon Highlander. Numerous stores. There are in the town an Episcopal church (St. George's), Presbyterian and Roman Catholic places of worship, a public school, and an institute, with library of about 1,000 volumes. Courts of Petty and General Sessions are held here. Racing club holds an Easter meet. Area of municipality (proclaimed May 26, 1862), 180,500 acres, 194 miles of roads and streets; yearly value of ratable property £13,518. Capital value of district, £248,315. Formerly Sorell was considered the granary of the colony, and though the production of wheat has been reduced large bi-weekly stock sales are held, at which immense numbers of pigs, sheep and oxen are sold. There are three Road Trusts in the district: Upper Sorell, Lower Sorell, and Bream Creek; also a Fruit Board. Agricultural returns to March 1, 1900: Total acres worked, 109,891, including wheat, 2,375 acres; barley, 100 acres; oats, 679 acres; peas, 665 acres; potatoes, 198 acres. Produce: wheat, 45,125 bushels; barley, 1,600 bushels; oats, 13,580 bushels; peas, 9,975 bushels; beans, 11,000 bushels; potatoes, 673 tons. Stock: 749 horses, 2,732 cattle, 37,780 sheep, 2,800 pigs. Population (census 1891), 282; of district, 4,183; 30th June, 1900, 4,800.

SOUTH FRANKLIN. *See* Franklin.

SOUTHPORT (43° 35′ S. lat., 147° 0′ E. long.) is in the county of Kent, electorate and police district of Franklin. Township named Hythe. Sixty miles south of Hobart. It has a post office, parcel post, money-order office, savings bank, and telegraph office, and is a place of Petty Sessions. Roman Catholic and Independent churches, and State school. One hotel. Sailing craft load here with timber for Australian ports. Steamboat communication with Hobart. This is the most southerly observing station in the Australasian meteorological system. Geological formation: basaltic. Road Trust valuation, £1,000. Population of district, 1,400.

SPRENT, a postal township in Castra district, with telegraph, and money-order office in the county of Devon, electorate of West Devon, and municipal district of Port Sorell. It is 21 miles from Devonport on the Western line, and 10 miles from Ulverstone railway terminus; a daily coach plies to and fro. There are Anglican, Wesleyan and Presbyterian churches here and State school. It is the centre of a thriving and rapidly-spreading agricultural population.

SPREYTON, post town, with parcel post, Devon county, 80 miles from Launceston. A station on Western Line 3 miles from Devonport. Fare, 15s. 8d. and 11s. 4d. State school and mill. Agricultural district.

SPRINGFIELD, post town, Dorset county, 39 miles NE. from Launceston and 4 miles from Scottsdale railway station. Anglican, Wesleyan and Presbyterian churches and State school. One hotel. Agricultural district.

STANLEY, or Circular Head (40° 46′ S. lat., 145° 17′ E long.), an important seaport town, port of entry and clearance, with Customs, post office, parcel post, money-order office, savings bank, and telegraph station, in the county and electorate of Wellington, and police district of Russell, on the north coast, about 141 miles W. from Launceston, and 278 miles NW. of Hobart. It was laid out by the Van Diemen's Land Company (who still retain an interest), and is prettily situated on a flat, lying West of the cliff known as the Nut or Bluff, a precipitous mass of greenstone, facing a safe and commodious bay. The Circular Head Marine Board has charge of wharves, beacons and harbour lights. Hotels: Commercial, Union, and Stanley; a coffee palace and private boarding-houses. The township of Stanley overlooks the East Bay and roadstead, where ships of any size can lie under shelter from any winds except from E. to SE. in six to eight fathoms of water. It is the nearest port to Melbourne, with which port there is weekly steam communication, and is on account of its equable climate a very popular health resort. The long stretches of sandy beach are the favourite haunts of conchologists, and the forests yield naturalists unending attractions. There is regular communication weekly with Launceston and Macquarie Harbour (West Coast) by steamer, and also by trading vessels, and a daily mail service by coach to Wynyard, Burnie, and Ulverstone, also tri-weekly to Smithton (Duck River). Irish Town, and Montagu. Daily to Forest by saddle horses. Fare to either Wynyard or Montagu, 12s. Connection with the capital is by coach to Ulverstone, thence by rail. Churches: St. Paul's (Episcopal), Wesleyan, Presbyterian (St. James's), and Roman Catholic (St. Mary's), a public school, two private schools, a reading-room and public library, containing about 1,200 volumes, an Assembly Hall, with sittings for about 300, and stage appointments. Town lit with kerosene. It is a place of Petty and General Sessions and Court of Requests. It has a Road Trust, Fruit Inspector, Turf Club, Oddfellows' Lodge. Bank, National of Tasmania. Large quantities of produce are exported to Sydney, Adelaide, Melbourne, and Queensland ports. Butter, cheese and bacon factories are in active operation, also creameries at Forest and Duck River. Erection of new buildings, street improvements, and tree-planting mark steady progress. The district contains some of the finest grazing land in the colony, and large supplies of fat cattle and sheep are sent every year to Launceston and West Coast mines. Geological formation basaltic. Capital value of district, £175,600. Ratable value, £10,214. For the year ending 1st March, 1900, the area worked in Russell district was 127,605 acres, comprising 387 acres of wheat, 559 acres of oats, 393 acres of peas, and 2,329 acres of potatoes. Produce: wheat, 9,675 bushels; oats, 15,652 bushels; peas, 8,253 bushels; barley, 726 bushels; potatoes, 10,480 tons; apples, 2,068 bushels; pears, 949 bushels. Stock: 1,080 horses, 9,003 cattle, 9,857 sheep, 2,848 pigs. Population (census 1891), 400; of district, 1,625. June, 1900, 2,550.

STRAHAN. *See* Macquarie Harbour.

SURGES BAY, post town, with money-order office, Kent county. Forty-four miles SW. of Hobart. Tri-weekly steamer (fare 7s.). Agricultural and timber district. State school. Saw-mill here. Road Trust valuation, £325.

SWANSEA (42° 7′ S. lat., 148° 6′ E. long.), a township, with post office, parcel post, money-order office, savings bank, and telegraph station, on the western shore of Oyster Bay, in the county, electorate and rural municipality of Glamorgan, 90 miles NE. from Hobart, 80 miles SE. from Launceston. Hotels, Pier and Bay View, and private lodging-houses. It has stores, public school, three places of worship, Anglican, Catholic, and Presbyterian, municipal and police buildings, and several large houses and cottages. The Council Chamber is occasionally used for balls, concerts, &c. A circular wharf with substantial approach affords facility for the landing of goods and passengers and extends 1,000 feet into deep water. Schooners trade regularly to the metropolis. There is a tri-weekly mail coach service from Swansea to Campania, on the Main Railway line, fare 23s. Also a coach to and from Campbell Town on the Main Line, twice weekly, fare 15s., and communication every week with Hobart per coasting steamers. A beach 9 miles long is one of the attractions of Swansea. On the opposite side of the bay are Schouten Island and Freycinet's Peninsula, famed for romantic scenery and good fishing, the fishing being best between January and July. There is also excellent duck-shooting on lagoons and bays. The climate is unsurpassed perhaps by any in the world, and the place has widespread fame as a sanatorium. Pure water is obtained from the Meredith rivulet, where good rod and line bream fishing is to be obtained. There is a Rifle Corps and social club here. A Court of Petty and General Sessions is held here. At Freycinet's Peninsula tin mining gives employment to a limited number of men. The rural municipality of Glamorgan has an area of 439,000 acres, 120 miles of roads and streets, and ratable property of the annual value of £6,963. Capital value of district, £143,966. Road Trust valuation, £6,963. Agricultural returns to March 1, 1900—151,680 acres worked; wheat, 606 acres; barley, 103 acres; oats, 119 acres; gardens and orchards, 137 acres. Produce: wheat, 10,302 bushels; barley, 2,472 bushels; oats, 2,380 bushels; peas, 2,033 bushels; apples, 1,513 bushels; pears, 222 bushels. Stock: horses, 279; cattle, 1,622; sheep, 47,199; pigs, 1,035. Population (census, 1891), 282; of the district, 1,001. June, 1900, about 1,400.

TARANNA (Norfolk Bay). The chief of three small coasting places on Tasman's Peninsula, the other places being Premaydena (Impression Bay), and Koonya (Cascades). Carnarvon (Port Arthur) is to the southward. The chief attractions on the NE. of the Peninsula are Eagle Hawk Neck, the Blowhole, and the Pavement, all remarkable works of natural architecture. Nubeena (Wedge Bay) is on the SW., and Carnarvon (Port Arthur) on the S. There is regular steam service to these places in the summer months, and frequent special excursions. Taranna is the only port of debarkation on the Peninsula for passengers proceeding direct by mail coach to Carnarvon or Eagle Hawk. One hotel, a post office, parcel post and telegraph office here: also State school. Population of district, 800.

TAYLOR BAY, Buckingham county, 35 miles S. of Hobart. Weekly steamer (fare 7s., return 10s.). Agricultural district.

TEA TREE, post town and money-order office, and parcel post, Pembroke county. Railway station 21 miles from Hobart (fares 4s., and 3s.). English church here and State school. Cricket club. Road Trust valuation, £1,720.

TEEPOOKANA, on the King river, some 20 miles from Strahan, 240 miles from Hobart, county and electoral district

of Lyell. Population, chiefly miners, about 50; of district, 6,000. Mt. Lyell Company's railway station on line to Strahan. Two trains daily to and from Queenstown; fare, 5s.; return, 7s. 6d. Also steam launches irregularly to and from Strahan. It is on the direct route to Mount Lyell and Mount Jukes mining districts. State school. Beautiful woodland and river scenery here. Abt railway to Queenstown traverses wildly grand country. Geological formation: tertiary.

THE NOOK is a post town about four miles northerly from Sheffield, and may be reached direct from Latrobe *viâ* Tarleton, or by the round-about road by Railton and Sheffield. It is 207 miles from Hobart. It is in the county of Devon, police district of Port Sorell, and electorate of Devonport. About 60 families are settled in the locality, which is in one of the most important agricultural, dairying, and stock fattening districts in the colony. Two saw-mills keep in full work, and a large amount of clearing is done every year. State school. The population numbers 300.

THOMAS PLAINS (41° 6′ S. lat., 147° 56′ E long.), sometimes known as Weldborough, is a post town, with parcel post, money-order and telegraph office, savings bank, and public school, in the county of Dorset, electorate of Fingal, and police district of Portland. A Court of Petty Sessions is held here. It is situated on Thomas' River, about 105 miles ENE. of Launceston and 28 miles from St. Helen's. There is coach communication with Scottsdale railway station (40 miles) and also with St. Helen's and Gould's country. One hotel and Anglican church. The district is a tin-mining one, and in and around this centre a large number of miners, including many Chinese, are employed. Some gems and valuable stones are found occasionally. Population (census 1891), 167. The mining population of entire district numbers about 700.

THREE HUT POINT, or GORDON (43° 17′ S. lat., 147° 15′ E. long.), is a small village in the county of Buckingham, and Kingborough electoral and police district, situated on the western side of D'Entrecasteaux Channel. It is 30 miles from Kingston and about 40 miles S. of Hobart. It is a port of clearance and place of Petty Sessions, and has a telegraph station, savings bank, money-order office, parcel post, half-time school, and one inn. Two churches, Anglican and Wesleyan. Rifle and cricket clubs; good private accommodation for tourists. Daily steam communication (fares 4s., return 6s.). There are some coal seams in the vicinity. Agricultural and fruit-growing district. Population, about 100. Road Trust. Ratable property value £2,350.

TREVALLYN. Suburb of Launceston, on the steep slope of the Tamar, and running down to the Cataract Gorge. The hill is terraced, and there are many well-built suburban residences. Anglican church here. It is a town under the "Towns Board Act." Annual ratable value, £2,413. Population, 600.

TRIABUNNA (42° 30′ S. lat., 147° 57′ E. long.), a township, with post office, parcel post, money-order office, savings bank, and telegraph station, in the county of Pembroke, electorate of Glamorgan, and rural municipality of Spring Bay, 55 miles NE. from Hobart, and 150 miles SE. from Launceston, on the shore of the harbour known as Spring Bay, east coast of the island. It has the lowest rate of rainfall in Tasmania, but is renowned for its healthy climate. The harbour, as surveyed by H.M.S. *Dart*, is a safe place of refuge in bad weather. Sailing craft ply regularly to and from Hobart and Launceston. An eucalyptus oil factory has been established. Maria Island lies right across the north of Prosser's Bay, at the entrance to Spring Bay. A mail conveyance goes to Campania thrice a week, whence the train can be taken to Hobart. Coach fare to Campania, 13s., return, 20s.; rail, 5s. 3d. and 4s. A conveyance also runs once weekly to Sorell, or oftener if required, connecting with train to Hobart. Coaches run also to Swansea, Orford, Buckland, and Lisdillon; fares, 21s., 9s., 7s. 6d., 10s., and 19s. Hotels: Retreat and Pembroke. It is a place of Petty and General Sessions. In the district good building freestone is quarried, and coal has been found. A State school here, also at Buckland, and Orford. Churches — Episcopalian and Roman Catholic. The soil is mainly carboniferous, but basalt, granite and limestone are also found in abundance. Coal has been struck by diamond drill, but quality as yet is inferior. Spring Bay municipality, proclaimed 10th September, 1860, has an area of 330,000 acres, 120 miles of roads and streets, and ratable property of the annual value of £6,049. Capital value of district, £155,760. Road Trust valuation, £8,777. Points of interest to tourists are Maria Island, Paradise Valley, Mount Murray, and The Thumbs. The bay teems with fish and oysters, and in close proximity native game and birds are abundant. The area worked on 1st March, 1900, was 145,624 acres: wheat, 292 acres; oats, 96 acres. Produce: wheat, 13,504 bushels; barley, 126 bushels; oats, 1,920 bushels; peas, 689 bushels; potatoes, 228 tons; turnips, 1,190 tons. Stock: horses, 194; cattle, 1,318; sheep, 46,956; pigs, 613. Population (census 1891), of district, which includes Spring Bay, 1,918. June, 1900, about 2,000; of town, 180.

TRIAL HARBOUR (REMINE), a small town at the foot of the Heemskirk range on the west coast. It is in the county of Montagu, police district of Macquarie, and electoral district of Cumberland. Small steamers can put in here when the Macquarie bar is unworkable, taking transhipments and passengers from Strahan. Hotel: Trial Harbour. Population, including miners (census 1891), 213. June, 1900, about 100.

TUNBRIDGE (42° 10′ S. lat., 147° 28′ E. long.), a post town with parcel post, money-order office, savings bank, and telegraph station, in the county of Somerset (Oatlands electorate and municipality), 14 miles from Oatlands, 59 miles SE. of Launceston. It is also a station on the Main Line Railway, distant from Hobart 74 miles; fares, 16s. 9d. and 11s. 3d.; and has a Presbyterian Church, a Wesleyan chapel, a State school, two inns, the Victoria and the York, and a Public Hall. A Water Trust has been established, and provides an efficient supply from Blackman's River. Agricultural district. Road Trust valuation. £8,316.

TUNNACK (42° 28′ S. lat., 147° 25′ E. long.), a postal town, with parcel post, money-order office, telegraph station, and savings bank, in the county of Monmouth (electorate and municipality of Oatlands), situated near the Coal River, between Oatlands and Jerusalem, about 15 miles from Oatlands, 40 miles N. of Hobart, and 10 miles from Parattah railway station. It has a public and private school, one hotel, and Anglican and Roman Catholic places of worship. Agricultural district. Road Trust valuation, £10,211.

TYENNA. A postal centre twenty miles from Glenora, the present terminus of the Derwent Valley railway. Mail communication once weekly. Rising agricultural district.

ULVERSTONE (41° 8′ S. lat., 146° 12′ E. long.), on the river Leven, in the county of Devon, electorate of West Devon, and police district of Port Sorell, is a flourishing seaport, and agricultural centre, 70 miles NW. of Launceston, 191 miles from Hobart, and 13 miles W. of Devonport on the North-Western Railway, and 18 miles from Emu Bay. Train fare to Launceston 19s. 6d.; thence to Hobart 30s. A post town, with parcel post, telegraph and money-order office and Government savings bank. The Leven port is the third in importance of those on the NW. coast; a large amount of timber and agricultural produce is shipped from here, and small steamers from Launceston make this a port of call. The port is under the control of the Leven Marine Board. Efforts are being made to get bar deepened. There are coaches running to Circular Head, Penguin and Castra. The town of Ulverstone is the business centre for the large districts of Castra, North Motton, Gunns Plains, Preston, Wooley's Plains, Kindred and Penguin and Belmont Goldfield, 30 miles south. It has four churches, Anglican, Roman Catholic, Wesleyan, and Congregational, and Salvation Army. Three hotels, Ulverstone, O'Meara's, and May's, and four coffee palaces, a Town Hall with Public Library (700 vols.) and reading room attached, branches of Bank of Australasia and Commercial Bank, and several stores. There is a State school, private schools, convent school, and Agricultural College. Sittings of the Supreme Court in its Small Debts jurisdiction are held here. Quarter Sessions are held here in the Court House in February, May, August, and November, Court of Requests and Petty Sessions every month and Licensing Courts quarterly. The Ulverstone Branch Board of Agriculture holds its meetings here. A Town Board has been established. Annual value of property, £7,600. Road Trust valuation, £12,785. There is a social club, cricket, rowing, football club, two brass bands and two Oddfellows' societies. Headquarters of Third Battalion Tasmanian Infantry. The I.O.O.F. have a small hall. A Rechabite lodge is established here. The United Axemen's Association has its headquarters here, and the annual contests attract competitors from all the adjacent colonies. The scenery above the Leven bridge is exceedingly picturesque, the view from the bridge being one that could hardly be surpassed. The river is navigable for small boats some 7 miles above the bridge, and affords a delightful retreat for the pleasure-seeker and fisher for English trout, black fish and lobster. The scenery is of surpassing beauty. There is good herring fishing in the river Gawler, 3 miles from the Leven, and salmon fry were introduced in the river two years ago. Ulverstone is a favourite watering-place, with a fine three mile stretch of sandy beach and many charming drives. The district is chiefly pastoral and agricultural, potato-cropping being a special industry here. Local industries comprise brickyards, two saw-mills, and two flour-mills. Copper mining at the Dial Range is expanding. Population (census 1891) of town, 1,129; of district, 5,734. In June, 1900, about 6,700.

UNDERWOOD, post town, Dorset county, 9 miles NE. from Launceston and 4 miles from Lilydale railway station. Wesleyan church and State school. Agricultural district.

UPPER MEANDER, an agricultural settlement, 10 miles south of Deloraine. It has a post office, State school, and two churches—Anglican and Wesleyan, and a Public Hall. The Great Lake is 14 miles distant by Warner's Track. The settlement adjoins the Cheshunt estate, a magnificent agricultural and grazing property.

UXBRIDGE, a settlement, better known as "The Tiers." It has postal receiving office, and tri-weekly mail. Is 30 miles from Hobart, county of Buckingham, electoral district of New Norfolk. Eight miles from Plenty and Glenora railway stations. Centre of agricultural district. State school here. Township situated between the rivers Plenty and Styx. Good fruit-growing, timber and agricultural district. Saw mill affords principal work. Habitations scattered. Population of district about 200.

VICTORIA (HUONVILLE) (43° 0′ S. lat., 147° 17′ E. long.), is on the banks of the Huon river, at its junction with the Mountain river, in the county of Buckingham (Franklin police district and Kingborough electorate), 24 miles SW. from Hobart, with which it is connected by a good road, and bridge over the Huon, and 5 miles from Franklin. It has post office, parcel post, money-order, savings bank, and telegraph station. This place is now officially named Huonville. Sittings of the Court of Requests are held here. There are daily coaches to the metropolis; fare, 5s., return 8s. Hotel—The Picnic. Anglican, Wesleyan and Independent churches and State school. The principal industry in the neighbourhood is fruit-growing and the timber trade. Coal

has been discovered near the head of a gully which empties into an eastern tributary of the Huon, nearly opposite Franklin. This coal is of a slaty character, especially near the roof: but thin bright patches of bituminous matter intervene here and there, and lower down it is said to be nearly all bituminous. Hops and fruit are extensively grown along the banks of the river. There is good salmon and trout fishing here; some of the heaviest fish in Tasmanian waters are captured in the Huon. Road Trust valuation, £3,400. Population of district, 1,400.

WARATAH. *See* MOUNT BISCHOFF.

WELDBOROUGH. *See* THOMAS' PLAINS.

WENVOE (41° 9′ S. lat., 146° 22′ E. long.), situated on the banks of the Mersey, with a population of 100, in the county of Devon, electorate of East Devon, and police district of Port Sorell. The extension of buildings virtually tends to make it part of West Devonport.

WESLEY VALE, post town with telegraph, Devon county, 80 miles W. of Launceston and 5 miles from Latrobe Railway Station. Wesleyan church, State and private school. Agricultural district.

WESTBURY (41° 32′ S. lat., 146° 51′ E. long.), a town situated on Quamby's Brook, and bounded also by the Meander and Liffey rivers, in the county of Westmoreland, municipality of Westbury, and electorate of Tamar (for Legislative Council, Meander), 140 miles N. of Hobart, and 20 miles SW. of Launceston by road (by rail 35 miles). It is a station on the Launceston and Western Railway; fares, 5s. and 4s. to Launceston on Saturdays, other days, 7s. 6d. and 5s.; to and from Formby, 11s. 9d. and 7s. 10d.; cab fare, to or from Post-office 4d. Hotels: Berridale and Railway. It has a post office, parcel post, money-order, savings bank and telegraph station, and a public library of 2,400 volumes. Also hall seating 350 persons. St. Andrew's (Episcopal) is the principal church; there are also Roman Catholic and Wesleyan places of worship, a public school. Roman Catholic convent school, and private school. Court of Petty and General Sessions is held here. There is a Road Trust and Fruit Board. The Western Agricultural Association has its headquarters here; there is a Working Man's Benefit Club of 110 members, an Oddfellows' Lodge, and brass band. Among the local institutions are the Northern Tasmania Coursing Club, which holds its meetings during the season at Quamby, Frankford Farmers' Club, Roswale Turf Club, and Hogley Ploughing Association. The Commercial Bank of Tasmania has a branch here. Westbury is the headquarters of the Meander Company of Auxilary Defence Force. The district is famed for long-woolled sheep. The rural municipality (proclaimed November 2nd, 1863) has an area of 300,000 acres, 126 miles of roads and streets, and annual ratable value of £34,408; capital value £811,122. Road Trust valuation, £19,433. Specimens of tin and copper ore of a good quality have been found in the neighbourhood; also rich iron ore; the latter at Ilfracombe, near the northern boundary of the municipality. The geological formation of the district is quartz and ironstone, with gravel over red clay. There is good fishing in the Meander river, two miles distant, and hunting and shooting everywhere around. The outlying districts are Carrick, Hagley and Bracknell in the East: Cluan, Fernbank and Early Rises to the South; Exton in the West; Black Sugar Loaf and Frankford in the North. A large area of land is under crop for wheat, oats, potatoes, and other root crops, and for orchards. Road Trust valuation £20,200. Agricultural returns to March 1,1900, were 158,625 acres worked; wheat, 10,977 acres; barley, 2,102; acres; oats, 5,515 acres; peas, 906 acres; potatoes, 1,107 acres; turnips, 440 acres; gardens and orchards, 405 acres. Produce: wheat, 197,586 bushels; barley, 35,734 bushels; oats, 110,300 bushels; peas, 28,120 bushels; potatoes, 2,767 tons; turnips, 9,880 tons; apples, 1,512 bushels; pears, 96 bushels; hops, 3,450 lbs. Stock: horses, 2,475; cattle, 6,913; sheep, 76,323; pigs, 3,880. Population (census 1891) of town, 1,154; of municipal district, 3,681; (30th June, 1900, 4,900).

WHITEFOORD, post town, Monmouth county, 65 miles NW. of Hobart and 10 miles from Parattah railway station. State school. Agricultural district.

WHITEFOORD HILLS, post town, Devon county, 55 miles from Launceston. Station on Western line (fare 9s. 6d., 7s. 2d.). English church and one hotel. Agricultural district.

WHITE HILLS, post town, Cornwall county, 9 miles from Launceston and 3 from Breadalbane railway station. Wesleyan church here and State school. Agricultural district.

WILLIAMSFORD (Deep Lead). Postal centre with parcel post, money-order and telephone office and State school, 18 miles from Zeehan. Terminus of N.E. Dundas railway. Two hotels, two stores, Wesleyan church. Coach road, five miles, connects with Rosebery, present terminus of Emu Bay railway. Place is named after Luke Williams, pioneer mining manager of district. Population, 150. Alluvial and quartz mining. It is the centre of the Mount Read group of mines, and smelters are being erected in the vicinity.

WINKLEIGH, post town, Devon county, 23 miles from Launceston. Presbyterian and Wesleyan churches. State school. Population (census 1891) 167. Now 200.

WOODBRIDGE, post town, with parcel post, money order telegraph office and savings bank, Buckingham county, 53 miles S. of Hobart, on the D'Entrecasteaux Channel. Anglican, Wesleyan, and Congregational churches and State school. Steam communication bi-weekly. Agricultural and fruit-growing district. Population (census 1891) 166. Now 240.

WOODSDALE, post town, Monmouth county, 71 miles from Hobart and 16 from Parattah railway station. Anglican church here and State school. Agricultural district.

WYNYARD (41° 0′ S. lat., 145° 45′ E. long.), on the river Inglis, a township and port of entry, with post-office, parcel post, money-order office, savings bank, and telegraph station (Table Cape), in the county and electorate of Wellington, police district of Emu Bay (Table Cape division), 104 miles distant from Launceston NW., and 224 miles from Hobart NW. Hotels: Royal, Mount Lyell, Commercial, and a coffee palace. Coaches run twice daily to and from Ulverstone railway station, fare 8s.; thence train to Launceston and Hobart. There is also a daily coach to and from Stanley, fare 12s. There are five places of worship—Church of England, Roman Catholic, Wesleyan, Free Methodist, Church of Christ, and Salvation Army; public school, and two private schools (State schools also at Mount Hick's Road, Boat Harbour, Flowerdale, and Sisters Creek. Town hall, and drill hall, a public library (with 700 vols.), and assembly rooms, branches of Bank of Australasia, and National Bank of Tasmania. Table Cape Racing Club holds an annual meet. There is a local Rifle Club and Agricultural and Pastoral Society, the latter having an extensive show building. There is a Masonic Lodge, also Lodge of Odd Fellows' the latter with over 100 members. It is a place of Petty Sessions. The Table Cape Marine Board has its centre at Burnie. Some extensive harbour works have been carried out, and more are projected. Road Trust valuation, £9,000. A co-operative butter and bacon factory is in full work, also flour-mill. In the neighbourhood are well-appointed saw-mills. Blackwood, myrtle, and stringy bark are the principal woods. Much of the bush land has been cleared and brought under cultivation and for grazing. The land is some of the best in the island, and well watered. Rich indications of gold, silver, and copper have been found, and prospecting is becoming extensive. Boat Harbour, Flowerdale, and Calder are flourishing districts to the west, and Mount Hicks and Camp Creek to the south. Table Cape lighthouse, 4 miles NW. of town is a favourite tourist resort. Population, 800; of electoral district, June, 1900, 8,750.

WYNYARD RIVER, post town with money-order office, 80 miles from Launceston and 40 from Scottsdale Railway Station. A tin-mining district on the East coast. Mostly Chinese population.

YOUNG TOWN, post town, with parcel post, Cornwall county, 4 miles from Launceston. Daily coach communication. English and Primitive Methodist churches and State school. One hotel.

ZEEHAN (42° S. lat., 45° E. long.), post town, with parcel post, telegraph, savings bank, and money-order office, Montagu county, electoral district of Montagu, 225 miles NW. of Hobart, and situated on the Little Henty River. Terminus of Strahan and Zeehan railway, and railways to Dundas and Williamsford. Banks: National, Bank of Australasia, and Commercial of Tasmania. A Town Board has been established, and schemes for water supply and sanitation are being effected. The town is lighted by electricity. The main street is 2 miles long. Annual value of property, £19,340. Eighteen hotels: The Grand, Hotel Cecil, Mount Zeehan, Kerrigan's, Royal Exchange, Commercial, Federal, Caledonian, All Nations, Club, Victoria, Exchange, Palace, Railway, Royal, Silver King, Silver Bell, and Zealandia. Supreme Sessional courts are held here. There is a theatre (The Gaiety), Masonic hall, Academy of Music, Montagu Hall, and A.M.A. Hall, Anglican, Catholic, Presbyterian, Wesleyan, Primitive Methodist and Christian Brethren churches, and Salvation Army, two State schools, Convent school, several private schools, and district hospital, with a women's ward. Public reading-room and library. Branch of Australian Miners' Association. Principal centre of silver-lead mining district. State-aided school of mines. Extensive smelting works, established by Tasmanian Smelting Company, having head-office in London. Water supply dependent on rainfall. The mines are a source of great attraction to tourists, as also the Falls at Heemskirk, Mount Zeehan and Montezuma, and the general mountain and bush scenery. The Australian Miners' Association have a hall. Masonic, Oddfellows', Foresters', Druids', Hibernian, Miners' Association, Orange and Rechabite lodges are established here. Trains to and from Strahan (Macquarie Harbour) twice daily, and steamboat connection thence to Hobart, Launceston and Melbourne. Trains twice daily to and from Dundas, and once to and from Williamsford, connecting with Emu Bay line. Geological formation: dark blue slate and grey sandstone of the Silurian series, with fossiliferous beds, a great interest to paleontologists. Silver lead ore first discovered here in 1882. Paper: *Zeehan and Dundas Herald*, daily. Population (census 1891), 1,956; (June, 1900, 8,000) of district, 12,500.

THE COLONY OF NEW ZEALAND.

THE COLONY OF NEW ZEALAND.

THE Colony of NEW ZEALAND, comprising the three islands known as the North, South and Stewart Islands, and the adjacent islands, seem to have first been discovered and peopled by the Maori race, who still inhabit some parts of the islands, principally the North one. Little can be learned from their traditions beyond that they all point to the fact of their having been immigrants, not indigenous, and that when they arrived there were no human beings in the country. Similarity of language indicates a northern origin, probably Malay; for when Captain Cook first visited New Zealand he availed himself of the aid of a native of Tahiti, whose language proved to be similar, if not altogether identical, with that of the New Zealanders.

The first European who made the existence of New Zealand known to the civilised world was Captain Abel Jansen Tasman, the Dutch navigator, who sighted it, on or about December 13, 1642, and gave it the name first of all of Staaten or Staatenland, in honour of the States General of Holland, afterwards altering it to Nova Zeelanda. This occurred on the same voyage when Van Diemen's land was discovered. It has been claimed for other explorers that they had found it earlier, but the evidence is not sufficient to substantiate the claims of any of them. Tasman did not land on any part of the islands, but having had a boat's crew cut off by the natives in what he then called Massacre or Murderer's Bay, now known as Golden Bay, he was content to sail along the west coast of the North Island, naming the more prominent headlands and bays—some of which retain their names to this day.

From the time of Tasman's visit no European is known to have visited the islands until 1769, when Captain Cook landed on them in the first of his great voyages. After a run of eighty-six days from Tahiti, having touched at some other places, he sighted the coast of New Zealand, on the 6th of October, 1769 (a lad named Nicholas Young first saw the loom of the land from the masthead, and after him the SW. point of Poverty Bay was named by Cook—Young Nick's Head), and on the 8th landed at Poverty Bay, on the east coast of the North Island, near what is now the township of Gisborne, and some distance north-east of Napier, the capital of the provincial district of Hawke's Bay. The circumstances of Cook's first landing were unfortunate. "We landed," he says "abreast of the ship, on the east side of the river, which was here about forty yards broad, but seeing some natives on the west side, with whom I wished to speak, and finding the river not fordable, I ordered the yawl to carry us over, and left the pinnace at the entrance. When we came near the place where the people were assembled, they all ran away; however, we landed, and leaving some boys to take care of the yawl, we walked up to some huts, which were about 200 to 300 yards from the waterside. When we had got some distance from the boat, four men, armed with long lances, rushed out of the woods, and running up to attack the boat would certainly have cut her off, if the people in the pinnace had not discovered them, and called to the boys to drop down the stream. The boys instantly obeyed, but being closely pursued the coxswain of the pinnace, who had charge on the boats, fired a musket over their heads. At this they stopped and looked round them, but in a few minutes renewed the pursuit, brandishing their lances in a threatening manner. The coxswain then fired a second musket over their heads, but of this they took no notice; but one of them lifting up his spear to dart it at the boat, another piece was fired, which shot him dead. When he fell, the other three stood motionless, as if petrified with astonishment. As soon as they recovered, they went back, dragging the dead body, which, however, they soon left, that it might not encumber their flight. At the report of the musket we drew together, having straggled to a little distance from each other, and made the best of our way back to the boat, and crossing the river we saw the native lying dead on the ground."

The account which the natives themselves give of their impressions of Cook's arrival is recorded by Mr. Polack, who had it from the mouths of their children in 1836. "They took the ship at first for a gigantic bird, and were struck with the beauty and size of its wings, as they supposed the sails to be. But on seeing a smaller bird, unfledged, descending into the water, and a number of parti-coloured beings, apparently in human shape, the bird was regarded as a houseful of divinities. Nothing could exceed their astonishment. The sudden death of their chief (it proved to be their great fighting general) was regarded as a thunderbolt of these new gods. To revenge themselves was the dearest wish of the tribe, but how to accomplish it with divinities who could kill them at a distance was difficult to determine."

It is not much to be wondered at, that any further intercourse with the natives at this point should become impossible; and after other collisions, attended with similar fatal results, on the 11th Cook weighed anchor and left "this unfortunate and inhospitable place," as he calls it, and on which he bestowed the name of Poverty Bay, "as it did not afford a single article they wanted, except a little firewood."

In Tolago Bay, Mercury Bay (where observations were taken of the transit of Mercury, and where on November 16, 1769, Cook displayed the English colours and took formal possession in the name of His Britannic Majesty King George III.), Hawke's Bay, the Bay of Plenty, the estuary of the Thames, the harbour of Waitemata in Whangarei Bay, at the Bay of Islands, and lastly, at his favourite rendezvous of Queen Charlotte's Sound (where possession was formally taken of the South Island on January 30, 1770), he was able to procure the necessaries which Poverty Bay had failed to supply, and to establish a footing, partly of barter partly of hospitality, with the natives.

He found the Maoris savages in the fullest sense of the word. They were almost totally unacquainted with mechanical arts, their skill limited to the ability to scoop a canoe out of a tree, to weave coarse clothing out of the fibres of the native flax, to fabricate fishing nets, to make spears, clubs, and other rude implements of war, or still ruder ornaments for the adornment of their persons, their huts, or their canoes. Beasts of burden they had none—the women supplied their place. Their agriculture was confined to the cultivation of the kumera or sweet potato, and the taro, another esculent plant. Their food consisted of those plants, and of eels and sea-fish, rats, dogs, wild fowl, and human flesh, and their nearest approach to bread was the root of the wild edible fern, a not very wholesome or palatable substitute. Their religious notions were of a confused order, and their priests wielded a kind of half-moral, half-political power over them, by the institution of the "tapu," to which they subjected whom they pleased, and the infringement of which involved punishments of the severest sorts. But the one absorbing idea of the race was war, and their time was almost wholly spent in planning or awaiting invasions of other tribes or families. Female virtue was entirely disregarded before marriage, and not much valued afterwards; while, to crown the whole, cannibalism was the universal practice of the race, this, it is believed, being in many cases resorted to almost as a necessity, on account of the scarcity of food.

Cook did what little was possible towards improving the condition of the New Zealanders. He tried, but failed, to establish the sheep and goat, although he was more successful with the pig. He left the potato behind him, and gave to the natives seeds of other vegetables and garden plants, most of which, however, soon degenerated. Copper medals were distributed among the natives by Cook, and one at least of these medals has been recovered and preserved as an historical relic. He spent altogether 327 days in the country or circumnavigating its coasts, and quitted it for the last time in February, 1777. Soon after the first visit of Captain Cook, the French Navigator, De Surville, of the ship *St. Jean Baptiste*, anchored at Mongonui (in December, 1769), while searching for an island of gold, which it was believed the English had just discovered in the Pacific Ocean; he held friendly relations with the natives at first, but in the belief that they had stolen one of his boats he burned a village, and carried away a chief. Three years later (May 11, 1772), his countryman, Marion du Fresne, with Crozet second in command, in the ships the *Mascarin* and the *Marquis de Castres*, anchored near the same spot; friendly intercourse was maintained with the natives till the thirty-fourth day, when Marion and fourteen of his company were enticed on land and murdered; a terrible retaliation followed, many natives were shot down and their villages burned.

Within a few years afterwards the country began to be occasionally visited by whaling ships. In 1794 the whale ships of the firm of Messrs. Enderby, after whom the Enderby Islands are called, visited the coast of New Zealand, principally the Bay of Islands; but, with the solitary exception of one shipwrecked sailor, no European is known to have resided there before 1814. In that year the Church Missionary Society established a Mission at the Bay of Islands, now called Russell—native name, Kororareka—the Rev. Samuel Marsden, chaplain to the N.S. Wales Government, and three other ministers, Messrs. Kendall, Hall, and King, forming the missionary party. They celebrated divine worship for the first time on Christmas Day, 1814, at Rangihona, and under the protection of the chiefs the Society grew and flourished. The seeds of Christianity and civilization were first sown among the Ngapuhi tribe, then one of the most important of the Maori tribes. Their chiefs assembled in February, 1840, near the "Waitangi," or "weeping water," Falls (which face Russell on the opposite side of the Bay of Islands), and were the first to sign the Treaty acknowledging British supremacy. (The Wesleyans and Roman Catholics at a later period also established missions, the former in 1822, first at Whangaroa, and afterwards at Hokianga; the latter at Kororareka in 1838, when Bishop Pompallier arrived.) From this time, traders from New South Wales began to establish agencies for commercial purposes, and numerous whaling and lumbering establishments were planted by Sydney merchants on the coasts of both islands. Cook, during his life, had urged on the British Government the colonization of New Zealand, and Benjamin Franklin, the American statesman, had proposed an organization in England for the purpose. But nothing practical was attempted till 1837, when Lord Durham, as the representative of a number of gentlemen who called themselves the New Zealand Land Company, proposed to the Government that they should be incorporated with powers to colonise the country. After some delay the preliminary expedition in the *Toru* survey-ship sailed on the 12th of May, 1839, under the command of Colonel William Wakefield, who held instructions to purchase land from the natives and to select the site of the first settlement. He arrived in August of the same year, and selected Port Nicholson, at the eastern entrance of Cook's Strait (now Wellington), as a central depôt, and on the 22nd of January following, the first batch of immigrants arrived in the *Aurora* (Captain T. Heale). The pioneer fleet comprised the *Aurora*, *Oriental*, *Duke of Roxburgh*, *Bengal*, *Merchant*, and *Adelaide*. In twelve months by the

arrival of other vessels, the immigrants increased to upwards of 1,200 from Great Britain, besides a few from Australia.

The order in which the various settlements were formed is as follows :—

1. WELLINGTON, as already stated, was founded by the New Zealand Company in 1840. Preliminary expedition, for selection of site, August, 1839.

2. AUCKLAND, established by the first governor, Captain Hobson (styled in his Commission "Consul to, and eventual Lieutenant-Governor of, the Colony of New Zealand,") in the same year, by whom, on February 6, 1840, the first treaty with the natives was made, at a native settlement called Waitangi, whence it was called the treaty of Waitangi. By this Treaty the native chiefs ceded the sovereignty of New Zealand to the Kingdom of Great Britain. Captain Hobson selected a site upon which the City of Auckland now stands as the capital of the Colony, and on January 29, 1840, proclaimed the British sovereignty. (Russell, Bay of Islands, was originally chosen, but the seat of government was transferred on account of the natives.) Auckland remained the seat of government till 1865, when by Act of the Colonial Parliament, and the selection of certain commissioners appointed at its request by the Australian governors, Wellington became the capital.

3. NEW PLYMOUTH, also founded by the New Zealand Company, in September, 1841. Preliminary expedition, 1840.

4. NELSON, founded by the Company, in October, 1841.

5. OTAGO, founded in March, 1848, by a Scotch Company, working in connection with the New Zealand Company, and by means of its organization, under the auspices of the Free Church of Scotland, and with the appropriation of a portion of its lands and pecuniary resources to Free Church purposes. The *John Wickliffe* and the *Philip Laing* were the first of the Company's vessels to arrive, anchoring in Otago Harbour in 1848. These "old identities," as those of them who are now living are called, founded the city of Dunedin. Captain Cargill was one of the best known of them.

6. CANTERBURY, similarly founded in December, 1850, in connection with the Church of England.

7. HAWKE'S BAY was originally a part of Wellington province, but separated from it, and created a province of itself, in 1858.

8. MARLBOROUGH, originally a part of Nelson, separated in the same manner in 1860.

The first governor of the new settlement was Captain Hobson ; he took office in January, 1840, and died at his post on September 10, 1842. From January, 1840, to May, 1841, until which date New Zealand was a dependency of New South Wales, Captain Hobson was Lieutenant-Governor of the Colony under Sir George Gipps, the Governor of New South Wales ; from May, 1841, he took the title of Governor of New Zealand. After his death Lieutenant Shortland was acting Governor till relieved by Captain R. Fitzroy (afterwards Admiral Fitzroy), who held the governorship till his recall, in 1845.

The operations of the early settlers were at first attended by a success that augured well for the future, though they had many obstacles to contend with ; but from various causes—from dissensions among themselves, differences with the Home Government, and war with the natives (the first war began on January 17, 1845 ; on March 11, Hone Heki destroyed Kororareka (Russell), in the Bay of Islands) ; their prospects were soon beclouded, and the years following were one long struggle with the most adverse circumstances.

In November, 1845, Captain Grey (who became Sir George Grey, K.C.B., in 1848) took office. Captain Grey held the commission as Lieutenant-Governor of the Colony until January 1, 1848, when he was sworn in as Governor-in-Chief over the Islands of New Zealand, and as Governor of the Provinces of the North and South Islands. After the passing of the New Zealand Constitution Act, Sir George Grey was, on September 13, 1852, appointed Governor of the Colony, assuming the duties on March 7, 1853.

In August, 1847, Mr. E. J. Eyre was appointed Lieutenant-Governor of the South Island ; he was sworn in 28th of January, 1848. On the 3rd of January, 1848, Major-General George Dean Pitt was appointed Lieutenant-Governor of the North Island ; he was sworn in 14th of February, 1848 ; died 8th of January, 1851 ; and was succeeded as Lieutenant-Governor by Lieutenant-Colonel Wynward, 14th of April, 1851 ; sworn in, 26th of April, 1851. The duties of the Lieutenant-Governors ceased on the assumption by Sir George Grey of the office of Governor. Under his governorship the Colony made considerable progress.

The rule of Governor Browne (from September 6, 1855, to October 2, 1861) was marked by a fresh outbreak on the part of the Maoris, which again brought the Colony, or rather the North Island, for it is there the Maoris are chiefly located, almost to a standstill. At the expiration of his term of office the population was enumerated at 99,021, the gold yield had risen to 194,234 ozs., the wool exports to 7,855,920 lbs., valued at £523,728, exports—the produce of the Colony—to £1,339,241, and the revenue to £671,500. In 1861, the Harbour Steam Company, which has now developed into the Union Steam Ship Company, began its existence with the small paddle steamer the *Golden Age*

The advent of Sir George Grey, who for the second time was appointed Governor, holding office as administrator from October 3, 1861, to December 4, 1861, and Governor from that date to February 5, 1868, did not much improve matters, as from 1861 to 1865 a desultory war was waged, attended with great bloodshed on both sides. In this struggle the natives were frequently defeated, and a large area of their land confiscated, and for some years after they were troublesome.

The Taranaki war commenced on March 17, 1860. The engagement at Rangiriri took place on November 20, 1863 ; the attack on the Gate Pa Tauranga, when the British troops were repulsed with a loss of 35 killed and 76 wounded, on April 29, 1864 ; and the action at Te Ranga, when the Maoris were defeated with heavy loss, on June 21, 1864. In June, 1868, hostilities began on the West Coast. On January 5, 1869, Te Kooti was defeated with heavy loss at Ngatapu.

In December, 1881, the Maori difficulty may be considered to have been effectually disposed of, and the power of the Maoris to work mischief on a large scale broken for ever. The disaffected Maoris were surrounded by the armed constabulary and the volunteer forces at Parihaka, and seeing the hopelessness of resistance surrendered without a blow.

In 1883 some excitement was caused by the stoppage and arrest of Mr. Hursthouse while on his way to survey the line of railway between the Waikato and Taranaki ; the natives who perpetrated this outrage were afterwards captured and sentenced to various terms of imprisonment. Mr. J. Bryce, then Native Minister, afterwards went through the King country in perfect safety, being courteously treated by the native chiefs. An amnesty was granted to Te Kooti (the author of the Poverty Bay massacre, on November 10, 1868, when 33 Europeans and 37 friendly Maoris were killed), and all native political offenders. In the early part of 1883 the harbour of Kawhia, which had been closed to Europeans for twenty years, was allowed to be opened, and a township laid out without any opposition from the natives.

During 1884 the Minister for Public Works passed right through what has been called the "King Country," with the avowed object of selecting a suitable route for a railway. He was not obstructed in any way, but received, everywhere he went, in a most friendly manner by the natives. At the close of 1883 Mr. Bryce succeeded in inducing the greater chiefs of the Waikato or King Country to have their lands surveyed, with a view to the titles being determined in the Native Lands Court. This survey was completed, the boundaries defined, and the land is now in course of settlement. A Native Reserves Act has also been passed under which large areas may be made inalienable, and managed by the Government for the use and benefit of the natives. In July, 1886, some serious native disturbances took place in the Hawera district, the Maoris, at the instigation of Te Whiti, asserting their rights to confiscated land by entering upon it and ploughing it up. Conflicts took place between the Maoris and colonists, but eventually the ringleaders of the Maoris, including Te Whiti, were arrested and imprisoned.

In the spring of 1887 two disturbances took place between the natives, one being caused by Hauhau fanatics. Prompt measures were taken by the police, assisted by a detachment of the permanent artillery force, and the ringleaders were arrested and fined. In February, 1889, Te Kooti, the leader of the Poverty Bay massacre, accompanied by 200 armed followers, attempted to visit the Poverty Bay district. The settlers and relatives of his victims rose in arms to oppose him, and a conflict seemed imminent, which was averted by the Government arresting him and binding him over to keep the peace. After this he again attempted to create disturbance, but his Maori followers were not inclined to look on him as such a mighty leader as they once regarded him, and his death, which occurred a year or two back has removed all fear of any further serious trouble with them.

In 1852-3 constitutional Government was inaugurated, the first session of the General Assembly taking place at Auckland on May 24, 1854. This Constitution, framed (with some alterations) on the lines proposed by Sir George Grey, was similar in principle to that of the other colonies, but modified in detail to suit the circumstances of New Zealand. It provided a governor, a legislative council, composed of members nominated by the Crown for life, and a House of Representatives elected by the people for five years. The Colony was divided into six provinces (afterwards increased to nine), each having an elective superintendent and elective provincial council. (In 1857 a colonial Act was passed doing away with provincial government.) Prior to this the form of government consisted of a governor and commander-in-chief, with an executive council of three public officers, nominees of the Crown, and a legislative council, comprising the members of the executive council, and the three senior justices of the peace. In 1865 the seat of Government was transferred from Auckland to Wellington, the latter city being more central. Sir George Grey retired from the Governorship on February 5, 1868 ; he was succeeded by Sir George Bowen, who held office till March 19, 1873. (About this time the "Public Works Policy" was initiated by the passing of the Immigration and Public Works and Allied Acts. These provided for the expenditure of ten millions of money, for the introduction of immigrants, the acquisition of land from the Maoris in the North Island, the supply of water to the gold-fields, and the construction of railways, roads, and telegraphs.) From March 21 the government was administered by Sir George A. Arney, the Chief Justice, till June 14, when he was superseded by Sir James Fergusson. Sir James Fergusson was Governor till December 3, 1874, when he was succeeded by the Marquis of Normanby, who after a term of nearly five years followed Sir George Bowen in the Governorship of Victoria. During the interregnum Mr. Chief Justice Prendergast acted as Administrator. Sir Hercules Robinson (Lord Rosmead) assumed office on March 27, 1879, and during his short term of office was as successful in the administration of New Zealand affairs as he had been in those of New South Wales. He was succeeded by Sir Arthur Gordon, formerly Governor of the Fiji Islands. During Governor Gordon's absence the Chief Justice, Sir James Prendergast, administered the government. The cloud of depression which spread over the other colonies about this time did not miss New Zealand, and a check in its progress occurred. It was found necessary to enter upon a policy of general retrenchment ; the Public Works scheme was partially suspended, a deduction of ten per cent. was made on all salaries and wages, the civil service was cur-

tailed, immigration was practically stopped, and in various directions efforts were made to bring the expenditure of the colony within the limits of its income. Sir Arthur Gordon's views on the native question were not in accordance with those of the local authorities, and his administration was not a popular one. He retired in August, 1882, and was succeeded on January 20, 1883, by Sir W. Francis D. Jervois, G.C.M.G., late Governor of South Australia, who was accorded an enthusiastic reception, and who made himself very popular. In the early part of 1884 he made a tour of the North Island. He was warmly welcomed by the Maoris in all places, and received from them expressions of loyalty to the Queen and high regard for himself.

Sir W. F. D. Jervois' term of office expired in January, 1888. His departure caused universal regret throughout the colony. "Never in the history of New Zealand has a governor been so deservedly popular." On May 2, 1889, the Earl of Onslow, G.C.M.G., took the oaths of office as his successor. The new Governor soon established himself a warm favourite with the people. In the middle of 1891 he travelled through the most dangerous part of the land that is still occupied by the Maories, and also journeyed all over the South Island.

In November, 1889, the New Zealand and South Seas Exhibition was opened by Governor Onslow in Dunedin. The exhibition covered thirteen acres, and was closed in April 1890. The Earl of Onslow retired on Feb. 24, 1892, and the Government was administered by Sir James Prendergast, Chief Justice of the colony, until the following 7th of June, when the Earl of Glasgow, G.C.M.G., assumed office. After remaining about five years the Earl of Glasgow retired on February 6, 1897. The Chief Justice again assumed the administration of the Government. On April 6, 1897, the Right Hon. the Earl of Ranfurly, K.C.M.G., received his commission as Governor and Commander-in-Chief of the Colony of New Zealand and its dependencies and assumed office on August 10.

In June, 1897, the Jubilee of Queen Victoria was celebrated with great rejoicings throughout the colony. In the same month the Hon. R. Seddon represented the colony in London at the Jubilee celebrations, at which a contingent of New Zealand forces were present.

The year 1898 will be memorable as the year in which one of New Zealand's greatest men. Sir George Grey, K.C.B., died; for the passing of the Divorce Bill, and the passing of the Old Age Pensions Act.

In 1899 Sir Julius Vogel, K.C.M.G., died; the Victoria University College was opened at Wellington, and Sir Robert Stout, K.C.M.G., was appointed Chief Justice

During 1900 the question of annexing the Cook Islands to New Zealand and the formation of an Oceanic Federation with New Zealand as the governing State caused considerable discussion throughout New Zealand and the Australian colonies.

Divisions.—The Colony is divided into nine provincial districts, and two island districts-names and population (census 1896) as follows:—Auckland, (153,564), Taranaki, (31,175), Hawke's Bay (34,038), Wellington (121,854), Marlborough (12,483), Nelson (35,734), Westland (14,469), Canterbury (135,858), Otago (163,944), Chatham Islands (234), Kermadec Islands (7). These Provincial districts are divided into 85 counties and 97 boroughs; the names and population of the counties as at census of 1896 are as follows:—Mongonui (1,889), Whangaroa (969), Hokianga (1,909), Bay of Islands (2,723), Hobson (3,750), Whangarei (6,847), Rodney (3,464), Otamatea (2,483), Waitemata (6,762), Eden (15,940), Manukau (12,185), Coromandel (4,987), Thames (4,515), Ohinemuri (4,761), Piako (2,706), Tauranga (1,622), Whakatane (1,988), Rotorua (840), East Taupo (232), West Taupo (156), Waiapu (447), Cook (5,287), Waikato (2,814), Waipa (3,584). Raglan (1,545), Kawhia (598), Clifton (1,450), Taranaki (9,970), Stratford (5,141), Hawera (6,934), Patea (3,084), Waitotara (2,737), Wanganui (3,095), Rangitikei (6,030), Kiwitea (2,428), Oroua (6,450), Pohangina (1,351), Manawatu (2,709), Horowhenua (3,792), Wairoa (1,490), Hawke's Bay (6,894), Waipawa (8,866), Patangata (2,374), Pahiatua (3,208), Wairarapa, North (7,209), Wairarapa, South (5,409), Hutt (5,750), Sounds (747), Marlborough (6,330), Kaikoura (1,575), Collingwood (2,509), Waimea (8,591), Buller (4,833), Inangahua (4,254), Grey (4,592), Westland (4,723), Amuri (916), Cheviot (1,042), Ashley (11,913), Akaroa (3,886), Ashburton (10,820), Selwyn (30,090), Geraldine (7,499), Mackenzie (1,514), Levels (7,723), Waimate (4,777), Waitaki, (8,876), Waihemo (2,148), Waikouaiti (4,389), Maniototo (3,742), Vincent (4,090), Lake (2,663), Peninsula (2,645), Taieri (6,950), Bruce (4,828), Tuapeka (6,477), Clutha (6,564), Southland (21,603), Wallace (6,657), Fiord (151), Stewart Island (244). Each county is divided into ridings. The governing body of the county is an elective council and an elective chairman. For local Government purposes there are 238 road districts and 36 town districts. There are also 101 municipal boroughs. The main roads are maintained by the County Councils, the Road Boards having charge of the by-roads.

The revenue and other receipts of counties for 1898–99 were £489,641; the expenditure £493,241; public works absorbed £341,486; management £46,500; hospitals and charities, £37,402. The total receipts of boroughs for 1898-99 were £657,202 and expenditure £558,070; management absorbed £54,155; other expenditure was £558,070. Amount of liability, including outstanding loans, £3,196,781.

The value of all property in the Colony according to the latest valuation made in 1898 was :—

	Capital value.	Unimproved value.	Value of Improvements.
	£	£	£
Counties ...	95,710,266	63,732,516	31,977,750
Boroughs ...	42,881,081	20,668,728	22,212,353
Total ..	138,591,347	84,401.244	54,190,103

Area and Dimensions.—New Zealand is situated about 1,200 miles south-east of Australia, and its boundaries extend from 33° to 53° south latitude, and from 162° east longitude to 173° of west longitude. It is very nearly the antipodes of Great Britain. The area is about 104,471 square miles, or 66,871,440 acres, distributed as follows: The North Island, with its adjacent islets, 44,468 square miles, or 28,459,520 acres; the Middle Island, with its adjacent islets, 58,525 square miles, or 37,456,000 acres; and the South or Stewart Island, and adjacent islands, 665 square miles, or 425,390 acres; the group being almost equal to the British Isles. The extreme length of the North Island (Maori name, Te Ika a Maui, meaning "The fish of Maui," a native hero or god deity) is about 515 miles. It has a coast line of 2,200 miles. The Middle Island (Maori name, Te Wai Pounamu, meaning "The place of the Greenstone" is about 525 statute miles long, by about 180 miles in extreme breadth. This has a coast line of 2,000 miles. Stewart's Island (Maori name, Rakiura), has a coast line of 130 miles. Cook Strait, a channel varying from 16 to 90 miles in width, separates the Northern and Middle Islands, and Foveaux Strait, about 15 miles broad, separates Stewart Island from the Middle Island. The South Pacific Ocean is the boundary of New Zealand on all sides. The following islands also belong to and form part of the Colony of New Zealand :—The Chatham Islands, situated about 536 miles to the eastward of Lyttelton, with an area of 375 square miles, or 240,000 acres; the Auckland Islands, about 200 miles to the south of Stewart Island, area 210,650 acres; Campbell Islands, area 45,440 acres; Antipodes Islands, about 458 miles in a south-easterly direction from Port Chalmers, area 12,960 acres; the Bounty Islands, about 415 miles in an east-south-easterly direction from Port Chalmers, area 3,300 acres; the Kermadec Group, about 614 miles to the north-east of Russell, in the Bay of Islands, area of group, about 8,208 acres. The Cook, or Hervey Islands, Savage Island, and the Penrhyn Group have been annexed by the New Zealand Government. The islands adjacent to New Zealand comprise, among others—off the North Island, Three Kings, Kapiti, Mana, Portland, White Whale, Motiti, Mayor, Alderman, Slipper, Great Mercury Island, Great and Little Barrier Islands, Waiheke, Rangitoto, Motutapu, and Kawau. Off the Middle Island, Resolution, Solander, Ruapuke, Arapawa, D'Urville Islands.

Geographical Features.—*Bays and Harbours.*—The principal inlets of New Zealand are :— the Gulf of Hauraki, Hawke Bay, the Bay of Islands, Tauranga Bay, the Bay of Plenty, and Poverty Bay on the east side of the North Island; Port Nicholson and Palliser Bay on the South Coast; the harbours of Manukau, Hokianga, Kawhia, Aotea and Kaipara on the west side. In the Middle Island, Golden or Massacre Bay and Tasman Bay in the north, Cloudy Bay on the north-east, and Pegasus Bay, Molyneux Bay, Port Lyttelton, Akaroa Harbour and Port Chalmers, on the East Coast, and Bluff Harbour on the south coast are the greatest indentations. On the western coast are Chalky Inlet, Dusky Bay, Milford, and several other Sounds, noted for their beautiful scenery. In Stewart Island are Port Pegasus on the South, and Paterson Inlet on the East.

Straits.—Cook Strait, dividing the North and Middle Island; Foveaux Strait, dividing the Middle Island from Stewart Island; Tamaki Strait, between Waiheke Island and the mainland; Coromandel Channel, between Great Barrier Island and the northern extremity of the Coromandel Peninsula; and French Pass, between d'Urville Island and the North coast of the Middle Island.

Capes.—The principal headlands are North Cape, Cape Maria Van Diemen, Cape Brett, Cape Colville, East Cape, Cape Kidnappers, Cape Turnagain, Cape Palliser, Cape Terawiti, Cape Egmont, Albatross Point, and Reef Point in the North Island; and Capes Farewell, Francis Head, Jackson, Campbell, Saunders, Providence, Foulwind, and the Bluff in the Middle Island. South Cape is at the south of Stewart Island.

Mountains.—New Zealand in many parts is very mountainous; in fact, the whole country is of volcanic origin; chains of mountains run through the islands from north to south. "The most striking and important feature of New Zealand is an extensive longitudinal mountain range, which, interrupted by Cook Strait, runs through the whole length of the two larger islands in the direction of SW. to NE. from the South cape to the East cape. This range consisting of up-heaved zones of stratified and massive rocks of different ages, constitutes the powerful backbone of the Island." In the North Island are the Coromandel Range, the Pakaroa Range and the Wairoa Range; these ranges traverse the province of Auckland. In the province of Wellington is the Ruahine Range, which extends about 80 miles. There is also an active volcano called Tongariro, which attains an elevation of 7,515 feet; and Mount Tarawera believed to be a wholly extinct volcano, but in 1886 it broke out with terrific violence). The peak of Ruapehu rises to an elevation of 9,195 feet above the sea-level, and has a remarkable crater-lake on its summit. Mount Egmont is about 8,300 feet high; though not the highest it is in many respects the most strikingly remarkable mountain in the colony; it rises in an almost perfect cone from a base of 30 miles in diameter, and its summit, which is an extinct crater, is covered with perpetual snow. In the Middle Island are the Southern Alps, stretching along a distance of nearly 200 miles, many of the heights being covered with perpetual snow, of which Mount Cook, in the province of Canterbury, is the loftiest peak, being 12,349 feet high. Mount Hochstetter, ascended in 1883 by Dr. Von Ledenfeld, is estimated to be 11,200 feet high. Mount Arthur, near Nelson, is about 8,000 feet high; many of the extreme points of elevation are covered with snow all the year round. In the provincial district of Otago the country is

very rough, and some of the mountains attain to a considerable altitude; the chief ranges are the Dunstan, Kakanui, Hawkdun, Umbrella and Eyre. Among the highest peaks may be named Mount Aspiring, 9,940 feet high, Mount Earnslaw, a glacier mountain at the head of Lake Wakatipu, 9,165 feet (scaled by Mr. Herbert Jones and Mr. Charles Clive in March, 1893), Mount Tutoko, near Martin's Bay, 8,000 feet, Double Cone (7,688 feet), and Mount St. Bathans, 6,600 feet. In Stewart Island the highest peaks are Mount Anglem, 3,200 feet high, and Rakeahua, 2,110 feet.

Plains.—The Canterbury Plains are the most extensive; they spread from the seaboard at Banks Peninsula to the foot of the Southern Alps; other plains are the Waikato (Middle and Lower), Waimea, at the head of Tasman Bay, Wairau, Awatere, Hurunui, Karamea, and the Manuherikia, Taieri, and Tokomairiro Plains.

Lakes.—The largest lake in the colony is Lake Taupo, situated in the provincial district of Auckland. It has a diameter of 20 miles, an area of about 200 square miles, and is of unknown depth. Other lakes in the North Island are Tarawera, Rotorua (the principal seat of hydrothermal action, the district being generally known as the Hot or Thermal-Springs District), Rotoiti and Rotomahana (this last-mentioned lake by the volcanic eruption which took place in June, 1886, has been considerably altered), south of the Bay of Plenty. Te Anau is the largest lake in the Middle Island, having an area of 132 square miles; Lake Manapori has an area of 48 square miles. Other inland sheets of water in the Middle Island are Lakes Coleridge and Tekapo, in the province of Canterbury (Lake Ellesmere in this province is almost adjacent to the seashore); Lakes Wanaka, McKerrow, and Wakatipu (area about 114 square miles), in the province of Otago; and Lake Brunner, in the province of Westland. Lake Ida, on the Mackenzie River, was discovered in 1895.

Rivers.—The principal rivers in the North Island are the Waikato, rising near Lake Taupo, and flowing about 170 miles north, entering into the sea to the south of Manukau Harbour; the Waipa is a tributary of the Waikato; the Thames, or Waiho, also taking a northerly course, and emptying itself in the Gulf of Hauraki; the Wairoa North, flowing through the Auckland peninsula, and debouching into Kaipara Harbour; the Wanganui, about 120 miles long, discharging its waters into the South Taranaki Bight; the Hutt, flowing into the sea at Port Nicholson. In the Middle Island, the Molyneux or Clutha, with several tributaries and the recipient also of the waters of Lakes Hawea, Wanaka, and Wakatipu, is the largest river in New Zealand, and flows in a south-easterly direction into the sea at Molyneux Bay; the Avon, on which the city of Christchurch is situated; the Waimakariri, entering the sea at Kaiapoi Harbour; the Mataura, flowing south through Southland into Toetoe Bay, in Foveaux Strait; the Waitaki, which reaches the sea at the southern end of the Canterbury Bight; the Teremakau, on the west coast above Hokitika; the Hollyford, flowing through Lake McKerrow into the South Pacific Ocean at Martin's Bay; the Taieri, in Otago, flowing south-east into the sea; and the Rakaia, in Canterbury, flowing east into Canterbury Bight.

Climate.—The climate, as a whole, is agreeable, having neither the extreme of heat nor cold; but it varies considerably, according to the different portions of the colony, which extend over upwards of thirteen degrees of latitude. The changes of weather and temperature are, however, sometimes very sudden, the transition from heat to cold, from sunshine to rain, from calms to gales, being so frequent as to prevent its being said that there is any uniformly wet or dry season in the year. Compared with Great Britain, New Zealand, so far as its general salubrity can be ascertained, possesses a marked superiority. The average death-rate in 1896 was 9·10, the lowest for many years; in 1899 it reached 10·24. Compared with the Australian Colonies, New Zealand stands first as regards the lowness of its death-rate. January and February, which months correspond to July and August in England, are the warmest months in New Zealand, and July and August, corresponding to January and February, the coldest. Rome, Montpellier, and Milan possess climates having nearly the same mean annual temperature as the North Island of New Zealand; and Jersey, one of the Channel Islands, in this respect resembles the northern portion of the South Island. The climate of London is seven degrees colder than the climate of the North Island, and four degrees colder than the South Island. The nights are about twelve degrees colder than the days. The mean temperature of places in New Zealand is lower than that experienced in corresponding latitudes in Europe; but the temperature in New Zealand is higher than that experienced in corresponding latitudes in America. The mean annual temperature of the different seasons for the whole colony is: In spring, 55°; in summer, 63°; in autumn, 57°; and in winter, 48°. Meteorological observations for the year 1899 were as follows:—*Auckland*, mean temperature 58·7°, max. temp. 84·5°, min. 37·0°; number of days on which rain fell, 151, rainfall, 34·440 ins. *Wellington*, mean temp., 54·7°, max. 76·3°, min. 31·0°, rainy days 181, rainfall, 52·715 ins. *Dunedin*, mean temp. 49·8°, max. 81·0°, min. 23·0°, rainy days, 159, rainfall 38·621 ins. *New Plymouth*, mean temp. 59·4, max. 89·0, min. 33·0°, rainy days 207, rainfall 64·72 ins. *Chatham Islands*, mean temp. 54·3° max. 69·0°, min. 31·0°, rainy days 187, rainfall 30·460 ins. *Hokitika* mean temp. 53·6, max. 82·5, min. 27·0, rainy days 152, rainfall 104·780 ins. Snow fell on five days at Dunedin, one at Wellington, none at Hokitika, New Plymouth, Auckland or Chatham Islands. There is a greater rainfall on the west than on the east coast. Snow never lies on the ground at the level of the sea in the North Island, and not very often in the South Island; but the summit of Ruapehu, the highest mountain in the North Island, and also the great mountain chains in the South Island, notably Mount Cook, are covered with snow in winter, but only the highest summits through summer. The snow line is about 7,500 feet high. Ice is occasionally seen in winter from one extremity of New Zealand to the other, but frosts are comparatively slight to the north of Napier, although the North Cape is at times covered with hoar-frost. The spring season commences on September 23, and extends to December 20; the summer extends from this date to March 20, when autumn commences, and lasts till June 21, winter occupying the remaining fourth of the year. The prevailing winds are from the north-west and the south-west, with occasional storms from other quarters. The whole of the colony is somewhat noted for its breezes—frequently culminating in moderate gales, but "full gales" are infrequent. During 1899 the following figures, in addition to those already given, were recorded at six meteorological stations in the Colony. Auckland: gales or high winds occurred on 43 days; Wellington: gales on 61 days; Dunedin: gales on 25 days. New Plymouth, gales on 53 days; Hokitika, gales on 22 days; Chatham Islands, gales on 37 days.

Slight earthquakes have happened frequently, in all parts of New Zealand, the majority being in the Wellington and Napier districts, 4 occurring in the former during 1899; but except on a few occasions during the last 50 years they have done no damage to property.

In June, 1886, a terrible hydrothermic explosion took place in what is known as the Hot Lake District of the North Island. Soon after midnight on the 10th loud explosions were heard, and local shocks were experienced, which were followed by Mount Tarawera breaking out as an active volcano, hurling ashes, dust, and red hot stones to an immense height, whence these ejecta were distributed over a wide area of country, some of the ashes travelling nearly fifty miles. During the outburst at Lake Rotomahana, the water of the lake and its clay-bed, with the material of the Pink and White Terraces, were suddenly blown into the air as a vast mud-cloud, which, in its descent, covered the surrounding country to various depths, ranging up to thirty feet, burying the native villages of Wairoa and Te Ariki, and thrusting the village of Mourea bodily into Lake Tarawera, by which it was completely swallowed up, the total number of lives lost being estimated at 104 (principally natives). The violence of the explosion only lasted a few hours, but this sufficed to change the entire aspect of the country for miles round; but these accumulations of volcanic sand are now covered with dense vegetation.

On September 1st, 1888, a violent earthquake was experienced over the whole of the South Island and a portion of the North, At Christchurch many buildings, including the Cathedral, were injured, and in many other places more or less damage was done.

In 1895 and 1899, Ruapehu and Ngauruhoe were in considerable activity, but no damage resulted.

The mean height of the barometer during 1899 was as follows:—Auckland, 30·013 in.; Wellington, 29·966: Dunedin, 29·881 in.: Chatham Islands, 29·830: Hokitika, 29·949: New Plymouth, 30·036.

Lake Country and Scenery.—The Lake country (of which Rotorua is the centre) covers an area of about 100 geographical miles by 20, or over a million and a quarter acres. In addition to the wonderful series of geysers and hot springs at Whakarewarewa and Ohinemutu there is the famed Hinemoa bath on Mokoia, the crystal springs of Hamarana, the chain of lakes—Rotorua, Rotoiti, Rotoehu, Rotoma, Okotaina, Tarawera, Tikatapu, Rotokakahi, etc. South of these again is the vast collection of boiling springs around Mauongaonga and Kakaramea, and extending thence to the Ohaki and Waikato, and on the other hand to Orakei-Korako, is an all but unbroken system of hot springs and geyers. South of the Orakei-Korako again is Wairakei, with its wondrous geyser valley, Karapiti, Huka Falls, Tapuaeharuru, and the Tauwhara system. Further south again, below Taupo, the springs are equally numerous and equally valuable medicinally, perhaps in some respects, and for some diseases, more so, as they are largely impregnated with iodine, which is absent from the springs around Rotorua, they being sulphuric, alkaline, and acidic. Nearer Auckland again, at Te Aroha, are some valuable mineral baths, the water of every temperature, and containing both lithia and iodine. These last are specially valuable for gout. Then there are hot springs to the north of Auckland, at White Island, on the East Coast, and at Hanmer in Canterbury. As to scenery, the tourist has in the Lake country Lake Taupo, as large as the Lake of Geneva, while in view of it are Ruapehu, the snow-crowned monarch of the North Island, 9,000 feet high; Tongariro, a volcano, occasionally active (6,500 feet); and Mount Egmont, in Taranaki, an extinct volcano, but little less inferior to Ruapehu in height. In the Middle Island there are also the wonders of the Otira Gorge; the Alpine scenery of the Middle Island, Mount Cook and Aorangi, "the cloud piercer," holding their secrets secure even from skilled Alpine climbers till within the last few years. While the Southern Alps offer great attractions to those tired of the old tourist routes of Switzerland, the West Coast Sounds rival the glories of the Fiords of Norway, and the Sutherland Falls are among the highest in the world, the water falling nearly 900 feet, from the top to the bottom. The New Zealand Parliament not long since passed a Vote of no less a sum than £50,000 to open out by tracks and roads the picturesque scenery of New Zealand to the Colonial and British tourist. Through this means the far-famed West Coast Sounds, no fewer than thirteen in number, all lying within a distance of 120 miles, are becoming more accessible to the lover of the grand and beautiful in Nature.

Mineral Resources.—The natural mineral resources of New Zealand are very great, and have exercised in the past a most important influence on the development and progress of the colony.

The discovery of gold in New South Wales and Victoria was quickly followed by New Zealand. In 1852 Mr. Charles Ring found gold in the Kapanga Creek, at Coromandel, and claimed the reward of £500 offered by a committee in Auckland for the discovery of a payable field. In the year 1857 gold was found at Collingwood, in the Nelson district, by Mr. William Lightband, and in 1859 alluvial deposits were found in the Buller River, further to the south-west, by Mr. John Rochfort. In 1861 Mr. Gabriel Read reported the discovery of gold at Waitahuna and Tuapeka Rivers, in Otago, for which he received a reward of £500, and this was subsequently supplemented by an equal amount. This led to a great influx of miners from the Australian Colonies, and during the five months succeeding Mr. Read's discovery the escort brought down to Dunedin upwards of 200,000 ozs., valued at over three-quarters of a million sterling. In October, 1861, gold-mining was resumed at Coromandel, which had been neglected for some years, owing to the discoveries in Nelson and Otago. In 1865 gold was found in the Westland district of the South Island, and in that year 289,897 ozs. were exported, followed by 552,572 ozs. in 1866, and 511,974 ozs. in 1867, or 1,354,443 ozs. in three years. The Thames gold-field was opened in 1867, and gave very rich returns for some years, 330,326 ozs. of gold, valued at £1,188,708, having been exported from Auckland in the year 1871, the greatest portion of which came from the Thames.

Gold is obtained in New Zealand in two forms—as veins in, and fine gold scattered through, quartz reefs; and as alluvial gold, washed from the sand and gravel in the valleys and river beds of mountain ranges; also largely from the sea beaches of the West Coast of the South Island, and in small pockets of gold under the boulders and stones that lie on the sandy beaches between Jackson's Bay and Martin's Bay; while in some of the river beds, chiefly in Otago, it is got by dredging.

Quartz mining is carried on at Coromandel, the Thames Valley, Te Aroha, Waiorongomai, Te Puke; and in the southern part of the North Island, in the vicinity of Wellington, quartz reefs have been worked. In the South Island: At Taitapu and the Aorere Valley, Collingwood district; at Lyell, Reefton, and in the Victoria Mountains, in the Buller Valley; at Cedar Creek and near Ross, in the Totara and Mikonui Valleys; in the Otago district; in the Taieri Valley, in the basin of the Clutha, at Cromwell and Macetown; further west in the Shotover Valley and that of the Rees River, above Lake Wakatipu; and also at Preservation Inlet, in the south-west portion of Otago. These districts, from Coromandel in the North to the Preservation Inlet on the South extend over an area of about 1,000 miles.

Alluvial mining is carried on in the Marlborough district; in Nelson and the West Coast, at the Aorere Valley, Motueka Valley, in many places within the Buller watershed, and on the coast line north and south of Westport. Large gold-fields exist in the Grey Valley, in the New River District; in the Teremakau Valley, at the Greenstone and Kumara; at the Waimea; at Humphrey's Gully, in the Arahura Valley; at Kanieri, Woodstock, Rimu, Back Creek, and Seddon Terrace, in the Hokitika Valley; and further south, at Ross, very rich diggings have been and still are being worked. In Otago, at Maerewhenua and some other localities in the Waitaki Valley; at Naseby, Kyeburn, Mount Buster, Hyde, Hamilton's, Sowburn, Garibaldi, and several other localities in the Taieri watershed; at Hill's Creek, St. Bathan's, Vinegar Hill, Cambrians, Tinkers, Ophir, and many other localities in the Manuherikia Valley; at Tuapeka, Waitahuna, Roxburgh, Bald Hill Flat, Alexandra, and the Dunstan (or Clyde), in the Middle Clutha Valley; at Bannockburn, Cromwell, and many localities in the Upper Clutha Valley; in the Nevis Valley and the Kawarau Gorge; and in the Arrow and Shotover Rivers, numerous and famous diggings have been and are being worked; and also in Southland and South-West Otago, at Round Hill, Orepuki, and Wilson's River.

During recent years much attention has been paid to dredging, especially in the Otago district, with very satisfactory results. Several dredges are also at work on the West Coast. There are now about 100 dredges in operation, with about 100 others under construction.

The mines at Preservation Inlet, Macetown, and Bendigo show reduced production during the past year.

Up to March 31st, 1900, the quantity of gold exported through the Customs was 14,331,208 ozs., valued at £56,339,718. The following are the returns for the year ending 31st March, 1900:—

District.	Ozs.	Value.
Auckland	168,836 ...	£625,207
Marlborough ...	344 ...	1,382
Nelson	2,589 ...	10,251
West Coast	94,081 ...	376,076
Canterbury	22 ...	87
Otago	126,796 ...	513,341
Totals	392,668 ozs.	£1,526,344

The total production of gold and silver obtained during the year was over £1,554,011.

The number of miners employed in quartz and alluvial mining was 13,291 for the year ending 31st March, 1900; for year ending March 31st, 1899, 13,672.

THE CYANIDE PROCESS.—Royalties amounting to £3,254 17s. have been paid to the Government by licensees in the colony during the two years and a half since the patent rights were acquired for New Zealand, or nearly one-third of the cost incurred.

PROSPECTING.—During the year ended 31st March, 1900, the sum of £1,400 9s. 6d. was expended in subsidies to parties of miners and prospecting associations actually engaged in the work of prospecting for minerals.

SILVER has been found in various localities, and occurs mixed with the gold in Te Aroha, Thames, Ohinemuri, and Coromandel gold-fields, in the North Island. It is found in the watershed of the Wangapeka and Owen Rivers; and at Preservation Inlet, in the South Island. Total quantity exported from the Colony, 1,728,351 ozs., value £276,669; in 1897, 183,892 ozs., value £20,872; in 1898, 293,851 ozs., value £33,107: 1899, 349,338 ozs., £40,838.

COPPER has been worked at the Great Barrier and Kawau Islands, and at Aniseed Valley, in the Nelson district, where mining is likely to be resumed shortly. Deposits have been found at D'Urville Island, Dusky Sound, Preservation Inlet, and in Otago at Waipori and Moke Creek. A lode of chalcopyrite ore was discovered and examined at Whangaroa by the Government geologist, who considers it one of the best lodes in the Colony. Total quantity exported from the Colony, 1,396½ tons, value £17,938.

ANTIMONY occurs at Endeavour Inlet, near Cook Strait; at the Taieri River, Otago, near Barewood and at the Carrick Range, in Central Otago; at Reefton, in connection with auriferous quartz; and at the Bay of Islands. Total quantity exported, 3,610 tons, value £52,361. Owing to the low prices prevailing very little antimony is now mined.

TIN has been found in Stewart's Island, and wolfram in connection with the deposits, but no work of any importance has yet been done

MANGANESE is found in the Bay of Islands and Whangarei counties, Auckland; in the Wellington district; at the Malvern Hills and Ashley River, Canterbury; in Bruce County, Otago; and in Westland. Total quantity exported, 18,637½ tons, value £59,644; in 1897, 180 tons, value £541 in 1898, 217 tons, value £703; 1899, 135 tons, £407.

DIAMONDS were said to have been discovered in 1898, about 12 miles north of Auckland.

OPALS of high quality, and apparently commercial quantity and size, have been found in the Tairua Valley, in the Cape Colville Peninsula. They also occur in the Ohinemuri Valley, and there is promise of an important industry developing in this direction.

RUBIES have been found near Rimu, in the Westland district, embedded in boulders, intermixed with alluvial drift, and were pronounced the true Oriental rubies by Professor Ulrich.

COAL SEAMS of considerable thickness are being worked at several places in the North Island—at Kawakawa (Bay of Islands), Whangarei, and Waikato; in the South Island, at the Grey River, Mount Rochfort, Malvern, Green Island, and Clutha Valley. Brown coal and lignite are widely distributed over Otago, and are of great importance in developing gold mining, woollen, and other industries. The bituminous coal found on the West Coast of the Middle Island is equal to any in the world, and for heat-generating properties tests made at the Admiralty dockyards have shown it to be of very high quality. The total area of the coal-fields of the Colony is estimated at nearly half a million acres. The approximate total output of coal (less exports), up to 31st December, 1899, was 12,338,069 tons, value £6,076,917. Total quantity exported, 1,120,811 tons, value £1,091,707; in 1897, 76,073 tons, value £69,595; in 1898, 56,332 tons, value £50,381; 1899, 89,480 tons, value £83,085. There were 160 mines working, employing 2,150 men, the average output being 452·96 tons. Total quantity of coke exported 16,310 tons, value £24,804.

KAURI GUM is a very important industry in the Auckland district. It is found in large and small lumps, some pieces weighing as much as 100 lbs., while in other cases the fragments picked up by the diggers are only about the size of a walnut. Transparent or semi-transparent specimens fetch very high prices. From 1884 to 1895 the average price ranged from £43 16s. 8d. to £61 8s. 3d. per ton. The total area of the gum-fields is estimated at about a million and a half acres, and 5,000 to 10,000 men find employment by digging the gum, Total quantity exported up to 31st December, 1899, 211,592 tons, value £9,707,538; in 1897, 6,641 tons, value £398,010; in 1898, 9,905 tons, value £586,767; in 1899, 11,116 tons, value £607,919.

PETROLEUM indications are found in the East district of Auckland, at Poverty Bay, and in the Waiapu Valley. Indications of mineral oil have also been found at Taranaki, and have been known to exist in that district since 1866. In recent years attempts have been made to obtain oil in commercial quantities, but up to the present time the results have not quite justified anticipations, the water and sand which got into the bores, one of which was sunk to a depth of nearly 2,000 feet, proving a great hindrance to successful and payable working.

SULPHUR is found in several parts of the North Island, and at Tikitere near Roturua is now being profitably worked; 1,227 tons were exported in 1899, principally to Sydney.

IRON ORE.—There are, as yet, no further developments with regard either to the iron-deposits in the Middle Island or to the immense quantities of iron sand on the Taranaki coast; but the present high price of iron, combined with the growing demand for that metal, should lead to the attention of capitalists being directed to the colony as a suitable field for the establishment of smelting-works on a large scale. With a view to encouraging the introduction of sufficient capital for the erection of such works, the Government are prepared to consider favourably a proposal based on the following lines: That a company shall be formed with a capital of not less than £200,000; that of this £200,000 £100,000 shall be expended in acquiring lands, erecting buildings, and the necessary plant and appliances. This having been done, that the Government shall grant a bonus of £1 per ton on the first £20,000 tons of marketable iron or steel produced; that the iron and steel required for the colony shall be

taken from the company at a margin above the market rates ruling beyond the colony, allowing freights.

Building stone, also marble and granite, are found in several localities.

HEMATITE PAINT is being produced at Thames.

SHALE OIL.—A company for the manufacture of shale-oil has been formed at Orepuki.

In his annual statement for 1900, the Minister of Mines says:—"The mining industry generally may be described as being on a satisfactory footing. During the year under review, there has been a marked increase in the production of gold, silver, coal, and other minerals (including kauri-gum), representing a value of nearly half a million sterling in comparison with that of the year preceding.

"When the development-works in progress at many mines are completed, and the large number of dredges now in course of construction have been put to work, I confidently expect to find the returns of gold produced will materially increase. There is also every indication that the output from coal mines will advance."

Products.—The climate and soil of New Zealand are admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain, and many that will not grow in the warmer regions of Australia. The fern-tree grows in great variety and almost endless profusion, and is represented by about 130 species, of which about one-third are believed to be peculiar to New Zealand; other specimens of vegetation are the wild flax or hemp, the toitoi, and raupo, which have many uses, and which may some day serve for paper-making purposes; the first-named is also largely used in the manufacture of rope, and posseesses great tenacity and endurance. The prepared article is now officially known under the name of phormium. It is stated with respect to the flora of New Zealand that two-thirds of the species are entirely confined to the group, and twenty-six of the general are not elsewhere found. In all, there are about 120 indigenous forest trees. These are evergreen, and comprise a large quantity of valuable woods, amongst which are the Kauri Pine (*Dammara Australis*), which furnishes a valuable building wood, beside the well-known Kauri gum, the puriri (*Vitex littoralis*), the matai (black pine) (*Podocarpus spicata*), rimu (red pine), kahikatea (white pine), totara (a species of yew), hinau, mapu, rata, and various species of beech. Most of these trees produce excellent timber for ordinary building purposes; many of them yield handsome furniture woods, whilst the beech is one of the most valuable shipbuilding timbers known, seasoning easily, and being extremely durable. Efforts have been made, particularly in Canterbury and Otago, in the way of planting forest trees, and many thousands of trees have been distributed by the Domain Board of Christchurch, and large areas sown with gum seed and the Tasmanian Black Wattle. Large tracts of country are covered with indigenous grasses of high feeding quality, which support millions of sheep. Many of the more valuable trees, grasses, and plants of Europe, America, and Australia have been imported, and have flourished with a vigour scarcely attained in their own natural habitats. Fruit, too, is abundant all over New Zealand. Even as low as the latitude of Wellington, oranges, lemons, citrons, and loquats are found, while peaches, apples, pears, grapes, apricots, figs, melons, and, indeed, all the ordinary fruits of temperate climates, abound. Orchard-planting is progressing rapidly, and must one day become a very important industry. Linseed is being extensively cultivated. Much attention is also being given to orange and lemon culture in Auckland, both land and clime being, it is said, "pre-eminently well adapted" for the industry. Several sub-tropical plants and trees have also been introduced, and are thriving. Olive culture is very successful, and the manufacture of oil will one day become a very important industry. The wool exported during the twelve months ended December 31, 1899, amounted to 147,169,497 lbs., of the value of £4,324,627.

The Frozen Meat Industry, of phenomenal growth, has resulted in a vast amount of good to the Colony. The first shipment to England took place in 1881, and proved a great success. The enormous expansion of the trade will be seen by comparing the amount exported in 1882, which was 15,244 cwt., valued at £19,339, with that of the twelve months ended December 31, 1899, which reached a total of 1,865,827 cwt., valued at £2,088,856.

The yearly Export of Butter is increasing in a most satisfactory manner, and there is reason to believe that the Colony will in the future be found a heavy competitor with the continent of Europe in shipping butter to the United Kingdom. The total amount exported during the twelve months ended December 31, 1899, was 136,086 cwts., value £571,799. Cheese exported during the twelve months ended December 31, 1899, 69,440 cwts., value £141,818.

The Kauri Gum Industry is still an important one. The amount exported from January 1, 1853, to December 31, 1898, has been 211,592 tons, valued at £9,707,538. During 1899 the gum exported amounted to 1,116 cwt., value £607,919.

The Timber Industry occupies a prominent place in 42 industries. There are about 300 saw-mills in the Colony, employing over 4,000 men, apart from the bushmen and others directly interested as dependent thereon; approximate output in 1900, 300,000,000 sup. feet. The export of timber has largely increased during recent years, and the industry is at present brisk, the export for 1899 being 50,425,741 feet, value £196,749. For completeness and quality of their machinery the mills of the Auckland district are said to be equal to any in the world. The approximate area still under forest in the Colony are estimated to total 19,000,000 acres, including State forest reserves of considerably over a million acres. These forests contain some of the finest timbers in the world for all commercial purposes, including house-building, ship-building, and the manufacture of every description of furniture. At the top of the list, in point of importance, stands the kauri, which attains a height of from 120 to 160 feet, the trunk frequently being 100 feet high before the first branch is reached. The trees frequently attain a diameter at the base of from 10 to 20 feet. It is very durable, being in demand for masts, spars, ship and house-building, and some varieties of it are so beautifully mottled in the grain as to be greatly in demand by cabinet-makers. It is this tree that supplies the great bulk of the tens of thousands of feet of timber annually exported from the colony. A large kauri forest is one of the grandest sights to be found in the entire range of the vegetable kingdom.

Animals.—There are scarcely any indigenous animals in New Zealand; at least, they are comprised in the native dog and rat, and two species of the bat. There are also a few varieties of the lizard. None of the animals of the marsupial tribe peculiar to the Australian continent are to be found in New Zealand, nor are there any snakes. In years past the moa, a gigantic wingless bird of the ostrich tribe, must have been very common: but it has long since disappeared; its bones are now only to be found. There were, it is believed, about twelve species, some attaining the enormous height of 12 feet; their extinction took place before the islands were visited by Europeans. The only mammals are a small rat, a dog (which had been probably introduced since the islands were peopled by the present race), and pigs, the descendants of some left by Captain Cook and the navigators who succeeded him. All kinds of domestic animals have been imported, including a highly bred horned cattle and blood and draught stock, and valuable breeds of sheep from Europe, all of which have thriven well. There are about 133 species of birds peculiar to the colony; of these seventy-three are land birds. The largest bird, the moa, or dinornis, as already stated, is now extinct. Among the land birds are wild ducks, pigeons, hawks, parrots, rails, and kiwis. Domestic poultry have been introduced in large numbers, as well as many species of game, such as hares, pheasants, partridges, quail, and grouse, and the pleasing notes of many an English woodland songster may now be heard. The most unfortunate of the importations has been the rabbit, which has produced most serious mischief. Several descriptions of fish, such as salmon, trout, perch, tench, carp, have been satisfactorily acclimatized. The seas around New Zealand teem with fish, comprising hapuku (a very large species of cod), king fish, frost fish, butter fish, red schnapper, moki, barracouta, kiwai, sole, dory, flounder, and many others of delicious flavour, besides which shoals of mackerel and pilchards occur during certain seasons of the year. Oysters, mussels, cray-fish, and other mollusca and crustacea of great value and of excellent quality abound.

Geological Formation.—Owing to the extensive distribution of mountains and ranges throughout the islands of New Zealand much of the formation is of the character usually allied to hilly country, namely, plutonic, metamorphic, and volcanic rocks. Towards the seaboard the formation belongs to the sedimentary class, except on the West Coast of the North Island, where the rocks are mainly of igneous and volcanic origin. The plains are principally of Pliocene, and Post Tertiary origin. The formation of the two islands differs considerably. In the North Island, with its two active volcanoes and boiling springs, the formation is essentially volcanic, and volcanic action is still active, as was proved by the terrible eruption in June, 1886. There are some primary rocks, and the carbonaceous or coal-bearing formation is strongly marked at different localities in both islands. The formation of the South Island is mainly sedimentary. The ranges are of slate and granite, with silurian sandstones and limestones. Among these ranges are embosomed deep lakes, while the mountain slopes in the higher regions have extensive glacial deposits.

Population.—The estimated population (exclusive of Maoris) of June 30, 1900, was 760,437: Maoris numbered 39,854, or a gross total of 800,291. By the returns of the census taken on April 12th, 1896, the population including Maoris, numbered 743,214—393,088 males, 350,126 females. The Maori population comprised 39,854—21,673 males, 18,181 females. In the total are included 3,685 male and 26 female Chinese; also 1,123 male and 1,136 female half-castes.

The Number of Dwellings (exclusive of Maoris) was: occupied, 136,675; unoccupied, 8,006; building, 577; and 4,664 were tents or dwellings with canvas roofs; 680,407 people dwelt in houses of brick, wood, stone, iron and lath and plaster.

The proportion of Females to 100 males (exclusive of Maoris) was 89·31, the number of persons to the square mile was 6·760, the number of persons to the inhabited dwelling was 4·98, the lowest since 1874, and the number of inhabited dwellings to the square mile 1·358.

The Ages of the People (exclusive of Maoris) were—under five years 83,659; five years and under ten, 86,025; ten years and under fifteen, 85,467; fifteen years and under twenty-one, 95,584; twenty-one years and under forty, 199,261; forty years and under fifty-five, 92,135; fifty-five years and under sixty-five, 39,631; sixty-five years and upwards, 20,756; unspecified, 842.

The Birthplaces of the People (exclusive of Maoris) were—New Zealand, 441,661; Australian Colonies and Fiji, 21,782; England, 116,541; Wales, 2,148; Scotland, 50,435; Ireland, 46,037; other British possessions 3,750, and at sea, 1,322. Foreign countries, 19,080; unspecified, 604.

The Conjugal Condition of the People (exclusive of Maoris) is thus stated:—(Specified ages), husbands, 102,621; wives, 103,062; or an excess of wives over husbands of 441: bachelors of the age of 20 and upwards, 85,622; spinsters, of the age of 15 and upwards, 87,408; widowers, 9,324; widows, 15,014; divorced persons, 87 men and 50 women. The marriage rate, 5·94 per

1,000, was lower than any other colony, except Tasmania and South Australia; birth rate 26·78 per 1,000, being the lowest, except Western Australia.

Occupations of the People (exclusive of Maoris) are thus generally recorded:—Professional, *i.e.*, engaged in general or local government, defence of the country, or maintaining law and order, 19,246; domestics, *i.e.*, engaged in the supply of board and lodging, 28,810; commercial, 50,380; industrial, 81,814; agricultural, pastoral, and mineral, 106,130; indefinite, 6,552; and dependent on natural Guardians, 402,927; dependent upon the State or upon public or private support, 5,808; occupation not stated, 1,693.

Births, Marriages, Deaths.—In 1899 there were 18,835 births, 9,724 males, 9,111 females; 5,461 marriages, and 7,680 deaths—4,464 males, 3,216 females. The proportion per 1,000 was—births, 25·12; marriages, 7·28; deaths, 10·24. The estimated mean population for the year 1899 was 749,984. The chief cause of death was heart disease, &c., 798, followed by phthisis, with 593 deaths, next came cancer with 468, then accident with 462.

The Unemployed male population of New Zealand at the census formed 6·15 per cent. of the breadwinners.

Maoris.—The natives are a fine race of men, and hold a very high position as regards intelligence, being in some respects not far behind the average European. They dwell mostly in the North Island. At the time when the colonists first landed it is believed their number was not less than 120,000. In character they are warlike, courageous, quick at learning, good at imitation, fond of oratory, and susceptible of strong religious feelings; they are vain and proud, revengeful and jealous, but not devoid of good qualities, and are now on much better terms with the colonists. They are supposed to be of Malayan origin, though some ethnologists profess to be able to trace their migrations from inland India, the plains and foothills of the Himalaya. It is also claimed that the race became great navigators and rovers, and in about the first and second centuries of the Christian era came in touch with the Malay race, by whom they were forced on into the islands of the Pacific. By their own traditions the ancestors of the Maoris came from an island called Hawaiki, supposed to be either Hawaii of the Sandwich group, or Savaii of the Navigator's islands, and they are supposed to have migrated to New Zealand in the year 1350. Their language has but a slight dialectal difference from the Hawaiian. In the Chatham Islands there were 20 Morioris, a race of people inhabiting these islands prior to the Maori invasion referred to above.

According to a census taken in February, 1896, the Maoris numbered 39,854—21,673 males, 18,181 females. In the North Island there were 9,175 Northern Maoris, 12,995 Eastern Maoris, and 15,140 Western Maoris; in the Middle Island there were 2,544 Southern Maoris. This included 1,044 male and 1,559 female half-castes living as members of Maori tribes. Births and deaths of Maoris are not recorded, therefore no later statistics are available. In the North the Maori race is comparatively healthy, except being subject to disease of a zymotic character, through dirt, vicious habits, or bad ventilation. In the centre of the Island pulmonary consumption appears in a number of cases equal to all other causes of death. Diseases of the lung, low fever frequently brought on by exposure, and scrofula are said to be the chief enemies of the race; these and other ailments are brought on by their carelessness as regards the simplest laws of health and their communistic habits.

The natives are rich in land. It is estimated that they own more than 10,000,000 acres, largely cultivated. They also owned nearly 3,000,000 sheep, 43,000 cattle, and 87,000 pigs.

They show aptitude for education, as is shown by the fact that by far the larger proportion of them are able to read and write. There are over 80 native schools, with 150 teachers and 4,000 scholars.

The natives are represented in Parliament; there are four constituencies, each sending a member of the native race to the House of Representatives, and every adult Maori has the privilege of voting.

Religion.—The State has no connection with the Church, otherwise than in all ministers being registered once a year, that they may legally perform the marriage ceremony. The registered ministers in March, 1900, numbered 946, belonging to the following denominations:—Church of England, 314; Presbyterians, 116; Presbyterian Church of Otago and Southland, 87; Roman Catholic Church, 155; Wesleyan Methodist Church, 143; Congregational Independent, 20; Baptists, 24; Primitive Methodists, 31; Lutheran Church, 10; Hebrew congregation, 6; Church of Christ, 13; Catholic Apostolic, 3; Salvation Army, 9; Seventh Day Adventists, 4; Independent Wesleyan, 1; Plymouth Brethren, 1; Forward Movement 1; Conditional Immortalitists, 1; Union Free Church, 1; Newton Gospel Mission, 1; The Church of England (known officially as the Church of the Province of New Zealand) has a large number of adherents; it is under the control of six bishops, residing respectively at Auckland, Napier, Wellington, Nelson, Christchurch, and Dunedin, and is partly supported by home grants, partly by lands set apart for Church purposes, and in part by voluntary contributions. Next to Episcopalians in number are the Presbyterians, the Roman Catholics are third, and the Wesleyan Methodists fourth.

The Religions of the People, by the census of 1896 (no later figures being available), were:—Church of England and Protestants (undescribed), 282,809; Presbyterians, 159,952. Wesleyan Methodists (incorporating as from April 13, 1896, United Methodist, Free Church, and Bible Christian), 63,373; Primitive Methodists, 7,041; Methodists, undefined, 2,893; others, 60. Baptists, 16,037; Congregational Independents, 6,777; Lutherans, German Protestants, 5,538; Unitarians, 375; Society of Friends, 321; other Protestants—Church of Christ (including Christian, Christian Disciples, Disciples of Christ, Disciples), 5,859. Brethren (including Christian Brethren, Brethren, Exclusive Brethren, Open Brethren, Plymouth Brethren), 5,035; Believers in Christ, 77. Evangelists; (including Evangelical Union, Evangelical Church, Evangelical Christians, Evangelical Brethren), 33. Nonconformists, 95; Salvation Army, 10,532; Christadelphians, 952; Swedenborgians (including New Church, New Jerusalem Church), 191; Seventh-Day Adventists, 776; Students of Truth, 340; other Protestants (variously returned), 1,771. Catholics—Roman Catholics, 97,525; Catholics (undefined), 1,279; Greek Church, 116; Catholic Apostolic, 247; other sects—Latter Day Saints or Mormons, 289; Hebrews, 1,549; Spiritualists, 376; Buddhists, Pagans, Confucians, 3,391; others (variously returned), 187. No denomination—Freethinkers, 3,983; Agnostics, 562; Deists, Theists, 46; doubtful, 46; no denomination (variously returned), 3,898; no religion, 1,490; unspecified, 1,122; object to state, 15,967; Atheists, 117; Secularists, 153. Total for all religions, 703,360. All the larger Protestant denominations increased their number, while the Freethinkers decreased by 11 per cent.

Places of Worship.—The Census Returns showed that there were in all 1,431 churches or chapels, 366 schoolhouses, and 190 dwellings or public buildings, used for Public Worship, having accommodation for 334,509 worshippers, the number attending services being 209,731. These were particularised as follows:—Church of England, 414 churches, 105 schoolhouses, 33 occasional buildings, 76,811 sittings, 48,117 attendants; Presbyterian 301 churches, 152 schoolhouses, 45 occasional buildings, 75,881 sittings, 48,751 attendants; Roman Catholic, 212 churches, 8 schoolhouses, 7 occasional buildings, 52,267 sittings, 36,080 attendants; Wesleyan Methodist (including United Free Methodists and Bible Christians), 249 chapels, 60 schoolhouses, 27 occasional buildings, 55,772 sittings, 35,445 attendants; Primitive Methodist, 45 chapels, 9 schoolhouses, 4 occasional buildings, 9,325 sittings, 5,436 attendants; Independent Wesleyan, 1 chapel, 1 schoolhouse, 259 sittings, 180 attendants; Scandinavian Methodists, 1 church, 80 sittings, 50 attendants; Baptists, 34 chapels, 1 schoolhouse, 1 occasional building, 8,630 sittings, 5,652 attendants; Congregational Independents, 20 chapels, 5 school-houses, 1 occasional building, 6,700 sittings, 3,475 attendants; Lutherans, 15 churches, 1 occasional building, 1,510 sittings, 806 attendants; Brethren, 27 chapels, 9 occasional buildings, 5,309 sittings, 2,049 attendants; Catholic Apostolic Church, 1 chapel, 100 sittings, 50 attendants; Church of Christ, 15 churches, 1 school, 5 occasional buildings, 4,765 sittings, 2,738 attendants; Christadelphians, 3 places of worship, 4 occasional, 395 sittings, 138 attendants; Salvation Army, 61 places of worship, 10 schoolhouses, 30 occasional buildings, 24,178 sittings, 15,777 attendants; Undenominational, 15 places of worship, 13 schoolhouses, 23 occasional buildings, 9,265 sittings, 3,503 attendants; Hebrews, 5 synagogues, 810 sittings, 380 attendants; besides Society of Friends, Christian Disciples, Seventh-Day Adventists, Students of Truth, Swedenborgians, and New and Latter House of Israel.

Sunday Schools.—In nearly every instance a Sunday School is to be found attached to each place of worship. By the Census Returns of 1896 (later returns not available), the number of children attending Sunday Schools was 104,934—50,096 boys; 54,838 girls; teachers, 3,967 males, 7,144 females.

New Zealand Institute.—The Institute commenced in 1869 with four branch societies and only 258 members. There are now, according to the latest available statistics, eight societies affiliated and the members on the roll are—honorary, 30; ordinary—Auckland Institute, 167; Wellington Philosophical Society, 146; Philosophical Institute of Canterbury, 77; Otago Institute, 103; Westland Institute, 57; Hawke's Bay Philosophical Institute, 66; Nelson Philosophical Society, 20; total, 666.

Education.—The system of primary education is regulated by the Education Act of 1877, which came into operation on January 1, 1878. The whole colony is divided into thirteen education districts, namely, Auckland, Taranaki, Wanganui, Wellington, Hawke's Bay, Marlborough, Nelson, Grey, Westland, North Canterbury, South Canterbury, Otago, and Southland, each being under an Education Board. These districts are divided again into smaller districts in each of which a school committee, elected by householders, has authority, subject to the general control of the Board. The teaching is entirely secular and free: the subjects embraced being, reading, writing, arithmetic, English grammar and composition, geography, history, elementary science, drawing, object lessons, vocal music, needlework (girls), domestic economy, and drill. Religious teaching may be given after school hours under certain conditions.

There is a statutory grant to the Education Boards of £3 15s. per annum for every unit of average attendance at the public schools, and in addition a sum of 1s. 6d. per attendance for the support of scholarships, tenable in secondary schools, and there are also additional grants for school inspection and for school buildings.

For Higher Education there is the University of New Zealand, and affiliated thereto Auckland University College, the University of Otago, Canterbury College, and Victoria College (Wellington) (the first-named is not a teaching institution, but an examining body only). Secondary Education is provided for by the following institutions: Auckland Grammar School (Boys' and Girls'), Wellington College and Wellington Girls' High School, Christchurch Boys' High School and Girls' High School, Otago Boys' High School and Otago Girls' High School, Nelson College for Boys and Nelson College for Girls, Thames Boys' and Girls' High School, New Plymouth

High School (Boys and Girls), Timaru Boys' High School and Girls' High School, Southland Boys' and Girls' High School, Akaroa High School (Boys and Girls), Ashburton High School (Boys and Girls), Christ's College Grammar School (Boys), Napier High School (Boys and Girls), Rangiora High School (Boys and Girls), Wanganui Collegiate School (Boys), Wanganui Girls' High School, Waitaki High School for Boys, and High School for Girls, and Whangarei High School (Boys and Girls), with some other institutions of a less public character. Of the 25 secondary schools the average attendance at the beginning of 1900 was 2,544 pupils; taught by 145 regular and 51 visiting masters. The aggregate income of these schools from school fees (exclusive of boarding fees) was £24,713, and from endowments, £20,476.

The Church of England has, in connection with it, Theological Colleges at Parnell (St. John's), Auckland; Selwyn, Dunedin; College House, Christchurch; and Bishopdale, Nelson. Also Boys' schools at Tamaki (St. John's Grammar), Auckland; Collegiate School, Wanganui; Christ's College, Christchurch. For Maoris there are schools at Auckland and Te Aute (Boys'), and Hukarere (Girls'), also Theological College at Gisborne.

The University of New Zealand is empowered to confer the same degrees as the Universities of Oxford and Cambridge, including the degrees of Bachelor and Doctor in Science. It has had conferred on it by the Imperial Government the privilege of nominating each year one student to a commission in the cavalry or infantry of the line. It has a statutory grant of £3,000 per annum from the Treasury, and an income of about £2,000 from fees paid for examinations and degrees. A Science Scholarship of £150, for 2 or 3 years, allotted by the Commissioners for the Exhibition of 1851, is open to graduates of the University who have obtained honours in chemistry, physical science, or mathematics and mathematical physics. In 1899 the University of New Zealand, after examination, conferred the following degrees:—B.A., 30; B.Sc., 8; LL.B., 8; M.B., 11; B.Sur., 11; Mus.Bac., 2; M.A., 15; B.Eng., 1.

The University College at Auckland, established in 1882, has an annual sum of £4,000 appropriated for its maintenance. The College is affiliated to the University. The teaching staff comprises 5 professors and 3 lecturers. The number of students in 1900 comprised 158 undergraduates, and 68 non-matriculated.

The University of Otago, founded and endowed by the Provincial Government of Otago, now affiliated to the University of New Zealand, has 202 undergraduates and 39 non-matriculated, and 9 professors and 16 lecturers. There is a School of Medicine and a School of Mines in connection with this institution.

Canterbury College was similarly instituted by the Provincial Government of Canterbury. It is now affiliated to the University of New Zealand. During 1899 there were 133 undergraduates and 189 non-matriculated. Has 7 professors and 5 lecturers. It has a School of Engineering and Technical Science, the students in which work for the university degree of B.Sc. in Engineering; also a public library, museum, and school of art.

The Victoria College, established by Act of the General Assembly in 1897, is in the city of Wellington. It has been endowed with lands, and has a statutory grant of £4,000. It is the fourth university college affiliated to the University of New Zealand. There are 8 professors and lecturers, and 116 undergraduates and 57 non-matriculated.

Agricultural College.—The Canterbury Agricultural College was established by an Act of Parliament in 1896, has an endowment of over 60,000 acres of land, and an experimental farm of a very complete character. There were 34 students at the beginning of 1900.

Public Schools.—The number of public (primary) schools is 1,645. The average number of scholars in attendance during the year 1899 was 108,405. The total number of scholars on the rolls at the beginning of 1900 was 131,315. Of this number 32,951 were in preparatory classes, and 5,343 had passed the 6th, or highest standard, leaving 9,302 in the standard classes.

The number of teachers employed in 1899 was returned at 3,614, 1,450 males and 2,164 females.

During 1899 the total expenditure by the thirteen boards was £503,286; the total income, including a balance of £25,048, was £508,606.

The number of Scholarships held by children from the Public Schools at the beginning of 1900 was 341 (201 boys and 140 girls), varying in value up to £52, and in tenure from one to three years', the total cost amounting to £8,424.

Cadet Corps.—During 1899-1900, £400 was expended in the purchase of model rifles for use by the Cadet Corps in public schools. Each Cadet Corps must have a minimum strength of 35 of all ranks, and as a rule no boy under the age of 12 can be enrolled.

Native Schools.—The number of Native village schools at the beginning of 1900 was 84; besides these village schools there were 4 boarding schools at which Maori children were educated; 65 by arrangement with the department, and 146 others. Any pupil that passes the fourth standard at a village school may attend a boarding school for two years or be apprenticed to a trade. From private foundation three scholarships, of the annual value of £35, and tenable for two years at the Native College Te Aute, Hawke's Bay, are open to Maori or half-caste youths.

Deaf Mute Institution.—At Sumner there is an institution for training deaf mutes, according to the pure oral method. The institution is carried on at the cost of the Government: the net cost in 1899 being £3,744; the total attendance during 1899 was 43. The Census of 1896 revealed that there was one deaf mute to every 3,482 persons in the colony.

Industrial Schools.—The number of children on the rolls of the industrial schools at the beginning of 1900 was 1,668; 590 were living in the schools, 443 boarded out, 635 were at service on probation with their friends, or missing, &c. The Government schools are Auckland, Burnham, Caversham; the private schools being St. Mary's, Auckland; St. Joseph's, Wellington; St. Mary's, Nelson; St. Vincent de Paul, S. Dunedin.

The Jubilee Institute for the Blind at Auckland was founded in 1890 by means of a fund raised by public subscription. The number of inmates at the beginning of 1900 was 29, in respect of 13 of whom the Government paid the sum of £324. The Census of 1896 showed that there were 4·90 blind to every 10,000 people, or 1 to every 2,045.

By the Census Returns of 1896 the educational status of the people was as follows:—The proportions per cent. of the educated, the partially educated, and the uneducated to the total numbers living were males, 81·06 able to read and write, 2·71 able to read only, 16·23 unable to read; and females—80·09 read and write, 3·08 read only, 16·83 unable to read. A total of 133,364 children were attending Government Primary Schools, 17,600 were at private college, grammar, or high schools, and 6,352 were receiving tuition at home.

Schools of Mines.—The principal Schools of Mines are situated at the Thames, Coromandel, Waihi, Reefton and Dunedin, the latter being attached to the Otago University. During 1899 the number of students enrolled was 254. The industrial and practical work of the Thames school has gained it a name throughout the colony; and many of the students attending have, through the knowledge they have gained, obtained good positions as mining managers and Battery Superintendents. Minor schools are established at Nelson, Takaka, Denniston, Brunnerton, Greymouth, Kumara, Waimea, Hokitika, Rimu, Ross, and Westport on the west coast, and The Thames, Kuaotunu in the North Island, and at Waipori, Matakanui, and Millers Flat in Otago. All the Schools of Mines are assisted by grants in aid from the Government; and thorough good work going on in all studies pertaining to mining and assaying. The total expenditure on the schools since they were inaugurated in 1885, up to 31st March, 1899, amounted to £28,028. Three scholarships, of an annual value of £50 each, have been established at the Otago University in connection with the Schools of Mines. During the year 53 students attended.

Technical Education.—An Act entitled "The Manual and Technical Elementary Instruction Act, 1895," for the Promotion of Manual and Technical Instruction, was passed in 1895. This Act allows part of the ordinary school time to be given to elementary manual instruction. During 1899 the Government distributed £1,607 in aid of various Technical Schools and classes. The examination of the Science and Art Department (South Kensington) and the City and Guilds of London Institute are made use of, and 796 passes in various subjects, theoretical and practical, were obtained in 1899, out of 1,069 papers. During the past year subsidies were paid on classes in drawing and painting, clay-modelling, carpentry and other woodwork, plumbers' and painters' work, ironwork, mechanical engineering, mechanics, physics, chemistry, agricultural analysis, mathematics and geometry, and book-keeping.

The Education Department is charged with the general administration of the Public School system. It has also the direct management of the Native Schools, of Industrial Schools, and of the School for Deaf Mutes, and distributes the grants and controls the examinations in respect of Technical Education, and takes an active interest in the instruction of the blind.

Agriculture and Stock.—The agricultural statistics published July, 1899, show a total extent of land under cultivation in orchards, quarter-acre and over, of 22,626 acres, vineyards, quarter-acre and over 357 acres; wheat, for threshing, 269,749 acres, grain in hand 5,036,373 bushels; oats, for grain, 398,243 acres, grain in hand 2,952,444 bushels; barley, 48,003 acres, grain in hand 345,964 bushels; rye, 2,081 acres, grain in hand 12,978 bushels; potatoes, 36,984 acres; maize, 17,425 acres, grain in hand 154,543 bushels; hops, 994 acres; peas, 7,086 acres, grain in hand 21,322 bushels; rye grass, 37,564 acres; cocksfoot, 9,978 acres; beans, 3,094 acres, grain in hand 18,051 bushels; market gardens, 3,398 acres; ploughed land, not to be cropped, 78,751 acres; artificial plantation, 48,942 acres.

Live Stock.—The Agricultural Department returns show there were in the colony in 1900, horses, 262,390; cattle (including cows and calves), 1,210,439, and 249,751 pigs; returns on April 30, 1899, show sheep to be 19,348,506. It is worthy of note that the increase of sheep has taken place notwithstanding the slaughter for export of frozen meat.

Alienation of Land.—The area of the whole colony is estimated approximately at 66,871,440 acres; of this superficies there have been sold or otherwise disposed of from the foundation of the colony to March 31st, 1900, 23,382,971 acres, but this does not include land sold by natives to Europeans direct, for which no Crown grants have been issued. Total area open for selection, 2,742,827 acres. Of the area of the islands 28,000,000 acres are fitted for agriculture, and 27,200,000 for pasturage, but of this area upwards of two-thirds is at present covered by forest. On March 31, 1900, the amount of land held on pastoral licences (exclusive of small grazing runs) was 11,341,173 acres, 968 holders. The total area of land in occupation as small grazing runs in the colony was 1,220,689 acres, held by 645 persons.

During year ended March 31, 1900, 23,936 acres of Crown land were sold for cash or money-scrip, cash received having amounted to £21,006, and the scrip representing a value of £50. The Deferred Payment system was superseded by other tenures under "The Land Act, 1892," of the area selected, prior to such suspension, 860,669 acres were made freehold up to March 31, 1900, and 134,014 acres still remain under the system. area, however, will, at no distant date, be converted into freeholds. Under the provisions of "The Land Act, 1892," up to March 31, 1900, 588,164 acres was the net area held for occupation with right of purchase, and 1,036,938 acres as leaseholds in perpetuity.

Land Valuation.—The results of the latest general valuation under the "The Government Valuation of Land Act, 1896," shows the capital value of land in counties, £95,710,266; unimproved value, £63,732,516; value of improvements, £31,977,750; capital value in boroughs, £42,881,081; unimproved value, £20,668,728; value of improvements, £22,212,353 Total of the Colony—capital value, £138,591,347; unimproved value, £84,401,244; value of improvements, £54,190,103.

Village Homestead Settlements, &c.—The Village Settlement System was initiated in 1886 by the late Hon. John Ballance, with the intention of assisting the poorer classes to settle on the land, and it has become firmly grafted on the land policy of the Colony. For the year ended March 31, 1900, the total number of settlers under the system was 1,994; area occupied, 42,614 acres; amount advanced from commencement of system for dwelling houses, bush felling, &c., and remaining unpaid £25,933, but of this amount £2,936 has been repaid.

Improved Farms.—This is a system successfully initiated by the Hon. J. McKenzie, Minister of Lands, for paying working men to fell bush on Crown lands, giving to the men the option of balloting for sections of such lands previous to their being felled and cleared. The maximum area of a farm is 200 acres, and the acreage is frequently fixed so as to suit, as far as possible, the views and wishes of the occupier. There are Improved-farm Settlements at Auckland, Hawkes Bay, Taranaki, Wellington, Otago and Southland. On March 31, 1900, there were 50 in all, covering 76,069 acres, the total value of improvements amounting to £95,394; 499 selectors held land, and 1,974 persons reside in the settlements.

Police.—The Civil Police Force numbered in March, 1900, 586, exclusive of native and district constables. Of these 318 are stationed in the North Island, and 268 in the South Island. The proportion of police to population is one to 1,359, and the cost of police per inhabitant is 2s. 10¾d.

Volunteers and Defences.—The Volunteer forces consist of—Cavalry and mounted rifles, 48 corps, 3,847 men; naval artillery and garrison artillery, 9 corps, 872 men; field artillery, 5 corps, 423 men; engineers, 3 corps, 256 men; submarine miners, 1 corps, 104 officers and men; infantry, 82 corps, 5,442 officers and men; cycle corps, 4 corps, 114 officers and men; bearers, 5 corps, 106 officers and men; reserves, 3 corps, 146 officers and men.

There is also a Permanent Militia force, the Artillery branch, consisting of 1 lieut-col., 2 captains, 4 lieutenants, 1 military cadet, 1 master gunner, 3 artillery instructors, and 194 n.c.o., rank and file, which is divided into 4 batteries, stationed at Auckland, Wellington (headquarters), Lyttelton, and Dunedin. The Submarine Miners consists of 2 captains, with a total of 75 of all ranks. Four torpedo boats and four steam-launches are attached to this corps.

Considerable attention has been given to placing the chief ports of the Colony in a state of defence. At Auckland, works have been undertaken at North Head, Point Resolution, and Mount Victoria. At Wellington, batteries have been erected at Point Halswell, Gordon Point, and Kaiwarra. At Lyttelton, works have been made at Battery Point, Spur Point, and Erskine Point, also at Taiaroa Head, for the defence of Port Chalmers, and at the Ocean Beach, to protect Dunedin. Guns of the latest type, machine guns, Nordenfelt six-pounders, Hotchkiss guns, Maxim guns, Whitehead torpedoes and other necessary accessories for coast defence have also been provided. Submarine mining stations have been constructed at each of the above ports, and arrangements made for lighting the harbours with very powerful electric lights. The total expenditure on defences from 1884 to March 31, 1900, has been £1,847,430. During the year 1899-1900 the net expenditure on defences was £89,563.

New Zealand is now the headquarters of a portion of the Australian fleet, with a peace establishment of two vessels of war.

An annual capitation of £3 10s. is granted to each efficient volunteer of cavalry and mounted rifle corps; £2 10s. to each efficient volunteer of all other arms of the service; and a sum not exceeding £20 to each efficient cadet corps.

Railways.—On March 31, 1900, the total mileage of the Government lines (3 ft. 6 in. gauge) open for traffic in both Islands was 2,104 miles. The earnings for the year were £1,623,891 and the working expenses £1,052,358, showing a profit of £571,533, which is equal to £3 8s. 5d. per cent. on £16,703,887, the total cost of the open lines. The percentage of expenditure to revenue was 64·80.

The total capital invested in the railway lines of the colony amounted to £7,554,272.

There were carried 5,468,284 passengers (exclusive of season tickets, of which 63,335 were issued), and 3,251,716 tons of goods.

In addition to the Government lines there were 174 miles of private lines open for traffic on March 31, 1900, as follows:—

Midland Company's Line, 79 miles. (Since taken over by Government.)

Kaitangata Railway and Coal Company's Line.—Stirling to Kaitangata, 4 miles.

Wellington-Manawatu Railway, 84 miles.

The total number of men employed on all the State Railways is about 7,236.

The lines in the respective Provincial districts are as follows:—

PROVINCIAL DISTRICT OF AUCKLAND.

Auckland to Kuiti.—Entire extent 134 miles, with stations at Newmarket, Remuera, Green Lane, Ellerslie, Penrose Junction, Westfield, Otahuhu, Papatoitoi, Manurewa, Papakura, Hunua, Drury, Runciman, Pacrata, Pukekohe, Buckland, Tuakau, Whangarata, Pokeno, Mercer, Whangamarino, Wairangi, Rangiriri, Ohinewai, Huntly, Taupiri, Ngaruawahia, Pukete, Te Rapa, Frankton Junction, Rukuhia Ohaupo, Lake Road, Ngaroto, Te Awamutu, Te Puhi, Kawa, Kiokio, Otorohanga, Hangatiki, Te Kumi, and Te Kuiti and Mokau.

Cambridge Branch.—Leaving the main line at Frankton Junction, with stations at Hamilton West, Hamilton East, Ruakura Junction, Newstead, Tamahere, Fencourt, Hautapu, and Cambridge. Cambridge to Frankton Junction, 16 miles.

Thames Branch.—From Ruakura Junction, with stations at Eureka, Motumaoho, Morrinsville, Murrays, Tatua, Waitoa, Waihou, Te Aroha Mangaiti, Tui Pa, Paeroa, Komata, Hikutaia, Omahu, Puriri, Matatoki, Kopu, Parawai, Shortland, Thames. From Ruakura Junction, 59 miles.

Rotorua Line.—Putaruru Junction, Tapapatanga, Ngatira, Arahiwi, Mamaku, Tarukenga, Ngongotaha, Koutu, Rotorua. From Putaruru Junction, 32 miles.

Auckland and Onehunga.—Entire extent 8 miles, with stations at Newmarket Junction, Remuera, Green Lane, Ellerslie, Penrose Junction, Te Papapa, and Onehunga.

Auckland to Makarau.—Entire extent 49 miles, with stations at Newmarket Junction, Mount Eden, Kingsland, Morningside, Mount Albert, Avondale, New Lynn, Waikomiti, Henderson, Swanson, Waitakerei, Taupaki, Kumeu, Waimauku, Rewiti, Woodhill, Wharepapa, Ohirangi, Helensville South, Helensville, Mount Rex, Pukanui, Kaukapakapa, Kanohi and Makarau.

Whangarei to Waioru.—21 miles in length, extending to the wharf at one end and the coal mines at the other. Stations at Mair, Kamo, Ruatangata, Kauri, Hikurangi, Waro and Whakapara.

Kawakawa (Bay of Islands) to Opua, with station at Taumarere and Te Akeake. Total extent 8 miles.

Dargaville to Kaihu.—18 miles, with stations at Flaxmill, Babylon, Rotu, Maitahi, Taita, Dairy Flat, Maropiu, Ahikiwi, and Kaihu.

PROVINCIAL DISTRICT OF TARANAKI.

Patea to New Plymouth.—With intermediate stations at Hukatere, Kakaramea, Ball Road, Manutahi, Mokoia, Whareroa, Hawera, Normanby, Te Roti, Eltham, Ngaire, Stratford, Waipuku, Tariki Road, Norfolk Road, Durham Road, Inglewood, Waiougona; Lepperton, Sentry Hill Junction, Corbett Road, Henwood Road, Egmont Road, Smart Road, Elliot Street, New Plymouth. Total extent, 66 miles. Branch from Sentry Hill Junction to Waitara; extent 4 miles.

New Plymouth.—Moturoa Branch.—3 miles, stations at New Plymouth, Morley Street, Moturoa, Breakwater.

PROVINCIAL DISTRICT OF HAWKE'S BAY.

Spit and Napier to Palmerston North.—Entire extent 114 miles, with stations at Napier, Awatoto, Farndon, Whakatu, Tomoana, Hastings, Pakipaki, Poukawa, Te Hauke, Te Aute, Pukehou, Kaikora, Waipawa, Waipukurau, Takapau, Kopua, Ormondville Makotuku, Matamau, Piripiri, Mangatera, Dannevirke, Tahoraiti, Oringi, Matahiwi, Victoria, Woodville Ashurst, Whakaronga, Terrace End, and Palmerston North.

PROVINCIAL DISTRICT OF WELLINGTON.

Wellington to Woodville.—Length 121 miles, with stations at Kaiwarra, Ngahauranga, Petone, Lower Hutt, Belmont, Hayward's, Silverstream, Wallaceville, Upper Hutt, Mungaroa, Kaitoke, Summit, Cross' Creek, Pigeon Bush, Featherston, Fernside, Woodside Junction, with branch to Greytown (extent 3 miles), Matarawa, Dalefield, Carterton, Clareville, Kurupuni, Masterton, Opaki, Kopuaranga, Mauriceville, Mangamahoe, Eketahuna, Newman, Hukanui, Tutaskara, Wakakahi, Pahiatua, Mangatainoka, Ngawapurua and Woodville.

Wanganui to Longburn Junction.—Length 67 miles, with stations at St. John's, Aramoho Junction, Okoia, Fordell, Bakers' Crossing, Wangaehu, Turakina, Bonny Glen, Marton, Marton Junction, Greatford, Kakariki, Halcombe, Makino Road, Feilding, Aorangi, Taonui, Bunnythorpe, Terrace End, Palmerston, Awa Puni, Longburn Junction.

Wanganui to Patea.—With stations at St. John's, Aramoho Junction, Brunswick, Kai Iwi, Okehu, Nukumaru, Waitotara, Momahaki, Waverley, Waverley R. Cse., Whenuakura, Patea. This line is continued in the provincial district of Taranaki, which see.

Wellington and Manawatu Railway (private line).—Length 84 miles, with stations at Crofton, Khandallah, Johnsonville, Tawa Flat, Porirua, Paremata, Plimmerton, Pukerua, Paikakariki, Paraparaumu, Otaihanga, Waikanae, Hadfield, Te Horo, Otaki, Manukau, Ohau, Levin, Kereru, Shannon, Makerua, Tokomaru, Linton, Longburn Junction.

Foxton Line.—Length 24 miles, with intermediate stations at Motuiti, Carnarvon, Bainesse, Oroua Bridge, Tiakitahuna Karere, Longburn Junction, Awapuni, Palmerston North.

Hunterville Branch.—Marton Junction.—Extent 23 miles, with stations at Cliff Road, Overton, Porewa, Rata, Silverhope, Hunterville, Rangatira, and Mangaonolio.

PROVINCIAL DISTRICT OF CANTERBURY.

Lyttelton to Christchurch.—Entire extent 7 miles, with

stations at Limwood, Opawa, Woolston, Heathcote and Lyttelton.

Southern Line. -Christchurch to Dunedin.--Entire extent 230 miles, with intermediate stations at Addington Junction, Middleton, Sockburn, Hornby Junction, Islington, Templeton, Weedon's, Rolleston Junction, Burnham, Norwood, Selwyn, Dunsandle, Bankside, Rakaia, Chertsey, Dromore, Ashburton, Tinwald, Winslow (Long Beach), Windermere, Hinds, Ealing, Rangitata Island, Rangitata, Orari (for Geraldine), Winchester, Temuka, Arowhenua, Seadown, Washdyke Junction, Timaru, Normanby, St. Andrew's, Otaio, Makikihi, Hook, Studholme Junction (for Waimate), Willowbridge, Waihao, Glenavy, Waitaki Hilderthorpe, Richmond, Pukeuri, Town Belt, Oamaru, Waiareka Junction, Deborah, Totara, Teschemaker's, Maheno, Waimotu, Herbert, Wainakaroa, Hampden, Hillgrove, Kartigi, Shag Point Junction, Bushy, Palmerston, Goodwood, Tumai, Waikouaiti, Beach Street, Merton, Puketeraki, Seacliff, Omimi, Warrington, Evansdale, Waitati, Purakanui, Mihiwaka, Port Chalmers Upper, Sawyer's Bay, St. Leonard's, Burke's, Ravensbourne, Pelichet Bay, and Dunedin. The line south of Glenavy is in the provincial district of Otago.

Northern Line. — Christchurch to Culverden. — With stations at Addington Junction, Riccarton, Papanui, Styx, Belfast, Chaney's, Kaiapoi, Flaxton, Southbrook, Rangiora, Ashley, Sefton, Balcairn, Gray's Road, Amberley, Greeney's Road, Glasnevin, Waipara, Waikari, Hawarden, Medbury, Balmoral, and Culverden. Total extent 69 miles.

BRANCH LINES.

Christchurch to Southbridge.—Extent 31 miles, with intermediate stations at Addington, Middleton, Sockburn, Hornby, Prebbleton, Ladbrook's, Lincoln Junction, Springston, Ellesmere, Lake Road, Irwell, Doyleston, Leeston, and Hill's Road.

Lincoln Junction to Little River.—Extent 23 miles with stations at Green-park, Rabbit Island, Kaituna, Birdling's Flat, and Little River.

Malvern Line.—Rolleston Junction to Springfield.—(Branch of Southern Line.)—Entire extent 30 miles, with stations at Aylesbury, Kirwee, Darfield Junction, Racecourse Hill, Waddington, Sheffield, Annat and Springfield.

Springfield to Oxford West.—Extent 18 miles, with stations at Annat, Sheffield (junction) Bexley, View Hill, and Oxford West.

Timaru to Fairlie.—Entire extent 39 miles, with stations at Washdyke, Levels, Waitohi Road, Pleasant Point, Sutherland's, Cave, Coal Creek, Albury, Tengawai, Cricklewood, Winscombe, and Fairlie.

Darfield to Whitecliffs.—Entire extent 28 miles, with stations at Darfield Junction, Hawkins, Homebush, Coalgate for Hororata, Glentunnel, South Malvern, and Whitecliffs.

Kaiapoi to Oxford West.—Length 28 miles, with intermediate stations at Waverley, Wilson's Siding, Wetheral, Ohoka, Mandeville, Swannanoa, West Eyreton, School Road, Horrelville, Bennett's Junction, Carleton, Oxford East, and Oxford West.

Rangiora Junction to Oxford West.—Length 21 miles, with intermediate stations at Bell's Fernside, Stoke, Moeraki, Cust, Bennett's Junction, Carleton, Oxford East, and Oxford West.

Waimate Branch.—Studholme Junction to Waimate (5 miles).

Waimate to Waihao Downs, with stations at Arno, McLean's, and Waihao Forks. (8 miles.)

Rakaia to Methven.—Extent 23 miles, with stations at Hatfield, Somerton, Mitcham, Sherwood, Lauriston, Urrall, Lyndhurst, Cairnbrae, and Methven.

Ashburton to Springburn—Extent 30 miles, with stations at Tinwald Junction, Chelmsford, Westerfield, Hackthorne Road, Valetta, Anama, Cavendish, Mount Somers, Buccleuch, and Springburn.

PROVINCIAL DISTRICT OF MARLBOROUGH.

Picton and Blenheim Railway.—Entire extent 18 miles, with stations at Elevation, Mount Pleasant, Koromiko, Para, Tuamarina, Spring Creek, Grove Town, and Blenheim.

PROVINCIAL DISTRICT OF NELSON.

Nelson to Belgrove.—Entire extent 22 miles, with stations at Bishopdale, Stoke, Richmond, Appleby, Hope, Brightwater, Spring Grove, Wakefield, Wai-iti, Foxhill, and Belgrove.

Westport to Mokihinui Mines.—Extent 30 miles, with stations at Sergeant's Hill, Fairdown, Waimangaroa, (Westport Coal Company's branch to Conn's Creek, with intermediate station at Wellington Mine), Griffiths, Granity Creek, Ngakawau, Mokihinui, and Seddonville.

PROVINCIAL DISTRICT OF OTAGO.

Dunedin and Port Chalmers.—Entire extent 8 miles, with stations at Pelichet Bay, Ravensbourne, Burke's, St. Leonard's, Sawyer's Bay, Mussel Bay, and Port Chalmers.

Dunedin and Lawrence.—Branch of Dunedin and Invercargill Line (Clarkesville Junction to Lawrence, entire extent 22 miles), with intermediate stations at Glenore, Mount Stuart, Mamika, Roundhill, Johnstone, Waitahuna, Forsyth and Lawrence.

Dunedin, Mosgiel, and Outram.—Branch of Dunedin and Invercargill Line (Mosgiel Junction to Outram, entire extent 9 miles), with intermediate stations at Mosgiel Town, Duke's Road, North Taieri, Wylie's Crossing, Gladfield, Riverside, and Shands.

Kaitangata Railway.—From Stirling to Kaitangata.—Branch of Dunedin and Invercargill Line (5 miles).

Waimea Plains Railway.—Gore Junction to Lumsden.—(37 miles).—With stations at Croydon, Otamita, Mandeville, Pyramid, Riversdale, Waimea, Kingston Crossing, Balfour, St. Patrick's, Lintley, and Lumsden Junction.

Palmerston and Dunback.—Extent 9 miles, with stations at Glenpark, Inch Valley and Dunback.

Dunedin and Invercargill Line.—Total extent 139 miles, with intermediate stations at Kensington, Caversham, Cattleyards, Burnside, Abbotsford, Wingatui, Mosgiel Junction, Owhiro, Allanton, Otakia, Henley, Titri, Waihola, Clarendon, Millburn, Milton, Clarkesville, Crichton, Lovell's Flat, Benhar, Stirling, Balclutha, Waitapeka, Toiro, Warepa, Kaihiku, Waiwera, Clinton, Wairuna, Waipahi, Arthurton, Pukerau, Otikarama, Waikaka, Gore, Charlton, Mataura, Ota Creek, Edendale, Kamahi, Morton Mains, Woodlands, Long Bush, One Tree Point, Mill Road, Elles Road and Invercargill.

Balclutha to Owaka.—Extent 20 miles, with intermediate stations at Otanomomo, Romahapa, Glenomaru, Hunt's Road, and Tahora Owaka.

Otago Central Railway.—Wingatui Junction to Wedderburn.—Extent 85 miles, with stations at Salisbury, Taioma, Parera, Mount Allan, Hindon, Deep Stream, Barewood, Sutton, Middlemarch Springs, Rock and Pillar, Hyde, Capburn, Kokonga, Waipiata, Ranfurly and Wedderburn.

Oamaru to Hakataramea.—Extent 43 miles, with intermediate stations at Town Belt, Pukeuri Junction, Papakaio, Gibson's, Peebles, Aitchison's, Uxbridge, Black Point, Borton's, Duntroon, Waikaura, Otekaike, Strachan's, Hilles, and Kurow Hakakaramea.

Oamaru to Tokarahi.—Extent 25 miles, with intermediate stations at Waiareka Junction, Weston, Cormacks, Lorne, Enfield, Elderslie, Windsor Junction, Tapui, Island Cliff—Tokarahi.

Oamaru to Ngapara.—Length 17 miles, with intermediate stations at Waiareka Junction, Weston, Cormack's, Lorne, Enfield, Elderslie, Windsor Junction, Corriedale, and Queen's Flat—Ngapara.

Invercargill to Kingston Line.—Invercargill to Kingston.—Length 87 miles, with intermediate stations at Grassmere, Waikiwi, West Plains, Wallacetown, Lind's Bridge, Makarewa Junction, Ryal Bush, Wilson's Crossing, Forest Hill, Thompson's, Gap Road, Winton, Lady Barkly, Ord's, Centre Bush, Harrington's, Benmore, Dipton, Caroline, Josephville, Lumsden, Lowther, Five Rivers, Parrawa, Athol, Nokomai, Garston, and Fairlight.

Invercargill to Orepuki.—Extent of line 43 miles, with intermediate stations at Grassmere, Waikiwi, West Plains, Wallacetown, Lind's Bridge, Makarewa Junction, Branxholme, Oporo, Waianawa, Wright's Bush, Waimatuku, Thornbury Junction, Otaitai Bush, Riverton, Longwood, Oraki, Colac, Wakapatu, Ruahine, and Paihia.

Invercargill and Bluff Line.—Length 17 miles, with intermediate stations at Kew, Clifton, Woodend, Awarua, Green Hills, and Ocean Beach—Bluff.

Edendale to Glenham.—With intermediate station at Wyndham. (10 miles.)

Riverton to Nightcaps—Extent of line 31 miles, with intermediate stations at Otaitai Bush, Thornbury Junction, Hazlett's, Groper's, Fairfax, Ringway, Otautau, Waicola, Woodlaw, and Wairio—Nightcaps.

Waipahi to Heriot.—With stations at Clinton, Waipahi Junction, Conical Hill, Pomahaka, Glenkenich, Tapanui, Kelso, and Heriot. Clinton to Heriot, 30 miles.

Mararoa Branch.—Lumsden to Mossburn.—With stations at Castle Rock, Murray Creek and Mossburn. (12 miles.)

Seaward Bush Branch. Invercargill to Gorge Road.—Extent 19 miles, with stations at Appleby, Seaward Bush Township, Tisbury, Waimatua, Mokotua, Kapuka, Bush Siding and Gorge Road.

PROVINCIAL DISTRICT OF WESTLAND.

Brunner Railway.—Greymouth to Brunner.—Length 8 miles with intermediate stations at Kaiata, Dobson and Wallsend. – Greymouth.

Greymouth to Hokitika.– Length 24 miles, with intermediate stations at Elmer's Lane, Kararo, Nelson Creek, Paroa, Cameron's, Teremakau, Kumara, Chesterfield, Awatuna, Stafford, Arahura, Kaihinu, Ho.Ho, and Sea View—Hokitika.

New Zealand Midland Railway Co.—Brunner to Reefton.—Entire extent 39 miles, with stations at Stillwater, No-Town Road, Ngahere, Matai, Ahaura, Raupo, Totara Flat, Ikamatua, Waimaunga, Mawheraiti, Hinau, Maimai, Tawhai, and Reefton.

Midland Railway Co.—Brunner to Jackson.—Entire length 33 miles, with stations at Stillwater, Kokiri, Kaimata, Kotuku, Moana, Te Kinga, Poerua, Inchbonnie, and Jackson.

Public Works.—Since the organization of the Public Works Department the total length of roads constructed and improved has been 14,596 miles, and in addition 1,313 bridges have been built. These roads are now principally in charge of the Minister of Lands. The total expenditure on the roads and bridges of the Colony up to March 31, 1900, was £5,248,158. Previous to the formation of the Public Works Department, in 1870, many thousands of miles of roadway and substantial torrent bridges had been made by the Provincial Governments. For an adequate supply of water on the goldfields the construction of several large water-races has also been undertaken at a large expenditure, besides tail-races, dams, reservoirs, and ground-sluices. The net expenditure from 1870 to March 31, 1900, is detailed as

follows :—Railways, £16,450,303 ; immigration, £2,147,505 ; purchase of native lands, £1,936,282; lighthouses, harbours, works, and harbour defences, £959,096 ; contingent defence, £512,310 ; telegraphs, £856,057 ; development of goldfields, £670,446 ; public buildings, £2,388,286 ; coal exploration and mines development, £10,835 ; and Thermal springs, £14,600 ; departmental public works, £446,384 ; roads, £5,248,158 ; expense of raising loans, £1,056,311 ; interest and sinking fund, £218,500 ; rates on native lands, £63,553.

THE CO-OPERATIVE SYSTEM of constructing public works has been in force in the Colony for eight years, and was originally designed to overcome the many admitted evils of the contract system, and as the Under-Secretary for Public Works said, "to enable the work to be let direct to workmen, so that they should be able, not only to earn a fair day's wage for a fair day's work, but also to secure for themselves the profits which a contractor would otherwise have made on the undertaking. All men employed on Government co-operative works are selected by the Government Labour Bureau. The average number of men employed under this system during 1900 was about 2,950. The average earnings vary from navvies 7s. 4d. per day to plasterers 13s. per day.

Means of Intercommunication.—In addition to the railways there is an extensive coaching system connecting with the terminal railway stations and other important centres. There is regular steam communication between all the principal ports. The vessels of the Union Steam Ship Company run from Sydney *viâ* Auckland, Gisborne, Napier, Wellington and Lyttleton to Dunedin, returning thence by same route to Sydney. Another service starts from Melbourne and Hobart to Bluff, Dunedin, Lyttleton and Wellington, thence direct to Sydney and back by same route to Melbourne Smaller boats run between Onehunga (West Coast of Auckland) and Wellington, calling at New Plymouth and Nelson. A daily service is carried on between Wellington and Lyttleton, connecting the two islands. A service four times a week between Wellington and Nelson *viâ* Picton. A service three times a week between Wellington and Greymouth *viâ* Picton, Nelson and Westport. Also a cargo service from Bluff to Greymouth *viâ* Dunedin, Oamaru, Timaru, Akaroa, Lyttleton, Wellington, Napier, New Plymouth and Westport. The Huddart Parker & Company line also maintain services between Australia and New Zealand similar to those of the Union Company—namely, from Sydney *viâ* Auckland, Gisborne, Napier, Wellington and Lyttleton to Dunedin and back, the same route, and one from Melbourne and Hobart to Bluff, Dunedin, Lyttleton and Wellington, thence to Sydney and back by same route to Melbourne.

Shipping.—The inward entries during 1899 were 669 vessels of 811,183 tons, and crews of 23,929 ; the clearances being 604 vessels of 897,866 tons, and crews of 24,117. Of these totals British vessels entered numbered 149, of 350,861 tons and 6 986 crews ; foreign, 72 vessels, of 67,651 tons, 2,277 crews ; Colonial, 388 vessels, of 392,671, 14,666 crews. Cleared : 152 British vessels, of 355,442 tons, 9,194 crews ; foreign, 73, of 66,295 tons, 2,267 crews ; Colonial, 379 vessels, of 386,219 tons, 14,656 crews. The total number of ships on the register on Jan. 1st, 1900, was : sailing vessels 310, of 40,753 net tons ; steam vessels 212, of 52,770 net tons, a total of 522 vessels, and 93,523 net tons, of which 21,001 net tons belonged to the port of Auckland, 55,647 tons to Dunedin, and 6,564 to Wellington.

The entry for the quarter ended March 31, 1900, was : Vessels, 164 ; tonnage, 213,260 ; crew, 6,471 ; outward, 173 vessels ; tonnage, 235,998 ; crew, 6,927.

Lighthouses (Coastal).—Cape Maria Van Diemen, a 1st order dioptric white revolving light (one minute), visible 24½ miles ; fixed light, red, to show over Columbia reef. Moko Hinou, a 1st order dioptric white flashing light (10 seconds) visible 26 miles. Tiri Tiri (Hauraki Gulf), a 2nd order dioptric white fixed light, with red arc over Flat Rock, visible 24 miles. Ponui Passage, a 5th order dioptric white and red fixed light, visible 12 miles. Cuvier Island, 1st order dioptric revolving white light (30 seconds), visible 26 miles ; Portland Island (Hawkes Bay), a 2nd order dioptric white revolving light (30 seconds), visible 24 miles ; fixed light, red, to show over Bull Rock, Cape Palliser, second order dioptric, white revolving light, flashing twice every half-minute with intervals of three seconds between flashes. Pencarrow Head (Port Nicholson), a 2nd order dioptric fixed white light, visible 27 miles. Cape Egmont, a 2nd order dioptric fixed white light, visible 15½ miles. Manukau Head, a 3rd order dioptric white fixed light, visible 26½ miles. Kaipara Head, a 2nd order dioptric flashing white light (10 seconds), visible 23 miles. Brothers (Cook Strait), a 2nd order dioptric white flashing light (10 seconds), visible 22 miles ; fixed light, red, to show over Cook Rock. Cape Campbell, a 2nd order dioptric white revolving light (1 minute), visible 18½ miles. Godley Head, a 2nd order dioptric white fixed light, visible 28 miles. Akaroa Head, a 2nd order dioptric white flashing light (10 seconds), visible 23 miles. Moeraki, a 3rd order dioptric white fixed light, visible 19 miles. Taiaroa Head (Port Chalmers), a 3rd order dioptric red fixed light, visible 20 miles. Cape Saunders, a 2nd order dioptric white revolving light (1 minute), visible 20½ miles. Nugget Point, a 1st order dioptric white fixed light, visible 22 miles. Waipapapa Point, a 2nd order dioptric white flashing light (10 seconds), visible 13½ miles. Dog Island (Foveaux Strait), a 1st order catadioptric white revolving light (30 seconds), visible 18 miles. Centre Island (Foveaux Strait), a 1st order dioptric white fixed light, with red arcs over inshore dangers, visible 22½ miles. Puysegur Point (South West Extremity of Middle Island), a 1st order dioptric white flashing light (10 seconds), visible 19 miles. Cape Foulwind, a 2nd order dioptric white revolving light (30 seconds), visible 19½ miles. Farewell Spit, a 2nd order dioptric white revolving light, with red arc over Spit end (1 minute), visible 16½ miles. Nelson, a 4th order dioptric white fixed light, with red arc to bearing of N. by E¾E. cutting about 70 feet westerly from bell-buoy, to mark limit of anchorage, visible 13 miles. French Pass lights, consisting of one 6th order dioptric fixed light, visible 8 miles, showing red in the Channel, from the mainland to 1½ cables of the Piège Rocks, and white over the Piège Rocks and on to D'Urville Island, and a small white one on the beacon. Stephen's Island, a 1st order dioptric white group flashing light, showing two flashes in quick succession every half minute, visible 32 miles.

The cost of the erection of the New Zealand Coastal lighthouses has been about £180,000 ; the annual consumption of oil is over 20,000 gallons, and the cost of maintenance is about £15,000 per annum.

Graving Docks &c.—There are four graving docks, two at Auckland, one at Lyttelton and one at Port Chalmers. The Auckland Dock measures 312 feet over all and has a depth of 13½ feet of water on sill at high water ; the Calliope Dock, Auckland, is 525 feet long over all, and has a depth of water of 33 feet. The Lyttelton Graving Dock is capable of docking a first-class ironclad, length over all 503 feet, depth of water 23 feet. Otago graving dock at Port Chalmers is 335 feet over all, and has a depth of water of 17½ feet ; connected with the dock is a large machine shop, steam hammer, forge, and an 80-ton shear-legs. There are patent slips at Wellington and Timaru.

Harbours and Harbour Lights.—New Zealand possesses a large number of excellent harbours, in the greater number of which good anchorage can be obtained. The principal in the North Island are those of Auckland and Wellington, and in the South Island, Lyttelton and Dunedin. In the North of Auckland there are the Kaipara, Hokianga, Whangaroa, and Bay of Islands harbours. Auckland, one of the finest harbours in the world, is the port of call of the San Francisco steamers, the headquarters of the Northern Steamship Company, of the Islands trade, and constantly visited by the steamers of the Union Steamship Company, the New Zealand Shipping Company, the Shaw, Savill, and Albion Company, and is the terminus of the steamers engaged in the South Pacific Islands trade, and of the Fiji trade under the Union Company's flag. From Wellington there is a direct service to Sydney, and it is also a port of call of the present direct steamers, having become a great distributing centre for the colony. It has a patent slip. Lyttelton, the principal port of Canterbury, is the headquarters of the splendid ships of the New Zealand Shipping Company. Dunedin is the headquarters of the Union Steamship Company, one of the finest steamship companies in the Southern Hemisphere. Then there are the smaller ports on the East and West Coasts, the latter of which are noted for their coal supplies. The coasts are lighted with over thirty lighthouses. At Bean Rock, Auckland Harbour, a fixed red, white and green light, 5th order, visible 10 miles. At Gisborne, a red light, visible 5 miles. At Eastern Pier, Napier, a 5th order port light, showing red, white and green, visible 7 miles. At Napier Bluff, Napier, a 4th order fixed white light, visible 18½ miles. At Somes Island, Wellington Harbour, a 2nd order dioptric fixed red, white and green light. At entrance of Manawatu River, a fixed white light, visible 8 miles. At Wanganui North Heads, a 6th order port fixed white light, visible 12 miles. At Patea, a 5th order port fixed red light, visible 10 miles. At New Plymouth, harbour light, 5th order port red, exhibited from Skeleton Tower near foot of breakwater, visible from seaward between WSW. round by S. to ENE., at least 8 miles, except where intercepted by Sugarloaf Islands. At Waitara, harbour light, 6th order port white, on flagstaff at entrance to river, visible 8 miles. At entrance of Tory Channel Cook Strait, two leading fixed white lights, 5th order port, exhibited from pyramidal shaped beacons, visible 6 miles. At Wairau River, a 6th order port white light, visible 11 miles. At Timaru, a fifth order port fixed white light, showing green, between W. and SW. as viewed from the sea, visible 14 miles, and one red light from end of breakwater. At Oamaru, an occulting white light, showing a flash 14 seconds on Cape Wanbrow, visible 15 miles ; red light on east end of North Mole, and green light on breakwater ; the last-mentioned lights bear from each other SW. by W½W. and NE. by N½E. distant 800 feet. Hokitika, a 5th order white fixed light, visible 16 miles Greymouth, a 6th order port white fixed light, visible 12 miles ; Westport, fixed white light, visible 11 miles.

Revenue and Expenditure.—Total Revenue for the year ending March 31, 1900, including £495,861 balance brought forward from previous year, was £6,195,479. The total expenditure was £5,590,128, including £450,000, transferred to public works fund ; leaving a net surplus of £605,351. The estimated revenue for 1900-1901 is £5,463,000, and the expenditure £5,441,523.

Imports and Exports.—For the year 1899 the Exports were of the value of £11,938,335 ; the Imports £8,739,633. The value and quantity of the leading articles of export (the produce of the colony) were : gold, 389,570 ozs., value £1,513,180 ; coal, 89,480 tons, value £83,085 ; timber, 50,425,741 ft., value £196,749 ; tallow, value £311,649 ; butter, 136,086 cwt., value £571,799 ; cheese, 69,440 cwt., value £141,818 ; preserved meats, value £90,910 ; frozen meat to the value of £2,088,856 ; rabbit skins, 7,891,648, value £81,118 ; wool 147,169,497 lbs., value £4,324,627 ; grain, £721,506, including 2,901,676 bushels of wheat, value £286,102 ; leather, value £98,319 ; phormium, 10,371 tons, value £184,411 ; fungus, value £10,593 ; Kauri gum, 11,116 tons, value £607,979 ; silver and minerals, value £47,836 ; fish, value £21,265 ; oysters, 254,810 dozen, value, £2,128.

The mines of the Colony yielded exports valued at £1,644,101 ; fisheries, £24,208 ; forests, £817,743 ; animals and produce, £8.009,736 ; agriculture, £913,678 ; manufactures, £378,066 ; miscellaneous, £122,208.

The principal items of import were: apparel and slops, £393,689; wine, £51,640; beer, £39,166; boots and shoes, £151,593; cotton piece goods, £447,495; hardware and ironmongery, £255,701; iron and wire, and steel rails, &c., £632,182; iron rails and railway bolts, £63,557; railway plant, £63,807; books, £122,260; stationery, £100,875; paper, £135,482; machinery, £405,551; sugar, £354,925; tea, £183,691; bags and sacks, £123,596; spirits, £215,685; coals, £92,815; tools, artificers, £59,066; tobacco, £184,173; agricultural implements, £17,063; sewing machines, £30,801; drapery, £395,696; woollens, £297,387; silks, £87,639; cutlery, £19,764; fancy goods, £110,114; fruits, £180,590; oils, £126,967. The customs revenue in 1899 from duties was £2,042,002, or per head (including Maoris), of mean population, £2 11s. 8d. The total quantity of beer entered for consumption in 1899 was 6,437,140 gallons, or 8·150 gallons per head of mean population; spirits entered at customs for consumption, 515,384 gallons; wine entered at customs, 111,049 gallons.

The total imports per head were £11 13s. 1d.; the exports £15 18s. 4d.

Excess of exports over imports, 1899, £3,309,766; 1898, £2,238,429.

For the quarter ended March 31st, 1900, the imports totalled £2,230,877, and the exports £4,301,310. Of this amount £4,269,703 was New Zealand produce and manufacture.

The Public Debt.—The gross public debt of the colony on March 31, 1900, was £47,874,452, and the accrued sinking funds £944,376; the net public debt at that date was therefore £46,930,076. The annual charge for interest and sinking fund amounted to £1,863,738, at rates ranging from 3 to 6 per cent.; the principal portion being from 3 to 4½ per cent. The net indebtedness per head of European population was £61 17s. 3d.

Private Property.—The latest estimate (1899) of this is £217,587,481, or about £288 per head of the population.

Postal.—The Postmaster-General reports that the year ended March 31, 1900, was "one of activity without parallel in the history of the department." The rates of postage on letters are:—For delivery from the post-office at which posted, 1d. for every ½ oz.; for delivery from any other post-office within the colony, and for the Australian Colonies and South Sea Islands, 2d. for every ½ oz.; for other countries, 2½d. for every ½ oz. Letter-cards for transmission within New Zealand and the Australian Colonies are 1½d. each; for the South Sea Islands, 2d.; and for foreign countries (including Great Britain), 2½d. each. Post-cards for delivery within the colony, Australia, and the South Sea Islands, single, 1d.; reply-paid, 2d.; and for delivery in any other country, single, 1½d.; reply-paid, 3d. Printed papers, including books, but not newspapers, ½d. for every 2 oz. Patterns and samples, not exceeding 4 oz., 1d.; every additional 2 oz., ½d. Commercial papers, ½d. for every 2 oz., with the following minima:—For delivery within the colony, 1d.; for delivery beyond New Zealand, 2½d.; and for delivery from the office at which posted (if not exceeding ½ oz. in weight), ½d. Newspapers for delivery within the colony, ½d. each; for the Australian Colonies and South Sea Islands 1d. each; and for all other countries (including the United Kingdom), 1d. for the first 4 oz., and ½d. for every additional 2 oz. per paper. The registration fee for all classes of articles is 3d.

Money orders are granted on all the large post offices throughout the colony. The commission charged (inland) is sixpence for £5, or under, and one shilling for sums above £5 and not exceeding £10; exceeding £10, but not exceeding £15, one shilling and sixpence; exceeding £15, but not exceeding £20, two shillings. Intercolonial and Fiji:—Sums not exceeding £2, sixpence; exceeding £2, not exceeding £5, one shilling; exceeding £5, not exceeding £7, one and sixpence; £7, not exceeding £10, two shillings; £10, not exceeding £12, two and sixpence; £12, not exceeding £15, three shillings; £15 not exceeding £17, three shillings and sixpence; £17, not exceeding £20, four shillings. The maximum amount for which a telegraphic order can be granted is £20, and the commission is 3d. for each pound or fraction of a pound, and a telegraph fee of one shilling for each order. By payment of an additional fee of 1s. for each order *urgent* money-order telegrams can be sent. Money-order telegrams can now be sent to the Australian colonies except Queensland and Tasmania. The charge for commission is 3d. for £1, or fraction of £1, plus a telegraph charge of the rate for a message to the colony upon which the order is drawn. The remitter must also advise the payee by telegraph. To the United Kingdom, Hong Kong, Straits Settlements, Ceylon, Cape of Good Hope, Natal, India, and Hawaii the commission on money orders is sixpence in the £ or fraction of a £ up to £10; the maximum amount for which a single order is issued. At the same rates money orders are granted on many of the British Colonies, and the principal Continental cities, but are subject to a small deduction for the remittance from London to the respective destinations. These deductions are as follows:—for sums not exceeding £2, 3d.; not exceeding £6, 6d.; and not exceeding £10, 9d. To the United States of America, Canada, and the German Empire, the commission is the same as to the United Kingdom, &c. The maximum amount for a single order is £20.

Universal Penny Postage. Towards the end of 1900 the Postmaster-General of New Zealand announced that a universal penny post would be brought into operation as from the 1st January, 1901. As replies were not received from other places concerned before we went to press a list of countries to which the penny post will apply cannot be given. It is certain, however, that the postage on inland letters will be reduced to 1d. for every ½ oz., and there is little doubt that the cheap rate will extend to at least the majority of places in the British Empire. There is reason to believe that the reduction in postage will also be applied to letter-cards and postcards for foreign places, but the changes are not yet officially announced.

Old-Age Pensions.—During 1899-1900 the Department did a lot of work in connection with the Old-Age Pension scheme of the colony, and the tact exercised and the consideration shown in the admittedly difficult task of making a large number of small payments to aged and decrepit people has been accomplished with smoothness in working, which is very creditable to the officers engaged. The total amount paid during the year ending March 31, 1900, was £157,339.

On January 1, 1900, there were 1,620 post and telegraph offices. There passed through the post during 1899, 37,360,671 letters, 1,103,700 letter-cards, 1,643,051 post-cards, 17,659,858 book and pattern packets, 15,717,388 newspapers, 223,350 parcels. Letters increased 7·61 per cent., letter-cards increased 20·23 per cent., post-cards increased 11·02 per cent., book and pattern packets increased 6·27 per cent., parcels 9·16 per cent., and newspapers 4·12 per cent. The receipts of the Post Office and Telegraph Department for the financial year ending March 31, 1900, were £448,246 (exclusive of free official correspondence, estimated value £76,195, and Government telegrams, £29,432); the expenditure amounted to £390,448, leaving a balance of £97,798 in favour of the Department on the year's business. The expenditure included £43,082 for the conveyance of mails by sea in 1899-1900.

Registered Letters.—From October, 1898, the Postmaster-General assumed liability up to £2 for the loss of an inland registered letter. For the year 1899-1900, 489,137 registered letters were dealt with.

Parcel Post.—On October 1, 1887, an inland parcels post came into operation; it is somewhat similar to that in existence in the United Kingdom. The rate charged is 6d. for the first 1 lb., and 3d. for every additional lb. or fraction, 11 lbs. being the maximum weight receivable. The dimensions allowed for a parcel are:—greatest length, 3ft. 6in., and greatest length and girth combined, 6ft. All parcels must be prepaid. The rate to all the Australian colonies, and the South Sea Islands, is 8d. for 1 lb. and 6d. for every additional lb. or fraction. To the United Kingdom it is 1s., for first lb. and 6d. for every additional lb. or fraction. For the year ending Dec. 31, 1899, 223,350 parcels, weighing 765,836 lbs., were dealt with. The parcels posted in the Colony were 193,143. A Foreign parcels post through the intermediary of the London Post Office was extended to nearly all parts of the world on January 2, 1890.

A Parcels Insurance Scheme was inaugurated on the 10th April, 1899, under which parcels to New South Wales, South Australia, Tasmania and Victoria, the United Kingdom and certain other countries may be insured for their value up to £50 for most places, and to £20 for a few of the less important countries. The insurance fee on inland parcels is: for £10, 4d., and 2d. for each succeeding £10; for the Australian colonies named, for the first £10, 5d., and 2½d. for each succeeding £10; the United Kingdon, for the first £10, 6d., and 3d. for each succeeding £10. Insured parcels must not contain liquids, semi-liquids or perishable or fragile articles, and must comply with conditions as to sealing, etc. Over-insurance is a bar to compensation.

The insurance of parcels to and from the United Kingdom appears to be appreciated by the public, and is largely used, especially in connection with valuable parcels forwarded from the United Kingdom for delivery in the colony. The inland and Australian insurance system has not so far, however, been made use of to any great extent.

On July 1, 1900, a parcel post system was established with the United States of America.

On October 1, 1899, an arrangement was made which enables persons in the United Kingdom to forward parcels to New Zealand for delivery free of all charge, the sender paying all Customs duties, redirection fees, &c., to the post-office in the United Kingdom.

Money Orders.—During 1899 there were issued 344,664 post-office money orders, of the value of £1,118,808; there were paid 245,377 money orders, of the value of £950,337. The revenue derived on the issue of money orders was £15,533. During the year 36,933 telegraph money orders were issued for £120,034. The number of money-order offices open on January 1, 1900, was 434. A direct exchange of orders between New Zealand and Natal was made during 1899.

Postal Notes were introduced in January, 1886. They are issued from one shilling up to £5, the poundage varying from ½d. to 6d., according to the value of the note. The currency of postal notes is now unlimited. During 1899-1900 461,447 postal notes were sold, of the value of £147,686, commission on same being £3,054. Postal notes paid numbered 457,767, for £146,779. There were 497 postal notes offices open on Jan. 1, 1900. A new series of postal notes was issued about the end of 1900.

Stamps.—During 1895 the Government awarded prizes for a series of designs for postage-stamps, and 2,400 single designs were submitted. The new stamps were brought into use on April 5, 1898, the whole of the printing being done by the Government printers. In respect to design and printing, the new issue takes a very high rank among the postage stamps of the world.

A 1½d. postage stamp will be issued shortly. Envelopes on which postage at ½d., 1d. and 2d. is stamped by means of embossed dies are now on sale, as also are post-cards showing on the address side views of New Zealand scenery and cards with representations of incidents, &c., in connection with the departure of New Zealand contingents to South Africa.

The former system of unpaid postage dockets has been superseded by an arrangement under which postage due stamps are affixed to short-paid correspondence before payment of the surcharge. The first plates of the unpaid postage stamps were cast

from type-set blocks, but future issues will be printed from engraved dies.

Ocean Mail Service.—The Government has extended the San Francisco mail service for twelve months ended March 31, 1901. The net cost to the colony for the year 1899 for the San Francisco P. & O. and Orient services was £10,745.

Electric Telegraphs.—On March 31, 1900, there were 915 telegraph and telephone offices open, and 6,910 miles of line, and 19,228 miles of wire were maintained. During the year ending March 31, 1900, the receipts from Government messages were £29,432. There were transmitted in all 3,469,631 messages; of these the private and press messages numbered 3,159,093, of the value of £119,641. There were 310,538 Government messages, valued at £29,432. On June 1, 1896, sixpenny telegrams were introduced.

The Post Office and Telegraph Departments have been amalgamated since January 1, 1881.

The telegraph charges are—first twelve words, including address and signature, 6d.; each additional word, 1d. Press telegrams, 8 A.M. to 5 P.M. day rates, twelve words, 6d.; every additional word, ½d., to any part of the colony. Special press day rates: From or to stations not re-opening in the evening, telegrams not exceeding 300 words, addressed to morning papers, if lodged not later than 4.30 P.M. For every 100 words or fraction of 100 words 1s.; evening telegrams, 5 P.M. to 11 P.M., for every 100 words, 6d.; after 11 P.M. to midnight, 8d.; and after midnight, if open, 1s. At offices open continuously, between 2 A.M. and 8 A.M., for every 100 words or fraction, 2s. 6d.—On Sundays, 5 P.M. to 5.30 P.M., 8d. for every 100 words or fraction, and after 5.30 P.M., if kept open, 1s.; at offices open continuously before 5 P.M. and after 5.30 P.M., for every 100 words or fraction, 2s. 6d. Payment for all telegraphic messages to be made by postage stamps. "Urgent" messages can also be sent upon payment of double the ordinary rates; these telegrams have precedence of ordinary messages. The rates to the other Australian Colonies are—New South Wales, 5d. per word; Victoria, Queensland and South Australia, 6d. per word; Tasmania, 8d. per word; and Western Australia, 7d. per word. To Great Britain the rate per word is 5s. 2d., the name and address of sender and receiver being charged for. The Department will, at any of its stations, register code addresses for an annual charge of 10s. or a monthly charge of 2s. 6d. per address.

Four cable lines of telegraph connect the North and Middle Islands, viz., one single-core cable from Lyell's Bay to White's Bay, one between Wanganui and Wakapuaka, and two single core cables between Oterangi Bay and White's Bay. The whole of the cables are quadruplexed or duplexed—an arrangement which is also in use on many of the land lines. A cable is laid between New South Wales and Wakapuaka, whereby the colony is placed in telegraphic communication with the Australian colonies and the mother country.

Telephone Exchanges.—The telephone is extensively in use in all the principal cities and towns. On March 31, 1900, there were 7,150 subscribers or connections, 6,641 paying, 165 free, 344 bureaux. The receipts amounted to £43,303. The first telephone exchange was opened on October 1, 1881, at Christchurch, and there are now 20 central exchanges and 20 subexchanges open.

The total expenditure on the telephone service up to March 31, 1900, was £160,333. The annual rate per cent. yielded on capital cost shows a loss.

Savings Banks.—On January 1, 1900, there were 427 branches of the Post Office Savings Bank open. During 1899 deposits to the amount of £3,644,980 were lodged, the withdrawals amounting to £3,417,299; on December 31, 1899, the balance to the credit of the depositors was £5,320,371. Number of accounts open on Jan. 1, 1900, 183,046. The average amount standing to the credit of each depositor on December 31 was £29 1s. 4d. Cost of management, £9,500. The funds are principally invested in Government Debentures and Corporation Loans. Interest is allowed at the rate of 3 per cent. up to £200, and 2½ per cent. when the balance exceeds £200, up to £500, but no interest is allowed on more than £500. Deposits of one shilling or multiple of one shilling may be made.

The scheme in force in the United Kingdom for receiving deposits of the value of one shilling by means of twelve postage stamps affixed to cards specially issued for the purpose was introduced into New Zealand in February, 1881.

Banks.—There are five banks doing business in the colony, of which two are local institutions; they have about 250 branches or agencies in various parts, the Bank of New Zealand alone having over 200 (120 of which are in New Zealand). On June 30, 1900, their aggregate assets were £17,179,676; the liabilities being £17,305,384. Of the latter the note circulation amounted to £1,331,449, exclusive of Government deposits (£790,374); the deposits bearing interest were £7,816,233; not bearing interest, £7,260,307; bills in circulation, £48,269; balances due other banks, £58,751. The assets include coined gold, &c., £2,613,773; gold and silver in bullion or bars, £121,262; landed property, £450,696; notes and bills discounted, £1,695,852; Government securities, £646,095; good debts due to bank, £9,414,995; other securities, £2,015,653.

Government Insurance.—A very extensive system of life-assurance is carried on by the Government. During the year January to December, 1899, there were issued in all 3,565 new policies, 856 payable at death, for £214,582, and 2,549 endowment assurances for £518,096; 64 children's endowments for £7,600; 60 annuity assurances for £8,150, and 20 annuities for £984. Total number of policies in force at the end of the year was 39,366, assuring a sum of £10,341,702, including reversionary bonuses and annuities for £23,810 per annum. The total claims paid under policies, assurance, including bonus additions, amounted to £95,322. The insurance fund of the Department in January, 1900, was £2,997,681. The chief features of the balance-sheet to December, 1899, are a decrease of £39,971 in Government securities, and an increase of £202,769 in mortgages on freehold property, the percentage of the investment in the last-named item to the total assets was 43·4 per cent. The triennial valuation shows net liability £2,871,081, and the surplus £126,600. Premium rates have now been placed on a 3½ per cent. basis, and in consequence completed new tables of premiums have been formed; bonuses will suffer a temporary reduction in consequence, but better security will be given to policy-holders.

Accident Insurance.—On October 21, 1899, an Act of Parliament was passed enabling the Government Insurance Commission to undertake accident insurance business as a branch of the business of the department established under the Acts relating to Government Life Insurance.

Public Trust Office.—Besides administering the estates of all persons who die intestate, the Public Trust Office undertakes the execution, at a fixed charge, of the wills of all such persons as may appoint the Public Trustee their executor. The functions of the office have been enlarged by the "Public Trust Office Consolidation Act, 1894." The office undertakes now the duties of attorney or agent. The Fidelity of its administration is guaranteed by statute, and the Colony guarantees the integrity of the Capital Funds of properties placed in the Public Trust Office, where there is no direction for the investment of such funds, or where there is no direction for the investment other than generally that the funds are to be invested at the option of the Public Trustee, as he may, unless expressly prohibited, invest all capital moneys. There are 34 agencies in different parts of the Colony. There has been some talk of starting a safe deposit in connection with this department.

The capital funds of the Public Trust Office on March 31, 1900, amounted to £1,028,987, and were invested as follows:—In Government securities of the Colony, £137,778; in Local Bodies' securities, £19,439; mortgages on real estate, £871,770. The number and estimated value of estates in the Public Trust Office on March 31, 1900, were: Wills and trusts, 576, value £933,567; intestate estates, 903, value £136,697; real estates, 75, value £8,313; lunatics' estates, 555, value £113,525; native reserves, 110, value £363,076; West Coast Settlement reserves, 293, value £622,604; unclaimed lands, 155, value £14,812; total number, 2,667, value £2,192,594.

Advances to Settlers.—The Government advances to Settlers' Office was established under the Act of 1894, for the purpose of relieving settlers to whom the high rates of interest for loans on the mortgage of land, with the heavy incidental expenses, had become burdensome, and of thus removing an obstruction to the progress of the colony; and such has been the fall by which the passage of the Act has been followed, says a Treasurer of the Colony, in the rates of interest on private mortgages generally, that this result alone may be said to have more than justified the measure. The Act has been amended to enlarge the scope of the original measure so as to render urban and suburban properties eligible for advances, hitherto lands used for farming, dairying, or market-gardening purposes being the only eligible securities; a further amendment has been made in the direction of allowing a rebate of one-tenth of the interest (½ per cent.) if paid not later than 14 days after the due date. The total applications to March 31, 1900, were 10,995, for £3,711,033. The Board authorised loans on 8,452 applications, to the extent of £2,633,440. The offers of the Board for sums amounting in all to £454,000 were declined by 1,004 applicants. Deducting these figures the net advances authorised up to March 31, 1900, were 7,448 for a total sum of £2,179,440, against securities valued at £4,920,321.

Old-Age Pensions.—In 1898 a Bill, introduced into Parliament by the Right Hon. R. J. Seddon, Premier, became law, which provided for the payment of an old-age pension out of the Consolidated Fund (revenue of the General Government) to persons duly qualified, without contribution by the beneficiaries. The Act, however, only provides for payments out of revenue, for the purposes of the pensions, until the close of the second session of the next Parliament. The conditions under which pension is granted are set forth in sections 7, 8, and 64 of the statute, as under:—

7. Subject to the provisions of this Act, every person of the full age of sixty-five years or upwards shall, whilst in the Colony, be entitled to a pension as hereinafter specified.

8. No such person shall be entitled to a pension under this Act unless he fulfils the following conditions, that is to say:—

(1.) That he is residing in the colony on the date when he establishes his claim to the pension; and also (2) That he has so resided continuously for not less than twenty-five years immediately preceding such date: Provided that continuous residence in the colony shall not be deemed to have been interrupted by occasional absence therefrom unless the total period of all such absence exceeds two years; nor, in the case of a seaman, by absence therefrom whilst serving on board a vessel registered in and trading to and from the colony, if he establishes the fact that during such absences his family or home was in the colony; and also (3) That during the period of twelve years immediately preceding such date he has not been imprisoned for four months, or on four occasions, for any offence punishable by imprisonment for twelve months or upwards, and dishonouring him in the public estimation; and also (4) That during the period of twenty-five years immediately preceding such date he has not been imprisoned for a term of five years with or without hard labour for any offence dishonouring him in the public estimation; and also (5) That the claimant has not at any time for a period of six months or upwards, if a husband, deserted

his wife, or without just cause failed to provide her with adequate means of maintenance, or neglected to maintain such of his children as were under the age of fourteen years; or, if a wife, deserted her husband or such of her children as were under that age: Provided that, if such pension certificate is issued, the pensioner's rights thereunder shall not be affected by any disqualification contained in this sub-section unless the fact of such disqualification is established at any time to the satisfaction of a Stipendiary Magistrate; and also (6) That he is of good moral character, and is, and has for five years immediately preceding such date been, leading a sober and reputable life; and also (7) That his yearly income does not amount to fifty-two pounds or upwards, computed as herein-after provided; and also (8) That the net capital value of his accumulated property does not amount to two hundred and seventy pounds or upwards, computed and assessed as herein-after provided; and also (9) That he has not directly or indirectly deprived himself of property or income in order to qualify for a pension; and also (10) That he is the holder of a pension-certificate as herein-after provided.

64. This Act, in so far as it provides for the granting of pensions, shall not apply to—

(1) Aboriginal natives of New Zealand to whom moneys other than pensions are paid out of the sums appropriated for Native purposes by "The Civil List Act, 1863"; nor to (2) Aliens; nor to (3) Naturalised subjects, except such as have been naturalised for the period of five years next preceding the date on which they establish their pension claims; nor to (4) Chinese or other Asiatics, whether naturalised or not." The full pension is £18 a year, payable in twelve monthly instalments; but for each £1 of income above £34, also for each £15 of accumulated property above £50, £1 is deducted from the amount of the pension. The total number of pensions granted up to March 31, 1900, was 11,285, representing a yearly payment of £193,718, the average pension being £17 2s.

The number of pensions granted since the Act came into operation is 12,186; 824 pensioners have died and 6 pensions lapsed.

The cost of the administration of the Act for the year ended March 31, 1900, was £2,360.

The total number of persons receiving the full amount of pension (£18 a year) was 9,656. The largest number of pensioners was in Christchurch.

The Registrar of Old-Age Pensions, reporting on June 15, 1900, said: "After a year's additional experience, I may add that the usefulness of the measure is now generally recognised, and that the anticipated difficulties raised by adverse critics are not apparent in its practical working." At the end of 1900 a proposal was brought forward in the House of Representatives to make the Act prevalent.

Mills and Manufactories.—According to the census returns of 1896 (later statistics not having been compiled), there were 2,459 factories and works of various kinds, giving employment to 27,389 hands, and paying £1,907,592 in wages; the approximate value of the land, buildings, machinery and plant was £5,796,017, and the estimated value of produce and manufacture for the year £9,549,360.

The principal factories were:—34 agricultural implements, 15 brush and broom, 52 flax mills, 24 rope works, 30 meat preserving, freezing, and boiling-down works, 90 grain mills, 17 biscuit manufactories, 132 aërated-water and cordial, 85 breweries, 31 malthouses, 22 fruit-preserving and jam factories, 18 coffee and spice works, 24 sauce and pickle, 19 cycle factories, 21 cooperages, 19 wooden ware, 299 saw mills and door factories, 164 collieries, 27 gas works, 108 brick, tile, and pottery works, 14 lime and cement, 90 iron and brass foundries, boiler-makers, machinists, and millwrights, 9 spouting and ridging works, 168 gold quartz mining and crushing works, 140 hydraulic gold-mining and gold-dredging, 9 paper bag and box, 154 printing, bookbinding, and paper-ruling establishments, employing 2,351 hands, 22 soap and candle works, 15 bone mills, 6 sausage-skin and violin-string, 13 boiling-down, 170 cheese and butter factories (having 105 creameries connected), 116 coach-building works, 117 tanning and fellmongery, 23 saddlery and harness, 40 ship and boat building, 39 sail and oilskin, 6 graving docks and patent slips, 15 venetian blind, 9 woollen mills, with 1,416 hands, 71 furniture, 92 clothing, 23 boot and shoe, 15 hat and cap, 16 cleaning and dyeing, 7 stocking-weaving, 4 waterproof, 17 basket and perambulator, 37 bacon curing, 27 fish curing and preserving, 12 sugar boiling and confectionery, 10 baking powder, 19 colonial wine, 52 chaff cutting, 34 tinware, 4 heel and toe plate, 7 lead-headed nail factories. Locomotives, engines and railway trucks are made in the colony, both at Government and private works.

For the encouragement of local industries bonuses have from time to time been offered by the Government, one of the most recent being £1,750 for a machine or process for dressing New Zealand hemp (*Phormium tenax*), also £250 for process of utilising waste products of the hemp; some of these have lapsed, others have been claimed and paid for the manufacture of the following articles:—Butter and cheese, earthenware, gunpowder, linseed oil and oil cake, frozen meat, paper, and sulphuric acid. The following is a return of the factories, excluding mines and quarries in the several provincial districts at the census of 1896. Auckland, 573; Wellington, 396; Otago, 516; Canterbury, 448; Nelson, 154; Hawkes Bay, 147; Taranaki, 128; Marlborough, 50; Westland, 47.

Patents, &c.—By the provisions of "The Patents, Designs, and Trades Marks Act, 1889," which came into force on January 1, 1890, Patents are limited to fourteen years. Fees:—On lodging application with provisional or complete specification, 10s.; on complete specification if filed subsequently, 10s.; on obtaining letters patent, £2; at expiration of 4th year, £5; 7th year, £10. Trade Marks:—On Application, 5s; on registration, £1; for continuing after fourteen years, £1. Designs:—On registration, 10s.; term 5 years.

During the year 1899 applications for 992 patents were received, and the total number up to the end of that year was 12,271. During the same year 328 applications for registration of trade-marks were made, total trade marks, 4,139; and 12 designs were registered; total designs, 111.

Public Libraries.—By the census returns of April, 1896, (later figures not available) there were 304 Institutions variously denominated as public libraries mechanics' institutes, and literary and scientific institutes. The number of members was 17,638, and volumes in libraries numbered 409,604. Details of Provincial districts were as follows:—Auckland, 75, 3,741 members, 106,577 books; Taranaki, 6, 378 members, 7,700 books; Hawke's Bay, 17, 1,513 members, 22,955 books; Wellington, 21, 3,029 members, 49,712 books; Marlborough, 5,234 members, 7,783 books; Nelson, 25, 679 members, 27,363 books; Westland, 7, 355 members, 6,602 books; Canterbury, 73, 3,647 members, 93,981 books; Otago, 75, 4,062 members, 86,931 books.

Friendly Societies.—The following is a list of the Friendly and other Societies registered under the Friendly Societies' Act, as on January 1, 1900:—There were 16 districts, 154 lodges, 1 juvenile lodge, and 1 widow and orphan fund of Oddfellows (Manchester Unity), 1 grand lodge and 31 subordinate lodges of the Independent Order of Oddfellows, 1 district and 2 lodges of the National Independent Order of Oddfellows, 1 district and 1 lodge of the British United Order of Oddfellows, 8 districts, 120 courts, 2 Juvenile courts, and 1 widow and orphan fund of the Ancient Order of Foresters, 1 sanctuary of the Ancient Order of Shepherds, 3 grand lodges and 59 subordinate lodges of the United Ancient Order of Druids, 2 districts and 36 tents of the Independent Order of Rechabites, 1 grand division and 10 subordinate divisions of the Sons and Daughters of Temperance, 1 district and 22 branches of the Hibernian Australian Catholic Benefit Society, 1 grand lodge and 12 subordinate lodges of the Protestant Alliance Friendly Society of Australia, 2 societies of the Railway Employés Benefit Society, and 9 Isolated Friendly Societies; 14 Working-Men's Clubs, 1 grand lodge, 5 subordinate lodges, and 2 temples of the Independent Order of Good Templars, and 24 societies Isolated Specially-Authorised Societies. The number of members belonging to the Friendly Societies from whom returns were received in January, 1899, was 35,501. The funds are principally invested in mortgages on freehold property, in Government and Municipal Debentures, and in savings and other banks. Total worth of funds, January, 1899, £67s,746; capital per member, £19 2s 2d. The receipts for the year 1898 on account of the sick and funeral funds amounted to £81,105, and the expenditure to £78,626, of which the sick pay to own members was £38,558; funeral donations £6,365. The ratio of mortality per 1,000 members in 1898 was 7·24, of members' wives, 3·46; funeral benefits, average per member, 3s. 8d.; average weeks' sickness per member, 1·43; average medical expenses per member, 18s. 9d.; average management expenses per member, 9s. 6d.; average sickness benefit per member, 2?s. 3d.; per sick member, £5·50.

Building Societies.—At the beginning of 1899 (the latest available statistics) there were 70 registered Building Societies. With the exception of thirty-one, which were terminable societies, all were on the Permanent principle. The total receipts during their financial year amounted to £581,070. Assets £993,051. Total liabilities: to shareholders, reserve fund, &c., £770,102; to depositors, £209,488; to bankers and other creditors, £13,461.

Charitable Institutions.—On January 1, 1900, there were 43 public hospitals throughout the colony, having 290 wards. The number of indoor-patients during 1899 was 11,887; admitted during the year 11,092; discharged 9,996; deaths 956; number remaining in January, 1900, 1,034. There are 19 benevolent asylums, with 373 wards, and 1,336 beds; 4 orphan asylums: at Parnell, Lyttelton, Wellington, and Auckland, with 21 wards, and 309 beds; 8 lunatic asylums, with 651 wards. The number of registered insane persons in the colony in January, 1900, was—Auckland, males 287, females 169; Christchurch, males 282, females 220; Seacliff, males 387, females 245; Hokitika, males 88, females 41; Nelson, males 87, females 55; Wellington, males 166, females 115; Ashburn Hall (private), males 20, females 23; Porirua, males, 195, females, 174. Total: Males 1,512, females 1,045—2,557 in all. Proportion to the population, exclusive of Maoris, 1 to 200, inclusive of Maoris 1 to 316. Total expenditure, £69,662 5s. 10d., less sale of produce and repayments £15,899; actual cost £53,763; cost per head net £21 3s. 5½d. There were also 7 industrial schools; the number of children belonging to the industrial schools in January, 1900, was 1,668, of whom 932 were boys and 736 girls; 590 were living in the schools, 417 boarded out, 453 at service, and 138 on probation with their friends. There are also a large number of benevolent and benefit societies for the relief of the distressed and needy. At Sumner is an institution for the deaf and dumb, and at Auckland a school for the blind.

Department of Labour.—The Labour Laws of New Zealand are in many ways in advance of legislative enactments elsewhere, and in their general scope are intended for the purpose of granting protection and help to manual workers whose circumstances show that such protection is needed. They comprise "The Factories' Act, 1894 and 1896," "The Shop and Shop Assistants' Act, 1894, 1895, 1896, 1898"; "The Employers' Liability Act, 1882"; "The Employers' Liability Act Amendment Act, 1891"; "The Employers' Liability Act Amendment Act, 1892"; "The Truck Act, 1891"; The Contractors' and Workmen's Lien Act, 1892"; "The Servants' Registry Offices Act, 1895"; and "The Workmen's Wages Act, 1893"; "Shipping

and Seamen's Act, 1877, 1885, 1890, 1894, 1895, 1896"; "Industrial Conciliation and Arbitration Act, 1894, 1895, 1896, 1898"; "The Trade Union Act, 1878 and 1896"; "Conspiracy Law Amendment Act, 1894"; "Master and Apprentice Act, 1865, 1885, 1890"; and "the Wages Attachment Act, 1895"; also legislation as to wages in mines under "Mines Act, 1897," and "Sunday Labour in Mines Prevention Act, 1897"; "Shearers' Accommodation Act, 1898"; "Kauri Gum Industry Act, 1898"; "Employment of Boys and Girls without Payment Protection Act, 1899"; "Labour Day Act, 1899"; "Wages Protection Act, 1899."

Administration of Justice.—This is under the care of a Chief Justice and four puisne judges of the Supreme Court, three judges of the district court, stipendiary magistrates, and wardens on gold fields. A Court of Appeal, at which all the judges sit, is held twice a year at Wellington. The magistrates' courts are presided over by twenty-nine stipendiary magistrates, and the courts are held daily in the principal centres. An important enactment was passed in 1893: "The Criminal Code Act, 1893" (founded on the draft code prepared in England by the late Sir James Fitzjames Stephen); it repealed thirty-three imperial statutes (so far as this colony was concerned), and also twenty-eight New Zealand statutes, consolidating them into the common law as to crime in one Act. The only capital offences are treason, murder, and piracy with violence. By this Act penal servitude is abolished, and imprisonment with hard labour substituted. The First Offenders' Probation Act continues to work well.

Prisons.—There are 9 gaols in the Colony, and 24 minor gaols in which prisoners whose sentences do not exceed one month are confined. The former are situated at Auckland, Dunedin, Hokitika, Invercargill, Lyttelton, Napier, New Plymouth, Wanganui, and Wellington. Altogether they have accommodation for about 1,200 prisoners.

Constitution.—In 1853 constitutional government was conferred on New Zealand (Act 15 & 16 Vict. cap. 72). It is now represented by a Governor appointed by the Crown, a Ministry who form the executive, and a Parliament of two chambers. The members of the Legislative Council number 45, and are now appointed for 7 years; the salary is £150 per annum; a deduction of £2 2s. per sitting day is made in case of absence—except through illness or other unavoidable causes. Prior to 1891 the Members of the Council held their appointments for life, but on the 17th of September of that year an Act was passed making future appointments tenable for seven years only. They may, however, be reappointed. The House of Representatives consists of 74 members (of whom four are Maoris), elected for 3 years, from the time of each General Election, and the salary is £240 per annum. Two pounds for every sitting-day exceeding five is deducted in the event of absence during session, when not due to sickness or other unavoidable cause. Travelling expenses to and from the capital are also allowed. Every man or woman 21 years of age, who is a born or naturalized British subject, who has been a resident in the colony one year, and three months in one electoral district, is qualified to be registered as an elector and to vote at an election for a member of the House of Representatives. For Maori representation: every Maori of twenty-one years of age and upwards is entitled without registration to vote as an elector for the district he resides in. By "The Electoral Act, 1893," the franchise has extended to women of both races the right to register as electors, and the qualification is the same as set forth above. Women are not, however, qualified to be elected as Members of the House of Representatives. No person is entitled to be represented on more than one electoral roll, wherever they may be. This is known as the "one-person-one-roll" principle. Under section 125 of the Act of 1893 the name of every qualified voter who fails to record his vote is removed from the roll after the election.

Each province formerly had its own separate local government, being in this respect similar to each State in the United States; the governing power was vested in a Provincial Council, consisting of from 20 to 40 councillors, presided over by a Superintendent; both Council and Superintendent being chosen for four years; the Provincial system was abolished by an Act of the General Assembly (39 Vict. No. XXI.) passed in 1875, the powers previously exercised by Superintendents and provincial officers being delegated to local boards, called County Councils, or vested in the Governor.

PROVINCIAL DISTRICT OF AUCKLAND.

Auckland is the most northern of the Provincial Districts, and includes about one-half of the North Island. It is 365 miles long, by 180 miles wide at its greatest breadth, and its area is one-third that of the colony of Victoria, or about half as much as England; that is, it contains 16,477,700 acres. Its boundary on the South is 39° S. lat. and the rivers Mokau and Wanganui; on the other sides it is surrounded by water. It has a coast line of nearly 1,200 miles. This proportion of water frontage to the superficial area is one of the most striking peculiarities of this most important part of New Zealand. In addition to the extent of its sea-coast it is remarkable for its rivers. These are not only numerous, but in very many cases valuable as highways for the carriage of produce from the interior. Among them may be enumerated the Waikato, the longest and most important, Wairoa next in length, Oruawharo, Otamatea, flowing into Kaipara harbour, Thames or Waihou, and the Mokau. Auckland has more safe harbours than any other part of New Zealand. Among the chief are the Waitemata on the east coast, the Firth of Thames, Whangarei Harbour, the Bay of Islands, Whangaroa, Mongonui and Tauranga Harbours, and Kaipara, Manakau, and Kawhia Harbours.

The land is principally of two kinds—a light volcanic loam and a stiff yellow clay. Each of these soils has its own peculiar advantages, and perhaps owing to the fineness of a climate to which long droughts and floods are equally unknown, there is comparatively little soil that can be called bad. The three great, almost natural, divisions of the province are the Northern Peninsula, the East Coast, and the Waikato country. Parts of the East Coast, Upper Waikato basin and the "King" country were till recently in the hands of the natives; they are now being opened out for European settlement. Much of the Northern Peninsula is broken land, in parts densely timbered. The land is difficult and expensive to clear for cultivation, but well repays the trouble. The East Coast, comprising the Coromandel peninsula, has been described as "one continuous rugged range of palæozoic rocks," much of which is auriferous. The Waikato country has fine soil, admirably suited for farming operations, and is mostly settled. The climate is exceedingly pleasant and salubrious, being free from extremes of heat and cold, and temperature is lower than any of the northern and eastern districts. During 1899 the mean temperature in the shade at the Auckland meteorological station was 58·7°, the maximum temp. 84·5°, minimum 37·0°, and the rainfall for the year was 34·440 inches; rain fell on 151 days. Looking to Europe for a comparison, Greece would probably be selected as possessing a climate most resembling that of Auckland. Owing to the large seaboard, and the prevalence of sea breezes, the summer heat is not nearly so great as in similar latitudes on the Australian continent. The same causes account for the absence of long droughts, and for the more abundant moisture.

On April 12, 1896, the population (exclusive of Maoris) was 153,564—81,206 males, 72,358 females (including Chinese, 191 males and 10 females; half-castes 710 males, and 749 females). There were 30,141 inhabited houses, 1,473 uninhabited, and 110 building.

Education is free, secular and compulsory. In January, 1900, there were 378 public schools, 789 teachers, average attendance for the December quarter, 1899, being 22,978. Total on the rolls 28,013. Out of this number there were 453 pure Maoris and 630 half-castes in 159 of the schools. The Auckland University College and Grammar School is an institution affiliated to the New Zealand University, at which undergraduates can keep their terms. The Whangarei High School and Thames High School also afford opportunities for higher education to students of both sexes. In 1899 the Provincial district of Auckland also included about 75 private schools.

Gold, copper, lead, tin, iron, manganese, coal, and other minerals are known to exist in the province. The coal supplies are most plentiful; the coal burns freely, and is well suited for steam and household purposes. The principal coal-mining localities are at Kawakawa, Waikato, Mokau, Whangarei, Kamo and Whauwhau. Springs of kerosene oil have been found on the eastern coast but, like other resources of the province, have not as yet been turned to practical account. Medicinal springs are also known to exist. At present the principal gold-workings are in the Hauraki Peninsula, which is believed to be auriferous throughout the whole length of 100 miles, but traces of the precious metal have been found in many other parts. Some of the claims on the Thames gold-field have vied with the richest of the Victorian fields. Up to March 31, 1900, the total quantity of gold exported from Auckland amounted to 2,484,394 ounces, of the value of £9,340,936. For the year ending Dec. 31, 1899, the exports were about 168,769 ozs., value £625,201.

The imports in 1899 were £2,258,584; the exports were £2,280,764. Auckland maintains its supremacy as regards the shipping of its ports, more vessels entering and passing out than in any other port of the colony. In 1899 the inward entries were 221 vessels of 311,827 tons; outward 183 vessels of 214,357 tons.

A line of railway from the city of Auckland to Mokau opens up the agricultural lands to the SW., known as the Waikato country, the soil of which is generally fertile and well adapted to the production of cereals and root crops. Another line to Helensville opens up part of the district lying to the N. of Auckland. There are branch lines to Te Aroha, Cambridge, Rotorua, Paeroa and Thames. (*See Railways.*)

The principal exports are wool, gold, kauri gum, timber, and flax. The export of wool is large and increasing. The resin known as "kauri gum" in commerce forms an important item in the exports of Auckland. The gum lies in many cases at a considerable depth, being the exudations of large forests of trees of past ages. During 1899 the export of this gum was 11,116 tons, of the value of £607,919. The kauri pine (*Dammara Australis*) is the most famous of New Zealand trees; it is confined entirely to Auckland, and almost wholly to its northern extremity. For many years this timber has been largely exported to the neighbouring provinces and colonies for building purposes, and to Her Majesty's Dockyards, to serve as spars for the Royal Navy. The great size of the trees, sometimes 15 feet in diameter, and 150 feet in height, and the valuable properties of the wood are likely to render this article of export a valuable resource for many years. Other trees whose wood is of constructive value are the kahikatea, or white pine, the rimu, or red pine, the totara, which is claimed to be impervious to the attacks of the *teredo navalis*, and the puriri; besides these there are the Pohutukawa, Rata, and many others not so well known. The timber trade is carried on to a large extent, and at the census of 1896 forty-nine mills, employing 1,044 hands, with plant and machinery valued at £145,116 (including land and buildings), were at work, and had turned out during the previous year 79,464,526 feet of sawn timber, besides a large quantity of dressed timber, doors and sashes, total value of the output for the year being £430,913. Ship-building has also received considerable attention. The New Zealand flax is an

article which cannot be omitted from any catalogue of the resources of the colony. It is stated that 632 distinct species of plants have been found in the province, of which 314 are dicotyledonous or endogenous. In 1896 there were 15 mills in the province, employing 56 men and 21 boys, numbers now increased.

In common with other parts of the North Island the formation of Auckland shows a volcanic origin, and contains some still active volcanoes—Tarawera, on the mainland, and White Island, in the Bay of Plenty. At Taupo and other places are hot springs and lakes, and within a mile of Auckland city is an extinct terraced volcanic hill, known as Mount Eden, having a deep crater upon its summit. The warm lake and geyser scenery of Auckland is, in the opinion of geologists and other travellers who have seen it, the most remarkable in the world. These phenomena are of three kinds: Puias which are geysers continually or intermittently active; Ngawhas, or inactive Puias, emitting steam, but not throwing up columns of hot water; Waiariki, or cisterns of hot water, suitable for bathing. There are also mud volcanoes, and numerous creeks and streams, either wholly hot or tepid, or having occasional hot springs breaking out in them. The greater number of these hot springs are found in the neighbourhood of Lake Taupo and Rotorua. On the southern shore of the latter is the Government Sanatorium and Bathing Establishment, where some wonderful cures in cases of rheumatism and skin diseases have been effected. At one time a remarkable feature of this district was the marvellous natural terraces on the shores of Lake Rotomahana, each of the terraces containing hot or warm pools, filled at intervals by the overflow of the boiling geyser at the summit. The volcanic outburst in June, 1886, swept away the famous white and pink terraces at Rotomahana, and completely altered the configuration of part of the country. There is now only left "the grandeur of desolation of the great fissure craters and ejecta of the volcanic eruption itself." Other terraces are in course of formation. The Thermal-springs district comprises an area of upwards of 600,000 acres, or close on 1,000 square miles. It has a length of about 50 miles, and an average breadth of 20 miles, and its altitude averages from 1,000 feet to 2,000 feet above the sea-level.

The highest mountain peaks of the range that intersects Auckland are Hikurangi, near East Cape, 5,438 feet, Ruawahia, 3,009 feet, Paeroa, 3,244 feet, Hardy, 3,700 feet, Pihanga, 3,200 feet, Kakaramea, 2,900 feet, Pirongia, 2,830 feet, and Mount Edgecumbe, 2,575 feet. A few miles south of the boundary the mountains and ranges rise to far higher altitudes than these, Ruapehu being 9,000 feet high, and Ngauruhoe 7,515 feet. Both are active volcanoes.

One feature of the province of Auckland is, that throughout the whole of its extent the settler cannot go far from navigable water, either salt or fresh, and this peculiarity is of essential importance in forming any estimate of its resources. It is not a grazing country, if by this term is understood a level country covered with natural grasses; for the most part it is broken land, with low ranges of hills, and broad shallow valleys often covered with dense forest, and therefore more suitable for agricultural operations than for pastoral purposes. The fern tribe is seen to perfection in this province, upwards of 130 species being found, many of them unknown in any other country; the nikau, the ti or cabbage-tree, and the raupo are also profusely distributed. All the products of England also flourish here. The principal towns in the province are Auckland, the capital, with its suburbs. The chief suburbs are: Birkenhead, Devonport, Newmarket, Newton, Parnell. The other chief towns in the provincial district are Gisborne, Thames, Paeroa, Hamilton, Cambridge, Whangarei, Tauranga, Kawakawa and Rotorua.

The Agricultural Returns collected in Jan., 1900, were:—land broken up, 17,250 acres: wheat, 5,197 acres, produce 115,696 bushels; oats for grain, 7,952 acres, produce 235,808 bushels; barley, 1,026 acres, produce 33,535 bushels; maize, 16,300 acres; potatoes, 7,107 acres; hay, 10,769 acres; other crops, 96,351 acres; total area in hay and under crop, 144,702 acres; in garden and orchards and plantations of forest trees, 23,195 acres; grass land ploughed, 524,549 acres; grass land, surface sown, 1,269,932 acres. Stock returns (January, 1900): horses, 69,028; horned cattle, 335,744; sheep, including lambs (April, 1899), 2,082,121; and pigs, 69,415.

The number of publications, registered as newspapers, and issued in the provincial district is 40.

PROVINCIAL DISTRICT OF TARANAKI.

Taranaki, formerly called New Plymouth, situated on the western side of the North Island, is bounded on the south-east by the provincial district of Wellington, and on the north and north-east by the provincial district of Auckland; has a seaboard of 130 miles, and contains an area of 2,117,380 acres. It has been estimated that nearly three-fourths of this is dense forest, the remainder, except where cultivated, being fern and flax land. The province takes its name from the lofty snow-clad conical mountain called by Europeans, "Egmont," and by the natives, "Taranaki." It was settled by the "Plymouth Company of New Zealand," in conjunction with the New Zealand Company, in the year 1840. The history of the original natives of Taranaki is one of incessant warfare, until in 1832 the tribe of the district was broken by other tribes, numbers of its warriors slain, and many of its people taken into captivity and reduced to slavery. The boundaries of the province are on the north the Mokau river to its source, thence a right line on the south-east to the confluence of the Tuhua and Wanganui rivers; thence the Wanganui river to the point where it is met by the Taumatamahoe path, thence a right line to the nearest point of the Patea river, and the Patea river to the sea; on the south and west the Pacific Ocean.

Comparatively little is known of the mineral resources of the province. The titaniferous iron-sand, which lies from two to five feet deep along the sea-beach, and which is believed to be the purest iron ore known, is as yet nearly the only ascertained mineral production of Taranaki. As mentioned elsewhere, this iron-sand is now being turned to practical account. In July, 1887, a very successful smelting of iron-sand took place and it was proposed to form a company to work the process. It is improbable that much else besides this iron-sand will be found near the town of New Plymouth, owing to the thoroughly volcanic character of the country in the neighbourhood of Mount Egmont. Some specimens of graphite have been found, and discoveries of petroleum springs have been made. The temperate climate, moist atmosphere, and excellent soil render vegetation extremely luxuriant. There are no grassy plains; all is dense forest, through which the settler has literally to hew his way—excepting, of course, the open fern-land which well repays the trouble of clearing. The soil and climate of the province are remarkably suitable for rearing horses, and cattle; and unrivalled for the production of grass and root crops. In the very driest summer there is no fear of a want of water, the streams being permanent. "It is generally concerned that no country possesses greater natural advantages for dairy pursuits than New Zealand. This, at any rate, is true of Taranaki. In soil, climate, seasons, and settlement, Taranaki has every natural advantage. Winter pasturage is generally abundant, and so the farmer is to a great extent relieved of the labour and expense of storing up much winter feed. Little or no housing is required for the cattle throughout the winter, and so the farmer can carry on his business under the most favourable circumstances, as very little of the profits of the season are consumed in maintaining the cows from one season to another."

A railway connects New Plymouth with Foxton *vid* Wanganui, and there is through railway communication with Wellington.

The principal rivers are the Mokau, Waitara, Patea. All these can be entered by small steamers at high water. The forest contains abundance of valuable timber, fitted for all the requirements of the colonist; a good coal-field exists on the banks of the Mokau river, where also limestone is found, together with the finest qualities of clay, fit for bricks or pottery. The principal towns are New Plymouth, Hawera, Stratford, Patea, and Waitara. Of the entire province, it is estimated that at least two-thirds, or about 1,500,000 acres could be utilized for settlement. The land generally rises inland from the sea, and is divided at intervals by valleys, generally the beds of streams, between which are plateaux of rich black vegetable mould, from 9 to 18 inches thick, overlying the volcanic tufa.

At the census taken on April 12, 1896, the population (exclusive of Maoris) was returned at 31,175—16,900 males, and 14,275 females (including Chinese, 34 males; half castes, 46 males, 47 females). There were 5,890 inhabited houses, 321 uninhabited, and 40 building.

In January, 1900, the number of public schools in the district was 63, with 50 male, 63 female teachers, and 23 sewing mistresses, the average attendance being 3,091. Total on the rolls, 4,039. Out of this number there were 64 pure Maoris and 34 half-castes in 18 of the schools. There is a High School for Boys and Girls at New Plymouth, and in the Provincial District of Taranaki there were also in 1899 13 private schools with 26 teachers and 432 scholars.

The Agricultural Returns collected in January, 1900, were: land broken up, but not under crop, 454 acres; wheat, 1,273 acres, produce, 51,673 bushels; oats for grain 6,289 acres, 296,924 bushels; barley, 682 acres, produce, 25,231 bushels; potatoes, 1,964 acres; hay, 6,586 acres; turnips and rape, 9,220 acres; other crops, 5,594 acres; total area in hay and under crop, 31,608 acres; in garden, orchard and plantation of forest trees, 2,797 acres; grass land, ploughed, 131,328 acres; grass land, surface sown, 569,893 acres.

Stock returns (January, 1900), were 17,471 horses, 202,307 horned cattle, 508,665 sheep (April, 1899), and 37,337 pigs.

Total value of imports 1899, £73,998; exports, £463,093.

The number of publications registered as newspapers, and issued in the provincial district is 12.

PROVINCIAL DISTRICT OF HAWKE'S BAY.

More than a century has passed since the shores of Hawke's Bay were first seen by European eyes. On the morning of the 8th October, 1769, the good ship *Endeavour* (Captain Cook) first entered the harbour, but it was not until 1848 that the actual settlement of the provincial district can be said to have commenced. Hawke's Bay is situated on the east coast, midway between Auckland and Wellington, and was named after Sir Edward Hawke, the First Lord of the Admiralty at the time of the discovery. There is a discrepancy between the name of the district and the bay itself, the latter being known as Hawke Bay. It is bounded on the north by Auckland, and on the west and south by Wellington, the sea forming its eastern limit. It comprises the counties of Waipawa, Patangata, Hawke's Bay, and part of Wairoa. Its area is 2,822,300 acres, of which 2,610,000 acres are under occupation or partly so.

Hawke's Bay was formerly part of the province of Wellington, but was separated in 1858. The country is described as consisting of rich alluvial plains and undulating hills, rising

gradually from the sea coast towards the Ruahine mountains, nearly the whole of which is suitable for the operations of the farmer. It is watered by the Nuhaka, Wairoa (one of the finest rivers in the Colony), Mohaka, Tutaekuri, Ngaruroro, Tukituki and other rivers. The principal towns are Napier, Hastings, Danevirke, Norsewood, Waipukurau, and Waipawa. Napier, the port and chief town of the province, is built on a peninsula, near the southern end of the bay. To the south of Napier lie the celebrated Ahuriri plains of 80,000 acres in extent, forming a district which is not surpassed in productive capacity by any district of similar size, even in Great Britain. Crops of all kinds can be grown on them in the highest perfection. Soil and climate are well suited for hops and tobacco, while nearly all English and many semi-tropical fruits grow and thrive. West and south of these plains is a wide expanse of good agricultural land, as yet chiefly used for the rearing of sheep. Further south again, along the borders of the Wellington province, lies the famous "Seventy Mile Bush," containing abundance of excellent timber. A railway runs from Napier to Woodville (95 miles), and from thence through the picturesque Manawatu gorges to Palmerston North, where it connects with a private line from Wellington. The northern portion of the provincial district is for the most part taken up by sheep runs, and, owing to its broken character, can never be made suitable for farming purposes; this neighbourhood is looked on to some extent as the breeding-ground of New Zealand, whence the best type of stud sheep is to be obtained. Cattle-breeding is extensively followed, and some of the finest herds in the colony are to be found here.

On April 12, 1896, the population (exclusive of Maoris) was 34,038—18,397 males, 15,641 females (including Chinese, 39 males, and half-castes, 46 males, 44 females). There were 6,523 inhabited houses, 317 uninhabited, and 35 building.

In January, 1900, there were 75 public schools, 73 male, 148 female teachers, the average attendance being 6,241. Total on the school rolls 7,860. Out of this number there were 390 pure Maoris and 189 half-castes in 37 of the schools. The Napier Boys' and Girls High Schools afford opportunities for higher education, and there were also in 1899, in the Provincial District of Hawke's Bay, 18 private schools, with 49 teachers and 1,044 scholars.

The Agricultural Returns collected in January, 1900, were:—land broken up, but not under crop, 9,466 acres; wheat, 1,437 acres, produce 38,607 bushels; oats for grain, 5,299 acres, 196,231 bushels; barley, 2,459 acres, produce 79,843 bushels; potatoes, 2,261 acres; turnips and rape 15,856 acres; hay, 9,841 acres; other crops, 11,145 acres; total area in hay and under crop, 48,298 acres; in garden, orchard, and plantations of forest trees, 6,813 acres; grass land, ploughed, 359,944 acres; grass land, surface sown, 1,354,731 acres.

The Live-stock Returns (in January, 1900), were 18,324 horses, 97,108 horned cattle, 3,291,876 sheep (including lambs) (April, 1899), 10,106 pigs.

Total value of imports 1899, £212,875; exports £988,466.

There are 8 publications registered as newspapers in the provincial district.

PROVINCIAL DISTRICT OF WELLINGTON.

Wellington was the first settlement in New Zealand, and was founded in 1840 by the New Zealand Company, an association formed in London for the purpose of colonizing the new country. Since then it has grown into a most important province, and its chief city is the seat of Government. This distinction was conferred on it, *vice* Auckland, in 1865. The district is the southernmost in the North Island, and contains an area of 7,042,000 acres. It is bounded on the north by Auckland, on the north-west by Taranaki, on the north-east and east by Hawke's Bay and the sea, on other sides by Cook Strait and the sea. In length it is about 200 miles, its greatest breadth being 80 miles; the coast-line extends about 300 miles.

The attention of the colonists is directed chiefly to agricultural and pastoral pursuits, the principal exports being wool, timber, tallow, frozen and preserved meats. During 1881 gold-bearing quartz was found at Terawhiti, within a few miles of the capital and it is believed that gold-mining in time to come will be one of the industries of the district, as the part known as the Peninsula has long had the reputation of being auriferous. The amount of gold, however, has been small up to the present time. The principal place is the city of Wellington; other towns are Wanganui, Feilding, Palmerston North, Featherston, Greytown, Petone, Carterton, and Masterton. The country consists of fine districts, suitable both for farming and sheep-rearing purposes, and ranges of hills, varying from 500 to 1,500 feet high, interspersed with valleys more or less timbered. It is watered by the Rivers Wanganui, Turakina, Rangitikei, Manawatu, Otaki, Ruamahungu, and Hutt, and the tributaries of these streams. The Tararua Range of mountains almost bisects the southern part. In times past this district was liable to earthquakes; but recently the shocks have been less frequent. During 1899 the mean shade temperature at Wellington was 54·7°, the mean height of the barometer was 29·966 inches. Rain fell on 181 days, the total rainfall being 52·715 inches. Snow on 1 day. The prevailing winds were from the NW. and S.E. There were 61 gales or high winds, and 4 earthquakes. The western division of Wellington possesses a coast-line extending from the Patea river on the north to Cape Terawhiti on the south, and includes, between the sea and the back mountain ranges, some of the finest open country and valuable timbered land to be found in the colony.

Most of the unsold lands in the Wellington district are well adapted for occupation by small farm settlers. The public works that have been made are both numerous and important. Railway extension is going on. The Government railway line from Wellington is now connected with Napier on the east, and Wanganui and New Plymouth on the west. The Manawatu line now runs along the west coast from Wellington to Longburn. Besides ordinary roads and bridges, a large amount has been expended on roads for the opening up of Crown lands, and for bridges on the east and west coasts of the province. The shallow portions of the Te Aro and Thorndon ends of the harbour of Wellington City have been largely reclaimed. There is abundant provision for religious ordinances. Comfortable and handsome churches and chapels have been built in all the towns, and in the outlying districts occasional services are held in the school-rooms by clergymen of various denominations.

On April 12, 1896, the population (exclusive of Maoris) was 121,854—64,586 males, 57,268 females (including Chinese 458 males and 4 females, and half-castes, 127 males, 123 females). There were 22,873 inhabited houses, 1,086 uninhabited, and 131 building.

On January 1, 1900, there were in the Educational districts of Wellington and Wanganui 278 public schools, 277 male, 424 female teachers, 12 sewing mistresses, and an average attendance of 19,883 scholars. Total on the school rolls, 25,089. Out of this number there were 321 pure Maoris and 124 half-castes in 58 of the schools. The Wellington College, Wellington Girls' High School, Wanganui Collegiate School, and Wanganui (Girls') High School afford opportunities for higher education, and there were also in the Provincial District of Wellington, in 1899, 56 private schools, with 176 teachers and 3,179 scholars.

Victoria College was established by an Act passed in December, 1897, and is to commemorate the 60th year of the reign of Queen Victoria. It is connected with the New Zealand University, and is governed by a council of 16 members. Provision is made for appropriation and endowment for the purpose of bringing higher education within reach of deserving scholars in the Colony: Six Queen's Scholarships, tenable for five years, are to be offered for competition every year, each of the annual value of £20 to holders studying where their homes are situated, and £40 if studying elsewhere.

The Agricultural Returns collected in January, 1900, were:—Land broken up, but not under crop, 1,862 acres; wheat, 9,829 acres; produce, 299,147 bushels; oats, 22,664 acres, 951,678 bushels; barley, 1,152 acres, produce 42,457 bushels; potatoes, 4,156 acres; hay, 10,930 acres; turnips and rape, 39,651 acres; other crops, 19,387 acres; total land under crop and hay, 108,325 acres; in gardens, orchards, and plantations of forest trees, 9,981 acres; grass land, ploughed, 254,869 acres.

Stock Returns (in January, 1900) were: 40,857 horses, 234,526 horned cattle, 4,070,737 sheep (including lambs) (April, 1899), and 46,946 pigs.

Total value of imports 1899, £2,181,582; exports, £2,278,916.

The number of publications registered as newspapers is 49.

PROVINCIAL DISTRICT OF NELSON.

Nelson is the most northern district of the Southern Island. Its boundaries are Marlborough and the ocean on the east, Canterbury and Westland on the south, and the South Pacific Ocean on the north and west. Its extreme length is 160 miles, the breadth 100 miles, and the coast-line extends about 250 miles, the area being 6,512,100 acres.

The chief mineral products of Nelson are coal, and gold. For the year ending December 31, 1898, the gold produced in the district was 1,720 ozs., value £6,882. The total quantity of gold exported from the district up to March 31, 1900, was 258,029 ozs., value £1,019,139. In the valley of the Waimea a considerable tract of land is taken up for agricultural purposes. At Westport are valuable and extensive coal-fields. The quality of the coal has been proved suitable for ocean-going steamers, gas manufacture, and domestic use. The output during the year 1899 was 363,283 tons. The leading towns are Nelson, Richmond, Reefton, and Westport. The principal rivers are Motueka, Takaka, Aorere, Buller, and Grey on the west, and the Waiau and Hurunui on the east. The general feature of the country is rugged and mountainous, more so than any other province of equal area. Several mountain chains traverse the district; among others the Spencer mountains, whose culminating point is Mount Franklin, estimated altitude 8,000 feet, named after Sir John Franklin, the St. Arnaud, Tasman, Paparoa, and Whakamarama ranges. The prevailing scenery is bold and grand, the soil in many of the valleys exceedingly rich and fertile, and the climate soft and genial. Although agriculture is carried on to a considerable extent in various parts of the province, still the great wealth of Nelson lies in her minerals, which it is believed are not surpassed by any other part of the colony. There are unlimited beds of iron ore, limestone, coal, chrome ore, lead and copper ores, asbestos, while gold, both alluvial and in quartz, is obtained in all parts of the province. The railways extend from Nelson to Belgrove, 22 miles, and from Westport to Mokihinui, 31 miles.

On April 12, 1896, the population (exclusive of Maoris) was 35,734—males 19,574, females 16,160 (including Chinese 549 males, and half-castes, 16 males, 4 females). There were 7,698 inhabited houses, 570 uninhabited, and 19 building.

In December, 1899, there were in the educational district of Nelson 120 public schools, 67 male, 142 female teachers, and average attendance of 4,658 scholars. Total on the school rolls, 5,835. Of this number 11 pure Maoris and 3 half-castes were in 7 of these schools. The Nelson College and Nelson Girls' College afford opportunities for higher education, and in the Provincial

District of Nelson there were also in 1890 16 private schools, with 41 teachers and 849 scholars.

The Agricultural Returns collected in January, 1900, were :— Land broken up, but not under crop, 1,127 acres ; wheat, 3,503 acres, produce, 81,369 bushels ; oats, 3,503 acres, produce, 169,815 bushels ; barley, 4,753 acres, produce 117,571 bushels ; potatoes, 1,266 acres ; hay, 3,147 acres ; turnips and rape, 14,613 acres ; hops, 972 acres ; other crops, 13,146 ; total under crop and in hay, 46,546 acres ; gardens, orchards, and plantations of forest trees, 4,255 acres ; grass land, ploughed, 109,096 acres ; grass land, surface sown, 277,494 acres.

The Stock Returns (in January, 1900) were : Horses, 8,315 ; horned cattle, 34,577 ; sheep (including lambs, April, 1899), 860,276 ; pigs, 10,389.

Total value of imports 1899, £155,325 ; exports, £109,288.

The number of publications registered as newspapers is 13.

PROVINCIAL DISTRICT OF WESTLAND.

The Provincial District of Westland, which till 1867 was a part of Canterbury, occupies the western portion of the Southern Island, midway between the Province of Nelson on the north and Otago on the south. Its eastern boundary is the Provincial District of Canterbury. Its western frontier entirely faces the ocean. It is a long, narrow strip of country, about 200 miles in length, by an average breadth of 30 miles, and an area of 2,970,600 acres. The principal towns are Hokitika, Greymouth, Kumara, and Ross. The rich gold-fields that have been discovered in different parts have, at various times, drawn a large influx of population. The diggings are extensive, principally alluvial, and in some parts, as at Ross, the sinkings are of great depth. The total exports of gold from the West Coast to March 31, 1900, have been 5,913,251 ozs., of the value of £23,506,068. During the year 1899, 90,031 ozs., value of £360,149, were exported. Besides gold-mining, which is carried on in almost all parts of the country—the very sea-beaches being impregnated with the precious metal—cattle-grazing, and timber-getting is carried on to some extent. There is land throughout the whole of Westland abounding in very fine timber, including white pine and cedar, and easily accessible from the sea-coast, and good agricultural lands exist between the low-lying hills and the main range, though there is not a large area under tillage at present. Among the streams that traverse Westland are the Grey, Arnold, Teremakau, Hokitika and Totara. All the rivers in Westland, and the bays in the southern parts abound in fish. Flax of excellent quality is found in all parts of the province, the moist climate being very favourable to its growth. Coal is obtained in several localities, particularly in the Grey basin at the junction of the Grey with the Arnold, the output from the Reefton and Greymouth districts during 1899 amounting to 158,664 tons ; and lead and silver ore (galena) has been discovered, as well as copper, iron, and tin. A railway connects Greymouth with the Brunner and Wallsend coal-mining districts, and with Hokitika ; and the Midland Railway, which was commenced in 1887, extends from Brunner to Reefton. The making of this line has had a most beneficial influence, not only on Westland, but also on the Canterbury and Nelson districts. The Greymouth to Hokitika line is also open.

On April 12, 1896, the population (exclusive of Maoris) was 14,469 —males, 8,106, females, 6,363 (including Chinese, 539 males, 5 females, and half-castes, 6 males, 2 females). There were 3,699 inhabited houses, 318 uninhabited, and 8 building.

In January, 1900, there were in the educational district of Westland 33 public schools, having 15 male, 42 female teachers, and an average attendance of 1,129 scholars. Total on the school rolls, 1,292 ; out of these there were 13 pure Maoris in 5 of the schools. In the district of Grey there were 29 schools, with 14 male, 44 female teachers, and average attendance of 1,411 scholars. Total on the school rolls, 1,605. No Maoris or half-castes were in these schools. There were also, in 1899, in the Provincial District of Westland 10 private schools, with 24 teachers and 603 scholars.

The Agricultural Returns collected in January, 1900, were :— Land broken up, 3 acres ; total under crop 1,518 acres ; hay, 999 acres ; in gardens, orchards, and plantations of forest trees, 294 acres ; grass land, ploughed, 10,352 acres ; grass land, surface sown, 38,043 acres.

Stock Returns, in January, 1900, were : Horses, 2,085 ; horned cattle, 16,877 ; sheep (April, 1899), 27,569 ; pigs, 1,879.

Total value of imports (1899) £54,929 ; exports, £345,809.

The number of publications in the provincial district registered as newspapers is 8.

PROVINCIAL DISTRICT OF MARLBOROUGH.

Marlborough is situated in the north-east corner of the South Island. It was originally included in Nelson, but was separated therefrom in 1859. Its boundaries are—on the west and south the Provincial District of Nelson ; on the north, Cook Strait ; on the north-east and east the South Pacific Ocean. Its dimensions are—extreme length 130 miles, and breadth 67 miles ; area 3,041,670 acres, of which 200,000 acres have been described as agricultural land, 1,300,000 as well suited for pastoral occupation, 50,000 acres forest land, fit for cultivation after clearing, and the remainder hilly or mountainous country, heavily timbered, or of a rugged or bleak aspect. The physical geography of the country may be described as a succession of parallel valleys and mountain ranges, running nearly north-east and south-west, the most northerly being those of the Pelorus and the Rai, in the latter of which a large timber-getting trade is carried on, some of the very finest timber in the colony growing there. In the valley of the Wakamarina, a tributary of the Pelorus, discoveries of gold have been made, while the valley of the Wairau, the next in a southerly direction, is mainly an extensive plain, comprising some 65,000 acres, the land being of a rich loamy character, and watered by several important streams. In the southern portion of the district are the Kaikoura and the Seaward Kaikoura, or Looker-on Ranges, Tapuaenuku, the highest peak, having an elevation of 9,462 feet. In point of beauty, and even grandeur of scenery Marlborough may compare favourably with any part of the colony. The view from Kahantara Bluff south of Kaikoura, looking northwards, when the Looker-On Mounts are snow-capped, is said to be one of the finest in New Zealand. The Pelorus Sound having a shore line of 300 miles towards the north presents an aspect perhaps unequalled for variety and romantic grandeur resembling in some respects the lochs of Scotland, while the heavily timbered slopes and clear-running streams of the interior recall the picturesque quietness of the Devonshire valleys ; and these, joined to the distinctive features of the New Zealand bush, combine to form a picture which is unsurpassed elsewhere. Separated from the Pelorus Sound by a neck of land about three miles wide, is Queen Charlotte's Sound (the favourite rendezvous of Captain Cook), a sheet of water of similar character, at the head of which is situated the port and town of Picton, which is connected with Blenheim, the capital, by a railway. Blenheim, Picton, Havelock, and Kaikoura are the principal towns. The waters of the Pelorus, Wairau, Awatere, and Clarence flow through this district. The level portion of it is well adapted for pastoral purposes. Gold is successfully worked at Mahakipawa, Wakamarnia, Wairau Valley, and an antimony mine is worked at Endeavour Inlet, and coal has been found at Picton and in the Clarence Valley, but has not, as yet, been worked.

On April 12, 1896, the population (exclusive of Maoris) was 12,483 —males 6,704, females 5,779 (including Chinese, 13 males, and half-castes, 18 males, 3 females). There were 2,309 inhabited houses, 143 uninhabited, 5 building.

In January, 1900, there were in the educational district of Marlborough 62 public schools, with 20 male, 69 female teachers and 5 sewing mistresses, and average attendance of 1,714 scholars. Total on the school rolls, 2,100. Out of these there were 3 Maori and 24 half-castes in 5 schools. There were also, in 1899, in the Provincial District of Marlborough 8 private schools, with 14 teachers and 296 scholars.

Among the minerals are gold, antimony, copper, and coal. The total quantity of gold exported to March 31, 1900, has been 86,575 ozs., valued at £337,220.

The Agricultural Returns collected in January, 1900, were :— Land broken up, but not under crop, 1,697 acres ; wheat, 5,402 acres, produce 132,835 bushels ; oats, 3,400 acres, 123,896 bushels ; barley, 6,893 acres, produce 205,204 bushels ; potatoes, 753 acres ; turnips and rape, 6,148 acres ; hay, 13,440 acres ; other crops, 8,275 acres ; total land in hay and under crop, 32,999 acres ; in gardens, orchards, and plantations of forest trees, 1,909 acres ; grass land, ploughed, 91,292 acres ; grass land, surface sown, 200,520 acres.

In January, 1900, the Stock Returns were : Horses, 5,036 ; horned cattle, 13,037 ; sheep (including lambs) (April, 1899), 751,321 ; pigs, 3,959.

Total value of imports 1899, £13,440 ; exports £149,549.

The number of publications registered as newspapers is 2.

PROVINCIAL DISTRICT OF CANTERBURY.

Canterbury was first settled in December, 1850, by the Canterbury Association a society of the English episcopacy and aristocracy, who interested themselves in the colonization of New Zealand. It occupies nearly the whole of the Centre of the Middle Island of New Zealand ; the sea forms its eastern boundary ; Nelson bounds it on the north, Otago on the south, and Westland on the west. Its coast line is about 240 miles in extent ; its extreme length is nearly 200 miles, and breadth about 70 ; its area is 8,985,400 acres, of which 2,500,000 form a vast plain, sloping gently down from the mountain ranges to the sea. There are also large tracts of undulating downs, capable of cultivation. On the eastern edge rises Banks' Peninsula, a hilly district, comprising about 250,000 acres, and composed of a number of peaks, ridges, and basins, the remains of long-extinct volcanoes. Many of the valleys between these ridges contain excellent soil in a high state of cultivation, occupied by small farmers, who devote their attention to cheese-making and dairying. On the coast of a fine natural harbour, bounding Banks' Peninsula to the south, is the settlement of Akaroa, where large quantities of apples, pears, peaches, and other fruits are grown for exportation, and jam making and fruit preserving are carried on to some extent. The chief shipping port, Lyttelton (connected with Christchurch by a railway tunnelled through the dividing range at considerable cost, lies on Port Cooper, a northern inlet of Banks' Peninsula. The main south railway connects Christchurch with Dunedin and Invercargill. There is a northerly branch to Culverden, besides numerous lateral branches to the west, which are in course of extension.

The district is divided into two portions, the River Rangitata being the boundary between them. The principal towns are Christchurch, Lyttelton, Timaru, Kaiapoi, Rangiora, Oxford, Amberley, Ashburton, Waimate and Akaroa. The principal rivers are the Hurunui, Ashley, Waimakariri, Avon, Rakaia, Selwyn, Ashburton, Rangitata and Waitaki. As a rule, these rivers are extremely rapid, not running in deep streams between well-defined banks, but shallow, and flowing on shingle banks, sometimes more than a mile wide. When low these are in most cases easily forded ; but when in flood are often very

dangerous. They are, however, bridged in various places, and there is no danger on the main lines of road in the district. In the greater portion of Canterbury, owing to the level nature of the country, the state of road communication is good and safe.

Beds of clay and iron ore lie in several localities, and samples of pottery made from fireclays have been shown at Exhibitions. Beds of quartz sand, adapted for glass making, and equal to the best German sand, are found in abundance, as are limestones and marble at the Malvern Hills; building stones of various qualities are found all over the district.

A vast coal-bed seems to underlie the whole country, from the Buller southward. There are large deposits of coal in the Malvern and Timaru districts, which are being successfully worked.

The famous "Canterbury Plains," is the leading sheep district of the colony, and to its excellence in this way Canterbury has mainly owed its rapid advance in prosperity. The natural pastures of Canterbury are very fine, and probably the best of their kind in this part of the world. Much land in South Canterbury, formerly utilized for the breeding and rearing of sheep, has been brought under cultivation, the rich soil being admirably adapted for the growth of cereals. The chief products of the province are wool and grain, frozen and preserved meat, skins, hides, and leather, butter and cheese. The Church of England in Canterbury is governed by a Bishop, and there is also a Roman Catholic Bishop of Christchurch. The Methodists, Presbyterians, and other denominations have places of worship in all the populous centres.

At Hanmer Plains, in the Amuri county, 90 miles north of Christchurch, are medicinal hot springs, only second in importance to those at Rotorua in the North Island. They have more than a local celebrity for the cure of rheumatic and cutaneous affections. There is a bath-house, enclosing the principal pools where the springs are, and houses of accommodation in the neighbourhood.

The tourist season extends from November 1 to May 1, and during those months coaches from Culverden to Hanmer run daily up and down. The baths are open throughout the year.

On April 12, 1896, the population of the Provincial District (exclusive of Maoris), was 135,858—males 69,708, females 66,150 (including Chinese, 100 males, and half-castes, 21 males, 21 females). There were 25,032 inhabited houses, 1,567 uninhabited, and 104 building.

In the educational districts of North and South Canterbury there were in 1899 in the North 199 public schools, with 211 male, 298 female teachers, 35 sewing mistresses, and an average attendance of 16,745; in the South 67 schools, with 63 male, 78 female teachers, and 10 sewing mistresses, and an average attendance of 4,391 scholars. On the school roll of the North there were 20,218 children. Out of this number there were 17 pure Maoris and 27 half-castes in 9 of the schools. On the school roll of the South there were 5,139 children. Out of this number there were 8 pure Maoris and 2 half-caste in 4 of the schools. The Canterbury College at Christchurch is an institution affiliated to the University of New Zealand, where undergraduates can keep their terms. High schools at Christchurch, Rangiora, Akaroa, Ashburton, Timaru, and Waitaki, also afford opportunities for higher education to students of both sexes. There were also, in 1899, in the Provincial District of Canterbury, 62 private schools, with 158 teachers and 2,969 scholars A training school for teachers has been in operation since 1877.

The Agricultural Statistics collected in January, 1900, were: Land broken up, but not under crop, 14,249 acres; wheat, 181,648 acres, produce, 5,694,593 bushels; oats, 137,429 acres, produce, 5,517,880 bushels; barley, 18,060 acres, yield, 644,845 bushels; rye and bere, 317 acres, 7,451 bushels; peas, 4,044 acres; beans, 2,505 acres; potatoes, 12,432 acres; turnips and rape, 202,776 acres; mangels, beet and carrots, 3,589 acres; hay, 14,942 acres; other crops, 54,512 acres; total under hay and in crop, 632,257 acres; in garden or orchard and plantation of forest trees, 30,345 acres; grass land, ploughed, 1,419,466 acres; grass land, surface sown, 350,405 acres.

Stock Returns in January, 1900, were: Horses, 47,104; horned cattle, 89,242; sheep, including lambs (April, 1899), 4,040,456; and pigs, 38,367.

Total value of imports 1899, £1,569,239; exports, £3,037,767.

The number of publications registered as newspapers is 37.

PROVINCIAL DISTRICT OF OTAGO.

THAT portion of the Middle Island of New Zealand known as Otago (said to be a corruption of the Maori word Otakou (red earth) the name of a Maori village near Taiaroa Head) was, previous to the arrival of the first immigrants, occupied by some white men, engaged in pastoral or in whaling pursuits, and by a small number of natives. In 1840 a missionary from Sydney was located at Waikouaiti, a whaling station, on the coast. His charge extended along the coast to the Clutha, about 100 miles further south, and contained a few scattered settlers. The settlement of Otago was the outcome of a meeting held in Glasgow on May 16, 1845, when the Otago Association was formed. A block of 400,000 acres having been purchased from the New Zealand Company, the carrying out of the scheme was entrusted to a committee of laymen belonging to, or sympathising with, the Free Church of Scotland. The Association, as the scheme was named, despatched the first ships, the *Philip Laing* and *John Wickliff*, with the first immigrants from (the Clyde) Britain, under charge of Captain Cargill. The *John Wickliff* with 90 immigrants and Captain Cargill and family arrived on March 23, 1848; the *Philip Laing* with 236 immigrants on the following April 11. At that time the navigation of the south portion of the colony was looked upon as very dangerous, as there were no trustworthy charts, and the coast was known only to the few whalers on the station.

Otago is one of the most important provinces in New Zealand, and has the largest population. It is bounded on the north by Canterbury and Westland, and by the sea on all other sides. Its length is 160 miles, and its greatest breadth about the same, and sea-line, 400 miles. Its area is 16,311,700 acres; of which 9,000,000 acres are estimated to be fit for agricultural settlement; about 2,000,000 acres are under forest, much of which will be valuable when cleared, and the rest consists of broken and barren ranges teeming with auriferous quartz in many parts, and of lofty downs suitable for sheep and cattle grazing. The district may be said to possess every description of scenery, both along the coast-line and in the inlands, the features being of an eminently Scottish type.

The west coast portion of the province consists of heavily-timbered, rugged, mountainous country, little available for agricultural or pastoral purposes. The central portion, as well as that most easterly, contains tracts of land well suited either for farmers or sheep graziers. Much of it is well watered, fairly wooded, and has soil of a fertile character.

Along the eastern and southern coast-line the principal harbour is Port Chalmers. There is also a good harbour at Dunedin, the channel to which has now been greatly improved, and vessels drawing 20 feet can berth at the wharves. Bluff Harbour, the port of Invercargill, is a safe one. The west coast is a succession of sounds and inlets, somewhat resembling the fiords on the coast of Norway. The most remarkable of them are Preservation Inlet and Milford Sound, the scenery of which is magnificent in the extreme. The largest river is the Molyneux, which drains lakes Hawea and Wanaka, and also (by its tributary the Kawarau), lake Wakatipu. It is navigable for a small steamer for about 40 miles. The Taieri is also navigable for a few miles from its mouth. Others are the Waitaki, Mataura, Oreti, Waiau, Makarewa, and the Hollyford or Kapao on the West Coast. The lakes are numerous, including Wakatipu, Te Anau (the largest in the South Island). Wanaka, Hawea, Hauroto, Monowai, Manipouri, and McKerrow, Among the mountains may be mentioned Mount Aspiring, 9,940 ft., Earnslaw, 9,165 ft., Ben Nevis, 7,650 ft., and Hamilton, 4,674 ft.

Otago is chiefly remarkable for its gold-fields, and to them is due the rapid progress in material prosperity that the provincial district has shown during the last few years. Ever since the discovery of gold in the province by Mr. Gabriel Reid, at Tuapeka, in 1861, mining has been going on steadily, diggings, alluvial and quartz, have been opened at the Dunstan, Shotover, Arrow, Bendigo Gully, Alexandra, St. Bathan's, Mount Ida, Switzer's, Black's, Mount Criffel, and numerous other places. The area of the proclaimed gold-fields some time ago was calculated at 2½ millions of acres, a considerable portion of which is actually auriferous. Besides and beyond the proclaimed gold-fields, there are numerous others which are more or less remunerative. Gabriel's Gully was discovered about the middle of 1861. Hartley and Reilly found gold in the Clutha in July, 1862. The lake Wakatipu field was discovered in October, the Shotover a little later on, and the Mount Ida gold-field in May, 1863. The quantity of gold exported to March 31, 1900, has been 5,588,689 ounces, of the value of £22,135,321. The export of gold for the year ending December 31, 1899, was 130,311 ozs., value £526,605.

Immense quantities of coal have been discovered in Otago, although it is chiefly of the tertiary formation, and therefore valuable for local purposes only. At Green Island the coal-field district extends over 40 square miles, the thickness of the seam averaging 18 feet. The output from the Otago and Southland districts during the year 1899 amounted to 297,967 tons.

The celebrated Oamaru and Port Chalmers building stone takes a high rank, being very easily worked, of a light, almost white colour, and becoming harder the longer it is exposed to the atmosphere. It is largely used in Victoria, has been exported to Queensland, and its use is general in Dunedin and Oamaru.

Slate of good quality, and apparently abundant, is quarried at the Ballachulish Slate Quarries, Otepopo.

Dunedin is the capital and the principal town in the province. Other towns are—Port Chalmers, Oamaru, Hampden, Waikouaiti Milton, Balclutha, Queenstown, Clyde, Mount Ida, Palmerston, Alexandra, Cromwell, Lawrence, Kingstown, Kaitangata and Arrowtown, besides Invercargill, Campbelltown, Gore, and Riverton in the Southland district.

Otago is well supplied with excellent roads traversing every portion of the eastern side of the island; lines of coaches running on them to all important towns. The main south line of railway traverses the district from end to end, and numerous branches run into the interior.

On April 12, 1896, the population (exclusive of Maoris) was 163,944—males, 86,098, females, 77,846 (including Chinese, 1,761 males, 7 females; half-castes, 128 males, 138 females). There were 32,456 inhabited houses, 2,209 uninhabited, and 125 building.

The Presbyterian Church, being the first planted in the province, has the largest number of adherents, but the greatest toleration prevails with regard to religion.

The educational system is wholly unsectarian, and in addition to the public elementary schools the district has grammar schools in the chief centres of population, and boys' and girls' high schools. On January 1, 1900, there were 363 primary schools, with 337 male, 390 female teachers, and 31 sewing mistresses, the average attendance being 25,242 scholars. On the rolls of the schools there were 30,125 children. Out of this number there were 26 pure Maoris and 174 half-castes in 33 of the schools. There is also a training school for teachers, which has been

open since January, 1876. In addition to these there is a university in Dunedin, an institution affiliated to the University of New Zealand, at which undergraduates can keep their terms. There were also, in 1899, in the Provincial District of Otago, 44 private schools with 137 teachers and 2,419 scholars.

The Agricultural Returns in Otago and Southland united, collected in January, 1900, were: Land broken up, but not under crop, 32,643 acres; wheat, 61,460 acres, yield, 2,167,978 bushels; oats, 210,043 acres, 8,833,600 bushels; barley, 12,977 acres, yield, 418,459 bushels; rye and bere, 1,265 acres, 34,420 bushels; potatoes, 6,803 acres; hay, 8,856 acres; turnips and rape, 212,575 acres; other crops, 68,370 acres; total in hay and under crop, 582,248 acres; in garden, orchard and plantation of forest trees, 10,644 acres; grass land, ploughed, 1,436,698 acres; grass land, surface sown, 293,177 acres.

Stock Returns in January, 1900, were: Horses, 53,711; horned cattle, 186,991; sheep, including lambs (April, 1899), 3,715,485; and pigs, 31,353.

Total value of imports 1899, £2,149,567; exports, £2,273,875.

During 1899 the mean shade temperature of Dunedin was 49·6°. The mean height of the barometer was 29·881 inches. Rain fell on 159 days; the total rainfall for the year being 38·621 inches. Snow fell on five days. The prevailing winds were from the SW. and W.

SOUTHLAND is now a part of the Otago Provincial District, being at the extreme south. It has a sea-frontage of about 80 miles, by an extreme length of 100 miles, and a breadth of about 60 miles. Its area is about 2,077,600 acres.

The number of publications in the Otago Provincial District registered as newspapers is 48.

STEWART ISLAND is separated from the Middle or Southern Island by Foveaux Strait, about 23 miles broad. The population is small. The principal occupations are farming and oyster fishing. There are two good harbours, Port William and Paterson's Inlet. Fertile land is to be found in the valleys, and some of the higher ground is well-timbered. The seas surrounding it swarm with fish, particularly the trumpeter and moki, and there are large oyster beds. The island is supposed to have much mineral wealth; large deposits of black iron-sand of equal quality to that found in Taranaki have been discovered; quartz reefs, too, are numerous. Professor Ulrich reported favourably of the gold indications. Tin ore has been found in apparently large quantities. Pegasus Bay and Port William are the places where quartz reefs have been found, and to a very limited extent worked. At the census of 1896 the population of Stewart Island amounted to 252 persons, 152 males, 100 females, and included five female half-castes. The number of houses and huts was 60. The area of the island is 425,390 acres.

The CHATHAM ISLANDS lie about 536 miles E., between 43° 25′ and 44° 20′ S. latitude, and 176° 10′ and 177° 15′ W. long., and consist of three islands, Chatham, Pitt, and Rangatira. The first-named is the largest, being about 38 miles long and 25 miles broad. They were discovered in 1791 by Captain Broughton, and are mainly utilized for the purpose of breeding cattle and sheep. By the census of 1896, there were 234 Europeans—132 males, 102 females, including 1 Chinese male, and half-castes, 5 males and 5 females—mostly engaged in stock-rearing and in the sea fisheries. To these must be added 179 Maoris and 20 Morioris, the latter being a remnant of a Polynesian tribe (akin to the Maori) which appears to have settled in the Chatham Islands about 26 generations back. They were almost exterminated by the Maoris early in the present century. There are 53 inhabited houses. The climate here as a rule is much colder than in any part of New Zealand at a similar latitude.

The KERMADEC ISLANDS were formally annexed on August 17, 1887. The ceremony of annexing them took place on Sunday on Raoul Island, the largest in the group, being about 20 miles in circuit. (Mr. Thomas Bell, the one final settler who was the first to take possession of Sunday Island, over twenty years ago, claims the island as his, and he has obtained a legal opinion that the annexation of that island by the New Zealand Government was *ultra vires*.) The next in size is the Macaulay Island, about 3 miles in circumference. They lie about 614 miles to the NE. of Russell, in the Bay of Islands, between 29 and 32 degrees south latitude, and 177 and 180 degrees west longitude. Population, census 1896, 7—4 males, 3 females—living in one house.

On October 27, 1888, a British Protectorate was proclaimed over the COOK ISLANDS, or Hervey group (Rarotonga); and in September, 1900, Lord Runfurly left Auckland in H.M.S. *Mildura* to annex them, together with SAVAGE ISLAND and the Penhryn group, to the Colony of New Zealand. These islands, seven in number, lie between 18° 15′ and 21° 47′ S. lat., and 157° and 16° W. long. The group is federated, has a regular Government. But it is supposed that the New Zealand Government will give them two representatives, one in each House, and a regular revenue derived from import duty. The chief exports are coffee, copra, oranges and tropical fruits and cotton. Coffee and oranges grow luxuriously, and without care—literally wild. The British Resident (Lieut.-Colonel W. E. Gudgeon) is appointed on the recommendation of the New Zealand Government, and acts as Government agent in all matters of trade. A weekly newspaper is published in Rarotongan and English; it is called the *Torea*. British coin is the only legal currency, but the Chilian dollar is still used by everybody except the Government.

The AUCKLAND ISLANDS, about 200 miles south of Stewart Island; the Campbell Islands in latitude 52° 33′ south, and longitude 169° 8′ west; the Antipodes Islands, about 458 miles in a south-easterly direction from Port Chalmers; and the Bounty Islands, about 415 miles in nearly an east-south-easterly direction from Port Chalmers are included in the Colony of New Zealand.

NEW ZEALAND GOVERNMENT AND PARLIAMENT.

THE GOVERNOR'S DEPARTMENT.

GOVERNOR and Commander-in-Chief, His Excellency the Right Hon. the Earl of Ranfurly, K.C.M.G. (See Colonial Office List.) £5,000.

Private Secretary and Aide-de-Camp, Captain Dudley Alexander (Prince of Wales' Own—West Yorkshire Regiment).

Assistant Private Secretary, the Hon. Charles E. Hill-Trevor.

Administrator of the Government.

The Chief Justice holds a dormant commission.

EXECUTIVE COUNCIL.

August 13, 1900.

Prime Minister, Colonial Treasurer, Commissioner of Trades and Customs, Minister of Labour, and Minister of Defence, Rt. Hon. R. J. Seddon, P.C. LL.D.

Colonial Secretary, Postmaster-General, Minister of Railways, Industries and Commerce, Hon J. G. Ward.

Minister of Lands, Minister of Agriculture, Commissioner of Forests, and Minister in Charge of Advances to Settlers' Office, Hon. T. Y. Duncan.

Commissioner of Stamp Duties and Member representing the Native Race, Hon. J. Carroll.

Minister of Immigration, Minister of Education and Minister in Charge of Hospitals and Charitable Aid, Hon. W. C. Walker.

Minister of Public Works, Minister of Marine, Minister in Charge of Printing Office, Hon. W. Hall-Jones.

Minister of Justice and Minister of Mines, Hon. J. McGowan.

Minister without portfolio, Hon. A. G. Cadman.

Clerk of Executive Council, A. J. Willis.

MEMBERS OF THE LEGISLATIVE COUNCIL.

FORTY-FIVE MEMBERS ELECTED FOR SEVEN YEARS (SINCE 1891, PRIOR TO THAT DATE FOR LIFE).

Speaker, Hon. Henry John Miller.
Chairman of Committees, Hon. W. D. H. Baillie.
Clerk of Parliaments and Council, L. Stowe.

Clerk-Assistant, A. T. Bothamley.
Second Clerk-Assistant, G. Moore.
Interpreter, H. S. Hadfield.

The Library is controlled jointly by both Houses.

95. Furs, 25 per cent. *ad valorem.*
96 Haberdashery n.o e., 20 per cent. *ad valorem.*
97. Hats of all kinds, including straw hats; also caps, 25 per cent. *ad valorem.*
98. Hosiery n.o.e., 20 per cent. *ad valorem.*
99. Lace and laces, n.o e., 25 per cent. *ad valorem.*
100. Millinery of all kinds, including trimmed hats, caps and and bonnets, 25 per cent *ad valorem.*
101. Ribbons and crape, all kinds, 25 per cent. *ad valorem.*
102. Rugs, woollen, cotton, opossum, or other, 20 per cent. *ad valorem.*
103. Shawls, 20 per cent. *ad valorem.*
104. Silks, satins, velvets, plushes, n.o.e., composed of silk mixed with any other material, in the piece, 25 per cent. *ad valorem.*
105. Textile piece goods other than cotton or silk, 20 per cent. *ad valorem.*
106. Umbrellas, parasols, and sunshades, 20 per cent. *ad valorem.*
107. Yarns n.o e., 20 per cent. *ad valorem.*

CLASS VII.

LEATHER AND MANUFACTURES OF LEATHER.

108. Boots, shoes, and slippers, n.o.e.; goloshes, clogs, pattens, vamps, uppers, and laces, 22½ per cent. *ad valorem.*
109. Heel-plates, and toe-stiffeners and plates, 22½ per cent. *ad valorem.*
110. Leather—
    Leather-belting, and belt-leather, harness, bridle, legging, bag, kip (other than East India), 4d. the lb.
    Buff and split, including satin hides and tweeds, 3d. the lb.
    Cordovan, levanted leather, roans, sheepskins, morocco n.o.e., basils, 3d. the lb.
    Sole leather, 2d. the lb.
    East India kip, Persians, lambskins and goatskins (dressed other than morocco), kangaroo and wallabi skins (dressed), tan and coloured calf, 2d. the lb.
    Leather n.o.e., 1d. the lb.
111. Leather board or compo, 4d. the lb.
112. Leather bags and leather-cloth bags n.o.e., 20 per cent. *ad valorem.*
113. Leather chamois, 20 per cent. *ad valorem.*
114. Leather cut into shapes, 22½ per cent. *ad valorem.*
115. Leather leggings, 22½ per cent. *ad valorem.*
116 Leather manufactures. n.o e , 20 per cent. *ad valorem.*
117. Portmanteaux; trunks; travelling-bags and brief-bags of leather or leather-cloth 10-in. in length and upwards, and carpet-bags, 25 per cent. *ad valorem.*
118. Saddlery, and harness; whips and whip-thongs, 20 per cent. *ad valorem.*

CLASS VIII.

FURNITURE AND HOUSEHOLD FURNISHING.

119. Basket- and wicker-ware n.o.e., not being furniture, 20 per cent. *ad valorem.*
120. Carpets, and druggets; floorcloths; mats, and matting 20 per cent. *ad valorem.*
121. Desks, 20 per cent. *ad valorem.*
122. Furniture and cabinetware n.o.e., and other than iron, 25 per cent. *ad valorem.*
123. Furniture-, knife-, and plate-powder and polish, 20 per cent *ad valorem.*
124. Mantelpieces, other than stone, 20 per cent. *ad valorem.*
125. Upholstery n.o.e., 25 per cent. *ad valorem.*

CLASS IX.

CHINA, GLASS, AND EARTHEN GOODS.

126. Bricks known as firebricks, 20 per cent. *ad valorem.*
127. China, porcelain, and parianware, 20 per cent. *ad valorem.*
128. Drainage pipes and tiles, 20 per cent. *ad valorem.*
129. Earthen flooring and garden tiles, 20 per cent. *ad valorem.*
130. Earthenware, stoneware, and brownware, 20 per cent. *ad valorem.*
131. Filters, 20 per cent. *ad valorem.*
132. Fireclay ground, and fireclay goods, 20 per cent. *ad valorem.*
133. Glass, crown, sheet, and common window, 2s. the 100 superficial feet.
134. Glassware; also plate-plass, and glass polished, coloured and other kinds, n.o.e.; globes and chimneys for lamps, 20 per cent. *ad valorem.*
135. Lamps, lanterns, and lampwick, 20 per cent. *ad valorem.*
136. Plate-glass, bevelled or silvered; mirrors and looking-glasses, framed or unframed, 25 per cent. *ad valorem.*

CLASS X.

FANCY GOODS, MUSICAL INSTRUMENTS, &C.

137. Artificial flies, 25 per cent. *ad valorem.*
138. Cards, playing, 6d. per pack.
139. Clocks, 20 per cent. *ad valorem.*
140. Dressing-cases, 20 per cent. *ad valorem.*
141. Fancy goods, and toys, 20 per cent. *ad valorem.*
142. Fishing tackle, including artificially-baited hooks other flieanths, 20 per cent. *ad valorem.*
143. Jewellery; plate, gold or silver; greenstone, cut or polished, 20 per cent. *ad valorem.*
144. Mouldings in the piece for picture-frames, cornices, or ceilings, 15 per cent. *ad valorem.*
145. Musical instruments of all kinds n.o.e.. 20 per cent. *ad valorem.*
146. Oil perfumed, 25 per cent. *ad valorem.*
147. Papier-maché ware, 20 per cent. *ad valorem.*
148. Perfumery n.o.e., 25 per cent. *ad valorem.*
149. Perfumed spirits and Cologne-water: £1 1s. the liquid gallon until the 1st February, 1896, and thereafter £1 10s the liquid gallon.
150. Photographic goods n.o.e., 20 per cent. *ad valorem.*
151. Pictures, paintings, drawings, engravings and photographs, framed or unframed; picture- or photograph-frames and -mounts, 20 per cent. *ad valorem.*
152. Platedware, 20 per cent. *ad valorem.*
153. Statues, statuettes, casts and bronzes, 20 per cent. *ad valorem.*
154. Tobacco-pipes and -cases, cigar- and cigarette-holders and -cases, cigarette-papers and -cases, 25 per cent. *ad valorem.*
155. Toilet preparations n.o.e., 25 per cent. *ad valorem.*
156. Watches, 20 per cent. *ad valorem.*
157. Walking sticks, 20 per cent. *ad valorem.*

CLASS XI.

Paper Manufactures and Stationery.

158. Calendars and show-cards, all kinds, 25 per cent. *ad valorem.*
159. Cardboard boxes complete, or cardboard cut and shaped for boxes (including match-boxes), 25 per cent. *ad valorem.*
160. Directories of New Zealand, or of any part thereof; also covers for directories; 25 per cent. *ad valorem.*
161. Handbills, programmes and circulars, playbills and printed posters, 20 per cent. *ad valorem.*
162. Ink, writing, 20 per cent. *ad valorem.*
163. Paper bags, coarse, including sugar-bags, 7s. 6d. the cwt.
164. Paper bags n.o e., 25 per cent. *ad valorem.*
165. Paperhangings, 15 per cent. *ad valorem.*
166. Paper, wrapping—viz., blue candle, glazed cap, glazed casings, small hand, lumber hand, and tissue, 5s. the cwt.
167. Paper wrapping, other kinds, including brown, cartridge, sugar papers, 5s. the cwt.
168. Printed matter relating to patent or proprietary medicines, trade catalogues, price-lists, and fashion-plates of the goods of firms of persons in the colony, 25 per cent. *ad valorem.*
169. Stationery and writing-paper n.o.e., 20 per cent. *ad valorem.*
170. Stationery, manufactured,—viz.: account-books, manuscript books; billhead, invoice, and statement forms; printed or ruled paper, counter-books; cheque- and draft-forms; tags; labels; blotting-pads; sketch-books; book-covers; copying letter-books; manifold writers; albums (other than for photographs); diaries; birthday-books; plain or faint-lined ruled books; printed window-tickets; printed, lithographed or embossed stationery; and Christmas, New-year, birthday, and Easter-cards and booklets, 25 per cent. *ad valorem.*
171. Stereotypes and matrices, 25 per cent. *ad valorem.*

CLASS XII.

Manufactures of Metal.

172. Bicycles, tricycles, and the like vehicles; also finished or partly finished or machined parts of same n.o.e., including weldless steel tubing cut to short lengths, 20 per cent. *ad valorem.*
173. Boilers, land and marine, 20 per cent. *ad valorem.*
174. Brass cocks, valves, unions, lubricators, and whistles, 20 per cent. *ad valorem.*
175. Brass manufactures n.o.e, 20 per cent. *ad valorem.*
176. Cartridges (shot), 10- to 24-bore, 1s. 6d. the 100.
177. Cartridge-cases, 9d. the 100.
178. Cartridges n.o.e., 20 per cent. *ad valorem.*
179. Cash-registering machines, 10 per cent. *ad valorem.*
180. Coffin-furniture, 20 per cent. *ad valorem.*
181. Composition piping, 3s. 6d. the cwt.
182. Copper manufactures n.o.e., 20 per cent. *ad valorem.*
183. Copying presses, 20 per cent. *ad valorem.*
184. Crab-winches, cranes n.o.e, capstans, and windlasses, 20 per cent. *ad valorem.*
185. Cutlery, 20 per cent. *ad valorem.*
186. Firearms, all kinds, 20 per cent. *ad valorem.*
187. Galvanised iron manufactures n.o.e., 25 per cent *ad valorem.*
188. Gasometers, and other apparatus for producing gas; also gas-meters, 10 per cent. *ad valorem.*
189. Gas pipes, iron, 5 per cent. *ad valorem.*
190. Hardware, ironmongery, and holloware, 20 per cent. *ad valorem.*
191. Iron bridges and iron material n.o.e., for the construction of bridges, wharves, jetties, or patent slips, 20 per cent. *ad valorem.*
192. Iron columns for buildings, and other structural ironwork, 20 per cent. *ad valorem.*
193. Iron doors for safes and vaults, 20 per cent. *ad valorem.*
194. Iron galvanised corrugated sheets, screws, and nails, 2s. the cwt.
195. Iron galvanised tiles, ridging, guttering, and spouting, 20 per cent. *ad valorem.*
196. Iron gates and gate-posts, staples, standards, straining posts and apparatus, 20 per cent. *ad valorem.*
197. Iron nails, 2s. the cwt.
198. Iron pipes, and fittings for same, including main-cocks, 5 per cent. *ad valorem.*
199. Iron, plain galvanised sheet and hoop, 1s. 6d. the cwt.
200. Iron tanks, exceeding 200 gallons and not exceeding 400 gallons, 10s. each.
201. Iron tanks of and under 200 gallons, 5s. each.
202. Iron work and wire work, 20 per cent. *ad valorem.*
203. Japanned and lacquered metal ware, 25 per cent. *ad valorem.*
204. Lawn mowers, 20 per cent. *ad valorem.*
205. Lead in sheets, 1s. 6d. the cwt.
206. Lead piping, 3s. 6d. the cwt.
207. Machinery, n.o.e., 20 per cent. *ad valorem.*
208. Machinery, electric, and appliances, 10 per cent. *ad valorem.*
209. Machinery for flour-mills, woollen-mills, paper-mills, rope- and twine-making, dredging, saw-milling, planing, and wood-working (including lathes), oil-refining, boring; and also machinery for refrigerating or preserving meat; leather-splitting machines and band-knives for same, 5 per cent. *ad valorem.*
210. Machinery for stamping and blocking tin, 5 per cent. *ad valorem.*
211. Manufactures, n.o.e., of metal, or of metal in combination with any other material, 20 per cent. *ad valorem.*
212. Nails, n.o.e., 3s. the cwt.
213. Portable engines on four or any greater number of wheels, with boilers of locomotive type; also traction-engines; 5 per cent. *ad valorem.*
214. Printing machines and presses, 5 per cent. *ad valorem.*
215. Pumps and other apparatus for raising water, n.o.e., 20 per cent. *ad valorem.* (*See* exemptions).
216. Railway and tramway plant and materials, n.o.e., 20 per cent. *ad valorem.*
217. Sad irons, 20 per cent. *ad valorem.*
218. Shot, 10s. the cwt.
219. Soda-water machines; also machines for aerating liquids, 5 per cent. *ad valorem.*
220. Steam-engines and parts of steam-engines, n.o.e., 20 per cent. *ad valorem.*
221. Steam-engines and parts thereof, including the boiler or boilers therefor, imported specially for mining and dairying purposes, 5 per cent. *ad valorem.*
222 Tinware, and tinsmiths' furniture, n.o.e., 25 per cent *ad valorem.*
223. Waterworks, pipes, iron, 5 per cent. *ad valorem.*
224. Weighbridges and weighing machines, 20 per cent. *ad valorem.*
225. Wire mattresses and webbing, 20 per cent. *ad valorem.*
226. Zinc tiles, ridging, guttering, piping, 20 per cent. *ad valorem.*
227. Zinc manufactures, n.o.e., 25 per cent. *ad valorem.*

CLASS XIII.

Timber and Articles made from Timber.

228. Bellows, other than forge, 20 per cent. *ad valorem.*
229. Blocks, wooden tackle, 20 per cent. *ad valorem.*
230. Buckets and tubs, of wood, 20 per cent. *ad valorem.*
231. Carriages, carts, drays, waggons, perambulators, and wheels for the same, 20 per cent. *ad valorem.*
232. Carriage shafts, spokes, and felloes, dressed; bent carriage-timber, n.o.e., 20 per cent. *ad valorem.*
233. Doors, glazed with ornamental glass, 4s. each.
234. Doors, plain, 2s. each.
235. Sashes, glazed, with ornamental glass, 4s. the pair.
236. Sashes, plain, 2s. the pair.
237. Timber, palings, 2s. the 100.
238. Timber, posts, 8s. the 100.
239. Timber, rails, 4s. the 100.
240. Timber, sawn, dressed, 4s. the 100 ft. superficial.
241. Timber, sawn, rough, 2s. the 100 ft. superficial.
242. Timber, shingles and laths, 2s. the 1,000.
243. Woodenware and turnery, n.o.e., and veneers, 20 per cent. *ad valorem.*

CLASS XIV.

Oils, Paints, etc.

244. Axle-grease, and other solid lubricants, 20 per cent. *ad valorem.*
245. Harness oil and composition, and leather dressing, 20 per cent. *ad valorem.*
246. Naphtha, 6d. the gallon.
247. Oil, linseed, 6d. the gallon.
248. Oil, mineral, including shale waste or unrefined mineral oil, n.o.e., 6d. the gallon.
249. Oil, n.o.e., 6d. the gallon.
250. Oil, olive, in bulk, 6d. the gallon.
251. Oil, vegetable, in bulk, n.o.e., 6d. the gallon.
252. Oil, vegetable or other, in bottle, 15 per cent. *ad valorem.*
253. Paints and colours ground in oil or turpentine, 2s. 6d. the cwt.
254. Paints and colours mixed ready for use, 5s. the cwt.
255. Putty, 2s. the cwt.
256. Stearine, for match making, ¾d. the lb.
257. Varnish; enamel paints; gold size, 2s. the gallon.
258. Whiting and chalk, 1s. the cwt.

CLASS XV.

Agricultural and Farm Products, etc.

259. Animals, food for, of all kinds, n.o.e., 20 per cent. *ad valorem.*
260. Cattle (horned), 10s. each.
261. Chaff, £1 the ton.
262. Grain—namely, barley, 2s. the 100 lb.
263. Grain and pulse of every kind, n.o.e., 9d. the 100 lb.
264. Grain and pulse of every kind, when ground or in any way manufactured, n.o.e., 1s. the 100 lb.
265. Horses, £1 each.
266. Linseed, £1 the ton.
267. Maize, 9d. the 100 lb.
268. Onions, £1 the ton.
269. Prepared calf-meal, £1 5s. the ton.

CLASS XVI.

Miscellaneous.

270. *Bags, flour, 20 per cent. *ad valorem.*
271. Bags, calico, forfar, hessian, and linen, 20 per cent. *ad valorem.*
272. Bagging and bags, n.o.e., 15 per cent. *ad valorem.*
273. Blacking and boot gloss, 20 per cent. *ad valorem.*
274. Blacklead, 20 per cent. *ad valorem.*
275. Blue, 2d. the lb.
276. Brooms, brushes, and brushware, n.o.e., 25 per cent. *ad valorem.*
277. Brushes, hair, and combs; toilet-, clothes-, and hat-brushes, 20 per cent. *ad valorem.*
278. Candles, 1d. the lb. or package of that reputed weight, and so in proportion for packages of greater or less reputed weight.

* *See* exemptions (page 574).

279. Cement, 2s. the barrel.
280. Cordage and rope, n.o.e., 20 per cent. *ad valorem*.
281. Cork, cut, including bungs, 20 per cent. *ad valorem*.
282. Fireworks, n.o.e., 20 per cent. *ad valorem*.
283. Flock, 10 per cent. *ad valorem*.
284. Glue and size, 1½d. the lb.
285. Granite, sawn on not more than two sides, and not dressed or polished, 5 per cent. *ad valorem*.
286. Marble, granite, and other stone dressed or polished, and articles made therefrom, including mantelpieces, 25 per cent. *ad valorem*.
287. Matches—
Wooden, in boxes containing not more than 60 matches, 1s. the gross of boxes.
In boxes containing over 60 and not more than 100 matches, 2s. the gross of boxes.
In boxes containing more than 100 matches for every 100 matches or fraction thereof contained in one box, 2s. the gross of boxes.
Wax, "plaid vestas" in cardboard boxes containing under 100 matches, 1s. the gross of boxes.
"Pocket vestas" in tin or other boxes containing under 100 matches, 1s. 4d. the gross of boxes.
"Sportsman's," "ovals," and "No. 4 tins vestas," in boxes containing not more than 200 matches, 4s. 6d. the gross of boxes.
Other kinds, for every 100 matches or fraction thereof contained in one box, 2s. 3d. the gross of boxes.
288. Nets and netting, 20 per cent. *ad valorem*.
289. Powder, sporting, 6d. the lb.
290. Rice manufactured into starch in bond, 2s. the cwt.
291. Sacks, other than corn sacks and jute sacks, 15 per cent. *ad valorem*.
292. Sausage-skins and casings (including brine or salt), 3d. the lb.
293. Soap, common yellow, and blue-mottled, 5s. the cwt.
294. Soap, n.o.e., 25 per cent. *ad valorem*.
295. Soap-powder, extract of soap, dry soap, and soft soap, 20 per cent. *ad valorem*.
296. Spirits, methylated, 1s. the liquid gallon.
297. Spirits, cleared from warehouse, methylated, under prescribed conditions, 6d. the liquid gallon.
298. Starch, 2d. the lb.
299. Tarpaulins, tents, rick- and waggon-covers, 20 per cent. *ad valorem*.
300. Twine, n.o.e., 20 per cent. *ad valorem*.
301. Washing powder, 20 per cent. *ad valorem*.
302. Wax, paraffin, for match making, ¾d. lb.
303. Wax, paraffin, mineral, vegetable, and Japanese, 1½d. the lb.
In addition to any duty chargeable by law on any goods imported into the colony, a further duty of 20 per cent. *ad valorem* shall be charged when the goods are prison-made.

TABLE OF EXEMPTIONS FROM DUTIES OF CUSTOMS.

CLASS I.

FOODS, ETC.

304. ALMONDS, Barbary, Sicily, and French, used in confectioners' manufactures.
305. Anchovies, salted, in cask.
306. Arrowroot, sago, tapioca, macaroni, vermicelli, and prepared groats.
307. Rock salt.
308. Rice, dressed or undressed.
309. Rice manufactured into starch, in bond.
310. Salt.

CLASS IV.

NON-ALCOHOLIC BEVERAGES, ETC.

311. Cocoa-beans.
312. Coffee, raw.

CLASS V.

DRUGS, ETC.

313. Acids—viz.: boracic; carbolic, in bulk; fluoric: muriatic; nitric; oxalic; oleic; pyrogallic; salicylic; sulphuric.
314. Concentrated extracts or essences in liquid form or preserved in fat for perfume-manufacturing purposes in manufacturing warehouses, in bottles of not less than one pound in weight.
315. Disinfectants.
316. Drugs and chemicals—viz.: alum; sulphate of aluminium; sulphate of ammonia; anhydrous ammonia; liquid chlorine; aniline dyes; arsenic; bluestone, or sulphate of copper; borax; catechu; chloride of calcium; nitrate of silver; cochineal; creosote, crude or commercial; glycerine, crude; gum, arabic and tragacanth; gum benzoin; artificial gum arabic; gum, damar; phosphorus; picric acid; prussiate of potash; potash, caustic potash, and chlorate of potash; pearlash; cyanide of potassium; sal-ammoniac; saltpetre; acetate of soda, crude; soda-ash; caustic soda; nitrate of soda; silicate of soda; sulphate of soda; cyanide of sodium; hypo-sulphite of sodium; sulphide of sodium; strychnine; sulphur; chloride of zinc; iron-sulphates; gall-nuts; turmeric; saffron; nitrous-oxide gas; tree washes; insecticides; maltine; chlorodyne.
317. Essential oils, except eucalyptus; cod-liver oil; oil of rhodium.
318. Horse-drenches.
319. Medicinal barks, leaves, herbs, flowers, roots and gums.
320. Scrub exterminator.
321. Sheep-dip; sheep-drenches; sheep-licks.
322. Surgical and dental instruments and appliances.
323. Scientific and assay balances, retorts, flasks, and other appliances for chemical analysis and assay work.
324. Water-hardening chemicals for brewers' use.

CLASS VI.

CLOTHING AND TEXTILES.

325. Accoutrements for military purposes, excepting uniform clothing.
326. Brace-elastic and brace-mountings.
327. Bunting, in the piece.
328. Butter- and cheese-cloth.

359. Saddle-trees.
360. Saddlers' ironmongery (except bits and stirrup irons), hames and mounts for harness; straining, surcingle, brace, girth, and roller webs; collar-check, and the same article plain, of such quality as may be approved by the Commissioner; legging-buckles.
361. Tanning materials, crude.

---

* Whenever any dispute arises as to the application of the exemption in favour of coloured cotton, flannelette, or union shirtings in the case of fabrics alleged to be such shirtings, the Commissioner has power to decide such dispute; and in case of doubt on his part, he may require the fabric in dispute to be cut up for shirt-making, under such conditions as he prescribes.

CLASS VIII.

FURNITURE, ETC.

362. Blind-webbing and tape.
363. Upholsterers' webbing, hair-seating, imitation hair-seating; curled hair; gimp and cord of wool, cotton, or silk; tufts, and studs.

CLASS IX.

CHINA, GLASS, ETC.

364. Bottles, empty, plain glass, not being cut or ground; jars up to 3 in. in diameter at the mouth.
365. Glass plates (engraved) for photo-lithographic work.
366. Jars or other dutiable vessels, containing free goods or goods subject to a fixed rate of duty, and being ordinary trade packages for the goods contained in them.

CLASS X.

FANCY GOODS, ETC.

367. Action-work and keys, in frames and otherwise, for manufacture of organs, harmoniums, and pianos; organ pipes and stop-knobs.
368. Artists' canvas, colours, brushes, and pallet-knives.
369. Magic-lanterns, lenses, and slides.
370. Microscopes and astronomical telescopes, and lenses for same.
371. Musical instruments specially imported for Volunteer bands.
372. Paintings, statuary, and works of art, presented to or imported by any public institution or art association registered as a body corporate, for display in the buildings of such institution or association, and not to be sold or otherwise disposed of.
373. Photographic cameras and lenses.
374. Photographs of personal friends in letters or packets.
375. Precious stones, cut or uncut and unmounted.
376. Sensitised surfaces for photographic purposes.

CLASS XI.

PAPER, ETC.

377. Bookbinders' materials—viz: cloth, leather, thread, headbands, webbing, end-papers, tacketing-gut, marbling-colours, marble-paper, blue paste for ruling-ink, staple-presses, wire staples, staple-sticks.
378. Butter-paper, known as parchment paper or waxed paper.
379. Cardboard and pasteboard, of sizes not less than that known as "royal."
380. Cardboard boxes, material for—viz.: gold and silver paper, plain and embossed, gelatine and coloured papers, known as "box-papers."
381. Cartridge-paper for drawing-books.
382. Cloth-lined boards, not less than royal.
383. Cloth-lined papers, enamelled paper; ivorite and gelatine; metallic paper; not less than demy.
384. Copy-books and drawing-books.
385. Copying-paper, medium and double-foolscap, in original mill wrappers and labels.
386. Hand-made cheque-paper.
387. Ink, printing.
388. Masticated para.
389. Millboard, and bookbinders' leather-board.
390. Paper, hand-made or machine-made book or writing, of sizes not less than the size known as "demy," when in original wrappers.
391. Printing-paper.
392. Printed books, papers, and music, n.o.e.
393. School slates, and educational apparatus.

CLASS XII.

METALS.

394. Anchors.
395. Artificers' tools.
396. Axes and hatchets; spades, shovels, and forks; picks; mattocks; quartz and knapping hammers; scythes, sheep-shears; reaping-hooks; soldering-irons; paper-hangers' scissors; butchers' saws and cleavers.
397. Axles, axle-arms, and boxes.
398. Band-saws and folding-saws, including frames.
399. Bellows-nails.
400. Bicycles and tricycles, fittings for—viz., rubber-tires, pneumatic tires, outside covers, and inner tubes; rubber and cork handles, and pedal-rubbers; also drop-forgings and stampings, ball-bearings, weldless steel tube in full lengths, rims, forks, and spokes in the rough.
401. Blacksmiths' anvils, forges, and fans.
402. Blowers.
403. Boiler furnaces, welded or flanged or corrugated.
404. Bolts, all, and nuts, blank or screwed, black or finished.
405. Brass and copper, in pigs, bars, tubes, or sheets.
406. Brass tubing and stamped work, in the rough, for gasaliers and brackets.
407. Caps, percussion.
408. Card-clothing for woollen-mills.
409. Chains, trace and plough chains; or metal articles required to repair or complete riding or driving harness or saddlery to be repaired or made in the colony.
410. Chain pulleys and chains for same.
411. Chamfering, crozing and howelling machine for cask making.
412. Copper and composition, rod, bolt, sheathing, and nails.
413. Couch-roll jackets, machine-wires, beater-bars, and strainers plates for paper-mills.
414. Crucibles.
415. Emery-grinding machines and emery-wheels.
416. Empty iron drums, not exceeding 10 gallons capacity.
417. Engineers' engine governors, boiler makers', brass finishers', smiths' and all metal and wood workers' machines and hand tools.
418. Eyelets.
419. Fire-engines, including Merryweather's chemical fire-engines.
420. Fish-hooks.
421. Galvanising bath, welded.
422. Gas-engines and hammers, and oil engines.
423. Glassmakers' moulds.
424. Hydraulic cranes.
425. Iron- and brass-wove wire and wire-gauze; also wire-netting.
426. Iron and boiler-plates, and unflanged end-plates for boilers; boiler-tubes not exceeding 6 in. in diameter, and unflanged; Bowling's expansion rings; furnace-flues.
427. Iron, plain black sheet, rod, bolt, bar, plate, hoop, and pig.
428. Iron rolled girders.
429. Iron plates, screws, and castings for ships.
430. Iron wire, n.o.e., including fencing-wire, plain and barbed.
431. Lead, in pigs and bars.
432. Locomotives.
433. Machine saws.
434. Machinery for agricultural and dairying purposes.
435. Machinery for gold-saving and mining purposes and processes, but not for dredging.
436. Machinery exclusively for the purposes of manufacturing beetroot sugar.
437. Metal fittings for trunks, portmanteaux, travelling-bags, leggings, bags, and satchels.
438. Metal sheaves for blocks.
439. Metallic capsules
440. Perambulators and the like vehicles, fittings for, n.o.e.
441. Perforated or cellular sheet zinc or iron.
442. Portable engines, on four or any greater number of wheels, with boiler of locomotive type; also traction engines.
443. Printing type and materials, n.o.e.
444. Rails for railways and tramways.
445. Reapers and binders, and reaping and mowing-machines, and extra parts for same; materials for manufacturing agricultural machinery—namely, reaper-knife sections, fingers, brass and steel springs, malleable castings, discs for harrows, mould-boards and plough-shares, mould-board plates, and steel share-plates cut to pattern, skeith-plates; ploughs and harrows; combined threshers.
446. Riddles and sieves.
447. Rivets and washers.
448. Separators and coolers for dairying purposes.
449. Set-screws, engineers' studs, and split-pins.
450. Sewing-, knitting-, and kilting-machines.
451. Spiral springs (except sofa- and mattress-springs).
452. Steam- and hydraulic-pressure and vacuum gauges.
453. Steel rams, black or finished, for hydraulic cranes or jiggers.
454. Surveyors' steel bands and measuring tapes.
455. Swords.
456. Tacks of all kinds.
457. Tea-packing lead.
458. Tin, in pigs, bars, or sheets.
459. Tinsmiths' fittings, including stamped or blocked tin, planished or unplanished.
460. Tins, tops of, ornamented.
461. Wire, of brass, copper, or lead.
462. Zinc, plain sheet.
463. Zinc plates and copper plates for photo-lithographic work.

CLASS XIII.

TIMBER, ETC.

464. Ash, hickory, and lancewood timber, unwrought.
465. Blacksmiths' bellows.
466. Brush woodware.
467. Carriage- and cart-shafts, spokes and felloes in the rough; hubs, all kinds; poles, if unbent and unplaned, all kinds; bent wheel-rims.
468. Carriage- and cart-makers' materials, viz.: springs, mountings, trimmings, brass hinges, tire-bolts, shackle-holders, step treads, and other iron fittings (except steps, lamp-irons, dash-irons, seat-rails, and fifth wheels), rubber-cloth.
469. Churns.
470. Lignum-vitæ.
471. Sieves, hair.
472. Wooden handles for tools.

CLASS XIV.

OILS, ETC.

473. Benzine in bulk.
474. Kerosene.
475. Oils, viz.: candlenut, fish, whale, seal, penguin, and palm.
476. Paints and colours n.o.e.
477. Shale oil, once run, suitable for gas-making.
478. Spirits of tar.
479. Turpentine, driers, and terebene.

CLASS XV.

MISCELLANEOUS.

480. Apparatus and appliances solely for teaching purposes, as may be approved by the Commissioner.
481. Bags made of New Zealand tow or flax.
482. Belting for machinery, other than leather.
483. Binder-twine.
484. Bricks, other than firebricks.
485. Building materials n.o.e.

486. Brushes for cream-separators and combine-screens.
487. Candlenuts and candlenut kernels.
488. Candle-wick.
489. Canvas aprons and elevators for reapers and binders.
490. Carpenters' baskets.
491. Charts and maps.
492. Confectioners' moulding starch.
493. Cotton waste.
494. Dye stuffs and dyeing materials, crude.
495. Felt sheathing.
496. Food preservative n.o.e.
497. Gum boots.
498. Hawsers of 12 in. and over.
499. Honey and brown Windsor soap composition
500. Iron and steel cordage.
501. Jute bagging, bags, and sacks.
502. Manures.
503. Marble, and other stone, hewn or rough-sawn, not dressed or polished.
504. Netmakers' cotton twine.
505. Official supplies for consular officers of countries where a similar exemption exists in favour of British Consuls.
506. Papermakers' felts.
507. Passengers' baggage and effects, including only wearing-apparel and other personal effects that have been worn or are in use by persons arriving in the colony; also implements, instruments, and tools of trade, occupation, or employment of such persons; and household or other effects not exceeding £100 in value, which have been in use for twelve months prior to embarkation by the persons or families bringing them to the colony, and not intended for any other person or persons or for sale; also cabin-furnishings belonging to such persons.
508. Plaster of paris.
509. Powder, blasting and meal.
510. Ship-chandlery n.o.e.
511. Ships' rockets, blue-lights, and danger-signals.
512. Spirits for manufacturing perfumed spirit, flavouring essences, and culinary essences in manufacturing warehouses This exemption however ceases on the 1st day of February, 1896.
513. Stones, mill-, grind-, oil-, and whet-.
514. Tobacco for sheepwash or for insecticide, after being rendered unfit for human consumption to the satisfaction of the Commissioner.
515. Treacle or molasses, mixed with bone-black in proportions to the satisfaction of the Commissioner.
516. Tubular woven cotton-cloth in the piece, for meat wraps.
517. Type-writers.
518. Wax, bottling.
519. Woolpacks and woolpockets.
520. Yarn, viz.; coir, flax, hemp.
521. Articles and materials (as may from time to time be specified by the Commissioner) which are suited only for, and are to be used solely in, the fabrication of goods within the colony. All decisions of the Commissioner in reference to articles so admitted free to be published from time to time in the *Gazette*.
522. And all articles not otherwise enumerated.

TABLE OF EXCISE DUTIES.

523. Tobacco, 1s. the lb.
524. Cigars, cigarettes, and snuff, 1s. 6d. the lb.
525. Beer, 3d. the gallon.
526. Articles in which spirit is a necessary ingredient, manufactured in a warehouse appointed under section 26 of "The Customs Laws Consolidation Act, 1882," namely—
Pharmacopœia tinctures, essences, extracts, and medicinal spirits containing more than 50 per cent. of proof spirits, 9d. the lb.
Pharmacopœia tinctures, essences, extracts, and medicinal spirits containing less than 50 per cent. of proof spirit, 3d. the lb.
Culinary and flavouring essences, 12s. the liquid gallon, from 1st February, 1896.
Perfumed spirit, 20s. the liquid gallon, from 1st February, 1896.
Toilet preparations which are subject to 16s. the liquid gallon on importation, 12s. the liquid gallon.
Toilet preparations which are subject to 25 per cent. duty on importation, 6s. the liquid gallon.

DUTIES IMPOSED BY HIS EXCELLENCY THE GOVERNOR UNDER SECTION 17 OF "THE CUSTOMS AND EXCISE DUTIES ACT, 1888."

527. Olive stones, ground (see *New Zealand Gazette*, 15th May, 1890), 4d. the lb.
528. Brewers' caramel (see *New Zealand Gazette*, 21st August, 1890), 3d. the lb.
529. Liquid hops (see *New Zealand Gazette*, 21st December, 1893), 6s. the lb.

STAMP DUTIES.

	£	s.	d.
AFFIDAVIT OR DECLARATION	0	2	6
AGREEMENT, OR MEMORANDUM OF AN AGREEMENT—			
Other than an agreement for a lease or by deed			
Where the matter thereof is of the value of £20 or upwards	0	1	0
Where divers letters are offered in evidence to prove any agreement, it shall be sufficient if any one of such letters is stamped with the duty of ...	0	2	6
Where two or more persons join in one declaration or affidavit—in respect of each person	0	2	6
ANNUAL LICENSE—			
To be taken out by any Chartered, Incorporated, or Joint-stock company carrying on business in New Zealand, whether incorporated in the colony or elsewhere, 1s. per cent. on nominal capital, but not to exceed a maximum of £200 in respect of any one license.			
APPOINTMENT OF NEW TRUSTEES—			
For every appointment of a new trustee or new trustees, except public trustees	0	10	0
APPRAISEMENT or valuation of any property—			
Not exceeding £20	0	1	0
Exceeding £20 and not exceeding £50	0	2	6
Above £50 and not exceeding £100	0	5	0
Above £100 and not exceeding £200	0	10	0
Above £200 and not exceeding £500	0	15	0
Above £500	1	0	0
ASSIGNMENT for benefit of creditors	2	10	0
ASSIGNMENT OR TRANSFER—			
Of property held under a miner's right, when the purchase money does not exceed £20	0	1	0
Exceeds £20, and does not exceed £50	0	2	6
For every additional £50 or part of £50	0	2	6
AWARDS—the same duties as on Appraisements, any sums above £1,000 being liable to a duty of ...	1	15	0
BANK NOTES—			
Upon the average quarterly amount in circulation, per cent.	0	10	0
BILLS OF EXCHANGE—			
Payable on demand	0	0	1
Payable otherwise than on demand—if drawn singly—for any sum not exceeding £50	0	1	0
For every additional £50 or part of £50	0	1	0
BILL OF LADING (*must be impressed*)	0	1	0
CHEQUE	0	0	1
CERTIFICATE OF INCORPORATION OF COMPANIES	5	0	0
CHARTER-PARTY for conveyance beyond the colony	0	1	0
CONVEYANCE ON SALE—			
For every £50, or part of £50, of the amount or value of the consideration for the sale	0	7	6
Conveyance or transfer for a nominal or no consideration—the same duty as on a Conveyance on Sale.			
COUNTERPART OR DUPLICATE			
Of any instrument chargeable with any duty, where such duty does not amount to 2s. 6d.—the same duty as the original instrument.			
In any other case	0	2	6
DEED OF GIFT.—The same duties as would be payable under the Deceased Persons' Estates Act, 1881, in the case of devise or bequest by will.			
DEED of any kind whatever not otherwise charged ...	0	10	0
DRAFT ON DEMAND—			
(See Bills of Exchange)	0	0	1
LAND TRANSFER—			
Memorandum of transfer.—Where the transfer is on a sale of property therein, the same duty as on a Conveyance on Sale.			
Where the transfer is by way of exchange, or partition of the property therein	0	10	0
Transfer by way of exchange, if consideration money paid by way of equality exceeds £100, same duty as a conveyance on sale.			
Memorandum of lease—The same duty as on a lease.			
Transfer of lease or encumbrance or surrender thereof.—Where the transfer or surrender is on a sale of the property or estate therein, the same duty as on a conveyance on sale.			
In any other case	0	10	0
LEASE, OR AGREEMENT FOR A LEASE—			
Or any written document for the tenancy or occupancy of any lands.			
Without any consideration by way of premium, in respect of the yearly rent, where such rent does not exceed £50	0	2	6

In consideration of a sum of money by way of premium without rent—The same duty as on a conveyance on sale.			
In consideration of a sum of money by way of premium, and also of a yearly rent, on the amount of premium—The same duty as on a conveyance on sale.			
On the yearly rent when amounting to £20 or upwards—The same duty as on a lease.			
Wherever there is no possible means of arriving at the maximum consideration—a fixed sum of £5.			
LETTER OF CREDIT	0	0	6
MEMORIAL—			
For every memorial authorised to be registered under "The Deeds Registration Act, 1868" ...	0	10	0
NOTARIAL ACT—			
For every Notarial Act of any kind (except protests on injury to ship or cargo)	0	1	0
For every maritime protest for or in respect of any injury or damage to any ship or vessel, or the cargo or loading thereof, or for any purpose that			

	£	s.	d.
such protest may be required, and whether noted only or extended in due form	0	2	6
POLICY—			
Upon every policy of sea insurance, on any voyage—			
For every £100 and every part of £100 thereby insured	0	0	3
Upon every policy of sea insurance for time—For every £100 and every part of £100 thereby insured—			
Where the insurance is made for any time not exceeding six months	0	0	3
For any time exceeding six months and not exceeding twelve months	0	0	6
(All marine policies of insurance must be stamped within 14 days of receipt in New Zealand at the Stamp Office.)			
POWER OF ATTORNEY	0	10	0
PROMISSORY NOTES—			
Payable on demand	0	0	1
Payable otherwise than on demand—			
For any sum not exceeding £25	0	0	6
Exceeding £25 and not exceeding £50	0	1	0
For every additional £50 or part of £50	0	1	0
RECEIPT OR DISCHARGE—			
For £2 and over	0	0	1
Receipts on passenger tickets by steamer	0	0	1
SETTLEMENT, DEED OF—			
For every £100 or part of £100 of the value of such property	0	5	0
TRANSFER OF RUN—			
Except by way of Mortgage of any run or station held under lease or license from the Crown, or of any interest therein, same duty as a conveyance on sale.			
TRANSFER ON SALE OF SHARES AND STOCK—			
Not exceeding £20	0	1	0
Exceeding £20 and not exceeding £50	0	2	6
For every additional £50 or part	0	2	6
In any other case	0	10	0
TOTALISATOR, a duty of 1½ per cent. on the gross takings is payable under the Stamp Act.			

DUTIES ON ESTATES OF DECEASED PERSONS.

The schedule to the Estates Duty Act, 1881, as altered by the Amendment Act, 1885, imposes duties on the estates, real and personal, of deceased persons upon the final balance of the estate—

Not exceeding £100, no duty.

Upon any amount exceeding £100, but not exceeding £1,000 on the first £100, no duty, and on the remainder, £2½ per cent.

Upon any amount exceeding £1,000 but not exceeding £5,000, £3½ per cent.

Upon any amount exceeding £5,000, and up to £20,000, £7 per cent.

Upon £20,000, and any amount over that sum, £10 per cent.

Strangers in blood, excepting adopted children, £3 per cent. additional.

No duty may be levied on property to which any wife or husband shall become absolutely entitled by reason of the wife or the husband's intestacy, or under her or his will, or a settlement, or a deed of gift made by her or him.

Bequests to charitable, scientific, or educational institutions are exempted from duty by a special enactment.

TAXES.

In 1891 a Land and Income Assessment Act was passed, repealing the Property Assessment Acts previously in force. Various amendments have since been made by Acts of 1892, 1893, 1894, 1895.

The Assessment Acts now provide for an ordinary land-tax on the actual value of land, less the value of all improvements thereon. Registered mortgages held by any person are also liable to land-tax, and registered mortgages owing by an owner are deductible from the unimproved value of his land before tax is assessed. An exemption of £500 is allowed where the value of the land and mortgages, less improvements and mortgages owing upon such land, does not exceed £1,500, between that sum and £2,500, the £500 exemption diminishes by £1 for every £2 such value increases. Beyond £2,500 no exemption is allowed.

A graduated land-tax is levied in addition when the value of all the land of an owner, less the value of improvements thereon, reaches £5,000. Mortgages owing on such land are not deductible from an assessment for graduated land-tax, and no mortgages held are liable to it. The scale of graduated tax varies from one-eighth of a penny in the £ on land owned by any person or Company, the unimproved value of which is £5,000, and less than £10,000, to 2d. in the £ on land, the unimproved value of which is £210,000, or exceeds that sum

Where persons liable to graduated land-tax have been absent from, or resident out of the colony, for a period of three years or more prior to the passing of the Annual Tax Act, such tax is increased by 20 per cent. Provisions are contained in the Assessment Acts for making assessments and hearing any objections made thereto by owners.

By the Act of 1895 native land occupied by European tenants is liable to half the ordinary land tax, the tenant being made liable for the tax but given the power of recovery from rent payable to the Maori owner.

By the same Acts an income-tax is levied on all income which is not derived from land or mortgages in New Zealand, or from shares. An exemption of £300 (no matter how large the income may be), is allowed to each person resident in New Zealand, but no such exemption is allowed to a non-resident. A deduction of amounts paid for life insurance premiums on the taxpayer's life is also allowed, but no such deduction can exceed £50 in any year. Companies pay on their income (other than that derived from land and mortgages in New Zealand) and are not allowed an exemption; shareholders, therefore, do not include dividends received from companies in their individual returns of income. Objections to the assessment of income are heard privately by a Stipendiary Magistrate.

SCALE OF MERCANTILE CHARGES.

ADOPTED BY THE WELLINGTON CHAMBER OF COMMERCE, APRIL 14, 1875.

SALES AND PURCHASES.	£ s. d.
On sales of merchandise and ships	5 per ct.
On sale of Colonial produce	2½ to 5 per ct.
On sale or purchase of Government securities, or shares in public companies	1 to 5 per ct.
On all goods withdrawn, re-shipped, or delivered to order (on invoice)	2½ per ct.
On collecting and remitting rents	5 to 10 per ct.
On collecting and remitting interests	5 to 10 per ct.
On investing money on mortgage	1 to 2½ per ct.
On recovering debts and other accounts	5 per ct.
On cash payments—Not in funds	2½ per ct.
On interest on general disbursements in account sales, and accounts current, per annum	8 to 10 per ct.
On advances and current accounts not liquidated at the end of the usual season—say March 31—the balance to be charged as a fresh advance, subject to a commission of	2½ per ct.
On becoming guarantee or security for contracts (on amount of penalty)	1 to 2½ per ct.
On acting as Trustee under assignments (on amount collected and disbursed)	5 per ct.
On granting letters of credit	1 per ct.
On procuring money on mortgage	1 to 2½ per ct.
RE-EXCHANGE.	
On bills on any of the Australian colonies	5 per ct.
On English and foreign bills	10 per ct.
CHARGES.	
On local bills renewed	2½ per ct.
Receiving general merchandise and produce (excepting wool) per ton	0 1 6
Delivering ditto	0 1 6
Receiving, weighing, marking, and delivering wool, per bale	0 2 0
Storage on goods and liquids, by weight or measurement, per ton per week	0 1 4
Storage on wool, per week per bale	0 0 4
Yard storage, per ton per week	0 0 0
On guaranteeing sales, bills, or bonds, by endorsement or otherwise	1 to 2½ per ct.
On purchase of merchandise, ships, or Colonial produce—	
If in funds	2½ per ct.
If not in funds	5 per ct.
When goods are sold by auction, auctioneer's commission may be charged in addition to the above.	
SHIPPING AGENCY.	
On procuring money on bottomry, or on procuring freight or charter for vessels	5 per ct.
On collecting freight and passage money	5 per ct.
On ships' disbursements and outfits (including amounts paid to captains when in port)—If not in funds	5 per ct.
On entering vessels from England or elsewhere (the Australian Colonies only excepted)	3 3 0
On clearing ditto	3 3 0
On entering vessels from the Australian Colonies ...	1 1 0
On clearing ditto	1 1 0
On entering or clearing coasting vessels, under 100 tons	0 10 6
Ditto, ditto, above 100 tons	1 1 0
Fee for survey of hatches or stowage (each survey) ...	1 1 0
Fee for survey of damaged goods (each survey), according to circumstances	£1 1s. to £5 5s.
On settling insurance losses, total or partial, and on procuring return of premium (on amount recovered)	2½ per ct.
COMMISSION AND GENERAL AGENCY.	
On management of estates as agent or attorney (on amounts received and disbursed)	5 per ct.
On leasing or letting land or houses—on one year's rent	5 per ct.

TOWNS IN NEW ZEALAND.

ABBOTSFORD (46° S lat, 170° E. long.) (Otago prov. dist., Taieri co., Kaikorai riding), 5 miles from Dunedin, on Abbott's Creek. A township, with post-office, telegraph and railway station. Has two hotels, public and private schools, and Anglican, Presbyterian, Christadelphian, Plymouth Brethren, and Primitive Methodist places of worship. Protestant Alliance Lodge. Lighted with kerosene. Ham and bacon, biscuit factories, several tanneries and fellmongeries, freezing and meat-preserving works, chemical and pottery works, one flour and meal mill. Mining, agricultural and pastoral district. Coal is found. Pika Warra or Saddle Hill giving fine view of the fields. Population about 600; district, 3,000.

ADDINGTON (prov. Canterbury, Selwyn co. and riding of Riccarton), a post township, with telegraph and railway station, about one mile SW. of Christchurch. Has two hotels, two schools, Methodist, Roman Catholic, and Anglican churches. Town lighted with gas. Water supply artesian. Has railway workshops, two flour-mills, butter factory, soap and candle works, seed cleaning works, agricultural show grounds, sheep and cattle saleyards, Oddfellows' and Druids' lodges, with a population (census 1896) of 480. of riding 6,485.

ADDISON'S FLAT (41° 35′ S. lat., 172° 16′ E. long.), (Nelson prov. dist.), county Buller, Waratea South riding, a post town with telephone office; is an alluvial mining township, between Westport and Charleston, 8 miles from Westport. Extensive gold mining goes on in the district. Hotels: Shamrock and Royal. One Catholic church. Public school. Population, 277; of riding 800.

AHAURA (42° 24′ S. lat., 171° 43′ E. long.), a post town, with money-order, savings bank, telegraph office and railway station (Grey county, riding of Waipuna, Nelson prov. dist.). 21 miles NE. from Greymouth, on the river of the same name. Has six hotels, Presbyterian, Roman Catholic and Episcopal places of worship; public school, public library. Government buildings comprise resident magistrate's court, warden's court, and police-station. Climate temperate. Fine well-watered timber country. Mining and agricultural pursuits. Population, about 250, of district 500.

AHIPARA (35° 25′ S. lat., 173° 4′ E. long.), (Auckland prov., Mongonui co., Kaitaia riding). A post town 224 miles from Auckland, on Ahipara Bay. Has a Native church, school, court-house, boarding house, and kauri gum industry. Population, 82: natives, 200.

AKAROA (43° 50′ S. lat., 172° 58′ E. long.) is a post town with savings bank, telegraph, and money-order office, situated in Banks' Peninsula (county Akaroa and electorate of Ellesmere, police district of Christchurch, prov. dist. of Canterbury), on the eastern shores of one of the finest harbours of New Zealand. It is 54 (postal) miles from Christchurch, and there is steamer communication *viâ* Lyttelton three times a week. Coaches run alternate days to Little River Railway Station and Pigeon Bay. A steamer plies from Pigeon Bay to Lyttelton. A launch runs regularly to various parts of the bay carrying goods and passengers. The principal hotels are Bruce's, the Criterion, Roderigue's, and Bayley's. The entrance to the harbour is about a mile in width, the anchorage beingabout 6 miles from the heads in Pakariki Bay, where there is a depth of four fathoms at low water. A second order flashing light is exhibited here. Akaroa was founded on August 10, 1840, by Governor Hobson, who sent the brig of war, the *Britomart* (Capt. Stanley), and took possession only a few hours before the arrival of a French corvette, *L'Aube*, convoying the vessel Comte de Paris with 57 settlers, and thus secured it to the British Empire. The town is a pleasant summer retreat for the inhabitants of Christchurch. Cocksfoot grass grows luxuriantly and large quantities of the seed are exported. There are Episcopal, Congregational, Presbyterian, and Roman Catholic churches, and Salvation Army here, Good Templars' Halls, Masonic Hall, a literary institute with a good library, a court-house, a cottage hospital, beautifully situated beside a mountain stream, a high school, a public school, private schools, an Oddfellows' hall, about 12 principal stores, and aerated water factory. Bank: Bank of New Zealand. Societies: Regatta Club, Boating Club, Farmers' Club, Football, Cricket, and Rifle Clubs, and Musical Society. The municipal borough has an area of 221 acres. Formation, volcanic. Population (census of 1896), Borough, 613; of county, 3,886. Newspaper: *Akaroa Mail*.

ALBURY (Mackenzie co. and riding of Albury, Canterbury prov.), a post town, with money-order office, savings bank, telegraph office and railway station. 29 miles from Timaru. Has hotel and school (in which religious service is held). District is agricultural and pastoral. Has coal mine. Population of township, 130; of district, 300.

ALEXANDRA (45° 6′ S. lat., 169° 20′ E. long.), a municipal town, co. of Vincent, electorate of Tuapeka (prov. district of Otago), 122 (postal) miles NW. from Dunedin, at the junction of the Manuherikia and Molyneux rivers. It has post, money-order, and savings bank office, and telegraph station. It is the centre of the gold-dredging industry in New Zealand and considerable work is being done by numerous dredges. Rail and coach communication, *viâ* Lawrence and Wedderburn. Coaches run to Lawrence and Queenstown three times a week. Naseby three times a week, and Roxburgh six times a week. Hotels: Bendigo, Caledonian, Criterion and Temperance. Banks: Bank of New Zealand and Bank of New South Wales. There is a library, Masonic, and A.O.F. lodges, a town hall, places of worship belonging to the Presbyterians, Anglicans, and Roman Catholics; court-house and police-station. Public school. Numerous stores and tradesmen. Lighted with kerosene; good water supply. Municipal area 840 acres, value of ratable property, £2,055; general rate, 1s. A suspension bridge spans the Clutha. Twenty-three steam and two current-wheel dredges work the Molyneux and Manuherika rivers in the vicinity of this town, and between it and Clyde, dredging the bed of the river for gold; some of the dredges are lighted by acetylene gas, and others by electricity. Foundry and brick-making industries. Four coal pits are here. In the vicinity are several stations. Population (census 1896), 454, now about 900. Newspaper: *Alexandra Herald*, weekly.

ALFORD FOREST (co. Ashburton, provincial district Canterbury), a post town, with postal note office, 86 miles from Christchurch, *viâ* Methven, on the Ashburton River; nearest railway station is Springburn (4 miles distant) to which a coach runs, thence rail (86 miles) to Christchurch, thence steamer, 60 miles NW. from Wellington. Has one hotel, saw-mills, one Government school, in which all denominations hold service. District is agricultural and pastoral. Formation: Tertiary, lime, lignite and fire-clay, with good sand for glass-making. Population about (census 1896) 426.

ALLANTON (prov. Otago, co. Taieri and riding of Otakia), a post town on the Taieri river, with money-order, telegraph office, savings bank, and railway station, on the Dunedin-Invercargill line, 14 miles SW. from Dunedin. Fares 2s. and 1s. 4d., return 4s. and 2s. 8d. Hotel: Crescent. Has public school, Athenæum, Roman Catholic, Presbyterian and Anglican churches. National Bank, open Thursdays. Creamery. District is agricultural. Population (census 1896), of town district, 274; riding, 1,622. Momoma settlement, 2 miles SW. of Allanton, has public school.

AMBERLEY (43° 2′ S. lat., 172° 45′ E. long.), a post town, with money-order office, savings bank, telegraph and railway station on the Christchurch and Amberley line, 34 postal miles from Christchurch, on river Kowai. It is in the county of Ashley, and riding of Kowai, and is situated on the North Kowai River. Hotels: Crown and The Railway. Bank of New South Wales. Four stores, one public school, courthouse, Anglican, Presbyterian, Wesleyan, and Catholic churches. Social Institutions: Public library, Masonic, Oddfellows', and Druids' lodges, Steeplechase, Hunt and Cricket Clubs. Mount Grey and Lake Alice in district. Agricultural district. Railway completed to Culverden. Town lighted with kerosene. Population of town district, 440; of county, 11,913.

ANDERSON'S BAY, Peninsula county, and Road Board, 3 miles south-east from Dunedin, with post office and telephone station. Conveyance by omnibus regularly. Has public school, public library, Presbyterian and Anglican churches. Agricultural and pastoral district. Population of town (census 1896), 489.

AOTEA (38° S. lat., 174° 51′ E. long.) (provincial district Auckland, Raglan county, and riding of Karioi) is a post town and a small bar harbour on the western coast of Auckland having 11 feet of water on the bar at low water, the post office being distant 123 miles from Auckland, to which there is a weekly mail. It gives its name also to the surrounding district, nearly the whole of which is included in what is known as the "King Country." The district is of a broken character, but the land is generally of first-rate quality. Mountain scenery, beautiful beach and caves. It has one State school and Congregational church. It produces annually a large number of cattle and pigs. Wheat and maize are also cultivated. Chiefly inhabited by Maoris. European population (census 1896) of riding 505, of county 1,545; a considerable number are settlers under the "Homestead Act."

ARAMOHO (Eastown), prov. dist. Wellington, 2¼ miles from Wanganui, on the Wanganui. A post town with telephone and railway station. Has hotel, school, Anglican, Presbyterian and Wesleyan churches. Industries: meat-freezing, brush-making, cider and sauce works, fellmongeries, nursery, and Government workshops. Population of town and district, 1,000.

ARATAPU (36° 5′ S. lat., 174° 2′ E. long.), a post town, with telephone, savings bank, and money-order office (Auckland prov., Hobson county and riding of Aratapu), 96 miles N. from the city of Auckland, situated on the banks of the Wairoa. County Council meet here. There are here branch of National Bank of New Zealand, open Thursdays only, an Episcopal church, several stores, public hall, Wesleyan church, public school, Kauri Timber Company's mills, Rechabite and Orange societies and public library, in which the Salvation Army hold services. Hotel: Aratapu. In the vicinity there is plenty of kauri gum, potter's clay and limestone. A steamer runs twice weekly to Helensville, whence the train can be taken for Auckland. Mail twice weekly. Population (census 1896) of village, 508; of riding, 1,399. Newspaper: *Wairoa Bell*.

ARROWTOWN (44° 51′ S. lat., 168° 51′ E. long.), a post town, in the provincial district of Otago, county of Lake and riding of Arrow, with money-order office, savings bank, and telegraph station, 123 miles from Invercargill, and 12 miles from Queenstown, with a Town Council, consisting of a Mayor and six Councillors, and the centre of extensive diggings known as the Arrow river, Shotover, and Cardrona. Extensive quartz mining at Macetown, and dredges on the Kawarau and Shotover Rivers. Hydraulic sluicing on the Arrow. Communication with Dunedin by tri-weekly coach to Lawrence, thence rail; and by coach, four times weekly to Queenstown, thence steamer over Lake Wakatipu, to Kingston, rail thence: by this route Invercargill, or any Southland town, may

also be reached. Wellington is reached by steamer for either Dunedin or Invercargill. A good road over the Crown Range gives communication with Cardrona, Pembroke, &c., in the Wanaka district. Coaches run daily to Queenstown, thrice weekly to Cromwell (for Lawrence), to Cardrona and Pembroke twice weekly, in summer with mails, (but special coaches run almost daily); in winter once weekly. The hotels are the New Orleans, Royal Oak (coach office), Ballarat, and Temperance. There is an agency of the Bank of New Zealand, Warden's Court, and an Athenæum with public library, Masonic lodge. Places of worship: Presbyterian, Episcopal, Wesleyan, and Catholic, and there are a public school and Roman Catholic school, Orchestral Society, brass band, and district hospital. There are several stores, and one flour-mill. The town is furnished with a good water supply. Gold was first discovered in the Shotover river in 1862 by a miner named William Fox. The municipal area is 390 acres. Mining, agricultural, and pastoral district. Formation: Micaceous schist. Population, of borough 402, of county 2,676. Local paper: *Lake County Press* (weekly).

ASHBURTON (43° 56′ S. lat., 171° 45′ E. long.) a municipal borough, and post town in the provincial district of Canterbury and county of Ashburton, with savings bank, money-order office, telephone exchange, telegraph and railway station on the Christchurch and Timaru Railway and north bank of the Ashburton river, 53 miles from Christchurch. Wellington is reached by rail to Lyttelton, thence steamer. There are seven hotels. Banks: Union, Australasia, New Zealand, and New South Wales. There are three State schools, a district high school, several private schools, a convent school, and Anglican, Presbyterian, Wesleyan, Roman Catholic, Baptist, and Primitive Methodist places of worship, Salvation Army barracks, court-house, Oddfellows' (M.U.), Orange, Foresters', and Masonic lodges, county hospital, benevolent asylum, police barracks, brewery, and agricultural implement manufactories, flour-mills, freezing works, and several large iron grain stores and woollen mills. Coaches run to Ashton, Waterton, Methven and Longbeach. The town is lit with gas, and has well-equipped fire brigade. Among the local institutions are an Agricultural and Pastoral Association, Building Society, Racing and other Clubs, a Caledonian Society, and two infantry volunteer Rifle companies and one mounted corps. Being a portion of the Canterbury plains, it is a fine agricultural and pastoral district. The chief feature of the town is the beautiful domain of some 80 acres, which contains cycle track, some fine stretches of water, affording in winter fine skating. Wells supply the water, but for fire purposes and flushing the street channels water is led from the river. Formation: light soil, clay sub-soil, and shingle bottom. Population of borough (census 1896), 2,082; of county, 10,820. Newspapers: *Ashburton Guardian*, daily, *Ashburton Mail*, thrice weekly, and *Ashburton Standard*, thrice weekly.

ASHURST (Wellington prov., Oroua co., Ashurst riding), 97 postal miles from Wellington. A railway township, with post, telephone bureau, and money-order offices and savings bank. Daily mail. Has two hotels, Bank of New Zealand (Tuesday and Friday), Masonic and Oddfellows' lodges, Anglican (built by Miss Ashurst in memory of her father), Wesleyan, Plymouth Brethren and Roman Catholic churches, Salvation Army, public library, town hall, and school. Good racecourse. Agricultural and dairying district. Manawatu Gorge in district. Population (census 1896) of town, 361; of riding, 2,134; of county, 6,450.

ATHOL (Otago province, Southland co., and riding of Oreti), 69 postal miles N. from Invercargill. It is a post town on the Mataura river, with telegraph and railway station on the Invercargill to Kingston line. Has one public school, in which Anglican and Presbyterian services are held. Farming. Mining district. Population about 100.

AUCKLAND (36° 50′ S. lat., 174° 50′ 40″ E. long.) (provincial district of Auckland and county of Eden), with post office, savings bank, money-order and telegraph offices, named by Capt. Hobson after Lord Auckland, is the largest city in the colony of New Zealand, and was for some time the seat of Government. It is located on the southern shores of Waitemata Harbour) 125 feet above sea level is situated the meteorological station), one of the finest harbours in New Zealand, an inlet of Thames Gulf. There is sufficient depth of water in the port for the largest steamers afloat. At dead low-water any vessel can enter and safely anchor in position, or steam right up the harbour to any of the wharves, and a considerable distance beyond. Its least depth is 36 feet at dead low water springs, while 10 to 16 feet may be added for rise and fall of tide. The working ship channel, with an average depth of 36 feet, ranges from a maximum width in parts of 2 miles, to a minimum of not less than a mile in the section of the harbour comprised between the North Head and Kauri Point. The harbour has two good entrances for large vessels, Rangitoto and High Channels, the former most frequently used, being more roomy, about 2 miles wide. The entrances to the harbour are lit by a lighthouse on the Bean Rock, and both channels for defence purposes are well commanded by the North Head and Point Resolution batteries. The North Island at this point is only 6 miles wide.

Auckland is distant from Sydney 1,315 miles E., and about 1,650 miles NE. from Melbourne; with both places there is regular steam communication. A railway connects Auckland with Onehunga on the Manukau Harbour. The railway constructed to Te Kuiti, with extensions to Cambridge, Te Aroha, Paeroa, Thames, Lichfield, and Rotorua, in the Lake District, brings the country for many miles south and south-east of Auckland into direct communication with the capital. There is a line to Makarau *viâ* Henderson, Kumeu, Helensville, and Kaukapakap. Also a line from Dargaville on the Kiapara harbour running to Opanake, going towards Hokianga harbour; also one from Whangarei to Waiotu, which is intended to connect with the Kawakawa section, thus connecting the Whangarei and Bay of Islands harbours. There are vast deposits of coal along this line of railway. The Main Trunk Line to connect Auckland with Wellington is in course of construction. The city is most picturesquely situated, and its position for commercial purposes is most convenient, as, in addition to the harbour of Waitemata, there is a western harbour, Manukau, the two being only 6 miles apart. It has been proposed to connect these two by a canal, as there are no very serious engineering difficulties. Auckland has been called "The Corinth of the South Pacific." There are numerous wharves and jetties (the largest, the Queen Street wharf, being 1,696 feet long), with facilities for the loading and discharge of about 40 vessels from 100 to 5,000 tons burden. At lowest spring tides there is a depth of from 25 to 28 feet. The railway wharf is 1,050 feet long; it is connected with the railway terminus, and trucks can go alongside any vessels lying there. The depth of water is now about 26 feet. There is also the Hobson Street wharf and the Quay Street jetty, the latter extended 100 feet with depth of water to enable largest vessels to berth. A railway station has been built on ground reclaimed from the harbour.

Principal thoroughfares are Queen, Albert, Hobson, Princes, Wyndham, Victoria, Wellesley, Wakefield, and Grey Streets, Shortland Crescent, and Karangahape, Ponsonby, Jervois, Grafton, and Kyber Pass Roads. Queen Street extends from the Wharf to the Karangahape Road, about three-quarters of a mile. It is the leading street in the city, and contains most of the principal buildings.

Leading buildings in Auckland are the Government offices post-office, custom house, and the supreme court, Bank of New Zealand, Union Bank, the Auckland Savings Bank, Bank of New South Wales, Bank of Australasia, Colonial, and the Union, and National Banks, New Zealand and South British Insurance Companies' offices, the offices of the Australian Mutual Provident and the Mutual Life Associations, the *New Zealand Herald's* new buildings, Free Public Library and Art gallery and Municipal offices, the Northern Club, and the Government House, standing in the midst of grounds planted with English oak and other trees, the Museum, and the new Masonic hall in Princes Street. There are numerous places of worship; among them St. Paul's Church, (whose foundation stone was laid by Captain Hobson in 1841), has been pulled down and rebuilt, abutting on Symonds Street; St. Matthew (Episcopal), St. James, (Presbyterian), St. Andrew's (Presbyterian), St. David's (Presbyterian), Wesleyan in Pitt Street, with a fine organ, St. John's (Wesleyan), in Ponsonby Road, the Congregational Church, the Baptist Tabernacle, of which the Rev. Thos. Spurgeon was once Pastor, and St. Patricks' Cathedral (R.C.), St. Benedict (R.C.), and the Church of the Sacred Heart (R.C.). Anglican churches, St. Sepulchre's and the Epiphany. The majority of the stores and shops are of a substantial character. Several of the more prominent local and British insurance offices are represented.

Principal public buildings are, Victoria Arcade, Strand Arcade, Exchange, Choral Hall, the Academy of Music, Abbott's Opera House, the City Hall, Foresters' Hall, the Temperance Hall and the Auckland Institute (with good library and museum). The hospital has 23 wards and 154 beds; other charitable institutions are the lunatic asylum, lying-in hospital, St. Stephen's Orphanage, St. Mary's Orphanage (R.C.), Costley's Home for the Aged Poor, the Costley Training Institute, Jubilee Institution for the Blind, and industrial school. The bronze statue of Her Majesty Queen Victoria, in Albert Park, is the only statue to the Queen in New Zealand. Other buildings are the Auckland University College (affiliated to the New Zealand University), and Grammar School, the Church of England Grammar School, Prince Alfred College, and St. John's College. There are many public schools in city and suburbs, also about sixty hotels. The free public library has over 16,000 volumes, and is under the management of the corporation, together with the magnificent library of Sir G. Grey, K.C.B., with the large collection of valuable manuscripts presented by the generous donor. It is known as the Auckland Free Library and Art Gallery, and cost upwards of £22,000, the funds being derived principally from moneys left by the late Mr. Costley. Another Art Gallery, the munificent bequest of Mr. J. T. Mackelvie, contains the paintings formerly belonging to him. The museum is well supplied with specimens of natural history. There are Masonic, Oddfellows', Foresters', and Druids' lodges.

The suburbs of Auckland are Devonport, Northcote, and Birkenhead on the northern banks of the harbour, and connected with the city by steam ferries, East and West Newton, Parnell, Epsom, Ponsonby, Grey Lynn, Remuera, Eden Terrace, Mount Eden, Mount Albert, Newmarket, and Mount Roskill. There is a well laid-out recreation ground in the Domain which extends over nearly 200 acres. Other reserves are the City Park and the Albert Park on Barrack Hill. The city cemeteries are in Symonds Street, now practically closed. The new extramural cemeteries are at Waikumete, about 8 miles distant, on the Kaipara railway line, and Purewa, in the Remuera district. The racecourse belonging to the Auckland Racing Club is at Ellerslie, where a very fine grand stand has been erected. A spacious building does duty for the City Market. Public baths (considered by some to be the finest in the colonies), are provided by the corporation on the western side of the

breakwater, and also in a bath-house in Elliott Street, where fresh and salt water baths may be obtained. Area of the municipal borough is 1,772 acres. The city is in telegraphic communication with all the centres of both islands by means of three submarine cables laid in Cook's Strait, and it is the port of call for the Californian Mail Steamers. It is connected with the other ports of the Colony by the steamers of the Union Company and Huddart, Parker and Company's line, and there is also regular steam communication with Australia, Fiji, Tonga, Samoa, Raratonga, Tahiti, and other islands in the Pacific. For the convenience of shipping there is a graving dock on the western side of Queen Street Wharf, having a length of 300 feet, and width on the floor of 42 feet. At high-tide there is a depth of from 13 to 15 feet of water. A new dock of much larger dimensions at Calliope Point, on the northern side of the harbour, cost over £120,000. It is 500 feet long, 40 feet wide on the floor, with a width of 100 feet at the level of the cope, and has a depth of 33 feet of water on the sill. The entrance is closed by a caisson 83 feet long and 15 feet broad. It has a temporary head, so that in the future it can be lengthened if required. It was opened on February 16, 1888. Among the industrial establishments of the city are boiler works, saw-mills, the Kauri Timber Company, Waitemata Sawmill Company, and Leyland, O'Brien and Company's Sawmill, butter-box factory, shipbuilding yards, and an extensive sugar refinery. At Freeman's Bay are glass works. Most of the streets are either flagged or asphalted, and are lighted with incandescent gas lights. There is a good water supply to the city (average consumption 4,000,000 gallons daily) derived from the Western Springs, and conserved in the Ponsonby and Kyber Pass reservoirs, with large reservoir constructed on Mount Eden to supply the higher portions of the city and suburbs. A further supply of water is now being obtained from the Waitakerei ranges, the daily supply amounting to some 4,000,000 gallons. The control of municipal affairs is in the hands of a Council, consisting of a mayor and 18 councillors elected by the ratepayers. There are six wards, North, South, East, Ponsonby, Karangahape, and Grafton, each ward returning three councillors. The fire brigade central station is in Albert Street, where there is a lofty look-out tower with bell; branch stations are at Ponsonby, Grafton, and Newton. "Few cities can boast of scenery so picturesque as that surrounding Auckland. It lies on a narrow isthmus, separating the seas that wash the E. and W. shores of the island; the landscape dotted over with volcanic cones (Hochstette counted sixty-three points of eruption within 10 miles radius of the city). The best view is, perhaps, to be obtained from the lip of the crater of Mount Eden, an extinct volcano overhanging the city, at a distance of about a mile." Auckland has superior advantages for being the seat of manufacturing industry. A large woollen manufactory has been in operation at Onehunga several years, and a superior quality of material is made. A paper manufactory has recently been established at Riverhead, the head of the harbour. Tramways are in operation to Ponsonby and Newton on the west, Newmarket and Kyber Pass on the east, and Epsom on the south. General exports from provincial district, during 1899, amounted to £2,280,764. At the census of April 12, 1896, the population of the borough of Auckland was 31,424—males 15,206, females, 16,218; suburbs, 26,192; of the county, 15,940—7,817 males, 8,123 females. Estimated, 1900 borough, 38,340. Newspapers: *New Zealand Herald*, and the *Evening Star*. The weeklies are the *Auckland Weekly News*, *Observer*, and the *New Zealand Graphic*. Published monthly are the *Farmer*, the *Church Gazette*, and a few others.

AVENAL, a municipality (smallest in New Zealand) in the county of Southland, and a suburb of Invercargill. There are 70 dwellings. Ratable value of property for 1900-1901, £1,912, rate 1s. Population, 300.

AVONDALE (Auckland prov. dist., co. Eden), a post town and railway station on the Auckland to Kaukapakapa line, 7 miles from Auckland, with money-order office, savings bank, telephone offices and railway station. 300 miles from Wellington. Has hotel, public hall, asylum, public school, Band of Hope, Anglican, Presbyterian, Primitive Methodist, Church of Christ, and Friends' places of worship. Several stores. Varnish, leather, pottery, and brick-making industries. Population about 2,000.

AYLESBURY, post town and railway station, in the prov. dist. Canterbury, county of Selwyn and riding of Courtenay, 22 miles from Christchurch, on the Malvern line. Has a Government school. District is agricultural and pastoral. Population (census 1896), riding, 2,491.

BALCAIRN (43° 3′ S. lat., 172° 45′ E. long.), a post town with railway station, in the Christchurch prov., county of Ashley and riding of Kowai, 30 postal miles north of Christchurch on the Amberley line on Kowai river. It has a boarding-house, a Government school and Anglican church. Coach runs to Leithfield. The district lies between Mount Grey Downs and the sea, and is intersected by the Northern Railway. Kowai Road Board office here. The Brackenfield kennels are about 3 miles distant. The Kowai cemetery is about a mile from the township, and is well kept. Much land is under cultivation. The scenery is diverse, of an extensive range, comprehending Mount Grey and other peaks to the north and west, on the south a broad stretch of plain and Banks Peninsula, while to the east the view takes in the ocean, including the whole length of the Forty Mile Beach. Population of riding, 2,404.

BALCLUTHA (46° 12′ S. lat., 169° 41′ E. long.), a money-order, savings bank, telegraph, telephone, and post town (co. and electorate of Clutha, prov. Otago), 52 miles SW. of Dunedin, 86 NE. of Invercargill, with which city there is railway communication There are four Temperance hotels and a Coffee Palace, the other hotels having been closed under a prohibitive vote. The town lies in a horseshoe bend of the Clutha river, crossed by two good bridges, and is the centre of the river traffic, the river being navigable for many miles inland. The bridges are fine cylinder girder structures, of great strength. The junction of the line to the Catlins river district is here. There are Anglican, Wesleyan, Presbyterian, Roman Catholic, and Salvation Army places of worship, and there is also a good public hall, and a masonic hall; there are several large stores, branches of the National, and New Zealand Banks, court-house, public library, county offices, Borough Council chamber, free public library, corps Mounted Rifles, district high school, and private schools. The Municipal Council comprises a mayor and nine councillors. Town is lighted with gas. The headquarters of the Clutha County Council are here. Societies: Horticultural, Agricultural, Technical Classes Association; bowling, chess, draughts, cycling, football, cricket, and lawn-tennis clubs. Masonic Lodge and Lodge of the M.U.I.O.O.F. The surrounding country is fertile, and mostly taken up by Scotch farmers. Large stock sales held every fortnight. The alluvial flats in the vicinity bear large crops. The famous Kaitangata coal mines are only a few miles distant, and good lignite, or, as it is popularly called, "Brown coal," is found in the neighbourhood. Population of borough (census 1896), was 925, of county 6,564. Newspapers: *Clutha Leader* and *Free Press*.

BALFOUR (Southland co., Oreti riding), a railway station 67 postal miles from Invercargill, with a post and money-order office, savings bank and telephone station. Has two stores, hotel, five tradesmen's shops and three schools, Agricultural district. Population (census 1896), riding, 1,569.

BANNOCKBURN (45° 0′ S. lat., 169° 0′ E. long.), a post town with telephone office. A mining locality, 4 miles S. of Cromwell, 140 postal miles NW. from Dunedin (Otago prov. dist., Vincent county, and Carrick riding), at the foot of the Carrick Range, takes its name from a creek flowing into the Kawarau, a tributary of the Clutha. Hotels—Bannockburn and Carrick. State school, Athenæum Hall, I.O.G.T. lodge, a public library, and store. The Presbyterians and Bible Christians hold regular, and the Episcopalians occasional services. Bannockburn is reached from Dunedin by mail coach *viâ* Queenstown or Lawrence. Alluvial workings have extended and are conducted on a comprehensive scale. The claims are worked by hydraulic sluicing, and four dredgers have been at work on the Kawarau river with excellent results. Formation: Older gold drifts and lacustrine quartz gravels on a pipeclay bottom, under which are seams of very good lignite. The Kawarau, Bannockburn, Cairnmuir and Excelsior are the principal coal pits. Population (census 1896), 410, chiefly miners and their families.

BAY OF ISLANDS. *See* RUSSELL.

BEALEY (prov. dist. Canterbury, co. Selwyn), a post town, with savings bank, money-order, telephone, and telegraph offices, 84 (postal) miles from Christchurch, 69 from Greymouth, and 71 from Hokitika, reached by coach on Wednesday and Saturday to Springfield, thence rail. Has one hotel. Pastoral district. Population about 30.

BEAUMONT, or DUNKELD (provincial district Otago, Tuapeka co., Beaumont riding), town on river Clutha, with post and telephone office, 72 miles W. from Dunedin, and 12 miles N. from Lawrence. Conveyance by rail and coach *viâ* Lawrence. Hotel: Beaumont. Presbyterian church, Government school, in which Salvation Army service is held, and jockey club. District is mining and agricultural. Population (census 1896), of Dunkeld town, 110; and of riding, 353.

BELFAST (prov. Canterbury, co. Selwyn), a post town, with savings bank, money-order, and telephone offices. It is a station on the Christchurch to Culverden line, 9 postal miles from Christchurch. Has one hotel, freezing, soap and chemical works, butter factory, public library, school and Presbyterian, Anglican, and Wesleyan churches, Oddfellows' and Foresters' lodges. Population of town (census 1896), 600; district about 1,500.

BELGROVE (41° 30′ S. lat., 173° 0′ E. long.) (co. Waimea, provincial district of Nelson, county of Waimea, and riding of Waiiti), a post town with telephone, telegraph, money-order, savings bank, and railway station, on the Nelson and Belgrove railway, and Waiiti river, 22 miles from Nelson. Fares, 2s. 11d. and 1s. 11d. Hotel: Belgrove. State school and two churches. Industries: Saw-milling and hop-growing. Population (census 1896) of town, 332; of riding 2,944.

BENDIGO (44° 50′ S lat., 169° 16′ E. long.), a mining locality in the co. of Vincent, and riding of Lindis (Otago prov.), on Bendigo Creek, about 14 miles NE. of Cromwell (from which mail cart on Tuesdays and Saturdays, thence to Queenstown or Lawrence by coach, thence rail to Dunedin), and 154 (postal) miles NW. from Dunedin, has post-office, one hotel, and a public school. Presbyterian and Bible Christian services are held alternately in the school-house. A little mining. Population (census 1896), 56; now about 30.

BERWICK (Otago prov., Taieri co., and riding of Maungatua), 28 (postal) miles from Dunedin. A post town, with telephone station. Mail coach runs to Henly railway stations; Monday, Wednesday and Friday. There is a public school, public hall, and Presbyterian church. District is agricultural, mining, and pastoral. Dairying and saw-milling industries. Population (census 1896), 77. Formation: alluvial deposit.

BIRKENHEAD (borough of) (prov. dist. Auckland, co. Eden). Is on the Waitemata Harbour. It is a post town 3 miles from Auckland, with telegraph station, and has two district schools, Anglican, Wesleyan and Methodist churches, and sugar-refining industry. Area of borough, 2,803 acres, 185

ratepayers, rate 1s. 3d.; annual value of ratable property, £6,000. District is agricultural and fruit-growing. Formation: Sand-stone and clay. Population (census 1896), 690; 1899, 800.

BLACK POINTS (42° 11′ S. lat., 171° 52′ W. long.) prov. Nelson (Inangahua co., and Murray and Crushington ridings), a post town with telephone bureau on Inangahua river, 49 postal miles from Greymouth. Nelson is reached by cab to Reefton, coach to Belgrove, thence rail. Has hotel, Wesleyan church, and public school, in which Anglican services are held. Gold and coal mining district. Population (census 1896), 283.

BLACKSTONE HILL, or HILL'S CREEK (prov. dist. Otago, Maniototo co., and riding of Ida Burn), a post town with telephone office, 110 postal miles NW. from Dunedin, on the road between Naseby and St. Bathan's, near Ida Burn Valley. Conveyance per rail to Wedderburn, thence coach daily. Hotels: Prince Alfred and Blackstone Hill. School and musical club. Mount Ida in the vicinity. Farming, mining, and rabbiting. Population, township, 30; and of riding, 272.

BLENHEIM (41° 30′ S. lat., 174°0′ E. long.) is the principal town in the provincial district of Marlborough. It has a money-order, savings bank, and telegraph office. It is prettily situated to the NE. of the province near the coast, county of Marlborough, electorate of Wairau, police district of Wellington, on the Opawa and Omaka rivers, 18 miles S. of Picton, the chief port of the province, with which it is connected by railway; Single fares, 2s. 4d. and 1s. 7d. The Main Trunk Railway is being extended south, and a railway and traffic bridge over the Awatere river is being erected at a cost of £25,000. The railway is to reach the Starboro estate, recently cut up for settlement, 16 miles from Blenheim Communication with Wellington by steamer, four times a week (4 hours), service to Picton, and by river steamers (8 hours). The hotels are the Criterion, Club, Masonic, Commercial, Royal, Marlborough, Empire, and Grosvenor. There are here branches of the New Zealand, N. S. Wales, and National Banks; agencies of the leading insurance offices, a hospital, about 1½ miles from the town, and a literary institute, with a good library, police and fire brigade stations; places of worship belonging to the Episcopalians, Catholics, Presbyterians, Plymouth Brethren, and Wesleyans, and a large Salvation Army barracks. Public school, and Catholic boys' and Convent girls' schools. Ewart's hall and Good Templars' hall, and Volunteer drill shed. The municipal borough has an area 1,571 acres, 719 dwellings, and ratable property of the annual value of £23,873. Artesian wells furnish the water supply. The town is lit with gas. Coaches run to Kaikoura weekly: Nelson tri-weekly. Renwick Town daily; Havelock daily; Wairau Valley bi-weekly, and Upper and Lower Awatere weekly. The Mahakipawa gold-field is about 20 miles distant and there are large gold reefs at Top Valley, Wairau Valley, and at Waikakaho. Alluvial mining is carried on to a considerable extent. Population of borough, census 1896, was 3,318. Exports: Marlborough district, 1899, £149,549. Local papers: *Marlborough Daily Times*, *Marlborough Express*, daily.

BLUESKIN. *See* WAITATI.

BLUESPUR (45° 50′ S. lat., 170° 20′ E. long.) (Otago prov., Tuapeka co.), mining township with post office and telephone station, 63 miles W. from Dunedin. Alluvial cement-mining. Has hotel and public school, Wesleyan and Presbyterian services, M.U.S.O.O.F. lodge. Formation: quartz, schist, and sandstone. Population of township, 100; of riding, 353.

BLUFF. *See* CAMPBELLTOWN.

BOMBAY (Manukau co., and riding of Maungatawhiri, prov. dist. Auckland), a post town with money-order office, savings bank, and telephone office, 35 postal miles from Auckland, which is reached by coach to Drury, thence train, thence steamer; 400 miles S. of Wellington by sea. Has public school, Anglican, Presbyterian and Wesleyan churches, literary institute, and creamery. District was named after ship *Bombay*, which brought out settlers 30 years ago. Agricultural and pastoral district. There is a small coal mine in the district. Population about 600.

BRIGHTON (46° S. lat., 170 E. long.) (prov. dist. Otago, Taieri co., Otokia riding), 12 miles SW. from Dunedin. A post town (mails, Monday, Wednesday, and Friday), on Boat Harbour Creek, with telephone station. One hotel, public school, Presbyterian and Plymouth Brethren churches. Lighted with kerosene. Coal mines and lime kilns in district. Coaches run to Taieri Beach twice weekly. Industries: Creamery, flaxmill, rope-works, and various stores. Population about 220.

BRIGHTWATER (Waimea co., Waiiti riding), a railway station on the Nelson-Belgrove line, 13 postal miles from Nelson, with post-office, money-order office, savings bank, and a telephone station. Has one hotel, flax and flour mills, planing and sawing mills, timber yard, Oddfellows' and Rechabite lodges, two schools and Anglican church. Wairoa Gorge in district. Trout fishing and deer stalking District is agricultural and pastoral. Population (census 1896), town, 409; of riding, 2,944.

BRUNNER (42° 22′ S. lat., 171° 34′ E. long.), co. Grey, prov. dist. Westland, a borough and railway station on the Greymouth and Brunner line, 7 postal miles from Greymouth, fares 1s. 1d. and 9d., on Grey river. The New Zealand Midland line connects with the Government line here. It has post, money-order, savings bank, and telegraph office. There are four churches, St. Saviour's (Episcopal), St. Joseph (R.C.), Presbyterian, and Wesleyan, three public schools at Taylorville, Dobson and Stillwater, twelve hotels. Masonic, Druids' and Good Templar lodges, literary institute, and two public halls suitable for theatrical purposes. The following mines are at work: Brunner and Coolgardie; in the former 65 miners were killed on March 26, 1896. Average weekly coal output 5,000 tons. Population of borough (census, 1896), 1,632; county, 4,592. Newspaper: *Brunner News* (evening daily), guaranteed circulation, 2,000.

BUCKLAND (Manukau co., Pukekohe riding). A township with railway station, post office and telephone station, 33 postal miles from Auckland. Population, about 20.

BULLENDALE (44° 45′ S. lat., 168° 47′ E. long.), Lake co., Otago prov., post town, with telephone bureau, on Skipper's Creek, in Lake Wakatipu County, 129 miles from Invercargill. Communication with Dunedin is by coach to Queenstown, 26 miles, steamer to Kingstown, thence rail. Has hotel, public school and library. Lighted principally with electricity. This is said to have been one of the first places in the world to transmit current over two miles. District is mining. Formation: mica schist. Population about 180.

BULLS (40° 12′ S. lat., 175° 15′ E. long.) (sometimes known as Bulltown, being named after Mr. James Bull, who started a store and inn here in 1859), a post town, with money-order, telegraph and savings bank offices (Wellington prov., Rangitikei county, and Rangitoto and Porewa riding), 41 miles south from Wanganui, 116 miles from Wellington. It is situated on the Rangitikei River, on the line of the north-western road leading to Turakina and Wanganui, and has four churches, Anglican, Presbyterian, and Roman Catholic, also Salvation Army, and a gospel hall, three hotels, a court-house, State (150) and several private schools; banks: New Zealand and N. S. Wales: library (2,000 vols.) and reading room. Masonic, Oddfellows', and I.O.G.T. lodges, and several stores; a public hall fitted up with stage appliances and scenery, also Mason and I.O.O.F. halls. The race-course is close to the town. The district is both agricultural and pastoral, land rich and very level. Population (census 1896), 521; riding, 791.

BURKE'S (Otago prov. Waikouaiti co.), 4 postal miles from Dunedin, with railway station on the Dunedin to Port Chalmers line; also a post and telegraph office. Has public school, Presbyterian and Roman Catholic churches. There is a beautiful harbour. District is pastoral, and has a population of about 400. Town (census 1896), 90.

BURKE'S PASS (44° 12′ S. lat., 170° 30′ E. long.) (Canterbury prov., Mackenzie co. and riding of Fairlie), 55 postal miles from Timaru, a post town with telephone office, 116 miles south-west from Christchurch. Has hotel, school, Union church. Good fishing in the Three Creeks and Opihi. Two Thumb ranges in vicinity. Pastoral district. Formation: Limestone strata, and shingle deposits, also shale and hematite. Population of district about 200.

BURNHAM (43° 40′ S. lat., 172° 22′ E. long.), a post town, telegraph and railway station, in the provincial district of Canterbury, county of Selwyn, and Courtenay riding, 18 miles from Christchurch, fares, 2s. 4d. and 1s. 7d. A large Industrial school is here, also a State school, and an Anglican place of worship. Wesleyan services are held fortnightly. Population about 50.

BURNSIDE (45° 54′ S. lat., 170° 31′ E. long.) (Otago prov., Taieri co., and riding of Kaikorai), 4 miles from Dunedin, is a railway station, having one hotel, religious assembly called "The Brethren," ironworks, tanneries and steam flour mill, the N. Z. Drug Company's oil mills, abbatoirs (under strict supervision), bone mills, and acid works are here; also the New Zealand Refrigerating works and Dunedin Cattle Saleyards; sales every Wednesday. There are glue, fancy leather, woolrug and mat factories. District is agricultural. Limestone formation. Population, town (census 1896), 159.

CABBAGE BAY. *See* COROMANDEL.

CAMBRIAN (44° 58′ S. lat., 169° 45′ E. long.) (prov. Otago, Maniototo co., and riding of St. Bathan's), sometimes called WELSHMAN'S, 188 postal, N.W., miles from Dunedin, on Dunstan Creek. A post town with telephone station. Coach runs to Ranfurly thrice a week, thence rail to Dunedin or Christchurch, steamer to Wellington. Has one hotel, Government school in which Presbyterian and Anglican services are held; public hall, M.U.I.O.O.F. lodge No. 7,452; gold, hydraulic and dredging, and coal-mining district. Population of town, 130; of district, 300.

CAMBRIDGE (38° 23′ S. lat., 175° 14 E. long.), a money-order, savings bank, and telegraph township and municipality (mayor and nine councillors) on the east bank of the Waikato river, (co. of Waikato, prov. dist. of Auckland), 101 miles SE. of the city of Auckland, to and from which the communication is by rail, fares 12s. 9d. and 8s. 6d. Three hotels. Cambridge is well laid out, having a fine domain (with a charming lake), very compact and attractive in appearrance, and one of the foremost towns in the Waikato, and considered the sanatorium of the north. Bank: Bank of New Zealand. It has a public hall, an Oddfellows' hall, five places of worship—the Episcopal church (St. Andrew's), with a tower and peal of six bells, Wesleyan, Presbyterian and Catholic churches, a reading room and library, athletic club, a school, a brewery, flour-mill, public and other sale-yards, butter and cheese factory, and a race-course. Masonic and Oddfellow lodges. The surrounding country, which is fine agricultural land, is under tillage. There are several fine nurseries and good orchards; it is a fine fruit-growing district, and has an evaporating factory. The Government having purchased Tea-court and Whitehall estates have divided them into small farms; Mona vale has been treated in the same way. Population of borough (census 1896), 865.

CAMPBELLTOWN (46° 36′ S. lat., 168° 22′ E. long.), or BLUFF—A municipal township at the Bluff (co. of Southland, prov. dist. of Otago). It has a telephone bureau, money-order, savings bank, telegraph and post office; and five daily

mails to and from Invercargill. It occupies a very southerly position on a peninsula near the entrance to Bluff Harbour, 17 miles S. from Invercargill, of which it is the port, 150 miles SW. of Dunedin. Has a good harbour, accessible at all times of tide, and good wharf accommodation for vessels of any tonnage. It is connected with the interior by railway passing through Invercargill to Kingston, and there is through railway communication with Dunedin and Christchurch. It is the first and last port of call for the Melbourne steamers. Hotels: Eagle, Golden Age, Bay View, and Club—the two last very handsome buildings of concrete and brick, with good accommodation for the travelling public who visit this pretty seaside resort. There is a signal station on Bluff Hill 900 feet high, by which vessels passing through the Foveaux straits can be reported throughout New Zealand. Has Bank of New Zealand, public school (average attendance, 300), Athenæum, Primitive Methodist chapel, Roman Catholic and Presbyterian church, custom-house, harbour office, Southland Frozen Meat and Produce Company, Ocean Beach Freezing works, several fish-curing establishments, store, and Masonic, Oddfellows' and Foresters' lodges. Water has been laid on by the Harbour Board for the convenience of shipping; the pressure is 130 lbs. to the inch. The Board has a powerful steam-tug which makes weekly trips (Wednesday) to Stewart Island. The municipal borough comprises 2,000 acres, 300 dwellings, and annual value of property, £4,270. Harbour funded debt, £50,000; sinking fund, £17,000; yearly revenue, £14,000. Population of borough, 1,300.

CANTERBURY —*See* LYTTELTON.

CAPE FOULWIND (prov. Nelson, Buller co., Wareatea South riding), 7 miles from Westport. A post town with rail and telephone station. Daily mail. Coaches run to Reefton and Nelson. Has two hotels, I.O.G.T. lodge, Catholic church, and a State school. Mining, agricultural, and pastoral district. Population 300.

CAPLESTON (Inangahua co., Nelson province), a post town on Boatman's creek, with money-order, savings bank, and telephone office, 43 miles from Westport. Coach to Reefton, train to Greymouth, boat to Wellington. Has two hotels, miners' club, a State school, Roman Catholic and Anglican churches, Victoria Institute, School of Mines. Lighted with kerosene; watered from reservoirs; district is a mining one. Quartz and alluvial sluicing. Population 100.

CARTERTON (40° 57′ S. lat., 175° 28 E. long.), a post town, with money-order, savings bank, telegraph and railway station, in the county and electorate of Wairarapa (prov. and province of Wellington), 62 miles NW. from Wellington, on the Maungaterere. It is on the line to Masterton; fares, 8s. and 5s. 4d. Several hotels. Greytown is 5 miles distant to the south, and Masterton 10 miles north. Carterton has a town-hall, assembly rooms, an institute, court-house, police-station, public library, a post-office, bowling-green, public park and recreation reserve, branch of the New Zealand Bank, and churches belonging to the Episcopalians (St. Mark's), Wesleyans, Presbyterians, and Catholics, Salvation Army with barracks, and public school. Also Masonic, Oddfellows, Foresters, Druids, Good Templars and Rechabite lodges. The Wairarapa South County Council and Taratahi-Carterton Road Board meet here, and the Taratahi-Carterton Racing Club has a two days' annual meeting, the race-course being at Clareville, about 2 miles distant. Weekly stock sales are held at Taratahi and Belvedere yards. There is a dairy factory at Taratahi, one at Belvedere, and another at Dalefield. There are two saw-mills. The show grounds of the Wairarapa and East Coast Pastoral and Agricultural Society are situate close to the railway station. Carterton station is the nearest point for tourists intending the ascent of Mount Holdsworth, one of the highest peaks in the Tararua range. Agricultural and pastoral district. Population of borough (census 1896), 1,291, now 1,500. Newspapers: *Wairarapa Observer* (Tuesday, Thursday, and Saturday), and *Wairarapa Leader* (Monday, Wednesday, and Friday).

CASTLEPOINT (40° 54′ S. lat., 176° 1′ E. long.), a post town, with telephone, money-order and savings bank offices, in the county of Wairarapa North, riding of Castlepoint (Wellington prov.), 108 miles NNE. of Wellington, and 41 miles from the Masterton railway station, to which a mail coach runs thrice a week. Steamers from Napier and Wellington call once a week each way. Popular seaside resort. Population, about 31.

CAVE (44° 48′ S. lat., 171° E. long.) (prov. dist. Canterbury, co. McKenzie), a township with railway station, on the Timaru-Fairlie line, 23 miles from Timaru, with a post office. Has hotel, public school, in which Anglican and Presbyterian services are held. Agricultural and pastoral district. Height above sea level, 507 feet.

CAVERSHAM (co. Taieri, prov. dist. Otago), a suburb of Dunedin and borough with post, money-order, savings bank, telegraph office, and railway station, 2 miles from Dunedin, with which tram, rail and 'bus communicate. Height above sea level, 91 feet. There are 910 dwellings. There are six hotels, four schools, Anglican, Presbyterian, Baptist, and Disciples of Christ churches, police station, two breweries, brick works, gas works, railway workshops, wool rug factories, pipe works, wax match and boot factories, Druids', Foresters', Oddfellows', Rechabite, and Sons of Temperance Societies. Town is lighted with gas. Annual value of property is £30,130; and the population of the borough (census 1896), 4,763, now 4,800. Newspaper: *Otago Workman*.

CHARLESTON (41° 55′ S. lat., 171° 32′ E. long.), a post town, with money-order, savings bank and telephone station, on the river Nile (Buller co., and riding of Charleston in the Nelson provincial district), 18 miles SW. from Westport—coach conveyance twice a week. Hotels—Melbourne, European, West Coast, Welcome Inn and City. It has a branch of the N.S. Wales Bank; Episcopal, and Catholic churches; courthouse, library and institute, hospital, and public school for boys and girls. Lodges of Masons, Oddfellows, Foresters, and Hibernians are held here. Alluvial mining district, which appears to have a good future, seeing that several wealthy mining companies (including the General Exploration Company) have taken up claims and are erecting machinery. Population of town, 300; of riding, 852. Newspaper: *Charleston Herald*, official organ for the Buller county.

CHERTSEY (44° 47′ S. lat., 171° 56′ E. long.,) (Canterbury prov., Selwyn co., and ridings of S. Rakaia. Upper Ashburton and Wakanui), a post-town, with money-order and telegraph office, savings bank, and railway station, 41 miles from Christchurch. There is hotel, a Government school, library, and Anglican church. Water from tanks and wells. District is agricultural. Height above sea-level, 378 feet. Formation: Post tertiary sand and gravel. Population of town (census, 1896), 93.

CHEVIOT (42° 42′ S. lat., 173 17′ E. long.) a post town, with telegraph station and money-order and savings bank office, in the county of Cheviot, 74 miles N. from Christchurch, with which it has mail communication daily, *viâ* Amberley, Waipara, and Motonau; steamer goes to Port Robinson twice weekly. Cheviot was acquired in 1894 by the Government of New Zealand (under land transaction regulations), and is now occupied by some 300 farmers on freehold grazing leases and leases in perpetuity. There are lands office, three hotels, five schools, Presbyterian, Anglican, and Methodist churches, free library, Oddfellows' lodge, butter and cheese factory, cattle yards, town-hall, and harbour-master, County Council, and various stores. Town is lighted with kerosene. Population about 1,200. Newspaper: *Cheviot News*, twice weekly.

CHRISTCHURCH (43° 32′ 16″ S. lat., 172° 38′ 59″ E. long.) (co. Selwyn), has post money-order and telegraph office, and savings bank. The capital of the provincial district of Canterbury, is situated on the plain of that name, and the banks of the River Avon, and is 8 miles distant from the port of Lyttelton. The port and town are connected by railway, and the tunnel through the Port hills is the longest in New Zealand, extending to a mile and five-eighths. Christchurch is on the main line of the Middle Island Railway, and is connected with all parts by telegraph. Numerous trains run to and from Christchurch and Lyttelton during the day. The railway also extends in a S. direction, with many branches to Dunedin (230 miles), and thence with numerous branches to the Bluff, 139 miles additional. The northern line extends to Culverden, 69 miles, *viâ* Rangiora, with a branch to Oxford and Sheffield. There is a tramway laid by the municipality from Cathedral Square to the new cemetery, a distance of 2½ miles, and it is continued to New Brighton, a seaside suburb, distant 5 miles from Christchurch. The Canterbury Tramway Company have constructed lines to Sumner, 8 miles: to Papanui, 3 miles; Sunnyside, 4 miles, to the railway station and to Port Hills, Sydenham, making a total of 20 miles. Among the thirty-six hotels are Coker's Family, the Commercial, Empire, Hereford, City, White Hart, Clarendon, Occidental, Royal, Masonic, Imperial, Grosvenor. The streets form a square of about a mile, and are laid out chiefly in parallel and intersecting lines. There are several fine buildings, the principal of which are the buildings of Canterbury College, the Provincial Government buildings, the Government buildings in Cathedral Square, and the Museum (which contains numerous fine exhibits, and a unique collection of skeletons of the Moa, upwards of 200,000 specimens in all); the Cathedral (said to be a copy of the Caen Cathedral, Normandy), designed by Sir G. Gilbert Scott, the transepts and choir of which have yet to be completed. It was consecrated Nov. 1, 1881, and has a tower and spire reaching a height of 240 feet, and a peal of ten bells. The other places of worship in the town comprise the Episcopal churches, St. Michael's, St. Luke's, St. Matthew's, and St. John's, the Baptist church in Oxford Terrace, the Catholic churches of the Blessed Sacrament in Barbadoes Street, and St. Mary's, Manchester Street, Trinity church (Congregational), St. Andrew's, and St. Paul's (Presbyterian), the Jews' Synagogue in Gloucester Street, and the United Methodist, Primitive Methodist, Wesleyan, and Bible Christian chapels, and Salvation Army barracks in Victoria Street. There are twelve public schools in the city and suburbs, also Christ's College Grammar school, the girls' high school, and the boys' high school. The banking companies which have offices in Christchurch are the Bank of New Zealand, the National Bank, the Union Bank, the Bank of New South Wales, and the Bank of Australasia. All the chief insurance companies of Australia and the United Kingdom are represented. There are the Christchurch and Canterbury Clubs (residential), Commercial and Working Men's Clubs, Masonic, Oddfellows', Druids', and other lodges, Savage Club, and other societies. The town is bounded on the west by Hagley Park, a beautiful pleasure ground of upwards of 400 acres, through which the Avon flows; parts of the park are laid out in cricket, polo, golf, football, and hockey grounds. The Government Domain comprises about 79 acres, and is principally laid out as a botanic garden. Adjoining are the Acclimatisation Society's grounds, with fish-rearing ponds and a Zoological Garden on a limited scale. Lancaster Park is a fine cricket ground. The southern extension of the town is incorporated as the borough of Sydenham, the northern extension being formed into the borough of St. Albans, and there are suburban districts named Addington, Linwood Phillipstown, Papanui, Woolston, and others. The area of the borough is 1,062 acres. The city is divided into five wards—NE.

NW., SE., SW., and Richmond, each of which returns three councillors. The city is supplied with excellent water by means of artesian wells, which yield a daily supply of about 144 gallons per head. There are several local industries, that of boot manufacture being, perhaps, the chief. The places of amusement are the Theatre Royal, the Masonic and Oddfellows' halls, and the Opera House. There are numerous athletic clubs, and several companies of volunteers. Among the philanthropic institutions are the hospital, with 116 beds, the lunatic asylum with 96 wards or dormitories, and 462 beds, and the deaf and dumb asylum at Sumner. The district is more particularly suitable for grain growing and grazing purposes. Population of the city and suburbs (census, 1896), 51,330, now 51,330. Publications, Morning newspapers: *Lyttelton Times, The Press.* Evening newspapers: *The Star, Truth.* Weekly Newspapers: *Canterbury Times, Weekly Press, New Zealand Methodist, Prohibitionist, Mercantile Gazette, Spectator,* and *War Cry.* Monthly publications: *New Zealand Church News, Railway Review, Schoolmaster, Baptist and Volunteer Service Gazette.*

CLARKSVILLE (46° 11′ S. lat., 170° 0′ E. long.), a post-town with telephone office, in the provincial district of Otago, county of Bruce and Tokomairiro and Mount Stuart ridings. It has a railway station, on the Dunedin and Invercargill Railway, 37 miles SW. from Dunedin, 11 miles from Christchurch, 2 miles from Milton; the line to Lawrence branches off at this point; fares from Dunedin to Clarksville 4s. 10d. and 3s. 3d. Farming district. Population, about 130.

CLEVEDON (36° 20′ S. lat., 174° 11′ E. long.), is 22 postal miles SE. from Auckland, situated on the Wairoa river, which flows into the eastern extremity of Tamaki Strait. It is in the county of Manukau, provincial district Auckland. Is a post town with money-order, telephone, and savings bank office. There is regular steamer communication, fare 3s., or *vid* Papakura by train. Mail cart runs to Papakura daily, fare 2s. A commodious hotel is here, State school and Presbyterian and Anglican churches, Masonic lodge, public hall and library, butter and cheese factory. A substantial bridge spans the river, and there is a wharf very near it. A large quantity of dairy produce is sent to town annually. The central portion of the district is flat and fertile, bounded on the east, south, and north by hilly land, much of which is bush and of indifferent quality. There is a splendid waterfall eight miles from bridge, about 90 feet in height, over which the Wairoa river plunges at one leap, and which is a source of great attraction during the holiday season. Population of road district 859.

CLINTON (46° 8′ S. lat., 169° 16′ E. long.), a post-town with money-order, savings bank, telephone and telegraph office (Otagoprov., Clutha co. and riding of Clinton), 73 miles SW. from Dunedin on the Kuiwao Creek. It is in railway connection with both Dunedin and Invercargill; fares from Dunedin, 9s. 4d. and 6s. 3d. Railway refreshment rooms (train stops 20 minutes), and stores. Two temperance hotels. Social institutions comprise Cricket and Football Clubs, Caledonian Society, I.O.O.F. and I.O.G.T. Lodges. It has Presbyterian, Baptist, and Roman Catholic places of worship, Athenæum and public library, a public school, an agency of the Bank of New Zealand. Otago Acclimatisation Society's hatcheries and ponds are within short distance. Good fishing in Kurwao Creek, from which is the water supply. Agricultural and grazing district. Height above sea-level 400 feet. Population, with district (census, 1896), 474; of riding, 649.

CLIVE (39° 30′ S. lat., 176° 55′ E. long.), in county and prov. of Hawke's Bay, and riding of Clive, a pleasant township, with post office, telegragh and railway station, situated mostly on the southern banks of the Ngarururo river, and 6 miles from Napier. Has district school, Oddfellows' and Foresters' lodges, Episcopal, Wesleyan, Presbyterian and Roman Catholic churches. There are boiling-down and wool-washing establishments in the immediate vicinity. One hotel. Farming and dairying is carried on likewise in the district, which is of a rich agricultural character, the main crops being wheat, oats, potatoes, and maize. A splendid bridge crosses the Ngarururo river, and connects with the Farndon Railway Station on the northern side of the river, to which coach runs daily. At Farndon is a public park, about 20 acres in area, prettily situated on the river bank. Water from artesian wells. Town lighted with kerosene. The district is subject to occasional floods by the overflowing of the Ngarururo river; the Clive River Board has been formed to protect the neighbourhood as far as possible. Population (census 1896) of town, 700; of riding, 1,137.

CLONMORE (co. Grey, Nelson prov.), a post-town and railway station 21 miles from Greymouth, on the Arnold river. Mail once weekly. Has hotel and saw-mills. Lake Brunner in district. Petroleum has been found. Pastoral and mining (about twenty dredging claims at work). Population about 40.

CLYDE. *See* WAIROA.

CLYDE, or DUNSTAN (45° 4′ S. lat., 169° 17′ E. long.), a township on the left bank of the Clutha river, with telegraph, savings bank, and money-order office, in the provincial district of Otago, Vincent county and riding of Dunstan, 128 postal miles NW. of Dunedin, with which there is communication by coach to the Ranfurly railway station, also by coach to Lawrence; thence rail. The latter route is generally used. The hotels are the Dunstan, Port Phillip, and Hartley Arms. The public buildings comprise the court-house, county council offices, Athenæum, public school, hospital (with 22 beds), town hall, public library, places of worship—Church of England, and Presbyterian church—Masonic and Foresters lodges. Bank of New Zealand, opened once weekly. Cobb & Co.'s coaches run to Naseby, Ranfurly, Lawrence, St. Bathan's, Blackstone Hill, Wedderburn, Hyde, Queenstown and other places. The town is supplied with water. The whole district is rich in gold, which is obtained by sluicing the beaches and banks of the Molyneux river, and the numerous rich alluvial terraces in the immediate neighbourhood; or by crushing the auriferous quartz that abounds in the neighbouring ranges. Dredging is also a leading and progressive industry. Messrs. Hartley and Reilly first found gold here in August, 1862; lignite also found. Much fruit is also grown here. Population, town, 400 (census 1896); of riding 732. The local paper is the *Dunstan Times,* weekly.

COALGATE (42° 31′ S. lat., 172° 5′ E long.) (Selwyn co., shire South Malvern, Canterbury prov.), on the river Selwyn, a post town, with money-order savings bank, and telegraph offices, and railway station, 38 miles from Christchurch, on the Darfield and White Cliffs line. Fares to Christchurch 6s. 6d. and 7s. 3d.; rail and steamer to Wellington. Has hotel, public school, and M.U.I.O.O.F lodges. Is lighted with kerosene. District is coal-mining and pastoral. There is good trout fishing and hare shooting. Geological formation: partly volcanic, clay and shingle. Good pipe-clay and deposits of hematite found in adjacent hills. Height above sea level 775 feet. Population (census 1896), 116.

COBDEN (42° 26′ S. lat., 171° 20′ E. long.) (Grey co. and provincial district Westland), a township on the Grey river, has two hotels, and State school. Postal facilities at Greymouth, a short distance away. Frequent steamers to Wellington, 324 miles NE. Gold and coal mining carried on. Limestone ranges. Population (census 1896), 274.

COLLINGWOOD (40° 41′ S. lat., 172° 40′ E. long.), a township with money-order, telephone, and savings bank offices, Government insurance and gold revenue receiver offices. (Nelson prov., Collingwood co., and riding of Aorere) at the mouth of the river Aorere, 65 miles from Nelson. Two Hotels. Episcopal church (St. Cuthbert's). Eight public schools in district. Mechanics' institute, Foresters', and Druids' societies. Gold was first found here in 1856, and there is increasing briskness in mining, and extensive sluicing and dredging works have been established. Two small coal-mines are in operation. Grazing and farming industries have greatly increased; a dairy factory and several saw-mills are also at work. Population of town, 400. Newspaper: *Golden Bay Argus.*

COROMANDEL (36° 47′ S. lat., 175° 35′ E. long.). The county of Coromandel is situated on the Colville peninsula, Auckland Provincial district; it is divided into two ridings, Harataunga and Mercury Bay, and the affairs are administered by one local body, the Coromandel County Council. Gold mining is the principal industry, although the timber industry engages considerable attention. The Kauri Timber Company own several extensive kauri forests and three saw mills on the eastern coast of the county; there is also one saw-mill near the town of Coromandel; there is a large export of kauri logs from different parts of the district, several of the Auckland mills getting supply for cutting from here. Gold mining has been carried on with varying success for many years, the first gold having been discovered in 1851. Coromandel is the oldest goldfield in the colony; some dozen English companies are operating in the district, including the famous Hauraki, and the deepest mine in the colony, the Kapanga—working at a depth of 1,000 feet. Operations are also being carried on at Opitoniu, about eight miles distant. An English Company—Kauri Freehold Gold Estates—being engaged developing their adjoining mines—a steam tram connecting the mines with the port at Whangapona, and a 40-head stamp battery has been erected. There are three principal townships and several smaller ones within the county. Coromandel is the county-town, and is in direct daily steam communication with Auckland (42 postal miles distant); there is a branch of the Bank of New Zealand, and of the National of New Zealand, County Council offices, Warden's and Magistrates' offices and court-house, three public schools and a Convent school; hospital, public library and reading room, school of mines, Episcopalian, Roman Catholic, Wesleyan and Presbyterian churches, post, telegraph and money-order office, Mining Registrar's office, nine hotels, Masonic, Foresters' Oddfellows', and Good Templars' lodges, and a number of general stores. Mercury Bay is the second township in rank; it is in direct communication with Auckland by steamer twice weekly; there is a court-house and reading-rooms, two hotels and several stores. There is an abundance of minerals throughout the whole country, and reefs carrying gold, silver, lead, copper and other metals are to be met with in many parts. Castle Rock, an elevated pinnacle commanding an extensive view of the east coast and Hauraki Gulf, is in the vicinity, and the scenery is of great beauty and grandeur, and, considering its accessibility to Auckland, should be a favourite tourist resort. The population of the town is 2,000. Newspaper: *Coromandel County News.*

CRIFFEL (Otago prov., Lake co., Cardrona riding), small alluvial gold-mining locality situated on the top of the Pisa range, about 4,000 feet above sea-level, between the Cardrona River and Luggate Creek, about 10 miles from Pembroke and 36 miles from Cromwell. From its high elevation it can only be worked during the summer months, the ground being covered with snow for nearly six months of the year. The track to it is a bad one, and timber and supplies have to be carried by packhorses. *See* PEMBROKE.

CROFTON (40° 8′ S. lat., 175° 17′ E. long.), a small settlement with post-office and railway station in Rangitikei co., Porewa riding, Wellington prov., on the Tutaenui river, on the road between Marton and Bulls, and 36 miles S. from Wanganui, promoted by Sir W. Fox on temperance principles. It is about 133 miles from Wellington, and has a tri-weekly mail

and a school. Agricultural and pastoral district. Population of village (census 1896), 113.

CROMWELL (45° 3′ S. lat., 169° 12′ E. long.), a money-order, savings bank, postal, and telegraph township, under municipal government. Is the chief town of the Kawarau district (county of Vincent, electorate of Wakatipu, prov. of Otago), and lies 142 postal miles NW. of Dunedin, with which there is coach and rail communication, *vid* Lawrence, three times a week, and by way of Queenstown on the alternate days; also *vid* Wedderburn (Otago Central route) three times a week. Among the hotels of note are Davison's, Commercial, Golden Age, Globe, and Victoria, the first-named being the booking-office for the Wanaka Lakes, which are well known throughout the colony for their beauty and diversity of scenery and salubrity of climate. Mail goes to the Wanaka twice weekly. It is situated at the junction of the two largest rivers in Otago—Clutha and Kawarau; a fine bridge spanning the former. The Bank of New Zealand and National Bank are represented, and there are several good stores. The places of worship are Episcopal, Wesleyan Methodists, Presbyterian, and Roman Catholic. A literary institute with library, a Government school, and a Roman Catholic school, court-house, and a hospital (with 14 beds). Cromwell is the centre of the most important mining district in the province, and sends the largest escorts. Its reefs are a most important feature. River dredging for gold on the Clutha and Kawarau is now an established branch of mining. Coal also abounds in the district. Three pits are at work, each being fully employed. About a mile out of town is the Cromwell Brewery. Population of borough, census 1896, was 539; now about 650; county, 4,090. Newspapers: The *Cromwell Argus* (established over 30 years) and *Cromwell Times*.

CULLENSVILLE (42° S. lat., 174° E. long.) (Marlborough province and co., riding of Pelorus), a post town with money order office, savings bank and telephone station, 68 miles W. of Wellington, 36 miles from Blenheim, *vid* Havelock. It is surrounded by densely wooded high hills. Has hotel, public library, court house, and Government school. Mining, agricultural and pastoral district. Formation: Primary (mica schist). Population, 60; district, about 160.

CULVERDEN (42° 45′ S. lat., 170° E. long) (Amuri co., riding of Pabau, Nelson prov.), a post town with money-order and telegraph office, savings bank and railway station on the Christchurch-Culverden line, 69 miles from Christchurch. Fares, 8s. 9d. and 5s. 10d. Coach fare to Springs, 24 miles distant, 14s. Height above sea-level, 567 feet. Hotel: Culverden, school and Presbyterian church. Pastoral district. Population about 40.

CUST (43° 17′ S. lat., 172° 22′ E. long.), a post town, with post-office and telegraph station, on the river Cust, in the county of Ashley, Canterbury provincial district. It is a railway station on the Rangiora and Oxford line, and lies 32 miles NW. of Christchurch (fares, 4s. 1d. and 2s. 9d.). It has hotel, a Mechanics' Institute, stores, public school, Anglican and Presbyterian churches, Oddfellows' hall, Orange hall, and two flour mills. It is an agricultural and pastoral district. Well irrigated by the Waimakariri-Ashley water supply. Population about 300.

DANNEVIRKE (county Waipawa, prov. district Hawke's Bay, and riding of Dannevirke), originally a Danish settlement, established in 1872, with post, telegraph, money order office, savings bank and railway station on the main southern road and railway line, from Napier to Wellington, and the Manawatu river. It is 79 miles from Napier, fares 10s. and 6s. 8d., 97 from Wanganui, 122 from Wellington. Coach runs to Weber and Herbertsville. It is in the heart of the Seventy Mile Bush, and is the chief seat of the timber milling industry. There are several mills in the immediate neighbourhood and surrounding district. There is also considerable sheep farming carried on. Five hotels. Bank of New Zealand and Bank of New South Wales. Churches: St. John's (Episcopalian), Presbyterian, Roman Catholic, Christadelphians, Wesleyans, Lutheran, and Salvation Army. Town hall, general stores, R.M. Court and police buildings. Good library and reading-room, public school, Masons', Oddfellows', I.O.G.T., and Foresters' lodges. Saw-milling industry. Dannevirke has been created the terminal station on the Napier line for railway services North and South. Town is lighted with Watts' water gas. Good water supply. Agricultural and pastoral. Population, 1,500; county, 8,866; district 2,000. Newspapers: *Bush Advocate*, published Tuesday, Thursday, and Saturday. *Morning Press*, Tuesday, Thursday, and Saturday.

DARFIELD (Selwyn co., prov. Canterbury), a post town, with money-order office, savings bank, telegraph, and railway junction on the Malvern line. 30 miles from Christchurch. Fares 3s. 10d. and 2s. 7d. Has one hotel, school, Anglican, Wesleyan, Presbyterian, and Roman Catholic school and churches, court-house, public town hall, large saleyards, and medical practitioner. Height above sea-level, 644 feet. Good water supply. Population of town, 250; of riding, 2,500.

DARGAVILLE (35° 50′ S. lat., 173° 59′ E. long.,) in the provincial district of Auckland, a post town situated at the head of the deep water navigation of the Northern Wairoa River, and 40 miles from its mouth, in the County of Hobson, and riding of Dargaville, and is 102 miles from Auckland. It has a branch of the National Bank of New Zealand, a money-order office, public hall, savings bank and telegraph station, racing club, tennis club, Masonic and Foresters' lodges, two hotels—the Northern Wairoa and Kaihu, public library and reading-room, a very handsome Episcopalian church (built by the founder of the township, Mr. J. M. Dargaville, who was one of the pioneers of settlement in the district), saw-mill, and a public school. Two substantial wharves answer the shipping requirements. Communication with the capital — Auckland—is by bi-weekly steamers to Helensville, and thence to Auckland by rail. The Kaihu Valley Railway, open for traffic for 17 miles, and which runs from Dargaville in a north-westerly direction, leads into a tract of 100,000 acres of splendid new country. The railway also taps Kauri forests, the property of the Kauri timber syndicate, said to contain between one and two hundred million feet of Kauri, besides treble that quantity of other marketable timber. The forests and extensive gum fields in this neighbourhood provide constant employment for small settlers and others of the working class. Population of town, 600; of riding, 875. Newspaper: *Bell and Advertiser*.

DENNISTON (41° 45′ S. lat; 171° 36′ E. long.) (Buller, co. and riding of Wareatea North, prov. Nelson), 14 postal miles from Westport, a mining and post town, with money-order office, savings bank, and telephone station. It is said to be the highest township in New Zealand, being built at an elevation of 1,960 feet. Has seven hotels, three schools, Anglican, Roman Catholic, Presbyterian, Methodist and Salvation Army places of worship, Athenæum, Masonic, Oddfellows', Knights of Labour, and Good Templars' societies, and School of Mines. Mining district. Formation: Cretaceo-tertiary series. Population, township and district, 2,000.

DEVONPORT (36° 44′ S. lat., 174° 46′ E. long.), a borough (co. and electorate of Eden), a marine and residential suburb, with post, telephone, money-order office and savings bank on the northern shore of Waitemata Harbour, about 2 miles NE. of the city, in the Prov. Dist. of Auckland. Mode of conveyance, ferry-boat to Auckland, thence rail. Its chief attractions are the fine level strand, about 1½ mile in length, and the facilities for bathing at nearly all times of the tide. Places of worship: Holy Trinity (Anglican), Wesleyan Chapel, Presbyterian, Roman Catholic, and Congregational churches, and Christian Brethren. Two public schools, also private seminary, free reading room and public library; efficient fire brigade. Brick and pipe works. There are two first class hotels, Flagstaff and Masonic; Foresters' and Oddfellows' and Theosophical lodges, and several boarding-houses, which are usually crowded in the summer season. The town is lighted with gas, and an excellent water supply is derived from Lake Takapuna, 3½ miles distant. The waterworks cost £15,000, and were raised locally by debentures at 5½ per cent. Ferry steamers ply every twenty minutes, fares, 4d. single, 6d. return. Two good wharves. About 4 miles N. is the magnificent lake Takapuna, a splendid sheet of fresh water, 1 mile long by ¾ mile broad, close to the sea and surrounded by hills. Coaches run to Takapuna (return fare, 1s.; single 6d.), also to Waiwera, and Warkworth, &c. Shipbuilding to some extent is carried on here. The principal fortifications of the Auckland harbour are within in the Borough boundary. Calliope Dry Dock (capable of accommodating two of the largest war ships) is a principal feature of Devonport, and it has been taken over by the British Admiralty, which intends spending £37,000 in making it a thoroughly equipped arsenal. There is a magnificent view from Mount Victoria, the signal station, and from Fort Cantley. There is an excellent Domain used by all local sport clubs. The island of Rangitoto (miniature Vesuvius of the Waitemata) also constitutes one of Devonport's Domains, the cone rises to a height of 854 feet above sea-level, and is the highest of the 63 separate points of eruption within a radius of 10 miles around Auckland. This island is a favourite resort of excursionists, as from the summit a picturesque view can be had of the islands and coast line of the harbour. The Devonport Borough Council has recently formed a good track to the summit, erected a commodious wharf, constructed a reservoir, planted shrubs and fixed seats along the track for the convenience of visitors. A thoroughly efficient drainage scheme on the latest principle, to cost £17,500, is nearly completed. Devonport is at present the premier marine suburb in New Zealand, area 640 acres; 593 ratepayers, rate 1s.; annual value of ratable property, £23,020. It is reported to be very healthy. Formation: volcanic. Footpaths and roads very good. Population of borough, 3,150.

DILLMANS TOWN (Westland, prov. and riding of Arahura), a post town, near Teramakau river with telegraph office, 20 miles from Hokitika, reached from railway station 5 miles distant, about 450 miles from Wellington. Has five hotels, State school, sawmills, and several stores. Town is lighted with kerosene. Water from Government race. District is a mining one, and is said to be the largest hydraulic sluicing field in the colony, and there are enormous syphons. Formation: Gravel resting on blue reef bottom. Greenstone is found. Population, 467.

DIPTON (Southland prov. and co. and riding of Winton), a post town, with money-order office, savings bank, telegraph and railway station, 37 miles from Invercargill. Fares, 4s. 9d. and 3s. 2d. Has hotel, school, public library, I.O.G.T. lodge, Anglican and Presbyterian churches, dairy factory. Good fishing. Agricultural and pastoral. Population, 90; district, 200.

DOYLESTON (43° 43′ S. lat., 172° 31′ E. long.), a post town, and railway station, on the Christchurch-Southbridge line, with telephone office, (Selwyn, co. and riding of Ellesmere, Canterbury prov.), 26 miles S. from Christchurch, fares, 3s. 4d. and 2s. 3d. Has hotel, Oddfellows' lodge, school of 150 scholars, public library, town hall, and several stores. Important dairying district, having largest creamery in Canterbury. Population, 250.

DRURY (37° 6′ S. lat., 174° 47′ E. long.), a post town (co. Manukau, prov. Auckland), with money-order office, savings bank and telegraph station on the Great South Road and Waikato Railway line, 22 miles S. from Auckland, fares, 2s. 10d. and 1s. 11d. Hotel: the Railway. Public school, fine town hall, in which Wesleyan services are held, Anglican and Presbyterian

churches, and several stores. Lighted with kerosene. Coach plies to Ramarama and Bombay. In the neighbourhood good pottery clay is to be found, and also coal. In 1863, during the Waikato war, the Imperial troops were encamped here. Industries: flax and saw-milling. Agricultural and pastoral. District is divided up into small farms, principal crops being oats and potatoes. A creamery has been established. Population of town 100, of district about 1,000.

DUNBACK (40° S. lat., 170° E. long.) (prov. Otago, Waihemo co. and riding of Dunback), post town, on Shag river, with money-order, savings bank, telephone offices, and railway station (thrice weekly) on the Palmerston-Waihemo section. Height above sea-level, 168 feet. 50 miles N. from Dunedin. Has two hotels and one Government school, Presbyterian church, public library, Oddfellows' lodge. Rabbit canning and meat preserving industry. District is agricultural and pastoral. Population, 200.

DUNEDIN (45° 52′ 11″ S. lat., 170° 31′ 7″ E. long.), prov. Otago, rising to 300 feet above sea level, has post, telegraph, and money-order offices, and savings bank, and is the capital of the provincial district of Otago, and the largest, best built, and most important commercial city in New Zealand. It is situated in county Taieri, on a picturesque site at the south-western side of a bay running inland called Otago Harbour, about 9 miles from Port Chalmers, with which it is also connected by a railway (fourteen trains daily; fares, 1s. 6d. and 1s.), and 16 miles from Otago Heads. Hotels: The Grand Hotel (said to be one of the finest in the colonies), City, Wain's, Criterion, Prince of Wales, the Universal, the Sussex and 44 others. The settlement of Otago was projected in 1846; and under the auspices of an association of members of the Free Kirk of Scotland, Dunedin was founded in 1848. The Jubilee of the town was celebrated on March 23, 1898, the city being *en fête*. An official reception was tendered to His Excellency the Governor. From the exclusive nature of its first settlers, and the natural difficulties to be overcome in a new country, it made little progress till 1861, when gold-fields of extraordinary richness were discovered at Gabriel's Gully, near the site of the present town of Lawrence, about 60 miles from Dunedin. Crowds of diggers poured in from all parts of Australia, and from that date Dunedin became a scene of busy industry. The dredging industry has made immense strides and added largely to the wealth of the inhabitants; companies with a nominal capital of over two-and-a-half millions have been floated to work claims in Otago and the west coast, and the capital of the dredging companies varies from £26,000 to £1,150. There are three stock exchanges; the senior one has purchased a splendid pile of buildings known as the Colonial Bank, but henceforth to be known as Stock Exchange Buildings. Its streets are paved, and well lighted with gas. It is supplied with water from a reservoir constructed at the head of the Water of Leith Valley (about 2 miles distant), and from a second and larger one (finished in 1882) which draws its supply from the Silverstream. During recent years large numbers of substantial buildings have been erected, giving an air of permanency and wealth to the business portion of the city. There are three Episcopal churches: All Saints, St. Paul's Cathedral, and St. Matthew's, five Presbyterian churches, two Wesleyan Methodist, a Baptist, Jewish Synagogue, three Congregational and Christian Disciple churches, besides the Roman Catholic cathedral (St. Joseph's), of which the nave and aisles have been completed, and are now in use. Anglican and Roman Catholic Bishops have Sees here, and the Salvation Army provincial head-quarters. In addition to the Model and Normal schools, connected with the Teachers' Training College, there are seven district State schools, boys' and girls' High schools, University, several private colleges, and an Athenæum and Mechanics' Institute with 1,600 vols. There is a Masonic hall, and each of the two orders of Oddfellows have halls. There are two theatres, the Princess's and the Alhambra, with separate entrances in High and Stafford Streets; and the Agricultural, Victoria, Choral, and Garrison Halls, and other smaller places of amusement.

RESERVES.—For outdoor recreation there are the old race-course at St. Kilda, near the Ocean Beach; the new race-course at Wingatui, Taieri, 8 miles SW.; the Caledonian Grounds, on the Anderson's Bay road, the Carisbrook grounds, the Oval, the Northern Recreation, Tahuna Park, athletic, and other grounds. There are also Botanical and Acclimatization Societies' Gardens, Jubilee Park, Queen's Triangle, market, museum, and other reserves planted with trees. The Ocean Beach, about two miles from the city, to which tram cars run every few minutes. The city is encircled by a reserve of 500 acres, called the Town Belt, through which is a carriage drive, known as the Queen's drive, affording views of the most diversified and romantic scenery.

PUBLIC BUILDINGS.—Banks: Australasia, National, N. S. Wales, New Zealand, and Union. The Bank of New Zealand is a very fine building; it is built of Port Chalmers and Oamaru stone, and occupies a commanding position at the corner of Princes and Rattray Streets. The City Corporation, A.M.P. Society, New Zealand Government Life Insurance, Standard, and the New Zealand and Colonial Mutual Insurance Companies have very fine offices. The hospital is one of the largest in New Zealand; it has 7 wards and 125 beds, nurses' home, operating theatre, &c., and is contained in an enclosure of five acres. The new High School, opened in February, 1885, is one of the finest buildings in the city, having a tower 68 feet high. The University, erected on a site of eight acres of ground, has a library of 4,000 vols., a school of medicine and geological equipment, as well as the usual professional staff; the museum in connection with the University consists of a hall 90 feet long by 45 feet broad, with two galleries and an extensive basement, to which has recently been added an Art Gallery and a large room containing a considerable number of fine specimens of Maori carving, secured to the city at the close of the New Zealand Exhibition of 1890. The Museum is enriched with upwards of 6,000 specimens of natural history. High schools (boys and girls), Government offices, supreme court, and custom house. The First Knox and Presbyterian churches, St. Patrick's cathedral, and the Roman Catholic convent, with their white and solid masonry, lend a pleasing aspect to the view.

The Union Steamship Company, whose headquarters are in Dunedin, run a regular line of steamers between Dunedin, Sydney, and Melbourne, and communication is frequent between all the ports on the coast of New Zealand. Vessels drawing 19 feet can be brought to the wharves through the opening of the new Victoria Channel (from Port Chalmers). This channel, deepened to nearly 16 feet at low water, which is about 22 feet at the top of high tide, is well defined with buoys and beacons. The largest vessels of the Union S.S. Co. can be brought up to the Rattray Street Wharf.

Several manufactories are in existence, the most important being the Mosgiel woollen factory, and Messrs. Ross and Glendining's woollen factory at Roslyn, in both of which superior cloth and woollen goods are made; both these are lit with the electric light. There are also large meat refrigerating works, chemical works, soap and candle factory, several foundries, flour mills, boot and clothing factories.

The suburbs of Dunedin are Anderson's Bay, Caversham, Mornington, Roslyn, Maori Hill, North East Valley, Ravensbourne, South Dunedin, and St. Kilda. Nearly all of these are separate municipalities, with mayor and councillors. Caversham is distant 1¼ mile S. from Dunedin, and is a favourite place of residence for merchants and others engaged in the city. It has a council chamber, a good and convenient railway station, a school, five churches, four hotels, and extensive suburban gas works. Lines of railway connect the city with Christchurch on the north, and Invercargill on the south. From this main and trunk line there are numerous off-shoots. The suburbs of Roslyn and Mornington are connected with the city by cable tramways. Dunedin has a very complete tramway system, worked by horses, which, passing through the entire length of the city, connects it with the North East Valley, borough and adjacent townships to the North, with Caversham, St. Kilda, and South Dunedin boroughs to the South. The Corporation comprises a mayor, and three councillors for each of the four wards, South, High, Bell, and Leith. There are three postal deliveries daily in the central and business localities, and two to other parts. By way of protecting the city, batteries have been erected on two prominent headlands at the Ocean Beach, and a third battery at Otago Heads. The general exports during 1899 amounted to £2,273 875; the imports, £2,149,567. The population of the borough of Dunedin, census 1896, was 22,815; males 10,586, females 12,229; in suburbs, 24,465; males 11,686, females 12,779. In 1900 the population was estimated at—city, 23,600; with suburban boroughs, 49,500. The daily papers are the *Otago Daily Times* and the *Evening Star*; the weeklies are the *Otago Witness* (published at the *Daily Times* office), *Christian Outlook*, *Budget*, *Otago Workman*, *Farmers' Circular*, and the *New Zealand Tablet*, the latter being in the Roman Catholic interest; and monthly, *Katipo*.

DUNKELD. *See* BEAUMONT.

DUNSANDEL (43° 42′ S. lat., 172° 13′ E. long.), a post town on Selwyn River, with money-order office, savings bank, telegraph and railway station, in the co. of Selwyn and the riding of Ellesmere (Canterbury prov.), 25 miles S. of Christchurch. It is a station on the Christchurch and Ashburton line, fares, 3s. 2d. and 2s. 2d. Hotel: the Dunsandel. There is a public school and Anglican church, Presbyterians, Wesleyans, and Salvation Army meet in Town hall. Farming district. Population of town, 153.

DUNTROON (44° 45′ S. lat., 170° 34′ E. long.) (Waitaki and riding of Otekaike, Otago prov.), a post town with money-order and telegraph office, savings bank, and railway station, 28 miles NW. from Oamaru, with which latter place it is connected by a branch rail, fares, 4s. 10d. and 2s. 5d. The Maerewhenua river joins the Waitaki about one mile from the town. Hotels: Terminus and Duntroon, three stores, public school, Presbyterian and English churches, branch of the National Bank of New Zealand, and library. Formation: principally limestone. Agricultural and pastoral district. Population, 300.

DUVAUCHELLE (Canterbury prov., Akaroa co., Wainui riding), 48 postal miles from Christchurch, reached by coach, rail and steamer, 170 miles S. of Wellington. It has post and money-order offices, and savings bank, and telephone station, one hotel, State school, Anglican and Presbyterian churches, and county council and Road Board offices. Magnificent harbour and mountain scenery. Dairying, sheep-farming and fishing. Population, 89.

EALING (44° 1′ S. lat, 171° 30′ E. long.) (Canterbury prov., Ashburton co., and included in the two ridings of Rangitata and Ashburton). It has a railway, telephone, and postal station combined, State school, and a church, and is 72 miles from Christchurch. Sheep farming. Population, 12.

EAST OXFORD. *See* OXFORD EAST.

EASTTOWN. *See* ARAMOHO.

EDENDALE (46° S. lat., 169° E. long) (Southland, co. and riding of Waihopai), a post town, with money-order office, savings bank, telegraph and railway station, 23 miles from Invercargill, 116 from Dunedin. Daily mail. Coach runs to Wyndham. Has hotel, cheese and butter factory, school, in-

stitute, and Presbyterian church. District is agricultural. Population of district, 500.

EKETAHUNA (40° 28′ S. lat., 175° 30 E. long.), a post town with money-order, savings bank, telegraph and telephone offices on the river Makakahi, county of Eketahuna (Wellington prov.), on the main road between Wellington and Napier, 91 (93 postal) miles NE. from Wellington, and 32 miles from Masterton, N. There are four hotels, Eketahuna, Ranfurly, Club and Railway, besides a temperance hotel, stores, and a public school; a branch of Bank of New Zealand; Wesleyan, Anglican and Roman Catholic church There is a public reading room, with subscription library of 300 vols., Masonic, Foresters', and Oddfellows' lodges, cottage hospital, several creameries, Farmers' Club, and two carriage factories. The railway fares from Wellington 11s. 8d. and 7s. 9d. It is the second township in the Forty Mile Bush. The district is largely pastoral, and the soil is adapted to market gardening pursuits. Dairying industry has greatly developed, the butter taking high place in Sydney and London markets. The mountain scenery in the district is remarkably beautiful. Population, 476; district 2,158. Newspaper: *Eketahuna Express*, Tuesday, Thursday, and Saturday.

ELLERSLIE (Manakau co., Tamaki riding, Auckland prov. dist.), a post town with telegraph, money-order office, savings bank, and railway station, 5 miles from Auckland. Height above sea-level, 115 feet. Racecourse, two hotels, one public school, social club, Anglican and Presbyterian churches; is lighted with kerosene. Water from tanks and wells. Lake St. John and caves in vicinity. Formation: volcanic. Daily mail. Population, 500.

ELLESMERE (Selwyn co., Lincoln riding, prov. Canterbury), a post town on the Selwyn, with money-order office, telegraph, savings bank and railway station, 21 miles from Christchurch; fares, single, 2s. 9d. and 1s. 10d.; return, 5s. 6d. and 3s. 8d.; rail to Blyth, steamer to Wellington. Daily mail. There is a public school and Anglican church. District is agricultural. Population about 350.

ENFIELD, Otago prov. (Waitaki co. and riding of Waiareka), a post town with telephone bureau and railway station, 8 postal miles from Oamaru. Has State school, Presbyterian church, Oddfellows' lodge, and creamery. Agricultural and pastoral district. Population, 250.

ETTRICK (Tuapeka co., and riding of James), 89 postal miles N.W. from Dunedin and 30 miles N.W. from Lawrence, on Benger Burn. A post town with telephone station. Conveyance per rail and coach *viâ* Lawrence. Has hotel, Wesleyan church, Bank of New Zealand visits weekly, and Government school. Mining. Agricultural and pastoral. Good fishing and shooting. Dredging carried on. Population, 69.

FAIRFAX (46° 25′ S. lat., 168° 20′ E. long.) (prov. dist. Otago, Wallace co., and riding of Aparima), 27 miles NW. from Invercargill, *viâ* Thornbury, a town on Jacob's river, with post, money-order, savings bank, and telephone office and railway station on the Riverton-Nightcaps branch. Good angling in the river. Has hotel: Shamrock; Presbyterian church, State school, dairy factory, several shops, and saw mills. Good fishing and shooting. Agricultural and pastoral district. Formation: limestone. Population, 200.

FAIRFIELD (Otago prov., Taieri co., and riding of Kaikorai), 7 miles S. from Dunedin. Conveyance per rail to Abbotsford. Hotel: Coach and Horses. A post township with school. Mining and agricultural district. Population of district, 200.

FAIRLIE (Canterbury prov. dist., Mackenzie county, and riding of Fairlie), a post town, with money order office, savings bank, telegraph and railway station, 39 miles from Timaru; fares, 5s. and 3s. 4d.; return, 10s. and 6s. 8d.; terminus of railway for tourists to Mount Cook. Height above sea-level, 996 feet. Has two hotels, brick, fireclay and lime works, Oddfellow and Masonic lodges, Government, Roman Catholic and private schools, and Presbyterian, Anglican and Roman Catholic churches. District is agricultural and pastoral. Population 730, riding 1,800.

FEATHERSTON (41° 3′ S. lat., 175° 7′ E. long.) a post town with money-order and telegraph office, savings bank and railway station, is in the county of Wairarapa South, riding of Featherston, (Wellington prov.). It was laid out in 1854. It is on the Te-Wharepouri Creek. It is distant 50 postal miles from Wellington. It is in railway connection with the capital, two through trains daily; fares, single, 6s. 6d. and 4s. 3d.; return, 13s. 8d. and 8s. 8d.; Coaches run to Martinborough (12 miles) daily, fare, 2s. 6d., thence to Lower Valley (25 miles), fare, 10s. The hotels are the Royal and Empire; the latter is opposite the railway station. There are several stores, two banks, New Zealand and Australasia, a Government school, and Episcopal, Wesleyan, and Roman Catholic places of worship. Masonic and Oddfellows' lodges. Other institutions and buildings are courthouse, police station, new Oddfellows' hall, public hall, and Literary Institute, with library of 2,000 vols. Water supply is from wells, and reservoir on hill for the railway station. Gold has been found in the vicinity. Industries: butter and cheese making and flax factory. The Tauherinikau River is about 3 miles from Featherston and flows across the valley into Lake Wairarapa. Agricultural and pastoral district. Population of town district (census 1896), 718. Branch office, *Wairarapa Standard*.

FEILDING (40° 15′ S. lat., 175° 25′ E. long.), a post town with money-order and telegraph office, savings bank, telephone exchange, near the Oroua river (Oroua co., Wellington prov.). It is a station on the New Plymouth, Napier, and Wellington line, and is 51 miles SE. from Wanganui, fares, 6s. 7d. and 4s. 4d.; return fare double; 99 postal miles from Wellington, fare, 12s. 8d. and 8s. 6d., and 35 miles from Foxton. There are four hotels: Denbigh, Manchester, Empire, and Feilding; branches of the Banks of New Zealand, New South Wales, and Australasia; Church of England, Wesleyan, Presbyterian, Primitive Methodist, Roman Catholic, Plymouth Brethren, Salvation Army, and Christian Brethren places of worship; State and private schools, steam flour and saw-mills, two sash and door factories, about fifty stores, bacon, butter, and cheese factories, and steam flour-mill. The Assembly Rooms and Volunteer Drill Shed are fitted with all necessary stage appliances for theatrical performances; free public library and reading room. Societies and Lodges of Foresters, Oddfellows, Good Templars, and Masons, and all kinds of sports clubs. Feilding is the head-quarters of the Colonists' Land and Loan Corporation, and the principal and central town of the Manchester block: it is named after General Feilding. Lighted with gas. The Corporation, in 1872, bought 106,000 acres in the district, calling the estate the Manchester Block, and settled large numbers of immigrants upon it. Coaches run to Kimbolton, Waituna West, Awahuri, Rongotea, Makino, Waituna, Rangiwahia, and other small farm blocks. Farming and grazing district. Timber, wool, beef, mutton, cheese, and butter are the exports. As the timber is cleared grazing and farming are developing. Population 4,500, county 7,000. Newspaper: *Feilding Star* (daily).

FERN HILLS (Southland co., and riding of Winton, prov. dist. Southland). A village settlement, 30 miles N. from Invercargill, with post-office, State school, Presbyterian church, and hotel. Agricultural and pastoral district. Industry: saw-milling. Harrington's (1 mile) is nearest railway station. Formation: low limestone hills, alluvial plain. Population about 200.

FITZROY (39° S. lat., 174° E. long.) (Taranaki co., Waitara West riding), 2 miles from New Plymouth and 1 mile from Smart Road railway station. A post town with money-order office, telegraph and telephone station, public school, bacon factory and Anglican church. Drum and fife band. Lighted with kerosene. New Plymouth Water Supply Works. Agricultural and pastoral district. Population about 300.

FORDELL (40° S. lat., 175° E. long.) (Wanganui co., and Purua riding, prov. Wellington), a post town with money-order office, savings bank, telegraph and railway station, on the Wanganui-Longburn Junction line, 13 miles from Wanganui, 138 N. from Wellington. There is one hotel, a school, library, sports clubs, Anglican and Presbyterian churches, and preserved milk factory. Lighted with kerosene. Water from artesian well. District is agricultural and pastoral. Population, 600.

FORTROSE (Southland co. and riding of Toitoi), a post town with money-order office, savings bank, and telephone station 147 miles S.W. from Dunedin and 48 postal miles S.E. from Invercargill, at the mouth of the Mataura river, about six miles from the Waimahaka railway station. School and harbour. Fortrose hotel and temperance hotel, and Presbyterian church. District is agricultural and pastoral. Population, 140.

FOXTON (40° 25′ S. lat., 175° 10′ E. long.), a municipal and post town with telegraph station, savings bank, and money-order office (co. and electorate of Manawatu, Wanganui police district, prov. of Wellington) 104 postal miles from Wellington, 84 rail miles from Wanganui (by road 75 and 50 respectively), and situated on the right bank of the Manawatu, a tidal river navigable for small steamers for 25 miles from its mouth. There is rail communication daily and steamer four times a week with the capital, steamer fare, 15s. A line of railway starts from Foxton, and runs northward along the coast to Waitara. The junction of the through line to Wellington is at Longburn, but a road connects Foxton with the line to Wellington, at a point about 65 miles from Wellington. Hotels: Foxton, Manawatu, Post Office, and Family. Small steamers travel from the wharf 20 miles up the river at intervals. The New Zealand Bank has a branch here. Episcopal, Presbyterian, Roman Catholic and Primitive Methodist places of worship, a public library, and a public school. Government buildings: railway station, M. Court (meets monthly), police station. Foxton is the shipping port for the Manawatu county, and has a substantial wharf connected with the railway; about ten flax mills are working. There is a very large area of green flax. Population of borough, 1,160. Newspaper: *Manawatu Herald*.

FRANKTON JUNCTION (38° S. lat., 175° E. long.) (Waikato co., Hamilton riding, Auckland prov.), 84 rail miles from Auckland, railway station on the main trunk line. Single fares, 10s. 9d. and 7s. 2d.; return, 21s. 6d. and 14s. 4d. Height above sea-level, 124 feet. Daily mail. It has a post, telephone and telegraph office, one hotel, and a gun club. Population about 90.

FRASERTOWN (39° S. lat., 177° 50′ E. long.) (Wairoa co., Waikaremoana riding, Hawke's Bay prov.), 75½ miles from Napier, a post town with telephone station. Has hotel, State school, Anglican (one Maori) churches, and public library. Lake Waikaremoana, hot springs, Te Reinga Falls, and Maru Maru caves in district. The Government is constructing a road from Rotorua to the lake. Population, 150; district, 465.

GEORGETOWN or UXBRIDGE (Waitaki co., prov. Otago), 18 miles N. from Oamaru, on the Duntroon branch line. Fares, 2s. 4d. and 1s. 7d. Hotel: Georgetown. A post town with telephone station, school in which religious services are held. Agricultural and pastoral district. Height above sea-level, 287 feet. Population, 80.

GERALDINE (44° 4′ S. lat., 171° 17′ E. long.) in Geraldine co., riding of Raukapuka, and Canterbury prov.

district, with a post, money-order, savings bank, telephone and telegraph office, 23 miles from Timaru, and 86 miles S.W. of Christchurch, on the Waihi River. Healthful, pretty, and good agricultural and pastoral district. A coach runs to the Orari railway station, 4½ miles distant, to meet each train, coach fare, 1s. 6d.; rail (81 miles) fare to Christchurch, 10s. 3d. and 6s. 10d. Also coach to Woodbury, fare, 1s. 6d. There are three hotels: Geraldine, Crown, and Commercial, Bank of New South Wales, a Government school, five places of worship, English, Presbyterian, Primitive Methodist, Catholic, and Salvation Army, Masonic and Oddfellows' lodges, several stores, aerated water factory, and the usual Government buildings. Water from wells, tanks, &c. Population (census 1896) of town, district and suburbs, 841, now 960; county, 7,497. Newspaper: *Geraldine Guardian*.

GISBORNE (38° 45′ S. lat., 177° 59′ E. long.), the capital of the Poverty Bay district, and of Cook county, prov. dist. of Auckland, electorate Waiapu, police district, Hawkes Bay, is situate on the rivers Turanganui and Taruheru, which are spanned by fine bridges. The town, which is a post-town with money-order, savings bank, telegraph office, and telephone exchange, is 300 postal miles distant from Auckland, 270 postal miles from Wellington, and 86 postal miles NE. of Napier. There is steamer communication north and south twice a week, two lines of steamers running to the port. Handsome Supreme Court house. There are a number of fine buildings in the main street, Gladstone Road. Several good hotels. Banks: Bank of New Zealand, New South Wales, Union, and Australasia. The principal Insurance Companies have agents. Government and Roman Catholic Schools, and a district High School. Public library. Reading-room, and museum. Churches: Anglican, Roman Catholic, Presbyterian, Wesleyan, Seventh Day Adventists and Brethren. The hospital is a fine well kept building. Gisborne is the centre of a fine pastoral and agricultural district, the chief staple products being wool, frozen mutton, tallow, maize, grass-seed, and honey. Nelson Bros. have a large freezing works on the banks of the Taruheru, the meat being carried in barges to the ocean steamers in the roadstead; and the Gisborne Freezing Company owns works opposite the wharf, having turned the Harbour Board's buildings into freezing chambers. The principal thoroughfares of the town are planted with trees. Gladstone Road is one of the finest avenues in the colony. There are three halls for theatrical purposes: Theatre Royal, Academy of Music and City Rink. The town is lit with gas. Coaches ply to and from the country townships. Railway to Auckland has been commenced, and has reached Osmond. It was near the site of this town that Cook landed in October, 1769. In the cemetery, a short distance from the town, is a monument to the victims of the Te Kooti Massacre in November, 1868. A large population is now located in the suburbs of Kaiti and North Gisborne. Indications of petroleum have been found. There are two dairy factories, the district being highly suitable for dairying. Tourists will find at Te Arai (8 miles) a Maori church, containing some splendid carving. At Nuhaka (30 miles) and Waipiro (40 miles) hot springs have been discovered with wonderful curative properties, and roads to open them up have been constructed by Government. Exports, 1899-1900, 21,720 bales wool, 3,250 casks of tallow, beside grass, seed, maize, and other cereals. Value of ratable property, Cook county, £2,884,871; Waipu county, £848,969. A strong movement is on foot to establish district light railways. Population, town and suburbs, 3,826. The only daily newspaper is the *Poverty Bay Herald*, evening, established 27 years.

GLADSTONE (Southland district, Gladstone municipality), on the Waihopai river, a municipality of about 240 acres, one mile from Invercargill by tram. Has district school, Anglican church, and hotel, the Waihopai. There are 60 dwellings. The annual value of property is £2,750, and the population 380.

GLENAVY (WAITAKI) (44° 56′ S. lat., 171° 9′ E. long.), a railway station, with post, money order, savings bank, and telegraph station, in the co. of Waimate, riding of North Waihao and Canterbury provincial district, 138 miles S. from Christchurch; fares, 17s. 4d. and 11s. 7d., and 38 miles from Timaru. It is on the river of the same name, and has one hotel, two public schools, three shops, and blacksmith. Township is called Glenavy; half a mile from the river, which is spanned with a substantial and costly bridge. Water from Waihao Supply. There is good fishing in the river. Population of riding, 875.

GOLDSBOROUGH (Westland co. and prov. dist., and riding of Arahura), a post town with money-order office and savings bank, and a telephone station, 10½ miles from Hokitika, on Waimea Creek. Daily mail. Has four hotels, National Bank, Government school, Oddfellows' lodge, Anglican and Roman Catholic churches. Lighted by kerosene. Mining district; population 250.

GORE (46° 2′ S. lat., 168° 50′ E. long.) is a post town with savings bank, money-order, and telegraph offices, and railway station on the Invercargill and Clinton line, and lies 40 miles NE. of Invercargill, fares thence, 6s. 8d. and 3s. 4d.; from Dunedin it is 100 postal miles SW., fare, 16s. 8d. and 8s. 4d. Hotels: Gore, Southland, Club, Albion, Provincial, Criterion and Temperance. It is situated on the plain, on the west side of the Mataura river, at the confluence of the Waikaka, and is in the co. of Southland, and electorate of Mataura. There are three banks, Australasia, New South Wales, and New Zealand; Athenæum, two public schools, stores, dairy factory, fellmongery, meat-preserving factory, a steam flour-mill and agricultural implement works. Among important buildings are the Town Hall, Oddfellows' hall, Masons' hall, grain stores, breweries, fire brigade station, dairy factory (Gore cheese taking the first prize at Adelaide and Melbourne Exhibitions), meat preserving factory, two large horse bazaars, Church of England, Wesleyan, Roman Catholic and Congregational churches, Salvation Army barracks, court-house, and brick stores. The chief streets have been asphalted, and the town is lighted by electricity. Among social institutions, including Masonic, Oddfellows', Druids', and Orange lodges, are A. and P. Association, Farmers' Club, Volunteer company, and fire brigade. It is connected by rail with Lumsden. East Gore (or Gordon as it was called) is an offshoot of Gore, on the east side of the river, and is growing. It has several hotels, stores, and a Presbyterian church. Area of borough 500 acres, 600 dwellings, annual value of property was £24,479. Near here are several coal pits. Agricultural and pastoral district, but chiefly agricultural. Is the centre of a large and important gold dredging industry, other descriptions of mining being pursued in the surrounding districts. Population of borough (census 1896) was 2,032, now about 3,800. Newspapers: the *Mataura Ensign* (tri-weekly) and *Southern Standard* (twice weekly).

GRAHAMSTOWN. *See* THAMES.

GREATFORD (Wellington prov., Manawatu co. and Porewa riding), postal district with a railway and telegraph station, 38 miles from Wanganui. Fares 4s. 10d. and 3s. 3d. Height above sea-level, 341 feet. Has one school and Anglican church. Agricultural and pastoral. Population of district, 300.

GREEN ISLAND (45° 54′ S. lat., 170° 31′ E. long.), in the co. of Taieri, and provincial district of Otago, has all the usual facilities of post, money-order and savings bank offices, and has stations on the Dunedin railway, at Abbotsford and Burnside, about 1 mile distant from each other. Two Hotels. It lies on the Kaikorai, 5 miles SW. from Dunedin, and has an area of 103 acres, with 148 dwellings, and property of annual value of £2,861 in the municipality. There are stores and tradesmen's shops, a good school, Presbyterian, Primitive Methodist, Plymouth Brethren, Baptist, and Episcopal places of worship, and a Christadelphian Society. Among the industries are flour-mills, and fellmongeries, with tanneries in connection, sulphuric acid, meat freezing, and dye works, steel and iron works, coach building factory, biscuit factory, glue factory, rug and wool mat factory, ham and bacon curing factory, and Dunedin City Abbatoirs. There is the volunteer hall, a Protestant Alliance Society, Orange lodge, working-men's club, a lawn-tennis and bowling club, with a fine lawn and bowling green at the north end of the township, on the main south road. A public library is in connection with the school. A dairy-farming district, but coal-mining is the industry. Pits in work are Green Island, Saddle Hill, Abbotsford, Walton Park, and Fernhill Coal. The well-known sea-bathing township of Brighton, distant 9 miles SE. from Green Island (the road to which branches off from Green Island) is largely patronised in the summer months. Brighton has one hotel. Formation: sandstone and carboniferous deposits. Population of borough (census 1896), 663, now about 680.

GREY LYNN (NEWTON), a suburb of Auckland, from which it is distant 1½ miles, and with which there is tram and 'bus communication. It has a savings bank. It is a municipal town, and there are 620 dwellings; Primitive Methodist, Church of Christ, Roman Catholic, Salvation Army, Seventh Day Adventists, and Plymouth Brethren places of worship. Town lighted with gas. Has tanning and soap factories, fellmongeries, bone-crushing, and blood-boiling mills, &c. Western Park in vicinity. Area 900 acres; 548 ratepayers; rate, 1s.; annual value of ratable property, £17,338. Formation: clay subsoil. Population of the borough, 2,600.

GREYMOUTH (42° 25′ S. lat., 171° 9′ E. long.), a seaport, gold-fields town, with money-order, savings bank and telegraph office, (prov. Westland, county and electorate of Grey, police district of Westland), 24 miles N.E. of Hokitika, and 175 postal miles from Nelson, on the southern bank of the Grey river (Maori name Mawhera), the boundary between Westland and Nelson. A telephone exchange has been established, being the first town on the west coast to obtain one. It contains numerous and substantial stores, a hospital with 48 beds, a literary institute, and a few public buildings, including a Masonic hall, a court-house, customs house, county council chambers, four churches—Episcopalian, Presbyterian, Roman Catholic, Wesleyan and Salvation Army, and branches of the Bank of N.S. Wales, Union Bank, Bank of New Zealand, and National Bank of New Zealand, and several insurance agencies. There are numerous hotels, of which Gilmer's the Albion, Brian Boru, Club Hotel, Post Office Hotel, and Ashton's Family are the principal. Schools: Public and Roman Catholic. Fire Brigade here. Clubs: Athletic, Trotting, Jockey, and Cricket. The streets are lit with gas. There is communication twice daily with Hokitika by train, a daily train service to Reefton, and a tri-weekly train to Otira, thence by coach to Springfield Railway Station for Christchurch. The first sod of the Midland Railway to connect Greymouth with Christchurch on the East and Nelson on the North was turned on Jan. 24, 1887. The railway to Reefton is completed, and two trains a-day are run. For municipal government the town is divided into three wards, East, West, and Middle, each returning three councillors. The district is all more or less auriferous. Some valuable finds of gold have been made at Seventeen Mile Beach, to the north of the River Grey. There are extensive agricultural settlements in the valley through which the Grey river flows; and 7 miles from the port there are several coal mines, to which the Greymouth and Brunner and Midland Railways give access. In fact, Greymouth is the "Newcastle of New Zealand," and is famed for the quality of its coal, especially for steam and gas purposes. At present there are two mines at work, viz., the Brunner and Blackball. This industry

is being developed rapidly in ratio with the improvement of the harbour. Besides coal, coke, fireclay, firebricks, gas retorts, and fire goods of every description are manufactured at the Brunner mine. With the view of improving the navigation, extensive harbour works have been carried out. The improved harbour approaches are doing much to develop the coal industry. The timber trade has received a large impetus by the Midland Railway extension, and several new mills have been erected in the district. General exports from province, 1899, amounted to £345,809. Population of borough, census 1896, was 3,205; county, 4,592. Newspapers: the *Argus* (daily and weekly) and the *Star* (evening).

GREYTOWN (North) (46° 1′ S. lat., 170° 18′ E. long.), a post town, with a money-order, savings bank and telegraph office, named after Sir Geo. Grey (co. and elect. of Wairarapa, prov. district of Wellington), 7 miles from Featherston, 15 miles from Masterton, 58 miles (postal) NNE. of Wellington, on the Waiohine river. It is a station on a branch of the Wellington and Napier line; two through trains daily, fares, 8s. 9d. and 5s. 10d. Hotels: the Greytown, Foresters' Arms and Club. There are Episcopal, Catholic, Presbyterian, and Wesleyan chapels in the town, also branch of Bank of New Zealand, town-hall, council chambers, court-house and police station, Masonic, Oddfellows', and Foresters' halls, working men's club-house, literary institute, with reading room and library, a hospital, a State school, Maori Pah, three coach factories, cheese and butter factory, soda-water factory, steam sash and door factory. Lodges of Masons, Oddfellows, and Foresters are held here. Has thoroughly equipped fire brigade, racecourse, and trotting club. Lighted with kerosene. Greytown (North) is a very beautiful and picturesque spot. The valley in the Tararua range abounds in game, such as deer, pheasants, and pigeons; whilst the rivers have been supplied by the Wellington Acclimatization Society hatcheries with several kinds of the finest trout. The district is also a health resort. Formation: alluvial and drift. Agricultural and pastoral district. Population of borough, 1,500. Newspaper: *Wairarapa Standard and Featherston Advocate* (established 1866).

HALCOMBE (40° 10′ S. lat., 175° 19′ E. long.), a post town on the Rangitawa creek, with money-order, savings bank office, and telegraph station, in co. Oroua, Waituna Riding and Wellington prov. district, 108 miles NE. of Wellington, and 44 miles SE. of Wanganui, with which it is connected by rail, three trains daily, fares, 5s. 7d. and 3s. 9d. Hotel—Halcombe. It is built on part of the Manchester Block. Churches—Presbyterian, Catholic, Anglican, Methodist, Danish, Lutheran, a State school, Foresters' lodge, Band of Hope, rifle and chess clubs, and an agency of the Bank of New Zealand (open Tuesdays only). Agricultural and pastoral district. Population (principally Germans) of town district, 300; of riding, 1,589.

HALF-MOON BAY (Stewart Island co., prov. of Southland), 41 postal miles S. from Invercargill. A post town with money-order and savings-bank office. Has State school, boarding-houses, and two churches, court-house, and lock-up. Steamer to Bluff, rail to Invercargill. Agricultural district. Fishing and saw-milling. Formation, granitic. Population about 250.

HALKETT (prov. dist. Canterbury, Selwyn co. and riding of Courtenay), a post town, 18 miles from Christchurch, and 4½ miles from Aylesbury. Has State school and Anglican and Presbyterian churches. Agricultural and pastoral district. Population 250; of riding, 2,491.

HAMILTON (38° 10′ S. lat., 175° 12′ E. long.), a post town, with a telegraph station, money-order office, and savings bank (co. Waikato, on the Waikato River, prov. Auckland), 86 miles S. of Auckland. Anglican, Presbyterian, Wesleyan, Roman Catholic and Salvation Army places of worship, a public library and reading-room, branch of the New Zealand Bank, two public halls. The district hospital (37 beds), public baths built by the Borough Council, and cattle sale yards, in which sales are held once a month, public schools at Hamilton West and Hamilton East. M. Court and police station. It is most centrally situated, being at the junction of the railway system; the line from Auckland, Cambridge, Thames, Te Aroha, Paeroa, Rotorua, Te Awamutu, and the King country all centring here. The N.Z. Bank, the *Waikato Times* building, Whyte's buildings, are all substantial structures, and present a striking appearance. Four hotels. Hamilton is situated on both sides of the river, and comprises Hamilton East (the old Maori settlement of Kirikiriroa) and Hamilton West. A large iron bridge, completed in 1883, carries the Thames-Hamilton Railway. The Hamilton Traffic Bridge, built in 1880, also spans the river about half a mile above the railway bridge. This bridge joins the two townships of Hamilton East and Hamilton West together. Among the industries carried on here are butter and soap factories, flax mill, and brick and pottery works. There are Lodges of Masons and Amateur Dramatic and other Clubs. It has a fine race-course. There are many fine farms in the vicinity. A township called Frankton has sprung up around the railway junction, which is a little distance from the town; and the line is extended into the town. District, agricultural. Hamilton is lighted with gas. Population of borough (census 1896), 1,248. Newspapers: *Waikato Times* (daily) 1d., and *Waikato Argus* (daily.)

HAMILTONS, or HAMILTON SOUTH (44° 35′ S. lat., 170° 0′ E. long.), a post town, with telephone, savings bank, and money-order office (co. of Maniototo, Puketoi riding, and prov. of Otago), 84 postal miles NW. from Dunedin. One store, accommodation house, public school, courthouse, and public library. Union church and Episcopal ministers visit. The surrounding district is a mining one, and farming is carried on to some extent. Population, 50.

HAMPDEN (45° 20′ S. lat., 170° 50′ E. long.), a municipal borough, with post office, money-order, savings bank, and telegraph office, and railway station on the Dunedin and Oamaru line, on the sea-coast (Waitaki co., prov. dist. of Otago), 56 postal miles NE. of Dunedin (fares 7s. 3d. and 4s. 10d.), and 22 miles S. from Oamaru, near the coast. Coach from Waipawa (daily), 3s. There are here a mechanics' institute, Presbyterian, Roman Catholic, Church of Christ, and Episcopal churches, an agency of the Bank of New Zealand, a public school, Athenæum, and stores. Hotels: Hampden and Clyde. Agricultural and pastoral district. Population of borough, 350; district, 800.

HAMPSTEAD (prov. Canterbury, co. Ashburton and riding of Wakanui), Town Board, with post office, public school, 53 miles SE. from Christchurch, half a mile from Ashburton (to which it is suburban) railway station. Agricultural district. Water by water-race pumps. Formation: Loam, with clay subsoil. Population of district 2,500.

HASTINGS (39° 37′ S. lat., 116° 49′ E. long.), a post town and municipal borough (gazetted Aug. 17, 1886), with money-order, telegraph, and savings bank office, and railway station, on the Heretaunga Plains, in the co. and prov. of Hawke's Bay, 12 miles from Napier, fares, 1s. 7d. and 1s. 1d., and 2½ miles from Havelock. Eight trains daily each way to Napier, one daily to Wellington, 180 miles south. Coaches run to Napier and Havelock. Hotels: The Railway, adjoining the railway station, the Hastings, Carlton, Albert, Lodge, and the Pacific. The river Ngaruroro flows about 4½ miles distant. There are general stores, and agencies of the Bank of New Zealand, New South Wales, and Union Banks, a large gelatine factory—Nelson Bros., refrigerating works, butter factory, brewery, flour mill, bacon factory, coach factories, an Athenæum, a town hall, Protestant, Oddfellows', and Masonic Halls. Places of worship, Anglican, Presbyterian, Wesleyan, Salvation Army, Church of Christ, Brethren, Seventh Day Adventists, and Roman Catholic. Public school, two private schools, R.C. school, and Athenæum library of upwards of 4,000 vols. Lodges of Freemasons, Foresters, Orangemen, Druids, Protestant Alliance, Hibernians, and Oddfellows are here. There is a fine race-course, with grand stand, at which all the principal races of the district are held. Hastings is the centre of a rich agricultural and pastoral district, of about 40 square miles in area, admirably adapted for fruit and viticulture, especially wine making. A branch of the Napier Gas Company has been established, and the town is lit with gas, and extensive drainage works carried out at a cost of £25,000. Water from artesian wells. There are four daily mails to and from Napier, and a daily mail with Wellington and Wanganui. Alluvial limestone soil. Population over 4,000. Newspaper: *Hastings Standard*.

HAUTAPU (38° S. lat., 175° E. long.) (Waikato co., Cambridge riding; Auckland prov.), post district on Waikato river, 7 miles from Hamilton, the same distance from Cambridge, and 98 miles from Auckland, with which it is connected by rail (station 4 miles from post office). Fares 12s. 4d. and 8s. 3d. 250 miles N. of Wellington. There is a school and a cheese and bacon factory. It is a very scattered district. Roads good. Population, about 70.

HAVELOCK (North) (41° 13′ S. lat., 173° 45′ E. long., riding of Havelock), is a post town, with telephone office, in the county of Hawke's Bay, and prov. dist. of Hawke's Bay, on a branch of the Ngaruroro river, and on the main south road, 14 miles SE. from Napier, and 2½ miles from railway station at Hastings, to which a coach runs. 'Bus to Hastings eight times daily. There are two churches, English (St. Luke), and Presbyterian, public school, one hotel, and general stores. The Foresters have a lodge here; a mechanics' institute, with a circulating library. District partly agricultural and pastoral. Considerable attention is being paid in this district to fruit and vine culture. Artesian water supply. Formation, limestone and shingle. Population 400, about 800 in district.

HAVELOCK (41° S. lat., 174° E. long.), co. Marlborough, and riding of Havelock, a money-order, savings bank, post and telegraph township, and picturesque summer resort, 20 postal miles W. of Picton, 27 miles from Blenheim, and 51 postal miles E. from the city of Nelson. Coach runs three times a week to and from Blenheim (fare, 7s. 6d.) and Nelson (fare, 18s.); and twice weekly to Havelock Grove and Havelock Deep Creek; steam service to and from Wellington, Maori Bay, Homewood, Brightlands, and Keku Bay fortnightly. A considerable trade is done in timber, principally obtained from a tract of flat forest country at the very head of Pelorus Sound, on which the town is situated. Tramways are laid, opening up a large tract of forest country. Several quartz reefs have been worked at Wakamarina, Mahakipawa, and Waikakaho. Gold has been found in the Mahakipawa Creek, about five miles distant, in large quantities. Dredging operations are being carried on. Public school. Lodges: Foresters' and Masons. Hotels: Masonic, Commercial, and Post Office, Government buildings: Post and telegraph office and R.M. court in one block, school house and postmaster's residence. Churches: English, Wesleyan, and Roman Catholic. Paper: *Pelorus Guardian*. Population of town district 365.

HAWERA (Taranaki prov. dist.) (39° 35′ S. lat., 174° 12′ E. long.), a borough on the west coast of the north island, with money-order office, savings bank, telegraph offices, and railway station on the Wanganui-New Plymouth line. Fares from Wellington, 15s. 1d. and 10s. 1d.; from New Plymouth 6s. 1d. and 4s. 1d. It is in the county of Hawera, electorate of Hawera, and police district of Taranaki, 20 miles from Wanganui. Several

hotels. Bank of New Zealand New South Wales, and Australasia, a public school, a Roman Catholic convent, Taranaki college (undenominational), 3 private schools, Presbyterian, Wesleyan, Church of England and Roman Catholic places of worship, and Salvation Army barracks, an opera house seating 1,000 persons, Theatre Royal, a court-house, a police station, a public library and free reading room, gasworks, and drill hall. Masonic, Foresters, Oddfellows and Rechabites' Societies. Hawera is surrounded by a large area of very rich land devoted to the dairying industry, of which it is the centre for Taranaki; it is connected with Wanganui by a good coach road, with New Plymouth by a road round the coast, and by another, a shorter one, at the back of Mount Egmont. Cobb's mail coach leaves daily, to Manaia, Otakeho, Pihama, Opunake; also daily communication with Rangataki, Kaponga and Awatuna. Population of borough environs (census 1896), 2,200. Newspapers: the *Hawera and Normanby Star* daily (established 1880), *Egmont Star*, weekly.

HAWKE'S BAY. *See* NAPIER.

HAWKSBURY. *See* WAIKOUAITI.

HELENSVILLE (36° 36′ S. lat., 174° 32′ E. long.), a post town, with money-order, savings bank, telegraph office, and railway station, in county of Waitemata and riding of Helensville, situated on the eastern shore of the river Kaipara. It is the starting point of the Helensville and Auckland Railway: fares from Auckland, 3S (postal) miles distant, 6s. 6d. and 3s. 3d. The line has been extended northward to Tahekeroa. Vessels can enter and clear here, the postmaster acting for the customs. It has a court-house, three hotels—Kaipara, Terminus, and Helensville; Foresters' hall; Episcopal, Wesleyan, and Roman Catholic places of worship; a public school and four stores. There is a Town Board of Commissioners, a public library, a Masonic Lodge. Large quantities of Kauri gum are found in the immediate neighbourhood. Helensville is the headquarters of the Northern Union Steamboat Company, which has four steamers, three being employed in passenger and cargo traffic in the Kaipara Harbour, while the other, the *Sterling*, is employed in towing. Fares to Batley, Pahi, Point Curtis, and Matakohe, 10s. To Ponto (Kaipara Heads), Bailey, Ru Point and Port Albert, 7s. 6d.; return, 12s. 6d. Agricultural and pastoral district. Population of town district, 560.

HENDERSON (Waitemata co., riding of Waitakerei). A township with post office, telephone bureau, and railway station, 13 (postal) miles from Auckland, on the Auckland-Kaukapakapa line. Has hotel, public school, Wesleyan church and public hall. Lighted with kerosene. Mining and pastoral district. Waterfall and forest scenery. Industries: gum digging and fruit growing. Population, 60; of district, 200.

HENLEY (Otago prov. dist., Taieri co., and riding of Otokia), 21 miles SW. from Dunedin, on the Taieri river. Fares 5s. 8d. and 3s. 8d. A post town with telephone station, creamery and dairy factory, school, and public hall. Agricultural district. Hotel: Whitehouse. Population 303

HERBERT (45° 14′ S. lat., 170° 30′ E. long.) It is situate about 1½ miles from river Otepopo; prov. dist. Otago, in the co. of Waitaki, and riding of Otepopo, 65 miles N. from Dunedin on the Dunedin and Christchurch Railway, and 14 postal miles from Oamaru. Fares from Dunedin, 11s. and 5s. 6d., 16s. 6d. and 11s. return. It has a post and money-order office, Government savings bank, telegraph station, and railway station, a district school, Presbyterian and Episcopal churches, an Athenæum, creamery, two general stores, and, at about 10 miles distance, the Otago slate quarry. Coal is found in the vicinity. Glencoe valley is point of interest. Population 401.

HERBERTVILLE (40° S. lat., and 176° E. long., Patangata co., Porangahau riding, prov. dist. Hawke's Bay) a post town, with money-order office, savings bank, and telegraph station, 89 miles from Napier, with which communication in summer is by coach to Dannevirke, fare 20s.; also to Waipukurau, thence rail. Town has hotel and school. District is pastoral. Water from wells. Geological formation; limestone. Population of town, 80; of riding, 600.

HERIOT (44° 59′ S. lat., 168° 52′ E. long.), prov. dist. Tuapeka, co. and riding of James), 103 miles W. from Dunedin, 76 miles N. from Invercargill, on Swift creek, with a railway station on the Tapanui branch. A post town, with money-order office, savings bank, railway and telephone station. Has hotel, library, Roman Catholic church and public school, in which other denominations hold services. Poultry farm, dredging, fellmongery, timber and other industries. Good trout fishing. Mining. Agricultural and pastoral. Water from wells and tanks. Population, of town 250, and district 500.

HIKURANGI (35° 34′ S. lat., 174° 20′ W. long.), co. Marsden, Auckland district, post, money-order, savings bank, railway and telephone station, 109 miles NW. from Auckland, to which rail and steamer four times weekly. Has hotel, State school, church, three Government buildings, public library. Mining and pastoral district. Sawmilling industry. Formation: volcanic and clay. Population of town and district, 300.

HILL'S CREEK. *See* BLACKSTONE HILL.

HINDS (Ashburton co. and riding of Ashburton, prov. dist. Canterbury), a post town, with money-order office, savings bank, telegraph and railway station, 64 miles from Christchurch, on the Christchurch-Dunedin line. Has one school boarding house, Wesleyan church. Agricultural and pastoral. Fares 13s. 4d. and 8s. 11d. Population of district about 200.

HOBSONVILLE (Auckland prov., Waitemata co., riding of Waitakerei). A post town 19 postal miles from Auckland (by steamer, 8 miles), on Waitemata river. Has public school and Presbyterian church: pottery, pastoral, and gum industries. Christian Endeavour Society. sandy and pipe-clay subsoil. Population of town, 139; vicinity, 80.

HOKIANGA COUNTY (35° 32′ S. lat., 173° 31′ E. long.), electorate of Hokianga (Auckland prov. dist.), the northernmost port on the west coast of the North Island, is 177 miles distant NW. from Auckland, and 40 miles from Russell, on the Hokianga inlet. Kohukohu and Rawene are the post towns. Timber of great length and straightness is found some little distance inland, and much of it is exported. A large saw-mill is here. Kauri gum is also largely exported. Deposits of quicksilver have been discovered in the district. Communication is by steamer from Onehunga fortnightly, or overland by coach to Russell, thence steamer. Coach from Kawa Kawa, Tuesdays, 9.15 A.M. Fares, 10s.; return, 16s. Formation: limestone and clay. Population of county, census 1896, was 1,909.

HOKITIKA (42° 41′ 30″ S. lat., 170° 59′ 15″ E. long.), a post town with money-order, savings bank, and telegraph office, is the principal town on the west coast, and the capital of Westland, electorate and police district of Westland, on the Hokitika river, 158 miles (postal) W. of Christchurch. Coaches run to Springfield, railway station for Christchurch, twice a week; to Ross daily, fare 4s.; and to Greymouth daily, fare 13s. The railway to Greymouth (22 miles) was opened by the Premier of the Colony, Mr. Seddon, on May 24, 1893. Hokitika possesses several hotels. It owed its rapid rise to the discovery of productive gold-fields in the vicinity in 1865. The town is well laid-out and substantially built. Banks, New Zealand, Union, N.S. Wales, National; agencies of the principal insurance companies; a hospital, lunatic asylum (Sea View, 113 beds), a gaol, resident magistrate's and supreme courthouse, theatre, Harbour Board, Education Board, Westland County Council, Westland Charitable Aid Board, Chief Surveyor's offices, town-hall, literary society, Westland Institute (affiliated to the New Zealand Institute), School of Mines, and places of worship belonging to the Church of England, Roman Catholics, Wesleyans, and Presbyterians, also a Jewish Synagogue, a good quay, large breweries, tannery, saw-mills, sash and door factories, and gas works. Among the schools are St. Mary's (Roman Catholic) convent school, and the State school. From the lighthouse, situated on the Gaol Hill, there is shown a fifth order fixed white light, visible 16 miles. Mining and agricultural district. Formation: in the mountains, granite, mica, schists, slates, quartz, &c. Lower country, alluvial drifts caused by glacial action, the whole abounding in minerals, and the surface of the land covered with dense forests of valuable timber. Exports from Westland prov. during 1899 amounted to £345,809. Population (census 1896) of borough, 2,064. Newspapers—*West Coast Times*, *Guardian*, and the *Leader*.

HORNBY (prov. dist. Canterbury, county Selwyn and riding of Riccarton, police district of Christchurch), a post-town, with money-order and savings bank office, telegraph and railway station, on the Christchurch-Southbridge line, 6 miles from Christchurch. Has Government school, Baptist and Roman Catholic churches, U.A.O.D. and L.O.L. lodges, and meat-freezing factory. Water from artesian well. District is agricultural and pastoral. Formation: shingle. Population about 200.

HORORATA (Selwyn co., Canterbury prov.), 43 miles from Christchurch which is reached by conveyance to Coalgate, thence rail. A post town with money-order office, savings bank and telephone office, hotel, schools, and Anglican and Presbyterian churches. Orange lodge. Agricultural and pastoral district. Water from wells, pumps and water-races. Population of district, 250.

HOWICK (37° S. lat., and 175° E. long.) (prov. Auckland, Manukau co., riding of Howick), 15 miles from Auckland, to which 'bus daily, and steamboat, 270 miles from Wellington, reach by rail and sea. A township with post, money order office, savings bank, and telephone station. There is one hotel, State school, and one Roman Catholic; 3 Anglican churches, and 1 Roman Catholic, also 1 Presbyterian, Oddfellows' lodge, (6,220), and public library. Beaches, Stockade Hill, and Bleak House are points of interest. District is pastoral and agricultural. Has fishing and fish-curing industries. Population of town, 300; of riding, 1,646.

HUNTERVILLE (40° 3′ S. lat., 175° 30′ E. long.), Rangitikei co. and Paraekaretu riding, prov. dist. of Wellington, a post town, with money-order office, savings bank, railway and telegraph station, 50 miles from Wanganui by rail, and 36 by road. Has two hotels, Bank of New Zealand, State school, Foresters' and Masonic lodges, agency for Government insurance department, Anglican, Roman Catholic, Presbyterian and Primitive Methodist churches, two dairy factories. Magnificent river (spanned by a fine bridge costing £10,000). Lake and mountain scenery. Pastoral district. Population, 800; district, about 3,000. Newspaper: *Paraekaretu Express*.

HUNTLY (37° 49′ S. lat., 175° 10′ E. long.), a post town, with money-order office, savings bank, railway and telegraph station (co. of Waikato and riding of Rangiriri, Auckland prov. dist.), on the Waikato river, 65 miles S. from Auckland. Two trains daily; fares 8s. 3d. and 5s. 6d. Has public and native schools, Presbyterian, Wesleyan, and Anglican churches, hotel, public hall, library, Road Board, and sports clubs, Juvenile I.O.G.T. Principally a coal-mining locality. The coal is good either for steam or household purposes. Pottery and brick works are here. Lake Waikare, a very fine sheet of water, and Waingarva hotsprings are in the vicinity. Maori Kings' Settlement is on western bank of river opposite Huntly. Population, township, 500; of road district, 860.

HUNUA (37° 10′ S. lat., 174° 66′ E. long.), prov. dist. Auckland (Manukau co., Papakura riding), on Wairoa river. It has a railway flag station about 9 miles off, and post office (bi-weekly

mail), and is 21 rail miles from Auckland, on the Auckland-Mercer line. Fares, 2s. 9d. and 1s. 10d. Has two schools, Presbyterian church, and in vicinity waterfalls. Agricultural district, with coal in parts. Population about 200.

HURLEYVILLE, (co. Patea, prov. Taranaki), a post town, with money-order, savings bank and telephone station, 53 miles from Auckland. Has school and butter and cheese factory. Population of district, 400.

HURUNUI (42° 47′ S. lat., 172° 45′ E. long.), a post town, 62 miles N. of Christchurch (co. Ashley, riding of Waipara and Canterbury prov.). It is situate on the Hurunui river, at the Waitaki junction. The capital is reached by railway, from Medbury, four miles distant (fares 7s. 3d. and 4s. 10d.) Hotel: Hurunui. Public school. A traffic bridge spans the Hurunui river. Agricultural and pastoral. Population of village, 60.

HUTT, Lower (41° 10′ S. lat., 175° 5′ E. long.), (so named after Mr. William Hutt, a member of the New Zealand Company), a postal, money-order, savings bank, and telegraph town, and borough, with railway station, in the county Hutt and electorate of Otaki, prov. dist. of Wellington, 8 miles NE. from the capital. The Hutt is connected with Wellington by rail: fares, single, 1s. 3d. and 10d.; 1s. 6d. and 1s. return. Cudby's coaches ply from the railway station to Black Bridge and Taita; fare 6d. and 1s. It is pleasantly situated on the river of the same name, at the head of a deep gorge known as the Hutt Valley, and is a favourite place of resort for visitors from Wellington in the warm weather. It is the oldest settlement in the district, and has several hotels. Bank: New Zealand. A Government school and two private schools are here; also English (St. James), Wesleyan, Presbyterian, and Catholic churches, Oddfellows', Druids and Foresters' lodges, police-station, and a court-house. Town lighted with gas. A fine racecourse is laid out to the left of the river, where it enters Port Nicholson, and the Wellington races are held on this course, which has recently been improved by the erection of new grand stand, lawn, training tracks, &c. One of the sights of the Hutt is McNab's public garden. Farming and grazing locality. Population of the borough (census 1896), 1,520; county, 5,750.

HYDE (45° S. lat., 170° E. long.), a post town, with money-order and savings bank offices and telephone and railway station, in the county of Maniototo, riding of Hyde, and prov. dist. of Otago, 66 postal miles NW. from Dunedin, on the Taieri river. Has public school, a public library, lodge, two hotels—Otago Central, and Hyde, two stores, and several tradesmen. Roman Catholic and Presbyterian churches. Registration district for births, deaths, and marriages. Mining, agricultural and pastoral (chiefly) district, rabbit trapping and packing. Volcanic formation. Population of town and district, 200.

INGLEWOOD (39° 6′ S. lat., 174° 15′ E. long.) (county and prov. dist. of Taranaki and riding of Moa), on the Kurapete river, a post town with money-order office, savings bank, telephone and telegraph station, 17 miles (by Junction Road 12½ miles) SE. of New Plymouth by rail; fares, single, 2s. 3d. and 1s. 6d. It has five places of worship—Episcopal, Wesleyan, Catholic, Primitive Methodist, and Salvation Army, five public schools in the district, Government Life Insurance Department, two hotels, Foresters' Court, Masonic lodge, Rechabite Tent, Glee and other Clubs, Literary Society, Fire Brigade, Horticultural Society, library and reading-room, saw-mill, bacon, butter and two dairy factories, Foresters' hall, parish hall, and athletic hall. It is the chief centre of the dairying industry in Taranaki. Bank of New Zealand, and Bank of N.S. Wales. Coach to Tarata, Junction Road East, thrice weekly, fare 2s. Mount Egmont is three hours distant by good road. Formation: volcanic. Population 1,000. Newspaper: *Record* (twice a week).

INVERCARGILL (46° 35′ S. lat., 168° 50′ E. long.), has post, telegraph, and money-order offices and savings bank, and is the capital of the county of Southland, and the principal town of the southern part of the provincial district of Otago. It is situate on an estuary, called the New River Harbour, about 17 miles inland from the Bluff, about 139 postal miles SW. of Dunedin by sea, and 139 miles by rail; fares first class, 17s. 6d.; second, 11s. 8d. The hotel accommodation is commodious and ample; among the leading ones are the Crescent, Albion, Deschler's, and Southland Club, all handsome buildings, and each furnished with a view principally to accommodate the European and Australian tourist traffic, which increases year by year. The New River estuary is navigable for vessels of 10 ft. draught up to town. The bar is a good one, with 18 feet depth at low water. The gas-works have been extended, street improvements have been made, and a water supply improved. It is served by railways in every direction; by the trunk line to Dunedin and Christchurch, to Kingston on Lake Wakatipu, and by branch lines to Fortrose, Seaward Bush, Riverton, Orepuki, and Nightcaps, and the line to the Bluff. One steamer plies regularly to and from Dunedin, and another between the Bluff and Stewart Island. The principal business thoroughfares are Dee, Tay, and Esk Streets. The banks are represented by the Bank of New Zealand, a fine building of Oreti bluestone, Union Bank, a handsome edifice of Oamaru stone, Bank of Australasia, National Bank, handsome and commodious buildings, and Bank of New South Wales. Several of the denominations have suitable places of worship. The Presbyterians have the First and St. Paul's churches, and besides St. John's Episcopalian church, there is a second Anglican church (All Saints) in the suburb of Gladstone. St. John's has been partly replaced in brick. The town possesses a magistrate's court, and there are also periodical sittings of the Supreme and District Courts. It has also an Athenæum, the finest in the colony, with two reading-rooms and large library, hospital, having six wards containing 54 beds, and a fever ward with six beds, one theatre, four public halls, Hall of Justice, Masonic, Foresters', and Oddfellows' halls, three Masonic lodges, besides lodges of several other societies and numerous athletic clubs. The post and telegraph offices are in the public buildings, which comprise many other Government departments, and have recently been largely added to, and provided with clock and chimes. Five public schools—Central, Park, South, Gladstone, and N. Invercargill—private schools, also boys' and girls' High Schools, and two Catholic schools for boys and girls. Among the larger buildings are the Garrison Hall of brick and cement, steam flour-mills, and large engine shed. Among the industries are three breweries, five foundries, flour-mills (roller), two woollen-mills, rope and twine works, two cordial factories, boot manufactories, and in and around the town, within a radius of 20 miles, there are fully 30 saw-mills in operation. The town, which is well laid out in equal blocks, with fine wide streets, is lighted with gas from works owned by the corporation; it is the most southern town in the world so lit. Street tramways have been introduced and cars are running three miles from town. The district was principally taken up for pastoral purposes; but agriculture is rapidly extending on immense well-watered plains, and is sucessfully carried on by a large number of settlers. The exports principally comprise wool, frozen and tinned meat, and rabbits, grain, cheese and timber, the timber exports especially being extensive, and many factories are at work, or in process of erection in the agricultural centres. An important trade in fresh (frozen) and smoked fish and oysters is carried on with Melbourne. Bacon-curing is also an important industry. The shipments of wool, grain, and frozen mutton have become so large that Bluff Harbour has risen to first rank as a shipping port. The wharves have been greatly extended, and the direct steamers to England regularly visit the port, which is lighted by electricity generated by water from the Bluff Hill. Vessels drawing 29 ft. lie afloat at the wharves. The soil generally is very productive; the climate, although variable, is suitable for the growth of all products common to Great Britain; the Suburban municipalities are North, South, and East Invercargill, Gladstone, and Avenal; each of these has its mayor and councillors. Invercargill is the recognised starting point for visitors to the famed lake district. Wakatipu is visited by the bulk of the tourists, the railway reaching its shores, and the principal town, Queenstown, has excellent hotel accommodation. A large steamer is always available for tourists. Te Anau is a grander and more beautiful lake, two hotels having been erected and a coach service established between the township and the railway. A large number of tourists visit this locality. The Government has formed a tourists' track between Milford Sound and the head of Lake Te Anau, and erected huts at easy distances apart. Tourists can land at Milford and cross the pass, among the grandest Alpine scenery in the southern hemisphere, taking the Sutherland falls (the highest in the world) *en route*. There is a small steamer on the lake. Lake Manapouri, the most picturesque of the group, may be reached by train to Lumsden (50 miles), thence by coach to Te Anau, from which Manapouri is only a few miles distant. A new route for Lake Manapouri has been opened by the Waiau Valley. At Clifden on the Waiau the largest suspension bridge in the Colony has been erected A party of four or more can drive cheaply and expeditiously, either from Invercargill or Otautau railway station to Manapouri, and enjoy varied scenery all the way. The streams of Southland afford the finest trout-fishing in the Southern Hemisphere, and are now regularly fished by anglers from the Australian colonies. An important advantage possessed by the town is its splendid recreation estate, comprising a public park of 200 acres on its northern front, already largely planted and improved, garden blocks of five acres, each in the centre of the town, and fully twenty blocks of land known as the Town Belts situated on all sides, and varying from four to forty acres in area, more or less improved. Exports from port during 1899 amounted to £751,881, imports £258,713. Population of borough and suburbs (census 1896), 9,996; 1900, 10,000. There are two journals, the *Southland Times* and *Southland Daily News*, the former a morning, and the latter an evening publication, *Weekly Times*, *Southlander*, and the *Southern Cross*.

JACKSON'S, (prov. and co. Westland), a post town, with telephone, money-order, savings bank, and railway station. 40 miles from Greymouth. Has two hotels, one school. Pastoral district. Population about 200.

JAMESTOWN. *See* Martin's Bay.

JOHNSONVILLE (41° 9′ S. lat., 174° 52′ E. long.), a post town, with money-order, savings bank, and telephone bureau, co. Hutt, riding of Porirua (Wellington prov. dist.), 6 miles W. from Wellington. It is a station on the Wellington and Manawatu line, fare, 1s. 2d. and 8d. Hotels: Railway and Johnsonville. It has a handsome Episcopal church, Wesleyan, Presbyterian, and Roman Catholic churches, Oddfellows' (M.U.), and Rechabite lodges, literary institute, a public school, a tannery, racecourse, stock sale yards, and several stores and tradesmen's shops. Lighted with kerosene. Pastoral district. Population (census 1896) of town district, 493; of riding, 1,982.

KAEO (35° 10′ S. lat., 173° 50′ E. long.), Auckland prov., Whangaroa co., riding of Kaeo, 174 miles from Auckland, which is reached by coach to Whangaroa, thence steamer. It has a post and money-order office, savings bank, and a telephone station. Has one hotel, two schools, and Wesleyan and S.D. Adventist churches. Oddfellows' lodge. Chief industries timber and kauri gum; copper has been found. Population, 400; district, 600.

KAIAPOI (43° 19′ S. lat., 172° 40′ E long.), a borough, with mayor and nine councillors, has a money-order, savings bank and post and telegraph office; in the provincial district of Canterbury, co. of Ashley, police district of Christchurch, on the eastern coast of the Middle Island, 14 miles N. of Christchurch, to which it is connected by railway. It is about 3½ miles from the sea, to which there is an excellent road. There are three trains daily; fares 1s. 10d., and 1s. 3d. A coach runs to Woodend, Waikuku, and Saltwater Creek once a day, fare, 1s. Hotels: The Kaiapoi, Mandeville, Pier, and Kaikanui. It is situated on the banks of the Waimakariri river, which is navigable for small vessels and steamers up to the centre of the town, and under the Waimakariri Harbour Board. Bank: New Zealand; and there are agencies of several insurance companies. Places of worship—Anglican, Salvation Army, Wesleyan, Baptist, Presbyterian and Roman Catholic. The Institute possesses a large library. A school is here (average attendance 490), a ladies' boarding-school, a court-house and police-station, drill hall, Oddfellows' hall, and Working Men's Club. On the east side of the River Cam (Camside) is the factory of the Kaiapoi Woollen Company, with extensive machinery, comprising 82 looms, and employing 450 hands, and two engines of 80 h-p. and 15 h-p., capable of turning out weekly between 600 and 700 pairs of blankets and 6,000 yards of tweeds. The factory is lit with the electric light. Other industries are wool-scouring, saw mills, and fellmongery works, a brewery, aërated water factory, agricultural implement works, bacon-curing factory, and a Produce and Milling Co. Among the local institutions are Masonic, Foresters, Oddfellows', Orange, Druids', and Sons and Daughters of Temperance Societies, Farmers', Lawn Tennis, Rifle, Volunteers, (containing some of the best shots in the colony, having a cadet corps attached), Boating, and Cricket Clubs, Horticultural Society, Building Society, Skating Rink, Football Club, Hockey Club (1st in N.Z.), Fire Brigade, and Brass Band. Town is lighted with kerosene. Water supply is from artesian wells. Agricultural and pastoral and manufacturing district. Population of enlarged borough (census 1896), 1,828.

KAIHU (Hobson co., Auckland prov.), a post town, with money-order, postal note, savings bank and telephone offices, and railway station, 119 miles from Auckland, which is reached by rail to Dargaville, thence steamer to Helensville and rail to Auckland. Has hotel, public school, Wesleyan Methodists, and native Roman Catholic places of worship. Timber-milling and kauri gum industries. Pastoral district. Population about 500.

KAIKORA NORTH (39° 52′ S. lat., 176° 32′ E. long.), co. of Patangata, and riding Patangata (Hawkes Bay prov. dist.), a post town with telegraph station, money-order, Government life insurance and savings bank office, 36 miles from Napier on the main line of road and rail between Napier and Wellington, fares, 4s. 7d., and 3s. 1d. The station yard is very complete, having a large goods shed and every convenience for trucking sheep and cattle. Hotel: Railway. Presbyterian, Anglican and Methodist services are held. There is a public library, Mechanics' Institute, Rechabite hall, Gospel hall, and stores. Sheep dip factory. The Waipawa County Racing Club holds its race meetings here. Agricultural and pastoral district. Population (census 1896) of town district, 301; of riding, 641.

KAIKOURA (42° 26′ S. lat., 173° 45′ E. long.), a postal township (Kaikoura co. and riding of the town of Kaikoura, police district of Canterbury, prov. Marlborough), known as the Scarborough of New Zealand, with post-office, savings bank, telegraph and money-order office, on the shores of Ingles Bay, on the north side of the peninsula, after which it is named. Part of the town is on Lyell Creek. It lies about 106 miles NE. of Christchurch, and 95 miles S. of Blenheim. Communication by steamer from Wellington or Lyttelton, fare 15s. single, £1 2s. 6d., or rail and coach thrice weekly from Christchurch, and coach once a week from Blenheim. Steamers run weekly from Wellington, and Lyttelton to Kaikoura. Hotels: Club, Pier, Adelphi, and Commercial. It is the shipping port of a large area of agricultural and pastoral country. Bank: Bank of New Zealand. Two government schools for white children, one for native children, two Episcopal churches, three Roman Catholic (one for Maories), and two Presbyterian churches, a Roman Catholic school, court-house, government offices, public library, assembly hall, Good Templars' hall, cheese factory, and saw-mills, Government and private storing sheds at the port. Lodges of Masons, Oddfellows, and Good Templars. The peninsula consists of undulating hills of good soil, with limestone substrata; the suburban district of level country, alluvial soil; the pastoral country is hilly, of limestone rock, and good soil resting on it. There is opportunity for Alpine climbing and good fishing. Population 394, county 1,600. Newspaper: *Kaikoura Star.*

KAIMATA is merged into Clonmore, which see.

KAITAIA (35° 15′ S. lat. 173° 15′ E. long.) (Mangonui co., prov. Auckland, riding of Kaitaia), 213 miles N.W. from Auckland, to which steamers direct weekly. There is a post and money-order office, savings bank and a telephone station; also hotel and temperance hotel, police-station, Agricultural Association, school, church, and flax-mill. Gum-digging industry. Population (census 1896) of village, 114; of riding, 1,045.

KAITANGATA (46° 16′ S. lat., 169° 58′ E. long.) is a municipality, and has post, money-order, savings bank, telephone and telegraph offices, and is in the county and electorate of Bruce, police district of Dunedin, Otago prov. dist., 54 miles SW. from Dunedin, situated on a branch of the River Molyneux, about four miles from its mouth. A coach runs to Stirling daily (fare 1s.). Vessels of about 80 tons can cross the bar and ascend to Kaitangata. A branch line of railway from Stirling (4 miles) gives access to the town. The district is picturesque, and the land valuable. There are large deposits of coal in the ridges at the back of the town. Has branch Bank of New Zealand and National of New Zealand (open Thursdays), Masonic and Oddfellows' lodges, an Athenæum, stores, two hotels, public school, and Anglican, Wesleyan, Baptist, Christadelphian, Presbyterian churches, and Church of Christ. The Kaitangata Railway and Coal Company give employment to about 160 miners, and sends a large amount of coal to Dunedin, &c. The Wangaloa Pits, Nos. 1 and 2, are also here, but the output of these is small. Streets lighted with kerosene. Good fishing and shooting lakes. Population (census 1896) of borough was 1,362, now about 1,600.

KAITOKE (Wellington prov., Hutt co., Mungaroa riding), a post town with money-order office, savings bank, telegraph and railway station, 27 miles NE. from Wellington, on the Wellington-Eketahuna line. Fares 3s. 6d. and 2s. 4d.; return, 7s. and 4s. 8d. Has public school. Pastoral district. Clay formation. Population about 70.

KAKANUI (45° 10′ S. lat., 170° 50′ E. long.) is a post town with a Government savings bank, money-order office, and telephone station (Waitaki co. and riding of Kakanui, Otago prov. dist.), 13 postal miles S. from Oamaru and 70 postal miles NE. from Dunedin, which is reached by conveyance to Maheno, thence rail, 69 miles, fares 8s. 9d. and 5s. 10d. Hotel: Royal. Places of worship: Presbyterian kirk and Wesleyan chapel. Athenæum, a public school, stores, and fellmongery, Oddfellows' lodge. The district is a rich agricultural one of limestone formation. Good building stone is quarried here. Population of riding, 1,204.

KAMO (33° 44′ S. lat., 174° 15′ E long.), a post town (now incorporated), with money-order, savings bank and telephone office, 101 postal miles from Auckland (county Whangarei and riding of Hikurangi). It is six rail miles from Whangarei, with which it is connected by rail; fare, 10d. and 7d. Coaches also run, fare 6d., and to Hikurangi, fare 2s. 6d. Hotels: Kamo and Star; several stores, some tradesmen's shops, and a produce store. The Wesleyan Church here is considered for its size one of the handsomest buildings north of Auckland. There is also an Anglican church, public hall, and public school. Sales are held at the cattle market fortnightly. Formation: volcanic over cretaceo-tertiary. Hematite, limestone and fireclay are sent from the district. There are coal deposits at some depth. Population (1896) of town, 175, now 220; principally farmers, fruit-growers, and coal-miners.

KANIERI (Hokitika prov. dist., Westland co., and riding of Kanieri), 3½ miles from Hokitika, with post-office and telephone station. Has three hotels, State and Roman Catholic schools, police station, and Wesleyan, Anglican, and Roman Catholic churches. Industries: Mining, farming, and sleeper cutting. Lighted with kerosene. Mining, agricultural, and pastoral district, in which is Kanieri Lake. Population of riding, 1,967.

KAPONGA (39° 10′ S. lat., 174° E. long.), a rising township, on the Kaupokonui, 10 miles N. of Manaia, 8 miles from Eltham railway station, thence 216 miles to Wellington, and 81 postal miles from Wanganui, in the county of Hawera and riding of Waimate, Taranaki province. Kaponga is 11 miles from Stratford, and 13 miles from the Port of Opunake. Has post-office, money-order office, savings bank, and telephone office, Banks of New South Wales and New Zealand, with daily mail to Eltham and tri-weekly to Manaia; Commercial hotel, Government school, Roman Catholic, Anglican, and Wesleyan churches, Presbyterians hold monthly services, Farmers' Club, Settlers' Association, I.O.G.T. lodge, and good public hall, saw-mill, coach factory, butter factory and creamery, recreation reserve, insurance company, and various stores. Industries: saw-milling and dairying. Dawsons Falls, Kendalls Cascade, Dives Lake, on Mount Egmont, are in the district. Population of district, about 1,000.

KARANGAHAKE (co. Ohinemuri), a post town with money-order, postal note and savings bank, and telephone offices, 28 postal miles from Thames. Nearest railway station Paeroa. Has two hotels, State school, Roman Catholic and Wesleyan churches, and Oddfellows' lodge. Mining district. Population, 800. Newspaper: *Goldfields Advocate.*

KAROKI—A suburb of Wellington, with a population of over 1,000.

KAUKAPAKAPA (36° 37′ S. lat., 174° 29′ E. long.), a post town with telephone and railway station, money-order and savings bank offices (co. Waitemata, and riding of Kaukapakapa, Auckland prov. dist.), 44 miles NE. from the city of Auckland, and 6 miles from Helensville. Fares to Auckland, 5s. 7d. and 3s. 9d. It is an agricultural settlement, with the river of the same name running through it. Wesleyan and Presbyterian churches, library, public school, two hotels, and commodious public hall, are in the district. Much fruit is grown and exported. Great quantities of Kauri timber and gum are exported annually. Agricultural district. Population, district, 400.

KAWAKAWA (37° 34′ S. lat., 178° 21′ E. long.) (co. of Bay of Islands and riding of same name), a coal-mining and county town, with post and money-order office, savings bank, telegraph and railway station, 169 (postal) miles from Auckland, and 14 by steamer and rail from Russell. It is partly built in a valley, and along the main street the railway runs to the entrance of the coal works, a seam of coal having been accidentally found here in February, 1861. Coaches run to Hokianga North and Hikurangi South, thence rail to Whangarei. Hotels: Star, and Junction. Masonic, and Oddfellows' lodges. A town hall, with good library and reading-room. New and handsome court-house, county council chambers, and railway station; also offices of Bay of Islands Acclimitisation Society. Public school. Churches: Episcopal, Wesleyan and Roman Catholic. Principal stipendiary and district licensing court. There is a fine railway wharf at the terminus (Opua) 500 feet long by 50 feet broad, with three lines of rails and

appliances for loading and discharging. The rest of the town is scattered over several points of rising ground to the southward and east. On the north side of the valley the township is quite shut in by a high range of hills, skirted by a belt of bush along its base, and into which penetrates for eight miles a railway line. Opua, 8 miles distant, is the port for Kawakawa, where the largest steamers coal at the wharf, and where the line from here terminates. It is described as a beautiful harbour, with plenty of room for any shipping. Men-of-war often coal at the wharf. Gold has recently been found in small quantities. Kauri gum digging is a thriving industry, about 3,000 Austrians being engaged in the work in the district. Population, town, 321. Newspaper: *Northern Luminary*.

KAWARAU GORGE (45° 0′ S. lat., 169° 15′ E. long.), a post town (co. Vincent, riding of Clutha, police district of Dunstan, prov. dist. of Otago), 146 postal miles NW. from Dunedin. NW., with which city there is mail communication three times a week, and about 3 miles from Cromwell. Kawarau is situated in the midst of a deep gloomy gorge, overhung with lofty and rugged precipices, through which the river of the same name boils and foams in its rapid course. The entire gorge, for about 20 miles, presents a scene of awful and savage grandeur, and is much resorted to by tourists who wish to see some of the wild mountain scenery of Western Otago. Where the Kirtleburn joins the Kawarau there is a natural bridge across the river, composed of rock, only to be crossed in winter when the river is low. Coal mine. Four dredges are at work on the Kawarau. Population about 70.

KEKERANGU (42° S. lat., 175° E. long.) (prov. dist. Marlborough), 50 postal miles from Blenheim, is a sheep station, with a post-office, money-order office, savings bank, and telegraph office, on Kekerangu creek. Coach to Blenheim. Has accommodation house and a Government school. Sheep farming. Population, about 53. Limestone formation.

KELSO (45° 45′ S. lat., 169° 5′ E. long.), a post town with telephone station, money-order office, savings bank, and railway station, prov. dist. Otago, co. Clutha and Tapanui riding, 99 miles W. from Dunedin, and 72 miles from Invercargill. Prohibition district, having a Caledonian Society, several stores, timber yard. Two temperance hotels only. Bank: New Zealand (Wednesdays only). Public school, Presbyterian church. It is connected by rail with Invercargill and Dunedin by the branch line from Waipahi (16 miles). Fares from Invercargill, 9s. and 6s.; return, 18s. and 12s.; from Dunedin, 12s. 6d. and 8s. 4d.; return, 25s. and 16s. 8d. Mining, agricultural and pastoral district. Population (census 1896) of town, 190; of riding, 800.

KENNEDY BAY. *See* COROMANDEL.

KIHIKIHI (38° 2′ S. lat., 175° 18′ E. long.), a post town with a money-order and savings bank office, and a telegraph station, in prov. dist. Auckland, county and electorate of Waipa, and riding of Rangiaohia, 104 miles S. from Auckland city, and three miles from Te Awamutu. Hotels: Alpha and Star. Public school, a public library, four places of worship, Anglican, Presbyterian, and Roman Catholic; tradesmen's shops, and several general stores. Daily mail communication with Auckland by rail and coach. Coaches run to Te Awamutu and the railway station, fare 2s. and 1s. 6d. The town is beautifully situated. A house was built here by the Government for Rewi, the old Ngatimaniapoto chief, and on April 23, 1894, a monument (which had been presented to the town by Sir George Grey), was unveiled. Agricultural and pastoral district. Population of town district, 230; of riding, 1,098.

KINGSTON (45° 18′ S. lat., 168° 43′ E. long.) (Otago prov. dist., Lake co. and riding of Kingston), 174 miles NW. from Dunedin and 87 miles N. from Invercargill. It is a post town with a telegraph, savings bank, money-order office and railway station. Four trains weekly to Dunedin, fare 21s. 10d. and 14s. 7d., three trains weekly to Invercargill, fares 11s. 0d. and 7s. 4d. Hotel: Lake Wakatipu. It is situated at the south end of Lake Wakatipu, and is the point of departure for steamers across the lake to Queenstown (25 miles distant, passage about two hours). The country around is of a farming and grazing character. Population, about 40.

KIWITEA (prov. Wellington, co. Oroua), 112 miles NE. from Wellington, on Oroua. Telephone station. Postal district, with telephone station, State school, Anglican and Presbyterian churches. Two coaches daily to Fielding, 12 miles, thence by rail 100 miles to Wellington. Water supply, running creeks. Pastoral and agricultural district. Formation: loam, clay, and ironstone. Population, 400.

KOHUKOHU (co. Hokianga, riding of Kohukohu, prov. dist. Auckland), a post town with money order office, savings bank, and telephone station, 194 postal miles from Auckland (with which there is fortnightly steam communication), and about 70 miles from Dargaville, on the Hokianga river. There is town hall, one hotel and two boarding-house, public school, saw-mills, squaring station for railway sleepers, public library, Freemasons' lodge, working men's club, Settlers' Association, and Fruit Growers' Association, gymnasium, and Anglican church. Town lighted with kerosene. Kauri forests and river scenery. District is agricultural, pastoral, and timber-getting. Formation: sandstone overlying coal measures. Population of town, 320; of riding, 450.

KOPUA (40° 3′ S. lat., 176° 16′ E. long.), post town and railway (flag) station (Waipawa co., riding of Norsewood, Hawke's Bay prov. dist.), 63 miles SW. by rail from Napier; fares 8s. and 5s. 4d.; 136 miles from Wellington. Industries: sawmilling and firewood splitting. Water from springs. Formation: papa and shingle. Population of town, 120; of riding, 1,024.

KUAOTUNU (prov. dist. Auckland, co. Coromandel and Mercury Bay riding), a post town with money-order office, savings bank, and telegraph station, 75 miles from Auckland, to which steamer twice weekly. Has two hotels, Government school, Roman Catholic and Wesleyan churches, branch Miners' Union, library and reading-room Streets lighted with kerosene. Water from wells. Mining district. Sandstone formation. Population, 300.

KUMARA (42° 40′ S. lat., 171° 17′ E. long.), a mining township, with post and money-order office, savings bank and telegraph station, about 19 miles from Hokitika (prov., co. and police district of Westland and electorate of Westland), and 14 miles S. by E. of Greymouth, situated between Hokitika and Greymouth, on the main road between these places and on the south side of the Teremakau River, the town being built on a terrace, about a mile from the river. Daily coaches to Hokitika, fare 5s. Coaches run to Christchurch on Tuesday and Friday mornings, returning on Wednesday and Saturday afternoons, through, from, and to Hokitika, and connecting with railway from and to Hokitika and Greymouth. There are a large number of hotels here. (The river separates Westland from Grey county, of which Greymouth is the chief town.) Bank of New Zealand. Schools: Public, Roman Catholic, and private. School of mines and a technical school. Social institutions: hospital, with seventeen beds, also a detached ward, old man's home, young men's club and mechanics' institute, courthouse, Masonic hall, Town hall, Theatre Royal, and Adelphi Theatre. Episcopal, Catholic, Presbyterian, Wesleyan, and Salvation Army places of worship, borough council offices and lodges of various orders. A fire brigade and volunteer corps are here. A mayor and nine councillors control the affairs of the town. The locality is an alluvial goldfield of considerable extent. Population of borough, 1,169. Newspaper: *Kumara Times* (evening daily).

KUMEROA (co. Waipawa, prov. dist. Hawke's Bay), 115 miles from Napier; has a post and money-order office, savings bank, and also a telephone station; has hotel public school, and public hall. Pastoral district. Population, 104.

KUROW (prov. dist. Otago, Waitaki co., and riding of Otekaike), a post town, with money order office, savings bank, telephone, and railway station, 42 miles from Oamaru. Single fares 5s. 4d. and 3s. 7d. Wellington reached by rail to Lyttleton, boat thence. Has two hotels, National Bank of New Zealand, Government school, public library, Presbyterian, Roman Catholic, and Anglican churches, Foresters' lodge. District is mining, agricultural, and pastoral. Rabbit export industry. Population of town, 300.

LAKE BRUNNER (43° S. lat., 170° E. long., Grey co., riding of Red Jack or Moana), is a railway station with telephone bureau on the East and West Coast Railway. The post office called Lake Brunner is situated on the Christchurch road, and close by the Teremakau River, which runs east and west and empties itself five miles west of Kumara. Lake Brunner is an inland lake, some 8 miles in length by 7 or 8 in width. At a distance of eleven miles is Lake Paeroa, and there are several small lakes in the same locality. Has hotel and State school; is lighted with kerosene. Mining, timber, and pastoral district. Formation of district: slate, quartz, and granite. Population, about 100.

LAWRENCE (45° 55′ S. lat., 169° 43′ E. long.), a municipality, with post, money-order, telegraph, and savings bank offices, 60 miles SW. of Dunedin (county of Tuapeka, police district of Dunedin), on the Tuapeka River. It is connected with the metropolis by a branch line of rail (two trains daily), fares 7s. 7d., 5s. 1d. Headquarters coach service to Central Otago. There are numerous hotels, stores and other places of business in the town, an Athenæum and mining institute, and several public buildings, among these being the post office, a large brick building with postmaster's residence; R.M. Court survey and mining offices, a large concrete building, the hospital, having 32 beds, the town-hall and volunteer hall, the District High school-house, a Roman Catholic school, and places of worship belonging to the Episcopal, Roman Catholic, Wesleyan, Presbyterian and Salvation Army bodies. Masonic, Oddfellows', Foresters', and I.O.G.T. lodges. There are also a large number of private residences. Banking establishments: N.S. Wales, New Zealand. Several of the leading insurance companies have agencies here. Lawrence was the first and most prominent goldfield in Otago. The district is advancing both in mining and farming; cereals now are largely grown, especially in the vicinity of Tuapeka West, about 8 miles away, and also at Waitahuna West, about 10 miles distant. The Tuapeka district is rich in mineral wealth: copper, antimony, cinnabar, &c., having been discovered in various parts. It is also one of the principal centres for the gold dredging industry. Water is supplied from large reservoirs, led into the town by pipes. Population of the borough, census 1896, was 996; county 4,828. Local paper: the *Tuapeka Times*, published twice a week.

LEESTON (43° 49′ S. lat., 172° 28′ E. long.), a post town, with telegraph and money-order office, in Canterbury prov., co. of Selwyn and riding of Ellesmere, with railway station on the Christchurch and Southbridge Railway, 27 miles SW. by S. from Christchurch, fares, 3s. 6d., 2s. 4d. Leeston is situated on the shores of Lake Ellesmere. Hotel: Leeston. It has a branch of the Bank of New Zealand, Government Insurance office, a public library, Town, Masonic and Orange halls, a public school, Ladies' seminary, and private schools, several places of worship—Anglican, Presbyterian, Wesleyan, Catholic, and Salvation Army, Masonic, Oddfellows', Orange, and Hibernian lodges, several tradesmen's shops, including seven stores. The headquarters of the Ellesmere Agricultural Association are here. Asphalt cycle track, quarter of a mile, 27 feet wide, banked 7 feet. Lake

Ellesmere is the chief shooting district of Canterbury, and abounds with ducks, swans, &c. All the rivers in the neighbourhood are well stocked with trout. Fishing season, October 1 to April 16. The season for native game is from about 1st May to 31st July. The district is an agricultural and pastoral one. Population (census 1896), of town, 875; of riding, 4,355.

LEIGH (36° 15′ S. lat., 174° 47′ E. long.), a post town, with telephone station, in Auckland prov. dist.; Rodney co. and riding of Omaha, 58 miles from the city of Auckland, with which there is steamer communication weekly. Omaha parish has several stores, three schools, hotel, and an accommodation house. Agricultural and pastoral. Population, about 300.

LETHBRIDGE (40° 2′ S. lat., 175° 4′ E. lat.) (co. Rangitikei and riding of Otakapu) is the name given to town board of Turakina, which *see*. Population of town district, 259.

LICHFIELD (38° S. lat., 176° E. long.) (prov. Auckland, co. Piako, Patetere riding), a post town, with telephone communication, 145 miles from Auckland, 300 miles NE. of Wellington. Coach to Putaruru station, 5 miles, then by rail to Auckland, 140 miles. Has school, and a religious service occasionally. Pastoral district. Population of town, 50.

LIME HILLS (Southland co., and riding of Winton). A postal township, 25 miles from Invercargill. Has school, Presbyterian church, and I.O.G.T. lodge. Agricultural district. Population of 126.

LINCOLN (43° 32′ 16″ S. lat., 172° 38′ 59″ E. long.), prov. dist. Canterbury, Selwyn co. and riding of Lincoln, a post town and meteorological station, with money-order office, savings bank, telegraph and railway station; on the Christchurch-Southbridge line, 14 miles from Christchurch. Fares, 1s. 10d. and 1s. 3d.; return, 3s. 8d. and 2s. 6d. Has hotel, public school, Anglican, Presbyterian, Baptist, and Roman Catholic churches, Masons', Hibernian, and Druids' lodges, and Agricultural College (P. Bayne, director). Flour-mill. District is agricultural and pastoral. Water from wells. Population (census 1896), 600; of riding, 3,400.

LINWOOD (co. Selwyn, Canterbury prov.), post, money-order and savings bank offices, telegraph and railway station, on the Avon river. Tram to Wellington. Has three schools, hotel, two Anglican, Congregational, Primitive Methodist churches, and Salvation Army; has baking-powder and boot and nail factories; Oddfellows' and Druids' lodges, town hall and chess club. Town is lighted with gas. Water from artesian wells. Population (census 1896), 6,115, now 6,700.

LITTLE RIVER (42° 44′ S. lat., 172° E. long.), Akaroa co. and Little River riding, Canterbury prov., a post town on the Wairewa, with money-order office, savings bank office, telegraph and railway station, 36 miles from Christchurch. Coaches run from Little river to Pigeon Bay and Akaroa. Fares 4s. 7d. and 3s. 1d. Has two hotels, library, public and native schools, court-house, saw-mills, police-station, Roman Catholic, Anglican, and Wesleyan churches; Oddfellows' lodge. The district is pastoral. Lake Forsyth in vicinity. Population of town, 137; of riding, 820.

LIVINGSTONE (44° 45′ S. lat., 170° 32′ E. long.), a post town, with railway station in prov. district Otago, Waitaki co., riding of Otekaike, 116 miles due N. of Dunedin, and 36 miles NW. of Oamaru. It is situated on the river Maerewhenua, about 12 miles from its confluence with the Waitaki. There is a public schoolhouse, in which the Presbyterians, Roman Catholics, and Salvation Army worship. It lies about 1,200 feet above sea-level. A considerable portion of the district is rough and unsuited for agriculture, but the tablelands, which begin 2 miles from Livingstone and stretch towards Oamaru, bear heavy crops of wheat. Gold-mining is carried on by means of sluicing; the gold is distributed over a large area, and is very fine in its character. Formation: green sand, quartzose, basalt, and limestone. Naseby is 30 miles distant. Population, 110.

LONGFORD (Inangahua co., prov. Nelson), a post town, with money-order office, savings bank, and telephone and telegraph office, 60 miles from Westport, on Buller river. Coach to Motupiko, train to Nelson, steamer to Wellington. Mountainous scenery in district. Has State school. Mining and agricultural district. Population, 70.

LUMSDEN (45° 42′ S. lat., 168° 26′ E. long.) (co. Southland and riding of Oreti), a post town with money order, savings bank and telegraph office, also known as the Elbow, is a station on the Invercargill and Kingston Railway line, situated at the junction where the road crosses the Oreti river, 50 miles NW. of Invercargill. There are two trains daily; fares from Invercargill, 6s. 4d. and 4s. 3d. In the town are three hotels, railway refreshment rooms, Episcopal and Presbyterian churches, stores, a public school, a court-house, and a public hall, Masonic and Oddfellows' lodges. Grazing district. Population, 223.

LYELL (42° 0′ S. lat., 171° 40′ E. long.), a post town, with money-order office, savings bank, and telegraph office (Buller county and riding of Lyell, Nelson prov.), 38 miles E. of Westport, 107 miles SW. of Nelson, and about 245 miles from Wellington by land and sea, in the centre of a quartz-mining and agricultural district. It lies at the junction of the Buller and Lyell Creeks. Coach runs to Westport, the nearest seaport, fare 17s. 6d., and to Nelson, fare £2 10s., both lines three times a week. Principal hotels: Post Office, Welcome, Empire, and Criterion. Post office and stores. Bank: Agency of the National. Church of England and Roman Catholic places of worship. A public school is here, also School of Mines, court-house, Warden's office, and police quarters. Town lighted with kerosene. Formation: clay, slate, gravel, and granite. Picturesque waterfall in vicinity. The goldfield was first opened in 1862. Population (census 1896) of town, 160, now 140; of riding, 475.

LYTTELTON (long. 172° 44′ 17″ E., lat. 43° 36′ 42″ S.), a seaport town, with post office, savings bank money-order and telegraph offices at the E. side of the provincial district of Canterbury, county of Selwyn, walled in by precipitous hills, nearly in the coast centre of the Middle Island. It is connected with Christchurch, 7 miles W., of which place it is the port, by a railway tunnelled through the hills (the Moorhouse tunnel is 1¾ miles in length). There are fifteen up and down trains daily; fares 1s. 0d. and 8d. There is also a coach road to Christchurch, over the flank of one of the hills, known as the Zigzag. It was formerly known by the name of Port Cooper, and is also called Port Victoria. It has a large shipping trade. It is 174 miles by sea SW. from Wellington, and 190 from Dunedin N., and lies on the NW. side of Bank's Peninsula. The entrance to the harbour is about two miles wide, between Godley Head on the NW.—which is lighted by a fixed white dioptric light of the second order, shown from a white lighthouse 450 feet above sea-level—and Baleine Point on the SE. At the foot of Adderley Head, which separates Port Lyttelton from Port Levy, is the pilot station. There is every facility for the loading of vessels, and ships drawing 27 feet can lie alongside the jetties and wharves, of which there are several, varying from 116 to 1,318 feet in length, the latter being the Gladstone wharf. There are eight hotels. The Bank of New Zealand and Union Bank of Australia have branches here, and so have the principal insurance companies, and there are Presbyterian, Wesleyan, Anglican, and Roman Catholic churches and two public schools. Has Masonic, Oddfellow, Forester, and Druids' lodges, court and custom-house, iron foundries, and gaol. The harbour of Lyttelton has been improved, at considerable cost, by the erection of a breakwater from Officers' Point, 2,010 feet long, with a width at top of 40 feet, and an elevation of six feet above high-water spring tide; this affords protection during the SW. gales. The Western or Naval Point Breakwater is 1,434 feet long; the two breakwaters enclose an area of about 107 acres, in which are several jetties and wharves, the berthage space being upwards of 11,000 feet, all of them having lines of rails laid down and worked by the Railway. A breast-work of timber is built along the inner face of the Officer's Point, or Eastern Breakwater, for nearly its entire length, and is known as the Gladstone Pier. The depth of water within the breakwaters varies from 19 to 27 feet at low tide. An electric light system has been established by the Harbour Board. The water supply is derived from artesian wells on the Christchurch side of the hills. The graving dock, situated west of Naval Point, cost, including pumps and caisson, £104,230. It was opened on January 2, 1883 (begun October, 1879). The exports of Canterbury prov. dist. for 1899 amounted to £3,037,769; imports, £1,569,239. Volcanic formation. Population of borough, 4,000; county, 57,000.

MACETOWN (44° 52′ S. lat., 108°·52 E. long.), Otago prov. dist., Lake co., and riding of Matukituki, 180 miles NW. from Dunedin; 8 miles from Arrowtown, on the Arrow river. A post town with telephone station; has one hotel; Government school, in which all denominational services are held; public hall; mining district. Sawyers Gully and Advance Peak (6,500 feet) in district. Formation: schist—very mountainous. Population, about 150.

MACRAE'S FLAT (45° 10′ S. lat., 170° 0′ E. long.) is a post town, with money-order office, savings bank, and telephone office, and is in the Macrae riding, provincial district of Otago, county of Waihemo, and lying 1,300 feet above sea-level, at a distance of 63 miles NW. of Dunedin. Palmerston Railway Station is about 22 miles distant; the nearest station is Dunback, 12 miles distant, reached by coach, 7s. 6d. Jeff's coach runs to Palmerston, fare, 10s. Hotels: Macrae's and United Kingdom. Macrae's has a public school, with teacher's residence, an Athenæum, court-house, and numerous stores. Roman Catholic church. Mining district. Macrae's is on the main road to the interior of Otago. Trapping, sheep farming, dredging and mining. In the district are coal indications, with numerous quartz reefs. Population about 300.

MAHENO (44° 45′ S. lat., 170° 58′ E. long.) (Waitaki co., and riding of Otepopo, Otago prov.), a Government township, with post and telegraph office, money-order and savings bank, and railway station, on the river Kakanui, 69 miles NE. from Dunedin; fare, 8s. 9d. and 5s. 10d., and 9 miles from Oamaru. Has hotel, school, mechanics' institute, public hall, Anglican and Presbyterian churches, and Oddfellows' lodge. Pastoral district. Fellmongering industry. Population (census 1891) of town, 189; of riding, 1,334.

MAHIA (prov. Hawkes Bay, Wairoa co., Waikaremoana riding), 103 miles from Napier. Has two schools and churches, with a population of about 200. Pastoral district.

MAKARA (41° 17′ S. lat., 174° 38′ E. long.) (co. Hutt, prov. Wellington). Postal district with telephone bureau. Has Anglican and Roman Catholic places of worship. Gold mining locality, about 18 miles W. from Wellington.

MAKARETU (Waipawa, co. Ruataniwha riding), a post town, with money-order office, savings bank, and telephone station, 104 miles from Napier. Population, 250.

MAKETU (37° 50′ S. lat., 176° 58′ E. long.) (prov. district Auckland, co. Tauranga and riding of Maketu), a post town on the Kaituna river, with money-order office, savings bank, and telephone station, 102 miles from Thames. It has one hotel, one Maori, one public school, Anglican and Roman Catholic and Native churches. District is agricultural and pastoral; maize-growing. Auckland is reached by steamer *viâ* Tauranga; also by mail coach to Rotirua and Tauranga. Formation is volcanic, and there are a number of natural hot baths, ranging from 105° to 117° Fah., within a mile of township. There is a large Maori *Pa* with some of the best carving in New Zealand. Open

sea-bathing, and good fishing and shooting. Formation: volcanic. Population consists of about 50 Europeans and 130 natives.

MAKIKIHI (Waimate co., riding of Makikihi, Canterbury prov.), a post town on river of name, with money-order office, savings bank, telegraph, and railway station, 113 miles from Dunedin and 18 miles from Timaru. Has hotel and school. Fares from Dunedin, 14s. 3d. and 9s. 6d. Agricultural and pastoral district. Population, 57; of district about 200.

MAKOTUKU, or MAKATOKO (40° 5′ S., lat., 176° 14′ E. long.), prov. Hawke's Bay, co. Waipawa, is a post town, with money-order, telephone offices, savings bank, and railway station, for some time the terminus of the Napier and Makotuku railway, is situated 68 miles from Napier in the heart of the Seventy mile bush, single fares 8s. 7d. and 5s. 9d. The line is continued through to Wellington. Hotels: Beaconsfield and Makotuku, several stores, public library, Foresters' society, Anglican church, public school. District is agricultural and pastoral. Saw-mill and brick factory are at work. Population about 300.

MANAIA (39° 50′ S. lat., 174° E. long.), a post town, with money-order office, savings bank, and telegraph station, 64 miles from Wanganui (county of Hawera, and riding of Waimate, prov. dist. of Taranaki), on the main road from Hawera to Opunake. It is 9½ miles W. of Hawera (the county town), to which a coach plies; fares 3s. 6d. Hotels: Manaia, Waimate, and Commercial. Banks: Australasia and New Zealand. Wesleyan, Anglican, Presbyterian, and Roman Catholic places of worship, Government school, court-house, public library, Government Life Insurance agency, M.U.I.O.O.F. lodges, and several general stores, and tradesmen. In the vicinity are a flour mill, meat preserving works, and three dairy factories. In April, 1886, a monument was unveiled here to the memory of the officers and men who fell on the West Coast during the Maori war. From Manaia there is a direct route for the ascent of Mount Egmont, passing through grand and beautiful scenery. This route is also available from Stratford, on the railway between New Plymouth and Hawera. Good accommodation home on track. The land generally is of splendid quality, and commands high prices either as freehold or leasehold. Good fishing and shooting. Formation: volcanic debris, rocks mostly trachytic. Population (census 1896), 471; of riding, 3,852. Newspaper: *Waimate Witness.*

MANDEVILLE (46° S. lat., 168° 50′ E. long.) (Southland co., and provincial district of Otago), 50 miles NE. from Invercargill, with railway station on the Waimea Plains branch. Connection with Wellington is by rail to Lyttelton, thence steamer (251 miles). A post town (issuing postal notes), with telephone station. Has hotel, public hall, flour, oatmeal and pearl barley mill, grain and other stores, sporting clubs, public school, and Anglican church. Three famous trout-fishing rivers near to town, also excellent shooting. Quantities of rabbits are exported. Gold dredging on the Mataura river, two miles distant. Population of town about 100; of district, 350.

MANGAPAI (35° 44′ S. lat., 174° 15′ E. long.), a post centre, with telephone communication, savings bank and money-order office (co. Whangarei, riding of Mangapai and prov. dist. of Auckland), 94 miles N. from Auckland city and 11 miles from Whangarei. It has churches—Episcopal, Presbyterian, and Wesleyan, no hotels, two schools, one public hall and library, stores, butter and cheese factory, and wharf, where steamers load and discharge cargo. Steamers ply to Auckland twice weekly (90 miles). Fruit is largely grown in the district, the scenery of which is described as being romantic and picturesque. Large caves in district. Water from wells. Agricultural and pastoral district. Formation: partly limestone, mostly clay and scoria. Population of district, 210.

MANGAWAI (prov. Auckland, co. Otamatea, Kaiwaka riding), a post town, with money-order office, savings bank, and telephone station, 84 miles (by steamer) from Auckland, on river of name. Has hotel, school, and Presbyterian church, and public hall. Gum digging, farming, and viticulture. Population of town 272, of riding 612.

MANGAWHARE (prov. district Auckland, co. Hobson, riding Aratapu), a post town with money-order, telephone and savings bank office, 101 miles NE. from Auckland, situated about ½ a mile S. from Dargaville, on the Northern Wairoa River, a deep navigable stream which flows into the Kaipara harbour. On the opposite side is the Kaihu Creek, over which is a swingbridge. It has Wesleyan and Roman Catholic churches, hotel, Foresters court, public hall, extensive stores, fine race-course, and resident doctor. Large quantities of kauri gum are collected in the vicinity. Population (census 1896), of town 471, now 493; of riding 1,399.

MANGONUI (35° S. lat., 173° 34′ E. long.), a post town, county Mangonui, Mongonui riding; Auckland provincial district, Bay of Islands electoral district, with money-order, telegraph, and savings bank office, also registrar births, deaths, &c. Steamer once a week to Auckland (fares 1st £1 17s. 6d., steerage £1), steamer thence to Wellington. It is situated on a good harbour, formed by the SE. arm of Doubtless Bay, having two hotels—Mongonui and Settlers—Masonic and Oddfellows' lodges, Episcopal place of worship, one native and one European school, custom-house, court-house, police-station, and four stores. In the district there is plenty of good agricultural land, and the Kaiaka block has several thousands of acres of rich land, with valuable timber on it. A saw-mill, belonging to the Kauri Timber Co. is at work. There are two good wharves. The coast line from Mangonui to Whangaroa is barren land, yielding quantities of gum. Gold has been found. Between Mongonui and the head of Doubtless Bay large seams of lignite or shale are visible at times on the beach and running into the sea. This burns brightly when dried in the sun. Population about 300, riding 900.

MANSFORDTOWN (Waikouaiti co. and riding of Blueskin, prov. Otago). Three-quarters of a mile suburban to Port Chalmers. Has post-box cleared daily. Hotel. Fish-curing industry. Population, 380.

MANUREWA (Auckland prov., Manakau co.), a railway station, on the Auckland-Mercer line, 15 miles from Auckland. Fares, 2s. 3d., 1s. 11d.; return, 4s., 2s. 8d. Has post-office. Flax dressing industry. State school, Anglican and Wesleyan churches. Pastoral and agricultural district.

MANUTAHI (Patea co., Taranaki district), a post town, with money-order office, savings bank, telephone, and railway station (1¼ mile distant). 49 miles from Wanganui. Has hotel and public school. Anglican and Presbyterian churches. Agricultural and pastoral district. Formation: Papa. Population about 280

MAORI HILL, a suburban municipality, in the electoral district of Dunedin, bounded by the Town Belt, Rosyln, Taieri, Waikouaiti County, and North East Valley. Has four wards, a mayor, town clerk, and 12 councillors. Has a public school. Anglican and Baptist churches, Wesleyan mission hall, town hall, and a paper mill. Population, 1,600.

MARLBOROUGH. (*See* BLENHEIM.)

MAROPIU (prov. Auckland, Hobson co., Bay of Islands electorate, Aratapu riding) on Kaihu Creek, a post town, telephone and railway station 132 miles from Auckland, which is reached by rail to Dargaville, 13 miles, fares 3s. 3d. and 2s. 2d., thence steamer to Helensville, 80 miles, thence rail. Has one hotel. District is pastoral. Kauri gum digging chief industry. Formation: basaltic and clay, river flats, decomposed basalt, rich grass lands. Shifting population of about 200.

MARTINBOROUGH (41° S. lat., 175° E. long.) (Wairarapa South co., riding of Otaraia, prov. district Wellington), a post town with money-order office, savings bank, and telegraph station, 62 miles from Wellington (reached by coach to Featherston, thence rail), on the Ruamahanga. Has two hotels, Government school, Anglican, Roman Catholic, and Presbyterian churches, I.O.O.F. lodge, public library, and free reading-room. Flax-mill, butter factory, and boot factory. District is agricultural and pastoral. Population, 300.

MARTIN'S BAY (44° 22′ S. lat., 168° 2′ E. long.), Lake co. Greenstone riding, is an open roadstead on the West coast of Otago, 190 miles NW. from Dunedin and 256 miles from Invercargill, giving entrance to the Hollyford river, and so to Lake McKerrow, on which was the settlement of Jamestown. The post-office is on the banks of the Hollyford, a little distance from the mouth. There is a mail once every three months from Bluff. Population of town 14, of riding 309.

MARTON (40° 7′ S. lat., 175° 15′ E. long.) (county Rangitikei, electorate Manawatu, Wellington prov. dist.), a post town, and municipality, with savings bank, telegraph, telephone and money-order office, and railway station on the line from Wellington to Wanganui and New Plymouth, from which last there is connection with Auckland by steamer on Tuesday and Friday, and Tutaenui Creek (winter stream only), and on the road leading to Turakina and Wanganui, 133 miles (117 postal) NNE. from Wellington, with which there is daily rail communication. It is 33 miles SE. from Wanganui, three trains daily; the station is about 1½ mile from the post-office: coach fare to it, 1s.; from this station there is an important branch of what will be the main line between Wellington and Auckland. It has been opened about 30 miles from the Marton end, and coaches run regularly to the Hot Lakes and the wonderland of New Zealand, passing some ever snow-capped and actively volcanic mountains. There are four places of worship, Episcopal (St. Stephen's), Presbyterian, Wesleyan, and Lutheran, and Salvation Army; branches of the New Zealand and Australasia banks; Masonic, Foresters', and Druids' lodges, theatre, Masonic hall, volunteer drill shed, a court-house, good free public library and reading-room, police quarters, and three hotels, stores and Government school; also park in centre town about 10 acres in extent. The land is a rich clay, resting on gravel, very level. Marton is about 491 feet above the sea-level. Agricultural and pastoral district around. The town itself is said to be the prettiest place in the Rangitikei district. There is a good water supply, procured at a cost of £6,500. Population of borough (census 1896), 1,151. Newspapers: *Rangitikei Advocate* and (branch office) *Wanganui Chronicle.*

MASTERTON (40° 58′ S. lat., 175° 30′ E. long.), a borough town, with post, money-order, savings bank, telegraph office and telephone bureaux (co. of Wairarapa North, prov. dist. of Wellington) electorate and police district of Masterton, on the main road from Wellington, which here branches off to Napier, *viâ* Woodville, and to Castlepoint, *viâ* Tinui, and to Homewood Whareama, East Coast, &c. It is situated on a large plain, at a distance of 72 rail miles NE. from Wellington, and is connected by railway; fares 9s. 1d. and 6s. 1d. Coaches run to Tinui (fare 15s.) and Castle Point (fare 20s.). The hotels are the Club, Empire, Prince of Wales, Central, Queen's, and Occidental. The places of worship comprise Episcopal (St. Matthew's), Presbyterian, Wesleyan, Roman Catholic, Plymouth Brethren, Seventh Day Adventists, and Salvation Army barracks; two public schools, one infant school, a Catholic school, Catholic convent, one private school, and a technical school. Other buildings are the Club, Masonic hall, Foresters' hall, Drill shed, Temperance hall, Institute, and Public Library, with free reading-room, museum, court-house, District hospital, and town hall (brick), with auditorium and dress circle capable of seating 1,500 persons, in addition to numerous business premises, Government buildings, police district and court house. Queen Street is the leading thoroughfare. Banks: New South

Wales, New Zealand, and Australasia. Industries: One flour mill, steam door and sash factory, fellmongery, coach factories and gasworks. In the town are lodges and societies of Masons, Oddfellows, Foresters, Druids, Rechabites, Hibernians, Good Templars and Caledonians. Chess Club, Debating Society, and a Volunteer Fire Brigade with manual engine. Municipal Brigade with steam fire engine, and branch station at Kuripuni with manual. Building and Investment and two Starr-Bowkett societies, a Jockey, Trotting, and a Coursing Club, Gun, Cricket and Football Clubs, Farmers' Club, and Agricultural and Pastoral Association with an annual show. The town is lighted with gas. A waterworks and drainage loan of £30,000 was authorized in 1898. There is a public park of 30 acres, with a cricketing oval, public cattle and sheep sale yards, and the Wellington and Wairarapa Acclimatisation Society have their breeding ponds here. KURIPUNI is a suburb of Masterton, and a railway station. It is on the creek of the same name, a tributary of the Ruamahanga River. It stands on a dry, slightly elevated terrace, surrounded by scenery of uncommon beauty. Masterton is the chief township in the Wairarapa, and one of the largest inland towns in the North Island. The country surrounding Masterton consists of good agricultural land, and a large area now utilized for grazing. Population of town (census 1896), 3,493; county, 7,209. Formation: hill land, limestone; valley, alluvial. Newspapers: *Wairarapa Daily Times*, *Wairarapa Star*, and *Weekly Star*.

MATAKANA (36° 53′ S. lat., 170° 50′ E. long.), prov. dist. Auckland, co. Rodney, a post town, with money-order office, savings bank and telephone station, 49 miles north from Auckland, reached by steamer and coach, on river of name. It has a public school, Presbyterian church, farmers' club, public library, and general stores. District is pastoral. Formation: sandstone. Population about 100.

MATAKANUI. (*See* TINKERS.)

MATAURA (46° 5′ S. lat., 168° 48′ E. long.), a post town on the Mataura river, about midway between Gore and Wyndham, with money-order office, savings bank, telegraph, telephone to Invercargill, Bluff, Gore, Winton, and Riverton, and railway station, in the co. of Southland, riding of Hokonui (Otago prov. dist.), 107 miles SW. from Dunedin (fares 13s. 6d., 9s.), 32 miles from Invercargill; fares, 4s. 1d., 2s. 9d. Hotels: Mataura and the Mataura Bridge. It has a Presbyterian church, also Episcopal, Roman Catholic, Wesleyan and Disciples of Christ places of worship, State school, a branch of the Bank of New Zealand, a foundry, four blacksmithies, several stores, and tradesmen's premises, and a dairy factory. Oddfellows lodge. The Mataura Falls paper mills are here, at which wrapping, brown cap, printing, and other papers are made; the motive power is partly water and also a 20-h.p. steam-engine. Extensive new freezing works belong to the Southland Frozen Meat Company. There are also four rabbit-preserving works, two fellmongeries, and bone and manure works. Two coal-pits are here. The Mataura river runs through the town, and the banks are connected by a suspension bridge. Population, borough, 1,000; of riding 1,391.

MAUKU (prov. Auckland, Manukau co., Pukekohe riding), a post town on creek of name, with telephone station, 37 miles from Auckland, reached by coach to Pukekohe (six miles), thence rail. Coaches run to Pukekohe and Waiuku. Has one hotel, flax-mill, two schools, Anglican, Roman Catholic, Presbyterian, and Wesleyan churches, public hall. Industries: Flax, gum digging and creamery. District is pastoral. Mauku Falls and Bald Hills in vicinity. St. Bride's (Anglican) church served as redoubt in Maori war. Population, 400.

MAUNGATUA (45° S. lat., 170° E. long.) (Otago prov. dist., Taieri co., and riding of Maungatua), 24 miles W. from Dunedin, near the Maungatua hills, on Lee Creek. Conveyance per rail (19½ miles) *viâ* Outram. A post town with school, Presbyterian place of worship, public library, two dairy factories, cheese and two butter factories. District is agricultural and pastoral. Population of district 265.

MAUNGATUROTO (36° S. lat., 174° E. long.) (prov. Auckland, Otamatea co., Wairau riding), a post centre, with money-order office, savings bank, and telephone station, 91 miles from Auckland, on Wairau Creek. Auckland reached by rail to Helensville, thence steamer. Has school, Anglican and Congregational churches, and Foresters' lodge. Pastoral district. Limestone formation. Population of district about 460.

MAURICEVILLE (40° 44′ S. lat., 175° 33′ E. long.), township, with six post offices, three telephone offices, money-order office and savings bank (co. of Wairarapa North, riding of Masterton, Wellington prov., on the Kopuaranga creek and main road between Wellington and Napier, 83 miles NE. from Wellington, with which it is now connected by rail, fare 10s. 7d. and 7s. 1d., and 13 miles from Masterton. In the district (which contains townships of Mauriceville, Mangamahoe, and Hastwell) there are a town hall, six Government schools, Wesleyan and two Lutheran places of worship, limekilns, dairy factory, stock sale yards, and stores. Good roads in all parts of the district. Formation: shaley, sandstone, papa, and limestone. The lime here is found by analysis to be some of the richest in the colony. Lignite has been found. Pastoral district. Population (census 1896) of road district, 1,084.

MAXWELL TOWN (prov. Wellington, Waitotara co., and riding of Waitotara), 17 miles from Wanganui. A post town with telephone station. About 170 miles NW. from Wellington, Okehu, three miles distant, is the nearest railway station. Has State school, Anglican, Wesleyan, Lutheran and Christian Brethren places of worship, and public library. Agricultural and pastoral district. On the north and south sides of the town are gorges remarkable for their beauty. Population (census 1896) of town, 153, of riding 463.

MEANEE (39° 30′ S. lat., 176° 45′ E. long.), a post town with telephone station, in Hawke's Bay county and riding of Meanee, on the banks of the Tutaekuri river, 5 miles from Napier, with which it has daily coach communication: fare 1s. return. Railway station is at Awatoto, 2 miles distant; coach twice daily, fare 1s. each way. It has hotel, public and Roman Catholic schools and Episcopal Church (St. Thomas), Roman Catholic Church (St. Mary's), and Presbyterian, public hall. Maori Pah about three miles off. Industries: Fellmongeries, soap boiling. Splendid supply of water from artesian wells. Good land in the locality taken up for grazing, farming, and dairying. Formation: Limestone, silt deposit after flood. Population, 200.

MELROSE (Borough of), co. Hutt, prov. Wellington. Suburb of Wellington, with two hotels, four schools, Anglican, Presbyterian, and Wesleyan Methodist places of worship. Has patent slip and wool scouring industry. By the census of 1896 the population of borough was 2,044, now 2,400.

MERCER (37° 27′ S. lat., 175° 10′ E. long.), a post town, with savings bank, telegraph, money-order office, and railway station, with refreshment rooms, 43 miles S. of Auckland (Auckland prov. dist., co. of Manukau, and riding of Maungatawhiri) situated on the Waikato river. There are three trains daily, fares, 7s. 1d. and 3s. 8d., two trains daily to Huntly, one going as far as Frankton Junction. Three steamers ply to various settlements adjacent to Waikato river. Hotel: Railway. A State school is here, also two flax-mills, and saw-mills, police barracks, court-house, stores, and other buildings. Roman Catholic church. Services are held by Anglicans, and Wesleyans, fortnightly. Coal and other minerals are in the locality. Several places in the vicinity are of interest as scenes of engagements during the Maori War, and near here Captain Mercer fell. Population, with vicinity, 260.

MERCURY BAY. *See* COROMANDEL.

METHVEN (43° 32′ S. lat., 172° 0′ E. long.), possesses a post office, money-order, savings bank, and telegraph office, and railway station on the Rakaia and Ashburton Forks line, 58 miles SW. of Christchurch, co. Ashburton, prov. dist. Canterbury, riding Mount Hutt; fares from Christchurch, 7s. 4d. and 4s. 11d. Has two hotels: Methven and Canterbury. Public library, school. Roman Catholic and Anglican churches, Masonic, Good Templars', and Orange lodges and stores. District is agricultural and pastoral. Population about 500.

MIDDLEMARCH (45° 50′ S. lat., 170° 2′ E. long.) (Otago prov. dist., Taieri co., Strath Taieri riding), a post town, with money-order office, savings bank, telegraph, telephone, and railway station, 68 miles NW. from Dunedin. Fares, 6s. 1d. and 4s. 1d. One train daily. Hotels: Strath Taieri and Railway. Has public school, and Presbyterian church (Roman Catholic and Anglican visit fortnightly). District is agricultural and pastoral. Population of town 150, of riding 500.

MILTON, or TOKOMAIRIRO (46° 8′ S. lat., 170° 1′ E. long.), a borough, with a post office, savings bank, money-order, and telegraph offices and railway station; (co. Bruce, prov. dist. of Otago), on the Tokomairiro River, 36 miles distant from Dunedin SW., in the centre of the Tokomairiro plains. It is in communication by rail with Dunedin; fares, 4s. 7d. and 3s. 1d. The railway to Lawrence branches off at Clarksville Junction, 2 miles SW. from Milton. The hotels are the White Horse, Commercial, Milton, and Royal. The National and New Zealand Banks have branches, and several insurance companies have agencies, and there are numerous stores. The places of worship comprise Anglican (with rectory), Presbyterian, Wesleyan, and Catholic churches. A grammar or district high school, also a Catholic and infant school, Masonic, Oddfellows' and Hibernian lodges, and an Athenæum are here. Has pottery works, woollen mills (producing first-class worsted yarn), dairy factory, flour and oatmeal mill and brewery, and considered to be one of the cleanest and best laid-out towns in New Zealand. There are several dredges, gold and coal mines in the district, and the carboniferous area is a large one. There are extensive limekilns in the vicinity, the principal of which are worked by the Milburn Lime and Cement Company. Population of borough (census, 1896), 1,139, now 1,500. Good agricultural district. Local newspaper, the *Bruce Herald*, with large circulation.

MIRANDA (prov. Auckland, Waikato co.), a post town, on the Pukorokoro, with a telegraph, savings bank and money-order office, public library, and public school, 15 miles from Thames, and 60 from Auckland, reached by boat. There are hot springs, flax and timber mills. Formation: volcanic. Population, European 60, Maories 500.

MOHAKA (prov. dist. Hawke's Bay, Wairoa co. and riding of Mohaka), 50 miles from Napier, on river of name. There is a post and money-order office, savings bank and also a telephone station. Has hotel, school, public library, and church. Napier reached by horse. Pastoral district. Population of town, 40; district, 120.

MOKAU (38° 40′ S. lat., 174° 30′ E. long.) (Kawhia county, prov. dist. of Auckland). A township on the Mokau river, with post-office, telegraph station, and school, 45 miles from New Plymouth. Mokau is noted for its beautiful river, navigable some 25 miles for boats of 100 tons. Two boats run regularly to Waitara. Prohibition district. Anglican services held. Pliocene formation. Coal-mining and pastoral district. Industry: Lime-burning and timber-getting, several mills being at work. Ironstone is found on the beach. Gold and copper has also been found in the district. Population of township, 40; district, about 600.

MOKIHINUI (41° 35′ S. lat., 172° E. long), a post town with money-order office, telephone and savings bank offices and railway station, at the mouth of the river of the same name, in Buller county, and riding of Karamea, Nelson prov. dist., about 25 miles N. of Westport, with which there is railway communi-

cation Hotels: Mokihinui, Corboy's, Vaughan's, Empire and Railway. Has two State schools, police station and barracks and public library. Coal mine at work. Formation: sandstone and granite. Population of town, 108.

MORNINGTON (45° 52′ 11″ S. lat., 170° 31′ 11″ E. long.), a suburban municipality on the west side of Dunedin, in the county of Taieri, prov. Otago. Has post-office and M.O. office and telegraph station. Cable tram connects with Dunedin, three-quarters of a mile distant. Has hotel, district school, hall, Foresters' court, Presbyterian, Wesleyan, Baptist, and Anglican churches, and public library. District is pastoral and manufacturing, having boot factory, iron foundry, and cabinet manufactory; 340 miles NE. by boat to Wellington. Lighted with kerosene and gas. Limestone formation. Population of borough (census, 1896), 3,584, now about 4,000.

MORRINSVILLE, a small post-town, in the county of Piako, and riding of Waitoa; provincial district of Auckland; with telegraph, money-order, savings bank, and Junction railway station in the Piako district on the Hamilton-Te Aroha line, 103 miles SE. of Auckland; fares, 13s. and 8s. 8d. It is the branching off point of the Thames Valley and Rotorua Railway, now completed and open to Putaruru and Rotorua. It has one hotel, the Nottingham Castle, containing twenty rooms, public school, Anglican church, flax mill, also stores, workshops, and workmen's cottages. Morrinsville is the centre of the Lockerbie estate, containing about 25,000 acres, partly under cultivation. This estate, if cut up in sections of 500 to 5,000 acres, will help the progress of the district. Population of village, 151; of riding, 900.

MOSGIEL (46° S. lat., 170° 20′ E. long.) (Otago prov. dist.), a municipal post town, with money-order, savings bank office and telegraph station, in the county and electorate of Taieri, police district, Dunedin, 10 miles S. from Dunedin; communication by rail, fares, 1s. 3d. and 10d.; return, 2s. 3d. and 1s. 6d. Hotels: Railway and Mosgiel. There are here agencies of the National and New Zealand Banks, Presbyterian, Anglican, Roman Catholic, Baptist, Wesleyan, Plymouth Brethren, and Salvation Army places of worship, county council offices, court-house, State schools, one at Mosgiel and one at East Taieri, and St. Mary's (R. C.) school, stores, a Volunteer drill hall, Athenæum, Racing Club, Poultry, Horticultural and Agricultural Societies, Masonic, Oddfellows' and Druids' lodges, chess club, Orange, Temperance, Caledonian, and other societies. The woollen factory is an extensive brick and cement establishment, whence are turned out the well-known Mosgiel tweeds, and other woollen goods. The electric light is used, the machinery working night and day; also butter factories, creameries, and large flour mill are here. Town lighted with kerosene. Fine agricultural district. Waironga Mineral springs at North Taieri, the mineral water of which is said to have wonderful curative properties. Population of borough (census 1896), 1,382. Newspaper: *Taieri Advocate*, twice weekly.

MOTUEKA (41° 3 S. lat., 173° E. long.) a borough with post, savings bank, money-order, and telegraph offices, in Waimea co., Motueka riding (Nelson prov. dist.), on the banks of the Motueka river, which is here crossed by a fine bridge. It is 32 miles NW. from Nelson overland (by sea only 14), communication being by coach, thrice weekly, *viâ* Richmond, fare, 5s., or steamer, fare, 2s. 6d. Hotels: Motueka, Swan, and Post Office. There is a State school (boys and girls), Anglican (St. Thomas) and Wesleyan churches, an institute, a court-house, saw-mill, butter factories, sash and door factory, two bacon factories, putting through about 2,000 carcases in the season, flour-mill, hop-growing, an orphan asylum, and branch Bank of New Zealand, also Oddfellows', Foresters', I.O.G.T., and Freemason societies. The soil in the vicinity is fertile, and the country very level. Nearest route to Table Land and Mount Arthur; also on main road to Takaka and Collingwood districts. A regular resort for picnic parties. Population about 1,000.

MOUNT ALBERT (Eden co., riding of Matukituki, prov. dist. Auckland) a post town, with telephone communication, 7 rail miles from the city of Auckland. It is a flag station on the Helensville line; fares, 1s. and 7d.; 564 miles by East coast steamer from Wellington. 'Bus also every hour, fare 6d. It is noted for its pretty villas and healthy situation. No hotels, two public schools two stores, Anglican, and Wesleyan places of worship. Soil—volcanic, the Mount being an extinct volcano. Population about 1,000.

MOUNT CRIFFEL. *See* CRIFFEL.

MOUNT IDA, now NASEBY, which *see*.

MOUNT SOMERS (43° 44′ S. lat., 171° E. long.) (prov. Canterbury, Ashburton co. and riding of Mount Somers), 78 miles from Christchurch, a post town, on Ashburton river, with money-order, savings bank, telegraph office and railway station, 26 miles from Ashburton; fares, 3s. 4d. and 2s. 3d. It is 259 miles SW. from Wellington by rail and steamer. Has hotel, Government school, Anglican church, literary society, I.O.G.T. lodge, limekilns, coal-mines, and stone quarry in district. Agricultural and pastoral district, in which is Ashburton gorge and Lake Heron. Population, 206.

NAPIER (39° 29′ 12″ S. lat., 176° 55′ 12″ E. long.), the chief town in the provincial district of Hawke's Bay, with post office, savings bank, money-order and telegraph offices, is situated on a peninsula (known as Scinde Island), about 7 miles from the southern bend of the Bay, in the estuary of the Rivers Esk and Tutaekuri, on the east coast of the North Island. "The peninsula terminates to the north in a hill, or rather a group of hills closely conjoined. On the flats at their base are the banks, shops, churches, Government and other buildings, and, studded picturesquely along their sides and tops, are the dwelling-houses of the wealthier townspeople, surrounded by lawns and gardens." The curve of the coast line to the southward, as viewed from the hill, is said to resemble the aspect of the Bay of Naples. It is about 200 miles NE. by sea from Wellington, and 384 from Auckland SE. Rail to Wellington (200 miles), also Wanganui and New Plymouth. Coaches run to Taupo, 100 miles, 50s.; return, 90s.; and to Moawhango, 90 miles, fare 20s.; return, 37s. 6d. It has several hotels, among others the Masonic, Criterion, Royal, Clarendon, Central, Empire, Exchange, Provincial, Marine Parade, and several others. It is under municipal government, having been constituted a borough on November 26, 1874. It is divided into three wards—North, Central, and South, each returning three councillors. The town was laid out in sections, of which auction sales first took place on April 5, 1855. It possesses a fair harbour, suitable for vessels with a limited draught of water, and a good anchorage, with heavy moorings, in the bay (Hawke Bay, of Cook). The roadstead is exposed during easterly gales, but the anchorage being good, the bay is comparatively safe. Expensive works have been undertaken to improve the harbour entrance, known as Port Ahuriri, and now large steamers of, say, 3,000 tons, are enabled to lie alongside the Glasgow wharf at the Breakwater. A magnificent esplanade —The Marine—has also been built at a cost of £13,000, and a road in continuation therefrom has been built to the Glasgow wharf, at a cost of £7,000. These works have obviated the tendering of vessels in the bay. The Union, New Zealand, N.S. Wales, National, and Australasia Banks have branch offices here. All the leading insurance companies have branches or agents. The cathedral church of St. John's was opened in December, 1888, the tower and side chapel have yet to be built. It is the largest ecclesiastical edifice in New Zealand, the style is 13th century Gothic, there is also St. Augustine's, a smaller church, in Bower Street, a Presbyterian church (St. Paul's) in Dalton Street, a Wesleyan Methodist chapel (Trinity) in Clive Square, a Roman Catholic church (St. Mary's) in Shakespeare Road, Roman Catholic chapel (St. Patrick), in Munro Street, New Baptist chapel in Tennyson Street, and a church of the Seventh Day Adventists in Milton Road (Salvation Army services held in Temperance Hall); also an Athenæum, with reading-room, Philosophical Institute, with which is connected an excellent museum and scientific library, Theatre Royal and Gaiety, Town Hall, an Oddfellows' hall, two Masonic lodges, hospital (with 58 beds), court-house, council chambers, boys' and girls' High schools, ladies' day and boarding schools and three large public schools, and Roman Catholic schools. There are several rowing and other athletic clubs, also dramatic and jockey clubs, acclimatization society, Caledonian society, fire brigade, lodges of Masons (N.Z.C.), Good Templars and Rechabites, Oddfellows, Foresters, Hibernians, Orangemen, and Druids. The streets are lit with gas, and there is a high pressure water supply. Napier is the headquarters of the Bishop of Waiapu. The district is principally a grazing one, large quantities of wool being grown; considerable attention is also being given to farming and latterly to the export of tinned and frozen meat; Hawke's Bay having more surplus stock than any other part of New Zealand. Exports from port during 1899 amounted to £988,466. The population of borough (census 1896) was 9,311. Newspapers, *Daily Telegraph* and *Hawke's Bay Herald*, both dailies.

PORT AHURIRI (39° 28′ 44″ S. lat., 176° 55′ 10″ E. long.), 1¼ mile W., is included within the municipal boundary; it is separated from the town proper by a hill, formerly surrounded by water, and still known as Scinde Island. Most of the wholesale stores are here, and there are four hotels—London, Railway (opposite the railway terminus), Commercial, and Crown, post, telegraph with money-order office and savings bank, a public school, a Presbyterian church, and Episcopal church (St. Andrew's). The climate of Napier is noted for its mildness, and the town is the resort of asthmatic and consumptive patients, especially in the winter season. Napier is the sole port for the large grazing district of Hawke's Bay, and the exports are very large.

NASEBY (44° 50 S. lat., 170° 14′ E. long.) (variously known as MOUNT IDA and HOGBURN) is a municipality and an alluvial mining township, with money-order, savings bank, and post and telegraph offices, in the county of Maniototo, electorate of Waihemo, police district of Central Otago (Otago prov. dist.), 92 miles from Dunedin. Coach communication twice weekly with Palmerston, and thence train to Dunedin; also daily coach from Naseby to Ranfurly, the present terminus of the Otago Central Railway to Dunedin. The principal hotels are the Royal, Victoria, Empire, and Ancient Briton. It lies 1,900 feet above the sea-level, at the foot of Mount Ida, which is 5,600 feet high, and in the winter season the temperature is rather low, but the climate is keen and bracing and very healthy, and said to be peculiarly adapted to consumptive patients. Banks: New Zealand and N. S. Wales. The larger buildings are the court-house, county council chambers, town-hall, district hospital (with thirty beds), the gaol, the Masonic hall, Oddfellows' hall, Athenæum, with a good library, and Episcopal, Presbyterian and Catholic places of worship. Government school. There are several stores. A flour-mill, worked by steam and water-power, has been erected in the vicinity. There are Masonic and Oddfellows' lodges, a volunteer fire brigade, rifle corps, various social clubs; the Maniototo A. and P. Association, and County Council. At a cost of about £76,000 the Government constructed a large head race, carrying 40 heads of water a distance of 70 miles, also a large sludge channel to convey tail water to Taieri river, 9 miles distant. Coal is found in limited quantities in the vicinity, and several pits are in work. Rough Ridge, about 16 miles distant from Naseby, has a number of mineral reefs. Several minor digging townships lie around

Naseby, notably Spec Gully, Little Kyeburn, Kyeburn diggings, Hamilton, Sowburn, Serpentine, Hyde, Hill's Creek, &c. There is a large auriferous area, practically limitless in extent, but water is scarce, except in the wet seasons of the year. William Parker and his mates first found gold here (in Hogburn Gully) in June, 1863. Population of borough (census 1896) was 500; county, 3,890. Newspaper: *Mount Ida Chronicle.*

NELSON (41° 16′ 17″ S. lat., 173° 18′ 46″ E. long.), a post town with savings bank, money-order and telegraph office, and an episcopal city, and the capital of the provincial district of the same name (co. of Waimea), is prettily situated on the shores of a small harbour at the bottom of Blind Bay, hemmed in by a semicircle of lofty hills. This harbour, although confined, is well protected, but the roadstead is occasionally exposed to a heavy swell during north-west and north-east gales. Steamers ply regularly to all the neighbouring ports, transhipping to Sydney and Melbourne. Coaches ply to West Coast twice weekly, and to Blenheim thrice a week. A tramcar and an omnibus run to the port every half hour. It is distant about 1,180 miles from Sydney, 1,410 from Melbourne, and 120 miles from Wellington. A small stream called the Maitai River runs through the town. Hotels: Masonic, Trafalgar, Commercial, Panama, and thirteen others. Nelson possesses a literary institute and museum, art gallery, numerous public and private schools, and a girls' and boys' college, school of mines, a cathedral (Christ Church), churches of various denominations, Theatre Royal, Masonic hall, Provincial hall, and public buildings, and very many handsome business premises and private residences; also a public hospital (with 68 beds and Röntgen Rays apparatus), lunatic asylum (with 43 wards and 106 beds), and two orphanages (St. Mary's, Roman Catholic, and St. Andrew's, Protestant). The Boys' Orphanage, where all Roman Catholic destitute orphan lads from all parts of New Zealand are sent, is situate at Stoke, five miles from town. The institution, which was established in 1874 by Rev. Father Garin, is legally known as St. Mary's Industrial School, and is a large one, with fine buildings, erected in the centre of a farm of 675 acres; during 1900 a Royal Commission reported very adversely on the general conduct of the school, and recommended drastic changes. The New Zealand, Union, National, and N.S. Wales Banks, and all the leading insurance companies, have agencies or branches here. Masonic (E.C. and N Z.C.), Oddfellows', Foresters', Druids', Rechabites', and Good Templars' lodges. The manufactories of the town comprise leather, breweries, soap, jam, biscuit and confectionery, and other industries. The city is lighted with gas, has a good supply of pure mountain water, and is under municipal government. The bishop of the diocese is the Right Rev. C. O. Mules. A railway connects Nelson with Motupika, 34 miles and the first section of the Midland Railway Company's line has been completed, including a tunnel of ¾ of a mile in length through Spooner's Range. This line connects with the Government line at Belgrove, and the Government, having taken over the Midland Railway Co.'s property, have extended the line to Motupiko, the first stage in the proposed connection with the West Coast, and 12 miles from Belgrove. A railway extends to the port, about 76 chains. The town is well supplied with hackney carriages at moderate fares. At the port are several inns, public hall, customs office, and one of the best wharves in the colony. Formation: sandstone, carbonaceous shale, and drift.—RICHMOND (borough), a suburb of Nelson, 8 miles to the SW., is pleasantly situated on an inlet of the sea, commanding a frontage of about 2 miles, has two public schools, churches, several social and business institutions, and a reservoir and reticulated water service. Exports from prov. district during 1899 amounted to £109,288. From its mild and sunny climate Nelson is much visited by invalids. The population of borough of Nelson (census 1896) was 6,733; district, 18,410. Newspapers: the *Colonist* (morning) and the *Nelson Evening Mail.*

NELSON CREEK (Prov. Westland, co. Grey), 20 miles NE. from Greymouth, a post town with money-order office, savings bank, and telephone station. Wellington reached by coach and rail to Greymouth, thence steamer. Has four hotels, State school, Anglican and Roman Catholic churches. Gold-mining district. Population about 450.

NENTHORN (Waikouaiti co. and riding of Hawkesbury, Otago prov.), 70 miles NNW. from Dunedin, on Nenthorn Creek. Coach to Palmerston. Has hotel and school. Water from wells and tanks. District is a mining one. Population, about 30.

NEWMARKET (36° 6′ S. lat., 174° 51′ E. long.), prov. Auckland, co. Eden), is a post town and borough, with savings bank, money-order, and telephone office, and railway station. It is three rail miles from Auckland, situated on Hobson's Creek, and around the entrance of the Great South Road, the main highway to the Waikato and Onehunga. It is a station on the line to Onehunga, fares, 4d. and 3d. Cars and 'busses also run. Hotels: Captain Cook, Carlton Club, Royal George and Newmarket. It lies close to the foot of Mount Eden (on the Sunnyside), facing the north, and is surrounded by the Public Domain and Parnell to the north, Remuera and Ellerslie to the east, Epsom and Mount Eden to the south and west. The view from the top of Mount Eden is magnificent. There are council offices, one public school, several private schools, Wesleyan, Primitive Methodist, Salvation Army and Seventh Day Adventist places of worship, two breweries, Rechabite, Good Templars', Orange, Druid, and Oddfellows' lodges, a public hall, library. The railway workshops are here. Town is lighted with gas. Population (census 1896), 1,929, now 2,200.

NEW PLYMOUTH (39° 3′ 35″ S. lat., 174° 4′ 58″ E. long.), co. and provincial district of Taranaki, electorate of New Plymouth, with a post and telegraph office, money-order, and savings bank. It is the chief town in the provincial district of Taranaki, was founded in 1841 by emigrants from the counties of Devon and Cornwall. It is situated on the west coast of the North Island, near to Mount Egmont, 120 miles to the SW. of Auckland, 42 feet above sea-level. The town is picturesquely located on the sea-shore. Rail to Wellington *viâ* Wanganui and Palmerston North. There is a short line to Waitara. Coach runs to Opunake three times a week, fare, 13s. Steamers from Dunedin, Lyttelton, Wellington, and Nelson call on their way to Manukau (Auckland) twice a week. There are six hotels: the Criterion, Imperial, White Hart, Taranaki, Terminus and Red House, also the Grand Coffee Palace. The principal thoroughfares are Devon, Courtenay, Queen, and Brougham Streets, which are wide and good; the Huatoki creek or river runs through the centre of the town. There is a large steam flour-mill, and several large warehouses; also a large hospital having 40 beds, a High school, a large central school, private schools, and Courtenay Street and West (both infant) schools. The Theatre Royal is a large, lofty building, capable of holding over 1,000 persons. The Drill Hall is a large edifice, holding about 2,000 persons. The Masons and Foresters have lodge rooms of their own. The Church of England (St. Mary's) is a fine stone edifice, at the foot of Marsland Hill, in the churchyard lie many of the settlers and soldiers killed in the struggle with the Maoris; the Roman Catholics, Wesleyans, Primitive Methodists, Presbyterians, and Baptists have chapels. There is a large convent attached to the Roman Catholic Chapel. There are branches of the Bank of New Zealand, New South Wales, Australasia, and the National Bank of New Zealand. Masonic lodges, also lodges of Oddfellows, Foresters, Druids, Rechabites, and Good Templars. The town is lighted with gas, and has a very plentiful supply of excellent water, derived from the Waiwakaiho river, about two miles distant. The Recreation Grounds here are tastefully laid out, and are now a frequent place of resort. There is a large lake on which are boats. For some years past extensive works have been in progress at Moturoa, about two miles from New Plymouth, with the view of constructing a harbour there. It affords shelter in bad weather for the small vessels on the coast. The railway is extended from town to the breakwater. This is the chief outlet for the stock shipped from the Waimate plains, and the trade of the inland towns of Inglewood, Stratford, Hawera, and other places. The district is one of great fertility, and adapted for the growth of almost every English fruit and cereal. It is a great dairying district. There are large boot and shoe, sash and door, and timber factories, and a tannery, &c. Exports from Taranaki provincial district during 1899 amounted to £463,093. Formation: volcanic; chief rocks trachytic. Population of borough (census 1896), 3,825, now 4 000; county, 9,970. Local journals: The *Taranaki Herald* established 1852), *Daily News* (both daily), and *The Budget* and *Taranaki News* (both weekly).

NEWTON—*See* GREY LYNN.

NGAHAURANGA (prov. Wellington, Hutt co., Porirua riding), 4 miles from Wellington, with a post and money-order office, savings bank, railway and telephone station. Has two hotels, school and church, tannery, two fellmongeries, fiddle-string factory, freezing works. Population of town and district, 500.

NGAPARA (44° 52′ S. lat., 170° 45′ E. long.) (Waitaki co. and riding of Waiareka; provincial district of Otago), a post town, with money-order office, savings bank, railway and telephone station, on the Waiareka Creek, 17 miles from Oamaru, with which it is connected by a line of railway; fares, 2s. 3d. and 2s. 6d.; return, 4s. 6d. and 3s. Hotels —Railway and Terminus. It has a public hall and library, Masonic hall, public school, stores, Oddfellows' and Protestant Alliance Societies, and tradesmen's premises, roller flour-mill, and brick and tile factory. Presbyterian church. Agricultural and pastoral district. Limestone formation. Coal pits are worked in the neighbourhood. Population about 300.

NGARUAWAHIA (37° 58′ S. lat., 175° 11′ E. long.), a township, with post and money-order office, savings bank and telegraph and railway station, in the county of Waipa and riding of Newcastle (prov. dist. of Auckland), beautifully situated at the confluence of the Waipa and Waikato rivers (the Maori name signifies, "The Two Waters"), 74 miles S. of Auckland. The Great Southern Railway passes through it (fares, 18s. 8d. and 12s 6d.). Hotels: Delta and Waipa. The river is spanned by a handsome truss bridge. There is also a bridge over the Waipa, 480 feet long, and the road to the Waingaro Hot Springs crosses it. The Bank of New Zealand has an agency, and several insurance companies have their representatives. There are County Council chambers and four places of worship, Anglican, Presbyterian, Wesleyan, and Roman Catholic, a Government school (attendance 120), brewery, library, police-station, bone-mill, butter factory (with numerous creameries attached), which, when in full work, turns out from three to four tons of butter daily, and freezing works, and saw-mill. The township is one of the most picturesque in New Zealand. The tomb of the Maori king, Potatau, is in the centre of an octagon, which has been fenced in and planted with trees and shrubs. The land round the township is generally of poor quality, but adapted for grazing and farming. Formation: recent lacustrine alluvial. The area of the district is about 32,000 acres. Population (census 1896) of town district, 235; of riding, 628.

NIGHTCAPS (prov. Southland, Wallace co., and riding of Wairio), 44 miles NW. from Invercargill, on Wairio creek, on the Nightcaps Branch line. Fares from Thornbury Junction, 3s. 3d. and 2s. 2d. A post town with telephone station and savings bank. Hotel: Railway. One public school, Presby-

terian and Wesleyan churches, and I.O.G.T. lodge. Coal-mining district. Population, 200

NORMANBY (39° 27′ S. lat., 174° 15′ E. long.), a post town in the county of Hawera and riding of Hawera, 45 miles from New Plymouth and 64 miles from Wanganui, with a money-order office, savings bank, telephone, telegraph and railway station, several stores, public school, Horticultural Society, dairy factory, and English and Presbyterian churches. Hotels: Imperial, Commercial, and Normanby. Coach to Okaiawa (fare 6d.). There is a native settlement close by. It is a station on the New Plymouth and Wanganui line: fares, from former, 5s. 9d. and 3s. 10d. Industries: Dairy factories, bone-mills, timber yards. Mount Egmont, easy of ascent in February and March, in district: there is first-class accommodation at the Mountain House, with moderate tariff. District is said to be the finest grazing district in New Zealand and the "hub of the dairy industry." Formation, volcanic. Population (census 1896), of town district, 396: of riding, 1,282.

NORSEWOOD (Hawke's Bay prov. dist., Waipawa co., riding of Norsewood), a post town, with telephone communication, savings bank, and money-order office, 66 miles SW. from Napier, and about 4 miles distant from the Ormondville Railway Station, with which there is daily coach communication, fare 1s.; established in September, 1871, as a Norwegian farm settlement, being divided in sections of 40 acres. The main road from Napier to Wellington passes through it. There are here Wesleyan and Lutheran places of worship, a public school, Rechabite, Good Templar and Foresters' lodges, public hall, library, and two hotels (Crown and Junction), four butter factories, and three stores. Ormondville is 4 miles distant. The surrounding land is of fair quality, much of it heavily timbered, giving employment to several saw-mills. Population of district with vicinity, about 1,000.

NORTH EAST VALLEY (35° S. lat. 177° E. long.), prov. dist. Otago, co. Taieri, a suburb of Dunedin and a municipality on the Leith. Has post office (with street delivery), money-order office, telegraph station, telephone bureau, town hall, police-station, and three hotels, three Government schools, public library, Anglican, Presbyterian, Roman Catholic, Baptist, Church of Christ, and Salvation Army places of worship. There are tanneries, potteries, dye works, steam laundries, stone quarries, brickworks, dairies, and rug factories. Oddfellows', Foresters', Protestant Alliance, Masonic, and literary societies. Is lighted by gas. Connected with Dunedin by train, every 4 minutes, fare 2d. Mount Cargill, extinct volcano, within easy distance. Population of borough (census 1896), 3,374; now 3,500.

OAMARU (45° 6′ S. lat., 171° 1′ E. long.) with post and money-order offices, savings bank, telephone and telegraph office. It is the most northern town in Otago, and ranks next to Dunedin, being next in size and the largest town in the provincial district. It is in the co. of Waitaki, and is distant from Dunedin 78 miles, and 152 from Christchurch, with both of which cities it is connected by a line of railway. There is communication to Dunedin by the railway, there being three trains daily, fares, 9s. 10d. and 6s. 7d., and steam communication with all parts of the colony occasionally. Among the hotels are the Queen's, the Globe, White Hart, Star and Garter, Junction, Criterion, and North Otago. Oamaru is situated in a bay at the Oamaru headland, to the N. of Cape Wanbrow, about 43 miles N. from Taiaroa Head, and 13 miles S. from the mouth of the Waitaki river. It is the terminus of two branch lines, one of which extends up the valley of the Waiareka, a distance of 24 miles; and the other up the valley of the Waitaki to Hakataramea, 45 miles. Surrounding the town is the largest grain-producing district in the Middle Island, producing more than a third of the entire yield of Otago. Oamaru abounds in building stone of magnificent quality, a pure white limestone, of which the town is principally built, and for this reason it is sometimes called the White Stone City, and alluvial gold mining is carried on at Livingstone and Maerewhenua, 30 miles from Oamaru. Originally an open roadstead, an artificial harbour—rendered necessary by the immense export of agricultural produce, especially cereals, and latterly frozen meat—has been constructed; and a breakwater and wharves have been built of concrete and wood. Vessels drawing 24 feet of water can be accommodated at the wharves. The breakwater is 1,850 feet long, 36 feet wide, and 32 feet high. The harbour is one of the safest in the colony. Ships of very large tonnage can now lie in perfect safety within its shelter. A mole, carried out to seaward for 1,720 feet in the direction of the breakwater, has been built. The total area enclosed by the mole and breakwater is about 60 acres. The entrance to this is about 400 feet in width. The wharves are provided with three steam cranes. The public buildings comprise, among others, St. Luke's (Anglican), St. Paul's, and Columba, (Presbyterian), the former a large and handsome stone building belonging to the Presbyterians, Wesleyan chapel, Congregational chapel, Primitive Methodist, Roman Catholic Basilica (St. Patrick's), court-house, and the hospital. There are High schools (boys' and girls') here, Middle school, North school, South school, and Roman Catholic school, Athenæum, a Masonic hall, hospital (having 17 beds), benevolent institution. Banks: New Zealand, National, Union, and New South Wales. Several insurance companies are represented by agents. There are a woollen factory, flour-mills, and oatmeal-mills and extensive meat-freezing works and abattoirs, and the export of frozen meat from this district is larger than from any other part of Otago. Among later buildings are grain stores of great size, provided with elevators on the American principle; New Zealand Loan Company's premises, and the Theatre. The town is lighted with gas, and is well supplied with water from the Waitaki, which is conveyed to the town by a race 27 miles. Good brown coal or lignite has been found and is worked in the neighbourhood. The exports from the port during the year 1899 amounted to £205,609; a large quantity of produce is railed to other ports to suit despatch of vessels. Population of borough (census 1896) was 5,225; county, 8,876. Local newspapers, the *Oamaru Mail* (evening) and *North Otago Times* (morning).

OBAN (Stewart Island co.). A small township in Half Moon Bay, with population of about 40.

OHAEAWAI (35° 20′ S. lat., 173° 55′ E. long.) (county Bay of Islands; ridings Pakaraka and Waimate, prov. dist. Auckland), a post town, with savings bank, money-order, Government Insurance, Registrar of Births, &c., and telegraph office. The native village of Ohaeawai, situated halfway between Russell and Hokianga, is a place of considerable historical interest, having been the scene of an action most disastrous to the British troops during the first Maori war. The battle-field and the old pahs are still pointed out and are kept under "tapu" from cultivation by the natives. It is also celebrated for its hot springs, which find vent in numerous places, extending over an area of five or six square miles. The most important are situated two miles from the village, and range in temperature from 90° to 150°. They have strong mineral properties and are famous for their beneficial effects in cases of rheumatism and skin diseases, while to the numerous class of invalids, benefiting by change of air, a short residence within the influence of the strong gases issuing from the ground in the vicinity, they are said to act as a powerful tonic. Important mineral indications are also found, particularly sulphide of mercury, native mercury, sulphur, iron, quicksilver, etc. Improved accommodation for visitors to the hot springs is now provided. It is about 145 miles from Auckland, by coach to Kawa Kawa 6s.), rail to Opua (1s. 6d.), steamer to Auckland (cabin 20s., nteerage 10s.), coach also runs to Hokianga (fare 10s.; has a Government native school, also European, a native Episcopal church. Masonic lodge, Sports Clubs, and *Ohaeawai* hotel; also stores and tradesmen's shops. There is good pheasant shooting in the neighbourhood, and a Native and European race meeting is held each year. The Colonial Exploitation Company erected an extensive plant to work cinnabar deposits in hot springs, but work was abandoned owing, it is said, to the over-powering gases met with. Formation: volcanic. Agricultural and pastoral district. Population of town 92, of riding, 432.

OHAU.—Small town on the west coast of New Zealand, 56 miles NW. of Wellington. Has post and telegraph office, and railway station. There are no hotels, banks, or churches, but has a State school, a Mechanics' Institute and a butter factory. District agricultural and pastoral, with a population of about 350.

OHAUPO (38° 18′ S. lat., 175° 13′ E. long.), situated in the centre of the delta formed by the rivers Waipa and Waikato (Waipa co., riding of Pukekura, prov. dist. Auckland), is a post town, with savings bank, money-order, telegraph office and is a station on the Auckland Southern Railway, and is about equi-distant from the important townships of Hamilton, Cambridge, Te Awamutu, and Alexandra, forming a geographical centre admirably suiting it as the future county town. Ohaupo is 94 miles S. of Auckland; fares 11s. 10d. and 7s. 11d. The line is completed to Poro'otarao, 53 miles further south, and there are also extensions to Cambridge and Te Aroha; has one hotel, the Ohaupo. Episcopal, Wesleyan, and Catholic churches, a district state school, a general store, creamery, and a butchery. Ohaupo, from its central position, is the most convenient place in Waikato for the collection of stock, and it is here that the leading firms have their cattle sale-yards, and sales are held regularly, about 500 head of stock being yarded weekly. Agricultural district. Population of town about 200; of district, 1,500.

OHINEMUTU. *See* ROTORUA.

OHIWA (37° 58′ S. lat., 177° 10′ E. long.), prov. dist. Auckland, Whakatane co., riding of Omataroa. Has post and telephone office, hotel, store, school, ferryman's residence, smoked fish factory, and shipping yards, is situated on the Opotiki side of the very capacious Ohiwa harbour, which lies about midway between Whakatane and Opotiki, 203 miles from Auckland and 144 miles from Thames. The entrance to the harbour is broad and deep, there being a depth of 18ft. of water on the bar at high tide. Within, the harbour is very deep and grandly sheltered. Opposite the hotel there is 60ft. of water. Two and a half miles eastward of Ohiwa is the entrance to the Waiotahi river. Nearest railway station Rotorua, 77 miles, by splendid road and picturesque scenery. Population of village, about 25.

OKAIHAU (35° 15′ S. lat., 171° 15′ E. long.) (Bay of Islands co., Prov. Auckland, riding of Waimate), 181 miles from Auckland. A post town with money-order office, savings bank and telephone station. Has two schools, boarding-house, saw-mill, Anglican and Wesleyan churches. District is agricultural and pastoral. Coach to Kawakawa, rail to Opua, thence steamer to Wellington or Auckland. Formation: volcanic. Population about 360.

OKATO (Taranaki co. and prov., Parihaka riding), 18 miles from New Plymouth. A post town with telephone station. Has one hotel, State school, public library, Anglican, Wesleyan, and Roman Catholic churches, two creameries, and butter factory. Water from wells. Mount Egmont is in the district. Dairying district. Population of town and district, 263.

OMAPERE (35° 35′ S. lat., 173° 25′ E. long.), (Auckland prov., Hokianga co., Omapere riding.) A township, 100 steamer miles from Auckland, on Hokianga river, with post and postal note office; also a telephone station, and district school. District, agricultural and pastoral. Industries: Kauri gum

digging and puriri sleeper cutting. Formation: limestone conglomerate and sandstone. Population, 70; riding, 800.

ONEHUNGA (36° 56′ S. lat., 174° 48′ E. long.), a seaport borough and port of entry, with savings bank, post and telegraph offices, and money-order office, 7 miles from Auckland (prov. Auckland, co. and electorate of Manukau), with which it is connected by railway, the railway station being in the middle of the town, in Queen Street. Eight trains each way daily, fares, 1s. and 9d. Omnibuses also ply during the day, connecting with tramways. There is a good metalled road between the two places. Principal hotels: Royal, Exchange, Manukau, Railway Terminus, Victoria, Prince Albert, and Hibernian. It is the port of Manukau, and the depôt for the Waiuku and surrounding district. There are Freemasons', Rechabites', and Foresters' societies, Episcopalian, Presbyterian, Wesleyan, Congregationalist, and Roman Catholic (St. Mary's); and Salvation Army places of worship, also a public and a Masonic and Foresters' hall, convent, court-house, branch National Bank of New Zealand, district boys' and girls' school, private and Catholic schools, and police-station. The New Zealand and other Insurance Companies have agencies here. The Maungakukie Pah overlooks the town. The district is well suited for agricultural purposes, the soil being volcanic, and the neighbourhood is largely patronized by invalids, the climate being mild and salubrious. A bridge nearly half a mile in length, costing about £18,000, connects the town with the fine agricultural district of Mangere. A railway wharf has been built, and water laid on for the shipping. Industries: a saw and planing mill, three tanneries, gas works, glue works, waterworks, and a large woollen factory. A considerable trade in agricultural and dairy produce is carried on between Onehunga and the settled portion of the harbour, giving employment to two small steamers. The Onehunga timber trade is very extensive. The Union and Northern Steamship Companies run a steamer bi-weekly to New Plymouth, and other Southern ports; the latter company have a number of coastal steamers trading from this port. Population about 2,900.

ONGAONGA (Hawke's Bay prov., Waipawa county and Ruataniwha riding), 46 miles from Napier, a post town with money-order office, savings bank, and telephone station. Coach from Waipawa, Mondays, Wednesdays, and Fridays, 10.30 A.M. fare 3s. Has hotel and public school. Population (census 1896) of town, 49; riding 1,095.

ONSLOW (borough of), co. Hutt, prov. Wellington. Has a post and money-order office, telegraph station, savings bank, and railway station. There are three hotels, three schools, tannery, soap works, candle works, Anglican and Wesleyan churches. Town is lighted with gas. The borough includes townships of Kaiwarra, Khandallah, Crofton and Wadestown. Population about 1,300.

OPAKI (Dreyerton) (40° 51′ S. lat., 175° 29′ E. long.), an agricultural and pastoral district, in the co. of Wairarapa north, riding of Masterton, and provincial district of Wellington. The township is on the main road between Wellington and Napier, and lies 75 miles from Wellington, 4 from Masterton. It is in railway communication with the capital, fares 9s. 7d. and 6s. 5d. There is a post-office, telephone bureau, church, saw-mill, and three public schools. Agricultural district. Population (census 1896) of town was 400; of riding, 3,110.

OPHIR, or Blacks (45° 2′ S. lat., 169° 26′ E. long.), a mining township (Vincent co. riding of Manuherikia, Otago prov. dist.), 139 miles NW. of Dunedin, the communication being by rail and coach *viâ* Middlemarch or Lawrence. Hotels—Carrier's Arms, Chatto Creek, Black's and Shamrock. It has Bank of New Zealand; a post, money-order and telegraph office and savings-bank, Athenæum, a public school, court-house, police barracks, lock-up, a flour-mill, and several stores. Roman Catholic and Presbyterian churches. Coach to Clyde; fare 10s.; and to Ranfurly; fare, £1 single, return, £1 15s. Dredging industry. Lighted with kerosene. Formation: mica schist. Population of town, 266, and district, 450.

OPOTIKI (37° 58′ S. lat., 177° 18′ E. long.), a post town with money-order, savings-bank and telegraph office in the co. of Whakatane, riding of Waioeka and provincial district of Auckland; situated 170 miles SE. (205 postal) of Auckland (return fare by steamer 50s.), and 154 miles from Thames, being the most easterly of the Bay of Plenty settlements. It is situated on a beautiful flat, triangular in shape, having the Waioeka on one side and the Otara which flows into the Waioeka at a short distance below the wharf, on the other; the third boundary on the south is a good road running right across from river to river. A truss bridge, 480 feet long, spans the Waioeka (a new bridge is in course of erection), and another bridge 360 feet in length crosses the Otara. The streets are laid out to the cardinal points at right angles to each other, and lighted with kerosene. It has a mechanics' institute, Masonic lodge, with handsome and commodious hall, several stores, a town hall, temperance hall, a branch of the Bank of New Zealand, a public and day schools, an Anglican (St. Stephen's) church, also Roman Catholic church (school in connection with it, presided over by a Rev. Mother Prioress and five sisters of Notre Dame des Missions), and Presbyterian chapel. Hotels: Opotiki, Masonic, and Royal. A steam saw-mill is here, also cheese and bacon factory. The surrounding district is of a rich agricultural character, yielding enormous crops of maize, wheat, and mangolds; large quantities of fruit are also grown. There is a dairy factory, also an agricultural and pastoral association, holding annual shows of immense advantage to the district. In the vicinity several skirmishes took place during the Maori War, 1868-9, and it was here that the Rev. Mr. Volkner, Anglican missionary, was murdered by the Hauhau natives in 1865, under most revolting circumstances. District: agricultural and pastoral. Formation: alluvial deposit on clay and shingle bottom. Population (census 1896) of town district, 641; of riding, 1,225. Newspaper: *Opotiki Herald*.

OPUA (Auckland prov., Bay of Islands co., riding of Kawakawa), 151 miles NW. from Auckland. A post town, at junction of Kawakawa and Waikari river, with telephone and railway station, 8 miles from Kawakawa. Fares, 3s. and 2s. Trains run on Tuesdays and Thursdays, as traffic requires. Waitangi Falls in district, the site of the signing of Treaty of Waitangi. Has district school, in which religious services are held, and saw-mill. Water from wells. Mining and pastoral district. Population, 50; of riding, 1,155.

OPUNAKE (39° 27′ S. lat., 173° 53′ E. long.), a post town with telegraph station, money-order office and savings bank, situated near a bay on the sea shore, prov. dist. and co. of Taranaki, and riding of Parihaka; about 39 miles from New Plymouth. Hotels: Opunake and Middleton's. New Zealand Bank has a branch here, open daily, and there are seven stores, aërated factory, rope works, furniture factory, and numerous shops. Anglican, Roman Catholic, Presbyterian, and Wesleyan places of worship. Two State schools, one at Opunake and the other at Eltham Road. Town hall, Foresters' lodge (6,608), stipendiary magistrate's court. The Bay is regularly visited by steamers, a jetty having been built for their accommodation. Coaches run to New Plymouth three times a week, fare 13s., return 20s., and Hawera daily, fare 10s., return 15s.; also daily to Eltham, connecting with train. District: dairy farming and flax milling. Soil: a light loam; subsoil, a hard, sandy gravel. Population (census 1896) of town district, 400; of riding, 1,896. Newspaper: *Opunake Times*, published Tuesdays and Fridays.

ORARI (44° S. lat., 171° E. long.) (prov. dist. Canterbury, Geraldine co. Raukapuka riding), a post town, with money-order, savings bank, telegraph office and railway station, 19 miles from Timaru and 81 miles from Christchurch, the capital of prov. dist.; fares 10s. 3d. and 6s. 10d.; return 20s. 5d. and 13s. 8d. Has hotel, I.O.G.T. lodge, Primitive Methodist church, and public school. Agricultural district. It is 240 feet above sea-level. Population, 135.

OREPUKI (46° 20′ S. lat., 168° 10′ E. long.), a post town on Falls Creek, in prov. dist. Otago, co. and electorate Wallace, with a telephone, money-order and savings bank office, 18 miles W. from Riverton and 43 miles W. from Invercargill, with which it is connected by railway, being the terminus of the Riverton branch; fares, 7s. 4d. and 3s. 8d. There are three hotels, several stores, public school, Bank of New Zealand and National Bank of New Zealand (open Saturdays only), public library, Roman Catholic and Presbyterian churches, cheese factory, saw-mill, Oddfellows' lodge, police and railway station. Good fishing and shooting. Mining operations are confined to hydraulic sluicing and driving. New Zealand Railway Coal, Oil and Shale Company here. Population about 800, with district about 1,800.

ORMOND (Cook co. and riding of Gisborne), a post town, on Waipawa river, with telephone station, 12 miles from Gisborne. Has two hotels, police station, band, public school and three churches. Population of town, 183; with vicinity, 319; of riding, 1,369.

ORMONDVILLE (40° 4′ S. lat., 176° 15° E. long.) (co. Waipawa, riding of Ormondville, prov. dist. Hawke's Bay), a postal town, with money-order office, telephone station, savings bank, and station on the Wellington and Napier Railway, 66 miles from Napier, and 24 from Waipawa, situated in what is known as the Seventy Mile Bush, founded in 1877. Fares to Napier, 8s. 4d. and 5s. 7d. The River Mangarangiora runs near to the town, and the Manawatu flows at a distance of two miles. Wesleyan, Episcopal, Catholic, and Seventh Day Adventist places of worship, a public school and court-house. Hotel: Ormondville. Coach runs to Norsewood, fare 1s. 6d. Lodges of Good Templars, Rechabites, Oddfellows, and Knights of Labour meet here. The district is described as heavily timbered, with land of second-class quality, and much of the country rough and broken. Industries: saw-mills, butter factory. Population (census 1896) of town district, 453, now about 500; of riding, 977.

OTAGO *See* Dunedin.

OTAHUHU (36° 55′ S. lat., 174° 47° E. long.) is a post town, with money-order office, savings-bank, and telephone bureau, in the county of Manukau, provincial district Auckland, electoral district Franklin, on the great south road, 9 miles SSE. from Auckland, and within half-a-mile of the railway station; fares, 1s. 3d. and 10d. Coaches run to Auckland; fare, 1s. Hotels: Criterion, Star; also a temperance restaurant. The Tamaki Creek runs up to the township. One public school, two Roman Catholic schools, one for boys, and the other, taught by nuns, for girls, Anglican, Baptist, Wesleyan, Presbyterian, and Catholic places of worship, Salvation Army barracks, convent of the Sisters of Mercy, and a large public hall, Masonic hall: attached to the public hall is a public library. There are Masonic, Oddfellows, and Foresters' lodges, and Mutual Improvement Society. Numerous villas and cottages have been erected. It is spoken of as a remarkably healthy, clean, and pleasantly situated township; the scenery around is very picturesque, the Auckland isthmus at this point being only half a mile wide. Nixon monument here. The soil, principally volcanic, is of excellent quality. All trades are well represented in the town, and there are meat-freezing works, soap and candle factory, artificial manure works, and a large implement factory. Population of town about 1,600.

OTAKAIA (Otago prov. dist., Taieri co., and riding of Otakaia). A township 19 miles SW. from Dunedin, with a post,

money-order office, telephone, and railway station on the Dunedin-Invercargill line. Prohibition district, has school and Presbyterian church. Fares to Dunedin, 2s. 6d. and 1s. 8d. Agricultural district. Population (census 1896) of town, 42; of riding 1,622.

OTAKI (40° 38′ S. lat., 175° 14′ E. long.), a post-town, with savings-bank, money-order office, telegraph station, and telephone bureau, in the county of Horowhenua and riding of Otaki; Wellington prov. dist., situated about one mile N. of Otaki river, and 47 miles N. of Wellington, to which rail; fares, 6s. and 4s.; return 12s. and 8s. The railway station is about 1¼ mile from the township, 'buses ply to meet the trains; fare, 1s. The hotels are the Family, Jubilee, Railway, Central and Telegraph. Otaki has an Episcopalian (native), Wesleyan and Catholic churches, a church mission station, native school, public school, private school, public hall, Masonic, Oddfellows', Druids', and Knights of Labour lodges, branch of Bank of Australasia, magistrates' court-house, police station, several stores, tradesmen's premises, and settlers' houses. Agricultural and grazing district. Gorge scenery and a fine beach, much frequented by convalescents, visitors, and tourists. Otaki was the pioneer whaling station of the colony. The native church (of England) is a fine relic of ancient Maori carving; opposite the church is a statue of Te Rauparaha, the famous Maori conqueror. Local bodies are Horowhenua County Council, Otaki Road Board, and Te Horo Road Board. Population (census 1896) of town and vicinity, 836; of riding, 1,203. Newspaper: *Otaki Mail*.

OTAUTAU (46° 5′ S. lat., 167° 57′ E. long.) is in the co. of Wallace, prov. dist. of Otago, and riding of Otautau; it has post, money-order, savings bank, telegraph office, and railway station, 31 miles NW. of Invercargill, with which it is connected by rail *viâ* Thornbury, on the Nightcaps branch line. Saw-milling industry. Hotels: Otautau, Commercial, and Crown. Several stores, a school, agency, Bank of New Zealand and National Bank of New Zealand (open Fridays only), I.O.O.F. and I.O.G.T. lodges, Presbyterian church, Athenæum, saw-mill and flour-mill. Lighted with kerosene. Population, town district, 400.

OTOROHANGA (Kawhia co., Auckland prov. dist.), 114 rail miles from Auckland N. and 12 miles from Te Kuiti, on the Waipa river. There is a post and money-order office, savings bank, a telephone office and a railway station. Fares to Auckland, 14s. 4d. and 9s. 7d. Has Temperance boarding-house, timber mill, Land Purchase Office, and public school. Waitimo caves in vicinity. Height above sea-level, 122 feet. Population about 300, including Maoris.

OUTRAM (45° 46′ S. lat., 170° 16′ E. long.), a post town, with savings bank, money-order office, telegraph and railway station (Otago prov. dist., Taieri co., and riding of Outram), 19 miles W. from Dunedin, with which it is in connection by the branch from Mosgiel (9 miles), two trains daily; fares, 2s. 6d. and 1s. 8d. Hotels: Outram, and Terminus. It is prettily situated on the Taieri river, and is surrounded by good farming land—an alluvial fertile plain hemmed in by hills, the principal being Maungatua mountain, 3,000 feet high. Among the buildings are the Bank of New Zealand and the National Bank of New Zealand, Societies' hall and public library, Anglican and Presbyterian places of worship and Government school; a flour mill is here, I.O.G.T. and M.U.I.O.O.F. lodges, also several stores, and most of the trades are represented. Town is lighted with electric light by power from water wheel at flour-mill. Population (census 1896) of town district, 452; of riding 797.

OWAKA (46° 5′ S. lat., 169° 5′ E. long.) (Otago prov. dist., Clutha co., and riding of Catlins), a post town, 78 miles SW. from Dunedin and 6 miles from Glenoamaru, on the Catlins River, about 4 miles from the coast, with money-order office, savings bank, telephone and railway station. Has two temperance hotels, three schools, six saw-mills, dairy factory; Roman Catholic, Anglican, Presbyterian and Baptist churches; Oddfellows' lodge and police-station. Conveyance per rail; there is also regular communication by sea. Agricultural and pastoral district, magnificent scenery; Catlin's Lake and Blow Hole in vicinity. Population of town and district, 600.

OXFORD. *See* TIRAU.

OXFORD EAST (43° 21′ 42″ S. lat., 172° 14′ 17″ E. long.), a post town and money-order office, savings bank, telegraph and railway station (2) on the Kaiapoi line, 41 miles from Christchurch. It is located on the river Eyre, in the co. and electorate of Ashley (Canterbury prov. dist.). Hotels: Commercial, Terminus, and Harewood Arms, and there is a workingman's club. It has Episcopal, United Methodist, Presbyterian and Catholic places of worship, two public schools and a private school, a central Town Hall, an Oddfellows' hall, a mechanics' institute, a sub-agency of the Bank of New Zealand, four general stores, police station, skating rink, and in the district several saw-mills, creamery, printery, and a flour-mill. Among social institutions are Oddfellows' lodges, Cricket, Lawn Tennis, and Football Clubs. Agricultural, pastoral and timber district, lying about 1,200 feet above sea-level. Population (census 1896) of town, 153, of road district, 2,213; county, 11,913. Newspaper: *Observer*.

PAEROA (co. of Ohinemuri, riding of Paeroa, Auckland prov. dist.), a post town, with money-order office, savings bank, telegraph office, and railway station, 22 miles from Thames, on the Ohinemuri river. Steamer daily to Auckland, 70 miles. Coaches to Waitekauri, 13 miles, 5s., return 8s.; to Tauranga, 62 miles, 19s., return 30s. Has five hotels, Bank of New Zealand and National Bank, County Council offices, Oddfellows', Hibernian, Druids' and Masonic lodges, saw-mills, choral hall, brewery, warden's and police courts, State school, and Anglican, Presbyterian, Roman Catholic Wesleyan, and Salvation Army places of worship. District is principally mining, there being within a radius of 14 miles the goldfields of Karangahake, Owharoa, Waihi, Waitekauri, and Marototo. It is also agricultural and pastoral. Formation: basaltic. Lighted with gas. Water by reticulation. Population, 779; riding, 1,290; county, 4,759. Newspapers: *Hauraki Tribune*, thrice a week; *Ohinemuri Gazette*, twice a week.

PAHAUTANUI, a picturesque village, having post office and telephone station (Hutt co., ridings of Horokiwi and Porirua, Wellington prov. dist.), "situated on the Creek of the same name, at the foot of a steep hill, on the summit of which once stood a native war pah." It has three schools, an Anglican and a Roman Catholic place of worship, and an hotel (Pahautanui), Oddfellows' and Druids' lodges, three stores, blacksmith's and bootshop. Coach plies to and from Paremata every morning and evening to meet the train, fare 1s. It is 19½ miles due N. from Wellington, having coast communication. Oysters are cultivated. Grazing district with good fishing and shooting. Population (census, 1896) of village, 200; county, 244.

PAHI (37° S. lat., 175 E. long.) (prov. dist. Auckland, Otamatea co., Paparoa riding), 84 miles from Auckland. It has a post office, savings bank, and money-order office, and a telephone station; also hotel, saw-mill, school, Anglican church, and police station. Gum, fruit, oyster, and timber industries. Limestone formation. Population (census 1896) of town, 153; of riding, 359.

PAHIATUA (40° 25′ S. lat., 175° 57′ E. long.), (prov. dist. of Wellington, co. of Pahiatua, and riding of Pukemiku), on the Mangatainoka river, and the main road and rail to Masterton, between Woodville and Eketahuna, 110 miles from Wellington. It has a telegraph station, also money-order, post-office and savings bank, and a railway station on the Wellington-Napier line. "Surrounded by a vast bush country, mostly splendid land." Three stock sales held weekly. There are four hotels, Bank of New Zealand, Bank of New South Wales, several stores, nine butter factories with creameries, mechanics' institute, Oddfellows', Rechabites', Foresters', and Masonic lodges, a public school, and Anglican, Methodist, Presbyterian, Roman Catholic and Salvation Army places of worship. Town is lighted with water gas. The magnificent Makuri Gorge is eight miles from town, and the river is an ideal trout stream, being well stocked. Newspaper: the *Pahiatua Herald*, three times a week. Population (census, 1896), town, 1,158; county, 3,208.

PALMERSTON (45° 29′ S. lat., 170° 50′ E. long.), a borough, with post office, savings bank, money-order and telegraph office (co. and electorate of Waihemo, provincial district of Otago), 41 miles from Dunedin, and 38 miles from Oamaru; situated at the junction of the main north road (Dunedin to Oamaru) and the Dunstan road on Shag river. There are four trains each way daily, fares, 5s. 3d. and 3s. 6d. Coaches run to Naseby and Clyde *viâ* Waihemo twice a week. Hotels—Empire (coach office), North-Western, Palmerston, and Waverley. There are two mines, containing some of the best coal in Otago, at Shag Point, 3 miles distant, to the north of the mouth of the Shag river, which passes through a fertile valley of the same name, and empties itself into the sea. There are two flour-mills on the banks of the Shag, one being in close proximity to the town. The township is the centre of a good grain-producing district, and has one banking establishment—Bank of New Zealand. It has four churches—Presbyterian, Church of England, Roman Catholic, and Wesleyan; railway refreshment rooms, a court-house, an Athenæum, a town hall, a Masonic hall, and an Oddfellows' hall; several large stores, aerated water, and dairy factory, and a district high school. There are lodges here of Freemasons, Druids and Oddfellows, Caledonian Society, an Agricultural and Pastoral Association, and a racing club. The Allendale Coal Mine, within two miles of the Shag Point Coal Mine, was opened in July, 1887, by Mr. McIntosh, and the coal is of good heat-producing properties. Population of borough (census, 1896), 775; county, 2,148. The *Palmerston and Waikouaiti Times* is published every Friday morning.

PALMERSTON NORTH (40° 21′ S. lat., 175° 38′ E. long.) is a station on the Wellington-New Plymouth Railway, 88 miles from Wellington. It is in Oroua co., police district of Manawatu, and has a post, money-order, savings bank, telegraph office, and telephone exchange. All the streets are from one to two chains wide, and in the centre of the town is a public square of several acres, planted with ornamental trees. Communication with the capital *viâ* Wellington Manawatu Railway Company's line, through fare, 11s. 2d. and 7s. 6d., also by rail, *viâ* Wairarapa at same fares, or *viâ* Foxton, 24 miles distant by rail, fares, 3s. 1d. and 2s. 1d., thence by steamer, fare £1 5s. Distance from Wanganui 62 miles, fares, 13s. 2d. and 8s. 9d. Hotels: Commercial, Royal, Princess, Club, Clarendon, Central, Occidental, Phœnix, Masonic and others. Churches: English, Presbyterian, Wesleyan, Catholic, Bible Christian, Lutheran, Protestant, Baptist and Congregational. Banks: New Zealand, Union, and Australasia. There are three Government schools—Terrace End, Campbell Street, and College Street (total attendance, 1,300); Lyceum Theatre, Theatre Royal, Council Chamber, Bank chambers, drill shed, Foresters' hall, Oddfellows', Masonic hall, and public library. In the vicinity is a good race-course. Saw-mills, steam flour mill, sash and door factory, and two breweries. There are lodges of Masons, Oddfellows, Foresters, Orangemen, and Druids, Racing and Trotting Clubs, Building Society, Volunteer Corps and Mounted Rifles, and it is the headquarters of the West Coast and Manawatu Agricultural and Pastoral Association. The town is supplied with gas, and has a gravitation water supply from Tirites Range. The Borough is within 8 miles of the celebrated Manawatu Gorge. Palmerston is the junction of rail-

ways from Wanganui, Wellington, Napier, Wairarapa, and Foxton. District, an agricultural one. By the census of 1896 the population amounted to 5,910, now 6,200; and the county, 6,459. Newspapers: *Manawatu Times* (daily) and *Manawatu Standard* (daily).

PANMURE (36° 48′ S. lat., 174° 58′ E. long.) (Eden co., riding of Tamaki, Auckland prov. dist.), a pensioner settlement, 9 miles SE. from Auckland, situated on the west bank of the Tamaki river, with two hotels, two schools, Anglican, Roman Catholic, and Wesleyan places of worship, two stores, post and telephone office, and two tanneries. Foresters' court. Agricultural and pastoral district, rich soil. Population (census 1896), of town, 323, of riding, 1,982.

PAPAKAIO (prov. Otago, Waitaki co. and riding of Papakaio), 10 miles N. from Oamaru, a post town with telephone office and railway station, on the Oamaru-Duntroon line, 88 miles from Dunedin. Fares to Oamaru, 1s. 4d. and 11d. Hotel: Papakaio. Government school, library, and Presbyterian church. Mining, agricultural and pastoral district. Tertiary formation. Population, 300.

PAPAKURA (Auckland prov., co. Manukau), on the Papakura creek, is a post town with money-order and telegraph offices, savings bank, and railway station, on the Auckland-Mercer line, 20 miles from Auckland. Fares, 2s. 7d. and 1s. 9d.; return, 3s. 6d. and 5s. 2d. It has several stores, two hotels, State school, Roman Catholic, Anglican, Presbyterian and Christian Brethren places of worship. Orange and Masonic lodges, public library. Lighted with kerosene. Water from wells and tanks. Good boating and fishing. Timber industry. Agricultural and pastoral district. Formation: volcanic. Population of town and district, 270, of riding, 3,000.

PAPANUI (Selwyn co. and riding of Avon), a post town with money-order office, savings bank, telegraph and railway station, 5 miles from Christchurch. Fares 9d. and 6d; also tram, 3d. Has two hotels, public and a private school, Anglican, Wesleyan, Presbyterian and Roman Catholic churches. Agricultural district. Population (census 1896) of village, 479.

PAPAROA (prov. Auckland, Otamatea co., Paparoa riding) 85 miles from Auckland, reached by steamer and rail. It has a post-office, savings bank and money-order office and telephone station, has two schools, Mutual Improvement Society, and Wesleyan (2) and Anglican churches. Agricultural and pastoral district. Formation: sandstone. Population about 350.

PARNELL (36° 46′ S. lat., 174° 44′ E. long.), a municipal borough and suburb of Auckland, on the shores of Waitemata, adjoining Auckland (county Eden). The main thoroughfare is the Manukau road, one chain wide, reaching from the railway bridge to Onehunga. There are here four places of worship—Episcopal, Wesleyan, Presbyterian, and Roman Catholic, three hotels: Exchange, Windsor Castle and Alexandra, and numerous places of business, also post, telephone, money-order and savings bank office. 'Buses run frequently through to Newmarket, fare, 3d. Public school, St. Stephen's native school, and two private schools. Foresters' lodge. The Primate of New Zealand (Bishop Cowie) has his residence here. Town lighted with gas, and water from Auck and City water supply scheme. Population (census 1896) of borough, 4,196, now 4,364.

PAROA (Grey co., and riding of same name). A township with post-office, 5 miles from Greymouth. Population (census 1891) of town 74, of riding 554.

PARUA BAY (35° 45′ S. lat., 174° 30′ E. long.), 86 miles from Auckland, co. Marsden, prov. Auckland. A township, on Whangarei river, with post office, savings bank and money-order office, and telephone station. Has hotel, four schools, Settlers' Club. Lighted with kerosene. Water from tanks and wells. Mining, agricultural and pastoral district. Mount Mania, Whangarei water-fall, Abbey Caves in district. Broken country, clay soil, greensand bottom. Population, 130; riding, 750.

PATEA (39° 44′ S. lat., 174° 30′ E. long.) (county of Patea, electorate of Patea, police district of New Plymouth, provincial district of Taranaki). It has telegraph station, post, money-order and savings bank offices, 41 miles from Wanganui, and 66 miles SE. of New Plymouth by rail. Hotels: Albion, Central (the principal), and Masonic. There is rail communication with New Plymouth, Wanganui, Foxton, and Wellington daily. The Patea river, upon which the town is situated, is quite a large stream, with a comparatively open entrance, that has been improved by harbour works. It is easily accessible to good-sized steamers, the depth of water having been increased from 9 feet at low tides to 16 feet at high spring tides. The port of Patea is situated about a mile from the town. The latter slopes to the river, which is spanned by a substantial bridge. The high road crosses it and leads through the township of Waverley, ten miles distant, on to Wanganui, thence to Wellington. Principal buildings: court-house, town hall, literary institute, and places of worship belonging to the Anglicans, Presbyterians, Wesleyans, and Roman Catholics. Banks: New Zealand, Australasia, and New South Wales. Government and private schools, and hospital. Masonic, Foresters', Druids' societies, and social and debating club. Freezing and preserved meat works, fellmongeries, dairy factories, and brick yards. It is the port of a large and thriving agricultural and pastoral district. During 1899 improvements to the harbour were effected, costing £4,800, thus enabling larger boats to navigate the river. The district is a very healthy one. The railway now forms an unbroken line to New Plymouth on the one side, and Wellington on the other. A fixed red harbour light is shown from a lighthouse erected on the eastern side of the Patea river. Lighted with electricity. Exports during 1899 amounted to £103,208. Population, 750; county, 3,534. Newspaper: *Patea County Press*.

PATERSON'S INLET (46° 55′ S. lat., 168° 13′ E. long.) is on the eastern side, and in prov. dist. Southland, the co. of Stewart Island, electoral district of Awarua, 49 miles S. from Invercargill. There is a post office, and native school, used also as a church, the teacher acting under the Presbyterian Church of Otago as a missionary to the natives, Maories and half-castes. Saw-milling, fishing, and mutton-binding industries. Conveyance is per sea and rail *viâ* Bluff. Population of district, about 80, who depend for their support on oystering, and fishing.

Paterson Inlet is about 9 miles long from east to west. The average width probably exceeds 3 miles. It contains several excellent harbours. The inhabitants are chiefly of the native race, and the only land in occupation is near the entrance. To such as take delight in the rod and the gun, this place has many attractions; while for yachting perhaps it could hardly be excelled. Gold is found in several places, but hardly in payable quantities. Strong westerly winds prevail, but the climate is decidedly healthy. In ordinary winters frost and snow are almost unknown, while the summer heats are tempered by the proximity of the ocean. Formation: northern half palæozoic; prevailing rocks, granite; mica slate, felspar, albite, with crystalline dykes of greenstone.

PATUTAHI (Auckland prov., Cook co., Te Arai riding), coach 9 miles to Gisborne, thence boat. A post town, with telephone station. Has hotel, school and hall, in which Anglican, Presbyterian, Roman Catholic and Salvation Army hold services. Bacon curing factory. Agricultural and pastoral district. Population (census 1896) of town, 202; of riding, 802.

PEMBROKE (44° 39′ S. lat., 169° 15′ E. long.) (Otago prov. district, Lake co., and riding of Cardrona), a post-town, on Lake Wanaka, with savings bank, telephone and money-order office, 176 miles NW. from Dunedin, with which communication is by coach to Queenstown, rail or coach to Lawrence, thence rail to Dunedin, from which steamer to Wellington 400 miles distant. Coaches run to Cromwell, Cardrona, Arrow and Queenstown. Hotels: Wanaka and Commercial. Has public school (used for church service by Anglicans and Presbyterians), police camp, mechanics' institute and library, saw and flax mills, several stores, and tradesmen's premises. A paddle steamer plies on the lake, and is available for tourists. The district is purely an Alpine one. Its mountain and lake scenery is probably not surpassed south of the equator. Tourists arriving at Bluff take train to Invercargill, thence to Kingston, and steamer thence to Queenstown, coach to Pembroke during summer season, Tuesdays and Saturdays. Passengers arriving at Dunedin proceed by rail to Lawrence, thence coach, Mondays and Fridays, *via* Cromwell to Pembroke. There is deer-stalking in Hawea deer forest, 16 miles distant, can be reached by conveyance in three hours; huts have been erected for convenience of sportsmen; guides and stalkers may be engaged. Climate dry, atmosphere light and invigorating. Altitude above sea-level, 960 feet. The mountains range in height from 6,000 to 10,000 feet above sea-level. The lake is about 35 miles in length, averaging in width from 3 to 5 miles; it is well stocked with trout. Mining, agricultural and pastoral district. Population of town 100, of district 1,000.

PENROSE (36° 52′ S. lat., 175° 8′ E. long.) (prov. Auckland, co. Eden), with post and telegraph offices and railway station, 6 miles from Auckland, fares, 10d. and 7d. The Onehunga line branches off here. The Auckland Company have large abattoirs between Penrose and Otahuhu, and the Union Oil, Soap and Candle Company's and Kempthorne, Prosser & Company's large manure works carry on operations adjoining the premises of the Auckland Freezing Co. Pastoral district. Formation: volcanic. Population about 200.

PETANE (39° 17′ S. lat., 176° 56′ E. long.) (Hawke's Bay co., Petane riding), a post town, with telephone station, 7 miles from Napier, 5 miles from the port, situated on the River Esk (native name Waioenanga), which empties into the inner harbour of Port Napier. Coaches run twice daily to Napier, fare, 1s. Hotel: the Petane, re-erected and replete with every accommodation for families and tourists Town has public library with about 600 vols., several stores, factory, and district school. Church service is held in the schoolhouse. It is the first stage of the Taupo Royal mail line of coaches, being on the main line of road to Wairoa and Gisborne, considerable progress being made. Farming and grazing district, dairy farming largely carried on. Formation: the flats are alluvial; the hills, for a distance of 15 miles from the coast, are limestone, beyond, to the boundary, of pumice character, with ironstone cropping out on the higher ranges. Population (census 1896) of town 170, of riding 728. This does not include the native population, about 150, of a pah or village, beautifully situated on the banks of the Esk, near the coast.

PETONE (41° 11′ S. lat., 174° 48′ E. long.) (county Hutt), a borough with mayor and nine councillors, with post, money-order, telephone, and savings bank offices, may be considered suburban to Wellington, being only 7 miles distant, on Northern shore of Port Nicholson, and connected with it by rail, fares, 1s. 1d. and 9d. It has, through the opening of the railway and the establishment of several industries, considerably progressed, and consists of numerous dwellings, and a number of villa residences, public recreation ground of 30 acres, several shops, stores, English, Roman Catholic, Wesleyan, and Presbyterian places of worship, agency Bank of New Zealand, Masonic hall, Oddfellows' hall, which is used for concerts and entertainments, Temperance hall, and Salvation Army barracks, public school, police station, several sports clubs, volunteers, working-men's club, Mechanics' Institute Masonic, M.U.I.O.O.F., A.O.F., A.O.D., and I.O.G.T. societies, volunteer fire brigade, and a drillshed are here, and four hotels: Grand National, Central, Empire, and Victoria. Among the works are the railway workshops, the Gear Meat Preserving, Fellmongery

and Refrigerating Works, basket factory, brewery, rope walk, soap works, and toilet soap and perfumery works, timber mill, and the Woollen Manufacturing Company's Works, the last-named when in full work employing about 200 hands; the value of property is £340,000. Population of borough, 3,500. Newspaper: *Hutt and Petone Chronicle.*

PICTON (41° 6′ S. lat., 174° 8′ E. long.) is the chief port of the provincial district of Marlborough, at the head of Queen Charlotte Sound (Waitohoi Bay), about 18 miles from the Tory Channel entrance, and 18½ miles from Blenheim, and is considered one of the healthiest places in the colony. A substantial wharf, with a depth of over 26 feet of water at low tide, affords accommodation for the loading and discharge of large ocean-going steamers. The harbour is one of the largest and safest in the colony, and has ample depth of water. The Bank of New Zealand and several Insurance Companies are represented. The places of worship are Anglican, Roman Catholic, and Presbyterian churches. Has public school, and hospital with 24 beds. Masonic and Foresters' lodges and institute. A railway connects the town with Blenheim (two trains each way daily); return fares, 4s. 6d. and 3s.; an extension is being built towards Canterbury. Hotels: Post Office, Pier, Federal Terminus, and Clarendon. It has a money-order and post-office, savings bank, telegraph station, and a court house and police station. Queen Charlotte Sound has some historic interest, as it was a frequent resort for Captain Cook for repairing and revictualling his ships. Steamers run almost daily between Picton, Wellington, and Nelson. The Sounds county adjoins, and settlements are somewhat scattered, communication with Picton being by boats and small steamers. Minerals of various descriptions, the principal being gold and antimony, have been found in the Sounds. Coal has been found near Picton, but no main seam has been yet discovered. Freezing works have been erected, and from which beef, mutton, &c., will be shipped direct to Europe. Vessels now leave Picton for London direct with cargoes of frozen mutton, wool, grain, flax, and other produce. Exports for 1899-1900 amounted to £150,118. Population of town (census 1896), 870; and county, 6,330. The *Marlborough Press* is the local newspaper.

PIGEON BAY (43° 75′ S. lat., 172° 62′ E. long.) (prov. dist. Canterbury, Akaroa co.), 21 miles from Christchurch; has a post office, savings bank, money-order office, and telephone station. Coach to Akaroa three times weekly, steamer to Lyttelton. Has two schools, Oddfellows' lodge, No. 6,174 I.O.O.F., Presbyterian church, and is lighted with kerosene. Pastoral district. Population 369.

PIRONGIA (38° 23′ S. lat., 175° 11′ E. long.) (co. and electorate of Waipa, police district of Waikato, province of Auckland) is a post town, with money-order and savings bank office, and telephone station, at the base of the Pirongia Mountain and the head of navigation of the river Waipa, 108 miles from Auckland, from which there is a daily mail. There is daily coach communication with the Te Awamutu railway station; thence per rail, and a river steamer trades to and from Ngaruawahia. Alexandra has hotel, a public school, public hall, public library, creamery, two churches, St. Saviour's (Episcopal), St. Joseph's (Roman Catholic), and one store. Alexandra has numerous mementos of the Maori wars. Hotel, Alexandra. Population about 70.

PLEASANT POINT (prov. dist. Canterbury, co. and riding Levels), a post-town with money-order office, savings bank, telegraph office, and railway station, 13 miles from Timaru, 106 miles from Christchurch, on Tengawai creek. Fares, 1s. 9d. and 1s. 2d. Coach runs to Timaru. Has two hotels, mechanics' institute, Oddfellows' lodge, State school, Roman Catholic, Presbyterian and Anglican churches. Wool scouring and fellmongery industries. Agricultural and pastoral district. Population about 500.

POKENO (Manukau county and Maungatawhiri riding, Auckland prov.), a post-town with money-order office, savings bank, telegraph and railway station, 40 miles from Auckland. Fares, 5s. 1d. and 3s. 5d. Has a State school and Anglican, Presbyterian, and Wesleyan churches and flax industry. Chiefly pastoral district. Volcanic. Population of district, 1,100.

PONSONBY (36° 46′ L. lat., 170° 46′ E. long.), a western suburb of Auckland, with post office, money-order, savings bank, and telephone offices, situated on rising ground overlooking the City and Harbour, about 1½ mile distant from Auckland, with frequent tram and 'bus communication; fare, 3d. Hotel: Ponsonby Club and Suffolk. There are several private schools, three public schools, a grammar school, police station, venetian blind, soap, baking powder, furniture (rattan and wicker), and bottling factories and pottery works, also sawmills at Coxe's Creek, and nursery for fruit, flowers, &c. Places of worship—Episcopal, with parsonage, Presbyterian, Roman Catholic, Wesleyan and Baptist,—convent, R.C. orphanage schools. Lighted with gas. Masonic and Oddfellows' lodges. Population of town and district, 8,100. Newspaper: *Ponsonby Sentinel and Home Bay Journal.*

PORANGAHAU (40° 15′ S. lat., 176° 46′ E. long.), a postal township, with money-order, savings bank, telephone bureau, and telegraph office, on the coast, 74 miles from Napier (prov. dist. Hawke's Bay, county Patangata, Porangahau riding). Coach runs N. to Waipukurau, 15s., and S. to Herbertville. The river of the same name flows within a short distance through good sheep-farming and agricultural country. In the township are public library, district school, Episcopal church (St. Michael's), two stores, and some tradesmen's premises. Hotel: Duke of Edinburgh. Lodge of Oddfellows. Population, 220; district, 500.

PORT AHURIRI, or **SPIT** (39° 29′ S. lat., 176° 55′ E. long.), a suburb of Napier, in prov. district of Hawke's Bay, with post office, savings bank, money-order and telegraph office and railway station. It is 1 mile from Napier, and 200 miles north-east of Wellington. There are six hotels, custom house, two schools, Oddfellows', Foresters', and Good Templars lodges, and Presbyterian, Wesleyan, and Anglican churches. Industries; meat and fish freezing, fish smoking, wool dumping, foundries, sheep dip. The town, which is the shipping port for Hawke's Bay, is lighted with gas. Eleven small steamers, employing 50, are engaged in fish trawling, fish exports by train averaging about 20 tons a week. Water from artesian wells. Formation: limestone and marine deposits. Population about 1,500.

PORT ALBERT (prov. dist. Auckland, co. Waitemata and riding of Albert), a post town on the Orwawharo, with money-order office, savings bank and telephone station, situated about 65 miles from Auckland, with which it has bi-weekly mail communication. It is a Nonconformist settlement, situated on a navigable river which falls into the Kaipara Harbour. Steamer to Helensville (40 miles), thence rail (38 miles) to Auckland. It has a wharf, two accommodation houses, a public school, Wesleyan and Christian Brethren churches, gum, fruit, and timber industries, Good Templars' lodge, agricultural society, and a handsome public hall and library, but no licensed beer-houses. The residents are engaged in mixed farming and fruit culture. There is also an export trade in timber and Kauri gum. Population of town 56, with vicinity 193.

PORT CHALMERS (45° 49′ S. lat., 170° 39′ E. long.), so named after Dr. Chalmers, a municipal township, county and electorate of Waikouaiti, prov. dist. Otago, with post office, money-order, savings bank and telegraph office, railway and telephone station, situated at the entrance of the harbour of Otago, and distant from Dunedin about 8 miles NE., of which city it is the port. It lies about midway between Taiaroa Heads and Dunedin. A fixed dioptric red light, visible 20 miles in clear weather, is shown from the lighthouse tower (39 feet high) on Taiaroa Head. A railway has been constructed between the two towns, and trains run each way daily, fares, 1s. 1d. and 9d.; return, 1s. 6d. and 1s. This line is on the narrow-gauge principle. The town is divided into four wards, East, High, Middle and South. The places of worship are Church of England, Presbyterian, Roman Catholic, Wesleyan, and Congregational churches. Gospel meetings at the Sailors' Rest, and the Salvation Army in their barracks. There is a district high school and Roman Catholic school, and municipal and Government buildings erected in 1889 at a cost of £4 200. Banks: National Bank and Bank of New Zealand. Hotels: Provincial, Marine, Port Chalmers, Chick's, and George. A Sailors' Rest has been built at a cost of £800; it was opened in May, 1881. Mechanics' Institute, open free to sea-faring men, public baths, a town hall, Foresters' hall, and a garrison hall. Among the industries are gas works, cordial factory, fish-curing establishments, tannery (at Sawyer's Bay), Milk Supply Company and bone and manure factory. There are several social and athletic clubs, a fire brigade, torpedo corps, naval artillery, and lodges of Druids, Foresters, Good Templars, Oddfellows, Orangemen, and Masons. The railway pier is 1,300 feet long, at which vessels over 7,500 tons register have discharged their cargoes. Another good pier also affords shipping facilities. A jetty 1,000 feet long is reserved for steamers' cargo and passengers solely. A steamer wharf was erected in 1880. The Otago graving dock, formally opened in May, 1872, is one of the largest in the southern hemisphere, costing £56,069. The floor is 328 feet long, and width 41 feet; the length and width at the copings are respectively 342 feet and 68 feet. The depth of water at the dock varies, according to the tide, from 17 feet 6 inches to 21 feet 6 inches. There are extensive workshops and machinery in connection with this dock, and a powerful steam hammer is in use, the sheer legs erected will lift 80 tons. Cool chambers, belonging to the Otago Dock Trust are being extended, at a cost of £5,000. The Port Chalmers stone is extensively used for building in Dunedin and other cities; the quarries are connected by a siding with the railway, and the proprietors (Port Chalmers Quarry Co.) have introduced Brunton and Frier's stone-dressing machines. Union Company have erected workshops costing £4,000. The town is lighted with gas, and supplied with water collected in a reservoir at the head of Sawyer's Bay Valley, and conveyed in pipes for a distance of two miles. Harbour works have been carried out and are proving successful. At Taiaroa Heads, formerly only a pilot and signal station, fortifications and barracks have been erected, and a settlement has been formed. Regular steam ferry service with Portobello on opposite shore of harbour, connecting with trains to Dunedin and thus affording trading and tourist convenience. Population of borough (census 1896), 2,084.

PORT CHARLES. *See* COROMANDEL.

PORT WAIKATO (prov. dist. Auckland, Raglan co., Te Akau riding), 60 miles south from Auckland, on Waikato river. A post town with a court-house and flax and milling industry. A summer resort with good fishing. Formation: limestone and slate. Population about 25; district, 150.

POVERTY BAY. *See* GISBORNE.

PREBBLETON (43° 36′ S. lat., 172° 37′ E. long.), a post town, with telephone communication, and railway station, in Canterbury prov., co. of Selwyn, and riding of Lincoln, 9 miles from Christchurch; coach fare 1s. return; train, 1s. 3d., 10d.; return, 2s. 6d., 1s. 8d. It has Government school, Wesleyan, Episcopal and Presbyterian churches, general stores, one hotel, town hall (holding 600), public library, Orange, Oddfellows (M. U. and I. O.), and A.M.C. lodges and an agricultural implement works. Water from wells. Farming district. Population of district, 1,200.

PUKEKOHE (37° 14′ S. lat., 174° 55′ E. long.), prov. dist. Auckland, county Franklin, riding Pukekohe West, post town with money-order, savings bank, telegraph, telephone, and railway-station, 31 miles from Auckland city. It is on the Auckland and Waikato Railway, fares, 4s. and 2s. 8d. It has one hotel, Masonic lodge, literary society, Band of Hope, several stores, several tradesmen's premises, three boarding houses, a public library, two public halls, and police station. In the vicinity are Anglican, Presbyterian, Wesleyan, Salvation Army, and Roman Catholic places of worship, a public and a Roman Catholic school, and about 1¼ miles from the railway station is a large creamery and butter factory. Formation: old scoria, well covered with heavy clay loam. Good agricultural district. Population of district, about 1,200.

PUKERAU (prov. Otago, Southland co., Mataura riding), post town, with money-order office, savings bank, telegraph, telephone bureau and railway station, 9 miles from Gore and 49 miles NE. from Invercargill. Fares, 6s. 3d. and 4s. 2d., on Taylor's Creek. There is a State school, Presbyterian and Roman Catholic churches, brick and tile works, lignite coal mines and a boarding-house. Mining, agricultural, and pastoral. Population, 126; district, 160.

PUKETAPU (39 15′ S. lat., 176° 43′ E. long.), a post and telegraph station, in the prov. dist. of Hawke's Bay, county of Hawke's Bay, and riding of Puketapu; with telephone office, 10 miles from Napier, with which it has daily coach communication and 4 miles from Taradale. It is situated on the left bank of the Tutaekuri, has hotel, a district school, in which Episcopal services are held, and a public library of 5,000 vols. Principally a grazing district. Wool-washing industry. Limestone formation. Population, 700.

PUKEURI JUNCTION (Waitaki co., Papakaio riding), a post town, with money-order office, savings bank, telegraph and railway station, 6 miles N. from Oamaru and 84 miles from Dunedin. Fares, 10s. 7d. and 7s. 1d. Has hotel, public library, and Government school. Dairy factory and cheese factory Agricultural district. Population (census 1891) of town, 168; of riding, 1,868.

PUNGAREHU, a town in the provincial district of Taranaki, county of Taranaki, and riding of Parihaka, with post office, savings bank, money-order, and telephone office, 26 miles from New Plymouth, 13½ miles from Opunake, and 43½ miles from Hawera, situated on the main South Road, and on Kopoaiaia stream. Cape Egmont lighthouse is about 3 miles distant. There is a police-station and lock-up, State school, two stores, and dairy factory. Water from wells. Mail six times a week. Farming district. Population of town, 34; of riding, 1,775.

PURAKANUI (Waikouati co. and riding of Blueskin, prov. dist. Otago), 12 miles NE. from Dunedin, and about 4 miles from Port Chalmers; a post town, with telegraph office and railway station. Has public library, public school and Presbyterian church. Creamery. District is pastoral. Fares from Dunedin, 2s. 2d. and 1s. 1d. Population of district, 300.

QUEENSTOWN (45° 2′ S. lat., 168° 39′ E. long.), a post town, with savings bank, money-order and telegraph offices, a mining, pastoral, and agricultural township and municipality and county town, in the provincial district of Otago, in the county of Lake, 109 miles from Invercargill, 196 miles NW. of Dunedin, prettily situated on the eastern shores of Lake Wakatipu. Ben Lomond, 5,747 feet above sea level, is on the NW. side, and the Remarkables, 7,688 feet above sea level, on the SE. side. On the opposite side of the lake are Mount Cecil and "Walter Peak," 6,477 feet and 5,956 feet respectively. There is communication with Dunedin on Monday, Wednesday, Friday, and Saturday by coach to the Lawrence railway station, and also with Dunedin and the Bluff daily by steamer across the lake to Kingston, thence by rail. The steamer plies six times a week, fare, 5s. 6d. and 3s. 6d.; from Kingston to head of lake, 6s. 6d. and 4s. 6d. Coaches run to Arrowtown, Cromwell, and Lake Waiaka. Four hotels: Mountaineer, Eichardt's, Supreme Court, and McBride's Family. The town contains a town hall, and a garrison hall, each adapted for use for theatrical and other purposes, free library and public reading room, a brewery, and numerous extensive brick and stone stores. It is lighted with kerosene. The town hall, erected by a joint-stock company, is in the Italian style of architecture, and is an ornament to the town. Bank of New Zealand. The Episcopalians, Presbyterians, Wesleyans, Roman Catholics and Salvationists have places of worship here; there are Masonic, Oddfellows', and Foresters' lodges; Insurance companies, public school, also Dominican convent, built in 1883, and school, established 1865. The picturesque beauty of the town and the grand scenery of Lake Wakatipu (nearly 60 miles long), at the northern extremity of which Mount Earnslaw, amidst innumerable Alpine peaks, rears its massive head nearly 10,000 ft. above the level of the sea, have attracted favourable notice, and a promising future is before the town. Four miles distant is situate the township of Frankton. Hotels: Antrim Arms; here also are the district hospital, a large institution, supported by voluntary contributions and Government grant-in-aid, and the Brunswick flour mills. Village of Lower Shotover is four miles distant. The rail allows of travellers reaching Queenstown in a day's journey from Dunedin and Bluff Harbour. There are three steamers trading on the lake. There is a splendid water supply from One Mile Creek, a mountain streamlet about a mile distant. At the head of the lake an antimony lode of some thickness was discovered in 1880; copper has also been found. About 3 miles to the north gold dredging companies are working. Population of borough (census 1896), was 779, now 750; county, 2,663. The *Lake Wakatip Mail*, the local newspaper, was established in May, 1863, shortly after the opening of the Wakatipu goldfields.

RAGLAN (37° 46′ S. lat., 174° 53′ E. long.), a township, with post, savings bank, telephone, and money-order offices, on the W. coast of the Northern Island (in the county of Raglan, prov dist. of Auckland, and riding of Karioi), on the south shores of Whaingaroa harbour, 124 miles from Auckland. The nearest railway stations are Frankton Junction and Hamilton. One steamer makes fortnightly trips between this place and Auckland, *viâ* Onehunga (fare £1). Coach runs to Hamilton, thence by rail; coaches to Hamilton run *viâ* Waitetuna and Whata Whata (fare 10s.). It has Church of England and Congregational churches, and a district school. Harbour View and Royal hotels. Several boarding houses, stores, shops, gaol, mutual improvement society, court-house, and police-station. The harbour of Whaingaroa is about 20 miles N. of Kawhia harbour, and 14 miles N. of Aotea harbour. It is accessible to vessels of considerable size and tonnage. Excellent timber well adapted for building and other purposes, as well as ironstone and other minerals, is found at the mountain on the south side of the harbour, and it is reported that coal in abundance is to be had a few miles inland. The district coal-bed is supposed to be the same as at Huntly. Medicinal springs have also been found here. Raglan is an agricultural and pastoral district. There are several flax mills, a cheese factory, and a saw mill in the district. Mangaio timber (valuable for coach-building purposes) is exported. Bridal Falls about 8 miles distant have a sheer descent of 196 feet. Formation: limestone, coal, iron. Population of town about 126; of riding, 700; county, 1,545.

RAKAIA (South), (43° 42′ S. lat., 172° 0′ E. long.), a post town, with money-order, savings bank, and telegraph station, (Ashburton co. and Canterbury prov.), 36 miles SW. of Christchurch. It is a junction station on the Main Line to Timaru, three trains daily, fares, 6s. 2d. and 3s. 1d., and is located on the banks of the River Rakaia. Hotels—Railway and Rakaia. Branch Bank of New Zealand (open Mondays and Thursdays), and there are Episcopal, Roman Catholic, Wesleyan, Methodist and Presbyterian churches, Masonic, Oddfellows' and Orange lodges, a public school, railway station and sheds, lock up, and public library. It lies in an agricultural and pastoral district, and the land is admirably adapted for the growth of cereals; nearly all of it has been bought up. Population (census 1896) of town, 458; of riding, 1,558.

RANGIORA (43° 14′ S. lat., 172° 43′ E. long.), a borough, with postal, savings bank, money-order, and telegraph offices and railway station, on the Christchurch and Amberley line (co. of Ashley, prov. dist. of Canterbury), 20 miles NW. from Christchurch. Three trains run daily—fares, 2s. 7d. and 1s. 9d. The line to Oxford branches off from here. Hotels—Junction, Red Lion, Plough, and Temperance hotel. It is the farming centre of North Canterbury, and a great grain-growing locality; the agricultural resources of the district keep extensive flour-mills and flax mills fully employed. Buildings: Literary Institute, Volunteer Hall. Banks: New Zealand, and Union. Public school and High school. Baptist, Anglican, Methodist, Catholic, and Salvation Army places of worship. There are several stores, shops, the Burton brewery. Clubs and Societies: Football, Cricket, Bicycle, Volunteer Corps, Rifle, Brass Band, and Fire Brigade, and Lodges of Masons, Oddfellows, Druids, and Sons and Daughters of Temperance. Population of borough (census 1896), 1,869. Newspaper: *Rangiora Standard*.

RANGIRIRI (37° 30′ S. lat., 175° 20′ E. long.), on the Waikato river, is a post town in the prov. dist. of Auckland; Waikato county and Rangiriri riding, with money-order office, savings bank, telephone and railway station, 56 miles from Auckland. Fares 7s. 1d. and 4s. 9d. The battle of Rangiriri was fought here between the Maoris and Imperial troops Nov. 21, 1863. Has one hotel, school, and pumice works. Coal mining is carried on. Government experimental farm about 2 miles from township. Formation: Alluvial flats, granite ranges and clay bottom. Population of town and vicinity, 150.

RANGITATA (Canterbury prov., Geraldine co., Raukapuka riding), a post town, with telegraph and railway station, on river of same name, 25 miles from Timaru and 75 miles from Christchurch; fares from which, 9s. 6d. and 6s. 4d.; distance to Wellington, 256 miles. Has hotel and State school. Lighted with kerosene. Trout fishing and shooting. Agricultural and grazing district. Population, 140.

RAVENSBOURNE (district Otago, borough of West Harbour), a post town with telegraph and railway station. Has hotel, one public school, library; Presbyterian, Congregational, Anglican and Primitive Methodist churches. Population of district (census 1896), 1,366; now, 1,380.

RAWENE (35° 32′ S. lat., 173° 31′ E. long.), a town in the county of Hokianga (which *see*), riding of Rawene and prov. dist. of Auckland. It has a post and telegraph office, money-order and savings bank. It is pleasantly situated at the junction of the Waima and Taheke rivers with the main waters of the Hokianga river, about 18 miles from the entrance, and 198 miles from Auckland, reached by coach to Russell, steamer thence. It has Wesleyan church, Oddfellows' lodge, a school, police-station and council chambers, several stores, and hotel. Timber and gum industries. Population, 120; of riding, 197.

REEFTON (41° 55′ S. lat., 172° 5′ E. long.), a mining township, on the Inangahua River, with telegraph, savings bank, post and money-order office (principal town of Inangahua co., riding of Reefton, Nelson prov. dist.), 47 miles NE. from Greymouth, is a place of importance owing to the auriferous reefs and alluvial grounds in the vicinity. It is reached by train daily from Greymouth or Hokitika, and by coach daily from Westport (46 miles N.), and train twice weekly from Nelson (120

miles N.). The hotels are Dawson's, Stevenson's, Railway, and 15 others. Banks: National, and New Zealand. Athenæum, school of mines and museum, and public reading room. Government buildings: court-house, gaol, survey office, railway station, county council chambers, and post-office; in all, the town contains upwards of 500 buildings. Places of worship: Church of England, Presbyterian, Roman Catholic, and United Free Methodist; public and Roman Catholic schools, and a hospital. Lodges of Masons (E. and N. 2), Oddfellows, Foresters, Druids, Good Templars, Cricket, Football, and Jockey Club and Fire Brigade. Coal of excellent quality is found in the district over an area of 40 miles square. Formation: quartz rock, mica schist. Reefton is now the most prosperous quartz mining district in the colony, and the annual output of gold is steadily increasing. The town is lighted with electricity, and has a first-class water supply. Population (census 1896), 1,591; of riding 2,011. There are two newspapers: the *Inangahua Herald* (established 1872), and the *Inangahua Times*.

RENWICK (Marlborough co. and riding of Omaka), 6½ miles from Blenheim, a post town, with money-order office, savings bank, and telephone station. Coaches run to Blenheim, Nelson, Havelock and Waitara Valley. Has two hotels, flax mills, Oddfellows' lodges, and public school, Presbyterian and Anglican churches. Population, 450.

RICCARTON (43° 30′ S. lat., 172° 38′ E. long.), Province Canterbury, co. Selwyn, and riding of Riccarton, has post and money-order office, telegraph and telephone stations, and savings bank office. It is one of the earliest settlements in the Middle Island, the original owner, Mr. Deans, having settled before the Canterbury Association took possession. A portion still remains in Mr. Deans's hands, but much of it has been sold. The river Avon flows through the district and furnishes a valuable motor power. One of the largest flour-mills in Canterbury is worked by it. Coaches run at short intervals during the day for Christchurch, past Riccarton to Upper Riccarton beyond, fares 7d. and 5d., steamer to Wellington. Has three hotels, State school, Anglican and Wesleyan churches, and Oddfellows' lodge. It lies immediately next to the West Town Belt of the city of Christchurch, and is joined on the north by Fendallton, where are the road board offices, a school, and Church of England. Upper Riccarton lies to the west. Some of the finest agricultural land surrounds Riccarton. Population, 422.

RICHMOND, 41° 30′ S. lat., 170° E. long. (co. Waimea and riding of Stoke), borough, at the head of Tasman's Bay, with post, savings bank, money-order, telephone, telegraph and railway station, 8 miles from Nelson (which *see*). Coach runs to Riwaka. Has three hotels, Working Men's Club, Oddfellow and Good Templar lodges, two Government schools, and Anglican, Wesleyan, and Baptist churches. Lighted with kerosene and acetylene gas. Flour-mill, bacon and butter factory. Good water supply from reservoir on the hills. Pastoral district. Excellent deer shooting and river fishing. Good roads for cyclists. Shingly formation, fossiliferous deposits. Population of town and district, 620; of riding, 1,244.

RIMU (Hokitika prov. dist., a post town, with money-order, savings bank, and telephone station, Westland co., and riding of Kanieri), 5½ miles from Hokitika. Has two hotels, State school, Roman Catholic and Anglican churches, Salvation Army, reading-room, School of Mines. District is a mining one (reached by coach). Population, 250.—*See* also Woodstock.

RIVERSDALE (45° 56′ S. lat., 168° 42′ E. long.), (prov. dist. Otago, Southland co. and riding of Hokonui) a post town with money-order office, savings bank, telegraph and telephone exchange and railway station, on the Waimea Plains branch railway, 58 miles from Invercargill, and 117 miles SW. from Dunedin, in co. Southland. Fares from Dunedin, 9s. 10d.; return, 19s. 8d. A mail coach runs daily between Riversdale and Waikaia. Hotels: Riversdale and Railway. It has several stores, saddlers', bakers', butchers', blacksmiths', and shoemakers' shops, grain and wool stores, an Athenæum, a drill hall, Roman Catholic, Presbyterian, and Anglican churches, Oddfellows' (M. U.) lodge, State school, and offices of the New Zealand Agricultural Company. Population (census 1896), 265; of riding 2,694.

RIVERTON (46° 20′ S. lat., 168° E. long.), a post town, with money-order, savings bank, and telegraph office on the seacoast, at the junction of the Aparima—or Jacob's—river with the Paurakino. The estuary formed by the junction of these two rivers is one of the finest in the Australasian Colonies, presenting at flood tide a splendid sheet of land-locked water 2,000 to 3,000 acres in extent, greatly prized for regattas and abounding in romantic scenery. Riverton is situated in the provincial district of Otago and county of Wallace, 25 miles from Invercargill, with which it is in railway connection, by the branch line from Makarewa junction, two trains daily, fares, 3s. 4d. and 2s. 3d., and 170 miles SW. of Dunedin. Hotels: Commercial, Wallace, County, Great Western, Railway, Globe, Aparima, and Carrier's Arms. Banks: New Zealand and National Bank of New Zealand. Government buildings: post office, court-house, hospital, new brick building with 30 beds, costing over £2,000, large county and town council offices and hall, school buildings, a railway station, and public school. Places of worship: Presbyterian, Church of England, Wesleyan, Plymouth Brethren, Christadelphian, and Roman Catholic. Athenæum and hospital are here. Masonic and M.U.I.O.O.F. lodges. Coasting vessels frequent the port, the entrance to which is somewhat intricate, as the bar is constantly shifting; depth of water varies from 8 to 11 feet. There are in the neighbourhood saw-mills and flour-mills, and the fishing industry has assumed considerable dimensions. There is steamer communication with Dunedin one a month. Boat-building is carried on to some extent. The reefs discovered in the Longwood range, a few miles distant, have been intermittently worked, with but little success. The rich pasture lands have given an impetus to the dairy factory movement, and several of these factories have been established. Berndtson's water race, and a second large one constructed by the Round Hill Mining Company, provide splendid water-power for carrying on extensive mining operations on the elevator system at Round Hill, nine miles from Riverton. Besides this and the Ourawera Company there are numerous individual claims, mostly held by Europeans, the population of Canton, the Chinese quarter, having dwindled down to 150. Riverton is connected by rail with the gold-mining centre of Orepuki, the coal-producing centre of Nightcaps, and by track with the newly-opened country at Preservation, west of the Waian. Population of the borough, 980; county, 7,500. Newspaper: *Western Star and Wallace County Gazette*, published Tuesdays and Fridays.
